AS THE result of what was a pleasing feature at the recent Printing Exhibition, namely, the sale of sunflowers by the Sun Engraving Co., Ltd., in aid of the funds of the Printers' Pension Corporation, there accrued the appreciable sum of £76 17s. 1d.

## German Paper Exports.

**Where Licences are Not Needed.**

The *Deutscher Reichsanzeiger* for May 3rd contains a notice issued by the State Commissioner for Export and Import Licences, acting under an order of the Reichswirtschaftsminister, authorising the German Customs Officers as from April 29th to permit the exportation of the following goods from Germany, without licence:—

**PAPER AND PAPER WARES.**—Transfer pictures and picture paper for children (not suitable for industrial purposes); paper and pasteboard covered wholly or partly with spun wares of any kind, or with external or internal layers of spun wares of any kind or of wire gauze; slate paper and sheets thereof, not combined with other materials; pumice stone, glass, rust, sand, emery and all other smoothing or polishing paper; paper under-clothing, even covered wholly or partly with cotton tissues or with external or internal layers of spun wares of any kind; "Attrappen" and cases; sock soles (*Einlegesohlen*), articles for use at carnivals, masks and children's flags; finely painted wares; articles of papier-mâché, hardened paper wares, lamp-shades, lanterns and other fine or fancy articles, flowers; manufacturers of paper, cardboard, carton pierre, wood pulp, cellulose, vulcanised fibre, papier-mâché, combined with yarns or spun wares of any kinds, with finely shaped wax wares, with semi-precious stones, mother of pearl, ivory, celluloid or similar moulding or carving materials, gilt or silvered common metals (figures, busts, Jacquard cards, etc.), except "Kartonnagen" and notice sheets; embroideries on paper or pasteboard; cigarette holders and cartridge cases.

## Gazette.

### A WORD OF CAUTION.

In giving the official Gazette information, it must be distinctly understood that we take official records as we find them, and accept no responsibility for inaccuracies, while, as an almost invariable rule, the facts will be found correct. We advise our readers, before forming hasty judgment, to consider that there may be in each case satisfactory explanation which does not appear on the records.—Ed.]

### ENGLAND AND WALES.

#### PARTNERSHIP DISSOLVED.

John Robson Henderson and John Birkett, stationers, 4, Hill-street, Gateshead.

#### THE BANKRUPTCY ACT, 1914.

##### RECEIVING ORDER.

William Edward Pain, paper merchant, 96 Redcliff-hill, Bristol. May 24th.

"TWO CENTURIES OF TYPEFOUNDING." London: W. H. Caslon and Co., Chiswell-street, E.C.

This very handsome large quarto volume is of great interest to all concerned with printing, as it gives the history of the Letter Foundry established by William Caslon, in Chiswell-street, in the year 1720, and brings the annals of this famous house down to the present day. Previous to William Caslon starting his foundry there was no reliable firm in the business from whom printers could be certain of obtaining the necessary founts of type. Some typesetters of the period supplied one thing, some another, and when well cut body founts were wanted the printer was often at a loss as to where to procure them, very often he had to get them abroad; in fact, many of the old printers cast their own types with but a varying amount of success. The establishment of the Chiswell-street Foundry changed all this, and English printers soon found that reliable service, well-designed types and in sufficient quantities to suit their requirements were forthcoming. And it says much for the taste of the founder of the Caslon Foundry that his roman face is still looked upon as the model of its kind, a model that has for two hundred years held its own among all the various designs that have tried to supersede it. William Caslon was originally a gun lock engraver, and was persuaded by several London printers to try his hand at punch-cutting and typesetting, these gentlemen backed up their persuasions by providing some of the necessary capital, and William Caslon the First made a start at the business in Helmet-row, Old-street, from which removal was afterwards made to Chiswell-street. The book traces the history of the Foundry down through the various generations of Caslon proprietors, and it is interesting to read that at one period of the firm's career it was controlled by women, William Caslon the Third giving up his interest to his mother and his brother's widow, leaving his share in the business to his widow and their only son who was then but two years old. Some time after this, Mrs. Henry Caslon became proprietor, and during her reign several new faces of type were prepared, Mr. Drury being the engraver of the punches, which formed a series of canon, double pica and pica, the latter fount becoming very popular. On the death of Mrs. Henry Caslon, Henry Caslon the Second succeeded to the business; he died in 1850, and his son, Mr. Henry William Caslon, became senior partner. This gentleman died in 1874 and was the last of the line of the original Caslons. Mr. Thomas W. Smith now carried on the business, and during his management the point system was adopted in the foundry. Mr. Smith's sons took the name of Caslon-Smith,

and the firm is now H. W. Caslon and Co., Ltd. As to its present prosperity and push those who visited the late Printing Trades Exhibition, at the Agricultural Hall, could see for themselves. The book is fully illustrated with portraits of the Caslon family and quaint pictures of old-time typefoundries. It has been written from authentic documents by Mr. John Findlay McRae, and the printing has been done by Mr. George W. Jones, who has produced a souvenir of this well-known foundry that will be appreciated by all who have the privilege of possessing it.

## Dean Inge and the Stationers' COMPANY.

The Livery of the Worshipful Company of Stationers were fortunate in having the Very Rev. W. R. Inge, D.D., C.V.O., to address their meeting on Wednesday, May 18th, at Stationers' Hall. There was a good attendance of members and their friends to hear the Dean give an address on "Reading: A Virtue or a Vice."

The meeting gave the Dean an opportunity for some trenchant expressions. In referring to newspapers he said that the average person spent hours in reading ephemeral trash which could not be of any good at all. Reading as a habit had replaced the habit of listening; probably that was why people did not attend church. The greatest compliment they could pay a book was, after reading it, to shut it up and think of the thoughts which it contained.

In closing an interesting address the Dean stated that reading was a virtue which might become a vice if followed in an incorrect manner. He suggested that people should read aloud slowly, make notes, and only read what was found interesting.

The next meeting of the Livery Committee will be held on Wednesday, June 22nd, when Lord Askwith will give an address on "The Industrial Power of Printing."

## Certificates of Origin.

The list of goods exempt from the requirement of certificates of origin, although consigned from countries in Europe, provided the Officers of Customs and Excise have no ground to suspect that they are subject to the German Reparations (Recovery) Act include the following items from all countries:—Mechanical pulp, esparto grass, strawboard, newspapers and other printed matter of non-German origin printed in any language other than German.

The headquarters of the Joint Industrial Council for the Papermaking Industry are at 26-27, Farringdon-street, the offices of the Papermakers' Association.

## New Inventions.

### Interleaving Mechanism.

Mr. A. J. Burkitt has patented an invention that relates to interleaving mechanism of the kind wherein set-off sheets are carried by grippers mounted on endless chains and are released automatically and allowed to fall on the printed sheet at the desired instant, and consists of an interleaving machine, independent of the mechanism of the printing machine itself but adapted to be secured to and driven thereby, and comprising an endless chain or like carrier with grippers thereon, means for feeding a set-off sheet to the grippers, means for opening the grippers to release the sheet at the desired instant so that it falls in correct position on the printed sheet, and means for supporting the sheet at both ends until so released. The grippers are carried in casings 9 supported on cross bars 7, 8 extending between two endless chains 1 driven by the sprockets 3, and comprise fingers 10 fixed on a shaft 11 having a pinion 12 gearing with a pinion 13 on the bar 8, which is rotatable and has a lever 14 mounted thereon. A tension spring 10' may be attached to a projection 11' on the shaft 11 and to the casing 9.

Stops 19 carried by pivoted arms 20 are raised at the right moment by a cam 24 engaging a pin 25 on the connecting rod 22 to release a sheet *b* fed automatically or by hand to spaced bars 17, and immediately afterwards the grippers 10 are closed by the contact of the lever 14 with a stop 15 on the machine frame so as to seize the front edge of the sheet. The latter is guided between the spaced bars 17 which are carried round the sprockets 3, and other curved guide bars 18 extending to a number of pairs of rotating rollers 30, 31. The rollers 30 are driven by gearing 33, 34, 35, and the upper rollers 31 are carried on a shaft 36 mounted in two arms 37 pivoted on a shaft 38 and having pins 39 bearing under cams 40 on a shaft 41, the rollers 31 being driven from the spur wheel 33 by the gear 46 and bevel pinions 44, 42, 45. The arms 37 are rocked at the right moment by the cams 40 to lift the rollers 31 and allow the grippers to pass, the

rollers 31 then descending to press the sheet against the rollers 30 and support it during its further travel. The grippers 10 are opened to release the front edge of the sheet by contact of the arm 14 with an adjustable stop 16, at the same time as the tail end of the sheet leaves the rollers 30, 31. To prevent sagging of the grippers, a supporting bar 49 is provided round the chain track co-acting with the cross bars 7, 8, and with pins 51 on side plates 50 secured to these bars, and the chains may run between guides 52, 52a.

### Dusting and Cleaning Paper.

Mr. S. King has patented an invention in apparatus for dusting and cleaning paper in connection with printing machines, of the type in which the paper passes through a vacuum box provided with rotary dust-disturb-

ing brushes, fixed or adjustably mounted non-rotary brushes or the like are used instead of the rotary brushes. The paper *a*, Fig. 1, passes through slits *e* in a vacuum box *d* in which are two brushes or felt strips *f* engaging both sides of the paper so as to disturb the dust, which is removed through conduits *g* by a suitable exhausting device. The brushes *f* may be pivotally mounted and pressed against the paper by springs *i*, Fig. 4, within limits determined by adjustable ties *j*, or they may be mounted in spring pressed

vertical holders *k*, Fig. 5. The conduits *g* may be provided with extensions *i*, within the box *d* by means of a false bottom *h*, Fig. 3, inside the box, in which case the brushes may be omitted and the edges of the slits *e* relied on to remove the dust. In the case of a long box, the extensions *i* may be subdivided to distribute the suction. The box *d* may be in two parts slidably connected on by links *r*, Fig. 12.

### Corrugating and Crimping Paper.

Under a patent by the Otaka Fabric Co. and W. A. Lorenz paper is corrugated longitudinally and crimped laterally to the form shown in Fig. 11. The corrugations may be produced by the passage of the paper between formers 15, 16, Figs. 2 and 5, from which it passes between corrugated rolls 20, 21 to a cylinder 22 correspondingly corrugated. The paper may be treated dry, or may be steamed,

or water-sprinkling pipes 58, 59 may be provided for both sides of the paper. Preferably the moistened paper is dried by heating the cylinder 22. A doctor blade 30 with a waved edge to correspond with the corrugations in the paper and in the cylinder 22 obstructs and strips the paper and thereby laterally crimps it. The cylinder 22 has a vacuum chest 25 and pipe 26 acting in conjunction with it, is power-revolved and may communicate rotation to the roll 21. The blade 30 and the vacuum chest 25 fit the cylinder closely enough to maintain a partial vacuum which facilitates the change of direction of the paper web. A roll 33 which may be constructed of rubber or the like and with grooves to match the web corrugations assists in forcing the paper

against the doctor blade. The front face of the blade may be plane or may be bevelled off at its lower edge. Specifications 1610/71 is referred to.

### Printing Press Make-Ready.

A method of producing a printing plate made-ready for printing, patented by Mr. E. Sauer, consists in covering a sheet of more or less transparent material such as acetyl-cellulose, celluloid, paper, or caseine, on both sides with sensitized gelatine, exposing it to light through a negative and developing in the usual manner. The relief thereby formed on the side adjacent to the negative forms the printing surface, and the relief on the opposite side forms the make-ready. In preparing the plate, a layer of gelatine is applied to a polished surface, the transparent sheet is laid upon the gelatine, and a second layer of gelatine applied, after which the plate is removed from the support and chromated before use.

### Negatives for Offset Printing.

To obtain negatives or transparencies which can be used either for offset printing methods or for making ordinary litho or rotary zinc printing surfaces, is the object of an invention by Messrs. Ullmann Ges., of Twickau, Germany. A bichromated colloid negative is made on a surface from which it can be stripped and before stripping is coated with a gelatin solution forming an upper film. To produce the bichromated film two glass plates are secured together and coated at the edges with a rubber film margin or border. The combined plates are dipped into a solution of wax in carbon-tetrachloride to obtain a thin wax film, and after drying into a 3 per cent. collodion bath containing a few drops of castor oil. The plates are separated, coated very thinly with bichromated colloid, and after exposure and drying the additional gelatin applied. The negatives may be retouched before stripping.

**LENDRUM LTD.**—Mr. E. S. Lendrum and all who are associated with this firm are proud of the quality of the horses which are employed in their cartage work. And with good reason, for they are among the best in London. At the Cart Horse Parade in Regent's Park on Whit-Monday, prizes were gained for all four entries—three firsts and one second. Those who understand the thorough examination which is made of the horses entered, know that prizes are not awarded without good reason, and to gain a prize for every entry is a fine record. To the first prize-winners, Princess Mary presented the R.S.P.C.A. badge. One of the horses carried this mark of honour last week, when the animals were paraded outside the offices of Lendrum Ltd., in Temple-avenue, for the purpose of having their photographs taken. Lendrum Ltd. have a stud of 90 horses in London and 100 horses in Manchester, and the care exercised by their keepers is the reason for the splendid appearance they make, not alone when on parade, but in the course of their daily work.

## Prince and Papermaking.

### Visit to Devon Valley Mills.

It was a great day for the Devon Valley Paper Mills, Hele, of Messrs. Wiggins, Teape and Co. (1919), Ltd., when on the 17th ult., the Prince of Wales, in the course of a tour through the Valley of the Exe, made a thorough inspection of the process of paper manufacture from the sorting and preparation of the rags to the production of the finished article.

Needless to say H.R.H. had a cordial welcome from the loyal papermakers. The Prince and his party were received at the entrance to the mill by Mr. J. P. Hepburn, managing director, and Mr. J. Horsburgh (director), who conducted the party through the premises. Before his Royal Highness entered the mills two little boys, John Malcolm Hepburn, the managing director's son, and Ian Horsburgh, son of Mr. J. Horsburgh, presented him with a beautifully-cased blotter containing blotting paper made by the company, with the Prince of Wales' feathers in silver on the outside, and bearing the inscription: "Presented to H.R.H. the Prince of Wales, K.G., on his visit to the Devon Valley Mill, Hele, 17th May, 1921."

Lady Hepburn, Mrs. Hepburn and Mrs. Horsburgh were presented to the Prince, who also conversed with two of the oldest employees—G. Bonner, who can boast of 65 years' service at the mill, and John Heale, with a record of 56 years.

The inspection of the mill was very thorough, the various processes arousing much interest by reason of the high-class paper produced. Among the products of the mill are superior writing and account-book papers, including the paper used in the ledgers provided by H.M. Stationery Office for Government use.

Members of the staff accompanied the Royal party and explained in detail all the processes. In the rag-sorting room the Prince saw numerous women and girls at work. He showed the closest interest in the material and the operations, asking numerous questions of Mr. Hepburn. To a girl using a formidably sharp knife he remarked: "The first thing I should probably do would be to cut my hand half off if I attempted your job."

In the beater house, Mr. Hepburn explained to H.R.H. how the bleaching is done. Thereafter the Royal visitor marvelled at the size and efficiency of the papermaking machines and was no less impressed by the air-drying arrangements. From beginning to end H.R.H. evinced the closest interest in all he saw, and he followed the various stages right through to the finishing department. One of the processes which particularly attracted his notice was the method of imparting a linen face to writing paper.

The Prince, in fact showed very great interest in everything, especially in the paper

machines, asking many questions, and speaking to a number of employees, both men and women. At one of the cutters, where one of the sheets was not coming quite straight to the layer, and damaged sheets were resulting, he insisted on staying until the fault was put right, and the layer was again working properly.

At the end of his visit H.R.H. asked for as many ex-service men as possible to be got together, shook hands with them, and had a short talk with each. An incident then took place which shows the Prince's extraordinary powers of observation. On shaking hands with one of the ex-service men (L. S. Heal) the Prince asked if he were not at work on one of the paper machines looked at half an hour earlier. As a matter of fact, he was the machineman.

After thanking the directors and those who had shown the party round for their attention, and saying that he had been extremely interested in all he had seen, and had greatly enjoyed his visit, the Prince and his party said good-bye, and the Royal car, amid cheers, drove on to Bradninch, where a long programme was carried out by H.R.H. in the afternoon.

The sun shone brightly throughout the day, and the surroundings of the mill, with the young green of the trees, and the apple blossom of neighbouring orchards, was a sight not easily forgotten.

The paper trade, and Messrs. Wiggins, Teape and Co. (1919), Ltd., in particular, fully appreciate the honour conferred upon them by a visit from the Prince. It is believed that this is probably the first Royal visit to a paper mill in this country.

---

THE late Mr. George Richard Simmons, of Hill-street, Finsbury, E.C., wholesale stationer, left £13,321.

EDWARD BEER AND CO., 15a, Paternoster-row, E.C., have been appointed sole agents for the U.K. for the Neusiedler A.G. für Papierfabrikation, Vienna, under which title are included the mills of Ellissen, Roeder and Co., P. Piette, Schloglmühl, Franzenthal, Elbmühl, etc.

ARTHUR HEATH AND CO., 91, Queen Victoria-street, London, E.C.4, have been appointed sole selling agents for the United Kingdom for the products of Forssa Bruks Aktiebolag, Näsviken, Sweden, manufacturers of folding box boards—white and coloured—greyboards, middles, ticket boards, wood pulp boards, brown leather boards and bookbinders' boards.

MR. CHAS. BAKER, of Queen Victoria-street, E.C.4, has decided, for business and family reasons, to convert his business, as from the 31st inst., into a company, the title of which will be Charles Baker and Sons (Paper-makers), Ltd. Mr. Chas. Baker will have as co-directors his eldest son, Mr. Charles Geoffrey Baker, Mr. Richard Jacob, and Mr. E. K. Rayner, who have for many years been associated with the business, and Mr. Bernard T. S. Bagnall, F.C.A.

## Papermakers & the Safeguarding Bill

### Strong Resolution Passed on the North-East Coast.

Papermakers and mill employees of the North-east Coast have taken up the subject of the Safeguarding of Industries Bill in no uncertain manner. A meeting was held recently at Newcastle-on-Tyne to consider the critical state of the paper industry, particularly with regard to unemployment and foreign competition. Sir Arthur L. Wood, Bart., presided, and eight paper mills were represented, both from the owners and the workpeople's side.

The chairman pointed out that the trade at the present time is in a very precarious position. Among the causes he attributed the adverse exchanges, which enable certain European countries, notably Finland and Germany, to produce and deliver paper at prices considerably below the lowest manufacturing cost of British mills. He mentioned that there are about 26,000 British paper workers at present out of employment, representing half of the total number engaged in the trade. While papermakers were prepared to meet any fair competition it seemed quite necessary, said the chairman, that some adjustment should be made to enable them to counteract the effect of the debased exchanges. He showed that in certain industries measures were being taken to this end under the Safeguarding of Industries Bill, but so far the paper trade was not included.

Considerable discussion took place on the subject, and the views of both employers and workers were put forward. Eventually it was resolved, on the motion of Mr. George Wright, president of the National Union of Printing and Paper Workers (Northern Group), seconded by the chairman: "That in view of the serious unemployment in the paper trade it is absolutely essential to include the paper trade in the Safeguarding of Industries Bill at present before the House of Commons and that every possible endeavour should be made to obtain the support of members of Parliament for the North-east area."

Other steps were taken with the object of pressing forward propaganda on the lines laid down, and the views expressed indicated that the members of the trade unions are equally alive with the employers to the serious condition of the paper trade. Accordingly, efforts are being made to bring the resolution forward in the quarters where it may be most effective.

**MR. HAROLD ROGERSON**, who is well known in the paper trade, is now representing Messrs. Brindle and Sons, Samlesbury Paper Mills, near Preston, who are manufacturers of the well-known extra staple wrapping papers. Mr. Rogerson hopes very shortly to be calling upon his old friends.

## Mr. R. K. McKenzie Honoured.

### Complimentary Dinner and Presentation.

An interesting function took place at the National Sporting Club on Friday the 20th ult. (through the courtesy of Mr. G. H. Wilkinson, C.C.), when Mr. R. K. McKenzie, formerly hon. secretary of the Stationers' Society, was entertained at dinner by the following members of the late committee:—Messrs. W. J. Whyte, F. L. Cayzer, G. H. Wilkinson, A. E. Brown, P. S. Portous, E. M. Fells, G. S. Weeks, W. E. Green, F. E. Williams, A. E. Mist and R. G. Craster, with whom were associated two former auditors, Messrs. Matt. Henry and T. C. Dryer.

Major Craster presided in his usual genial manner, and during the evening presented to Mr. McKenzie, on behalf of those present, a gold cigarette case, suitably inscribed, as a token of the esteem in which he is held and as a memento of the happy associations of the members of the committee with him as their hon. secretary.

Mr. McKenzie expressed his appreciation of the honour his friends had done him, and said he would always remember the event as a red-letter day. He wished all success to the Stationers' Social Society.

Others also spoke in praise of Mr. McKenzie's work for the society, and a very pleasant evening was spent.

## Bridge Hall Mills Purchase.

### Date of Resumed Hearing.

This case, which was adjourned from May 12th by Mr. Justice P. O. Lawrence in the Chancery Division, was on Tuesday fixed for hearing on June 8th provisionally. The original proposal was that it should be resumed on June 1st, but it was necessary to give precedence to two cases in which the Attorney-General is concerned.

The part-heard case refers to the sale of Messrs. James Wrigley and Son's paper mill at Bury. Practically all the evidence has been completed.

**CINEMA AND THE PAPER TRADE.**—Samuel Jones and Co., Ltd., are to be congratulated upon their enterprise in demonstrating by means of the cinema the process of manufacturing gummed paper by their special process. Recently they arranged for a film to be taken by the Industrial Films, Ltd., at their factory, and this was shown last week to a large gathering representative of the paper trade at the Shaftesbury Pavilion, London. Needless to say, it was a most interesting exhibition and was a source of education for those who handle gummed and coated papers.

## The News-Print Market.

### Effects of a Rapid Decline in Price.

The present position of the news-print market in this country gives special interest to the impressions which Mr. G. F. Steele, general manager of the Canadian Export Paper Co., formed during a recent visit to Europe. Owing to the present world-wide disturbance of general business the producers of news-print paper in Europe, as well as in Canada and the United States, have experienced a rather sharp falling off in demand as compared with the feverish and unhealthy situation which existed a year ago. This is especially in evidence in England, where business conditions seem to be more depressed than in other paper consuming countries.

"The financial condition of the Scandinavian countries, as well as Finland and Germany, is not very happy" observes Mr. Steele, "and the producers of those countries are under heavy pressure from their banking connections to produce and sell paper even if such forced sales entail severe losses on the producers. Of course, such a state of affairs can not and will not continue for a great length of time. The English paper mills particularly are facing a very unhappy outlook, inasmuch as it is the custom of these mills to contract for supplies of raw material for a period of a year in advance.

"Owing to the inequalities of exchange, foreign offerings of paper are current in England at prices far below the cost of British manufacture, and many mills are facing disaster, if not ruin. This also applies to many English newspapers, whose supply of paper has been arranged during the past for periods running through this year, and in some cases well beyond this year. Here again, we found the unfortunate effects of fluctuating and unstable markets, which are not desirable from the viewpoint of either the buyer or the seller.

"The same state of affairs is, of course, also to a less extent affecting the outlook in the manufacture of paper and the publishing of newspapers in America and Canada. Here, however, the most enlightened and far-visioned publishers are averse to rapid decline in the selling price of news-print paper, believing that such a decline probably would have a disturbing effect on the stability of the publishing business. While there are a few large companies in America, and more particularly in Canada, which are especially well equipped and so thoroughly self-contained that they can produce paper at very low costs, there are a multitude of smaller concerns making paper from raw materials contracted for at earlier dates which would be greatly embarrassed by drastic declines in the selling price of paper. It is certainly not to the advantage of the buyer that these concerns should be crippled or destroyed by a disturbed paper market, for the violent fluctuations in the price of paper in the past is largely due to causes which are now pro-

ducing such unfavourable and unfortunate conditions abroad. It is believed by those best informed that the present situation is abnormal and temporary, and that another six months may tell quite a different story."

## Envelopes Wanted for New Zealand.

His Majesty's Commissioner in New Zealand (Mr. R. W. Dalton) has forwarded particulars of calls for tenders by the Post and Telegraph Department, Wellington, for the supply and delivery of 31,000 envelopes (tenders close June 16th); 3,000 Waverley Point pen nibs (tenders close June 7th); 2,000 302. pots of library paste (tenders close June 16th).

Tenders will be received up to 5 p.m. on the dates indicated above by the Controller of Stores, Stores Branch, General Post Office, Wellington.

A sample of each type of envelope, as well as copies of the calls for tenders and conditions, may be seen on application to the Department of Overseas Trade, 35, Old Queen-street (Room 59), Westminster, S.W.1.

In view of the limited time for submitting tenders, this notice will only be of use to United Kingdom firms represented in New Zealand who will be able to instruct their agents by cable.

## Paper Export Trade of U.S.A.

In the course of an address to the members of the American Paper and Pulp Association, on the occasion of its forty-fourth annual meeting, Mr. George W. Sissons, junr., who has held the office of president during the past three years, referred to foreign trade in the following terms:—"Export trade in American-made papers is to-day faced with many disquieting features. Following heavy export shipments during the larger part of the past year, there was a very restricted demand at the close of the year, and from all parts of the world there came cancellations or rejections. In all markets the financial conditions grew very acute. Our dollar reached such a premium that it became increasingly difficult for the foreign buyer to purchase from us. Simultaneously our competitors, the Scandinavians, the Finns and particularly the Germans, made prices on paper products considerably lower than any prevalent in this country. With the wage rates in these countries less than half those paid here and with the incentive they have to make low prices in the countries whose currency is of greater value than their own, the American exporter is indeed practically barred from such markets. A deplorable feature of the situation is the apparent low ebb of commercial morality, the attitude which makes light of contracts and agreements, which are often repudiated."

# Bookbinding as a Craft and as an Industry.

By DOUGLAS COCKERELL.

We cannot consider bookbinding quite apart from book-printing, for the two are but mutually dependent branches of the master-craft of book-production, and no satisfactory book can be designed unless the limitations and aims of both these branches are taken into account.

Just as the traditions governing the printing of books can be traced back to the 15th century printers, who, in their turn, approximated the work as nearly as they could to that of the scribes, so the traditions governing the craft of bookbinding can be traced back to very early times. The little book found in the tomb of St. Cuthbert in the 12th century and now in the library of Stonyhurst College was possibly bound in the seventh or eighth century, and almost certainly not later than the 10th century, while in the 12th century there were in England flourishing binderies at Durham and Winchester, much of whose splendid work has come down to us practically intact. These books show that the essentials of good binding were well understood in those early days. There is no essential difference between the methods employed by these early binders and those employed by the best binders of to-day. Wood for the boards has given place to mill-board, and blind stamping has been largely superseded by gold tooling, but the constructive principles have not changed. The use of hollow backs for leather binding is a comparatively recent and degenerate custom; the practice of throwing the strain of opening and shutting entirely upon the joints fails to make use of the special qualities of toughness and flexibility of the leather.

Paper read at the World's Printing Trade Congress, May 12th.

## Essentials of Good Binding.

The essential qualities of a good permanent binding for a normal book may be taken to be: (a) That all the sections of the book should be sound at the back, and that all "plates" or single leaves should be attached by guards that can be sewn through, so that every leaf will open right to the back; (b) that the sections should be sewn on to flexible cords or tapes (or thongs), and that the ends of these cords or tapes should be firmly attached to stiff boards; (c) that the back and joints should be covered with some flexible material that, while protecting the sewing thread and cord, will in itself add to strength of the binding. A fine binding will have many other features added by way of refinement or elaboration, but unless these qualities are present it is likely to be an unsatisfactory piece of work.

While the most modern letterpress printer is doing essentially the same thing as was done by the first printing press and all the elaboration of machinery merely tends to quicken up and increase the mechanical exactness of impressions of inked type on paper, the modern machine binder has not been able to approximate his work so nearly to that of the early binder.

## Publishers' "Bindings."

Publishers' "boards" were originally intended to serve as temporary protections to a book until such time as the owner had the volume permanently bound. The publisher's cover of to-day is all the binding most books ever get. Publishers' cases fail as temporary bindings, because they are too elaborate to be thrown away, and because the backing and casing-in of a book seriously injure the

sections for rebinding. They fail as permanent bindings because of their faulty construction. The chief weakness in publishers' "bindings" lies in the poor connection between the book and the case. The hand binder laces his slips into his boards, and unless he reduces these slips unduly he gets a very strong joint. The method of casing books does not allow of such lacing in.

Something can be done, however, to fasten a case on to a book securely. Probably the most effective way to do this is to make the case with "split" boards, and to insert the slips between the two thicknesses. The boards for the case are made up of two thin boards glued together for two-thirds of their width, the inner sides being left unglued. After the case is made the inner board is slit at the edge below the turn-in of the cloth, and the loose portion turned back to receive the slips, which are glued between the two boards and the end paper glued down in the usual way. This does not take so long to do as might be supposed, but it is, of course, more costly than the ordinary method of casing.

A cheaper but less effective method is to case in the ordinary way but to use a stout, strong paper for the ends that will act in some measure as one thickness of the split board. I have found this to answer well in the case of some crown 8vo text books that have very heavy use in class and workshops. Of course, normally strong connection can be made by attaching anything to the surface of a straw-board, as the surface will pull off very easily. A tougher board must be used where great strength is essential. Both these methods call for tape sewing. To sew heavy books on thin hemp and to turn the slips on to the back, or to sew without slips, is merely looking for trouble. A method that may answer fairly well for very small light books is useless for books of any weight that are expected to last in use for a reasonable time.

### Covering Materials.

When selecting covering material for a publisher's case, consideration should be given to the weight of the book to be cased and to its probable life of usefulness. The thinner binders' cloths, which are little more than muslin and dressing, are unsuitable for covering heavy books that are expected to have any permanent value.

There has been done a good deal of work on standards for bookbinding material. The special committee of the Royal Society of Arts on bookbinding leather established useful standards for this material. As a result of their work, leather for binding can now be had that is free from injurious acids and is soundly tanned. Much of the leather used for binding, although it may be mechanically strong when new, and excellent for purposes where it is not expected to have a long life, is quite unsuited for permanent bindings. The Washington Bureau of Standards has done excellent work in investigating the qualities of woven bookbinding materials, and probably the library buckram produced as a result of their investigations is the most satisfactory

binding material of the kind yet made. Some of the leather substitutes wear well enough for temporary use, but further investigation is needed to ascertain how far they are suited for binding where permanence is a necessary quality.

### Present Day Costs.

At the present time we are all anxious to know in what way the immensely increased cost of binding and casing will affect the trade. Personally, I anticipate changes in two opposite directions. I think that it is likely that publishers will be forced to issue many books in paper covers in the Continental style, leaving the owners to bind them if they will. I also think that the great libraries will demand that the books they buy shall be more serviceably bound than they are at present. This latter demand suggests a common-sense reform, because the cost of pulling and rebinding individual books is immensely greater per volume than is the cost of binding with equal strength, a fair number of the same books directly from the sheets. If the libraries would co-operate and bulk their orders, paying a fair sum for the better work, they could get bindings on the lines that I have indicated that would last as long as the paper of the book, and they would save the extra cost many times over on their rebinding bills. This suggests a possible way in which publishers' binders may find work to replace that lost, should the practice of issuing books in paper covers become common. The miscellaneous binder would, of course, gain by the change. Miscellaneous binding is a much more important trade on the Continent than it is with us.

### Pre-requisites for Good Binding.

I have said that no satisfactory book can be designed unless the aims and limitations of both the printer and the binder are taken into account. The binder can bind almost any book so that it won't open well, but if he is asked to put together into the form of a book paper that is much too thick for the size of the leaf with perhaps a bundle of plates to be inserted that are like a pack of playing cards, he can't make much of a job of it. The resulting book is unlikely to open freely, and will probably gape like a dead oyster when it should be shut.

The thickness of the paper in relation to the size of the leaf is a matter that directly concerns the binder, as does also the size of the sections. Very thick sections are clumsy; they split apart in use, and the binder cannot get with them a well shaped back. On the other hand, unduly thin sections make extra work in sewing, and if reasonably thick thread is used, the swelling in the back may be excessive. In all books it is desirable that a blank leaf should be left at the beginning and end, on to which the binder can attach his end papers. It is very unsightly to see end papers tipped on to a printed page.

Then there is the vexed question of inserted full page illustrations called "plates." If a book is to open well, the pages must be thin

enough for a single page to fall down of its own weight, and the same rule applies to "plates," which are merely additional pages. The habit of printing inserted illustrations on paper much thicker than that of the book is a mistaken one. Wherever possible the "plates" and letterpress should be on the same paper, but if this is not possible, plates and letterpress should at least be printed on paper of the same thickness. The custom of inserting plates by tipping them on adjoining leaves is highly unsatisfactory. Such plates and the leaves to which they are attached cannot open right to the back. The reader, in the natural desire to get them to open flat, presses them apart, and the plates become loose. Plates printed on art paper cannot be even moderately securely attached by tipping on, as the coated surface of this paper readily flakes off with the paste at the slightest strain. All plates and single leaves in books of any importance should be secured by guards that are either formed by turning up about  $\frac{1}{4}$  inch of their inner margins, or by separately attached strips of thin paper. Guarded plates bother the machine sewers, but tipped on plates distress the buyers by coming out after a very short use.

### Margins and Cropping.

If the printer has any regard for the appearance of his work, he pays great attention to the position of his type on the page, and the proportion of the resulting margins. The binder is often blamed for altering the proportion of the margins by over cropping. Very often the fault lies with the printer, who will leave only the exact amount he wants between the type in the centre of his sheet, leaving the edges of the sheet to project as they will. The result is that in order to clear the "bolts" the binder has to cut a good deal off. You cannot cut very finely when cutting off the folded edges of the leaves if the edge of the book is to be cleared. The difficulty can be largely overcome by so imposing type that the bolts project at least as far as the edges of the sheet when the sheet is folded. It does not matter greatly if some of the edges are not caught by the guillotine; both binder and public like to see a little "proof" that the book has not been unduly cut down. It would often be useful if the printer would give the binder some guide as to the margins he desired on letterpress and plates. Printers and binders' ideas on this matter often differ.

I have not attempted to deal with the decoration of bindings, as it would take too long to go into this interesting but large and controversial subject. Moreover, without profuse illustration I could hardly make my points clear on this side of the craft.

### Betterment of Machine Binding.

The best work of our best craftsmen both in printing and bookbinding is equal to any work done at any time. The output of machinery cannot equal in interest the work of the brain-directed hand, but machine-made books can at least be sound in construction and pleasant to see and to use. There have been built up through the ages standards for

good hand binding. Can we not, by the help of such congresses as this, gradually establish equally sound traditions for machine-made bindings that will efficiently protect the books they enclose?

THE BROMLEY AND BRIDEWELL MAGAZINE.—We have received from the Grout Engraving Co., of 7, Bridewell-place, E.C.4, the third number of their well-known house organ. The current number shows a steady improvement over the previous issues, and the staff are to be complimented upon their successful undertaking. This issue contains an exhaustive article written for the lay mind on "The Making of Blocks." We believe this to be in every way unique, for we know of no work on process engraving where the subject has, as a whole, been set out in a clear and non-technical way by one who is himself a practical worker. Bearing in mind also the remarkable fact that many of those who supply the public with printed illustrations, both publishers and printers, are ignorant of the methods by which the printing surfaces they use in reproducing pictures and photographs are arrived at, one feels confident that the compilers of this very interesting organ will have cleared away any doubt that may have existed, and also opened up for some a sealed book of knowledge. On the whole a very useful house organ, and one that should find its way into the hands of everyone connected with the printing trade.

We have received a copy of a new work containing a selection from the many woodcuts by Ludovic Rodo which is published from the office of the *Bookplate Magazine* under the title of "Ex libris and Marks by Ludovic Rodo." There are included 32 woodcuts, all of which show that this artist-craftsman can use wood as a medium of expression with ease and charm. Frank Brangwyn, R.A., in the preface says: "They are little works of art, full of expression and feeling, delicate but direct, simple but strong, full of charm but not lacking in depth." (Price 3s 9d.).

THE late Mr. Samuel Schofield Lord, editor of the *Barrow Guardian*, left £2,553.

AUSTRALIAN COMPANY'S SUCCESS.—The operations of William Brooks and Co., Ltd. (printers and stationers), for the year to December 31st, 1920, resulted in a net profit of £7,575. A 10 per cent. dividend on all shares (of which 7 per cent. has already been distributed in interim payments) absorbed £5,714. The capital (£50,315) consists of 18,000 ordinary and 39,715 preference £1 shares, all fully paid. Reserves and undivided profits total £17,967.

# The Federation Annual Meeting.

## Later Scarborough Proceedings deal with Matters of Vital Interest to Every Printer.

Following upon last week's Cost Congress (reported in our last issue), the annual meeting of the Federation of Master Printers and Allied Trades was held on the Tuesday. The business was gone through with so much dispatch that it was found possible to dispense with Wednesday's sitting.

Mr. E. W. Humphries, of Bradford, presided at the meeting, and presented the report of the Federation Council, which showed an excellent record of work well done and progress accomplished.

### Retiring President's Address.

Mr. Humphries, in his presidential address, remarked that the year that the Federation had just finished had been a momentous one in the history of the printing trade of England. They all knew the difficult times through which they had gone. The outstanding feature of the year was the dispute that took place in Liverpool and Manchester, and the extraordinary feature of that dispute was that it was not capital *versus* labour, employer against employed, but it was a great fight that took place on a matter of principle, and he submitted that it was the principle that underlay that dispute that had so solidified them as a trade, and had enabled them to come through without ill-feeling, and had united with them a very large proportion of the workers of this country. The men who were disputing the matter were a limited number of T.A. members, represented by Manchester and Liverpool. The rest of the T.A. members—which society had a membership of between 30,000 and 40,000—objected to the attitude of their members in Liverpool and Manchester, and supported the Federation, as did also other trade unions, representative of other trades. The trade throughout the country were glad when that dispute was settled. (Hear, hear.) It had so solidified them as a trade that they had raised a fund, with the help of their newspaper friends, of over £63,000. Such a sum had never before been raised in their Federation. (Applause.) Therefore he thought they were entitled to congratulate themselves, particularly as they had come out of the dispute friendly, with the good opinion of the Labour leaders and the bulk of their workers. (Applause.)

### Joint Industrial Council.

Referring next to the work of the Joint Industrial Council, Mr. Humphries observed that during the year that institution had been at times severely criticised by some employers as well as workpeople. It seemed to him that the council was objected to on much the same lines as the League of Nations was. The J.I.C. had proved itself to be of great

value, as shown by the statement made at the luncheon held in the Agricultural Hall, London, at which the Minister of Labour, Dr. Macnamara, was present and remarked that if the other trades in the country had conducted their relationship with their workers in the same way as the printing trade had done there would be no need for a Ministry of Labour. (Applause.) That happy state of affairs to his mind, continued the president, was very largely due to the J.I.C., which had taken up a judicious attitude and enabled them to settle a number of disputes. Continuing, the President said the object of the J.I.C. was to attain square dealing, and he thought the workers were beginning to recognise that if they came to that Council they would obtain a square deal. (Hear, hear.) Very good work had also been done by the J.I.C. in regard to the training of apprentices, while in regard to other matters also similar good service had been rendered by the various committees. Of these, one, under the chairmanship of Mr. Waterston, of Edinburgh, was doing, to his mind, the greatest work that they as a trade or any other trade could do, and that was, if possible to arrive at a solution of the most important question before them—unemployment. (Hear, hear.)

### Unemployment.

The statistics which had been gathered showed it was an extremely vital matter, and unless they as a trade, and every other trade, solved the question of unemployment, this country was not going to have peace. (Hear, hear.) He did not see how they could expect their workers to give the output they expected unless they were assured of a more or less permanent income. He urged that some means should be found whereby the worker had removed from him the fear of unemployment and consequent distress to his wife and family. (Applause.) He asked every printer in England to lend his assistance and influence to bring about what he was absolutely sure was essential to the well-being of our country as well as the well-being of our trade. (Applause.)

### Satisfactory Finance.

Mr. Edward Unwin, senior, moved the adoption of the statement of accounts, which showed a very substantial excess of income over expenditure for the year.

The accounts were explained by Col. H. Rivers Fletcher, the newly-appointed Assistant Treasurer, who congratulated the Federation on having the most satisfactory balance-sheet they had ever had as a Federation.

The report and balance-sheet were approved.

### New President Elected.

On the motion of the retiring president seconded by Sir Wm. Waterlow, London, Mr James MacLehose, M.A., LL.D., was unanimously chosen as president of the Federation for the ensuing year. In making the proposition, Mr. Humphries remarked that Dr. MacLehose was known to most master printers as the head of a well-known printing firm, and for many years he had been closely connected with the printing trade of that great country, Scotland. (Applause.) He was respected in his country, honoured by his university, and had acted as a most able vice-president of the Federation during the past year. He was a man of sound judgment, broad-minded, and he felt perfectly certain that he could hand over the duties of president to him in the full confidence that he would act in the ablest possible manner and preside over the deliberations of that Federation in a thoroughly efficient and worthy manner. (Applause.)

Sir Wm. Waterlow said it was most fortunate for them that in such difficult times they could have in the presidential chair a man like Dr. MacLehose, on whom they could all rely.

Dr. MacLehose, in expressing thanks for the election, said that as one who had given his life's work to the book and printing trade, he felt deeply touched by the honour that Federation of 5,100 members had conferred upon him.

### Other Elections.

On the motion of Mr. J. J. Keliher, London, Mr. R. A. Austen Leigh was elected senior vice-president, the motion being seconded by Mr. Lee, chairman of the Nottingham Association.

Mr. Johnson, Manchester, moved the election of Mr. J. C. Coppock, Warrington, ex-president of the Lancashire and Cheshire Alliance, as junior vice-president of the Federation. This was seconded by Mr. A. C. Hill, London, and cordially approved.

Mr. W. A. Townsend, president of the Yorkshire Alliance, moved the re-election of Mr. Unwin as treasurer, and the election of Lieut.-Col. Fletcher as assistant treasurer, and this was approved.

The auditors, Messrs A. C. Roberts, Wright and Co., were re-elected, on the motion of Mr. Graham, Belfast, seconded by Mr. Hobbs.

A hearty vote of thanks was accorded to the retiring president, vice-presidents, treasurer, council, and committees for their work in the past year. This was moved by Dr. W. B. Blaikie, of Edinburgh, who paid high tribute to the work that had been accomplished.

Mr. Sellers, Manchester, seconded, and the motion was agreed to.

Mr. E. W. Humphries responded, and called upon Sir William Waterlow, president of the Printers' Pension Corporation, to address the meeting.

### A Pensions Appeal.

Sir William Waterlow made an earnest appeal for support for the Printers' Pension, Almshouses and Orphan Asylum Corporation

funds. He mentioned that the Corporation had always been extremely fortunate in having the support of the Royal Family. The institution was established in 1827 by printers for the benefit of printers and maintained solely by members of the industry. It provided a neutral ground for the mutual interests of the employer and the employed. There were 1,300 war orphans receiving weekly allowances to the extent of £30,000 a year, children from all over the country. Every child of a fallen soldier who had been a printer was eligible for help. The sum of £32,000 per annum was also being distributed in grants.

### Paper and Protection.

Sir Cecil Harrison moved: "The Federation of Master Printers and Allied Trades of Great Britain and Ireland protest most strongly against the proposal that paper should be subject to a customs duty under the Safeguarding of Industries Bill. Any such duties would increase the cost of paper, which is the raw material of the printing, binding, newspaper, boxmaking, stationery and many other important industries, and would increase unemployment, injure the recovery of those trades and raise the cost of living."

He considered there was nothing that would hamper the success of their trade more than the proposed customs duty. The matter was not launched with a desire to start a debate on Free Trade or Protection, but was drawn up from the point of view of the printer. They felt that the duty on paper or paper materials from abroad would greatly hamper the printing trade.

Mr. W. H. Thomas (Middlesbrough) seconded, observing that the proposed duty would shackle the printing trade. It was necessary they should increase production in every way and bring up the standard of living. But it was absolutely impossible to get back to the conditions in 1914 unless they could get the material and the price of production down. He hoped the Government would not attempt in any ridiculous manner to restrict their trade.

The resolution was unanimously agreed to.

### Increased Postal Rates.

Mr. E. Geo. Arnold (Leeds) moved that: "This meeting of printers from all parts of the United Kingdom views with serious alarm the proposals of the Postmaster-General to increase the postal rates of printed matter and post cards, and is of the opinion that every effort should be made to prevent these rates from coming into operation, both by approaching individual members of Parliament, and by putting the matter before the representatives of Labour in the Printing Industry and the Federation of British Industries."

Mr. Arnold read a letter which had been sent to the Postmaster-General with a request from the Joint Industrial Council of their industry to receive a deputation. The letter stated that 250,000 workers and 5,000 employers were represented. It pointed out that unemployment in the industry was at a high level, and that the new rates would undoubt-

edly curtail the use of advertising methods hitherto used, and have an unfortunate influence on efforts being made to improve the general industrial situation. He also pointed out that British printers, after the war, were asked to capture the picture post card trade of Germany, and had laid down plant to do so. An export trade had been created, but this depended entirely upon the home market being secured as well. The picture post card industry might have to close down if the postal rates were increased. A reply from Mr. Kellaway was read, stating that he was considering the question of receiving a joint deputation from the Federation and other bodies. Mr. Arnold added that these rates came into operation on June 13th and it was not impossible that the G.P.O. people in their proposal to receive all the bodies together might continue the idea of dawdling the thing until after the rates had become operative. They must do all they could to prevent that.

Mr. Oscar Griffith (London) seconded and the motion was unanimously agreed to.

Dr. MacLehose referred to the question of railway rates, and said the members could be quite sure that when the next stage arose in the negotiations it would be attended to by the Federation staff with the same care as the initial preparation of statistics had been gathered together.

### Assessment of Machinery.

Answering a question as to assessment of machinery, Mr. A. E. Goodwin, general secretary, said the advice they gave was that where local authorities were taking up this matter the best the ratepayer could do was to get expert advice at once on the particular assessment. The law as it stood gave local authorities power to assess machinery. The position was difficult because authorities in some districts dealt with fixed machinery on a different basis from that of other districts. The best plan is to fight these things out locally. One firm assessed at £400 a year got the amount reduced to something like £120. "You can do far better locally with your local rating authority than in any other way," added Mr. Goodwin. Before any new assessment was made public notices had to be given, and ratepayers had the right to see the assessments and ask for full details. If they were not satisfied they could appeal, and if they failed they could appeal further to the quarter sessions.

### Next Conference in Scotland.

An invitation to hold the next conference in Scotland was accepted, the place of meeting to be fixed later.

The meeting then closed.

In the evening the delegates dined together at the Grand Hotel. Mr. E. W. Humphries presided over a large attendance.

Mr. R. A. Austen-Leigh proposed the toast of "The Craft of Printing," and Mr. E. W. Humphries responded. Sir William Waterlow, K.B.E., proposed "Scarboro' and its Mayor," and the Mayor of Scarborough (Alderman M. T. Whittaker) responded. Mr. E. G. Arnold proposed "The Visitors," and Mr. John C. Cop-

pock responded. The toast of "The Chairman" was proposed by Brigadier General W. Wright Bemrose. During the evening songs were given by Mr. A. Broadbent and Mr. Norman King, and sketches by Mr. William Allen.

A number of drives were enjoyed during the stay of the conference in Scarborough, and the arrangements made by the Scarborough Hospitality Committee were greatly appreciated. The delegates and friends attended special concerts at the Spa and the Floral Hall, and there was a well-attended dance at the Grand Hotel. A golf competition at Gainton for a cup given by Mr. H. Dennis, of Scarborough, was won by Mr. T. H. Conn, 95-11-84.

## New British Patents.

### Applications.

 Maschinenfabrik Augsburg-Nurnberg Akt.-Ges. Sheet positioning gauges or markers for printing machines. 163,697.

MESSRS. JAMES SPICER AND SONS, LTD., have issued a price list of a wide range of letter files and folders, envelopes, cards, boards and tags.

# Trade Notes.

**P. AND K.T.F. NEW OFFICES.**—The Printing and Kindred Trades Federation of the United Kingdom has purchased the freehold of No. 60, Doughty-street, W.C., and intends to take possession at the end of the present quarter.

**GENERAL STRICKLAND** last week forbade the sale and circulation of the *Freeman's Journal* and *Evening Telegraph* in the Irish martial law area from June 2 until June 9 inclusive, forcible methods being taken to carry the order into effect.

**REGIMENTAL JOURNALS.**—It has been decided to form an association of conductors of regimental journals, which are about 40 in number, and are published all over the kingdom. A committee has been elected under the chairmanship of Col. Sir Arthur Leetham, the secretary being Capt. W. T. Sergeant of the *Tank Corps Gazette*.

**ELECTRICIANS' WAGES.**—By provisional agreement between the National Federated Electrical Association and the Electrical Trades Union the London rate of 2s. 6d. per hour has been reduced by a 5 per cent. deduction from the men's weekly earnings as from the first pay-day following May 9th, 1921, with a further reduction of 5 per cent. on the pay-day following July 9th next.

**THE Interim Industrial Committee** of the Envelope and Manufacturing Stationery Industry was in session on Monday during the time the King was opening Southwark Bridge just outside the offices of the Employers' Federation. One of the items of business transacted was to pass a resolution asking the Postmaster General to receive a deputation with reference to the postal rates.

**At the annual conference** of the National Federation of Retail Newsagents and Stationers last week the Mayor of Scarborough (Alderman Whittaker), in welcoming the delegates, said an attempt was being made to legislate a Dumping Bill which would impose 33½ per cent. duty on imported newsprint (paper on which newspapers are printed). This he described as an attempt to hand over to the British mills a monopoly.

**COVENTRY'S MUNICIPAL "PRINTING."**—Coventry City Council have been persuaded to make an attempt to do the Corporation printing, and at the last meeting a resolution was carried to purchase a multigraph equipment. Alderman Pridmore (a solicitor) said it was only proposed to purchase one machine at present, but it was thought it might be possible to extend and establish a central printing department, and he estimated the saving at a penny or twopence in the rates. He admitted their printing might not be as good as the professional printer's, and that the minutes would still have to be sent out to be printed. It did not appear any practical printer had been consulted, nor is there any printer on the Council.

**THE annual outing** of the *Star* circulation department took place on Monday, when a numerous party journeyed by motor coaches to Chertsey.

**MESSRS. BEMROSE AND SONS, LTD.,** are sending out to the trade an attractive sample packet and price list of the Bemrose Series of daily and monthly calendar tear-offs for 1922.

**At the Mansion House** on Thursday there was a further hearing and adjournment of the case in which the National Labour Press is proceeded against for publishing "The Theses of the Communist International."

**THERE** were some notable items in last week's sale of the Brooke library. For a faulty First Folio Shakespeare £2,650 was paid. The first book printed in Italy containing wood-cut engravings, the 1478 "Meditationes" of Turrecremata fetched £240.

**WHILE** the average of wages in Hungary is calculated as giving an increase to about 15 times the 1914 figures (against cost of living about 44 times), the wages in the Hungarian bookbinding trade have increased to only 11 times the pre-war rates.

**THE Sunday Illustrated,** a new paper with large expectations as to circulation and prestige, is to be published on July 3rd. While Messrs. Odhams are naturally reticent, it is generally known that big plans are on foot to make this issue a large factor in the field of illustrated Sunday papers.

**THE Bromley Chronicle,** a weekly newspaper, which has been in existence for well over a quarter of a century, ceased publication on Thursday. It has been purchased by Messrs. Merritt and Hatcher, proprietors of the *Kentish Mercury*, and will be incorporated with the *Bromley Mercury*, one of their local editions.

**EVERY printer** has received an Order Form referring to publications issued by the Cost and Charges Committee of the Federation of Master Printers. On the back of the form are some important references to the new Paper Record. The importance of an accurately-kept record of stock cannot be over emphasized. Every printer who is not in possession of detailed information of his stock is urged by the committee to instal this system at once.

**"WHISK" MIXING MACHINE.**—A useful machine, which perhaps not every bookbinder and other user of adhesives is acquainted with, is the "Whisk" Mixing Machine, marketed by Mr. W. F. Pickford, of 8, Jersey-road, Ilford, who is also the supplier of Hill's pattern gums and cold glues and the "Gumara" pattern gums and glues. The "Whisk" machine, which is supplied in various sizes, adaptable for hand or power drive, is of sound and simple construction and claims to have great labour-saving capabilities in the breaking down of pastes, gums, cold glues and all kinds of soluble compounds requiring the addition of water or other liquids, to be turned out ready for instant use and free from lumps.

agents, 11, St. Bride-street, E.C. 4.

THURSDAY, JUNE 9, 1921.

# Current Topics.

## The Wages Position.

At the annual meeting of the Federation of Master Printers at Scarborough the president reported that the Labour Committee of the Federation had met the representatives of the Printing and Kindred Trades Federation on May 24th and submitted to them a strong case showing the present serious position of the industry, the great volume of unemployment, the shortage of work, and the need for reduction of costs in order to increase the demand for printing. The workers' representatives, he said, had been informed that it was not the desire of the employers that wages should revert to pre-war figures, providing the conditions of the industry and of the country would permit of the higher wages being maintained, but the cost-of-living index figure of the Board of Trade was now at about the same level as it was prior to the last two increases in wages, and therefore the employers thought they were justified in

suggesting that wages should be reduced to the extent of 15s. per week for male workers, 5s. 6d. for women workers, with a corresponding reduction for learners. It was reported that the representatives of the unions had promised to submit the case to their various executives and that the conference would be resumed at the earliest possible date. The action taken by the Federation Council and Labour Committee was fully approved by the general body of members assembled from all parts of the country. Thus, the next step now rests with the men's representatives. They have arranged to hold a meeting on the 16th inst., when delegates from all the various unions concerned will attend. We take it that soon after the 16th the men's representatives will be prepared to meet again in conference with the employers.

## The New Postal Burdens.

How WIDELY felt in commercial circles is the fear of disastrous effects upon trade if the proposed increased postal rates on printed matter are allowed to come into operation is shown by the numerous voices of protest now being raised on every hand. The printing industry, as we indicate on another page, has spoken in no doubtful fashion. Among later actions of protest an important one was the deputation which on Tuesday waited upon the Postmaster-General on behalf jointly of the Newspaper Proprietors' Association, the Empire Press Union, the Weekly Newspaper and Periodical Proprietors' Association, and the London Association of Trade and Technical Journals; the deputation was introduced by Viscount Burnham. On Tuesday also Mr. Kellaway received deputations from the National Chamber of Trade and the Press. At a meeting of the National Federation of Retail Newsagents, Booksellers and Stationers, held on Tuesday at Australia House, Strand, a strong resolution of protest was adopted. The many protests that have been expressed are very forcible, and the arguments adduced appear incontrovertible. Surely if an adequate discussion of the matter is forthcoming, there may yet at the eleventh hour be a likelihood of the withholding of this new tax on trade. Sir Rowland Blades has taken great interest in the subject, and in view of the serious effects of the changes to the whole business community, put down the following question in the House of Commons addressed to the Prime Minister: "Whether, in view of the serious consequences of the proposed increases in postage rates to British trade generally, and especially to the printing

trade, and the inevitable resulting increase of unemployment, he will either arrange for the Post Office Estimates to be put down before the 13th June or else afford the House some other opportunity of discussing the changes before their introduction." The following reply was received from Mr. Austen Chamberlain, the Leader of the House: "It is hoped that the discussion on the Post Office Estimates will take place on Thursday, 9th June, when an opportunity will be provided for discussing the proposed changes."

### Science and the Cost of Print.

ANOTHER of the many indications of the need for finding means to reduce the cost of printing is found in the fourth report, just issued, of the Conjoint Board of Scientific Societies. The report states that an exceptional number of papers are being communicated to the societies, including many held up during the war, but the resources of the societies, which have not increased, are insufficient, at present prices of printing, to publish even the normal pre-war number. The country is thus in danger of being seriously handicapped at a time when the rehabilitation of industry is in most serious need of scientific assistance.

## Personal.

THE Birthday Honours List includes as usual several names associated with the printing and allied trades.

AMONG the new peers is Sir Henry Dalziel, chairman of United Newspapers, Ltd., the company which controls the *Daily Chronicle* and *Lloyd's Weekly News*, also chairman of, and a big shareholder in, *Reynold's Weekly*.

A BARONETCY is conferred upon Mr. Wm. Ewart Berry, editor-in-chief of the *Sunday Times*, of which he is also a director and one of the principal shareholders; chairman and director of the *Financial Times*; director of the company which owns the *Daily Graphic*, the *Graphic*, and the *Bystander*; director of the St. Clement's Press.

ANOTHER new baronet is Sir Arthur Munro, Sutherland, K.B.E., proprietor of *Newcastle Chronicle*, *Evening Chronicle*, *Weekly Chronicle*, *Illustrated Chronicle*, *North Mail*, *Sunday Sun*, and *Sporting Man*.

SIR WILLIAM ROBERTSON NICOLL, M.A., LL.D., editor of the *British Weekly* since 1886, becomes a Companion of Honour.

AMONG the new knights is James Campbell Percy, D.L., J.P., Hon. Lieutenant, R.N., during war; proprietor of *Motor News*, *Irish Builder*, *Irish Cyclist* and *Motor Cyclist*; chairman Sackville Press.

THE RT. HON. LORD ASKWITH, K.C.B., will address the members of the Livery of the Worshipful Company of Stationers at their monthly lunch at Stationers' Hall, next Wednesday, June 15th, when he will speak on "The International Power of Printing."

MR. F. A. DAVIES (London Printing and Kindred Trades Federation) has succeeded Mr. R. A. Austen-Leigh as chairman of the London District Committee of the Joint Industrial Council. Mr. Austen-Leigh declined re-election as chairman, but agreed to act as vice-chairman for the ensuing year.

THE positions of joint secretaries of the District Committee have undergone a double change. Mr. W. Whyte, secretary of the L.M.P.A., succeeds Major Fordyce Birch, while Mr. E. J. Buckton has been nominated by the London Printing and Kindred Trades Federation in succession to Mr. Woodgate Stevens.

MR. A. W. FOSTER, secretary of the Paper-makers' Association, will be the guest of the London Master Printers' Association at their monthly lunch on Tuesday next, 14th inst., at the Connaught Rooms, and, it is expected, will deliver an address.

MR. R. A. AUSTEN-LEIGH, the president of the L.M.P.A., will make a statement as to the wages negotiations.

MR. W. CADOGAN, president of the Newport branch of the South Wales group of the Typographical Association, was at the annual meeting at Newport elected group president in the place of Mr. J. Ford, Cardiff, who retired.

MR. EDGAR WHITELEY, manager of the National Labour Press, is a candidate for the vacancy on the Co-operative Wholesale Society Directorate.

MR. ARTHUR BAUMANN, who has been connected with the *Saturday Review* for many years, has resigned the editorship and parted with his controlling interest owing to ill-health. Sir E. Mackay Edgar is the new proprietor.

T.U. AMALGAMATION.—Although there is not yet unanimity in trade union circles as to how the matter can most readily be attempted, it appears that the executive of the Printing and Kindred Trades Federation of the United Kingdom are definitely charged with the duty of drawing up a scheme of amalgamation of unions in the industry.

**GLOSSOP PRINTERS, LTD.**—Capital, £20,000, in £1 shares, to take over the business of printers, stationers and bookbinders, carried on (1) by T. Grant at Market-street, Glossop, as "Schofield and Grant," (2) by J. T. Whitham, at High street West, Glossop; (3) by J. W. Fernaby, at Station-road, Hadfield, and (4) by W. H. Irlam and Co., Ltd., at Surrey-street, Glossop, (5) the business of printers, newspaper publishers, stationers and bookbinders, carried on by the *Glossop Dale Chronicle* Printing and Publishing Co., Ltd., at Norfolk-street, Glossop, and (6) the business of a printer, newspaper publisher, stationer and bookbinder carried on by S. T. Ashton, at Howard-street, Glossop, as the *Glossop Advertiser* Printing and Publishing Co. Private

company. First directors: T. Grant, S. T. Ashton, H. Stapley, J. W. Fernaby, J. W. I. Workington and J. T. Whitham. Registered office: 6, Howard-street, Glossop.

**GREENSLADE AND CO. (READING), LTD.**—Capital £5,000, in £1 shares; stationers, printers, stereotypers, photographic printers, envelope makers, account book and paper bag manufacturers, box makers, cardboard manufacturers, etc. Private company. First directors: T. J. Peacock, H. D. Peacock, E. O. Gerrard, G. O. Tayler, and P. C. Howell. Registered office: Factory Bridge, Reading.

**GODFREE AND HEWITT, LTD.**—Capital £3,000, in £1 shares; manufacturers of, and dealers in, cereals, paper and paper bags, printers, etc. Private company. First directors: J. W. B. Godfree, Mrs. A. Godfree, and B. Hewitt. Registered office: 46, Holloway-road, Birmingham.

**PEMBERTON'S (GATESHEAD), LTD.**—Capital £55,000 in £1 shares (10,000 preference); to take over the business of paper manufacturers and merchants, and waste paper dealers carried on by R. F. Crankshaw and A. Crankshaw at Mirk-lane and Bush-yard, High-street, Gateshead-on-Tyne, and at 77, Cannon-street, E.C., as "Pemberton and Co." Private company. Subscribers: J. H. Clark and A. Halliday. Directors: T. Crankshaw, A. Taylor, R. F. Crankshaw, A. Crankshaw, J. H. Clark and A. Halliday. Registered office: 11, Mirk-lane, Gateshead-on-Tyne.

**KNIGHT'S PUBLISHING CO., LTD.**—Capital £200, in £1 shares; printers, publishers, advertising contractors, etc. Private company. First directors: H. S. Macintosh, J. Casanova and C. J. Livermore. Registered office: 149, Strand, W.C.

**FRICKERS, LTD.**—Capital, £1,500, in £1 shares. To adopt an agreement with Mary A. Abrahams and to carry on the business of printers, lithographers, paper, paper bag and box makers, type foundry, photographers, manufacturers of and dealers in playing, visiting and fancy cards, dealers in stamps, etc. Private company. Directors: D. H. Juniper, Mary Agnes Abrahams and Jessie M. Hawkins. Registered office: 84, Weston-hill, Upper Norwood, S.E.

### COMPANY MORTGAGES AND CHARGES.

Fresh Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 1908, and Satisfactions registered pursuant to Section 97 of the same Act. (The registration of Satisfactions is not compulsory).

**BARLOCK TYPEWRITER CO., LTD.**—Issue on May 25th, 1921, of £3,850 debentures, part of series already registered.

**J. HYATT AND CO., LTD.** (box and lace manufacturers, paper bag makers, etc., London).—Land registry charge on Ento Works, De Beauvoir-road, Kingsland, N., dated May 11th, 1921, to secure all moneys due or to become due from company to Barclays Bank.

**CARDIFF STATIONERY CO., LTD.**—Mortgage on 45, South William-street, and 7, Adelaide-street, Cardiff, dated May 11th, 1921, to secure all moneys due or to become due from company to National Provincial and Union Bank of England, Ltd.

**GLOBE ROTARY PRESS, LTD.**—Issue on May 18th, 1921, of £1,500 debentures, part of a series already registered.

**KENT MILNE AND PARTNERS, LTD.** (paper merchants and agents, manufacturers of paper bags and wrappings, etc., London).—Particulars of £5,000 debentures, authorised May 12th, 1921; present issue, £3,000; charged on the company's undertaking and property, present and future, including uncalled capital.

**UNIVERSAL BUSINESS AGENCIES, LTD.**—Particulars of £5,000 debentures, authorised April 28th, 1921; present issue, £1,050; charged on the company's undertaking and property, including uncalled capital.

**FISHER KNIGHT AND CO., LTD.** (printers, etc., Harpenden).—Debenture, dated May 25th, 1921, to secure £1,500, charged on the company's property, present and future, including uncalled capital. Holders: H. O. Thomas, Byways, Ayres-end, Harpenden.

**J. S. DUXBURY AND SONS, LTD.** (manufacturers of paper bags and boxes, printers, etc., Blackburn).—First debenture, dated May 12th, 1921, to secure £6,000, charged on the company's undertaking and property, present and future, including uncalled capital. Holders: C. M. Richardson, 23, Railway-road, Blackburn; and J. Harriss, 4, Bartholomew-lane, E.C.

**D. MUNRO AND SON, LTD.** (bookbinders, Newcastle-on-Tyne).—Satisfaction in full on May 24th, 1921, of debentures dated May 23rd and August 8th, 1912, securing £350.

### BANKRUPTCIES, etc.

*Re* **LANGHALL AND WADE**, 10, South-street Finsbury, E.C., printers' designers and manufacturers' stationers.—The public examination of these debtors was held at the London Bankruptcy Court last week before Mr. Registrar Francke, the accounts showing total liabilities £4,123 (unsecured £4,072) and net assets valued at £2,353. The business was started in August, 1919, by Ernest Langrish, Stuart Edward Wade and Harold Matthew Langrish, under the style of "Langhall and Wade," and in the following May they were joined by Cuthbert Collingwood. The debtors then purchased the existing business of a printer carried on at 147 and 149, Haydon's-lane, Wimbledon, but only paid £1,150 off the purchase price of £2,100. Three executions were levied at the South-street premises, and in March last the stock was removed by the sheriff. The failure was attributed to lack of capital, heavy interest on borrowed money and depreciation in the value of stock owing to the general slump in trade. The examination of all the debtors was concluded.

# The Increased Postal Rates.

## Growing Volume of Protest.

The printing and allied trades have not been slow in expressing strong and authoritative protest against the proposed increased postal rates, the announcement of which, as reported last week, was met with a remarkably unanimous volume of protest from those having most to do with print and publicity. Printers are especially concerned in this matter, and the threatened new imposts have caused serious alarm in the trade, as indicated by the strong resolution which was passed (as already reported) by the Federation of Master Printers in annual convention at Scarborough. That protest has since been followed by further action.

## Deputations to the Postmaster-General.

Influential deputations from the Joint Industrial Council of the Printing and Allied Trades and of the Post Card Association and Publishers' Association waited upon the Postmaster-General on Monday morning. The deputations included Mr. C. W. Bowerman, M.P., Sir Adolph Tuck, Mr. R. A. Austen-Leigh, Mr. J. J. Keliher, Col. H. Rivers-Fletcher, Mr. G. S. Williams, Mr. A. E. Goodwin, Mr. A. E. Holmes and Mr. T. E. Naylor.

Mr. C. W. Bowerman, M.P., introduced the deputations, and remarked upon the serious effect which the proposed increase in rates would undoubtedly have upon the printing industry.

Mr. A. E. Goodwin submitted a statement which pointed out that the unemployment in the printing industry to day was more serious than it had been for many years. The latest figures available showed that 72,295 workers were now either totally unemployed or partially employed. Any proposal to increase postal rates for printed matter would undoubtedly cause many firms to discontinue direct advertising methods.

Definite evidence was submitted of orders being cancelled from firms who issue market reports, small booklets and circulars which come within the minimum weight. It was also pointed out the proposed increase of the foreign postage would certainly limit the circulation of many journals.

Reference was made to the picture post card section of the trade, Sir Adolph Tuck stating that the former increase on post card rates led to a falling off of at least 30 per cent. in the quantity of cards used, and any further increase would crush the industry altogether.

Facts were also given to show that the increase in postal rates in Canada had led to a falling off in the revenue, and a similar statement was made with regard to Switzerland.

Colonel H. Rivers-Fletcher presented a number of facts and figures showing how firms who adopt direct advertising methods would be very seriously affected by the proposed changes.

## Little Hope of Modification.

Mr. Kellaway, replying, expressed his regret that any increase in postal rates should be necessary at the present juncture, but pointed out that no one could complain of insufficient notice. He expressed himself impressed with the temperate and careful statement made by the deputation, but held out little hope of any change being made. He promised, however, to give full consideration to the representations made; and Mr. Bowerman, on behalf of the deputation, thanked him for his courteous reception and the attentive hearing of the case presented.

The Postmaster General also received a deputation from the National Federation of Retail Newsagents, Booksellers, and Stationers at the General Post Office.

## Printers' Protest Meeting.

Further strong protest against the proposed increases was recorded on Monday evening at a meeting of London printers and others concerned in publicity services, which was held at the Stationers' Hall, Ludgate-hill. The gathering, convened by the Association of Master Printers of the London Central Districts, was presided over by Mr. J. D. McAra, and was well attended, many prominent London printers being present.

The convener of the meeting, Mr. W. H. Burchell, hon. secretary of Central Districts Branch of the London Master Printers' Association, introduced the subject, explaining how he had had to call the meeting at very short notice, the "astounding" proposals of the Postmaster-General being made public on the 26th ult. and being due to take effect on the 13th inst. Mr. Burchell stressed the severe effect the proposed abolition of the halfpenny rate would have upon the printing trade. He said it would diminish printers' trade, cause more unemployment amongst their 200,000 employees, cause a huge payment to be made by the Government in out-of-work doles. The printer, getting less work, would require less hands; discharges would have to be made and unemployment caused, while the object sought by the Postmaster-General would be defeated.

Mr. C. W. Bowerman and Mr. A. E. Goodwin reported upon the deputation to the Postmaster-General in the morning. Mr. Bowerman advised every member of the Association to send a postcard to his Member of Parliament asking him to protest to the Prime Minister and the Postmaster-General against the proposals.

Mr. Arthur Chadwick (Amalgamated Publicity Services, Limited), Mr. Samson Clarke and Mr. Fred. G. Hart also took part, and the following resolution was unanimously carried on the motion of Mr. Oscar Griffith:—

"That this meeting, representing upwards of one thousand master printers of London, commends the action of the Federation of Master Printers in at once communicating with the Postmaster-General by letter, and desires to associate itself with and to confirm the resolution passed by the Master Printers' Federation at their annual meeting on May

31st, as follows: 'That this meeting of printers from all parts of the Kingdom views with serious alarm the proposal of the Postmaster-General to increase the postal rates on printed matter and postcards, and is of opinion that every effort should be made to prevent those rates from coming into operation both by approaching individual members of Parliament and by putting the matter before the representatives of labour in the printing industry and the Federation of British Industries.'

Mr. Burchell announced that, in addition to the above-mentioned support, he had received over 500 communications from master printers and industrial firms whose businesses would be seriously affected by the increase of the halfpenny postal rate, expressing full sympathy with the objects of the meeting.

## "T.A." Triennial Conference.

### Proceedings Commence at Hastings.

The Typographical Association has an important agenda to get through at its triennial delegate meeting, which commenced on Monday. The sessions are being held on St. Leonard's pier, and several hundred delegates are attending.

The Association received a civic reception on Monday, a welcome being given by the Mayor, Alderman W. F. Fellows, himself a printer, and in the evening the Mayor and Mayoress gave an "At Home."

Mr. J. D. French (president), in his opening remarks, welcomed the young men of the movement, saying that their presence was a good omen for the future. The wave of trade unionism was spreading throughout the length and breadth of the country and they were sharing in it. It was up to them to keep the flame burning. Labour to-day was a governing factor.

Mr. H. H. Potter, a local master printer, welcomed the delegates on behalf of the master printers of the Home Counties. He expressed the hope that their deliberations would be to the advantage of their trade and craft. The trade had been lifted to a higher plane during recent years, and they should not let it slip back.

Mr. E. Hemsley (chairman of the Local Trades and Labour Council) welcomed the delegates on behalf of local Labour. He was glad, he said, that employers and employees were pulling together, for that not only tended to stabilise prices, but also to stop the cut-throat competition which had been going on in the labour market.

Mr. O. Connellan proposed a resolution, which was carried, congratulating the miners on their fight.

A resolution was passed stating that the conference viewed with alarm the postal proposals which, if adopted, would be a serious menace to the printing trade.

At Tuesday's sitting of the conference Mr. J. D. French, in the course of an address, dwelt on the industrial unrest in the country, and, says the *Daily Herald*, placed all the responsibility on the Government for not having made proper provision for the aftermath of the war. There was, he said, a conspiracy in the country between the Government and the capitalists to lower the standard of life through a reduction of the wages of the workers. They were, however, not going to take this lying down. So far as they of the printing trade were concerned, they were going to fight a reduction.

The Association was making excellent progress so far as membership and working conditions were concerned. There was a membership of 32,000 and the finances were in a splendid condition.

## Gazette.

### A WORD OF CAUTION.

In giving the official Gazette information, it must be distinctly understood that we take official records as we find them, and accept no responsibility for inaccuracies, while, as an almost invariable rule, the facts will be found correct. We advise our readers, before forming hasty judgment, to consider that there may be in each case satisfactory explanation which does not appear on the records.—Ed.]

### ENGLAND AND WALES.

#### PARTNERSHIPS DISSOLVED.

George Channon Mankin and John Parker Austin, printers, 126, High-road, Leyton.

Robert Winten and George Clark, paper merchants, 85, Fleet-street.

Arthur George Wright and Alfred Bernard Ankerson, advertising agents, Premier House, Southampton-row.

#### THE BANKRUPTCY ACT, 1914.

##### RECEIVING ORDER.

Alexander McDonald, 6, Melbourne-mansions, Queen's Club-gardens, Earl's Court, printer's agent, June 1st. Public examination August 9th, at Bankruptcy-buildings, Carey-street.

**HOARDINGS IN AUSTRALIA.**—There is strong feeling in Australia against advertisement hoardings as being unsightly. The towns of St. Hilda and Woollahra are abolishing them altogether, though there is naturally some outcry on the part of publicity interests.

**TORONTO STRIKE.**—Two thousand printers employed in book and job shops in Toronto struck work on June 1st for a 44-hour week and a minimum weekly wage of \$42 (about £10 10s.). Employers offered \$36 (about £9) for a 48-hour week, or \$33 (about £8 5s.) for a 44-hour week. Nearly 100 shops are affected, and it is believed that the strike will last for some time.

# The Bookbinder.

## The Bindery and Its Costs.

A trade union official told us recently that so long as the foreman of the binding department gave his hours for every finished job, there was no need for time dockets and there was actually the costing system in operation. That proves the need for cost-finding education among trade leaders. The more thoroughly the operative side of the industry understands the principles of ascertaining cost of production, the more thoroughly will they appreciate the point of view of the administrative side when it says that the attitude of the binding department is detrimental to sound business practice and hurtful to itself. The way the thing is working out in practice is this. In every other department of the allied trades the hours are collected progressively and at the end of every week the management is able to check its charges against its costs. Deficiencies, which are likely to prove serious, can be corrected by adjusting the charges, and a balance which corresponds to safety can be secured. This can be done by treating every job on its own merits as the cost of every individual order is correctly known. The hours recorded and collected for a week belong to that week only, and are not part of the preceding week or any other. Note the difference now, between this procedure and that which the trade union official regards as approximately correct for the bindery. Here the time given by the overseer would be for the finished job and a job might run on for weeks or months before being finally executed and costed out for entry in the day book. A weekly summary of binding hours as collected from the jobs passed down from the department for a single week would stand for nothing. Some of the work may have been in progress in the department for several weeks. For the costing system the figures are useless. Even a six months' record has no value unless an intricate system of stocktaking (which could not be accurate) were arranged. As to the individual times served out for costing, they are every one of them guesses, which correspond in accuracy to the experience, humour, mentality or inconsistency of the overseer. There is no other method of putting the trade on a sound bottom and no other means of eliminating the ignorant price-cutter than by finding out what your work costs per hour, how many hours it takes, and costing out accordingly.

## The Docket is Bound to Come.

In the whole course of our comment on cost-finding and time dockets in the bindery

we have never had a single criticism or question from the trade union side. Many queries and comments have been passed on from master binders and managers, whose views generally coincide with our own on the subject. If there is variance from our remarks it must be on the part of those who imagine times to be a source of evil or danger. It is all the more strange, therefore, that no one can come forward to take exception to the view we are constantly putting forward. On one point, however, all are agreed, and in this it is possible the reason for abstention from argument can be found, namely, that the docket is bound to come. Every binder and every official with whom the subject has been recently discussed has found himself admitting, sometimes freely, sometimes grudgingly, that the docket is bound to come. For this reason we are inclined to believe that it will come quickly, and we are equally convinced that it will come smoothly and work well.

## The Trade Outlook.

The state of trade in the bookbinding industry is bad. On every hand short time is the rule and the coal stoppage is not the only reason. With the whole trade and business of the country undergoing the severest depression it has ever known there is no call for stationery and no need for books. There may be a slight improvement when coal comes forward again but it will take months to get back to anything like normal. Another factor which operates against demand is the price of books. Despite falls in the cost of material the cost of account and stationery books works out at practically three times pre-war cost. Every binder and stationer is constantly having to meet complaints over price. With complaints from his clients, and price cutting to contend with among his competitors, the position is anything but a happy one. There appears no help for it but to carry on, hoping for an increased volume of work, a further fall in the price of materials, including paper, and a fuller volume of hours to the working week, which will make a wider distribution of the oncost charges possible.

## Binding Materials Market.

In the market for materials not much change is to be recorded for the last month. Leather prices have actually hardened a little owing to better demand from the boot people. Pigskin is abundant, and good quality skins are now available. There is no demand for light leathers, however, for the fancy goods trade is at a standstill and bookbinders have

no desire to buy. Bookcloth, buckram and fabrics remain unaltered, as also do marble papers and millboards. Glue has declined about £5 per ton and strawboards are now down as low £7 per ton. English box-board is offered for clearance at competitive figures by the makers. The prospect of a tariff on binders' paper and boards is one that is not welcomed by the industry, for the price of binding is already prohibitive enough, and there are certain classes of board and paper which we simply cannot produce in this country. Already gold leaf has taken a leap forward in response to the reparation tariff against German goods. When the price of gold leaf jumps from 65s. to 75s. the ordinary person can be excused from wondering how Germany is actually being made to pay. In the process of making other people pay it appears to be extremely likely that all our paper, boards, ink, postage and everything we touch or use is going to cost us more.

**VICTORIAN LIBEL LAW.**—A newspaper proprietor in Victoria has to take the risk of an action for libel if he publishes in good faith a statement made at a meeting of a municipal council. A recent case in which a Woodend newspaper was mulct in damages shows that this law operates very harshly. The matter has been taken up with the Victorian Attorney-General by the Victorian Country Press Association and as a result the point is to be

brought to the notice of the Cabinet. It is pointed out that more than 30 years ago the Imperial authorities had realised the injustice of the act which permitted such a prosecution to be successful, and by an amendment then passed by Parliament newspapers were free to publish statements made at meetings of councils or other public bodies, and even at public meetings, provided that no malice was shown. A similar amendment had been adopted in practically every British Dominion, and was actually in force in the majority of the Australian States.

## Trade Union Matters.

MR. S. STUBBINS, U.P.B.M.R. and P.W., in a conversation the other day, said his union was suffering from a good deal of out of work, but that the numbers signing the book were steadily decreasing week by week. He was optimistic enough to think that on the settlement of the coal dispute work in the book-binding section of the trade would begin to look up, as there was a lot of work about that was only a waiting orders for execution.

ONE of the hindrances to trade at the present time was that publishers and printers were waiting for the price of paper to become more stabilised. When this was done orders would be given in millions instead of in thousands, as they are to-day.

IN regard to the employers' decision to approach the unions for a reduction in wages of 15s. a week, Mr. Stubbins said a strong feeling is being expressed that a more opportune time for a reduction of any kind would have been when trade gets more normal, and full time is again in full swing. The idea of a reduction by any amount to men who are now working only two or three days a week is felt to be quite an impracticable proposition.

THE Amalgamated Society of Lithographic Printers, though suffering like other unions from an abnormal amount of unemployment, are "carrying on" during the crisis, and in spite of the baleful effects of the coal stoppage, are able to strike an optimistic note. This was the view expressed the other day by Mr. Woodgate Stevens, the secretary, who is firmly of opinion that upon the resumption of work in the mines there will be an enormous influx of orders into the lithographic section of the trade. He considered that as far as unemployment was concerned, the low water mark had been reached, and on the question of short time the employers were arranging the matter with the employees as amicably as possible, there being complete reciprocity on both sides.

MR. STEVENS believes that the application of photo-mechanical work to litho printing augurs well for the future of that branch of the trade, backed up as it is by the knowledge gained, though sometimes tardily, of the photographic side, which had been exploited by the employers. In consequence of developments in this direction, he was opinion that the litho trade in the near future would be exactly the reverse of to-day: instead of unemployment there would be an insufficiency of labour.

THE Clerical Section of the N.A.T.S.O.P.A. is suffering, along with other unions, from an exceptional amount of unemployment, due

primarily to the coal stoppage and also to the general depression in trade. Its members are, however, looking forward hopefully to a better condition of things in the near future, and are standing by the results of the coal trouble.

THE newspaper and periodical clerk has not in the past had many advantages offered him of gaining knowledge in his specialised calling, hence a strong movement is on foot that if the proposed new technical school should come to fruition he should be included in its activities. A syllabus which would include such subjects as "Make-up of Paper," "Various kinds of Blocks Used," "Various Classes of Advertisements," "Composition—Hand and Machine," "Methods of Printing," "Photogravure as Applied to Printing," etc., would offer to the newspaper clerk good theoretical groundwork, from which he would be able still further to increase his knowledge and usefulness.

AT a meeting of the Midland Master Printers' Alliance at Derby, Mr. E. H. Lee, for many years president of the Nottingham Master Printers' Association, was unanimously elected president, in succession to General Bemrose, of Derby.

THE monthly meeting of the Printers' Managers and Overseers Association was held on Tuesday, when, at the conclusion of the evening's business, Mr. Frederick T. Corkett, F.R.P.S., lectured on "Photo-Lithography and Lithotex."

A FATAL lift accident, involving the death of William Davies, occurred at the South Wales Printing Works, Westgate street, Cardiff, on Monday evening. The lift is used for carrying goods from floor to floor, and Davies, it is understood, was getting into it on the ground floor when it started and he became wedged between the floor of the lift and the beam of the floor above. He was at once removed to hospital, but expired soon after admission.

THROUGH the generosity of Mrs. Davies, of Plasdinam, an addition has been made to the National Library of Wales of four printed books and two manuscripts, each of six volumes, being of exceptional value for their beauty and rarity. The printed books include Caxton's (1) *Speculum Vitæ Christi* 1488, one of the rarest of the books printed by him, and (2) *The Polychronicon*, of which Caxton finished his revision and continuation of the text on July 2nd, 1482, and printed it soon after. A Wynkyn de Worde book is an edition of the same work, the *Polychronicon*, printed in 1495. Most valuable of all is a copy of the Great Bible, 1539, printed on vellum. Coverdale (the translator) and Grafton (the publisher and printer) in a letter to Thomas Cromwell, Earl of Essex, dated Paris, June 23rd, 1538, state their intention to print "two ensamples on parchment." One of these copies is in the library of St. John's College, Cambridge.

## New Inventions.

### Platen Inking Apparatus.

Travelling inking apparatus for platen machines, as patented by Mr. A. Marzio, is provided with longitudinally reciprocated distributing rollers mounted on movable bearings, so that they may be in contact with the inking rollers in all positions, and distributing plates are arranged as extensions at one or both ends of the form. Distributing rollers B are journaled in frames A pivoted at c on

rods b pressed inwardly by springs d, so that each roller B may remain always in contact with two inking rollers A. The rollers B have extended axles  $p, p'$ , which may be provided with anti-friction balls, engaged at the ends  $p$  by springs M, and moved at the other ends  $p'$  by a cam-plate L on the operating rod D of the machine. Distributing plates P extend from one or both ends of the form F to continue the rotation of the inking and distributing rollers after they move off the form.

### Intaglio Inking Apparatus.

Inking apparatus for intaglio printing cylinders, as patented by Mr. G. W. Mascord, comprises a series of nozzles arranged under the cylinder and from which the ink is ejected at low pressure by a pump, or by gravity from a raised reservoir, surplus ink being collected in a fountain or trough beneath the cylinder. As shown in Fig. 1, the intaglio cylinder a is mounted above and within a trough or fountain b and immediately below the cylinder is a nozzle member c connected by the

supply pipe d to a low pressure delivery pump e supplied by a pipe f from a reservoir g. Surplus ink from the trough b is returned through a pipe h to the reservoir g. Strainers i, j may be provided in trough b and reservoir g. As shown in Fig. 2, the ink is supplied to the nozzles c through the pipe d by gravity

from a reservoir g, the pump e being provided for returning surplus ink from the trough b to the reservoir g. The nozzle member c may be tubular and have nozzles formed therein by flaring perforations, or have nozzles mounted upon it.

### Sheet Feeding Devices.

In a sheet-feeding device for printing presses or the like, the invention of Messrs. Kuhn Maschinen und Werkzeugfabric, B., of

the kind in which sheets are forwarded from a fanned-out pile by rollers as 1, 2, the fanned out pile is supported on a table con-

sisting of a grid of bars 4, and the pile is advanced intermittently by a second grid, the bars E of which are raised, moved towards the feed rollers, then depressed and returned to normal position, the movements of the second grid being controlled by a feeler device which is inactive when the sheets are in a position to permit the feeding devices to act on the sheets. As shown in Figs. 1 and 2, the feeler consists of a lever M, which is mounted on a shaft N fitted with an arm M' with a roller 5 in contact with a cam L. When there is no sheet to prevent the upward movement of the lever M, this lever moves upwards when the cam L permits the roller 5 on the lever M' to drop into the cam recess. This movement of the lever M' causes a thrust pin P to actuate a latch Qu to connect a reciprocating rod T to a segment u which is thus oscillated by the rod T. The segment u gears with a shaft w fitted with a number of segments, each segment being connected by two bands y to a bar E of the movable grid. The bars E are thus advanced towards the

pile by the segment u, and return by a spring z, the bars E being raised as they move forwards by rollers D on arms C, C', mounted on shafts A, B, connected by a rod G and lever arms F. The shaft A is oscillated by a second cam on the shaft of the cam L, and a lever arm K. As soon as the sheets pass beyond the feeler M, the latch Qu is unlatched, and, the means for advancing the bars E is thrown out of action.

# Wages in the Printing Trade.

Statement by the President of the Federation on the Demand for a Reduction.

Several matters of interest to the printing trade were discussed at the monthly luncheon of the London Master Printers Association, which was held at the Connaught Rooms on Tuesday under the presidency of Mr. R. A. Austen-Leigh. Mr. A. W. Foster, the secretary of the Papermakers' Association, had been invited to address the members on the paper situation, but before this part of the programme was fulfilled the president of the London Association, mentioned one or two matters which had taken effect since the previous luncheon, while Mr. James MacLehose, the president of the Federation, dealt with the all-important question of wages.

Mr. R. A. Austen-Leigh alluded first of all to the appointment of a new secretary in Mr. Wm. Whyte. (Applause.) He was sure that appointment had given satisfaction to all who knew the great keenness Mr. Whyte had displayed ever since he had been connected with their staff. (Hear, hear.)

## A Printing Jubilee.

The chairman proceeded to refer to the celebration of the jubilee of Mr. George P. Reveirs, an event in the printing trade upon which Mr. Reveirs had received congratulations from every side. At the dinner which was held the previous evening he (Mr. Austen-Leigh) had the privilege of representing that Association and Mr. Reveirs received a great number of presents to mark the esteem in which he is held by his various customers.

Since they last met some of them had been to Scarborough, where they were busy holding their annual meeting and choosing their new officials. They had been, so to speak, selecting their team for the next test match. (Laughter.) They had appointed Mr. Mac-

Lehose president of the Federation and Mr. Coppock, junior vice-president. (Applause.) They were pleased to welcome both these gentlemen that day. He thought they were fortunate in the fact that the new Federation president had been able to make his first visit to any of the alliances on the occasion of the monthly lunch of the London Association. As No 1 Alliance, that was very suitable. (Hear, hear.)

## A Combined Demand.

Mr. Austen-Leigh mentioned that it had been intimated that he would make a statement on the present position of the wages question, but as the matter had been treated from the Federation standpoint and they were making a combined demand, he thought the most suitable person to make the statement was the president of the Federation, and he would call upon Mr. MacLehose to do so.

Mr. MacLehose, who was warmly received, said whenever he attended a meeting of master printers in London it was more and more obvious that the labours which fell upon the Federation were increasing, and the question as to whether or not one was able to carry out the duties of president successfully depended really more upon the members than upon their leader. The president after all could only voice the feelings of the members, and if he had this support, which he felt sure they would give him, he might be able to do something, but without that support he could do nothing. His own feeling was that the difficulties which they had to encounter ought to have the fullest consideration for the different alliances and associations as well as of the Federation council. If on any point they came to a decision, he thought they must feel

that the Federation could be of little service to any of them unless there was the will power to carry that decision through to a termination. He felt sure he could count upon that great London Alliance in contributing in the fullest degree to a mature consideration as to the wisest course to be pursued and also for a determination to carry that out when it had once been adopted as a policy of the Federation. (Hear, hear.)

#### Wages Negotiations.

Coming to the question of wages, Mr. MacLehose said the position at the moment was that they as a Federation Council had asked for a reduction of 15s. on the wages of men and of 5s. 6d. in the wages of women. That request was made at the last meeting with the Printing and Kindred Trades Federation, who were considering whether or not the executives of the different unions would allow the negotiations to be conducted by the Printing and Kindred Trades Federation on behalf of the whole of the unions. The employers understood that the union representatives were meeting this week, and they might expect that they would have a reply in the course of the next day or two as to whether or not those negotiations could be carried on as one set of negotiations with the Printing and Kindred Trades Federation. When that was known it would fall to the Employers' Federation to decide as to the line to be taken, and he (Mr. MacLehose) expected that under either circumstances—whether or not the Printing and Kindred Trades Federation was prepared to accept the responsibility of negotiating for all the unions—they would have early next week a meeting of the Labour Committee.

At the moment he could say no more. He thought they all of them felt that the decision which was come to with reference to the miners dispute was likely to have a reflex action upon their own difficulties. He was hopeful that the miners would be persuaded to accept a reduction in wages. None of them wished to see the members of the unions in their own trades anything but prosperous. His own feeling was that they would really add to their own prosperity in the future if they were prepared to accept a reasonable and moderate reduction in the present. (Hear, hear.) But in regard to these matters they must wait and see what the course of negotiations was going to be. As he said, there would be a meeting of their Labour Committee next week, and whatever line was decided upon he felt quite sure that it would have the whole-hearted support of the members of the Federation.

Mr. R. A. Austen-Leigh thanked Mr. MacLehose for his lucid statement, and then asked Mr. Foster to give his address, which was of a very interesting character, and which we hope to print in our next issue.

MESSRS. SAMUEL JONES AND CO., LTD., have issued comprehensive sets of their special papers—marble papers, linen print, book cloths, cheque, art kraft and imitation art papers.

## Wages in the Paper Trade.

### Time Limit for Acceptance of Employers Demands.

### Union Talk of a Threatened Lock-Out.

Negotiations are proceeding with reference to a reduction of wages in the paper industry. This is a matter, of course, which requires the most delicate handling and provides a test of the true relationship subsisting between employers and employed. It is generally acknowledged that wages must fall with the decline in the cost of living; the question is how far they should go. Naturally, a cut in wages is not desirable; but the condition of trade and industry render such a course necessary.

We understand that the proposals, in their final form, are to be submitted to the respective sides for confirmation. In dealing with the question the parties have been impressed by the present state of the industry and the necessity for co-operation in meeting the difficulties of the future.

According to Mr. T. G. Newland, the general secretary of the Printing and Paper Workers Union, the offer of the employers is not acceptable, and he is not prepared to advise his members to agree to it.

"Unless the offer is accepted by the 27th inst., we are to be locked out," said Mr. Newland this week.

Complaint is made that the employers refused to submit the matter to the Joint Industrial Council. "They have just formed the full council," added Mr. Newland, "and the first opportunity the employers have of making use of it, they decline."

The offer made is regarded by the Paper Workers Union as too drastic a reduction.

"There is no finality to it," observed an official to a representative of the *World's Paper Trade Review*. "In fact, according to the proposals made, our people will have to pay the masters something for the privilege of working for them."

We understand that the question of wages in the envelope and manufacturing stationery industry has been adjourned to the 27th inst., which is the date given for the paper workers to accept the terms.

## Cheaper Canadian News-Print.

It is stated that the price of news-print in Canada which was \$135 (about £30) a ton six months ago, will be reduced in the near future to \$95 (£21) or \$100 (£22) a ton.

AN Advertisement is always working.

## Trade Union Matters.

THE Typographical Association have granted £250 in aid of the Miners' Children Fund, and have lent £5,000 to the Miners' Federation.

THE Voluntary Distress Fund organised by the London Branch of the National Society of Operative Printers and Assistants has so far realised about £600.

A SERIOUS state of affairs is revealed by the officials of the National Society of Operative Printers and Assistants. Recently a vote was taken asking for increased subscriptions and a short time levy. The result of the ballot was a rejection of the proposals. As about 8,000 members did not vote, the executive committee are adopting the unusual course of calling for a fresh ballot. In a covering circular, the executive committee state that they cannot continue under the present conditions, as bankruptcy will be the result, and further state that a refusal would be a vote of "no confidence" in the officers. In the event of a favourable vote, the levy will be declared upon actual earnings and not upon unemployed benefits.

## Paper and Box-board Trade.

Messrs. Henderson, Craig and Co., of 67, Watling-street, London, E.C., have for some years represented the Canada Box-board Co. of Montreal. They have also been fairly large buyers of Canadian pulp. In the course of an interview a representative of the firm said: "Neither Canadian paper nor Canadian box-boards have any market in England at present. The import of German news-print has been stopped for the moment by the imposition of a heavy export duty. Finland and the Scandinavian countries, however, aided by their low exchange are offering paper at extremely low prices, which offsets the remarkable drop in freight rates from Canada. Of course, present conditions are abnormal, and in ordinary times we think Canadian news-print could compete very well in this market. As regards box-boards, the war gave a fillip to the British demand, since it led the British Government, in view of the scarcity of tin, to buy a lot of box-board for food containers. These are still being turned out in quantities by British factories, and Laurentide box-board, which seems to be especially suitable, is being used for this purpose."

DURING the first two months of this year the United Kingdom sent to Egypt articles made of cardboard and papier maché of the value of £E3,393, while Germany sent £E1,408 worth.

## Deal Home Memorial.

**The National Society of Electrotypers and Stereotypers Endow a Bed.**

Under pleasant weather conditions a company fully representative of the National Society of Electrotypers and Stereotypers left Blackfriars-road on Saturday for the Lloyd Memorial Home, Deal, the occasion being the unveiling of a memorial bed in memory of members of the Society, journeymen and apprentices, who fell in the great war. The larger portion of the company made the journey by char-a-banc. Among those who accompanied the party were Messrs. W. C. Warren, T. H. Middleton, J. Parker and W. H. Crosby.

On arrival at Deal a very substantial dinner was provided at Oatridges' Restaurant, after which the party was cordially received by the chairman of the Home, Mr. W. T. McMullon.

Previous to the ceremony of unveiling of the plate above the bed, Mr. W. C. Warren, the general secretary of the Society, remarked on the importance of the occasion, and the pride they felt for those whom they had met to honour.

Mrs. W. C. Warren then drew aside the Union Jack which covered the plate, and in a few words said how she appreciated the honour bestowed upon her in being asked to perform that important duty. She wished the Society and its members, and also the Lloyd Memorial Home still greater success in their future endeavours.

After a vote of thanks, proposed by Mr. McMullon, and responded to by Mr. J. Miller (Eyre and Spottiswoode's), had been accorded, the party made an inspection of the Home, the visitors appreciating all that is being done there for the health and comfort of those under its care.

The arrangements for the day's proceedings were ably carried out by the stewards, Messrs. T. H. Middleton, H. McEntee, and F. Mouse.

## Paper Output Record.

The claim is made by the Abitibi Power and Paper Co., Montreal, Quebec, that its production at the mills during the month of April established a record unequalled by any other Canadian or American mill. During the month of April 261 net tons of paper were turned out and shipped every day of the 26 working days of the month. This is an equivalent of 793 pounds of paper per inch trim or 743 pounds per inch of wire. This surpasses all high productions for a period of one solid month of any mill in Canada or the United States, running on 32-pound standard "news," of which the record is known.

# Printers' Managers and Overseers ASSOCIATION.

## Monthly Meeting.

Lecture by Mr. F. T. Corkett, F.R.P.S.

Despite the advent of summer weather, there was a goodly muster of members present at the June meeting of the P. M. and O. A., held at the "Old Bell" on the 7th inst., and, when the business of the evening had been disposed of, they were favoured with a lecture by Mr. Frederic T. Corkett, F.R.P.S., who took as his subject "Photo-Lithography and Lithotex."

The minutes of the May meeting having been disposed of, Mr. S. M. Bateman, who was in the chair, announced that their president, Mr. A. E. Jarvis, was making satisfactory recovery from his illness and hoped to be present at the July meeting. The announcement was received with applause.

### The Czecho-Slovakian Book.

The attention of members was drawn to the presence on the table of the Czecho-Slovakian presentation volume, given to the Association by the Czech delegates on the occasion of the P. M. and O. A. day at the Printing Exhibition. The book was passed round for inspection during the evening. Its pages, simply and solidly set, but creating a pleasing impression of artistic design, came in for a good deal of admiration. A peculiar feature is the occasional slight projection of a line of type into the right-hand margin of the page. The remark was heard that this practice was much less objectionable than the awkward division of words, or the over-spacing to which the English compositor has sometimes to resort. There is room, no doubt, for difference of opinion on this point. The practical man will perhaps be driven to wonder whether in Czecho-Slovakia the printer is supplied with composing sticks, chases, etc., made of indiarubber!

### New Members Elected.

The following gentlemen were, in usual fashion, elected members of the Association, the vice-president giving a personal welcome to those of them who were present: Mr. D. Dickie (Sprague, Haycock, Ltd., 69, Dean-street, W., general manager); Mr. Chas. G. Kemp (Wheeler's Printing Office, 54-58, Caledonian-road, N.1, general manager—letterpress); Mr. A. E. Martin (E. Couchman and Co., Ltd., works manager); Mr. J. A. Turner (Suffolk and Watts, Ltd., overseer—composing).

### Delegates' Reports.

The next item on the agenda was the reception of the reports of the Parent Association's delegates to the delegate meeting. Mr. S. M. Bateman was the first speaker. He remarked that the meeting was one of the most

successful conferences that the Association had ever held. The discussions had proceeded remarkably smoothly, many points which had been expected to give rise to much disputation having been allowed to go through uncontested. A report of the meeting having been printed, he did not think it necessary to go into details, but he remarked upon the fact that the suggestions of London had in the great majority of cases been adopted. There had been no occasion to resort to a card vote, and the proceedings had been carried through in the most amicable manner.

Mr. E. H. Berryman, who has represented the Parent Association at two previous delegate meetings, recalled the earlier occasions and said that the recent meeting was very different from the other two. The conditions had not been ideal for their purpose, but they had managed to settle down in proper fashion and the proceedings generally had been very amicably conducted. He was surprised at the easy way in which some difficult subjects, notably the question of "broadening the basis of membership," had been disposed of. Mr. Berryman said that to his mind the most important subject discussed had been the question of their Association's relations with the "T.A." He was surprised—and he thought all the delegates were surprised—to learn that 50 per cent. of their provincial members were working overseers. This meant that in the event of a dispute, provincial members would be in a very difficult position if an agreement were made with the T.A. without modification of that Association's present rules.

Mr. E. W. Whittle, who said he had thoroughly enjoyed his first delegate meeting, expressed agreement with Mr. Berryman as to the importance of the question of their relations with the T.A. He said he had, since the delegate meeting, had further correspondence with the Association. The position of London members was quite secure; it was simply a question of protecting provincial members in case of a dispute. Mr. Whittle confirmed what previous speakers had said as to the satisfactory manner in which the delegate meeting had disposed of the questions at issue. He thought the meeting had given universal satisfaction.

Mr. Barker, referring to the question of relations with the T.A., pointed out that while the Parent Association was very careful as to the status of those they admitted as members, provincial centres, he feared, were not so careful. He thought the question of the basis of membership would be a very important one in the future.

The chairman mentioned that Mr. J. C. Pugh, also a delegate, had written expressing regret for absence due to domestic reasons.

The report of the delegate meeting was unanimously adopted.

### Alteration of Subscription.

The general secretary moved, and it was unanimously agreed, that the alteration in the rules with respect to subscriptions and benefits as adopted at the delegate meeting come into effect as from August 1st next. The

quarterly subscription will then be 5s. instead of 3s. 6d.

The business of the meeting came to an end with hearty votes of thanks to the vice president, Mr. S. M. Bateman, who presided at the delegate meeting, to the delegates of the Parent Association, and to Mr. S. A. Dawson and his committee. Suitable responses were made.

#### Mr. Corkett on "Lithotex."

Mr. Frederic T. Corkett was then called upon to lecture on "Photo-Lithography and Lithotex."

Illustrating his remarks with many photographs, examples of work accomplished, etc. Mr. Corkett made plain his confidence in a big future lying before photo-lithography, and, frankly confessing himself a salesman of the "Lithotex" apparatus, he gave much interesting information and advice with regard to "Lithotex" working.

After explaining the use of filters in producing photographic plates for use in three-colour work, Mr. Corkett said that much had been heard lately of three and four-colour work in typographic printing but not in planographic. The latter, however, he was sure was coming along, both offset and direct. By the "Lithotex" process, he said, they could get metal litho plates that would work perfectly satisfactorily and would stand up three or four times as long as a transfer plate. Having laid great stress on the importance of starting with a first-class photograph, the lecturer proceeded to explain the use of the "Step and Repeat" machine for producing from the one original a multi-negative in which the original is reproduced any desired number of times in the size and disposition required. It was then explained how from the multi-negative the subject is reproduced, by the aid of the "Lithotex" printing-down machine, with remarkable speed and accuracy on a sensitised grained zinc plate.

Although the subject was a very special one and somewhat foreign to the daily work of some of the members, it was evident that many of those present followed the lecture with very keen attention, and the questions asked at the close showed that the questioners had taken a detailed interest in the lecturer's remarks.

At the close of the discussion Mr. Lloyd proposed and Mr. J. H. Burton seconded, a vote of thanks to the lecturer, and this was heartily accorded.

## Reed Paper Enterprises.

Mr. L. A. Winkel, a wholesale merchant, of Copenhagen, has made a contract with the German Rohrstoff-Verband (Reed Matter Association), managed by Mr. Erik Rusten, a Norwegian millionaire, to produce paper in Denmark after the German patent obtained by Branco Bros. Similar plants, it is reported, are being erected in Rumania, Spain and Italy. Holland is said to have paid 2,000,000 gilders for the Dutch rights.

## Printing, Bookbinding & Kindred TRADES OVERSEERS' ASSOCIATION.

### Monthly Meeting

The usual monthly meeting of the Association was held on Tuesday, the 7th inst., at St. Bride Institute, Bride-lane, E.C.4, the president (Mr. A. W. Hunt) and the vice-president (Mr. H. Milton) ably presiding in their respective capacities. The meeting was fairly well attended and in the absence of a lecturer, consideration was given over to the Association's future activities.

The general secretary (Mr. G. A. Eden), being on holidays, the financial secretary, Mr. A. G. Aves, read the minutes of the last meeting which were duly confirmed.

Items of correspondence were submitted from Messrs. H. Ward (Hull), E. A. Clifford, H. Parrott and F. J. Ibbott.

A new member, Mr. A. Goodwin, was unanimously elected to membership.

The members next discussed the advisability of holding the annual outing this year, and the general opinion was that these events helped to create a better social spirit, enabling members to get to know one another better.

It was agreed to hold the event as usual, and it was proposed and seconded that the Association should make arrangements if possible for a visit to the Convalescent Home at Carshalton.

The president here took the opportunity of paying a tribute to the late Mr. A. Evans, who had helped to acquire the Home for the benefit of the trade, and he thought yet another visit from the Association would be greatly appreciated, especially by the newer members.

The date proposed for the event was July 23rd, and the two secretaries and Mr. Tom Hunt were appointed stewards.

It was agreed to hold the members' smoker in October, and as in former years to confine it to members and prospective members.

A proposition moved by Mr. A. C. Ware and seconded by Mr. T. Hunt to hold a whist drive in November was carried, and it was also agreed to hold the annual bohemian concert as early as possible in December.

Mr. Aves was asked to make inquiries regarding dates and places of venue for these events and to report at the next monthly meeting.

Before the meeting closed a letter was read from Mr. Eden, general secretary, who sent greetings from Bognor to the Association with a chatty and interesting account of his holiday adventures. Included in the letter was the statement that it was the first time for fourteen years that he had been absent from a general meeting, and in regard to his sea-bathing exercises that he was adopting the "all in" policy.

On the motion of Mr. J. Fleming it was very cordially agreed to return greetings to Mr. and Mrs. Eden, with the Association's hopes that they might have a happy holiday.

## S.E. London Master Printers.

The usual monthly meeting of the Association of Master Printers of S.E. London was held on Tuesday at the Bridge House Hotel, London-bridge. There was a good attendance of members, and the chair was occupied by the president, Mr. E. B. Smith. At the conclusion of the usual routine business, Mr. W. H. Burchell, hon. secretary of the Central District Association, delivered an address on "Rules and Regulations in a Printing Office." The points raised by Mr. Burchell were given in his usual breezy fashion, and evoked a very useful discussion.

Mr. F. Mason submitted several items of correspondence. Arising out of these was the question of hourly rates as they applied to the country districts, and Mr. Northam strongly expressed the view that they should be furnished to the District Associations. He said it was impossible to successfully quote for work in the country if they were kept in the dark as to what were the hourly rates charged.

Mr. J. W. Carley said he could not see how a knowledge of the hourly rates was going to help London printers.

Mr. Mason said, if Mr. Northam would agree, and if it met with the wishes of the members, he would write to the secretaries of other associations in the Federation to ascertain the hourly rates in the different districts.

The suggestion of the secretary was agreed to.

Mr. Johnson then gave an account of a visit to Croydon, and remarked on the ridiculous competition going on there. He threw out the suggestion that the S.E. District should hold a round table conference with the printers in Croydon to see if anything could be done to improve matters.

On the suggestion of Mr. Mason, it was left to Mr. Carley and Mr. Johnson to arrange a

meeting in Croydon—if possible, the next monthly meeting of the Association.

Mr. Mason moved a vote of thanks to Mr. Burchell for his paper—which we hope to give next week—and coupled with it the name of Mr. J. R. Riddell, who made a useful contribution to the discussion.

Before the meeting closed Mr. Briganshaw asked Mr. J. J. Keliher if he would state to the members how far they had got on the wages question, and Mr. Keliher, in reply, briefly summarised the position up-to-date.

Light refreshments were served during the proceedings, and the meeting terminated soon after six o'clock.

**BRITISH INDUSTRIES FAIR.**—The Committee appointed by the Board of Trade to consider the best policy to be adopted in future as regards British Industries Fairs expresses the opinion that the ideal arrangement would be for the Fair to be concentrated in one centre—London. They feel they are not justified in recommending a continuance of the Glasgow Fair, but the Birmingham Fair received a measure of support which would justify its being considered as a National Fair.

**THE PAPER MARKET.**—Commenting on the state of the paper market, a writer in *Paper and Progress* says: "Prices are still in a somewhat chaotic condition, many parcels being on offer at figures quite out of proportion even to the latest market prices of materials and production, and, as is inevitable in the circumstances, altogether regardless of actual cost. It is safe to say that we are some way off anything approaching standardisation in either prices or qualities. However, let us refrain from being too despondent, for whatever line of thought may be taken, the fact remains, and must remain, that paper is an essential and indispensable commodity in the commercial and educational life of the world, and therefore must, sooner or later, come back into its own."

## Trade Notes.

THE late Stanley Frankland Hepburn, law stationer, Prancras-lane, E.C., aged 52, left £8,854.

THE Egyptian Government Press invites tenders for the supply of 4,600 metres of book-binding cloth. Tenders will be received by the Controller of Printing and Stationery, Cairo, up to noon on June 30th.

MESSRS. JAMES SPICKER AND SONS, LTD., are sending out an interesting collection of priced specimens of the papers they can offer to printers. The wrapper, printed in two colours and embossed is a good example of colour work.

MESSRS. MAGGS, BROS., of 34-35, Conduit street, New Bond-street, W., send us their catalogue of illuminated manuscripts and miniatures. From this catalogue the collector of ancient manuscripts will find a wide range from which to make a selection.

ACCORDING to amendments made in the Australian Commonwealth Tariff, bookbinders' cloth and bunting bear the following rates, *ad val.*: British Preference Tariff, free; Intermediate Tariff, 5 per cent.; General Tariff, 15 per cent. The Intermediate Tariff is not yet operative.

THE *Natsopa Journal* answers with an emphatic "NO" a correspondent's query as to whether the *Natsopa* general secretary is "in receipt of a salary of £1,000 per year from Lord Northcliffe." "Rumour," adds the *Journal*, "is not only a lying jade, but at times a slanderous one."

MANY of the well-known productions of the firm of Dean's Rag Book Co., Ltd., will be on exhibition at the forthcoming London Fair and Market to be held at the Agricultural Hall, London, from July 4th to the 15th. Their many varieties of interesting novelties, etc., will be located at Stand 282, in the Gallery.

T.A. CONFERENCE. — The Typographical Association was in session on Wednesday morning, last week, at Hastings, when amendments and alterations to the rules were dealt with. In the afternoon the delegates visited the historic town of Rye, and in the evening they were the guests at a dinner in the Conference Hall.

MR. TAKEJIRO MIWA and Mr. R. Itoh, of Tokio, influential representatives of Japanese printing firms working for the Government inspected the *Daily Telegraph* autotype plant on Thursday, last week. They were received by Mr. J. Hall Richardson, and had the advantage of expert explanations of the working of stereo metal supplied by Messrs. Fry.

THE Spring number of *Swain's Quarterly*, the house organ of Messrs. John Swain and Co., Ltd., contains some fine examples of the work capable of being executed from the process blocks made by this well-known firm.

The line and half-tone illustrations, combined with the use of good quality ink, together with the letterpress, afford an excellent example of the printers' art.

MR. W. H. FRANKHAM, a director of the Frome Newspaper Co., has died at Margate, where he went for a holiday.

THE death has taken place at Birkenhead of Mr. John R. Field, journalist, only son of Mr. Rowland Field, manager of the *Birkenhead Advertiser*.

MR. WILLIAM B. ALLAN, partner of the firm of Scott, Learmonth and Allan, proprietors of the *Stirling Journal*, died suddenly on the Stirling platform when on his way for a holiday.

AN exhibition of modern English printed books is being held at Christiania. The exhibits embrace specimens of work by the Kelmscott, Doves, Florence, Chiswick, Clarendon, Daniel and Cambridge University Presses.

GEO. W. WHEATLEY and Co., LTD., general shipping agents, etc., London, have issued a handy list of new telephone charges for subscribers connected with the exchanges within the Inner London zone. It can be hung up near the instrument.

AFTER an absence of ten minutes on Friday the jury found the four prisoners in what is known as *The Link* case guilty of conspiring to corrupt public morals. Mr. Justice Darling, passing sentence of two years' hard labour on each, regretted it was not possible to send them to penal servitude.

THE National Labour Press, Salford, have given notice of appeal against the conviction recorded by the Salford Stipendiary, who recently fined them £50 as printers and publishers of two leaflets entitled "A Call to Action" and "Clear for Action." Sureties have been fixed at £100 for the company and two additional ones of £50 each.

NEWSPAPER OFFICE BOMBED. — Early on Monday morning armed men surrounded the branch office of the *Belfast Telegraph* in Park-street, Dundalk, and, gaining an entrance by the back, sprinkled the office floors with petrol and then fired it. Two loud explosions were heard and it would appear that an incendiary bomb had been thrown through the fanlight of the front door and another through the window in the printing-room, the latter bomb doing considerable damage to the printing plant.

DUTCH PRICE EQUIVALENTS. — Printers and others having commercial relations will welcome the "Handboek voor het Berekenen van Internationale Commerciele Prijsnoteringen tusschen Nederland en Groot-Brittannië," published by Mr. Humphrey Milford, of the Oxford University Press, London. For assisting the translation of Dutch prices into English equivalents, and *vice versa*, the booklet gives numerous tables covering monies, measures and weights. The price (cloth boards) is 7s. 6d. net.

# Current Topics.

## Unemployment Rates.

PROPOSALS to reduce the amounts to be paid under the Unemployment Insurance Scheme and to increase the contributions come at a critical stage of the industrial situation. In the case of men it is proposed to lower the benefits from 20s. to 15s. and for women from 18s. to 12s. per week, while the higher contributions suggested are 7d. by the men, 8d. by the employers and a quarter by the State. The existing contributions are 4d. each by the men and by the employers and a quarter by the State. Evidently the Government regret their liberality in this matter and find their financial position critical. There is danger that the fund set up under the Unemployment Insurance Acts may soon be exhausted, and the Treasury may have to shoulder, temporarily, a maximum liability of £16,000,000. Nor has the worst been revealed, for the loss in revenue consequent upon the coal and other industrial disputes

has yet to be learned. Hence the anxiety of the authorities to prepare the way for a better balance-sheet. Another effect which the Government may have in mind is to bring pressure upon the strikers to return to work. Union funds are pretty well exhausted, so that the activities of the Labour party in political and industrial spheres are curtailed. But the immediate effect of altering the scale of unemployment benefit must be to render a strike still less agreeable to those participating in it. In normal times, such decisions as the Government have recently made would bring about their downfall. They have attacked a diversity of interests through the new Postal rates, the decontrol of agriculture, and now the Unemployment Insurance Amendment Bill. Only the most urgent need for economy could have driven them to such extremes, although Mr. Lloyd George has such a genius for guaging the predominant feeling of the country that perhaps there is some "method in his madness" after all.

## Trend of Prices.

CONDITIONS of trading have been and are so unusually complex that special emphasis is needed in pressing forward the need for caution. The trend of prices in the future is likely to be marked by considerable fluctuations. In all likelihood the first return of business will give firmness to the market, with a certain enhancement of prices. But there will at the same time be a general decline towards normality. So far as printers and wholesale stationers are concerned, they have done much to attain this end already. According to an authority in paper matters, a chief cause of the absence of buying on the part of the public is the insistence of the retailer on prices which are no longer justified. Mills and wholesale stationers have cut their losses, and it is thought that retailers ought to do the same. Otherwise, their action will continue to stifle business. Their prices will have to come down sooner or later in keeping with the quotations in the wholesale trade. Then may we expect bigger business. But until such prices are adjusted the reduced earning power in the country will continue to make itself felt in a slower movement of purchases. On the question of prices, it is interesting to note from a report on the condition of the printing trade that reference is made to a considerable reduction in the prices of all materials. Paper is evidently one of the items indicated, since it is added: "Many printers have made very heavy losses on the stocks they hold, as they

have had to sell paper, etc., at much lower prices than they gave for it."

### Printers Quiet.

QUIETUDE in the printing trade, due to a common cause, is another reason for the small demand for paper. According to the latest figures 72,295 persons are wholly or partially unemployed in the printing trade, which provides some indication of the lessened consumption of paper. Furthermore, there has been a serious mortality among newspapers of old standing or modifications as to publication which limit requirements for print paper. Altogether the volume of printing throughout the country is much reduced. On the top of the trading slump comes the attack from the Postmaster-General, whose increased postal rates are likely to add to the depression in printing circles and restrict the demand for paper and boards.

### News-Print.

PAPERMAKERS have been anxious to meet the situation as far as possible, and they have reduced prices even below the economic level. This is particularly so in the case of "news" makers. A consideration of the costs of materials will show that the prices now current mean a steady and heavy loss on every ton of paper made. It may well be, therefore, that in the near future—particularly with the reviving demand which will follow a cessation of the coal strike—a rise in price will be necessary. We understand that for contracts the price is as low as 2½d. per lb.

### The Postage Rates.

THE new postage rates, in spite of the general protests, have gone into operation, with the one exception intimated by Mr. Kellaway that the rate on foreign printed papers is withdrawn. It is calculated that the new charges would increase the revenue of the Post Office by £3,453,000, while the present deficiency was £3,436,000. Those interested in picture post cards, however, are not satisfied, and Sir Adolph Tuck informs us as we go to press that a meeting of the post card publishers was hurriedly called for Wednesday morning at Raphael House, at which a proposal was to be made to invite the whole retail trade of the country to combine in favour of 1d. postage on picture post cards under certain restrictions which would not interfere with the postal revenue.

AN Upper Silesian edition of the *Cologne Post* is to be published.

## Personal.

WE should like to join in the congratulations which have been extended this week to Mr. Geo. P. Reveirs (Geo. Reveirs, Ltd., London), on attaining his printing jubilee. Mr. Reveirs, which was born in 1859, was apprenticed to the late Samuel Taylor, the founder of the business. He succeeded his father as head of the firm in 1910.

THE successful and happy celebration dinner on Monday at the Connaught Rooms drew together a large number of Mr. Reveirs' friends, including Sir Gerald Chadwyck Healey, Bt.; Sir Herbert Matthews, Sir Julian W. Orde, Mr. George L. Reveirs (brother), Messrs. H. A. and A. G. Reveirs (sons), Mr. R. A. Austen-Leigh, Mr. Dargavel, Mr. A. E. Goodwin, Mr. W. H. Lock, and Mr. W. I. Burch.

MANY handsome presentations were made, among them a silver salver and tea and coffee service by his friends in the printing trade.

AT the last Court of the Worshipful Company of Stationers, Mr. Harry Cooke, the well-known printer of Leeds, and Mr. Stanley George Searby, paper merchant, of Queen-hithe, were made Liverymen of this historic company.

MR. CHAS. T. JACOBI was down to preside at a lecture on ancient manuscripts of the New Testament, by the Rev. F. P. Harton, at the Camberwell School of Arts and Crafts on Wednesday night.

AN interesting revelation of the ancestry of Mr. W. Whyte, secretary of the London Master Printers' Association, appears in the *Oban Times*, which mentions that the recently-appointed secretary is a son of the late Lieut.-Colonel Angus Whyte, who was well known throughout Lorn. He is a native of Easdale, a nephew of "Fionn" (the late Mr. Henry Whyte), and a grand-nephew of the late Mr. Duncan Whyte and the Rev. Charles Whyte, of Oban.

OWING to Mr. Henry Godfrey's world tour, Mr. J. Leonard Spicer has been elected joint chairman on the employers' side of the Interim Reconstruction Committee of the Envelope-Making and Manufacturing Stationery Industry.

MR. H. B. CASTELL (Castell Bros., wholesale stationers), is taking a much-needed rest on account of his health.

MR. GEORGE H. WILKINSON, JUN., and Mr. Harold D. Wilkinson have been admitted to the Livery of the Stationers' Company, being introduced by their father, Mr. G. H. Wilkinson.

### DIVIDENDS AND REPORTS.

**HAZELL, WATSON AND VINEY.**—Net profit of Hazell, Watson and Viney for year ended 31st March, 1921, after providing for all expenses and taxes, was £40,813, plus £10,616 brought in, making £51,429. Directors propose dividend at the rate of 12s. per share on ordinary shares.

**GEORGE NEWNES, LTD.**—Profit of George Newnes for nine months ended March 31st, 1921, after providing for all necessary reserves and directors' fees, was £50,012, plus amount brought forward, £34,281, making £84,293. Directors recommend final dividend on ordinary shares at rate of 15 per cent. per annum, including interim of 5 per cent. already paid, transfer to employees' sick and pension fund £2,000, to staff bonus £3,250, carrying forward £37,793. In order to meet requirements of working arrangement between Newnes and Pearsons, accounts of two companies will in future be closed simultaneously on March 31st. Profits may be considered satisfactory in view of onerous conditions which prevailed, due to high price of paper and further increases in wages and other charges. New printing works at Exmoor-street, Notting Hill, owned by Newnes and Pearson Printing Co., are approaching completion.

### NEW COMPANIES.

**NATIONAL ACADEMY OF ADVERTISING, LTD.**—Capital £1,000 in £1 shares; to take over the business of teachers of advertising, carried on as the "The National Academy of Advertising." Private company. First directors: C. L. Neil, P. V. Morris and F. Le Conteur Utterton. Registered office: 43, Leicester-square, W.C.

**WELBECK PUBLISHING Co, LTD.**—Capital £1,000 in £1 shares; print and picture sellers, fine art publishers, dealers in prints, pictures and art productions, stationers, printers, etc. Private company. Subscribers: J. H. Samuel and W. A. Ford. Registered office: 33, Baker-street, Portman-square, W.

**NORMAN AND HILL, LTD.**—Capital £1,000 in £1 shares; agents in specialties connected with stationery and office equipment, etc. Private company. First directors: W. Rounce and P. Hill. Registered office: 50, Sun-street, Finsbury, E.C.

**A. M. HEATH AND Co., LTD.**—Capital £5,000 in £1 shares; to take over the business of literary agents carried on by A. Heath and Alice M. Spinks, at 7, Golden House, Great Pulteney-street, W., as "A. M. Heath and Co." Private company. Subscribers: A. Heath and L. T. Smith.

**DUVEN BROTHERS, LTD.**—Capital £100,000 in £1 shares; dealers in and holders of exhibitions of pictures, drawings, engravings, prints, books, etc. Private company. Subscribers: A. E. Bowles and W. H. Smith. First directors to be appointed by the subscribers. Registered office: 4, Grafton-street, W.1.

**BUYERS AND SELLERS, LTD.**—Capital £500 in £1 shares; import and export merchants and general dealers, stationers, printers, publishers, advertising and commission agents, etc. Private company. Subscribers: R. Rickard and B. M. Rickard.

**INTERNATIONAL OFFICE SERVICE, LTD.**—Capital £75,000 in £1 shares; to adopt an agreement with G. A. Parker, and to carry on the business of commercial service agents, system specialists, financial, property, advertising and estate experts, auctioneers, brokers, dealers in stocks and shares, printers, publishers, builders, dealers in paper, etc. Private company. First directors: G. P. Wadsworth, T. H. Bull, C. B. Toms, S. J. Toms and

G. A. Parker. Registered office: Faxfield House, 28, Watling-street, E.C.

### COMPANY MORTGAGES AND CHARGES.

Fresh Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 1908, and Satisfaction registered pursuant to Section 97 of the same Act. (The registration of Satisfaction is not compulsory).

**JOHN ROBERTS PRESS, LTD.**—Particulars of £1,000 debentures authorised May 27th, 1921; present issue £600; charged on the company's undertaking and property, including uncalled capital.

**ISON BROTHERS, LTD.** (cardboard and paper box manufacturers, Bristol).—Satisfaction in full on April 17th, 1921, of two mortgages dated January 22nd, 1920, securing sums owing on bank account.

**ANCHOR PRESS, LTD.**—Mortgage and floating charge on lands and premises at Tiptree, Essex, and the company's undertaking and property, present and future, including uncalled capital, dated May 22nd, 1921, to secure £10,000. Holders: Eagle, Star and British Dominions Insurance Co., Ltd.

**R. D. EASTES AND CO., LTD.** (newspaper proprietors, etc.).—Issue on June 2nd, 1921, of £750 debentures, part of a series. Satisfaction in full on May 21st, 1921, of debenture dated April 28th, 1909, securing £3,000, also notified.

**ISON BROTHERS, LTD.** (cardboard or paper box manufacturers, etc., Bedminster, Bristol).—Mortgage on 64 and 66, York-road, Bedminster, Bristol, dated May 21st, 1921, to secure all moneys due or to become due from company to National Provincial and Union Bank of England.

**B. M. BAKER (LONDON), LTD.** (advertising contractors, etc.).—Debenture dated May 18th, 1911, to secure £750, charged on the company's undertaking and property, present and future, including uncalled capital (if any). Holders: Page and Thomas, Ltd., 131, Finsbury-pavement, E.C., and Chesham, Bucks.

## Gazette.

### A WORD OF CAUTION.

In giving the official Gazette information, it must be distinctly understood that we take official records as we find them, and accept no responsibility for inaccuracies, while, as an almost invariable rule, the facts will be found correct. We advise our readers, before forming hasty judgment, to consider that there may be in each case satisfactory explanation which does not appear on the records.—Ed.]

## Overseas Trade Credits.

Under the Overseas Trade (Credits and Insurance) Act, 1920, the Board of Trade were authorised by Parliament to make arrangements for granting, in connection with export trade, credits up to an amount not exceeding at any one time the sum of £26,000,000. Without increasing this maximum liability, the amending bill now before Parliament proposes to make that sum also available for guaranteeing drafts drawn against shipments of goods to all parts of the British Empire, including Protectorates and mandated territories, as well as to the countries already included in the schedule to the Act. It is proposed that in respect to the giving of guarantees the Board shall be able to exercise their powers in the case of a new guarantee at any time before September 8th, 1922, and in the case of the renewal of a guarantee previously given at any time before September 8th, 1924. It is further proposed that no guarantee shall be in force after September 8th, 1925.

An examination will be held in Costing at Stationers' Hall on Wednesday, June 29th, at 6 p.m.

### Freemasonry.

#### Mr. F. L. Cayzer Installed as W.M. of the Royal Thames Lodge.

A Past Master of the Papyrus Lodge, whose brethren are mainly associated with the paper trade, Mr. F. L. Cayzer, of Messrs. James Spicer and Sons, Ltd., was installed Worshipful Master of the Royal Thames Lodge (No. 2,966), at the Freemasons' Hall, Great Queen-street, W.C. (by dispensation), on Thursday, the 2nd inst. There is a strong affinity between the two lodges mentioned, due to the dual membership of paper trade representatives.

Mr. Cayzer, who is a zealous Freemason, enters his year of office with the most stimu-

Photo, Miles and Kaye, Cheapside, E.C.

MR. F. L. CAYZER,

Worshipful Master of the Royal Thames Lodge.

lating influences. At the business meeting of the Lodge, and also at the dinner in the evening, he had the honour of the presence of Rear-Admiral Sir Edward Inglefield, Provincial G.M. (Buckinghamshire), and Mr. Percy Mallory, P.A.G.D.C., Mr. J. L. Goldstein, P.A.G.D.C., Mr. Louis E. Harfeld, P.A.G.D.C., Colonel Carpenter, P.G.S.W., Mr. Frank Callingham, P.G.D., etc., etc.

At the Lodge meeting an interesting event was the initiation of Mr. Arthur Conrad Reed, of the firm of Messrs. Reed and Smith, Ltd., who is well known in the London paper trade. His proposer and seconder were Messrs. W. Rowlandson and F. L. Cayzer respectively.

The ceremony was performed by the outgoing W.M. (Mr. A. Havelock Case), the charge being impressively delivered by the Master-Elect, which elicited the approbation and praise of the Provincial Grand Master.

The installation of Mr. Cayzer as Worshipful Master was then conducted by the outgoing Master in a most impressive manner. On assuming the chair the W.M. invested the following officers:—W. Rowlandson, S.W.; F. W. Spellacy, J.W.; L. E. Harfeld, D.C.; W. Bazell, S.D.; R. J. Triggs, J.D.; R. S. Faulks, I.G.; Col. J. Austin Carpenter, P.G.S.B., Treasurer; M. J. Faulks, Secretary; G. E. Oswick and S. M. Lane, Stewards; and W. Bro. S. G. Gallop, Tyler.

At the dinner in the evening there was a large attendance, including many visitors. The proceedings were marked with the greatest enthusiasm, thus demonstrating Mr. Cayzer's popularity among the craft. The usual Masonic toasts were submitted in appropriate terms.

#### The Bookbinder and the Time Docket.

SIR.—The article appearing in the issue of the *British and Colonial Printer and Stationer* for June 8th, under "Notes and News for the Bookbinder," calls for some comment, as I do not think your contributor has quite grasped the basic cause of the opposition to the time docket on the part of the worker concerned.

It is not ignorance as to the needs of the cost finding system at present in vogue that brings forth the binders' opposition to the time docket, but rather the inability of the employers themselves to clearly define how the time docket can assist to more accurate cost finding.

Let us consider the difficulty for a moment. The compositor gets copy to compose. Very well, in any up-to-date printery, forms and type are plentiful, and the work can be undertaken and completed straight through. The same with the stereotyper, the machineman and the warehouseman. Here no difficulty exists for the recording of accurate time taken on a job.

But what is the case of the binder? Miscellaneous parcels of books for binding are handed to him, containing possibly books of every size and thickness known to the trade. Here lies the binders' difficulty. If he is a man worth his salt, and honest to his employers, what would he do? Certainly not complete each parcel separately for the purpose of recording the time taken on each order. No, he would lump the different orders together, sort them into separate sizes, prepare boards, make endpapers, cut and make up and prepare materials for numbers, instead of repeating the process for individual books,

thus effecting a considerable saving of time that would go to the employers' advantage.

Again, it is absolutely impossible for a man to bind a book right through without delay. Various processes necessary to the binding ensures that the work must be left to allow for drying before the next stage can be proceeded with. The waiting period is always filled up by preparing for the next job, or in making endpapers for stock, cutting and paring of leather corners, etc. This makes for economy of time, but obviously prevents the binder from being able to definitely state the actual time for each job.

If approximate time is to be given, where, then, is its value for scientific cost-finding purposes? Again, it is not unusual for books to remain in the workshop for weeks from one cause or another, during which time the books may be handled a dozen times in various processes. Under the circumstances, it is impossible to accurately state what the job is costing per hour, or how many hours it takes to complete.

It is also a well-known fact (and this is admitted by employers themselves) that through climatic conditions, variation in material and other circumstances, the time taken at different periods for the same work is affected. Our experience has proved that with unscrupulous employers and foremen this has been used unfairly against many of our members, and it is for this reason that the binder is suspicious of time recording.

Personally, I have no fear of the time docket. Experience gained in the many conferences that I have participated in with the employers on this question has convinced me of their honesty of purpose in this matter. Unscrupulous individuals exist on both sides, but I am convinced that if a greater feeling of confidence and trust, with a fuller understanding of the difficulties of the other side, could be engendered in the trade, nothing but the best possible results would accrue to us all.

The method adopted by my Executive Council is an educational one, and one that I think will bring about the desired result in the best possible way.

Wherever difficulties have arisen in any town in reference to the adoption of the time docket, meetings of the branch have been called and addressed by representatives of both the employers and my Executive. Leicester, Sheffield, Oxford, Liverpool and other centres have agreed to its adoption in consequence, and only Manchester and Letchworth of the towns visited have returned a negative vote.

If both sides are wise enough to continue their efforts along these lines, I feel assured that the time docket will come without friction, and work not only smoothly but well.

Yours, etc.,

GEO. HARRAWAY,

Chairman of the late National Union of Bookbinders and Machine Rulers and

President of the National Union of Printing, Bookbinding, Machine Ruling and Paper Workers.

44, Blackfriars-road, June 14th.

## Modern Composition.

Mr. Bernard Shaw's little discourse "On Modern Composition" (H. J. B. Craven) is concerned with the possibilities of art in printing. He indicates that there is a great deal of "taste" in this connection, and most of it is bad, neglecting the production of an even "block of colour," and running to a prodigal use of leads and spacings. "For instance, Mr. Ruskin's books, as printed under his own supervision, are instructive examples of everything a book should not be." William Morris, it is pointed out, made it an invariable rule to set his type solid. The author's typographically needless corrections upon proofs spoil the print-picture with which the compositor may have taken trouble, and such discouragement undermines his conscientiousness: hence "a good artist-compositor should never be allowed to put in type the original work of a living author."

Mr. Shaw has a word or two on margins and rules. "The mediæval manuscript, or early printed book, with its very narrow margin at the top and very broad margin at the bottom of the page, with its outer margins broad and its inner ones contracted, so that when the book lies open the two pages seem to make but a single block of letterpress in a single frame, instead of two side by side, has never been improved upon, and probably never will be." And "there is not in existence a page with a rule on it that cannot be instantly and obviously improved by taking the rule out." For a dainty exemplification of these various principles it is not necessary to travel beyond the brochure which contains them.

## New Inventions.

### Sheet Delivery Apparatus.

In apparatus for delivering tickets or sheets as they pass from the cutting rollers of a rotary printing machine, of the kind in which an oscillating tapping device depresses each sheet, as it leaves the cutting rollers, on to a pile table, the tapping device comprises an

FIG. 1.

FIG. 2.

arm which receives in addition to a vertical movement, a horizontal movement to move it laterally clear of the sheets during its in-operative up-stroke. As shown, the arm *i* carrying the tapper *h* is pivoted to a crank-disc *m* driven by gearing from the shaft *b'* of the upper cutting roller *b*. The arm *i* passes through a sleeve swivelled in a bracket *k* adjustably secured to a bracket *l* to vary the length of stroke of the arm. The crank disc

*m* is adjustable relatively to its gear *n*<sup>1</sup> by screws *m*<sup>1</sup> and slots *m*<sup>2</sup> to time the action of the tapper relatively to the delivery of the sheets. The delivery of the sheets from the cutting rollers *b, c* is assisted by a driven roller *f*. The invention is patented by Mr. H. D. Black.

### Embossing Paper, etc.

An invention patented by Mr. S. A. Orton relates to a machine for embossing plain or printed paper, leatherboards, etc., to produce stippled or grained effects is constructed so that it can be attached to a bench, and consists of a base *a* to which are secured standards *b*, in which are mounted a paper bowl *f*, and an engraved steel roller *e* driven from the shaft of the bowl *f*, and mounted in adjustable

slides *g* controlled by screws *j* to vary the pressure of the upper roller. The base *a* is fitted with holes for receiving bolts for securing the device to a bench. The bowl *f* is driven by spur-wheels *k, m* on a shaft *p* driven by a belt which may engage a fast or loose pulley on shaft *p*. The sheets are fed to the embossing rollers by the aid of a feed board *r* fitted with adjustable side guides *s*.

### Rotary Printing Machinery.

In a rotary printing machine for printing, paper, etc., to be used as labels, wrappers, etc. two webs of paper, etc., are drawn from two rolls *a, b*, and are brought together by tension rollers *c* so that they are caused to travel

together towards the rollers *d*, where they are again separated, the upper web passing over guide rollers *f*, *f'*, through the printing-couple *g*, and the lower web direct through another printing-couple *e* and thence over guide rollers

*h* to a roller *i*, where both webs are brought together again. The superimposed webs are then slit into strips of label, etc., widths by rotary slitters *j*, and pass between separating strips *p* to two winding-up reels *k*, *l*, which are mounted on pivoted arms *o* and rest upon, and are driven frictionally by, driving rollers *m*, *n*. The patentee is Mr. T. H. Hollbrook.

### Printing Tag Labels.

Mr. W. S. Fitch has patented an invention whereby a web of paper, particularly for making tag labels, is printed on both sides in a machine having two platens in horizontal alignment, by conducting the web *d* from a

roll *e* round guide rolls or the like *f*, *g* over one platen *c* and thence downwards round guide rolls, etc., *h*, *i*, *j*, *k* and over a second platen *c'* from the end adjacent to the first platen *c*. The printing-heads *b* are arranged over the platens.

### Feeding Webs of Paper.

Mr. G. W. Mascord has patented an invention in which the reel-supporting arm of the web-feeding apparatus described in the patent Specification are extended to support two reels, and the reversible driving bands are mounted on the arms between the pairs of reels. As shown, the arms *d* extending from the frame *c* mounted on the rotatable base plate *a* support pairs of rolls *e* which are driven for feeding by bands *j*, the driving spindles *f* of which are driven by shaft and

bevel gearing *l*, *n*, *m*, *o*, *p*, *q* from a vertical shaft *s* passing through the axis of rotation of the table *a* and itself driven by a horizontal driving shaft *t*. The bands *j* are held in engagement with the roll by weighted arms on

the spindles *f* as described in the patent Specification. Specification 13425/02 is referred to.

## British Empire Kraft Papers.

We have received from the Hodge-Sherriff Paper Co., sole European agents for Wayagamack kraft papers, specimens of new grades being produced at the fine plant at Three Rivers, Quebec. These include light weight papers made down to double crown 7lbs., and the finish and strength of these papers will certainly compare favourably with anything we have inspected of a similar nature. Hodge-Sherriff Paper Co. also informs us that the Wayagamack plant are now producing coloured kraft papers, and have a range including shades in grey, green, blue, orange and maroon. We feel sure that the progressive policy adopted by this mill will be appreciated by British importers. It is a matter of congratulation that these qualities are now for the first time produced within the British Empire.

## Notes and Comments.

### **Australian Business Outlook Brighter.**

PROSPECTS of doing business with Australia are improving. The financial stringency is easier and a more buoyant feeling prevails. Of course, it will take time before business gets moving properly again; but there is certainly already a healthier outlook, and buying capacity is enlarging. True, in certain lines stocks are heavy, but directly business activity begins these will quickly disappear and orders will be placed with more freedom. Thus the general tone in business circles is one of quiet confidence.

### **Commonwealth's Industrial Development.**

FORECASTS are made of great commercial and industrial developments in Australia during the next few years, and these ought to be attended by extended uses of print and paper. It is the new Australian tariff which is proving a powerful lever in inducing British manufacturers to take part in the industrial advancement of the Commonwealth. There is a strong leaning among our Cousins towards British goods, and this should help British printing machine engineers to obtain a substantial share of the trade expansion. Of course, considerations and price are bound to weigh with our Colonial friends, who have as keen a business sense as any race of people. As far as costs of production will allow British supply houses are quite fair-dealing, and they can be relied upon to fulfil their part of a bargain. Nevertheless, competition from

Japan and the United States has to be reckoned with, so that firms in this country will need to be very alert in their dealings with Australian buyers.

### **Australia Needs Printing Plant.**

PRINTING matters occupy an important place in the commerce of the Commonwealth, and the question of instructing apprentices is being pressed forward. Lack of proper appliances, however, is retarding the efforts of those who are anxious to train the rising generation. In Queensland, where the printers are very alert, masters and union representatives in the craft together with the Central Technical College Printing Trades' Advisory Committee, have been pressing upon the Government the need for modern plant with which to instruct apprentices, and other employees in the industry. Financial assistance was sought to this end. It was pointed out by a deputation which waited upon the Acting Treasurer (Mr. Gillies) that at present the college is using a small press which only cost £65—a machine which is entirely inadequate. A member of the deputation (Mr. M'Cosker) mentioned that a suitable Dawson double royal cylinder press could be secured in Brisbane for £1,100. Until such a machine as this was bought little progress could be made in teaching lads their trade. Mr. Gillies, in reply, stated that the remarks of the deputationists had made a deep impression on him, and he would bring the question before

the Cabinet. They were doubtless all aware of the present financial stress and of the consequent necessity for exercising care in expenditure. He would, however, place the request in a favourable light before his colleagues and advise the committee as soon as possible as to the decision of the Government.

### A Linotype Point.

AN interesting reference to what is described as the excessive cost of Linotype parts was made at a recent meeting of the Country Press Association in Australia. The matter is causing some anxiety to lino-users. It was resolved that a letter be written to the company in America which supplies these goods, and if the reply was not satisfactory, to take what further action may be regarded as necessary.

### South Africa as Market.

BRITISH printers and dealers in supplies for the printing and allied trades should not overlook the big possibilities which South Africa holds as a market both for the materials and for the finished products of the industry. At a recent executive meeting of the Transvaal Master Printers it was stated that the value of stationery, bookbinding and printing imported into South Africa during 1919 was greater than that produced in the country. The growing importance of the printing industry in this part of the world means that there is an increasing demand for supplies of all kinds, and for some of these the British manufacturer should stand a good chance of business, while there are some classes of finished products—school books, for instance, form a very important item—which will certainly continue to be imported in large numbers.

### Germany and South African Trade.

ONE hears from South Africa, as from the United States and other parts, that the German printer and blockmaker are very much to the fore, seeking to be ahead of the Britisher in picking up the post-war threads of overseas trade. Thus a month or two ago a Johannesburg printing firm received from Leipzig a very attractive set of samples and particulars of prices for colour-lithography, together with an inquiry for an agent to push in South Africa the sale of advertising matter in very wide variety, paper bags, boxes, labels, picture postcards, etc. This particular offer was indignantly rejected, and there is plenty of evidence that the British dealer will find in

South Africa that he is very favourably regarded, provided he can supply exactly what is required and at practicable prices. But German pushfulness and enterprise show that the British manufacturer, if he wishes to recapture or extend his overseas trade, will have to put his best foot forward and by careful study of local requirements and by allowing every possible adjustment of terms of business make the best bid he can for the trade expansion which is so desirable.

### Possibilities in Ceylon.

THE printing craft is a growing feature of Ceylon's commerce. The trade of the island in printed material in general may be estimated at about Rs. 500,000 per annum. A newly introduced feature into the local English Press generally is a weekly page of book reviews side by side with book advertisements of leading local and Indian booksellers. Local newspaper establishments have taken up the production of useful planting hand-books, directories, guide-books, and matter relating to interesting antiquarian lore and other phases of special interest to Ceylon and Indian readers. A great deal of foreign news of general interest, neglected a year or two ago, is now appearing in the local Press. Journalism, conducted under broad-minded and healthy principles, is flourishing. With the steady expansion of education the demand for technical journals, books and magazines in general is increasing rapidly, says a writer in *The Times* (Trade Supplement). The Ceylonese are taking to reading eagerly. It would be no surprise at all if last year's consumption of books, etc., is doubled. Some excellently written and profusely illustrated Boy Scout story books priced at a rupee a copy have been put on the market, and these are said to be read with avidity by the large number of Scouts of the different colleges and schools of the island.

### Printing Activity in Japan.

JAPAN, while her stationery and boards come into competition with British goods in our own colonies, at the same time offers a market for goods exported from the United Kingdom. A distinctively British line of import is bookbinders' cloth, of which about one and a half million yards are imported annually into Japan. Japan's consumption of paper is considerable, and her progress in newspaper lines ought to furnish opportunities to printing engineers and supply firms for doing business.

# Educating the Printer.

## A Survey of World Effort.

At the recent World's Printing Trades' Congress Mr. J. R. Riddell dealt with the subject of "Technical Education in All Lands," a matter on which he is exceptionally keen.

### GERMANY.

He observed in the course of his address, that whether we like it or not, we have to look to our late enemies, the Germans, for guidance in technical education. Before the War they were in the acknowledged position of turning out a large number of highly proficient craftsmen, and it is safe to state that wherever science touched manufacture, there they were beating the whole world. No doubt much of the credit was due to their excellent method of training the young craftsmen in their works. A firm could not take an apprentice unless the one responsible for the training of the lads held a proficiency certificate testifying to the ability of that person to be able to teach the apprentice his business. This was supplemented by a comprehensive technical education under State direction, which not only assisted to make the apprentice a better craftsman, but encouraged him to become a good citizen. The palatial buildings throughout the Germanic Empire stand as monuments to the keenness of the German States to ensure that their people ranked high in technical efficiency. Those who have visited any of these educational institutes will readily acknowledge the thoroughness with which the work is carried on.

### FRANCE.

In France we do not find technical education for the printer very far advanced. The main institute in France, the Ecole Estienne, is in Paris, where students are taken for a whole-time course of instruction in the processes connected with book production. The course extends for about four years. Evening classes are also held for those connected with the trade, but it does not seem that a great deal of interest is taken in these supplementary classes, nor, I understand, do they receive any financial support from the trade organisations. There are two other schools in Paris, which are conducted by employers' associations.

### UNITED STATES.

When we come to consider technical education in America we find quite a different position. During the last few years this progressive people have forged ahead with technical education. The United Typothetæ of America control and run a large school at Indianapolis; and the Pressmen's Union claim to have the largest technical school in the

States, at Rogerville, Tennessee, equipped with the latest machines, having for its object the keeping of the members of that union up-to-date in the handling and working of the latest mechanical developments in the printing industry. There are other craft schools constituted for specific purposes, some of which take students for a whole-time training for the purpose of fitting them to hold executive positions, such as the Carnegie Institute of Technology at Pittsburg, where a degree is awarded, called "Bachelor of Graphic Arts," and which admits to Harvard University, where there is a graduate school of Business Administration, the object being to prepare men for positions of high responsibility and leadership in the business world. We find in the States customs peculiar to that country, and which I do not think are found elsewhere in the world: the teaching of printing in public schools as a vocational subject, and the shop school, such as the excellent and successful one at the Lakeside Press, Chicago, where they take boys from the schools and give them a pre-apprenticeship training for two years with the object of getting into the craft only those who give promise of becoming efficient workmen. There is also a form of technical instruction by post, a method of education which America has developed.

### GREATER BRITAIN.

In Greater Britain, particularly in the United Kingdom, we find schools scattered throughout the country, each of them more or less working along individual lines. Some of them, it is said, have little or no appreciation of the needs of the great industry which they represent, at the same time the students are recruited from those engaged in the printing industry. Still, consistent efforts are being made to provide a technical training which it is hoped will leave its mark on the printing industry, not only through the young craftsmen, but also by the training of the future master printer in the various departments of the industry and in the specialised subjects, including costing, accountancy, office administration, economics, factory Acts and understanding of legal terms as applied to printing.

Dealing with the question of technical education in a general way, Mr. Riddell offered some of his telling criticisms, and submitted that it is the duty of every master printers' association and every trade union in their respective localities to see that facilities are provided for a suitable technical training of those engaged in the printing and kindred trades, for the exigencies of a present-day business do not allow for the proper training

of an apprentice. He believes the question of the training and education of those in the printing industry should be dealt with nationally. The day is not far distant, he asserts, when there must be a closer link between the technical schools and the trade associations, who must of necessity take a larger voice in determining the work undertaken there, and it is up to them to see that the instruction given is such that it will help to make a student more efficient in the workshop, and it must be their responsibility to see that the syllabus, which is arranged is not what may be called "shop-window dressing," but a course of instruction which will encourage the initiative and individuality of the young craftsman, so that English-speaking printers are placed in a position where they do not fear competition either in quality or quantity from printer craftsmen in any part of the world.

FOLLOWING upon the reception of the deputation representing the Empire Press Union, the Newspaper Proprietors' Association and the Newspaper Society, which last week urged on Mr. Churchill the need of a better system of news and communication within the Empire, there has been formed a small committee to meet Mr. Churchill, and perhaps the Secretary of State for India and the Postmaster-General, the committee to consist of Sir Roderick Jones, Lord Riddell, Mr. Robert Donald, and Lord Burnham.

## BOOKBINDERS' SUPPLIES.

- BRITISH LOOSE-LEAF MANUFACTURERS, LTD., 27, Finsbury-street, London, E.C. Loose-leaf metal parts and accessories.
- JAMES BRANDWOOD AND CO., 21, Saville-street, Manchester. Marbling inks.
- THOMAS BROWN, 7, Albion-street, Manchester. English gold leaf, brown and white blocking powder.
- D. AND E. CROSS, 51, Lamb's Conduit-street, London, W.C.1. Gold blocking, book finishing and case making.
- FISHER BOOKBINDING CO. (1912), LTD., St. Ann's Works, Herne-hill, London, S.E.24. Binders to the printing trade.
- GARWOOD AND MUDDIMAN, LTD., 77, Queen Victoria-street, London, E.C. Leather and leatherette, grains.
- IBBOTSONS, LTD., 64, Goswell-road, London, E.C.1. Telegrams: "Ibby Barb, London." Leather papers, transfer blocking papers.
- WILLIAM GREENWOOD AND SON, Carlton Works, Halifax. Case making, gold blocking.
- NICKERSON BROS., 99 and 101, Worship-street, London, E.C. Tanners and manufacturers of moroccos, roans, etc.
- QUIBELL BROTHERS, LTD, Newark. "Atlas" Scotch glue.
- T. WILLIAMSON AND CO., 6, 8 and 8a, Palace-square, and 7, Pool-street, Manchester, and 30-31, St. Swithin's-lane, London, E.C. Cloths, label cloths, photograph cloths.
- WINTERBOTTOM BOOK CLOTH CO., 60, Wilson-street, London, E.C. Manufacturers of bookbinders' cloth, label cloth, morocco cloth, buckram, etc.

## COMPOSING AND TYPESETTING MACHINES.

- LANSTON MONOTYPE CORPORATION, LTD., 43 and 43a, Fetter-lane, London, E.C.
- LINOTYPE AND MACHINERY LIMITED, 188, Fleet-street, London, E.C.4.

## ENGRAVERS, DIE SINKERS, Etc.

- BADDELEY BROTHERS, Moor-lane, E.C. Dies, embossing, perforating presses, relief stamping.
- BURLINGTON ENGRAVING CO., LTD., 322-326, Goswell-road, E.C.1. Process blocks, in colour, half-tone or line.

## ENGRAVERS, DIE SINKERS, Etc.

- B. DELLAGANA AND CO., LTD, 11, Shoe-lane, Fleet-street, London, E.C.4. Dellanick and steeltto nickel steel printing surface, block makers, etc.
- DIRECT PHOTO-ENGRAVING CO., LTD., 38, Farringdon-street, London, E.C. Photo etchers, artists, designers.
- G. H. MADDIN AND CO., LTD, 10 and 11, Middle-street, Aldersgate street, London, E.C. Engravers, die-sinkers, cameo printing, embossing blocks.
- MARSHALL ENGRAVING CO., LTD., 12-14, Farringdon-avenue, London, E.C. Embossing and process engravers, artists and photographers.
- W. MILES AND CO., 44, Houndsgate, Notting-ham. Type-casting machines, engravers and cutters of oriental matrices.
- NICKELOID ELECTROTYPE CO., LTD., New-street-hill, London, E.C.4. Electrotyping and stereotyping.
- JOHN SWAIN AND SON, LTD., 89-90, Shoe-lane, London, E.C. Photo engravers, designers and electrotypers.
- VITTY AND SEABORNE, 3, Crane-court, Fleet-street, London, E.C. Reproductions by the Vitseatone Process.

## ENVELOPE MACHINE MANUFACTURERS.

- DAVID CARLAW AND SONS, LTD., 31, Finnieston-street, Glasgow. "Leader" envelope folding and gumming machine.

## PAPER AND BOARDS.

- RALPH DENNIS, Dept. B/33, 4 and 5, Pilgrim-street, London, E.C.4. Paper merchant.
- HENRY FEATHERSTONE, 13, Whitefriars-street, Fleet-street, London, E.C.4; Cables, "Fettnapmill, Fleet, London." Paper agent and merchant.
- D. VAN HUIDEN, Winsshoten, Holland. Straw-boards.
- LENDRUM, LTD., 3, Temple-avenue, London, E.C. Wholesale stationers and mill agents. Importers and exporters of reel and flat news.
- W. LUNNON AND CO., 59, Carter-lane, London. Paper merchants. Supply Lunco paper in colours and white.
- J. AND J. MAKIN, 20, Mount-street, Manchester. Papermakers.

### PAPER AND BOARDS.

JOHN H. SMYTHE, 2 and 4, Tudor-street, London, E.C.4. Paper contractor, engine and tub sized writings.

THAMES PAPER CO., LTD., Purfleet, Essex. Paper boards for home and export.

HARRY B. WOOD, 201-5, Produce Exchange, Manchester. Boards, dextrine, leather, wood pulp and straw.

### PAPER AND PRINTING TRADE PUBLICATIONS.

STONHILL AND GILLIS, 58, Shoe-lane, London. Publishers of the *British and Colonial Printer and Stationer* and the *World's Paper Trade Review*.

The up-to-date Colonial printer is naturally anxious to have information as to the latest improvements in machinery, new processes, and all labour and time-saving devices. He is also very desirous of having a knowledge of paper prices and trade movements generally. There is a fund of information in the weekly issues of the *British and Colonial Printer and Stationer*, which appeals to printers, stationers, box makers, envelope makers, bookbinders, etc. Why not have the journal regularly delivered to your office or works? It is a good investment at a low price—13s. for one year (subscription 8s. 8d., plus 4s. 4d. postage). Send the publishers a remittance at once.

In the Colonies quite a number of movements are on foot to build pulp and paper mills. Who are the makers of special machinery? What is the selling price of wood pulp and other papermaking materials? What are the conditions of the world's pulp and paper markets? All this information, and much more, will be found in the *World's Paper Trade Review*. Interviews with leading men associated with the industry are published, latest inventions described and illustrated, new processes dealt with; in fact, its pages teem with practical information and commercial intelligence relating to paper, pulp, paper stock, engineering and the allied trades. Order the *Review*, which is published weekly, for a year, and send a remittance of 32s. 6d. to cover cost (subscription 26s., plus postage 6s. 6d.).

### PLANT AND MACHINERY.

BENTLEY AND JACKSON, LTD., Lodge Bank Works, Bury, Lancs. Papermakers' engineers.

ROBERT BROWN AND CO., 119, Oakley-street, London, S.E.1. Printers', stationers' and general engineers.

BUMSTED AND CHANDLER, Cannock Chase Foundry, Hednesford, Staffs. Paper bag making machinery.

### PLANT AND MACHINERY.

EDMUND BUSH AND SON, LTD., Crofton Point-road, Leeds. Hot-air drying apparatus for drying varnished and gummed sheets.

CANADIAN-AMERICAN MACHINERY CO., LTD., Camco House, 63, Farringdon-street, London, E.C.4. British folders with automatic register, Oswego brown and Carver cutters.

## Printing Trade Wages.

### Decision of the Printing and Kindred Trades' Federation.

Representatives of all the unions in the Printing and Kindred Trades' Federation met in conference with the executive of the Federation in London, last Thursday, to discuss the position arising out of the application of the employers for a national reduction in wages of 15s. in respect of men, and 5s. 6d. for women. The proposed reduction applies to all the unions in the Federation, including the Typographical Association, and embraces the entire country, including London and Scotland.

At the close the following official statement was made to a press representative by Mr. A. E. Holmes, secretary of the Printing and Kindred Trades' Federation:—

"A conference of representatives of the Executives of the Unions affiliated to the Printing and Kindred Trades' Federation was held at the Memorial Hall to-day to consider the attitude to be taken towards the demands made by the employers for a reduction in wages of 15s. per week for men, and 5s. 6d. for women and girls.

"The conference discussed in detail the proposals of the employers, and opinions were strongly expressed against any reduction of wages at the present moment, on the ground that the time was quite inopportune. Although, apparently, the cost of living has been reduced, such matters as railway fares and house rents are on the leap, and, it was felt, more than counterbalance the proposed reduced wages.

"The conference was quite in favour of again meeting the employers, but a desire was expressed to make a unified movement. It will be remembered that on previous wages questions this has not been secured, but the importance of the proposals is considered to be even greater now than when wages were being increased, and it is hoped that this will influence the unions to decide to act in unison.

"In some instances it will be necessary to take ballots of the unions to enable an expression of opinion to be secured on this matter, but it is understood that no time will be lost and that at the earliest opportunity a conference with the employers will be arranged."

Nothing further has transpired during the week, but it is hoped that negotiations may be taken up between the parties concerned.

## Paper for Tunis.

The prohibition on the importation into Tunis of paper on reels and cellulose pulp for the manufacture of newsprint paper is abolished by a Beylical Decree of March 29th and published on April 13th.

## Printers and Paper Costs.

At a meeting of the L.M.P.A. Council last week, the following resolution was unanimously adopted:—"That this Council views with alarm the possibility of a customs duty, under the Safeguarding of Industries Bill, being placed on paper. If such protection be afforded to paper manufacturers in this country, it will considerably increase the cost of paper, and seriously damage the principal paper-using trades which employ a far larger number of persons than the papermaking trade. Paper is also used in every industry, and any increase in its cost would increase the cost of production, and render it more difficult to retain our export trade."

To give effect to this resolution, members of the Association are asked to sign a form of protest and forward it immediately to their members of Parliament.

## Power of Printing.

Lord Askwith, speaking at a Livery luncheon held last week at Stationers' Hall, and over which Mr. R. A. Austen-Leigh presided, said that since the confusion of the days of the Tower of Babel many attempts had been made to straighten things out, and among the more modern efforts were those of Esperanto and of the compositor. Esperanto had failed, and the compositor had not become so great an international success as might have been hoped, but there was much more chance of success in regard to the more modern efforts and the more modern machinery connected with the printing press. It must have been years before some of Shakespeare's thoughts reached distant lands, but to-day the written and printed ideas of men who could not hold a candle to Shakespeare were dispersed with amazing rapidity. The new force to which he referred had only just begun to be seriously tapped, and it would be very interesting for this and succeeding generations to watch its development.

## Australian Paper Mills.

The Cumberland Paper Board Mills of Sydney, New South Wales, have recently installed machinery from America to the value of £150,000. The annual output of paper boards from the mills is 10,000 tons, the product being made out of material which previously cost money to destroy. Sawdust is the chief of these ingredients.

The managing director of this company intimates that he welcomes competition and has only one fear—namely, the importation of goods from Japan where the standard of living is decidedly inferior and the cost of production less than that obtaining in Australia.

## Caxton Convalescent Home.

### War Memorial Wing Opened at Limpsfield.

It was a happy thought to commemorate the supreme sacrifice made by printers in the Great War by extending the merciful work of caring for ailing members of the craft which is carried on so well at the Caxton Convalescent Home, Limpsfield. The Home is essentially the effort of printers themselves to afford opportunities of convalescence to their fellows who are reduced in health, and it is administered by a committee representative of the workers in the industry. A great ideal that is worthily put into practice.

An important milestone in the career of the Home was reached on Saturday, when the new War Memorial Wing was opened by the Right Hon. Sir Laming Worthington-Evans, Bart., M.P. (Secretary of State for War), and the Roll of Honour was unveiled by Lady Worthington-Evans.

The new wing to the building, which has cost £7,700, extends the accommodation to 48 beds, there being a large dormitory capable of taking eight or ten beds, a smaller one for four beds, and three dormitories (two beds each) for the reception of ladies. At present there are 23 patients in the Home, including eight ladies, and as there is always a demand for the services of the institution the extra space will readily be put into commission. In addition to the dormitories, the new wing contains a billiard room completely fitted up with table and seats, a card room, and sitting room. This provision for the comfort and recreation of the guests supplements the amenities already existing, and will enable the administrators to give extended benefits to a greater number of patients, the period of convalescence extending generally to about three weeks. What this rest and care in pure air represents in health and material gain to the printing trade is beyond calculation. Certain it is that the cost and upkeep of the Home are repaid over and over again in the renewed health which enables working printers to continue their occupation with added vigour.

Saturday's ceremonies brought to Limpsfield a large gathering of printers and their friends, who were impressed by the suitability of the Home for its beneficent object and by the healthy site which it occupies on a crest of the Surrey Downs, with its panorama of 70 miles of sweeping country.

#### A Worthy Record.

Mr. C. J. Drummond, M.B.E., J.P., who carries his years of service to the printing trade with such sprightliness, presided over the ceremonies in his capacity as President of the Home. In extending a welcome to the visitors at the entrance to the Home he remarked that it was a little auspicious that they should be meeting together on Waterloo Day, and he went on to voice the pride they all felt in the Home, which had been estab-

lished by a few journeymen compositors. The site was purchased in 1894 and the centre block opened in 1895. After acknowledging the generosity of the late Mr. Pasmore Edwards in connection with the site, Mr. Drummond, who succeeded that gentleman as president, emphasised the necessity of such institutions in these hard-working days. In the case of the Home, the necessity was proved by the erection of the new wing. Originally the institution was built for the male members of the trade, but in view of the large introduction of female labour, particularly during the war, and the fact that they had come to stay, they had now quite a number of female patients. One reason why they were anxious to complete the new wing was to provide separate accommodation for these. With an estate of nine acres, freehold, they were free from debt, with the exception that, owing to the fact that the work cost twice as much as was originally intended, there was £2,500 still to be paid on the latest addition. But they were sanguine that as a result of that day's proceedings the money necessary to defray the cost would be available at no distant date. (Hear, hear.) Referring to the healthy character of the site chosen for the home, the President mentioned that the printing industry, which was the second largest in London, and in spite of the great improvement effected in sanitary and other conditions of printing offices, was the second highest in the list of tubercular and similar complaints. The Caxton Convalescent Home was helping to fight those diseases, and enabled the patients to benefit by rest and pure air. After stating that the institution was managed by a committee of workmen, Mr. Drummond added that 30,000 members of the printing trade joined the Forces, and it was the decision of the industry that the best way of commemorating the great sacrifice made by those who fell in the war was to erect a new wing to the Memorial Home. (Hear, hear.)

Sir Laming Worthington-Evans then formally opened the new wing, after which the company entered the premises and Lady Worthington-Evans unveiled a roll of honour placed in the large common room, a short but impressive service being conducted by the Rev. G. G. Richards, M.A., Rector of Limpsfield.

The Roll of Honour takes the form of a massive fire place and contains the names of the fallen on extended panels on either side.

#### Gifts to the Kingdom of Heaven.

On the company reassembling at the entrance to the institution, the Right Hon. C. W. Bowerman, M.P., the treasurer, expressed thanks to Sir Laming and Lady Worthington-Evans for their presence that afternoon. It was wisely said, he remarked, that every sacrifice was a gift to the Kingdom of Heaven. If that were true of the ordinary sacrifices which men and women made as they went through life, what could be said of the sacrifice that the men whom they were honouring that day made in defence of their countrymen. He joined with the President in

an expression of wondrous pride for those 2,559 men whose names were inscribed on the Roll of Honour.

At this stage the President read a telegram from Lord Riddell, who was unable to attend and who congratulated the committee on the valuable addition to the Home, a fine piece of work and a fitting memorial to the printers who lost their lives in the war.

Sir Wm. Waterlow, seconding the vote of thanks, said in the Memorial Wing opened that day they erected something from which workers in the printing trade would benefit. He could bear testimony to that fact, because not only his firm, but those in their employ had contributed to the institution, and many of them had derived very great benefit from it.

#### **A Double Purpose.**

The resolution was cordially carried, and Sir Laming Worthington Evans, in reply, said thanks were not due to him but from him for the privilege of being present on such an occasion. They were there for the double purpose of reverencing the dead and serving the living. (Hear, hear.) Residing in the neighbourhood, the Secretary of State for War said for the last 20 years he had watched the Caxton Home, and he had always regarded it as an outstanding example of what employers and employees could do in a trade when they got together. The members of the printing industry did not owe that institution to any one wealthy subscriber, but to their own pennies, their own shillings, and their own pounds, got together after long intervals by their own self-sacrifice. It was an example to all trades. If other industries did the same, it would be greatly to the advantage, not only of those who required convalescence, but of the spirit of fellowship and good feeling which it would promote between the employees and between the masters and the men. (Applause.) There, 500 feet above sea level, they had an outstanding example of what trade co-operation could do. Already some 4,000 patients had passed through the Home, and he knew that a week-end in that air was as good as a tonic to anybody. If their men and women could get down there for a week or two, they went back to their work with extra vigour, and all those who subscribed to the funds were repaid by it.

#### **Tribute to the Heroes.**

The right hon. gentleman added one serious word. They could not go into that wonderful new wing that he had opened, nor listen to the simple service, without a glow of pride for the brave fellows whose names were upon the Roll of Honour. (Hear, hear.) Each one of them was a Captain Greatheart for whom as he passed over the trumpet sounded. They who remained did well to remember what they would have wished. Would they have wished them to mourn for ever because they gave their lives for civilisation and the country? No. If they could have chosen a memorial, they would have chosen something which would look after the living, something which would enable the members of their craft to regain the

health they might lose in following their calling. If those gallant men were present to answer the question, "What best form could your memorial take?" they would answer: "This is the best memorial." The Committee had done well in creating the new wing as the memorial of their craft. (Applause.)

#### **A Labour of Love.**

The President, on behalf of the Executive Board, expressed thanks to the War Memorial Committee, which had done so splendidly in carrying out the scheme brought to fruition that day. It was, too, all honorary work. If there was one man, however, who deserved thanks more than another, it was Sam White. (Applause.) No one knew how hard he had laboured; at one time they feared his health might break down under the strain.

Mr. White, the secretary, was warmly received on coming forward in response to calls. His work for the War Memorial, he said, had been a labour of love, although they had a big struggle to carry it along. What pleased him greatly was to see the Roll of Honour, the compilation of which from various printing offices had been a great work. At one time he thought it would be more than they could accomplish. Mr. White added that he had been connected with the Home from the laying of the foundation stone. He had been happy in seeing the institution grow. He looked forward to seeing another wing, and then he thought his work for the Home would be finished.

The proceedings terminated with cheers for Sir Laming and Lady Worthington Evans, after which tea was served.

#### **Charabanc Accident.**

One unfortunate incident occurred during the afternoon, and that was the overturning of one of the charabancs on its way to the Home with a party of visitors. In attempting to pass another vehicle the offside wheel got into a heap of sand, and the machine tilted over, the occupants being thrown out. Fortunately, they did not fall far, and the injuries received, apart from the shock, were slight. After being attended by a local doctor, therefore, the injured members were able to proceed on their journey, though one girl sustained concussion of the brain.

## **Swiss Paper Import Regulations.**

Until further notice, but subject to revocation at any time, importers of the classes of the following goods are exempt from the obligation of applying for import licences in respect of consignments entering Switzerland by the Franco-Swiss and Italo-Swiss Frontiers: Paper and cardboard and wares thereof (Tariff Nos. 292-295, 299-301, 303-310, 312, 317, 326-327, 330-333, 335, 338-340, ex-641 [cardboard for roofing]).

An Advertisement is always working.

## Printers' Charity Sports.

### Large Gathering at Stamford Bridge Athletic Ground.

Despite a threatening sky in the early morning, a kindly barometer quite fulfilled its promise on Saturday last, when the weather in the afternoon was all that could be desired for a sports meeting. With a "good gate," a record number of entries, big fields and close finishes, liberal financial support, and a well-arranged programme, consisting of over four hours' continuous sport, the organisers of the 26th annual gathering of the Printing and Allied Trades' Charity Sports Association ought, indeed, to be congratulated upon the success achieved.

During the proceedings the L.S.C. Military Band (under the conductorship of Mr. Wm. Avery) rendered an extensive and varied range of musical items, and the function received the warm support of a number of well-known representatives of the trade, among whom were Mr. Chas. H. Roud (president), and Messrs. John Fry, T. J. Hunt, A. H. Munday, H. F. Parker (hon. general secretary P.A.T.C.S.A.), W. C. Warren, J. Fleming, F. C. Peacock, A. Oddy (treasurer), and W. C. Jewell (hon. secretary Athletic Section).

A statement of the committee records with pleasure that Mr. Roud has undertaken to meet every expense in connection with the gathering, in order that the maximum benefit may accrue for Sir William A. Waterlow's appeal for the Printers' Pension Corporation Festival this year.

Mrs. Roud, who gave away the prizes, was presented during the afternoon with a handsome bouquet by little Miss Jewell.

#### Chief Events.

Special keenness was displayed in both the trade and open events, the fight for the "Fryotype Shield" being especially interesting. This competition embraces a series of events comprising 100 yards, 880 yards, one mile running and one mile walking, open to teams representing firms in the printing and allied trades, and was won by *The Times* with 10 points, the next in order being the Amalgamated Press, *Daily Mail*, Waterlow's and Mansell, Hunt and Gatty. Other big attractions were the 2-Mile Linotype Team Scratch Race won by the Amalgamated Press, the Braddick 1-Mile Re-lay (400, 220 and 880 yards), won by the London Shop Associations and Chapels' Council, N.U.P.B.M.R.P.W. and the Walker-Usher (tug-of-war) Challenge Cup won by Lloyd's (1) and the Sun Engraving Co. (2). In regard to the open events these were up to the usual high standard, and included a meritorious performance by T. A. Lindsay in the 300 Yards Open Handicap, in which, with a splendid burst, he just got up in the last stride to beat S. A. Ravenscroft by barely an inch on the tape. The Mile Open presented a wonderful field of over

a hundred entries, and V. S. Callard set up a fine performance in getting up into third position from the 50 yards mark, finishing only about four yards behind the winner. The performance of the Dutch champion, C. A. Gubbels, who did his Two Miles Walk in 15 min. 55 secs., fully deserved the applause he received from the enthusiastic crowd.

#### Other Results.

The following is a detailed account of the principal trade results:—

**80 YARDS VETERANS' HANDICAP.**—A. W. Clark, 17 yards start, 1; A. J. Dudley, 12, 2; G. Blomer, 14½, 3; E. Godwin, 2½, 4. Won by three-quarters of a yard; a foot between second and third. Time, 8.4.5 sec. First prize is presented by Mr. Horton Harrild, the remainder (3) by the P.M. and O.A.

**FRYOTYPE TEAM CHAMPIONSHIP.**—100 Yards: J. Birnie, Amalgamated Press, 1; R. G. Lovell, *The Times*, 2; L. Q. Shute, *Daily Mail*, 3; F. Thorn, Sun Engraving Co., 4. Won by a foot; 1½ yards. Time, 11.1.5 sec.

**880 YARDS.**—G. Dodkins, Amalgamated Press, 1; R. C. Reynolds, *The Times*, 2; B. J. Bowen, *The Times*, 3; C. Jeffries, Waterlow and Sons, 4. Won by six yards; fifteen yards between second and third.

**ONE MILE.**—R. S. Chisholm, Waterlow and Sons, 1; A. C. Pritchard, *The Times*, 2; G. Johnson, *The Times*, 3. Won comfortably by fifteen yards; two yards between second and third. Time, 4 min. 52.2.5 sec.

**ONE MILE WALK.**—H. V. L. Ross, *Daily Mail*, 1; F. G. Easts, *The Times*, 2; F. Creasey, Mansell, Hunt and Gatty, 3. Ross, East and Creasey soon singled themselves out from the rest in the order named, and this order was maintained to the finish, Ross winning easily by fifty yards; fifteen yards separating second and third. Time, 7 min. 2.4.5 sec.

The honours in this competition went to *The Times* as already stated.

**HALF-MILE BUSINESS HOUSE RELAY** (440 Yards and two 220 Yards).—Heat 1: Lyons A.C. beat *Daily Mail* by ten yards in 1 min. 47.4.5 sec. Heat 2: National Insurance A.C. beat Metrogas A.C. by four yards in 1 min. 44.3.5 sec. Heat 3: Harrod's beat Ravensbourne A.C. by two yards in 1 min. 46 sec. Heat 4: Railway Clearing House beat Metrogas A.C. "A" team by four yards in 1 min. 46.3.5 sec. Final: Lyons A.C. (R. C. Webber, J. Dutnall, and H. Nozieres), 1; National Insurance (W. L. Brock, L. F. Northam, and H. J. Clark), 2; Harrod's, 3. Won by twenty yards; fifteen yards between second and third. Time, 1 min. 41 sec.

**TRADE SOCIETIES ONE MILE RELAY CHAMPIONSHIP.**—London Shop Associations and Chapels' Council, N.U.P.B.M.R.P.W. (E. Denyer, W. Bracken, T. Milton, and A. C. Hunt), 1; London Society of Compositors (G. Dodkins, W. C. Reedy, J. Delwage, and G. Johnson), 2; National Union of Printers, etc., 3. Won by six yards; 35 yards between second and third. Time, 4 min. 1.2.5 sec.

**TWO-MILE LINOTYPE TEAM RACE.**—Order of finish: A. J. Smith, Wyman and Sons, 1; F. C. Fox, Temple Press, 2; J. Logan, Waterlow and Sons, 3; R. W. Chisholm, Waterlow

and Sons, 4; R. C. Reynolds, *The Times*, 5; W. W. Philp, Waterlow and Sons, 6; G. Watts, Kodak, Ltd., 7; G. Street, Harrison and Sons, 8; G. Dodkins, Amalgamated Press, 9; R. Gadd, Amalgamated Press, 10; W. Hibberd, Amalgamated Press, 14; F. Essex, Kodak, 12. Team placings: Waterlow and Sons (3, 4, 6—13 points), 1; Amalgamated Press (9, 10, 11—30), 2; Wyman and Sons (1, 13, 17—31), 3; Kodak, Ltd. (38), 4; Hill, Siffken and Co. (55), 5.

**TUG-OF-WAR.**—Final: Lloyd's beat Sun Engraving by two pulls to one.

The arrangements made by Mr. Jewell, whose duties of secretary were undertaken on Saturday for the first time at this gathering, were in every way successful.

## The Post Card Puzzle.

### Mr. Burchell's Explanation and Propaganda.

Mr. W. H. Burchell (hon. secretary of the Central Districts Branch of the London Master Printers' Association), in view of the great hardship and consequent loss of trade which will fall upon printers by the abolition of the  $\frac{1}{2}$ d. printed matter rate, is exercising his influence to obtain from the Postmaster-General some consideration on this important matter.

Mr. Burchell has sent us the following statement:—

"The Postmaster-General has issued a printed notice giving particulars of rates in force on and after midnight, June 12-13, 1921. Referring to inland post, this appears: 'Post card rate.—For every post card,  $\frac{1}{2}$ d., for a reply post card, 3d.' There are several kinds of post cards in use, namely:—

"(1) The picture post card, on which a communication in the nature of a letter may be written, postage  $\frac{1}{2}$ d.;

"(2) The official post card, in which a communication in the nature of a letter may be written, postage  $\frac{1}{2}$ d.;

"(3) Printed Christmas, New Year, Easter, birthday, picture and visiting cards, on which formulae of courtesy not exceeding five words may appear. The date, name, and address of sender and addressee may also appear (*vide* Post Office Guide), postage 1d.;

"(4) A printed card (post card size), bearing a business announcement on the back, and on the front the words, 'Printed Paper Rate.' The left half on the front can also be used for printed matter, leaving the right half for the address, post 1d. Millions of this class of card are used by commercial, industrial, and publicity firms, etc.

"Another fact, not generally known, is that a card can be sent through the post measuring up to 24 in. by 12 in. containing a business announcement on the back and on the front the words, 'Printed Paper Rate.' The left half on the front of the card can also be used

for printed matter, leaving the right half for the address, postage 1d.

"It will be seen from the above that the statement that the postage on every post card is  $\frac{1}{2}$ d. is misleading. The Postmaster-General may explain that Nos. 3 and 4 come under the heading of printed paper rate, but the general public will better understand the explanation given above. A card sent through the post, whether it is a picture card, official card, or a printed paper rate card, is, to all intents and purposes, a post card. No doubt when the new Post Office Council, which has just been appointed by the Postmaster-General, gets to work, it will see that the public get clear information as to postal charges."

Further to the question, Mr. Burchell has written to the Postmaster-General expressing the hope that he would include on the newly-appointed Business Advisory Council a practical printer, who would be able to present the case for the printing and allied trades, and also be able to show how the abolition of the  $\frac{1}{2}$ d. postal rate on printed matter was crippling the industry and causing unemployment.

Mr. Burchell has received from Mr. Kellaway a letter, in which it is stated that in choosing the members of the Council the Postmaster-General did not make the selection on the ground of whether they represented particular organisations or parts of the country, but whether they would be useful in advising him on questions of policy and administration affecting business interests. The letter also stated that the Postmaster-General could not see his way to appoint any further members.

Mr. Burchell, who is receiving the support of Sir George Rowland Blades, the Right Hon. C. W. Bowerman and Mr. Horatio Bottomley, is continuing his efforts to secure the representation on the Advisory Council to which he thinks the printing trade is entitled.

## Papermaking in South Africa.

Announcement is made by the Premier Paper Mills, Ltd., of Klip River, Transvaal, of their expectation to place the products of their new enterprise upon the markets of South Africa. Only wrapping paper will be made during the first few months. The company describe themselves as the pioneer manufacturers of paper in South Africa. Nearly three years have been occupied in the erection of the mills. It is claimed that the raw materials available "give every indication of making up into wrapping paper equal to the imported grades." The markets to be covered include the whole of the Union of South Africa, Rhodesia, the South-West Protectorate, Portuguese, and British East Africa.

CONSIDERABLE damage was done by fire which broke out on the premises of the City Paper Bag Co., Ltd., Milk-street, Bristol.

## Trade Notes.

THE death is announced at Cheadle Hulme, Stockport, of Mr. Thomas Percy, in his 76th year, founder and late chairman of Percy Brothers, Ltd., The Hotspur Press, Manchester.

SIR HERBERT THOMPSON has presented to the Library at University College, London, 58 editions of Castiglione's "Courtier," ranging from the Aldane edition, published at Venice in 1528, to Opdycke's translation of 1902.

THE price paid by the proprietors of the *Sunday Illustrated* for the advertisement on the official form delivered with the census paper, according to the Financial Secretary to the Treasury, was at the rate of £900 per 1,000,000 leaflets. The total revenue was estimated at £9,900. The most likely advertising agents were invited to tender, and the contract was awarded to the highest tenderer.

"MODERN COMPOSITION."—Mr. G. Bernard Shaw writes to the *Observer* pointing out that the book on "Modern Composition" is not written by him. "Somebody," he says, "has dug up an old note of mine on printing," and "it seems that the parties to this audacious piracy have acted in that invincible ignorance of the laws of literary propriety which is a national characteristic in this country." The issue of the pseudo-treatise on composition has been stopped.

CORPORATION PRINTING AND TRADE UNION RATES.—At a meeting recently of the Birmingham and District Committee for the Printing Trade, under the Joint Industrial Council Scheme, it was reported that a large amount of Corporation printing was being done in small offices that were not paying the agreed scale of wages so far as the female members were concerned. Work was being given out to middlemen or factors who had no printing offices and did not actually do the work. It was eventually decided that a fair list should be immediately prepared of those houses paying the agreed scale of wages in all departments.

LEEDS PRINTERS' SPORTS.—Valuable support is being given by the Leeds and District Master Printers' Association to the Leeds Printers' Sports, to be held in the Headingley Athletic Grounds on Saturday, July 9th. An appeal by the Association for financial support towards the gathering has met with much success, among those who have responded being: Mr. R. D. Chorley, a trophy; Messrs. T. G. and J. Jubb, a trophy; Leeds Technical Printing School, a trophy; Messrs. Petty and Sons, £15 15s.; Messrs. E. J. Arnold and Sons, £10 10s.; Messrs. H. Jenkinson, £10 10s.; Messrs. Jowett and Laing, £10 10s.; Messrs. Chorley and Pickersgill, £10 10s.; Messrs. Horsell and Co., £5 5s.; Electric Printing Works, £5 5s.; Messrs. J. D. Hunter and Co., £5 5s.; Messrs. Storey, Evans and Co., £3 3s.; Messrs. J. Sprostan and Son, £2 2s.; Messrs. H. Broadbent and Co., £1 1s.; and Messrs. Stenbridge and Co., £1 1s.

MR. WALTER S. DROMGOOLE, one of the proprietors of the *St. Helens News-paper and Advertiser*, has died at the age of 55.

SIR A. MOND, Minister of Health, states that he proposes to discontinue the publication of the journal *Housing*.

"THE Engineering Directory," of which 80,000 copies are distributed, has been issued from the office of *Engineering*, Ltd.

AFTER having been for over 40 years in Consett, Durham, on newspaper work, Mr. Wm. Eales is retiring for health considerations.

A WRITER in the *Westminster Gazette* eulogises the printing and style of American-made books; yet they are not popular in London, and he asks why.

THE Council of the Empire Press Union approves the proposal recently made by Viscount Burnham that a conference should be held in London between representatives of British and American newspapers for the purpose of discussing questions affecting the Newspaper Press, and will co-operate in any way that may be serviceable.

CONGRATULATIONS are due to Fry's Metal Foundry of Holland-street, Blackfriars, S.E.1, on winning two first prizes at the Cart-Horse Parade at Regent's Park in May, 1921, with their two horse vans which are so frequently seen in Fleet-street and neighbourhood delivering the well-known "Fryotype" printing metals.

A BRONZE tablet bearing the names of 100 men connected with newspaper and press advertising who fell in the war was unveiled in St. Bride's Church, Fleet-street, on Tuesday, by Lord Riddell, and dedicated by the Archdeacon of London. Sir Frank Newnes, Sir William E. Berry, Sir William Treloar, and Mr. J. Gower Berry were amongst the large congregation.

MR. JOSEPH EDWARD MACMANUS, the author and journalist, died at his residence at Hove, on Friday, aged 59. He was a member of the editorial staff of the *Daily Mail* and had been chief leader writer on the *Daily Express*, editor of "Blighty," and assistant editor for Great Britain of *Le Figaro*, Paris. Mr. Macmanus, who qualified as a solicitor, but never practised, was the author of many short plays, verses, and songs.

SMASHING UP A PRINTING OFFICE.—Early on Monday morning the printing and publishing offices of the *Dundalk Examiner* were completely wrecked, says a *Daily Telegraph* Belfast correspondent. A number of men smashed in the front entrance-gate to the premises, and on gaining admission they broke up all the printing plant on the ground floor, including a Wharfedale printing press, a folding machine, and a cutting machine. Afterwards attention was paid to the composing departments, and here much havoc was wrought. A Linotype machine was smashed beyond repair with a sledge hammer, cases of types were emptied on the floor, and all the electrical fittings were pulled down.

# **“SLOGGER”**

## **AUTOMATIC SHEET FEEDER**

### **Latest Improvements on the “SLOGGER.”**

1. Aluminium Stroker Arms avoiding all bending.
2. More accessible Pile Raising Adjuster. Absolutely self-locking. No lock nuts to work loose.
3. Automatic side lay giving perfect register.
4. Fine thread Caliper Adjustment which immediately stops machine and feeder if two or more sheets are stuck.
- 5, 6 & 7. Stopping, Starting and Trip Handles. All controls in one place.
8. Bevel Drive instead of Chain.
9. Fan for air draft mounted in one unit on Base of Feeder.
10. Leather collapsible joint to allow air-box movement without the use of perishable rubber.
11. Air throttle control adjusted in a few seconds for any thickness of paper on board.
12. Pile Raising Handle for raising pile to starting height at the commencement of each loading.

### **BRITISH THROUGHOUT.**

**Perfect Automatic Register. No continual re-loading.**  
**Can be attached to any make of sheet-fed press or folding machine.**

*Manufactured and Supplied by*

or from Messrs. W. H. Everett and Son, Ltd., news-  
agents, 11, St. Bride-street, E.C.4.

THURSDAY, JUNE 23, 1921.

### The Necessity of Stable Values.

THERE appears to be a certain amount of unwillingness on the part of some printers to realise that the process of approximating to market values is a necessary function involving some sacrifice. The self-same unwillingness had apparently no separate existence or gave no evidence of any during the periods of upward adjustment in the war phase. To these minds market value had its chief meaning and significance when the process of approximating previously-bought stock to its rapidly and enormously enhanced value brought grist to the mill. The more the consuming public knew of market values in those days, the easier and better it became to rise to them. Meantime, it was a common and quite a human error to rail at the papermaker and the merchant whilst enjoying to the full all the advantages of surplus profit which came to hand in the process of adhering to the accepted principle of market value. With the termination of the war and the passing of the trade boom market value assumed quite a new significance, for every adjustment took a downward trend and entailed a lesser or greater

amount of sacrifice. A principle is a principle whether in its workings it may prove advantageous or detrimental, and, therefore, market value, as the basis of commercial trading, holds just as good in the downward phase as it did in the upward. What appears to be all wrong now to the aforesaid few stragglers is that the consuming public should get the idea that prices are falling, and that they should find themselves impelled to fall into line with the vast majority of manufacturers and merchants whose policy is based on the principle of market price and a speedy return to normal and stable values. They may rail against it as they will, but, however reluctant they may show themselves to share the common burden, the end will be the same, for loss of business is a strong force of circumstance to be reckoned with.

• • •

### Last Five Months' Paper Imports Show a Reduction of Nearly £6,000,000.

A YEAR ago the imports of paper, etc., into the United Kingdom closely approximated the quantity received during the pre-war period. The slump in the demand, however, has severely checked the arrivals of imported paper, the quantity received during the five months ended May last amounting to only 2,153,755 cwts., a decrease of 2,958,988 cwts., or 57·8 per cent., as compared with January-May of last year. The total value of imports during the last five months amounts to £4,713,558, a reduction of £5,942,945, or 55·7 per cent. compared with the corresponding period of 1920.

• • •

### Increased Receipts of Printings, etc.

IN dealing with the import figures for May we find printings, etc., were received in larger quantity than for the corresponding month of last year—269,887 cwts. as against 264,258 cwts. Last month's imports were from the following sources:—Newfoundland, 30·9 per cent.; Sweden, 15·4 per cent.; Norway, 6·5 per cent.; Belgium, 3 per cent.; Germany, 2·1 per cent.; and other countries, 41·9 per cent. Sweden has well maintained her hold of the British market, but shipments from Norway show a heavy reduction. Supplies from Belgium evidence more active competition. The total value of the imports of printings, etc., into the United Kingdom last month was £504,929, as compared with £677,222 for May last year. All other imports show a heavy falling off, particularly in wrappings and boards. The reductions in wrappings, for instance, amounted to 334,478 cwts., Sweden and Norway being responsible for a shrinkage

of 216,603 cwts. In strawboards the imports last month were 554,336 cwts. below the quantity received in May of last year, whilst mill, leather, card and pasteboard show a decrease of 100,208 cwts. Other reductions were:—Coated papers, 13,978 cwts.; stationery, 1,723 cwts.; and other sorts, 24,605 cwts. Last month's total imports were 477,196 cwts., a decrease of 1,023,699 cwts., or 68·2 per cent., as compared with May, 1920. The total value amounts to £935,421, a decrease of £2,045,224 or 68·6 per cent.

\* \* \*

### British Paper Exports One-Fourth of Pre-War Quantity.

EXPORTS of British paper last month amounted to only 74,334 cwts., a decline of 224,314 cwts., or 75 per cent. as compared with May, 1913. Last month's value, amounting to £470,794, shows an increase of £14,035, or nearly 45 per cent., as compared with that for May, 1913. Compared with our exports for May of last year, the shipments last month show a decline of 116,832 cwts., or 61 per cent., and the value a decrease of £434,938, or 48 per cent. Printings comprised 45 per cent. of our total exports last month, the quantity being 33,801 cwts., 10,008 cwts. going to Foreign Countries and 23,793 cwts. to British Possessions. In May of last year 25,284 cwts. went to Foreign Countries and 50,072 cwts. to British Possessions. Last month's shipments of printings to India were extremely small, and South Africa and New Zealand were also poor markets. Supplies to Australia, however, were well maintained. Of the exports of 5,847 cwts. of writing paper last month, 886 cwts. went to Foreign Countries and 4,961 to British Possessions. As compared with May of last year, a decline of 3,368 cwts. is shown in respect to Foreign Countries and 8,519 to British Possessions. India, Australia and New Zealand were small buyers. Taking the five months' total figures, 648,050 cwts. were exported this year, a decline of 145,009 cwts. (18·2 per cent.) as compared with 1920 and a reduction of 850,532 cwts. (57 per cent.) as compared with 1913. The value of the shipments during January-May of this year stands at £4,059,864, an increase of £464,585 (12·9 per cent.) as compared with last year, and an addition of £2,465,077 (154·5 per cent.) as compared with the corresponding period of 1913.

THE freehold premises known as the Great Ivy Mill, Loose Valley, Maidstone, are announced for sale.

PRE-WAR "sevenpenny" novels have been sold in London at 2½d. each.

## New Postal Rates.

### A Picture Post Card Resolution.

At a largely attended meeting of representatives of all sections of the picture post card industry held at Raphael House on Wednesday under the chairmanship of Sir Adolph Tuck, Bart., the following resolution was unanimously passed:—

"That this meeting of publishers, printers, papermakers, stationers and newsagents connected with the picture post card trade, convinced that the increase in the postage on picture post cards to 1½d. will result in a serious decrease of the trade in picture post-cards, additional unemployment in the various industries affected and ultimate loss to revenue, desires to approach the Postmaster-General and the Post Office Council of Business Men appointed by him, in order to urge upon them the desirability of allowing correspondence on half the address side, or failing this, a minimum of any twelve words on the address side only, with date, name and address of addressee and the retention of the words 'post card' or 'picture post card' at the one penny postal rate.

"They are convinced that this concession is necessary in order to preserve the British picture post card industry, and they will be glad to be afforded an early opportunity of stating their case personally through a deputation."

The meeting was called at only a few hours notice in order to have the resolution placed before Thursday's first meeting of the Post Office Council of Business Men appointed by the Postmaster General.

### Information Wanted.

Sir Adolph Tuck asks post card dealers throughout the country to send him the results of their first fortnight's or three weeks' sale of picture post cards posted under the new conditions.

If a falling off has been experienced in the sale as against the same period last year Sir Adolph wishes to know the extent or percentage of the decrease in sales. He desires further to know the views of customers, the public and their general attitude with regard to increased postage. The information supplied will be at once laid before the Postmaster-General and the members of the Post Office Council.

ATTENTION is drawn to the fact that the business represented by Messrs. Backhouse and Coppock has been in existence for some 60 years. It was founded by the late Mr. George Backhouse at Castleton, near Rochdale, with the manufacture of pasteboards. Considerable headway was made, and in 1876 the business was moved to Macclesfield, where a few years later a factory was opened. By this time Mr. Backhouse had been joined by Mr. Coppock, and they began to make coated papers in addition to pasteboards.

### The Bookbinder and the Time Docket.

SIR,—I have read Mr. Harraway's letter on this question in the *British and Colonial Printer and Stationer* for June 16th. I think the difficulties of introducing the time docket, which is a necessary part of the Cost-Finding System, in the binding department have been rather magnified. That it can be used without disadvantage, and is suitable for the binding department, is proved by the fact that it is largely used at the present time in binding shops of every size and character, and that recently the binders have approved the use of the docket in Leicester, Sheffield, Oxford, Liverpool and other centres. If there were insuperable difficulties, these towns would not have approved its use.

Mr. Harraway recites the difficulties that would arise in binding miscellaneous parcels of books, containing books of various sizes and thicknesses. This and other difficulties that are mentioned have already been overcome, and they do not apply to a very large amount of binding, such as publishers' books and long runs of all kinds of binding.

Mr. Harraway says that he has no fear of the time docket, and I believe in those shops where the principle has been adopted employees also have no fear of the use of the docket.

The campaign of education which is being carried out by the Executive Council of the National Union of Printing, Bookbinding, and Paper Workers is supported by the Federation of Master Printers, and it is to be hoped that this campaign will succeed in proving to the workers that the use of time dockets is not to their disadvantage. All the employers desire is to find the cost of production, in order that they may base their charges to their customers on the real cost, and not on an estimate. The Federation of Master Printers have undertaken that the time sheets shall not be used for any other purpose.

The use of the time docket is essential in the Costing System. The Costing System stabilises prices and benefits the trade; and anything that benefits the trade must ultimately be of benefit to the workers. It is, therefore, to the advantage of all concerned that this question should be settled promptly, and the dockets used throughout the country.

Yours, etc.,

W. HOWARD HAZELL,  
Chairman of the Federation of Master  
Printers' Cost and Charges Committee.  
52, Long-acre, W.C. June 21st.

### Wages in the Paper Trade.

SIR,—In the article which appeared in your issue of the 10th, Mr. Newland is reported to have stated "Unless the offer is accepted by the 27th inst. we are to be locked out." I am

requested to say that this statement has not been made by the employers, and I am directed to ask you to give them the opportunity of disclaiming the announcement by inserting this letter in your next issue.

Your article admits that it is generally acknowledged that wages must fall with the decline in the cost of living, and that the conditions of trade and industry render such a course necessary.

I beg to say that the proposal to the Unions is strictly in accordance with the principle of a reduction based upon the decline in the cost of living.

The proposal calls for a reduction in respect of adult labour to meet the fall which has already taken place of 2d. per hour. When the cost falls a further 15 points another 1½d. an hour, and a further reduction of 1½d. for a further reduction of 15 points.

Your article gives the impression that there was no sort of agreement at this meeting between the employers and the unions' representatives, whereas the fact is that the unions were willing to accept the first two reductions subject to the stipulation that the second should take effect when the points fell to 110, but objected to the third, which they considered should be one penny instead of three halfpence.—Yours, etc.,

J. L. MERCHANT,

General Secretary,

Employers' Federation of Papermakers.

## Canadian Pulp and Paper Exports.

Canadian exports of pulp and paper for the month of April, 1921, were valued at \$6,946,236, compared with \$8,172,356 for April, 1921. An analysis of those figures indicates that while the shipments of pulp have declined in volume from a year ago, shipments of news-print and other papers show a very satisfactory increase.

The figures in detail are:—

		April, 1920.	April, 1921
Paper of all kinds	dols.	4,729,354	5,731,654
News-print	tons	44,967	47,463
	Value dols.	3,827,541	5,241,893
Chemical pulp	tons	34,602	11,877
	Value dols.	2,936,633	1,083,155
Mechanical pulp	tons	9,943	3,203
	Value dols.	506,360	131,427
Totals ...	dols.	8,172,356	6,946,236

## India's Paper Imports.

Statistics of the imports into India of paper and pasteboard (printing) for the year ending March 31st, 1921, show that the United Kingdom leads among supplying countries, although closely followed by Norway. The total imports were valued at 28,490,000 Rs., of which the United Kingdom sent 11,612,000 Rs., Norway 7,603,000 Rs., Sweden 3,957,000 Rs., United States 1,649,000 Rs., and Japan 1,033,000 Rs.

### Personal.

LORD BURNHAM will preside at a luncheon at the Hotel Cecil on July 20th held by the Labour Co-partnership Association in honour of Mr. Edward Owen Greening, one of their founders, on his 85th birthday.

SCARBOROUGH TOWN COUNCIL has decided to confer the freedom of Scarborough on the mayor, Alderman Meredith T. Whittaker, who is president of the Linotype Users' Society.

MR. GEORGE W. MASCORD, well-known in the printing engineering world, has invented a non-dazzle attachment for motor car head lamps. The invention has been tested by the Royal Automobile Club with excellent results.

TO CONGRATULATE Sir William Ernest Berry, Bart., on the honour recently conferred upon him by the King, a dinner was given by the *Financial Times* at the Hotel Victoria on Saturday.

MR. R. J. BARRETT, managing editor, presided, and Sir William was presented with an illuminated address bearing the signatures of the 50 members of the editorial and business staff.

THE following officers of the Scottish Newspaper Proprietors' Association have been re-elected for the ensuing year:—President, Mr. Fred Johnston, J.P.; vice-presidents, Messrs. J. J. Munro (*Stirling Observer*) and Allan Smyth (*Peeblesshire Advertiser*); hon. treasurer Mr. John Martin (*Kirkcaldy Herald*); hon. secretary, ex-Baillie Adams, C.B.E. (*Edinburgh Citizen*); General Committee: Messrs. R. G. Mann (*Southern Reporter*), George Macaulay (*Oban Times*), C. Morrison (*Leith Burghs Pilot*), A. Simpson (*West Lothian Courier*), L. Macbean (*Fife Advertiser*); Legislative Committee: The president, hon. secretary, Mr. T. Hunter (*Perthshire Constitutional*), and Mr. L. Macbean (convener); solicitor, Mr. W. Marshall Henderson, S.S.C.; counsel, Mr. J. C. Fenton.

A NUMBER of interesting visitors attended the opening of the War Memorial Wing at the Caxton Convalescent Home, Limsfield, on Saturday. Among them were Sir John Benn, Sir Cyril Jackson, Mr. J. P. Benn, Mr. T. E. Naylor, J.P., Mr. H. Wilson-Howes and Mr. Lewis Fry.

AT the closing session of the T.A. conference at Hastings presentations of gold watches were made to Mr. E. Jones, the secretary of the local branch, and Mr. E. G. Yates, the secretary of the Home Counties Group.

MR. WILLIAM LOWMAN, who was apprenticed as a compositor to the Eton College Press in 1854, has just retired after completing nearly 67 years' service there. Eighteen months ago he was presented by the proprietors (Messrs.

Spottiswoode, Ballantyne and Co., Ltd.) with a piece of plate to commemorate the fact that he had been in the employment of the Press for 65 years. For a long time his name appeared on the imprint of the *Eton College Chronicle*.

MR. JAS. W. COOKE, the president of the National Association of Wholesale Stationers and Paper Merchants, has presented a handsome silver cup to be competed for by the golfing members of the Association. The competition is now in progress, and it is hoped to play off the final on July 15th.

MR. ROGER GIBB (son of Sir George Gibb) has been appointed assistant secretary to Mr. A. E. Goodwin, secretary to the Federation of Master Printers. Mr. Gibb has been closely identified with the printing and allied trades through his work at the Ministry of Labour.

MR. E. G. ARNOLD, the ex-President of the Federation of Master Printers, and an ex-Lord Mayor of Leeds, was unanimously elected Pro-Chancellor of the University of Leeds last week.

MASTER printers throughout the country will join in the congratulations showered upon Mr. Arnold in connection with this new honour. Both to the printing trade and to the public life of Leeds, Mr. Arnold has rendered conspicuous service.

CONGRATULATIONS to Mr. John Buckle, the oldest printer in Yarmouth, who has entered his 81st year.

MR. J. J. W. PAGE has just celebrated the fiftieth anniversary of his employment with Messrs. Stanton and Son, printers, of Northampton.

SIR T. VANSITTART BOWATER assisted in the consecration of the new Masonic Lodge, Londinium, No. 4,208, which has been founded to gather within its portals the officials of the Corporation of the City of London.

JOURNALISM DIPLOMA.—London University will shortly publish the full syllabus of its journalism diploma courses for the 1921-22 session. Sir Sidney Lee has been appointed to the new office of director of the courses. At each of the five colleges of the university to which journalism students are admissible a specially appointed tutor arranges for admission and supervises studies, in general co-operation with the director. The curriculum combines with instructions in writing for the Press a wide and varied range of modern knowledge. Addresses are delivered by leading journalists on subjects of professional interest. The courses, which extend over two sessions for other than university graduates, may be taken by graduates of London and other universities in a single session. The examination for the diploma is held early in July.

## DIVIDENDS AND REPORTS.

**WATERLOW AND SON**.—Dividend of 2½ per cent. (actual) on deferred shares.

**SUN PAPER MILL Co., LTD.**—Interim dividend of 1s. per share.

**GEORGE NEWNES**.—Sir Frank Newnes (the chairman) presided at the annual meeting of the shareholders of **George Newnes, Ltd.**, on Thursday, at the Savoy Hotel, London. He moved: "That the report and accounts be received and adopted, and that a dividend be, and is hereby, declared on the ordinary shares at the rate of 15 per cent. per annum, including the interim dividend of 5 per cent. already paid, for the nine months ended March 31st, 1921; that the sum of £2,000 be transferred to the employees' sick and pension fund, and £3,250 for staff bonus, and that £37,793 1s. 11d. be carried forward to next year's account." After touching upon the company's publications, Sir Frank mentioned that the new printing works at Exmoor-street, Notting Hill, owned by the Newnes and Pearson Printing Co., Ltd., were fast approaching completion, and they hoped to commence printing the Pearson publications in the course of the next two or three months, and the Newnes publications before Christmas. Referring to the future, he said that it was impossible in these times to say what the current twelve months would bring forth, as conditions varied so much. It looked as if the price of paper were going to decline further—at all events, it was not likely to increase. Already the drop had been considerable. Expenses,

however, had risen, and were still advancing. Lord Riddell (vice-chairman) having expressed the directors' appreciation of the work of the staff, the report and accounts were unanimitously carried without discussion.

## NEW COMPANIES.

**HOUSE AND GARDEN PUBLISHING Co., LTD.**—Capital, £10,000, in £1 shares, to acquire, own, print and publish newspapers, prints, musical compositions, magazines, books and other works, and to adopt an agreement with the Vogue Co., Condé Nast and Co. (Incorporated), and W. L. Wood. Private company. First directors: Condé Nast and W. L. Wood. Registered office: Rolls House, Breems-buildings, W.C.

**BARTRUMS, LTD.**—Capital, £10,100, in £1 shares; to take over the business carried on at 70, Carlton House, Regent-street, S.W., as "Bartrums," and to carry on the business of publicity and advertising agents, agents for political, social, artistic, theatrical, commercial, financial and other propaganda, proprietors and managers of theatres, cinemas, etc. Private company. Subscribers: A. S. Niblett and R. Pierpoint.

**INTERNATIONAL COMMERCIAL LIBRARY, LTD.** Capital, £100, in £1 shares; publishers, book-sellers, newspaper proprietors, collectors of commercial statistics, etc. Private company. First directors: W. B. Tattersall, H. S. Fisk, and V. R. Tattersall. Registered office: 40-43 Fleet-street, E.C.

**TRI-COLOR PRINTING Co., LTD.**—Capital, £2,000, in shares; to take over the business of H. Farley, carried on at 3, Brunswick-place, City-road, N.1, as the "Tri-Color Press," and to carry on the business of literary agents, proprietors and publishers of newspapers, journals, magazines, books and other literary works, etc. Private company. Subscribers: H. F. Wells and W. H. Watts. First directors: W. H. Watts, T. S. Brandon and H. Farley. Registered office: 3, Brunswick-place, City-road, N.1.

**GRAPHIA, LTD.**—Capital, £5,000, in £1 shares; manufacturers of and dealers in pen and pencil carbon, typewriter carbon and all kinds of carbonised, wax and other stencil papers, typewriter ribbons and supplies, etc. Private company. First directors J. S. Scott and G. Poulton.

**E. BUTLER AND SON, LTD.**—Capital, £2,000, in £1 shares; dealers in rags and clothes, paper and skins, iron, leather, leather goods,

etc., and to adopt an agreement with Sir Robert Gower, Kt., O.B.E., and E. Winter. Private company. First directors: Bessie Winter, Emily Butler, F. Butler and E. Butler. Registered office: 4, Dudley-road, Tunbridge Wells.

### COMPANY MORTGAGES AND CHARGES.

Fresh Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 1908, and Satisfaction registered pursuant to Section 97 of the same Act. (The registration of Satisfaction is not compulsory).

**COLOUR, LTD.**—Mortgage dated May 19th, 1921, charged on all moneys owing or to become owing to the company by the Rolls House Publishing Co., Ltd., to secure £400 and all moneys due or to become due to the mortgagee (J. K. White, solicitor) or to Messrs. Gibbs, White and King, so long as the mortgagee is a partner therein.

**DUCK, SON AND PINDER, LTD.** (manufacturers of musical instruments, music publishers, dealers in gramophone records, etc.).—Mortgage on 12, Elmdale-road, Tyndalls Park, Clifton, Bristol, dated June 9th, 1921, to secure £1,600. Holders: H. Warren, 32, Bedford-row, W.C., and F. G. Whittuck, Orchard House, Orchard-lane, Bristol.

**A. G. THORNTON, LTD.** (drawing instrument manufacturers, etc., Manchester and Salford).—Mortgage on company's interest in 39 and 41, King-street West and 8, Southgate, Manchester, dated May 2, th, 1921, to secure £9,350. Holders: Miss E. Fildes, 5, Sion row, Twickenham; and H. S. Kershaw, 31, Booth-street, Manchester.

**STRONG, HANBURY AND CO., LTD.**—Charge on 14-18, Nile-street, and warehouse at Eagle-passage, Nile-street, Shoreditch, dated May 18th, 1921, securing all moneys due or to become due from company to bankers not exceeding £5,000.

**JOHN F. SHAW AND CO., LTD.** (publishers, etc., London).—Issue on May 24th, 1921, of £3,500 debentures, being a re-issue of part of the series of £10,000 registered October 6th, 1911.

**HENRY STONE AND CO., LTD.** (box makers, cabinet makers, stationers, etc., Banbury).—Mortgage on "Swan Close" and two other closes of land at Banbury, dated May 7th, but executed June 2nd, 1921, to secure £2,050. Holders: Barclay's Bank, Ltd. (by transfer from Gillett and Co.). Note.—The mortgage for same amount to Gillett and Co. was registered in 1912.

**IRISH PAPER MILLS CO., LTD.**—Particulars have been filed of £150,000 debentures, created February 16th, and all issued May 25th, 1921, charged on certain freehold and leasehold properties and the company's general assets. The debentures (which are guaranteed by Charles Marsden and Sons, Ltd.), were offered to the public at 98 per cent. An underwriting commission of 4 per cent. is payable to the

British and Allied Investments Corporation, Ltd. Trustees for the debenture holders: National Provincial and Union Bank of England.

**GREENSLADE AND CO. (READING), LTD.** (stationers, etc.).—Particulars of £20,000 debentures, created and all issued May 30th, 1921, charged on the company's undertaking and property, present and future, including uncalled capital.

**JOHN DICKINSON AND CO., LTD.** (paper-makers, London).—Satisfaction to the extent of £12,000, May 24th, 1921, of debenture stock secured by trust deeds dated July 1st, 1912, and January 15th, 1919, securing £565,000.

**FRANK DONALD, LTD.** (printers, Birmingham).—Particulars of £2,750 debentures credited and all issued May 27th, 1921, charged on the company's undertaking and property, present and future, including uncalled capital.

**PORTALS, LTD.** (manufacturers of and dealers in paper, etc., Whitchurch).—Issue on June 3rd, 1921, of £1,000 debentures, part of a series already registered.

**EMPIRE PAPER MILLS, LTD.**—Mortgage on land, property and rights at Swanscombe and Greenhithe, etc., dated January 1st, 1921 (registered June 7th, by permission of court) to secure £136,955. Holders: Wall-paper Manufacturers, Ltd.

**UNITED STATIONERS, LTD (Hull).**—Particulars of £500 debentures created May 18th, 1921, charged on the company's general property, present and future, the amount of the present issue being £200.

**SHIPPING TRADES INDEX, LTD.** (publishers, London).—First mortgage debenture, dated June 6th, 1921, to secure £500, charged on the company's undertaking and property, present and future, including uncalled capital. Holders: J. G. Hammond and Co. (1920), Ltd., 139, Moor-street, Birmingham.

**LEWIS MATHIAS AND CO., LTD.** (music publishers, etc., London).—Particulars of £250 debentures authorised May 26th, 1921; present issue £125, charged on the company's undertaking and property, present and future.

**H. C. LEE, WHITEHEAD AND CO., LTD.**—Particulars of £10,000 debentures authorised April 26th, 1921 (registered June 11th, by permission of the Court) whole amount issued; charged on certain freeholds and leaseholds and the company's undertaking and property, present and future, including uncalled capital. Trustees: J. S. Lee, 24, Market-street, Brighton; Squire Holt, "Melrose," 16, Norwood-crescent, Southport; Helen M. Lee, 162, Coppice-street, Oldham; and H. Hague, Retiro-chambers, Waterloo-street, Oldham.

**LUDGATE, LTD.** (manufacturers of loose leaf books, etc.).—Particulars of £25,000 debentures, authorised April 28th, and covered by trust deed dated May 7th, 1921; whole amount issued. Charged on the company's undertaking and property, including uncalled capital and leasehold properties in Edinburgh and London. Trustees: T. O. Hart

and K. Henderson. J. B. Peden, of 48, Queen-street, Edinburgh, as receiver on May 9th, under powers contained in trust deed dated May 7th, 1921.

### BANKRUPTCIES, etc.

RE ALEXANDER McDONALD, printers' agent 6, Melbourn-mansions, Queen's Club-gardens, Earl's-court, S.W.—The first meeting of creditors under this failure was held last week, before Mr. F. T. Garton, official receiver, at the London Bankruptcy Court. The debtor's business consisted of procuring printing orders which he handed over to his father to be executed. He returned liabilities £635 and assets "nil," the failure being attributed to the slump in trade since September last. The case was left with the official receiver to be wound up in bankruptcy.

THE public examination took place in London on Monday of Mr. George William Macey, Mr. Frank Peter Reavey and Mr. Donald Mackenzie, who had carried on business at 40, Fleet-street, E.C., under the style of "the Printers' Exchange." A joint statement of affairs showed gross liabilities of £162,701, and a deficiency of £90,823. Besides carrying on a monthly journal styled *Printers' Exchange*, which was not published after October last, Macey and Mackenzie published *Blighty*, which was issued for soldiers on active service. A considerable quantity of news-print and other kinds of paper, mainly imported from Norway, was also bought and sold by the debtors. The failure and insolvency was attributed to the exceptional and continuous fall in the price of paper since the commencement of the slump in September last; it was further attributed to the consequent inability of the debtors to dispose of stocks which they had either in hand or in the course of delivery. Their deficiency was almost accounted for by the depreciation in value, to the extent of £86,671, of stock of paper in the hands of bankers. Mr. Registrar Mellor declared the examination to be concluded.

### Affairs of a Paper Merchant.

At the Official Receiver's Offices, Bristol, a meeting was held of creditors of William Edward Pain, of 15, Firfield-street, Tottenham, and carrying on business at 96, Redcliff-hill, Bristol, as a stationer and paper merchant. Debtor's statement of affairs showed gross liabilities as £510 17s. 10d., of which £467 17s. 7d. was expected to rank. The debtor estimated the assets to produce £408 16s. 8d., leaving a deficiency of £58 0s. 11d. He alleged, as the causes of his failure, "Want of capital, bad trade, by making a bad debt of £116, and having stock stolen to the value of £24."

In his observations the Official Receiver (Mr. Thos. Easton) said the debtor, who is a bachelor and 26 years of age, states that on

October 15th, 1915, when serving his apprenticeship to the wholesale stationery business, he joined the army, from which he was discharged on December 13th, 1917, as being no longer fit for military service, and was now in receipt of a disablement pension of 16s. per week. After his discharge he resumed his former employment until November, 1919, when he commenced business as a paper merchant and stationer at 96, Redcliff-hill. He was then possessed of £100 capital, being £75 received from the King's Bounty Fund, and £25 his savings. Having regard to the falling markets and the general depression in trade, the Official Receiver considered the debtor's estimate of the value of his stock-in-trade, trade fixtures and utensils was not likely to be realised, and on these grounds an order for summary administration had been obtained.

Mr. Arthur Collins, chartered accountant, was appointed trustee with a committee of inspection.

## Gazette.

### A WORD OF CAUTION.

In giving the official Gazette information, it must be distinctly understood that we take official records as we find them, and accept no responsibility for inaccuracies, while, as an almost invariable rule, the facts will be found correct. We advise our readers, before forming hasty judgment, to consider that there may be in each case satisfactory explanation which does not appear on the records.—Ed.]

### ENGLAND AND WALES.

#### THE BANKRUPTCY ACT, 1914.

#### RECEIVING ORDERS.

Westwell, Arthur, 30, Pilkington-road, Southport, Manchester, paper merchant. June 16th.

Lacey, Ernest, 35, High-street, Chatham, bookseller. June 17th.

## Fry's Metal Foundry.

A party of nearly 30 members of the Publicity Club of London last week visited the London works of Fry's Metal Foundry, at 25-42, Holland-street, Blackfriars, S.E.1. The party was received personally by Mr. John Fry, general manager of the firm, and was split up into groups, which were then escorted round to the various departments by members of the staff. All the processes in connection with the manufacture of the "Fryotype" printing metals were demonstrated, and much interest was evoked by the extreme care taken in the purifying of all the metals used and the methods of mixing the various constituent virgin metals in the molten state, which ensures complete homogeneity. As the weather was hot and foundry work is essentially warm, the welcome cup of tea, which was provided, and a half an hour's informal discussion about what had been seen, formed an agreeable conclusion to an interesting and instructive afternoon.

## The Engraving, Relief Stamping and PLATE PRINTING INDUSTRY.

### Organisation of the Industry in Canada and the United States.

That section of the printing industry which is concerned primarily with steel and copper plate and die engraving, printing and relief stamping is a section of great and increasing importance, and there are many points of interest and value to British printers to be found in the story of recent developments in this particular section of the printing industry in Canada and the United States of America. Some account of these developments is given in the following paragraphs, which are sent to us by a Canadian correspondent:—

The historian of the engraving, embossing and plate printing industry in the Continent of America will necessarily find much of his space occupied with the doings of the body known as the National Association of Steel and Copper Plate Engravers. Prior to its formation, the trade in general was in very bad condition—not so much a question of demand for steel and copper plate and steel die engraving, printing and embossing, as in respect of the relation of the various firms to each other and the public. The conditions were not peculiar to America and Canada, for doubtless it is, or was, similar in the Mother Country. Price cutting was general, and not only would firms voluntarily reduce prices to obtain work from a competitor, but the customer or his purchasing agent made active use of his knowledge of the state of affairs to play one engraver against another. The practice of making sketches without charge was general, and the sketch of one man was frequently given to a competitor to work from. Apprentices trained, or partly trained, as well as journeymen were enticed from one shop to another; in fact, all the tricks which have been well-known for years were practised. The introduction of labour-saving machinery for engraving, embossing, or plate printing was vigorously opposed by unions and even non-union men, and what between the rivalry of employers and opposition of employees, the trade bade fair to fall into a degraded condition.

This was the state of affairs when eight or nine of the better class of firms who were fairly well known to each other, met together to form a plan of campaign for the betterment of conditions in the craft. They pooled their information relative to names and addresses of engraving shops all over the Continent of America, and a circular was prepared briefly setting forth the danger the craft was in and suggesting that all interested in its betterment should express their willingness to meet together upon a date and at a point which would be central to all interested. Twenty-one firms replied immediately; a

meeting was held, and, with additional information available, a subsequent meeting was attended by 75 enthusiastic men.

From that beginning the Association, as a National body, has grown each year steadily. It has a professional secretary who devotes his entire time to collecting material of interest to the craft and disseminating information of interest. It publishes an Association organ which, besides a large amount of advertising and personals, carries well-written articles on subjects of interest to the trade. There is held a large annual gathering or convention which meets in the month of July at a different city each year. Addresses on subjects of direct bearing to the members are given and freely discussed. Trade customs, standard forms, methods of production, prices, cost systems, etc., are dealt with during the four to six days of the meeting and this fraternization has had the greatest effect for good on the trade generally.

To day, heads of the firms who previously hardly acknowledged each other, visit each other's shops freely and, in times of stress, help from one shop to another is frequently given. The general result has been, not to make everybody perfect, but to break down that barrier of suspicion and distrust that was as general as it was frequently unfounded. There is still price cutting, of course, but general discussion has introduced a fairly uniform system of costs, and prices are practically uniform. In engraving prices, of course, much of which is pure guess-work, differences exist, but the practice of quoting a price and sticking to it has largely taken the place of the old price cutting. Much of the engraving on straight work—and there is but little ornamental work on the commercial engraving of to-day—is on the "per letter" basis, some of it "per line" (both methods of pricing, of course, being imperfect). They have done good work in adopting two standard qualities of bond paper as the Association property ("Engravers' Bond.") It is ordered in large quantities and is introduced wherever possible.

They are, in consequence of the difficulty of training apprentices, studying the question of a central training school for all branches of the craft. They are developing the idea of co-operative advertising to popularise engraved work. This is financed by the Association, and better results are obtained by one central fund advertising engraved work generally and making its effectiveness known to the general public, than would be possible by individual efforts.

The National Association is the central body, and while the local city associations are encouraged, where there are a sufficiently large number of firms to form one, the general opinion seems to be that they tend to hamper the development of the central body. Under broadminded officership, however, the local associations are usually a great help in keeping up the interest. A good, energetic, well-known association secretary and a well supported and live association journal are essential.

Their by-laws are based on the usual form.

Active members must be directly employed in the trade of engraving, embossing or plate printing. A minimum fee of \$36 is exacted, the fees being upon a basis of: \$1.50 for each hand embossing press, \$3 for each plate printing, \$6 for each power die press, \$4.50 for each journeyman engraver, \$9 for each engraving machine. Associate members \$100 (supply houses).

The Association has been very helpful to its members in times of strikes; finding positions for engravers, embossers, plate printers and die stampers, and in general acting as a clearing house wherever labour was applied for, or offered.

## Trade Union Matters.

SOME interesting decisions were come to at the concluding session of the T.A. conference at Hastings. One important decision was to retain the headquarters of the Association at Manchester. Whether Cottonopolis is the best centre for the head office is open to doubt, although it is largely a question of convenience, and it is to be presumed that the officials, who have had long experience of the arrangement, are the best judges.

ANOTHER important subject which was considered referred to the rate of subscriptions, and it was unanimously decided to increase the subscription by  $\frac{1}{4}$ d. a week in order to strengthen the Labour Representation Fund.

THE Amalgamated Society of Lithographic Artists, Designers, Engravers and Process Workers at the present time have an abnormal amount of unemployment and short time in their ranks, and in order to meet the emergency a substantial levy is being placed on the members who are on full time.

ON the subject of a wages reduction, a representative of the Union thought that the question was one which bristled with difficulties, and with regard to the present offer expressed the opinion that it was far too drastic. If the principle of a reduction at all be admitted, he thought it should be an economic one.

WE understand that tremendous efforts are being made in the section of the trade covered by this Union to capture from the Germans the trade in ceramic transfer work. Firms in the pottery districts that hitherto employed German productions in this class of work should have no difficulty in future of fulfilling their requirements from firms in this country.

OUR informant thought that the slump through which they were passing was caused by the high cost of materials and paper, but that a rebound in trade was inevitable.

Midland Branch : 40, CHURCH STREET, BIRMINGHAM.

# London Master Printers' Association.

An Address on "The Paper Situation," by Mr. A. W. Foster, B.A., Secretary of the Papermakers' Association.

Mr. A. W. Foster was the guest last week of the London Master Printers' Association at the monthly lunch at the Connaught Rooms and gave an address on "The Paper Situation."

Mr. R. A. Austen-Leigh (the President of the Association), who was in the chair, said when he asked Mr. Foster to be their guest he pointed out that probably printers did not always see eye to eye with papermakers. Naturally most of them liked to buy their paper as cheaply as possible. At the same time many of them had good friends in the papermaking industry and he was quite sure they did not wish to see them ruined. Some of them hardly expected they would be ruined just yet considering the good prices paper fetched during the war. However, he believed it would do them all good to try and understand the difficulties the papermakers undoubtedly met with.

Mr. Foster said he accepted the invitation to come and address a meeting of the London Master Printers Association on the paper situation with the greatest pleasure, and after undergoing their hospitality he congratulated them on following what he believed was the practice in the best circles among the cannibals, of feeding their victim well before they put him on the sacrificial altar. He recalled that his last visit to a similar function was when the shadow of war was casting a gloom over the whole country, and when master printers had the timidity to invite as their guest for the afternoon Mr. H. A. Vernet, who was then in a position of brief authority over the trade in which they were all interested. He hoped the good effect which Mr. Vernet's presence among them had created, as far as their idea of the paper controller was concerned, would be that day after his visit so far as the papermaker bulked in the views of printers.

## The Medium.

He (Mr. Foster) felt that master printers saw the papermaker through the medium of the wholesale stationer, and he felt sometimes they must have the habit of colouring the information that passed through them. The general idea which the master printer entertained of the papermaker was that of an irascible old gentleman of somewhat gouty tendencies, devoid of technical skill, who made paper by accident, but who had an uncanny and inconvenient habit of selling inferior paper at a very superior price.

It seemed to him (the speaker) that the impression left on the minds of printers was that all the good qualities of the paper were put into it by the wholesale stationer, and that

any inferiorities that there were, were due to the papermaker, and that it was only the successful show of complaints, rejections, and all the other weapons of the wholesale stationer that kept the horrible papermaker in check. (Renewed laughter.) He could assure them the papermaker was nothing like that. He was an astute person he agreed, but he was not nearly so astute as the wholesale stationer. (Laughter.)

Proceeding, Mr. Foster said the papermaker and the printer had absolutely a common interest in the prosperity of the paper trade as a whole, and he thought the time had come when he should remind the world in general, and the Press in particular, that there were other grades of paper besides those which went to the turning out of the *Daily Mail*. (Laughter.) Over and over again in his career during the war he found that the Government official could conceive of no other paper than that on which was printed the *Daily Mail*, or what was used as a picture post card. The utmost vision of the Government official was limited by the contents of the railway book stall, and he was evidently quite willing to see the whole of the contents of that book stall swept away and never re-placed.

They suffered in the printing and paper-making industry from the dictatorial domination of news-print, and they wanted to drive it home to the people in general that paper represented a hundred and one things other than news-print. Of course, the paper which his good friend Mr. Joseph Dixon described as Dixon's "Imitation Art" was very nice for printing the *Manchester Guardian* upon, but was no good for the majority of the commercial users of paper.

## Paper in Universal Request.

It was his painful duty during the war period, when they tried to crib, cabin and confine them, to point out to his Government official friends that there was hardly a single operation in their daily journey to the office which could be carried out without the aid of the papermaker and the printer. They went into a railway station and bought a cardboard ticket. They paid for it with a paper Bradbury. They went to the despised book-stall and bought their newspaper. Then they entered the railway carriage, the panels of which were probably made of paper. At least he believed the Midland diners were finished off in lincrusta, which was absolutely a paper product. If they happened to be in a dining carriage they had their lunch from a paper menu, and they protected their clothes probably by means of a paper serviette. If they

had been unlucky in their boot purchase, it was conceivable that the soles were not entirely innocent of the product of the papermaker. Had they been unfortunate enough to live in Central Europe instead of in these islands during the war they might have had to dress completely in paper, while it might be new to some of the gentlemen present that a great number of the casualties caused during the war were by rifle bullets, of which the nozzle was actually made of a paper compound.

### A Barometer of Trade.

There was no operation in the whole of commerce which could be carried on without the use of this homely product. The late Earl of Beaconsfield described the fine chemical trade as a barometer of commerce; but he (Mr. Foster) thought they would find a much more accurate reflection of the state of industry and commerce of the present day in the paper market. The humble paper bag and the humble paper box were very good indications of the state of retail trade in the West End of London, and of the wholesale trade all over the country.

Mr. Foster went on to refer to the use of commercial stationery and advertising circulars, which contributed in no little degree to the commercial prosperity of this country and the Empire. So many people were of the opinion that news-print was the only sort of paper that mattered that he had jotted down a rough estimate of the various proportions of the paper produced in this country. It was estimated that the weekly production of news-print in this country was 8,500 tons. Wood printing papers ran to 4,500 tons; esparto and rag papers about 4,500 tons; and brown and other wrappings represented another 4,500 tons. If these figures were anything like accurate they would see that the writing and printing papers were very nearly double the amount of news-print made in this country, and they must remember in making the estimate that news-print was the cheapest paper, and the value of the output of the writing and printing mills was far in excess of that of the "news" mills.

### Progressive British Mills.

With regard to the figures, which represented something like a total of 1,200,000 tons of paper per annum, it was sometimes suggested that British paper mills were not in a position to supply the home market. He would like to say that the output of the British paper mills had shown a steady and progressive increase. The late Mr. George Chater had estimated that in 1861 the output was 100,000 tons a year. The late Mr. T. Y. Nuttall calculated that in 1882 the figure was 318,910 tons, in 1892 483,000 and in 1902 750,000 tons. His late colleague at the Department of Paper Control (Mr. Bradley) estimated that for 1913 the production was 1,160,000 tons. So they would see there had been a constant and progressive increase in the output of the British papermaker. Producing as they probably did last year  $1\frac{1}{2}$  million tons of paper in this

country, they imported 647,000 tons. So that, roughly speaking, the British papermaker supplied two thirds of the demand in this country. He thought there was not the slightest doubt, with the progress which had been made since 1913 in the modernisation of mills and the improvement of technical processes, that the papermaker in this country had nothing to fear as to the quality of production of his paper in competition with any papermaking nation in the world.

### The Papermaker's Difficulties.

Dealing with the present difficulties of the papermaker in this country, Mr. Foster mentioned that the industry could not live from hand to mouth with regard to its raw material. One of the advantages in dealing with the British paper mill was that the consumer could rely upon a constant and consistent supply. In order to be in a position to give such supplies, the papermaker must contract ahead for his raw material. He had to contract in the autumn of one year for the supply of his material for the next year and they had all been caught by the fall of the market. Such a fall in the market as they had experienced affected an industry which had to contract ahead more severely than it affected an industry which could buy from hand to mouth. The Chancellor of the Exchequer had proposed certain concessions in connection with the Excess Profits Duty which would, to a large extent, meet the difficulty of the industry which had its material in stock. These concessions, however, had not helped the papermaker to any appreciable degree. He could write down the stock of pulp which he held at the end of his E.P.D. accounting period. That was only a small fraction of the stock he had contracted forward to buy. The Chancellor had definitely refused to make any concession on forward contracts. This was going to place upon the papermaking industry this year a burden which was calculated at not less than £12,000,000 sterling. But the papermaker was facing it. He had written down his stocks in his own books and his current market prices for paper were based upon the written down value. The Chancellor of the Exchequer, however, would not allow him to write it down for purposes of taxation.

### Higher Costs.

In the second place, it was hardly necessary for him to refer to the coal question. The prolonged and regrettable stoppage of the coal mines was having a most serious effect upon the papermaking industry of this country. Coal entered into the costs of papermakers to a very large extent. On the average, they used three tons of coal in the production of one ton of paper. Unless, therefore, the coal miners went back on terms which would allow the pit mouth price of coal to reduce very substantially, their coal cost would remain at its present abnormal high figure.

Then again, said Mr. Foster, he would remind them that the paper mills were work-

ing short time, and short time was always a disadvantage to the manufacturer, because his overhead charges went up out of proportion to the material and labour costs of his production. In the case of the paper mill where, with very expensive and substantial machinery, the starting up process was a matter of four to five hours, and where the running cost was exceedingly high, the operation of short time was a greater proposition than in the case of lighter industries.

Finally, they had the question of wages. He did not propose to discuss that in detail. Printers had their wages trouble, and the papermakers had their's, and they were trying to deal with it, but he thought the figures showed that the wages which were paid in the paper mills to-day were in the aggregate somewhere in the neighbourhood of four times what they were pre-war.

They had to remember papermakers not only gave advances to meet the cost of living, but they had gone over from a two-shift to a three shift system, which entailed the employment of three employees where formerly there were two.

### The Pulp Contracts.

Dealing with the contracts for pulp which papermakers had been obliged to enter into, Mr. Foster said they could not expect that their pulp suppliers would meet them to a very great extent on the question of the price of their contracted pulp. The pulp suppliers also had to buy their timber a year ahead, and they told them quite recently that their timber suppliers, who were the peasant proprietors in the backwoods of Scandinavia, did not visualise the world situation at all, and were not prepared to make any concession on the price of the timber. Therefore, their Scandinavian friends were not in a position to meet the papermakers. Of course, the papermakers replied to the pulp contractor, just as the printer did to the papermaker, that he had made such huge profits during the war that he could afford to part with some of it.

### The Future.

Mr. Foster then turned to the somewhat brighter prospects for the future. While it was dangerous to prophecy, he believed personally that when the present general depression in the trade of this country was over, the paper and printing industries would be among the first to feel the flow of the revitalising blood of prosperity through their veins. He believed that the British papermaker, if they would give him the opportunity, could supply the finest product in the world at the best price.

During the war and since, paper mills in this country had been modernised, and new machines had been put in. Furthermore, a little over a year ago they formed, in connection with the Papermakers' Association, a Technical Section which had been brought together for the purpose of joint information, instruction and discovery the experts in the paper mills of this country. The engineers, the chemists and the administrative experts were all consulting together, and he believed

that the result of the deliberations of their Technical Section would be to produce great improvements in the manufacture of paper in the United Kingdom.

They did not fear, in due course, any difficulties with regard to their supplies of raw material. They had in the past been almost dependent for their wood pulp on Scandinavia, but it was likely within a brief period that would no longer be the case. They would call into being the New World to re-dress the balance of the old. They believed that their Canadian brothers were going to give them supplies of wood pulp in large quantities and at low prices, and they believed that with increased technical efficiency, with the New World supply of wood pulp, and with the goodwill of their British customers that British papermakers could supply all the needs of the home consumer.

Their motto—papermakers, master printers and wholesale stationers together—would, he trusted, in the future be: "British paper for British purposes, Empire products for Imperial use." (Cheers).

### Some Questions.

The chairman then invited discussion and remarked that Mr. Foster's address had enabled the master printer to realise more than they had before some of the difficulties which papermakers had to face. Mr. Austen-Leigh pointed out that the speaker had not said anything about the possibility of protecting the papermaking industry. Perhaps that was because it was too dangerous a topic in Mr. Foster's view.

Mr. Leete asked whether Mr. Foster considered papermaking a key industry?

Mr. Foster replied that under the Safeguarding of Industries Bill papermaking was not a key industry, but it was a fundamental industry in the same way as iron, coal and steel were fundamental industries.

Mr. Pollock sought information as to the views of the paper mills on the question of the standardisation of paper.

Mr. Foster replied that the view of the mills was that the demand for standardisation must come from the consumer. The mills were quite willing to standardise if the buyer wished it. Papermakers, however, had a suspicion that the middle man would not want standardisation. They had, therefore, first to convert the wholesale stationer and then the papermaker would be readily converted.

Sir Cecil Harrison proposed a hearty vote of thanks to Mr. Foster for his address. The papermaker, he pointed out, was a man who was always with them, but was not always very near to them. To many master printers, especially in the case of smaller businesses, there was an individual in between who was looked upon as a necessary evil, and up to the present they had not been able to do without him. He hoped master printers would be able to come more into touch with the papermaker direct. (Hear, hear.) That was the course in which business was tending. With the increasing use of paper products and printing, there was looming up more and

more the opportunity for the printer to become a papermaker, but that was not yet possible, though it might be in the distant future. In the meantime, however, the printer could get in touch with the papermaker and buy direct to his own advantage. With regard to the question of standardisation of paper, Sir Cecil thought they were all agreed that it was a desirable thing, but apparently it was nobody's particular business to carry it through. The papermaker said the demand had to come from the printer, and the printer said it was to be done by the papermaker or perchance by the wholesale stationer. He thought, however, that they should look upon it in a more disinterested way. Then they would see that standardisation was a most desirable object to which they all should work. He respectfully submitted that the papermakers could do something substantial in making a move on the basis of the views which had been publicly expressed, and which were now to be found in print and at the service of the whole trade.

The resolution, put by the Chairman, was enthusiastically adopted, and Mr. Foster, in reply, said he had not discussed the position under the Safeguarding of Industries Bill because that was a contentious point. At the same time he would like to make one little remark, and that was that if His Majesty's Government put the Bill into operation as the trade policy of the land it was only fair that papermakers as well as master printers should have an opportunity of taking advantage of it. He did not put it higher than that; but if that was a desirable policy for commerce as a whole, the papermaker should have his little share just as the printer should have his. (Applause).

## British Manufacturers' Opportunity.

Mr. F. W. Field, H.M. Commissioner at Toronto, recently made a tour of the industrial centres in the United Kingdom, and his impressions were very favourable from the point of view of the ability of British manufacturers to undertake export. An essential factor, of course, is to secure lower production costs, and Mr. Field found a disposition on the part of labour to recognise this fact. Lower costs are an absolute necessity, since quotations made by United States firms have been considerably below those of our own manufacturers. Mr. Field noticed during his tour a very general feeling among manufacturers to regard the Canadian market as too small for serious efforts. He points out, that while the population is comparatively small, the purchasing power per capita is relatively large. Moreover the Dominion is expanding rapidly and will in time be a substantial purchaser.

# Rules and Regulations for the Printing Office.

## Mr. Burchell's Address to South-East London Master Printers.

The above was the title of an address delivered by Mr. W. H. Burchell (hon. secretary, Central Districts) at the monthly meeting of the S.E. London Master Printers' Association at the Bridge House Hotel, London Bridge, S.E., on the 14th inst. Mr. Burchell contrived to make his paper interesting and instructive by the aid of specimens of dockets, charging-out sheets and other documents, all of which he claimed were the outcome of the application of the practical knowledge he had gained over many years.

### The Lecture.

Mr. Burchell expressed surprise that in a trade like theirs so many offices had no rules and regulations to guide a new employee when he first entered a firm. One would have thought that it would have been the first thing the L.M.P.A. would have advocated when he introduced the organisation campaign some three years ago. Since that time they had, by the way, doubled their membership.

What was required, insisted Mr. Burchell, was a standardised set of rules and regulations and it was by securing these that they could carry on their business with economy, expedition and profit. How many employers or managers took the trouble to secure references when they engaged a new hand? asked Mr. Burchell. Sometimes the employer enticed an employee away by unfair means, and so evaded all the honour and integrity that should exist among employers.

The next thing essential to the successful printing office was a small time recorder which eliminated the possibility of disputes and prevented mistakes being made. His method of working the recorder was for the employee to hand his card to the clerk, who stamped it in the employees' presence on entering and leaving the premises.

Mr. Burchell next dealt with the percentage to be added to cover the salaries of representatives and explained in detail his method of arriving at it. If the representative is engaged at £5 per week the percentage allowed to cover his salary is often overlooked, viz. —10 per cent.—which would mean a turnover of at least £2,500 per annum, and then would have to be added 11½ per cent. on every charge to allow for the 10 per cent. to be taken off.

### To Guide the Employee.

Coming to the productive side of the business, he advocated the placing in prominent positions in each department a general set of rules for the guidance of the employees. In

the composing-room the compositor before he commences his duties should be furnished with a book showing the specimens of type, borders and ornaments handled in the room, and also have the time docket explained to him. Other departments, such as the reading, machine-room and the warehouse were each in turn dealt with, and the system adopted to attain efficiency and increased output was fully explained.

In the office all orders are entered in a daily order book and all the time occupied by the various departments is entered from the daily work sheets into the charging-out book.

Mr. Burchell then passed round for inspection several specimens as used by himself of estimate forms, periodical charging out and composing-room analysis sheet, wages docket, etc.

After alluding to a standardised apprenticeship indenture and the question of profit-sharing, Mr. Burchell brought his interesting lecture to a close.

### DISCUSSION.

In opening the discussion, Mr. J. J. Keliher thought there would be some difficulty from the trade union point of view in the adoption of the contract of agreement as between employer and employee. If a good and efficient workman broke the rules, what, asked Mr. Keliher, would Mr. Burchell do. Sacrifice his workman or his rules? In regard to profit sharing in the printing trade, Mr. Keliher said he had purposely turned his business into a limited company in order to make it a profit-sharing concern. In his case it did not work satisfactorily, as it was not conducive on the whole to making the men work with more zeal. The man when he became a shareholder in many cases only worked as he felt inclined. In the counting house it certainly worked better, many of his people still holding shares.

Mr. Burchell said in regard to the contract of agreement, he did not think the trade union would have any objection to it; on the contrary, he thought they would rather welcome it.

Mr. Northam thought too much could be made of books of rules and regulations in the printing office. They were often so many that half of them were overlooked.

A member said a good practice was to make an inventory of all the gear in the machine room, and to show it to a man when he started on a new job.

Mr. J. W. Carley, in dealing with the profit-sharing scheme, said it was a matter that was

too far off. If the worker wanted anything, he wanted it on a Saturday, not in twelve months' time. It had been tried in France and elsewhere, and had proved a failure. The best managed factories were those where the work goes on harmoniously without a lot of hedging in of rules. He thought that in framing rules the positive attitude should be adopted, and not the negative one. To attain increased efficiency he did not agree with the practice of telling a man what he must not do, but by assisting him to take an interest in sanitation, education, safety devices and protection of the workers, lead him up to better things. He thought it was impossible to get initiative out of a man if he was bound down by a lot of unnecessary rules.

Mr. J. R. Riddell said he was in agreement with many of the points raised by Mr. Burchell. He dealt, in the first place, with the necessity of discipline among boys in their early training, and instanced the method employed to obtain it at St. Bride's. In response to the question that had been raised of the possibility of tools going astray and their safe keeping in the machine room, Mr. Riddell said they had a method which had been successfully copied in several large works. On a stained oak board they had an outline of each tool, and anyone could see at a glance if it happened to be missing. He next spoke of

the temptations that surrounded boys of 14 and 16, and said that unless they endeavoured to make good citizens of them they could never hope to make them good printers. After speaking of the wasteful practices often indulged in in the printing office through bad training, Mr. Riddell said he thought that the cost of production would not come down by a reduction of wages, but by increased production, and it was by instilling a greater love of craftsmanship into the young printer that they would get more and efficient work done.

## John H. Smythe

### PAPER CONTRACTOR

2 & 4 Tudor Street, London, E.C.4.

Supplier of Fine, Common and Super-Calendered Printings, News in Reels and Reams, Engine and Tub-Sized Writings. Art Papers, Imitation Arts, Tinted Writings and Printings, Antique Laid and Woves, Cartridges, Browns, Mill Wrappers, Banks. Cover Papers.

all purposes.**

# New Provisional Customs Tariff for Spain.

A new provisional Customs Tariff has been put into force in Spain as from May 21st. It will remain in operation until a further revision of a more permanent character is decided upon. Below are given the rates concerning paper, printed matter, etc. While the rates of duty under both the "First" and "Second" Tariffs are shown, it should be understood that products and manufactures of the United Kingdom are admitted into Spain on payment of the lower rates shown in the "Second" Tariff column.

Tariff No.	Goods.	Duties.	
		1st Tariff. Pes. c.	2nd Tariff. Pes. c.
CLASS VIII.—PAPER AND MANUFACTURES THEREOF.			
GROUP I.			
406	Pulp for papermaking, clippings of paper and waste paper (52) ... 100 kilogs.	2 00	1 00
GROUP II.—PAPER IN AN UNMANUFACTURED CONDITION.			
Endless paper, white or coloured, not cut, glazed or not, weighing per sq. metre:			
407	Up to 20 grammes inclusive (53) ... 100 kilogs.	91 05	60 70
408	From 21 to 40 grammes inclusive (53) ... 100 kilogs.	54 00	36 00
409	From 41 to 50 grammes inclusive, containing mechanical pulp (53) (54) ... 100 kilogs.	22 50	17 00
410	From 41 to 50 grammes inclusive, not containing mechanical pulp, and all paper weighing 51 grammes and upwards per sq. metre (53) ... 100 kilogs.	54 00	36 00
411	Common packing paper, dyed in the pulp or not (55) ... 100 kilogs.	52 55	21 70
412	Thin paper, made of common ("sucia") pulp, with or without designs for wrapping fruit (55) ... 100 kilogs.	54 00	36 00
413	Other kinds of unmanufactured paper, not expressly mentioned in the Tariff ... 100 kilogs.	90 00	60 00
GROUP III.—PREPARED OR MANUFACTURED PAPER.			
414	White or coloured paper, of any weight, cut (53); hand-made paper ... 100 kilogs.	120 00	80 00
415	Paper covered on one or both sides with mineral or metallic materials, glass or mica ... 100 kilogs.	90 00	60 00
416	So-called parchment paper, paper treated with paraffin, and the like, even cut ... 100 kilogs.	81 00	54 00
C. 417	Paper and paperboard ("cartulina") sensitised for photography ... kilog.	4 00	2 00
418	Cut up paper, paper cut into flowers and similar manufactures of paper, including tissues and trimmings of paper (56) ... kilog.	8 00	1 80
419	Paper cut into tape for telegrams, "serpentinias," and similar articles (57) ... kilog.	0 90	0 60
C. 420	Cigarette paper in books, tubes, or cut into sheets for booklets ... kilog.	2 25	1 50
421	Account books, copy-letter books, copy books, note books, index books and counterfoil books (58) ... 100 kilogs.	180 00	120 00
422	Paper bags and sacks, with or without inscriptions ... 100 kilogs.	150 00	100 00
423	Envelopes, boxes of stationery (paper and unstamped envelopes), and other kinds of prepared or manufactured paper, not expressly mentioned in the Tariff ... 100 kilogs.	200 00	133 30
GROUP IV.—WALLPAPER AND THE LIKE.			
424	Paper printed on natural foundation ... 100 kilogs.	90 00	60 00
425	Paper printed on a dull (matt) or lustrous foundation ... 100 kilogs.	180 00	120 00
426	Paper with ornaments of gold, silver, wool, or crystal ... 100 kilogs.	450 00	300 00
GROUP V.—PRINTED AND ENGRAVED PAPER AND PHOTOGRAPHS.			
427	*Books and other printed matter in Spanish ("Castilian,") bound or not (58) (59) ... 100 kilogs.	184 20	122 80
428	*Books and other printed matter in a foreign language, bound or not (58) ... 100 kilogs.	30 00	20 00
429	Prints, maps, drawings, and photographs (60) ... kilog.	3 75	2 50
430	Paper ruled with pencil or ink, stamped paper, blank invoices, labels, cheques and similar articles, printed or lithographed (60) ... 100 kilogs.	300 00	200 00

\* Under Disposition II. of the Tariff, books edited and printed in the language of the country from which they come direct or, with through bill of lading, constituting the originals of a citizen of that country entitled to copyright ever said books, are admitted free, provided the country in question grants the same exemption to Spanish books and is a party to the Copyright Treaties.

(52) This number only applies to paper pulp perforated in such a manner that it can be used for no other purpose than the manufacture of paper and pasteboard. When the pulp is not perforated, the Customs will cut the sheets, at the expense of the importer, so that it may not be utilised for any other purpose. Pulp not perforated is dutiable as common pasteboard.

(53) Paper of which the dimensions exceed 45 by 57 cm., if it is in sheets, or of which the breadth exceeds 30 cm. if it is in rolls or on reels, shall be regarded as uncut paper. When paper weighs more than 200 grammes per square metre, it is considered for Tariff purposes as paper board or cardboard. Paper destined for printing newspapers and reviews shall be admitted at the rates of duty provided for by the Royal Order of March 26th, 1921, provided they comply with the conditions and formalities there laid down.

### CUSTOMS TARIFF FOR SPAIN.—Continued.

Tariff No.	Goods.	Duties.	
		1st Tariff. Pes. c.	2nd Tariff. Pes. c.
GROUP VI.—CARDBOARD AND PAPER, MISCELLANEOUS.			
431	Tarred paper, even if lined with light cotton or jute tissue ... .. 100 kilogs.	120 00	80 00
432	Other kinds of paper lined with other cloths ... .. 100 kilogs.	225 00	150 00
	Cardboard and paperboard ("cartulina,") unmanufactured, weighing per square metre :		
433	From 200 to 500 grammes inclusive ... .. 100 kilogs.	75 00	50 00
434	More than 500 grammes ... .. 100 kilogs.	50 40	33 60
435	The same, in the form of trays, dishes, floral ornaments, and other similar moulded articles, including those of cardboard pulp or carton pierre, not finished ... .. 100 kilogs.	90 40	60 00
436	Cardboard boxes, not covered, or covered with common paper, even if with gilt fillets (61) ... .. 100 kilogs.	60 00	40 00
437	The same, with ornaments, or covered with fine paper, and finished manufactures of cardboard pulp or carton-pierre ... .. 100 kilogs.	300 00	200 00

In Class IX. (wood and other vegetable materials used in industry, and manufactures thereof) appear the following items:—

448	Logs for making paper pulp (62) ... .. 1,000 kilogs.g	3 00	1 00
446	Esparto, unmanufactured ... .. 100 kilogs.g	4 50	2 25
467	Reed, cane, vegetable hair, rush, osiers, fine straw, palm and other similar materials, not manufactured, including shavings of wood ... 100 kilogs.g	2 00	1 00
468	The same materials, and esparto, cut, bleached, or dyed ... .. 100 kilogs.g	7 50	5 00

(54) In order to distinguish paper containing mechanical pulp, it is sufficient to throw on the paper a drop of a solution of fluoroglucin, which will produce a red colour on paper containing mechanical pulp but will not produce any sensible colouring on other paper.

(55) Paper weighing less than 20 grammes inclusive per square metre shall be regarded as paper for wrapping fruit; paper of greater weight shall be dutiable under Nos. 408-411. Only common papers for packing and wrapping which contain mechanical pulp and which weigh more than 75 grammes per square metre, are included in this number (411).

(56) Papers in imitation of lace, balloons and lanterns of paper, confetti, paper serviettes, etc., are included in this number.

(57) In order that strips of paper may be dutiable under No. 419, the breadth of the strips must not exceed 18 mm. Strips of greater breadth shall be dutiable under the number in which the paper, according to kind, is included.

(58) The bindings shall be dutiable separately, according to kind.

(59) The authors or publishers of works in Spanish, printed abroad, are the only persons who may, on payment of duty, introduce the same into Spain fifteen days after a bibliographic notice has been published in the "Gaceta" by the Ministry of Public Works (Fomento). This notice, once published, is sufficient to authorise subsequent importations, except in the cases of distinct editions or of copies which do not accord in some detail with the notice published, a new authorisation being necessary in such cases. Periodicals printed abroad in the Spanish language do not require previous authorisation for their introduction into Spain.

(60) Blank post cards are included under No. 430, but post cards with illustrations, photographs, etc., are dutiable under No. 429.

(61) Boxes of pasteboard lined with paper, used for packing handkerchiefs, shirt-fronts, buttons, tissues in the piece, and other similar articles, are free of duty in accordance with Disposition V. Certificates of origin required to receive benefits of reduced rate of the second Tariff.

(62) Wood destined for the manufacture of pulp for papermaking is dutiable under No. 448 if the following conditions are fulfilled:—1. That the wood is of pine or fir, and is free from resin. 2. That it is imported in pieces, with or without bark, and not worked in any way by hand, not exceeding 2·18 metres in length and 20 centimetres in diameter. 3. That the importers are manufacturers of wood pulp for papermaking. 4. That the local authorities duly certify that the wood has been used in the manufacture of pulp, cardboard, or pasteboard. Importers must enter into a bond for the payment of the difference of duty between Tariff Nos. 441 and 448, the bond to be cancelled on presentation to the Customs of the certificate mentioned above.

#### NEW MODEL IN BRONZERS

## The "SILVERLOCK" Patent Bronzing Machine.

BRONZES, DUSTS and POLISHES COMPLETE. Specially designed for Bronzing Christmas Cards, Calendars, Box-tops, Labels, Silks, Parchment, etc.

**Dust-tight. No need for Vacuum.  
Machine easily inspected.**

**Stamp Presses. Card Cutting Machines  
Gumming Machines for  
Whole Surface and Strip Work, etc.**

**WASTE PAPER.**—A correspondent of the *Publishers' Circular* (Mr. Lionel W. Jones) is anxious to know why there is no present demand for waste paper. "During the war one could understand to an extent the high prices which were paid and also the gradual drop in price after the war," he says, "but what has happened now? One cannot even get pre-war price; in fact, there seems to be no market price at all; although there are still some

firms who advertise for waste paper." The suggested answer is that the position is "possibly due to an extended use of wood and the high cost of converting old paper into pulp."

MR. ROBERT HALL, the well known paper merchant of 60, Marchant-road, Edinburgh, has passed away at the age of 67 years, much regretted by innumerable friends. Mr. John Hall, his son, will carry on the business.

# Hot-Air Drying Apparatus

PATENT No. 141,997. (Patented in Great Britain &amp; Abroad)

## For Drying Varnished & Gummed Sheets.

Attachable to any make of Varnishing and Gumming Machine.

MESSRS. SAMUEL GABRIEL, SONS AND CO., the art printers and publishers of New York, now have a London office, at 4, Holborn-circus, E.C.1, with Mr. Matthew Carmel as their representative.

HERR HUGO STINNES, according to a statement of the Minister of Posts, Giesberg, owns 64 newspapers. His big interests in the cellulose industry are connected therewith. Following his invariable practice, he entered

cellulose because his big forest estate at Weisskolln, in Silesia, which was mainly exploited for pitprop production, yields also paper wood, and because he is interested in the production of cellulose chemicals on the Rhine.

THE Speaker of the House of Commons will be the guest of the Parliamentary Press Gallery at their annual dinner at the House of Commons on July 29th.

Gentlemen,

I have very much pleasure in testifying to the satisfactory manner in which you re-cast on the point system a quantity of old metal furniture and leads, and am very glad that, acting on the advice of your representative, I had this done, as I have found the results of very great convenience to me.

Yours faithfully,

E. H. WEBB.

## Reproduction Without a Camera.

By WILLIAM GAMBLE, F.R.P.S.. F.O.S.

A process has been recently patented in England (and already in Germany) by Max Ullman, which claims the reproduction of printed matter without the aid of a camera. It is not altogether new, as the method was offered here before the war as a secret process, and apparently did not find a purchaser. Now it is being exploited by a Swiss firm, who seem to have secured the rights of handling it in all countries.

### The "Manul" Process.

Briefly stated, the process consists of preparing a glass plate with a thin and highly transparent coating which is sensitive to light. This glass plate when dried is placed with its sensitive coating in contact with any printed matter it is desired to reproduce, say the page of a book, which need not be taken apart or otherwise damaged. The plate and copy are pressed into intimate contact in a vacuum frame, and then exposed to arc light. The result is that the white surface of the paper reflects the light back through the plate, whilst the black ink of the printed matter reflects no light. When the plate is developed, which we suppose is done on the principle of the carbon process by washing out with water the parts which have not been affected by light, the result is a negative image. The ground corresponding to the white paper will then be in hardened gelatine, but having no opacity it is necessary to stain the gelatine

with a non-actinic dye so as to obstruct the light in the same way as the developed silver image on a photographic negative. The plates shown to us before the war were dyed with a vivid red and the lines were clear glass forming a very perfect negative, which is suitable for printing down on zinc, aluminium, or other metal direct, or for making transfers on photo-lithographic paper.

It will be gathered from this description by those acquainted with process work, that this negative has been obtained by very simple means, no camera, lens or prism being required. The coating on the glass is stated to be put on by means of a whirler, so that the only essential apparatus is this whirler, a vacuum printing frame and an arc lamp. The method of printing and its subsequent transfer to the plate produces the right to left reversal necessary in offset lithography.

The patent reveals the fact that the light-sensitive compound on the plate is a bichromated colloid, probably fish glue and bichromate of potash.

### Playertype.

It is frankly admitted in a prospectus issued by the Swiss firm that a similar effect has been obtained by an English process called Playertype, the invention of Mr. J. H. Player, which will be found described in the writer's book "Line Photo-Engraving." In this process an ordinary slow photographic dry plate

was used, and to restrain a tendency to fogging a piece of green glass was laid over the sensitive plate during exposure. Mr. Player did not claim that his negatives would be suitable for process work, but only for making prints on photographic paper—such as bromide paper. By using the bichromated plate, as is done by the German inventor the difficulty of fogging is overcome, probably by the yellowness of the bichromated film, and the necessary clear negative for process work is thus obtained.

The German process, which has been given the name of "Manul"—a transposition of some of the letters of the inventor's name—can obviously be worked by anyone with comparatively little knowledge of process work, and it would present no difficulty at all to produce such negatives in a process studio, without even requiring any additional plant.

#### The Question of Patent Validity.

This raises the interesting question whether the patentee could stop anyone using his process without the necessary license, seeing that the principle of the method is the invention of Mr. Player, who, so far as we know, did not patent his idea. Even if he did the patent would not now be in force, as it must be over 14 years since his method was published in the photographic papers.

If only a moderate fee is asked for the right to use the German inventor's process it may be worth while to acquire it and thereby obtain working details which would save experimenting.

One drawback to the process is that the reproduction can only be the same size as the original copy, but, of course, it would be quite possible to reduce the negative obtained by putting it in a transparency camera and copying it by transmitted light. Possibly it will be objected that there would be no gain in this case over reproducing the copy direct in the ordinary process way.

The value of the process will undoubtedly be in reproducing rare books or documents, but we think they will have to be such as show good black ink and white paper. We have seen excellent examples of reproductions of old books, music, manuscript, wood cuts, etc. The Swiss firm send out a very fine album of specimens.

The process is one which should be of great value to the offset lithographer and the direct photo-lithographer.

DURING May capital increases of paper and stationery companies were registered to the amount of £38,000, and printing and publishing concerns to the extent of £36,390.

## The State of Employment.

In the printing, bookbinding and paper trades employment continued generally slack or bad during May, and in most districts it was rather worse than during the previous month. With a few exceptions short time was worked in all sections.

The number of workpeople in the paper, printing, publishing, and bookbinding trades whose unemployment books or out-of-work donation policies were lodged at Employment Exchanges at 27th May was 38,414, compared with 30,004 at 29th April and 21,745 claimants for benefit in respect of systematic short-time working, compared with 21,677 at 29th April and 14,188 at 24th March.

With letterpress printers employment, in the majority of cases, was reported as bad and worse than in April, much short time being worked. In some offices in London a certain amount of overtime was worked by compositors and readers, whilst in others they were reported to be on short time or totally unemployed. In the lithographic printing trade there was also a further decline in the state of employment, short time being prevalent. Returns received by the Board of Trade, covering 8,570 workpeople in the letterpress and lithographic printing trades, indicate that over one-half of these workpeople were working short time to an average extent of 14 hours per week.

Employment in the bookbinding trade continued bad on the whole, but showed signs of slight improvement in London. Short time was reported from most centres, and nearly 60 per cent. of the workpeople for whom returns were received were working on an average, 16 hours per week short of full time.

According to returns received by the *Labour Gazette*, out of 77 533 members of trade unions in the printing industry the percentage of unemployed at the end of May was 8·2 as against 7·5 at the end of April and 0·7 at the end of May a year ago, the increases being 0·7 and 7·5 per cent. respectively. In the bookbinding section, out of a trade union membership of 14,851, the percentage of unemployed is given as 10·1 at the end of May as against 10·3 at the end of April and 0·5 at the end of May a year ago, a decrease of 0·2 on the previous month but an increase of 0·6 on a year before.

Returns made by employers for the week ended May 28th show the number of workpeople in the printing offices concerned to be 9,250, a decrease of 3·7 per cent. on the previous month and of 11·7 on a year before. The wages paid amounted to £32,744, a decrease of 6·2 per cent. on the previous month and of 8·4 on a year before. In the bookbinding trade employers' returns showed 4,475 workpeople, a decrease of 8·2 on the previous month and of 15·5 on a year before. The total of £9,237 paid to workpeople represented a decrease of 11·2 per cent. on the previous month and of 22·4 on a year before.

# Stationers' Company.

## Court Dinner.

During the year of office of that much-respected master printer, Mr. Edward Unwin, the Worshipful Company of Stationers has made excellent progress along the path which was marked out for it centuries ago. The name of Unwin stands high in the annals of the City of London, particularly in the great craft of printing, and none has borne the name with more honour than the past Master of the Stationers' Company. Full of years and honour, Mr. Edward Unwin continues to place his talents and energy, in spite of his eighty years, at the service of his fellows. The respect in which he is held was seen at the Court dinner which was held at the Stationers' Hall on Tuesday night. Mr. Unwin's vigorous speech on that occasion in defence of the Livery Committee, a progressive force within the Company, was a tribute to his broad-mindedness and his mental grasp of things.

In earlier years the Court dinner was held in order to welcome junior liverymen, but for some eleven years the practice has been discontinued until it was revived on Tuesday, as was fitting, seeing that Mr. Unwin, during his year as Master, has done so much in extending the membership of the company. It was appropriate that the banquet should be held on the evening of the day when the company pays its official visit to Hendon, in accordance with the bequest of Richard Johnson, who left a sum of money in 1795 in order that the Court might visit his father's grave for the purpose of seeing that it was kept in good condition, and then proceed to the parish church to hear a sermon preached on the text "*Bulla est vita humana*" (life's a bubble). This duty was duly fulfilled on Tuesday, and, therefore, with a good conscience the members were able to enjoy their social gathering in the evening.

The banquet was of a delightful social character, served in the best city manner, and, when the loving cup had passed round, was followed by speeches full of wit and wisdom.

The loyal toasts having been honoured, Mr. H. J. Waterlow, as senior member of the court, sounded the right note in proposing the health of the Master. After referring to the visit to Hendon he spoke in eulogistic terms of the work of Mr. Unwin. In his long recollection of the company, he did not know that there had been any Master who had been more generally known by the Livery. (Hear, hear.) Mr. Unwin had been a very prominent member of the trade and an active member of the Association and Federation of Master Printers. They also knew him for the active interest he had taken in the Stationers' Company. They had gained more liverymen during his year than for many years past. (Hear, hear.) The Master had gone further and taken an interest in the Livery Committee

which was formed last year and which had done very excellent work. The speaker mentioned the monthly luncheons organised by this committee and the instructive discussions which took place at them. In this connection, Mr. Waterlow offered some facetious criticism on a pamphlet or memorandum issued by the chairman of the Livery Committee (Mr. R. A. Austen-Leigh), which asked for the publication of accounts. These, however, constituted one of the mysteries of the Company. (Laughter.) The speaker made a stand for the preservation of the rules and ordinances of the Company and declared his intention of upholding the Master and Wardens in maintaining them.

The toast was cordially honoured.

The Master, who was warmly received, said it had been a pleasure to him to occupy the chair of so historic and ancient a company as that of the Stationers. He had hardly expected to reach that high office; but it had pleased Providence to give him good health so that he was able to take his share of any work attaching to the company. (Applause.) Mr. Waterlow had been good enough to say that his name was well known in their profession. (Hear, hear.) When he was a lad it was always called a profession, and he believed in that term still. He thought they should all do what they could to uphold it and to increase its value and its prestige, and to keep the profession of the printer and stationer in the forefront of the trades of the world. (Hear, hear.) Referring to the pamphlet issued by the Livery Committee, Mr. Unwin remarked that the chairman of that committee was by no means a revolutionary (hear, hear), and he assured them that there was no intention on the part of the Committee to do anything that would scrap the ordinances and rules of the company. Possibly out of the Livery Committee would come a suggestion or so which, while not scrapping anything of value, might suggest something to their grave and reverend seniors of the Court of Assistants which might bring the company up to a twentieth century standard. If, in so doing, some modification or alteration in the procedure of the Company was involved, he, for one, desired to be young enough to be glad to see it. (Applause.) Mentioning that he would go out of office on Tuesday next, Mr. Unwin said after that he should only have his own personal vote, and that would ever be in favour of creating in the Stationers' Company something more worthy of its name and historic character, so that it might be in the vanguard of all progress for the benefit of the craft which they represented. (Loud applause.)

Mr. Arthur Rivington proposed the toast of "The Vicar of Hendon" (the Rev. S. E. Chettoe), whom he thanked for the address he had given earlier in the day.

The Vicar of Hendon responded in a speech which was delightfully humorous.

## Educational Work.

The Master then proposed the toast of "New and Prospective Liverymen and Guests." They who had become associated

with the Company for a variety of reasons had no doubt been asked what inducement there was to join. He (Mr. Unwin) suggested as a reply, "Not what I can get, but that which I can give." (Applause.) He put sentiment first. That Company had a history which was worth preserving. They were exclusive as a Company, reserving membership to those who belonged to their particular trade. Technically they said they would admit anyone who had anything to do with the making of a book, but they had used that in the widest sense. They needed a succession of men of character to carry on the traditions of the Company, men who by joining undoubtedly added to the income, which, by reason of the copyright dues, by the increase of taxation, and especially the income-tax, had been of late years steadily depleted. He urged that they as stationers should interest themselves in anything and everything that would extend the usefulness of a Company such as that. In its corporate capacity it could surely be a stronger influence than they as individuals could possibly exercise. Recently under its auspices an Examination Board for apprentices had been established and on a recent occasion 372 apprentices sat there to be examined on various aspects of their business. Medals and money prizes would be given by the Company to the successful competitors, while various organisations associated with the trade also would present prizes. The Examination Board sought to raise the status of the men of the future. Higher and technical education was being sought after none too soon, and personally he was particularly sorry to note the desire in certain quarters to curtail expense which was planned to be used for that purpose. Notably they would notice that the extension of education, which was to have been carried to the age of 16, was to be cut short at 15. Proceeding to refer to the school at Hornsey, Mr. Unwin remarked that they had a very good class of boy, and added that the point he wished to make was that those who employed or were able to employ lads as apprentices or clerks should seek from the head master of that school a chance of getting hold of a likely lad, and perhaps a better class of lad than hitherto they had been able to utilise in their printing offices. The last inducement he would mention for joining the Company was to exercise their influence so that the various branches of their trade might use that historic hall and the surrounding rooms for any purpose which would aid and serve the interests of their craft. Let them make it the recognised centre for all meetings. Something had been done already, but a great deal more could be done, and he thought the Court would be able to assist in that direction. In extending a welcome to the younger liverymen who were there that night, the Master expressed the hope that they would be a source of strength to the Company. Among the guests he mentioned Mr. R. A. Austen-Leigh, the chairman of the Livery Committee, and his personal friend, Mr. J. H. Williams, who had had an early and

long association with their house, and who reminded him that it was 50 years ago last month when he (Mr. Williams) first entered the Gresham Press. (Applause.) Among the prospective liverymen who would be admitted to the Company next Tuesday, the Master mentioned the name of Sir R. H. H. Baird—(applause)—who was well known amongst them as a master printer coming from the Sister Isle. In this connection Mr. Unwin also referred to the presence of D. P. Forman, of Nottingham, and Mr. F. Petty, of Leeds. Each of these gentlemen bore an honoured name, and he had no doubt of their election next Tuesday, after which they would strengthen the prestige and character of their Company.

Mr. R. Metchim suitably responded to the toast.

During the evening an excellent programme of music was presented under the direction of Mr. Turle Lee, the following contributing:—Misses Elsie Redfern and Hayward Webb, and Messrs. John Chandler and George Webber.

A pleasant evening concluded with a cup of coffee, which enabled friends to have a parting word with one another.

## Mr. Edward Unwin.

### A Recent Biographical Sketch.

Edward Unwin, the present Master of the Worshipful Company of Stationers, is a "genuine Cockney," and one of London's best known printers. He was born on August 4th, 1840, at Scott's Yard, now demolished to make room for the present Cannon-street Station. When two years old he had the misfortune to lose his mother. After spending his early childhood at Brighton, he was placed under the care of an aunt who had a school for young boys and girls at Burford, Oxfordshire. To those who have the privilege of Mr. Unwin's friendship, it is interesting to hear him recount some of his youthful experiences. He can remember in the early days of railways being placed in charge of the guard, with a ticket sewn in the lining of his cape stating that he was "a passenger to Oxford," and thence by coach to Burford. He also recalls that a famine in Ireland in 1848 brought many people past his school, when it was the practice to hand a slice of bread and treacle through the open widow to the hungry children.

In 1850 Mr. Unwin entered the City of London School, then in Honey-lane-market, Cheapside; three years later he went to Craufurd College, Maidenhead. Mr. Unwin states: "Whatever slight knowledge of French I possess, I owe to that school, as from the first day we were not allowed to speak English, except between the hours of four and six and on Sundays."

In December, 1854, a decision had to be made as to his future, and as in his childhood

Mr. Unwin frequently signed himself "Edward the Printer," it was but natural that he should adopt the printing craft as his career. Therefore he left school to become apprenticed to his father. Before arrangements could be completed his father died. Mr. George Unwin, then twenty-one, was in the business, and it

the same means were utilised at their new premises at Old Woking Village, Surrey.

Despite Mr. Unwin's eighty years, he is looked upon as "the young-old man of the printing industry." For a number of years he has been on the Council of the London Master Printers, acting as chairman in 1909. In 1911

**Mr. Edward Unwin.**

was to the overseer of the composing room that Edward Unwin was apprenticed in 1855. In 1860 the father's trustees sold the business to George Unwin, Edward joining his brother in partnership in July, 1865.

It is interesting to recall that at Chilworth, Surrey, Unwin Brothers were the first printing firm to adopt water as a motive power, and when those works were burned down in 1895

he was appointed treasurer of the Federation of Master Printers, an office which he still holds; he is also a trustee of the Printers' Provident Association and the Printing Trades Alliance. In addition to holding the important and honourable position of Master of the Worshipful Company of Stationers, he is vice-chairman of the governing body of the Stationers' Company's School; a governor of St.

Bride Foundation Institute; a member of the Library Committee, and of the Printing School Committee of that Foundation. Of the latter he was chairman in 1916, a progressive period in the history of that well-known London printing technical institute. It was largely through his efforts that the day classes, which were formed in 1917, were so heartily supported by the master printers of London—anticipating the operation of the Fisher Act by four years—an addition to the school curriculum which has proved more than successful.—*From Mr. J. R. Riddell's brochure on the Stationers' Company.*

## Stationers' Livery Committee.

### Annual General Meeting of the Livery Committee.

The annual general meeting of the Livery Committee of the Worshipful Company of Stationers was held on Wednesday last week at Stationers' Hall, Mr. R. A. Austen-Leigh presiding.

The committee's report was taken as read, and Mr. Austen-Leigh expressed a wish to supplement the report by getting from the Liverymen their opinions as to whether they should continue the monthly luncheons and as to whether they desired that the committee should continue to press for the direct representation of the Livery on the Court by election.

It was unanimously agreed to continue on these lines.

In regard to the formation of "business circles" where representatives of the various crafts represented in the Company could be formed amongst the Livery and their friends for the purpose of social and business intercourse, Mr. J. L. Greaves advocated the adoption of such a course, and said such gatherings where paper, printing and stationery men had got together in Glasgow and Edinburgh had met with much success.

After some discussion, in which several of the Liverymen expressed views opposed to the idea, the proposal was allowed to lie on the table.

The following committeemen were elected: Printing—Messrs. R. A. Austen-Leigh, Alfred Langley, Oscar C. Griffith; publishing—Messrs. W. S. F. MacMillan, H. D. Singer and J. L. Greaves; paper and stationery—Messrs. S. J. Sandle, C. Clifton Tollit and W. Penman; hon secretary—Mr. J. R. Riddell.

Sir Cecil Harrison moved a vote of thanks to the chairman and to the committee, and said that they were indebted to Mr. Austen-Leigh for the way he had arranged for the eminent speakers at their monthly lunches. He had also done some valuable work as chairman of the committee.

Replying to a vote of thanks accorded to him for his work as hon. secretary, Mr. J. R. Riddell said notwithstanding small attendances sometimes at their meetings they should carry on with persistence and courage.

### The Bookbinder and the Time Docket.

SIR,—Mr. Howard Hazell's reply to my letter on the above question, which appeared in your issue of the 23rd inst., fails in my opinion to touch the point. To state that the difficulties in the way of the introduction of the time docket into the bindery have been "rather magnified" is an admission that the difficulties exist, and the question between us is one of degree only.

To state that they are being largely used in various shops at the present time is no proof that the actual time for each particular job is being correctly obtained, but only approximate time, owing to the difficulties that I mentioned in my communication. This has been openly and freely admitted by employers during the various conferences held in connection with this matter, and therefore justifies my remark that the binders' opposition to the time docket in its universal application to the craft was due to the employers' inability to clearly define how the time docket could assist to more accurate cost finding.

Mr. Hazell's comments on the publishers' binder and long runs of all kinds of binding appear to me to prove my case, as here the actual cost is ascertained without the need of time recording. The output from up-to-date machinery is so well known that time dockets are unnecessary, and this is testified to by the fact that no request has been received for the introduction of the time docket from the publishers' binders in London.

Mr. Hazell's remark that anything that benefits the trade must ultimately be of benefit to the workers I cordially agree with, and it is for the reason of endeavouring to remove any differences between the Employers' Federation and our members that I should welcome the adoption of the Employers' request by our members.

Yours etc.,  
GEO. HARRAWAY,  
General President.

National Union of Printing, Bookbinding,  
Machine Ruling and Paper Workers.  
44, Blackfriars-road, S.E.1, June 8th.

BRITISH PRESSMEN IN BELGIUM.—Members of the British International Association of Journalists arrived in Ostend on Thursday, when a reception was held at the Hotel de Ville. The following day the delegates paid visits to Zeebrugge and Bruges. On Sunday they were received at the Maison de la Presse, Brussels, by the Belgium Press Association. At night a grand reception was given in their honour at the British Embassy. On Monday they were received by King Albert.

# Trade Notes.

CARDIFF University College is inviting tenders for stationery, printing and account and other books for the ensuing year.

A PRINTING factory within four miles of London is for sale as a going concern at an agreed valuation of about £13,000.

THE death occurred suddenly last week at Gosforth Park of Mr. Samuel Charles Simpson, chief of the telephone staff of the *Newcastle Chronicle*.

About midnight on Tuesday a policeman in St. Bride's-passage, Fleet-street, saw smoke coming from behind the iron collapsible gates which open on the side entrance to the Press Club. It was discovered that a quantity of paper had been soaked in oil and lighted at one corner, but the attempt to fire the building was unsuccessful.

MR. ALFRED PERCY SINNETT, 82, a well-known journalist and writer on occult subjects, whose death has occurred at 47, Ladbroke-grove, W., was formerly a sub-editor on the *Globe*, and, after being a sub-editor and leader-writer on various other London papers, was appointed editor of *Hong Kong Daily Press*, where he remained for three years. Returning to London in 1868, he became a leader-writer on the *Standard*. In 1872 he took up the editorship of the *Pioneer of India*, and some years later he began to devote himself to the study of Theosophy.

WILLS.—Mr. William Bradshaw, of Nottingham, a former proprietor of the *Nottingham Journal*, leaves £497,451 (net £493,908), £150,000 being bequeathed to University College in Nottingham; The late Sir Edward Parrott, Cumin-place, Edinburgh, editor to the publishing house of Nelson and Sons in Edinburgh, and at one time schoolmaster in Sheffield and Liverpool, left £1,661; Mr. Edmund Cole, of Swanley, and of Cole and Co. (Westminster) Ltd., printers, aged 65, left £17,510; Hon. Claude George Hay, of Gloucester-square, W., Special Correspondent for the *Daily Telegraph*, in the South of Russia, M.P. for the Hoxton Division 1900-10, left £683.

CITY PRINTERY FIRE.—Premises in Whitecross-street, E.C., occupied by the Dollen Manufacturing Co., Ltd, wholesale stationers and printers, were on Saturday the scene of a fire at which there were some narrow escapes. The brigade received a call just before one o'clock in the afternoon, and a strong force was sent from the City stations. The outbreak was on the ground and first floors of the building and consequently a number of employees on the upper floors were unable to get down the staircases. The firemen ran up ladders to the windows at the top of the factory, and, amid the cheering of the crowd, rescued a number of the girls and young women, who, beyond the alarm caused by their anxious experience, were none the worse.

MR. W. C. REICK, former owner of the *New York Sun*, who has recently been associated with Mr. Frank Munsey in the management of the *Herald* and the *Sun*, has acquired control of the *New York Journal of Commerce*.

A TELEGRAM from Tokio announces that the Japanese Government has suppressed the *Japan Advertiser*, an American newspaper, and other foreign dailies in Tokio because they printed stories concerning the provisions of the Anglo-Japanese Alliance.

A FIRE broke out on Saturday night in a waste paper storage shed in Magpie-alley, Bouverie-street, belonging to the *Daily News* and *Star*. The results might have been serious but for the prompt action of the Fire Brigade. In the circumstances the damage was almost nil, consisting of only a quantity of waste paper.

AS THE Anglo-Swedish Society, Gothenburg, intends opening a lending library of English books for its members in Sweden and for British visitors, the Gothenburg society appeals to members of the parent society in London to send gifts of books to the Secretary. Anglo-Swedish Society, 10, Staple Inn, High Holborn, W.C.1.

MR. G. F. Tomkin, of Leytonstone, has compiled, printed and published a useful brochure under the title of "The Century Calculator and Ready Reckoner." He has spent a great deal of thought and time on preparing the various tables as to comparative prices and equivalent weights, and, as the author is a printer himself, the practical value of the work is assured.

SOUTH WALES JOURNALISTS.—Mr. T. Griffiths, of Newport, was on Saturday elected chairman of the South Wales and Monmouthshire branch of the National Union of Journalists, and Mr. W. S. Collins, of Cardiff, becomes the new honorary secretary. Under the new agreement with the employers 59 members of the branch have received increases of salary amounting in the aggregate to £1,300 per annum. The membership, in which five women are included, is now 190—a slight falling off owing to transfers and members leaving journalism. The National Executive has decided that the Montgomery-Aberystwyth branch shall be merged with South Wales.

EMPLOYEES' THRIFT.—Sir Arthur Spurgeon, J.P., presided on Thursday last at the fifth annual meeting of Cassell's Savings Association, held at La Belle Sauvage, when it was stated that during the past year 98,000 six-penny Swastika stamps had been sold and 3,160 15s. 6d. certificates had been purchased with the cash received. In addition, 1,048 certificates had been sold outright to members, making a total of 4,208 certificates purchased during the past twelve months. Since the formation of the association in 1916, when the late Mr. Will Crooks was the principal speaker, it has collected over £16,953, with which £21,875 15s. 6d. certificates have been purchased, while 432,300 coupon stamps have been sold.

## FORTY-THIRD YEAR.

Copies may be purchased at the Offices, as above  
or from Messrs. W. H. Everett and Son, Ltd., news-  
agents, 11, St. Bride-street, E.C. 4.

THURSDAY, JUNE 30, 1921.

# Current Topics.

## Printing Trade Wages.

CONFERENCE was resumed on Tuesday between the representatives of the Federation of Master Printers and of the Printing and Kindred Trades Federation in the matter of the proposed wage-reductions. The difficulties encountered in arranging that the P. and K.T.F. should negotiate for the whole of the unions in the industry were fully explained, and it was decided to adjourn the conference till July 14th, the president of the employers' federation laying stress upon the seriousness of the position created by the delay in obtaining the opinions of the unions.

## The Increased Postal Charges.

NOW THAT the revised postal rates are in operation it is becoming increasingly clear how hard hit the printing industry by the increased charges made. We understand the Federation of Master Printers has already col-

lected very striking evidence of the serious detriment to printers wrought by the abolition of the halfpenny printed matter rate. On another page we give further criticisms and protests showing with what widespread concern this abolition is viewed by the business world in general. A very disconcerting feature of the new printed matter rate is the further handicap it imposes upon British printers in respect of Continental competition. When one finds—as we have seen for ourselves—that printers in this country dispatching direct advertising matter to inland destinations are driven to have it posted *via* Belgium in order to take advantage of the more favourable postal conditions provided on the Continent, one cannot but reflect upon how strong an aid this fact may be to those Continental printers who are now bidding for British trade.

## The Cost of Printing.

A STRONG expression of opinion as to the need for the reduction of the cost of printing is made in *The Times* by a letter over the signatures of various officers of learned societies and eminent librarians. They write that they "desire to impress on the printing and publishing firms of the United Kingdom the danger which they are incurring by enforcing the recent enormous increase in the price of books, more especially books of the more serious and specialised sort, and in the cost of printing generally." They continue: "It is not only to the public detriment, but clearly also to the detriment of the printing and publishing trades, that learned societies should be forced to cut down or suspend altogether their output of proceedings and monographs, and that libraries should have to reduce to a minimum the number of books which they purchase. It is obvious that if books are bought in ever-decreasing numbers, publishers will find it useless to print anything, however valuable, which does not appeal to the unlearned public. And if societies are unable to continue their series of publications there will be less work for printers. More money cannot be raised either by societies, whose members mainly come from those professional classes which the war has hit most hardly, or by libraries which depend on private funds drawn from those same classes. We are aware that material costs more, and that printers' labour is now remunerated on a scale which has forced publishers to raise all prices. But the general economic conditions which led to these phenomena are beginning to change. The existing scale of book prices means the

cessation of book-buying. Unless novels and school books are to be the only output of the future, the present state of things must come to an end. The remedy lies with the trade; the buying public has come to the end of its resources, and refuses to be exploited any longer."

## Personal.

THE Prime Minister is to present the national testimonial to Mr. Beriah Gwynfe Evans, the veteran Welsh journalist, on the chairing day of the National Eisteddfod at Carnarvon.

AMONG prominent gentlemen in the printing trade who supported Mr. Edward Unwin (the Master) at the Court Dinner of the Worshipful Company of Stationers at the Stationers' Hall on Tuesday, were Sir C. R. Harrison, Sir J. E. Hodder Williams, Mr. J. J. Keliher, Mr. E. J. Layton, Mr. R. A. Austen-Leigh, Mr. H. Cooke, Mr. H. C. Bolton, Mr. J. R. Riddell (hon. sec. of the Livery Committee), Mr. A. Langley, Mr. R. S. C. Caslon, and Mr. E. C. Keliher.

SIR THOMAS G. JONES, who received a knighthood in the last list of Empire Honours in recognition of his sterling services to the country during and after the war as Director of Ship's Stores and Director of National Kitchens, is proprietor of the *Porteateil News*, which he founded.

MR. W. M. DAVIES, proprietor of the *Barry Herald*, is the subject of an illustrated biographical sketch in the "Lloyd George Liberal Magazine."

HAVING recently had conferred upon him the coveted decoration of the Legion of Honour, M. Henry D. Davray, hon. sec. of the Anglo-French Society, was on Thursday entertained at a complimentary dinner at the Café Royal, at which Viscount Burnham presided, and many influential members of the British and French literary world were present. Mr. R. A. Austen-Leigh was among the guests.

MR. GEORGE H. GRUBB, who has been associated for many years past with the publishing house of G. P. Putnam's Sons, and who has, for some time, been a director of the London company, has now been elected a director also of G. P. Putnam's Sons, of New York. Mr. Grubb has in his hands more particularly the supervision in England of the relations of the American concern with British authors and publishers.

## Printers Visit Isle of Wight.

The annual outing of the firm of Edmund Evans, Ltd., of Stepney, the well-known high-class colour printers, took place on June 25th, when a party of some 90 people went for a trip round the Isle of Wight. The younger members of the firm were taken to London Bridge by special omnibus, and all were in good time for the 6.35 a.m. to Portsmouth. Several of the male employees brought their wives and, with carriages reserved for the party, much merriment ensued on the journey. A special steamer awaited them at Portsmouth to convey them to Ventnor for lunch. Here a splendid repast was served at the Hotel Metropole, where, waiting to greet them, were Mrs. and Miss Evans (mother and sister of the directors of the firm) who reside in Ventnor. After the toast of the King and that of the firm, one of the smallest members presented a bouquet of flowers to Mrs. Evans with the good wishes of all the staff, who were very proud to have the honour of her and Miss Evans' presence that day. Following that, a short and suitable speech was made by Mr. W. H. Welford, foreman of the works, who ended by saying that Mr. E. Reilly (who made a very able steward) was anxious also to make a speech. This, Mr. Reilly said, he was *not* anxious to do, but had a duty to perform, and it was, on behalf of the firm, to ask Mr. E. Wilfred and Mr. Herbert Evans to accept a small gift in token of their appreciation and esteem, in the shape of silver cigarette cases, suitably inscribed. As was intended, this little presentation came as a complete surprise to both, and in turn they thanked the members amid much cheering and goodwill. All joined heartily in singing "For he's a jolly good fellow," and Mr. A. J. Wild, a very old and respected member of the firm, called for cheers for Mrs. and Miss Evans, Mrs. Wilfred Evans and Miss Gwen Evans, who were also present. From there they proceeded to Cowes, where all had a jolly tea at the Royal Marine Hotel and afterwards assembled outside where a photograph of all the party was taken, which should make a very fine group. Then on to Portsmouth for the 7.5 train for London, thus completing the journey round the Island. The weather was perfect and the whole day was a complete success, thanks to the able management and forethought of their respected director, Mr. E. Wilfred Evans.

INTERNATIONAL TRADE CONFERENCE.—The directors and officers of the International Chamber of Commerce, who are visiting London to participate in a conference week, were entertained to luncheon at Printing House-square, by the proprietors of *The Times*. Mr. H. Wickham Steed presided, and the distinguished assembly included representatives of the Chambers of Commerce from Great Britain, U.S.A., the Netherlands, Belgium, France, Italy, Sweden, and Denmark.

**BARROW NEWS AND MAIL, LTD.**—Mortgage on 16, Park-avenue, Barrow-in-Furness, dated June 16th, 1921, to secure £600. Holder: Mrs. A. McCulloch, c/o The London Joint City and Midland Bank, Ltd., Ulverston.

THE Allied Commission of the Rhineland have seized the *Wahre Jacob* and the *Ulk*, both satirical papers, for three months, because of an offence against the occupation troops.

## The New Postal Rates.

### Further Protests and Criticisms.

The new increases in the postal rates have not, of course, come into force without still further protests from the representatives of British trade.

### British Traders' Censures.

In a letter addressed to the Postmaster-General, the Federation of British Industries remarks: "These increases are being imposed at a time when every other business in the country is being forced to reduce its costs and its prices, in order to meet the economic position. The Federation finds it difficult to understand why a business which only differs from others in that it is conducted by the Government, and enjoys the advantages of monopoly, should be unable to follow their example." The Federation follows up the criticism with the assertion that before changes of so serious a nature are undertaken provision should be made to satisfy the community that a reasonable standard of efficiency and economy has been attained in the Post Office.

At a recent meeting of the Leeds Chamber of Commerce, Mr. Edgar Lupton (president), who presided, in referring to the increased postal rates described them as another burden on the community, and especially on traders. The printing trade, he continued, would probably be affected more than any other. A resolution was passed which regretted the proposals as likely to diminish revenue; adversely to affect trade and thereby to increase unemployment; regarded the time as inopportune for placing barriers in the way of traders, and urged retrenchment by economy in management rather than by increase of prices.

Speaking at the last meeting of the Wakefield Chamber, the president (Mr. Duncan Bailey) said that Government had been attacked *ad nauseam*, but the Government still went on spending. The latest was that it was going to increase postal charges.

### Advertisers' Protest.

The Incorporated Society of British Advertisers has passed a resolution strongly protesting that the new postal rate on inland printed papers will injuriously affect those businesses which have been built up by mailing methods, and will lead to a considerable diminution of the volume of postal publicity, with a consequent decrease in the revenue derived from this source, thus defeating the prime object of the department.

Messrs. Smith Dalby-Welch, Ltd., postal advertising contractors, of Gresham House, Old Broad-street, E.C., are forwarding to the Postmaster-General a petition signed by the largest users of the halfpenny rate, now to be abolished. Firms who wish to add their names should communicate with the above address at once. Claiming to be the largest

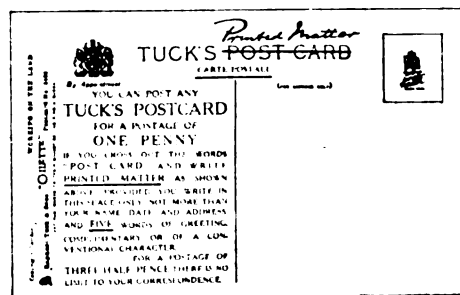

users of postage stamps in the United Kingdom (about £200,000 per annum), Messrs. Dalby-Welch foresee that the abolition of the halfpenny printed matter rate will have exactly the same effect as the abolition of the cheap sample post, viz., a decrease of 90 per cent. in the number sent out. Even in this short time, they say, they have had orders cancelled amounting to two millions. "Continental post offices," they add, "do all they can to help commerce; British postal authorities to-day seem bent upon discouraging trade."

Mr. W. H. Burchell (hon. secretary of the Central Districts Branch of the L.M.P.A.), is continuing his efforts to get some amelioration from the Postmaster-General in regard to the hardships created by the new postal rates. His activities in this direction have been backed by several influential men in the trade, and he would be pleased to receive further assistance from others upon whom the new burdens have fallen with much weight.

### The Increase on Post Cards.

The picture post card section of the printing trade is, of course, feeling particularly sore about the very damaging handicap which the three-halfpenny rate is inflicting on their business.

Sir Adolph Tuck, of Messrs. R. Tuck and Sons, Moorfields, London, E.C.2, requests post card dealers to report if they have experienced a falling off in the sale of picture post cards as against the same period last year, giving the extent or percentage of the decrease. He would also be glad to have views of customers with regard to this increase. Sir Adolph's firm is sending to all their customers a post card for exhibiting in their windows

which gives instructions how to treat a Tuck or any other post card in order to secure its postage at the 1d. rate. Accompanying is a reduced facsimile of this card. It should be added, however, that the Post Office authorities interpret words "of a conventional character" as excluding any message which either conveys or asks for information. While you may write, "With compliments and good wishes," "Arrived safely" will be surcharged. It was in accordance with this principle that the post card addressed to Mr. Kellaway bearing the inscription "You are a silly blighter" was surcharged a penny—the authorities no doubt regarding this message not as being "of a conventional character," but as "conveying information."

## Trade Union Matters.

AN advisory committee has been formed consisting of the heads of the various departments and representatives from each department to deal with the internal working of the Withy Grove (Manchester) Section of Messrs. Hulton and Co. There are 1,500 employees represented by 14 unions. Departmental committees have been set up and any special business will be referred to the quarterly meetings, the first of which will be held on July 5th.

THE *Journal of Commerce* (Liverpool) has granted a night off per week with pay to all its night workers. The associated news chapel are endeavouring to bring this concession into general practice.

A NEW branch of the Typographical Association has been formed at Carmarthen (Wales).

A COMMITTEE of the T.A. has been appointed to formulate a scheme for grading the rates of pay of linotype and monotype operators based upon the increased skill required in the use of multiple founts and double matrices and the additional skill required to look after the mechanical side of these machines.

**T.A. HALF-YEARLY REPORT.** — The half-yearly report of the Typographical Association discloses a gain in membership of 390, making a total number of 31,000. The accounts show a gain of £14,445 on the half-year, and the superannuation fund has a total value of £55,633 or a reserve value of £70 per superannuitant. The chief amounts of expenditure were: Strike, £4 148—an increase of £3,261; funeral, £1,474; out-of-work, £9,983—an increase of £6,303; superannuation, £15,793; and incapacity, £909. Deputations took £1,390; conferences, £912; printing, etc., £2,364; and salaries and bonus, £2,277. The administrative expenses have risen by £2,073, making a total of £8,822 against £6,749 last half-year.

A DISPUTE has broken out at the firm of Messrs. C. S. Yeates, electrotypers and stereotypers, of 12, Hatton-wall, Hatton-garden, E.C., and has involved the withdrawal from work of the employees. We understand that the dispute has arisen over the question of short time and the interpretation of agreements.

THAT popular annual, "Printers' Pie," has made its appearance, and as usual is full of interesting and amusing reading and illustrations by prominent writers and artists. "Printers' Pie" is published by The Pie Publications, Ltd., at 6, Great New-street, London, E.C.4, and is obtainable at all booksellers' and bookstalls, price 2s. net.

## Gazette.

### A WORD OF CAUTION.

In giving the official Gazette information, it must be distinctly understood that we take official records as we find them, and accept no responsibility for inaccuracies, while, as an almost invariable rule, the facts will be found correct. We advise our readers, before forming hasty judgment, to consider that there may be in each case satisfactory explanation which does not appear on the records.—Ed.]

### ENGLAND AND WALES.

#### PARTNERSHIPS DISSOLVED.

#### THE BANKRUPTCY ACT, 1914.

##### RECEIVING ORDERS.

Martin, Ivor Hamilton, 80, Upper Thames-street, London, printer, June 23rd. Public examination, September 20th, at Bankruptcy-buildings, Carey-street. Trehearne, David, High-street, Rhyl, stationer, June 22nd.

## Wages in the Paper Trade.

### Employees Oppose Reduction.

#### Result of the Ballot.

The result of the ballot taken among employees in the paper trade on the new terms proposed by the Employers Federation of Papermakers is to reject the offer made.

The voting by the paper section of the National Union of Printing, Bookbinding, Machine Ruling and Paper Workers was 8,397 against acceptance, and 3,370 for, majority against, 5,027.

Members of the Amalgamated Society of Papermakers voted as follows: For acceptance, 862; against, 665; majority for, 197.

The net majority against accepting the new terms proposed by the employers is thus 4,830, out of a total registered vote of 13,294.

It is understood, however, that the poll is a light one and that many ballot papers were not returned.

FERGUSON'S "CEYLON DIRECTORY," just to hand, is a bulky volume of some 1,900 pp. containing a mine of information relating to the varied activities of the island. Much care and attention have been given in its compilation and the statistics and other matters contained in the "Directory" are arranged so as to be of easy reference.

## Technical Education in Edinburgh.

The printing classes held in Edinburgh under the auspices of a combined committee representing both master printers and men are definitely taking the form of a School of Printing. In the *Printer*, a little publication of the Edinburgh Printing and Allied Trades Continuation Classes, Principal Laurie of the Heriot-Watt College observes that the printing school in Edinburgh should not only deal with printing, but all that is necessary to teach the craft of book production, lithography, photo-process, bookbinding, stereo and electrotyping, and other connected arts should be included. He throws out a caution against too much machinery in the training of the students. All machine work, he observes, is based upon handicraft, and is merely a device for saving time, and the thorough understanding of the machine is, therefore, only possible to those who have mastered the trade as a craft.

As an indication of the diversity of training of the various branches of the art carried on at the school an exhibition was opened on Thursday at the College of Art. In the course of the opening proceedings Mr. Robert Wilson, of Messrs. Pillans and Wilson, the chairman of the Joint Technical Advisory Committee, under whose supervision the classes are carried on, made a statement regarding the work of the College of Art and the Heriot-Watt College.

Principal Laurie, in the course of a general statement of the work, indicated some of the lines on which they would like to see it developed.

Mr. M'Nally commented on the experiment that had been made of starting day continuation classes in printing in Edinburgh. Great success had attended this experiment, which, he believed, would develop to be of very great value indeed.

Mr. Morley Fletcher said the members of the Committee would see a distinct improvement in the quality of the work over that of last year. When one realised that those who had done the colour studies had only been there two years, and how little opportunity they had had previously, they would agree that the results were remarkable. One felt that there was a school of printing actually in being which showed great promise of vitality for the future.

At Sotheby's, on Wednesday of last week, a further portion of the famous collection of illuminated manuscripts and early printed books belonging to Mr. Henry Yates Thompson were sold, several four-figure prices being realised.

Replies to Box Nos. to be addressed to the Offices, "BRITISH AND COLONIAL PRINTER AND STATIONER," 58, SHOE LANE, LONDON, E C.4.

### Mr. C. W. Scotcher.

MUCH regret will be occasioned among his friends in the printing trade by the death of Mr. Charles Wm. Scotcher, of No. 80, Balfour-road, Ilford, which occurred at the London Hospital, on the 18th inst., following an operation.

The funeral took place on Wednesday of last week at Ilford Council Cemetery, the preliminary service being held at St. Clement's Church, where the deceased and his family were regular worshippers.

Mr. Scotcher, who was 60 years of age, and a native of Clare, Suffolk, has resided at Ilford for over a quarter-of-a-century. He had a thorough knowledge of the printing trade. After serving his apprenticeship in a provincial office, he passed in succession through some of the best known London firms, gaining valuable experience in estimating, charging, and general management. He has represented Messrs. Usher and Walker Bros., of 31, Bouverie-street, E.C., for many years, and his duties took him to printing and newspaper establishments over the greater part of England, and especially in the Eastern Counties. His ever cheery manner and uniform kindness and courtesy won him hosts of friends. He was a well known Freemason, a member of the East Anglian Society in London, and one of the first members of the United Kingdom Commercial Travellers' Association.

### Mr. H. Alcock.

WE regret to announce the death of Mr. H. Alcock of Messrs. James Brandwood and Co., small ware manufacturers, 21, Saville-street, Manchester, which took place suddenly at his residence, "Thurnby," Westwood-avenue, Timperley, on the 19th inst. The deceased was well known to printers and bookbinders, having been connected with the firm for the past 15 years. The interment took place at the Stretford Cemetery on the 23rd inst. Both principals of the firm are now dead, the late Mr. H. Richardson having passed away on March 7th last. The business is being carried on for the present by Mr. T. Alcock, a brother of the late principal, who has been with the firm for some years.

### Mr. Anthony Friston.

THE funeral took place at Cardiff Cemetery on the 21st inst., of Mr. Anthony Friston, chief of the process department of the *South Wales News and Echo*, who died suddenly on the previous Friday from arterio-sclerosis and apoplexy, aged 60. Deceased joined the staff of the associated papers nearly forty years ago as an artist, and was held in high esteem by his employers, Messrs. D. Duncan and Sons, Ltd., and his colleagues generally for his ability and his engaging disposition. The firm

was specially represented at the funeral and sent a floral token, and each department—commercial, literary and technical—sent wreaths and members of their staffs to testify to their regard for their old colleague. Mr. Friston, who leaves a widow and one son, had been in the doctor's hands since last October, but had recently returned to his duties, and was at the office up to ten o'clock on the night before his death.

## A Paper Criticism.

### Effect of Sodium Sulphite on Ink.

Manufacturers of poster paper will be interested in the experiences of a printer which are detailed by "R. D. C." in the *Circular* of the Federation of Master Printers. He writes as follows:—

We recently printed a sixteen-sheet double crown poster having a chrome yellow background which covered the greater part of the four sheets 60 in. by 40 in. M.G. paper. When posted it was noticed that this ink, which was guaranteed permanent by a firm of ink makers of repute, quickly faded, but that the fading was inconsistent. We found that a bill posted on to a wall of the gable end of a building was for all practical purposes permanent, but where a bill was posted on to a wooden hoarding the colour went very rapidly, and more particularly in vertical lines corresponding to the joints of the planks forming the hoarding. It was also thought that the ink went more rapidly in wet weather than in dry.

Our first idea was—perhaps not unnaturally—that the ink was at fault, but the ink makers carried out tests and experiments which proved, without any doubt in our minds, that the paper was at fault.

The following are the details of the experiments:—In the first instance the ink was smeared on to two separate pieces of plate glass. One was locked away in a drawer and the other exposed to light, the result after exposure being that the latter showed no variation to the former. Subsequently the same ink was put on to two separate pieces of the paper used for the poster, one piece being

locked in a drawer and the other exposed to light, and on comparison at a later date it was found that only a very slight alteration had taken place. Another strip of the paper, after being inked, was damped at the back, and on exposure to light for a comparatively short time it was observed that considerable fading had taken place.

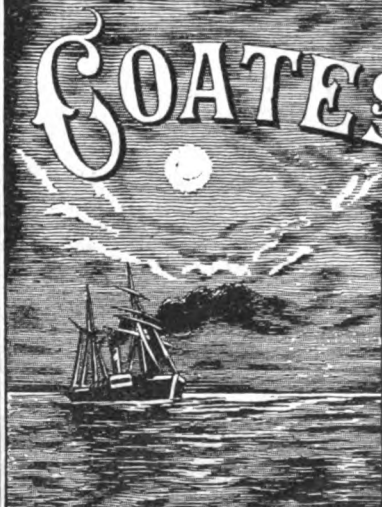

On comparing this experiment with the actual posting of the bills, we find that in each case, firstly, where water has not come in contact with the uninked surface because it was unable to do so owing to the fact that the bill was posted on to, say, a brick building, and, secondly, where the back of the paper had been purposely kept dry, no alteration takes place.

We also find that where a poster is exhibited on a wooden hoarding, and can consequently become wetted either by absorption of water from the wooden hoarding or, as is more probably the case, from rain water which is driven through the crevices from the back of the hoarding, and, in the experiment, where the trial strip is purposely wetted at the back, the same fading takes place.

We are told that this is due to the fact that in the process of papermaking the sodium sulphite which is used in the bleaching of the pulp has most probably not been completely washed away, the result being that when moisture such as rain water comes in contact with the paper, sulphurous acid is formed, which sets up an action on the ink, thereby bleaching same. It might be mentioned that the paper cannot be wetted from the front, because it is wholly protected by ink and the billposter's paste.

It was also found that the paste contained nothing which could adversely affect the ink.

## Some Notes on Dellagana's.

### The Parent House of Stereotyping and the Oldest of Printing Block Makers.

Although there is no record of the actual date when Dellagana's opened the first London trade stereotyping foundry in Shoe-lane, it is believed to have been about the year 1842.

Bartolo Dellagana and his brother Giacomo were Italian-Swiss, and these brothers, whose Christian names were anglicised into Bartholomew and James, were the pioneers of modern stereotyping and the machinery for stereo-making. Bartholomew Dellagana, by introducing a flexible matrix material in place of the plaster of Paris moulds which were previously used for duplicating type, made it possible for stereos to be cast to the radius of the cylinders of rotary printing machines, and so took the first step which has led to the marvellously rapid production of the modern news press.

The firm, under the name of J. and B. Dellagana, carried on the business of stereotypers and stereotypers' machinists for many years, opening further foundries as the trade developed at Fetter-lane and in Bishopsgate-avenue, Camomile-street.

On the death of Bartholomew Dellagana the business was converted into a joint-stock company, and under its present title of B. Dellagana and Co., Ltd., has traded for the past 38 years. It is interesting to mention that the original chairman of directors, Mr. John B. Ball, is still the chairman of the com-

pany. The managing director and secretary Mr. George E. Holloway, has been with the company over 30 years, and several members of the staff have a long record of service.

#### Origin of "Flong."

In connection with the flexible matrix above referred to, the name of "flong," by which the material is now universally known, had a curious origin. There is a popular open jam or fruit tart, a sweet dish in favour on the Continent, and well known on the menus of restaurants under its French name of "Flan." When Bartholomew Dellagana produced his experimental papier-maché sheets their resemblance to the pastry caused him to refer to them as "my flan." The French pronunciation of this word was modified by the English accent into "flong," and thus an addition was made to our English technical vocabulary.

As in the case of stereotyping, the history of the adaptation of electro-deposition to the making of printing plates is obscure, but that Dellagana's were one of the earliest firms to supply electros to the printing trade seems well established. It is believed that one Victor Morel, in Fetter-lane, had a plant principally for making electro duplicates of medals. At all events Morel's business and premises were taken over by Dellagana's, and remained a branch of the firm until the premises were destroyed by fire some years ago.

### The Firm's Development.

The company opened branches in Manchester and Liverpool, and when zinc-engraving and subsequently half-tone (then known as the Meisenbach process) were introduced, departments were added for their exploitation. At the present time Messrs. B. Dellagana and Co., Ltd., have works at 11, Shoe-lane, and 14, Bishopsgate-avenue, Camomile-street, London; at 62 and 62A, Greengate and Dawson's Croft (process works), Salford,

ments. The company has also been honoured by being called in to advise on the most suitable methods for printing plates for State purposes.

Nearly 30 years ago the Dalziel Fine Art Hard Metal Stereo process was introduced at a printing exhibition at the Agricultural Hall. A license as a trade house for the supply of these stereos to printers was acquired by the company.

The old stereo plaster moulding and

Head Office in Shoe Lane, London, E.C.

Manchester; and at 35, Atherton-street, Liverpool (which in 1914 was amalgamated with the business carried on by Mr. J. R. Denby, and now trades as Dellagana and Denby, Ltd.), while the secretary's office and board room are at Montague House, Stonecutter-street, E.C.

For about 50 years Dellagana's had a stereo foundry in the Bank of England for the printing of dividend warrants, etc., and they still supply, as they have for a long period, the printing plates for other Government depart-

dipping pots (used for music plates for years after "flong" was in general use) have long disappeared, as have the Smee batteries for deposit of the copper electro shells and Dellagana's works are now equipped with the latest depositing dynamos—powerful hydraulic presses—gas-heated metal furnaces and finishing machines of the latest British and American type. Thus Dellagana's claim to make printing blocks by every known process, covers the most modern as well as the oldest established methods.

### Some Recent Improved Methods.

Amongst the most recent developments the use of deposited nickel instead of copper for certain classes of plate and of hard metal

Corners of the Studios.

### The Industry To-day.

The days when Dellagana's cast the stereotypes for the daily and evening newspapers in London, as well as in Manchester and Liverpool,

and had a long list of periodical publications amongst their regular jobs, have long gone by, but through all the vast changes that have come about in 80 years of printing evolution, the House of Dellagana still maintains its position not only as "the oldest and largest in the trade," but as one of the most progressive, adopting every real improvement that comes along.

Dellagana's have always taken an active part in the organisation of the block-making trade, a project which was first taken in hand about 28 years ago. Mr. Holloway has attended practically every general meeting of the trades, and every committee meeting of the executive of the Stereotyping and Electrotyping Employers' Federation and its predecessors, from the first to the most recent, as well as the joint

stereos (nickel plated or otherwise) have been conspicuous. Dellagana's have two specialties of this class which have the registered titles of "Dellanick" and "Steeletto." "Dellanick" is a deposited shell of an alloy of nickel and steel deposited upon the mould in place of copper as in electrotyping. This gives a printing face very sharp and hard and adapted to the two extremes of printing papers—highly finished "art" paper for fine screen half-tones, of which the extreme sharpness of the plates is a special feature, and for cardboard and coarse or harsh surfaces for which the great hardness of the metal contributes to durability. "Steeletto" is a printing surface of the nickel steel above mentioned applied to a hard metal plate, cast in a plaster mould instead of the usual "flong" matrix. The metal used for "Steeletto" is made to a special formula which gives it toughness and overcomes the brittleness and liability to break where pinned to the mounts or under pressure of the printing machine, which was a defect of the original hard metal stereos. "Steeletto" by reason of its economy and general utility as a substitute for electros is now well known and largely used by advertisers and for general commercial and news-print.

The Manchester House.

board meeting of the Federation with the Stereotypers and Electrotypers' Society. This joint board (an anticipation of "Whitley Councils") has existed since 1911, and has been of real value to both parties, preventing any rupture throughout the troublous times since the Armistice, and

## Paper Standardisation.

What is described as the first step toward the standardisation of the paper industry has been taken by the American Writing Paper Co., which is standardising its own lines by cutting out every overlapping and short run grade. Thus there are standardised seven bond papers of rag content, two bond papers of wood fibre, five ledger papers, four writing papers, four linen papers, five cover papers, nine book papers, four offset papers, five bristol boards, three drawing papers, two mimeograph papers, three blue print base papers, five wedding and papeteries, six basic specialities, one complete announcement line, one complete line of hand-fashioned papers and numerous technical papers. These lines will be distributed through the warehouses of its paper merchants, who will make the advantages of paper standardisation available to printers. Standardisation, it is claimed, makes it easier for the paper merchant to satisfy the needs of customers, facilitates turn-overs and thereby increases profit and decreases cost of distribution. For the printer, lithographer and stationer standardisation means ready accessibility of supply and quick service—faster turnover—a stable basis of quality and values. For the ultimate user of paper and printing it means lower cost and more efficient service.

Commenting on the scheme, the *American Printer* points out that the war gave an impetus to the elimination of unnecessary lines in manufacture, and progress has been made in the printing industry since then. The substance number was adopted for papers, basing the weight of all sizes on one size in each class. In book papers the 25 by 38 size furnished the base weight. The Dexter Folder Co. then issued a series of diagrams showing how a variety of folds could be made from a comparatively few sizes of paper. The possibilities of the hypotenuse oblong were especially exemplified. It has been acknowledged that the printing business has an unnecessarily large variety of paper sizes and brands. The United Typothetæ and other organisations have committees appointed who are endeavouring to bring about simplification along these lines. This latest move is in the right direction. The hope is expressed, however, that quantity demands will not be the only determining factor in paper production. There is the growing class of printer doing the finer and more exclusive work who desires papers of a certain colour, texture and quality who should be encouraged for the good of the business.

**Bishopsgate Avenue Branch.**

it is hoped will contribute to the reasonable resettlement of conditions so that there may ensue that permanent peace which is the urgent need of every industry, and indeed of the whole world.

**PAPER PRICES AND CHEAP BOOKS.**—With the lower prices of paper, publishers are aiming at issuing books at something near pre-war prices. It is the view of *Book-Post* that there will be something like a boom in 2s. net novels immediately following the conclusion of the coal trouble. These books will be produced in superfinics no larger than the old "Sevenpennies," but they will be on less bulky paper, and the binding will be in some material other than cloth, but durable enough to survive on a bookshelf.

**LONDON'S SMALLEST PAPER.**—The smallest newspaper in London is called the *News Summary*. It consists of one foolscap sheet printed by Roneo, and is circulated on bicycles every morning to subscribers only. It consists of an epitome of the world's news, from the morning's newspapers.

# London Fair and Market.

## Some Stationery Exhibits.

At the London Fair and Market, which opened on Monday at the Royal Agricultural Hall and is to run until the 15th inst., there are a number of exhibits which have some special interest for those who do business in paper and print. Neither the printer nor the papermaker, however, is there to give a general display of his capabilities, but rather to show what he produces by way of contribution to the merchandise of the retail stationer, the fancy goods dealer, the toy dealer, the user of advertising novelties, and in general to the very large circle of different trades represented at this exhibition.

Appended are, in alphabetical order, brief notices of some of the exhibits.

**A.G.P. (AGENCE GENERALE, PARIS).**— This Continental house shows some attractive lines of French boxed stationery, and an interesting exhibit is a machine for making embossed show cards.

**ALLDAY, LTD. (Birmingham),** have a good showing of various printing items, including toy books, catalogues, show-cards, posters and general colour printing.

**ART AND HUMOUR PUBLISHING CO., LTD. (London and Birmingham),** exhibit picture post cards and greeting cards, together with calendars and other stationery items.

**G. BAKER AND CO. (Manchester),** specialise in fancy papers of various kinds, including end-papers.

**BRITISH CELLULOSE AND CHEMICAL MANUFACTURING CO., LTD. (London),** include in their exhibit showcards, etc., in which printed matter is given a protective covering of transparent celluloid.

**BRITISH FINE ART SOCIETY (Hammersmith),** specialise in the production of oil painting facsimile colour prints.

**DEAN AND SON, LTD. (London),** show chiefly children's books of various kinds.

**DEAN'S RAG BOOK CO., LTD. (London),** make a speciality of their well-known non-tearable children's books.

**DENNISON MANUFACTURING CO., LTD. (London),** at two separate stands demonstrate their tags, crepe paper goods and many other small stationery items.

**DRAYTON PAPER WORKS, LTD. (Fulham).**— The well-known Hopking's counter holder and cutter for rolled wrapping paper is given precedence at this stand, but there are also indications of the firm's productions in general stationery, bag-making, box-making and bookbinding.

**EERSTE NED EL KASTRANDENFABRIK (Schiedam, Holland),** show shelf paper, d'oyleys, etc.

**GALE AND POLDEN (London)** make children's books the chief exhibit.

**GUMMED PAPER MANUFACTURING CO., LTD. (Marborough, Leicester),** have a good showing of their gummed specialities and give promi-

nence to their well-known "Tiger-Tiger" sealing machine.

**HAZELL, WATSON AND VINEY, LTD. (London),** exhibit a selection of pen nibs and fountain pens.

**C. H. JOHNSON, LTD.,** include account books, pocket books, envelopes, etc., in their exhibit.

**SAMUEL JONES AND CO., LTD. (London),** make an effective demonstration of gummed tapes, sealing machines, music-mending tapes and similar items.

**KELLER-DORIAN, SILVIN AND CO. (Lyons),** have an interesting exhibit of fancy papers, etc., including book-cover materials and end-papers.

**LIVERMORE AND KNIGHT, LTD. (London),** include in their show of fancy goods a number of calendars and pads.

**METAL POWDERS, LTD. (London),** show a good range of gold, bronze and aluminium powders of interest to printers.

**RUDD AND CO. (London),** make an effective showing of children's books and the like.

**ARTHUR SANDERSON AND SONS, LTD. (London),** show leatherettes and special papers suitable for bookbinding, box-making, show-cards, etc.

**SANDLE BROS. (London)** have a fine display of miscellaneous stationery items, including envelopes, notepapers, account books, Christmas cards, etc.

**SOLOMON AND WHITEHEAD, LTD. (Birmingham),** make an impressive exhibit of a wide variety of stationery, with some good examples of colour printing.

**JAMES SPELLER AND CO. (London)** emphasise particularly pocket books, account books, duplicating books and the like.

**VAUGA AND CO. (Geneva)** display some attractive lines in picture post cards, box tops, and other fine art productions.

**GEORGE VICKERS (London)** have a large showing of writing pads, boxed notepaper, and wholesale stationery generally.

**FRANK A. WEST (Leicester)** include paper and stationery among other exhibits.

**ENGLISH PROGRESS IN KRAFT WRAPPING MANUFACTURE.**—In connection with a recent reference to the production of Canadian coloured kraft papers, in which it was stated they are now for the first time produced within the British Empire, the progress made by English mills must not be overlooked. We remember receiving some excellent M.G. kraft some ten months ago from Messrs. P. Garnett and Son, Ltd., of Wharfedale, Otley, Yorkshire, which prompted us to say at the time that it was equal to the best Swedish make. Colour, finish, rattle, look-through and tearing strength were all that could be desired. We also stated that the mill referred to "is handling coloured sealings, striped and plain, and here again we are up to the best Scandinavian standard at a price lower than the foreigner can offer his product." It is certainly encouraging to know that English kraft paper is able, in point of quality and price, to meet on fair conditions foreign competition.

## "Victory" Printing Machinery.

### A Progressive Manufactory.

The *British and Colonial Printer and Stationer* of September 23rd, 1897, contained a very complete and detailed description of the engineering works and machines built by the Victory Web Printing Machine Co. Ltd. Some 20 years earlier the first press to print

**Light Milling Department.**

and fold newspapers at one operation had been supplied to the *Glasgow Daily Mail*. This pioneer machine was created by the inventive ability of the late Mr. G. A. Wilson, and it was appropriately called the "Victory." From that date to the present time the name "Victory" has occupied a prominent position in the newspaper world. Machines of all sizes from the single roll to the sextuple press were built in the Edge Hill works under the able direction of the inventor and supplied to important offices in Great Britain, Ireland, Denmark, Russia, Germany, Spain, South Africa, Australia and New Zealand.

Late in 1915 the work of peace gave way to the demands of war, and from that date until the Armistice the "Victory" plant was devoted entirely to the production of munitions, an occupation that left the plant in fit condition for the scrap heap and made the need for new machine tools imperative. This necessary change was effected last year, and the "Victory" machine in future will be built in the new premises at Birkenhead under the most favourable conditions.

The new works are more modern and extensive than the old premises, and the new plant is the very best obtainable. A glance at the illustrations will convey a general idea of the spaciousness of the works and the completeness of the equipment.

The motive power is electricity, the lighter tools being driven in small groups by independent motors through line shafting that runs in ball bearings, the heavy tools being driven by direct-gear electric motors. This renders the plant very elastic, and confines any stoppage due to breakdown to a small

section. A very complete and perfect system on the technical side ensures extreme accuracy and economy in production and keeps so full a record that every piece supplied can be replaced at a later date by quoting the reference number which is on the original.

On the commercial side the costing system is equally exact, the actual time expended on every item being recorded by the Periodograph.

The works and equipment in every way are thoroughly up-to-date and have been declared by competent authorities to be second to none.

The firm have widened the range of their products, and in addition to their well-known specialities are making many machines of interest to the general printer, the most important being machines for routing, flat and edge planing, making stereo blocks and plates, paper slitting and re-reeling, punching, nipping, creasing and cutting machines for paper, proof presses, and last and most important the celebrated "Kidder" presses. It is the latter that gives rise to the company's present name, Victory-Kidder, and to the new trade mark "VK," a symbol that is indicative of superior merit.

The 1921 model "Victory" press embodies all that experience proves to be best in machines for the production of newspapers and

**Turning Department.**

magazines, and every item of the auxiliary plant has been remodelled to conform with the most exacting demands.

The company is also the European agents for the American Numbering Machine Co.

MR. H. N. HARRISON, of Messrs. Thomas and Sons, Ltd., manufacturing stationers, Queen-street, London, has presented to the Library of the Papermakers' Association a copy of a printed book of "Instructions to be observed by the officers employed in the Duties on Paper." It was printed in London in 1729, so that the book is nearly 200 years old, and bears all the quaint characteristics of that period.

**AN Advertisement is always working.**

## Trade Union Matters.

At a meeting on Friday of the recently-formed Joint Industrial Council of the Paper-making Industry it was found possible to come to an agreement in regard to the question of wage-reduction which has been in dispute between the employers and the unions. The result is that a unanimous recommendation to accept the terms is being put forward by the representatives of both the employers and the workpeople. This is a result upon which the new J.I.C. can be most heartily congratulated, as the dispute had previously reached a stage at which it threatened most serious consequences for the trade.

THE L.S.C. has approached the London Master Printers' Association for revision of the present overtime limits and of the apprenticeship conditions.

THE change of offices of the Printing and Kindred Trades' Federation of the United Kingdom has been carried out, and the secretary, Mr. A. E. Holmes, is now to be found at 60, Doughty-street. He has, however, to look forward to further tribulation before he can feel settled, as he is having the whole of the building thoroughly redecorated. When this very necessary process is completed, the Federation, will, we think, be found to have a thoroughly satisfactory and conveniently-situated habitation.

By the efforts of the Printing and Kindred Trades' Federation of the U.K., a difficult situation in the wholesale newsagency trade was happily negotiated last week. The employers had posted notices announcing the putting into operation of conditions which had not been agreed upon between the employers' federation and the unions, but on the application of the P. and K.T.F. it was decided to confer upon the matter. A conference was accordingly held, and Mr. A. E. Holmes, for the unions, pointed out that many difficulties would be created if wholesale newsagents were to endeavour to put into operation certain reductions of wages previous to a decision having been come to for the general trade. The Federation of Wholesale Newsagents appear to have given the unions' representations every consideration, and it was eventually agreed to withdraw the notices of revision of wages until September 1st next so as to provide an opportunity for the consideration of general wage reductions.

LITHO artists at Bromley are advocating a 25 per cent. reduction in process prices. Employers, on the other hand, favour a 15 per cent. price reduction and a 6s. wages cut.

NO SETTLEMENT has yet been reached in the dispute which has broken out at the firm of Messrs C. S. Yeates, electrotypers, of Hatton-wall, Hatton-garden, London, E.C.

THE widespread complaints as to the high costs of printing which have given rise to the demand, now under consideration, for a reduction of wages in the printing trade show no signs of decreasing in volume.

EMPLOYERS are claiming that the serious amount of unemployment in the printing trade may be traced to a large extent to the high price that the buyer of printing work is called upon to pay.

HOWEVER much the employer may regret the introduction of short time, he maintains that, in order to keep his place in the race, he must introduce the most economical means of production, and, whilst pre-war conditions are not to be thought of, the wages question must be tackled without further delay if trade is to be stimulated and more normal conditions secured.

THE employers' claim is that the cost of paper and high wages have played an important part in reducing printing work to a minimum, and that although the price of paper has declined no downward movement has taken place in wages and negotiations drag on.

ONE of the points emphasised by the employers just now is that the rates that have been current for so long in regard to the piece-work compositor are entirely against the employment of the slow hand. It is anomalous they claim that the bonus should be a fixture, as the rate per 1,000 ens for the man with a weekly setting of say 50,000 ens gives him a high premium as compared with the 60,000 man, whereas the object of piece-work is to encourage capacity. The application of the bonus to a slow piece hand represents payment for which he gives no proper return, and is at the same time unfair to the "whip."

THE unions question the statement that the present slack condition of trade is due to high wages. They contend when the effects of the coal dispute have passed away, and the international situation has eased off, there should be a rapid revival of business all round. Wages in the printing trade, they maintain, are not high, notwithstanding the drop in the cost of living.

THE paper-wrapper stores of Joseph Crossfield and Sons, soap manufacturers, Warrington, were recently burnt out by fire.

MR. J. CLAY STEWART, late agent in Scotland for the Union Paper Co., Christiania, who had to give up business owing to a breakdown in health through war service, is now settled in Cape Town. He has opened up an office in that town in conjunction with Mr. Wallace, under the name and address of Wallace and Stewart, 41, Parliament-street, Cape Town, where they are conducting business as paper agents, holding the agencies for both home and Scandinavian mills.

## The Printing Trades Examinations.

### First Pass List.

It is indicative of the interest now being taken in technical education that the printing trades organisations along with the Stationers' Company have formed an examining body for the purpose of setting a technical test to those engaged in the printing industry who care to submit themselves for examination.

It was an inspiring sight to see the students grappling with a set of up-to-date questions in the ancient Hall of the Stationers' Company during the first week in May, and we are able to give herewith a long pass list which has just been made public. The examinations are of an exceptionally high order and it is by no means easy to obtain a certificate. Valuable medals given by the Stationers' Company and in addition a number of cash prizes provided by the various organisations are awarded on the results of the examinations, which are adjudicated upon by nominees of the examining body—men who have had a wide practical experience in their respective branches of the printing business.

This year some four hundred students from the principal schools in London presented themselves for examinations in composing, machine, lithography, binding, paper, costing, estimating and order clerk's work. It is anticipated that next year, when the examinations are better known, there will be additions to this list, particularly when it is recognised that the examinations are a real test of merit, carrying with it a certificate which will be accepted as a guarantee of technical proficiency.

The following is the list of passes:—

**COMPOSING.**—First class: J. Alcock, H. W. Brookes, †W. P. Bowles, W. S. Clarke, \*C. F. Lawrence, G. V. Nye, †G. W. Smith, F. E. Stean, H. A. W. Thomas. Second class: J. J. Andron, W. A. Bloomfield, W. Burrows, W. C. Chatters, A. E. Dowie, A. F. Early, T. M. Field, W. C. H. Fletcher, R. J. Fricker, W. H. Hardisty, W. G. Jones, P. L. H. Lee, F. F. Longfellow, W. F. Mace, H. F. Marriott, H. T. McComish, G. D. McIntyre, R. J. Nearn, A. R. Phillips, L. E. Ridley, L. A. Scott, H. Stone, T. W. Tily, A. C. Toome, W. H. Warren.

**MACHINE.**—First class: L. H. Almond, †W. W. Hobrough, \*W. C. Hodges, W. Millington. Second class: †L. G. Alford, P. A. G. Allen, L. G. Askham, E. D. Barker, T. J. Beach, S. J. Bennett, W. H. Bettles, G. Bligh, S. Bottomley, E. A. Creek, P. Cundy, E. A. Curtis, H. Driscoll, W. H. Duffett, C. W. East, J. Goddard, F. G. Godin, R. G. Gough, F. S. Hackett, H. C. Healy, G. Howes, C. Jobling, F. J. Johnston, S. H. Kilbey, C. W. Lockyer, L. E. Lyons, J. W. Norman, J. F. Riley, I. Rindovitz, A. E. Russell, F. Staines, L. G. Thurn, R. Wallis.

**LITHOGRAPHY.**—First Class: \*J. G. Riddell. Second Class: S. C. Haynes, W. E. Hole †J.

## Australian Printing Notes.

THE Victorian Typographical Society, which has a membership of about 2,000, has decided to join the Printers' Industrial Union. The Bookbinders' Union and the Carton and Box-Makers' Union are already members.

A NEW agreement made between the Typographical Union and the proprietors of the morning and weekly newspapers of Perth provides for an all-round increase of 10s. to employees, except stereotypers and brake-hands on night work, who are raised 15s. and 12s. 6d. a week. Night work in every class is to be paid 10s. a week more than day work.

THE Typographical Union officers have been served with Supreme Court injunctions, issued at the instance of the *Perth Daily News* proprietary, to restrain them from declaring the office of that paper closed to unionists. The trouble arose in connection with the union's demand that in reducing its staff the *Daily News* should not retrench an old employee. The managing director of the *Daily News* asserts that he would close down altogether rather than permit union dictation. A Government official has been appointed to settle the matter under the Arbitration Act.

AN Honour Board has been erected as a tribute of respect to the members of the staff of the Government Printing Office who fought in the war. The tablet consists of 42 names and is claimed to be a unique example of art metal work. Mr. Anthony Cumming (Government Printer) paid an eloquent tribute to the patriotic spirit displayed by the staff during the war. He said that 48 members had answered the call to duty, and three of these had made the supreme sacrifice. In addition 75 sons and daughters of aged employees had offered their services.

TWO books which have lately been produced by the Government Printer of New South Wales have met with a great deal of praise for the excellency of their execution. In regard to one of these publications Professor Jeffrey, of America, has expressed his warm appreciation of the wonderful development of Australian printing, saying that the United States Department of Agriculture might well follow the lead set by Australia.

MR. H. J. DIDDAMS, an ex-mayor of Brisbane, and a printer, a year ago told his employees that he had decided to cut up 20 per cent. of his net profit among them, according to position and length of service. The first distribution has just been made at a dinner, which was followed by a theatre party.

FUTURE prospects for the paper box trade are not bright, according to some authorities.

There has been a falling off in consumption lately owing to the effect of trade depression. Because people have not the money to spend on boxes, they are said to be purchasing their chocolates in paper bags. This, at least, was the reason for the falling off in business given by Mr. J. R. Firth, managing director of P. J. Firth and Co. Mr. Firth was a witness before Judge Beeby's inquiry into the probable effect on industry of the adoption of a 44-hours working week. The inquiry is at present dealing with the printing trades. Witness stated that for the last six months trade had fallen off, and the firm was now doing a smaller volume of business than they did seven or eight years ago.

AMONG the new companies registered are the following:—

The Alert Printing and Publishing Co., Ltd.—Capital, £5,000, in 5,000 shares of £1 each. Objects: To purchase, acquire and take over from Frederick Charles Staples, the business carried on under the name of Staples and Walker, and to carry it on as printers, publishers, manufacturers, merchants, general agents, miners, quarrymen, etc.

Posters, Ltd.—Capital, £10,000, in 10,000 shares of £1 each, to take over the business carried on by E. H. O'Brien and A. B. Roper as printers, publishers, etc. Directors: E. H. O'Brien, A. B. Roper, and M. S. Adams.

Burwood Printing Co., Ltd.—Capital, £4,000, in 4,000 shares of £1 each, to acquire from F. R. Birnes the *Australian Courier* newspaper and the printing and publishing business carried on by him at Burwood.

MESSRS. WATSON, FERGUSON AND CO., LTD., printers and stationers, Brisbane, find it necessary to enlarge their capital resources. The business is expanding (the November, 1920, half-year's turnover was £7,500 above that for the November, 1919, period), and more ready cash is needed, for prices are higher and money tight.

A SERIOUS fire broke out at the printing works of Turner and Henderson, Ltd., Sydney. In the printers' department were various outfits of valuable plant, and the fire played havoc with these, but the floors remained practically intact, and only one machine was displaced. Large stocks of paper of various kinds burnt freely. The damage is estimated at many thousands of pounds.

IN a letter to the Prime Minister of New Zealand, the Federation of British Industries expressed the hope that the Government of New Zealand, in their re-consideration of the Tariff, would, as far as practicable, seek to encourage British imports into New Zealand, particularly in preference to the import of competitive goods from foreign sources. A reply from the Rt. Hon. W. F. Massey has now been received stating that "when the new Tariff is being framed, the interests of British industries will not be overlooked."

## Process Engravers' Trade Mark.

The Federation of Master Process Engravers, as we intimated recently, has adopted a special trade mark of its own. We are able to give herewith a reproduction of the device adopted. It is intended that this design should form an identifying mark on all blocks issued by members of the Federation. Impressed on the edge or selvedge of the plate, it will show to buyers and users of blocks that

they have been manufactured under fair conditions by British trade union craftsmen. British photo engravers have a reputation second to none, and their products will compare with those of any other makers in the world. In these days of cheap importations and plausible substitutes there should certainly accrue advantage both to the makers and buyers of blocks from the use of the trade mark in question.

## New British Patents.

### Applications.

- Fraser, I., and National Institute for the Blind. Braille characters. 17,340.  
 Howlett, A. E., National Institute for the Blind, and Stainsby, H. Braille writing or embossing machines. 17,242.  
 Lubac, A. Printing type-composing apparatus. 17,138.  
 Pitney, A. H. Mail marking machine and postage meter for printing stamps upon envelopes, etc., and registering number of stamps imprinted. 17,350.  
 Powell, D. T. Devices for obtaining register in cylinder printing machines. 16,852.  
 Schmidt, R. E. Perpetual calendars. 16,858.  
 Waite, F., and Waite and Saville, Ltd. Machines for printing from engraved plates or dies. 17,071.

### Specifications Published. 1920.

- Stephens, A. J. (Kingsbury and Davis Machine Co.). Paper-box machines. 164,888.  
 Wilson, F. K. Loose-leaf binder for pocket and account books. 164,906.  
 Myatt, J. W. Loose-leaf blocks or binders. 164,922.  
 James, F. Loose-leaf binders. 164,972.

MR. W. H. BURCHELL, hon. sec., Central Districts Branch, L.M.P.A., has written to the Press explaining the new regulations regarding post cards, with a view to saving picture post card users the annoyance of Post Office surcharges.

### Mr. Joseph Castle.

WE regret to announce that Mr. Joseph Castle, manager for 33 years of the Oxford University Press Paper Mill at Wolvercote, died at Oxford on June 17th. Mr. Castle succeeded Mr. John Stacey in 1883. He came of a well-known Oxford family, and received his early education at Magdalen College School, Oxford. He was afterwards trained as a mechanical engineer, and before his appointment as controller of Wolvercote Mill, was holding a responsible position in the machine printing department at the Oxford University Press. Up to this time the old-fashioned rag papers made at Wolvercote had satisfied all the requirements of the Oxford Press, but as demands were being made for thinner Bibles and Prayer Books, Mr. Castle soon turned his attention to the production of thin opaque papers for which many alterations had to be made in the manufacturing processes. In 1899, in order to keep pace with the output of the Oxford University Press, the mill was rebuilt and furnished with new machinery, which quite doubled the former output, and placed the mill in a position to meet the foreign competition that was beginning to make itself keenly felt at that time. Mr. Castle retired from active service at the age of 71 in 1916 and was succeeded by Mr. Alexander Douglas Clapperton who had previously acted as assistant manager.

## New Board Material.

A plant for the manufacture of wall-board, heavy paper, roofing and cardboard, all from kelp, is to be erected at Summerland, California. The Occidental Chemical Co., which manufactured potash from kelp during the war, is to erect the plant. For some time experiments in the making of paper products from kelp have been in progress and now are declared to be successful. Representatives of the Occidental say one of the largest paper companies in the country has been following the experiments and may take over all the Occidental's interests.

The immense beds of kelp along the Santa Barbara coast and around the channel islands are perpetually renewed and will afford an inexhaustible supply of papermaking material, while fuel oil is obtainable from the ocean bed at Summerland.

THE new monthly "Motor Coach A B C and Motor Omnibus Services," compiled by the British Road Traffic Association, is printed by the Morland Press, and published by E. J. Larby, Ltd.

## Trade Notes.

THE Amir of Kenseta, Nigeria, and his suit, while in Liverpool last week, watched with astonishment the production of the *Echo* newspaper.

THE Federation of British Music Industries states that the Japanese Government has recently placed with two London publishing houses an extensive order for music to be used by the bands in the Japanese Army.

THE Association of Master Printers of S.E. London will hold their next meeting on the 13th inst., 4 p.m., at the Greyhound Hotel, Croydon, when Mr. R. A. Austen-Leigh and other prominent speakers are expected to participate.

AMONG the week's announcements of partnerships dissolved are those of Frederick Arthur Sly and Frank Hawkins Sly, engravers, 9 and 10, Edward-street, W., and Rosetta Pacy and Gladwin Mason Williams, advertising agents, 108, Long-acre, W.C.

THE P.B.K.T.O.A.—So that adequate arrangements can be made, members and their ladies of the Printing, Bookbinding and Kindred Trades Overseers Association, are asked to notify the general secretary, Mr. G. A. Eden, of their intention of joining the party that is visiting the Alf Evans' Memorial Home, Carshalton, on the 23rd inst. A report of the proceedings of the monthly meeting, held on Tuesday, will appear in next week's issue.

"DAILY MAIL" LIBEL ACTION.—In the case in which Mr. J. R. Renner, M.P., sued Associated Newspapers, Ltd., for alleged libel in connection with the publication in the *Daily Mail* of a list of M.P.'s who "voted for waste," it was found possible to come to a settlement, the defendants stating that they did not intend to make any imputation upon the personal integrity and political honour of the plaintiff.

LEEDS SPORTS GALA.—On Saturday next, the 9th inst., is to be held the Leeds and District Printing and Allied Trades Sports Gala, in aid of the Printers' Pension, Almshouse and Orphan Asylum Corporation, the Natsopa Memorial Convalescent Home, and the Carshalton Convalescent Home. The meeting, which has the cordial support both of employers and workpeople in the industry, is to be held on the Headingley Grounds, and should prove very successful.

INTAGLIO PROCESS AT THE CAPE.—A special supplement published by the *Cape Times*, with its issue of May 28th, contains what is claimed to be the first employment of the intaglio process in newspaper illustration south of the equator. Besides containing the first specimens of this illustrative process—and they are excellent in quality—the supplement gives an interesting series of notes on the growth of the *Cape Times* from its foundation in 1876, and of the men who have been in charge of its fortunes.

A SECOND edition copy of Shakespeare's "Henry V.," dated 1602, sold for £1,800 at Sotheby's last week.

THE excellent Summer Number of *Punch*, now published (price 1s.), commemorates Mr. Punch's eightieth birthday.

MANY night workers engaged on morning papers are pleased at the restoration of the 2 a.m. train from Liverpool-street to Chadwell Heath.

MR. EDWARD CARTWRIGHT, a retired master printer and bookseller, passed away last week at Wimborne-street, Dowlais, at the age of 78 years.

THE design for the tablet to be placed in the Process Engravers' War Memorial Ward at the Limpsfield Convalescent Home has been approved.

"SUCCESS," by the Rt. Hon. Lord Beaverbrook, author of "Canada in Flanders," is announced for early publication by Stanley Paul and Co.

AN interesting and well-produced special Japanese supplement has been published by the *Manchester Guardian*, printed entirely in French and copiously illustrated.

THE *Dublin Daily Express* (Unionist), which was started in 1851, ceased publication last Thursday. Its associated evening paper, the *Evening Mail*, will continue to be published.

A SET of Green's "Short History of the English People" has been presented by Mr. L. G. Sloan, Kingsway, says the *British Weekly*, to the 1,200 overseas delegates to the Rotary Convention at Edinburgh.

SIR HARRY BRITTAI, M.P., and two other members of a party of British journalists who are now motoring through Belgium, have been in a motor car accident at a place called Devil's Hole, near Spa. Sir Harry was conveyed to hospital.

THE Federation of British Industries is concerned at the announcement of the Minister Transport that Part 3 of the Railway Bill cannot receive parliamentary sanction this session, and the Federation is suggesting means for protecting the trading community in the meanwhile.

WILLS.—The late Mr. F. T. Jefferson, of Lapworth Hall, Warwickshire, and West Bromwich, founder of Messrs. Kenrick and Jefferson, left £209,744. Mr. Frederic Barrett, Staines, founder, proprietor, and editor of the *Mineral Water Trade Review and Guardian*, and at one time proprietor of the *Caterer* and the *American Bottler*, left £23,420.

UNEMPLOYMENT INSURANCE.—Under the revised unemployment insurance regulations, as from July 4th, the scale of contributions in respect of men is increased as follows, there being proportionate increases for women and children:—Employees, 7d. instead of 4d.; employers, 8d. instead of 4d.; State, 3½d. instead of 2d. The benefits, previously 20s. a week for men and 16s. for women, are now reduced to 15s. and 12s. respectively.

## FORTY-THIRD YEAR.

*Printed and Published EVERY THURSDAY  
by STONHILL & GILLIS.*

**Tel.: Stonhill, Fleet, London. Phone: 8407 City.**

**SUBSCRIPTION: Per Annum, 8s. 8d. (POSTAGE EXTRA).**

**Charges for Trade Advertisements:**  
(Full page 8 by 5 1/4 ins.)

Whole Page ...	£4 10 0		s. d.
Half Page ...	2 10 0	One-eighth Page	17 6
Third Page ...	1 17 6	One-third Column	22 6
Quarter Page...	1 10 0	One inch in Column	9 0

An Extra Charge for Cover and Special Positions.  
Discounts according to Number of Insertions.

Representatives throughout the United Kingdom and  
also in Australia, India, South Africa, United States  
Canada, etc.

All communications for the "BRITISH AND COLONIAL  
PRINTER AND STATIONER" should be addressed and  
Cheques and Post Office Orders made payable to—  
STONHILL & GILLIS, 58, SHOE-LANE, LONDON, E.C. 4

Copies may be purchased at the Offices, as above  
or from Messrs. W. H. Everett and Son, Ltd., news-  
agents, 11, St. Bride-street, E.C. 4.

THURSDAY, JULY 7, 1921.

# Current Topics.

## Better Times Ahead.

THOUGH not much improvement in the state of the printing trade is reported as yet, there is now much more optimism to be met with in regard to possible recuperation of business in the near future. Printers, like the rest of the industrial community, are bound to find their order books benefiting by the release of trade in general from the shackles imposed upon it by the coal stoppage. The removal of the fuel restrictions, also, is another favourable factor of the situation. Protests, however, continue to be heard on every hand regarding the high cost of printing, and it seems clear that no very rapid rehabilitation of trade can be expected until printers find it possible to make some reduction in their costs and prices. Employers are expecting that the resumption of the conference on wage-reduction, on the 14th, will bring the printing industry into line with the general movement toward more normal trading. If that matter can be

peaceably settled, and if the whole of the industry can be got working with the definite aim of making printing cheaper, so that the demand for it may increase, there should be better times in store for all concerned.

## Trade Union Funds.

WHILE employers have their burdens to bear, the leaders of the trade unions and the members of the various organisations have theirs also. Everyone has been a victim of the effects of the coal dispute and the depression in trade which has been experienced for the past 12 months. Unemployment has grown to such an extent that not only has the Government Insurance Scheme become insolvent, but the funds of the various unions have been swallowed up in benefits. Although actual figures are not available to the public, there is no question that the trade union movement as a whole has become severely impoverished by the calls which have been made upon them. In fact, in some cases there are no funds left and the period of credit has come to an end. The situation is one which must give the union leaders considerable food for thought. Although the leaders are thus handicapped, one cannot but admire the fight they have been putting up on the question of wage reductions. The remarkable thing is, perhaps, that the rank and file who feel directly the dulling effects of unemployment and measures of relief should exhibit a fighting spirit which is even keener than that of their leaders. What happened with regard to the miners was repeated in the case of the paper workers, an interesting parallel which must have a common cause. The lesson of the rough experience which is now coming to a close is that employers and workpeople in industry generally should return to their work with the one idea of recovering trade and stimulating industry.

## Paper Prices.

THE market price of printings and E.S. writing papers remains unaltered, and so far as the mills are concerned, selling prices are down as low as they are likely to be for some time. The dearth of orders has compelled manufacturers to abandon all hopes of profit margin for the present, and the chief desire is to secure business against the starting up of machines. There is a wide difference between mill prices and the quotations of merchants for orders executed from stock. To the user who can place quantity orders, mill prices offer sufficient inducement to place them at once as a sound investment.

### Metric Paper Specification.

THE movement toward metric specification in paper sampling is spreading. Most of the new sets now being issued show sizes and weights alternatively in English and metric standards. This is good business from every point of view, because, while paving the way for export sales, the home printer and paper user is being educated up to the new system, which may ultimately supersede our older and more cumbersome standards. To our mind, the most useful factor is the grammes per square metre statement of substance. As a common basis of substance or weight, it has decided advantages for the trade, and there is absolutely no reason why it should not be immediately adopted for general use. Double crown as a standard basis no doubt appeals to the mill mind, but even in the mill it has its drawbacks, and finds its chief advantage in reference to printing papers. As a method of specifying substance for other grades of paper, it has little value and no meaning. Grammes per square metre as a basis for general application and a common unit of expression is the most scientific as well as the most practical standard the trade could adopt. Pending the final decision, extremely valuable work is being performed by those mills and houses which use the method of specification on all samples issued.

HALF the paper machinery in Finland is idle. The paper, pulp and cellulose export from January to April was 16,542 tons, against 38,975 tons in 1920. Pasteboard and packing were 5,672 against 26,101, and news-print 24,333 against 26,503.

WORK OF ADVERTISEMENTS.—His Honour Judge Rowland Rowlands is also one of those who believes that "An Advertisement is always working." At Pontypridd recently, a County Court action came before him concerning the display of trade advertisements by means of films shown at local cinemas. Counsel for defendants, a furnishing firm, made much of a contention that the films were not exhibited as defendant wished. There was no denying the fact, he said, that when an advertisement was put before the eyes of the public perpetually in the way he had described people got fed up with it and eventually would not look at it. Supposing, for instance, Bovril was advertised on the front page of a London daily paper week after week the public would get tired of it. The Judge remarked that the advertisement could not fail to strike readers every time. Counsel suggested to his Honour that people would not go on reading it, whereupon the Judge remarked, "Perhaps they don't read it—they go and buy it." Plaintiff, it may be added, won his case.

### Personal.

A COMPLIMENTARY dinner is to be given to Sir William E. Berry at the Savoy Hotel on July 20th to mark the honour of a baronetcy recently conferred upon him. Lord Leverhulme (chairman), Viscount Burnham, Viscount Northcliffe and Lord Riddell have joined a representative committee, and the honorary secretary is Mr. A. E. Carlile, 233, High Holborn, to whom all applications should be addressed.

AMONG those who attended the City luncheon to the King and Queen of the Belgians on Tuesday were: Sir Rowland Blades, M.P., Lord Marshall of Chipstead, Sir G. W. Truscott, Mr. F. W. Berry, Mr. C. Hentschel, Sir E. Hodder-Williams, Sir W. A. Waterlow. Mr. O. C. Berry was a member of the Special Reception Committee.

SIR HENRY DALZIEL will, on his elevation to the peerage, assume the title of Baron Dalziel of Kirkcaldy.

It is understood that, for reasons of health, Mr. Kennedy Jones, M.P. for Hornsey, will not seek re-election at the close of the present Parliament.

MR. A. E. JARVIS, president of the Printers' Managers and Overseers Association, on Tuesday received a cordial welcome on presiding at the monthly meeting of the Association for the first time since his recent illness.

MR. R. A. AUSTEN-LEIGH president of the London Master Printers' Association, left London on Monday to attend the annual congress of the French Master Printers, meeting at Lille from July 5th to 7th.

MR. KEITH MURDOCH, London editor and manager of the United Cable Service (Australasia), who is leaving for Australia to take up the position of editor-in-chief of the *Melbourne Herald* publications, was entertained at luncheon at Printing House-square on Friday by the directors of *The Times*.

LORD NORTHCLIFFE presided, and among the guests were many prominent figures of the newspaper world.

THE *Calcutta Englishman* has the proud distinction of being the first daily paper in India to complete 100 years of uninterrupted existence. Under the title of *John Bull in the East* it came into being on July 2nd, 1821, and the anniversary was celebrated on Saturday by a special illustrated centenary number, containing numerous messages of congratulation, among them being many for the Indian and British Press.

## DIVIDENDS AND REPORTS.

**BENN BROTHERS.**—Second Interim dividend at rate of 2½ per cent. per annum.

**IRISH NEWS.**—Dividend for year ended April 30th at rate of 8 per cent., increasing general reserve to £7,000, carrying £5,140 forward.

**EDINBURGH EVENING NEWS.**—Net profit for year ended May 31st, 1921, was £11,148, plus £22,677 brought in, making £33,825. Directors recommend dividend on ordinary shares at 6 per cent. for year, carrying forward £22,824. During earlier months, very high price of paper cut down profits to vanishing point, but since then price has been dropping steadily.

**YORKSHIRE EVENING NEWS.**—Report for year ended April 30th, 1921, states that in March last it was resolved to capitalise £30,000 of reserve funds, and to allot to holders of ordinary shares three £1 preferred ordinary shares, carrying fixed cumulative dividend of 10 per cent., for every two ordinary shares held. Balance available amounts to £14,685, and after deduction of interest, directors' fees, income-tax, corporation tax, depreciation of plant, etc., directors recom-

mend further dividend of 7½ per cent., less tax on ordinary shares, making 15 per cent. for year, and bonus of 2s. per ordinary share, free of tax.

## NEW COMPANIES.

**RELIABLE PRODUCTS CO., LTD.**—Capital £1,000, in £1 shares; manufacturers of and dealers in paste, paste powders, sizes, glues, adhesives, fixings, enamels, stains, varnishes, etc. Private company. First directors: J. G. G. Mellor and W. Duncan. Registered office: Percy-street, Pendleton, Lancs.

**A. E. McINTOSH, LTD.**—Capital £100 in £1 shares; agents for merchants, manufacturers and others, advertising agents and contractors, etc. Private company. First directors: P. R. Hill, A. E. McIntosh and E. C. Hill.

**JOHN STAIT AND CO., LTD.**—Capital £2,000, in £1 shares; to adopt agreements (1) with A. C. Vincent, liquidator of John Stait, Ltd., and (2) with W. Willmott, to carry on the business formerly carried on by the said company at 10, Woodstock-street, Oxford-street, W., and that of stationers, printers, paper bag and account book makers, envelope manufacturers, etc. Private company. First directors: W. Willmott and W. W. A. Couzens.

**BRITISH OPALOGRAPH CO., LTD.**—Capital £2,000, in £1 shares; manufacturers of and dealers in apparatus, machines and appliances for duplicating, multiplying, multigraphing and reproducing copies of printed, written or typed matter, drawings, plans, pictures, prints, engravings, etc. Private company. Subscribers: E. Stoneham and T. W. Haslam. Directors appointed by subscribers. Registered office: 24 and 26, Maddox-street, Regent-street, W.

**CHARLES FELL AND SON, LTD.**—Capital £10,000, in £1 shares (6,950 "A" pref., 50 "B" pref. and 3,000 ordinary); stationers, stationers' sundriesmen, printers, paper, paper bag and account book makers, box makers, manufacturers of fancy cards, fancy goods, etc. Private company. Subscribers: G. H. Fell and J. H. Blackmore. First directors: G. H. Fell, J. H. Blackmore and G. H. Bowman. Registered office: 179, Great Dover-street, S.E.

**PRINTING ARTS GUILD, LTD.**—Capital £1,000, in £1 shares; to acquire the business carried on by A. C. J. Bolton at 33, King-street.

Covent-garden, W.C.2, as the "Printing Arts Guild." Private company. First directors: A. C. J. Bolton, F. G. Robinson and E. G. Bourne. Registered office: 68, Aldersgate-street, E.C.2.

J. W. HEY TRADING CO., LTD. — Capital £2,100, in 2,000 "A" shares of £1 each and 2,000 "B" shares of 1s. each; general merchants, importers and exporters of machinery, manufacturers of and dealers in paper, cardboard and other boxes, stationers, booksellers, etc. Private company. Directors: J. W. Hey and D. Keating. Registered office: 57, Holborn-viaduct, E.C.

IMPRESA, LTD. — Capital £5,000, in £1 shares; printers, stationers, bookbinders, lithographers, engravers, colour process and half-tone engravers, stereotypers, photographers, etc. Private company. Directors: A. H. Burton and E. R. Holden.

HUNTS COUNTY NEWS, LTD. — Capital £2,000, in £1 shares. To take over the business of a newspaper known as the *Hunts County News*, carried on by W. E. Rippon at 137, High-street, Huntingdon. Private company. First directors: Mrs. Lina M. Scott-Gatty, F. M. Warren, J.P.; W. E. Driver, A. J. Pledger and C. Norman. Registered office: 137, High-street, Huntingdon.

HALE PAPER CO., LTD. — Capital £5,000, in £1 shares (2,500 10 per cent. cumulative participating preference and 2,500 ordinary); manufacturers of and dealers in paper, mill and cardboard, manufacturers of wood and other pulp used in the manufacture of paper, manufacturing chemists, stationers, etc. Private company. First directors: A. S. Barker, W. Bourne, A. N. Holleby and O. N. Holleby. Registered office: 92, Fleet-street, E.C.

WILLIAM PLATT AND SON (DENTON), LTD. — Capital £7,000, in £1 shares. To take over the business of a box-maker, printer and paper bag maker carried on by W. Platt at Heaton-street, Denton, Lancs. Private company. First directors: W. Platt and Mrs. E. Platt. Registered office: Heaton-street, Denton, Lancs.

FINANCIERS, LTD. (Edinburgh). — Capital £100, in £1 shares; merchants, general import and export dealers, manufacturers, agents, stationers, printers, publishers, advertising and commission agents, etc. Private company. Subscribers: M. Sweeney, M. Henderson and M. Falcon.

G. A. SVENSEN PAPER CO., LTD. — Capital £10,000, in £1 shares (5,000 preference), to take over the business of a paper agent and merchant carried on by G. A. Svensen as the G. A. Svensen Paper Co. Private company. Subscribers: G. A. Svensen, W. H. Lovatt. Registered office: 14, New Bridge-street, E.C.

MEERLOO PUBLICITY SERVICE, LTD. — Capital £10,000, in £1 shares; to adopt an agreement with Anne Meerloo, and to carry on the business of advertising contractors, publicity agents, billposters, etc. Private company. First directors: Earl of Lathom, Anne

Meerloo and F. D. Fawcett. Registered office: 105 and 106, New Bond-street, W.

COLUMBIA RIVER RECLAMATION CO., LTD. — Capital £35,000 in 3,300 "A" shares of £10 each and 40,000 "B" shares of 1s. each, to acquire and turn to account rights and privileges relating to draining and reclamation of agricultural, timber or forest lands in the Dominion of Canada, to carry on the business of saw and shingle mill owners, timber and lumber merchants, pulp or paper manufacturers, manufacturers of and dealers in all manufactured articles of wood and bye-products of wood, etc., and to adopt an agreement with W. D. McKay. Private company. Subscribers: G. T. Steeves and J. F. Gomme, J.P. First directors: G. T. Steeves, J. F. Gomme, J.P., J. M. Aitken and F. McQueen.

### COMPANY MORTGAGES AND CHARGES.

Fresh Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 1908, and Satisfactions registered pursuant to Section 97 of the same Act. (The registration of Satisfactions is not compulsory).

LINDENMEYER AND JOHNSON PAPER CO., LTD. (London). — Satisfaction to the further extent of £1,000 on April 11th, £1,000 on April 20th, and £1,000 on May 28th, 1921, of debentures dated September 30th, 1920, securing £20,000.

METAL GRAVURE CO., LTD. (chemical engravers, Streatham). — Particulars of £500 debentures authorised May 26th, 1921; whole amount issued; charged on the company's undertaking and property, present and future, including uncalled capital.

SALVATIONIST PUBLISHING AND SUPPLIES, LTD. — Assignment and debenture and as collateral security thereto a mortgage all dated June 9th, 1921, to secure all moneys due or to become due from company to mortgagees not exceeding £30,000, charged on certain lands and premises in St. Albans and St. Pancras, N.W., benefit of a Declaration of Trust and the company's undertaking and property, present and future, including uncalled capital. Holders: Reliance Bank, Ltd.

ATLAS LACE PAPER CO., LTD. (London). — Satisfaction to the extent of £2,900 on June 20th, 1921, of debentures dated February 1st, 1905, securing £3,500.

PHILIP AND TACEY, LTD. (educational stationers, etc., Fulham). — Land Registry Charge on certain freehold land at Fulham, dated June 8th, 1921, to secure £7,000. Holders: H. Row, 35A, Kensington High-street, W., and others.

J. AND J. VICE, LTD. (printers, etc., Nottingham). — Satisfaction in full on April 1st, 1920, of second debenture dated March 18th, 1916, securing £500.

VIZETELLY AND CO., LTD. (printers, etc., New Malden). — Issue on June 1st, 1921, of £35 debentures, part of a series already registered.

HIGHAM BROTHERS, LTD. (stationers, etc., Kearsley). — Particulars of £88,500 debentures

authorised May 11th, 1921; whole amount issued; charged on the company's undertaking and property, present and future, including uncalled capital (if any).

**PEERLESS PHOTO PAPER CO., LTD.** (London).—Particulars of £2,500 debentures authorised June 3rd, 1921; present issue £1,825; charged on Scotsbridge Mill, cottages, etc., and the company's undertaking and property, present and future, including uncalled capital, subject to debentures outstanding of an issue for £9,300.

**DAVIS, LTD.** (printers, etc., Birmingham).—Satisfaction in full on June 24th, 1921, of mortgage dated April 25th, 1913, securing £3,000.

**JOHN RISSEN, LTD.** (stationers, etc., London).—Satisfaction in full on June 10th, 1921, of debentures dated July 14th, 1914, securing £2,100.

**JOHN F. SHAW AND CO., LTD.** (publishers, London).—Two debentures dated May 4th, 1921, to secure £2,500 and £1,000 respectively, charged on the company's undertaking and property, present and future, including uncalled capital, subject to prior debentures. Holders: Barratt and Co., Ltd., Mayes-road, Wood Green, N.; F. P. Wood, and V. Simons, 7, Bucklersbury, E.C.

### BANKRUPTCIES, etc.

**IVOR HAMILTON MARTIN** (trading as Hamilton Martin and Co.), printer and stationer, 80, Upper Thames-street, E.C., and 22, Grantham-road, Chiswick.—This debtor petitioned the London Bankruptcy Court on June 23rd, and the first meeting of creditors was held on July 5th, before Mr. F. T. Garton, official receiver. It appeared that in 1910 the debtor and a Mr. Thompson commenced business at Talbot House, Arundel-street, Strand, under the style of the Office Supplies Co., which was afterwards converted into A. F. Thompson and Co., Ltd. The debtor acted as director until he joined H.M. Forces in August, 1914. Upon being demobilised in March, 1920, he commenced on his own account at 80, Upper Thames-street, and for a time had three partners, but there was a dissolution in April last, debtor taking over the liabilities and continuing the business until an execution was levied by James Poole and Son, Ltd., creditors for £75, whereupon he filed his petition. The liabilities are roughly estimated at £400, and the assets are valued at £295, the failure being attributed to the slump in trade and labour unrest. The case was left with the official receiver to be wound up in bankruptcy.

**AMERICAN 44-HOUR WEEK.**—After two months of strike and confusion the reports seem to indicate that the 44-hour week is very doubtful of establishment in a large percentage of the printing centres of the country. New York and Chicago in their "closed shop" sections have gone on this basis, but in other cities the reports seem to indicate that there are being no concessions made.

## Functions of a Paper Merchant.

A writer in *Paper and Progress*, the house organ of Messrs. Strong, Hanbury and Co., thus describes the business of a paper merchant:—

A paper merchant's functions are plainly defined as a "clearing house."

The papermaker, to do the best for himself and for his customer, should standardise his output, which would be limited to a few qualities, according to the number of machines, and those qualities which the mill is best adapted to make. By doing this, he increases his output and reduces his cost of production, but, of course, he must have large orders in bulk, such as only the merchant can give.

The merchant, by buying in bulk from a number of mills, procures the necessary range of qualities for his customers' general requirements, gets them at a low price, and then can distribute any quantity, from a ream upwards, at a price which would be little, if any, more than the maker could afford to sell at in making small quantities of every quality under the sun.

The printer, on the other hand, by combining his purchases of various qualities from one merchant or distributor, saves considerably in time, trouble and expense, obviating any big lock-up of capital and minimising the cost of carriage: Buying from a mill is a "fetish," as the mill can only offer the qualities it makes, and a merchant can more often than not provide a more suitable quality for his customer's requirements from the large range of stock which he carries, and the chances are that he will save money for his customer at the same time.

**COLLECTIVE BARGAINING.**—Messrs. P. S. King and Son, of Orchard House, S.W.1, have published, price 4s., a 130-page monograph on "Collective Bargaining in the Lithographic Industry," by H. E. Haagland, Ph.D., Instructor in Economics, University of Illinois. While the writer is concerned primarily with the history of collective bargaining in one special branch of the printing industry of America, there is much in his pages which is interesting and instructive to those in this country who are concerned with collective bargaining.

**AUSTRALIAN TARIFF.**—Among many alterations made in the Commonwealth Tariff the following are included: "clumps and leads" are deleted from Item 211 and are included in Item 212, the duties on printers' materials, viz., circles, curves, knives (paring), rules, clumps and leads being nil, 5 per cent. *ad val.* and 10 per cent. *ad val.* under the British Pref. Tariff, the Intermediate Tariff and the General Tariff respectively; in Item 232(A) lithographic varnish, and printers' ink reducer are, under these tariffs, 2s. 6d., 3s. and 3s. 6d. per gallon, or 25, 30 and 35 per cent. *ad val.*, whichever rate returns the higher duty.

## Unique Book on Paper.

### Quaint Language Concerning the Old-Time Duties.

The little octavo volume on "Instructions to be Observed by the Officers Employed in the Duties on Paper," which Mr. H. N. Harrison (Thomas and Sons, Ltd.), has presented to the Library of the Papermakers' Association, contains a wealth of quaint language and throws an interesting light on the conditions existing in the paper industry in the eighteenth century. The book was "picked up cheap" in London recently, and it is thought it may be the only one in existence. Certainly, it is singularly interesting, if not quite unique. It was printed in London in the year 1729, and its main object was to afford explicit directions for the collection of the paper duties.

In addition to the 23 printed pages, there are a plenitude of blank sheets at the beginning and end of the book, apparently for the use of the officers concerned. Although bearing the marks of age, the volume is well preserved and probably was not in actual use.

It was obviously the aim of the authorities to enable the officers to completely understand their duties and to leave no loophole of escape for those who were to pay the duties. The first four printed pages, therefore, are devoted to "a description of the way and manner of making paper," following which come the instructions "as to the surveying the papermakers." Details are then given of the "several sorts of paper usually made in England, by showing the length and breadth of each sheet; together with what is usually reckoned a day's work on each sort."

#### Scale of Duties.

Interest attaches to the "several sorts of paper mentioned in the Acts of Parliament, with the duties charged thereon," and these are set out in this way:—

Demy fine, at 2s. 3d. per ream.  
 Demy-second, at 1s. 6d. per ream.  
 Crown-fine, at 1s. 6d. per ream.  
 Crown-second, at 1s. 1d.  $\frac{1}{2}$  per ream.  
 Fools-cap fine, at 1s. 6d. per ream.  
 Fools-cap second, at 1s. 1d.  $\frac{1}{2}$  per ream.  
 Fine-pot, at 1s. 6d. per ream.  
 Second pot, at 0s. 9d. per ream.  
 Brown large-cap, at 0s. 9d. per ream.  
 Small ordinary brown, at 0s. 6d. per ream.  
 Whited-brown, at 0s. 9d. per bundle.  
 Past(e)-boards, mill-boards and scale-boards, at 4s. 6d. per hundredweight.

Printed, painted or stained paper for hangings, etc., at 1d.  $\frac{1}{2}$  for every yard square.

All other papers, white or brown, or of any other colour, or kind, at eighteen pounds per cent. *ad valorem*.

For the rest, the volume gives examples of entering up the various details for the guidance of the officers.

The spelling and phraseology of the letter-press are of course, typical of the period, and "the description of the way and manner of making paper," which ensues, will be found at least entertaining:—

"The several sorts of paper are made either of rags, ropes, cables, etc. The writing or printing paper of the finer rags; the ordinary brown and whited brown paper of the coarse rags, ropes, etc.

"The rags being sorted and washed, are put into mortars or engines; four or five hammers are used to each mortar, wherein they are beaten into half-stuff, then laid to mellow in tubs, binns or chests in some part of the mill or corner of the outhouse. When they are mellowed enough, they are beaten again in the mortars till made into fine stuff, and are then fit to be made into paper.

"In the mill there is a vessel called a 'Fatt,' wherein the stuff that hath been so beaten is put to a sufficient quantity of water, and kept at a certain degree of heat about luke warm; and this is the last preparation for paper.

"According to the sorts and sizes of paper design'd to be made, there are moulds to answer each size (the bottom of each mould is of brass wire, somewhat resembling a fine sieve), which moulds are dipped into the Fatt, and by the dexterity and skill of the workman are so handled that the water runs through the wires of the moulds, and the beaten stuff only remaining therein, is gently turn'd off, or laid on a woollen cloth, call'd a a felt, and appears thereon as a perfect sheet of paper; then another felt is laid upon that sheet, and again another sheet upon that felt, and so on until they have raised a heap of 7 or 8 quires, which is called a post; sometimes the workman will vary, and make but 5 quires in a post; which post being put into a press and press'd very hard together till the water is squeezed out, is immediately taken out again, and the sheets being taken from the felts are laid one upon the other until the next day, and then hung in parcels of 3, 4, 5 sheets or more in each parcel upon lines (usually called trebles) in the drying house, where they have no certain time of hanging; but in the winter they hang much longer than in the summer. When the sheets are dry they are taken down, flattened, and laid in piles, and then sized, that is wetted in size; after that the quantity of several reams being put one upon another, they are again press'd, a sufficient quantity of size being left therein for the bearing of ink.

"Then they are hung up a drying a second time in parcels of 3 or 4 sheets, and when dry again are taken down from the lines; the broken sheets are separated from the good, and both counted into quires; after that they are pressed 2 or 3 times till made smooth, and then tied up into reams or bundles for sale, viz., 18 of the good quires, and 2 of the broken to each ream, or 36 of the good, and 4 of the broken to each bundle.

"Brown, and whited brown paper are made after the same manner, but sooner finish'd, being unsized, and but once hung up to dry, before press'd, and made up into reams or bundles for sale."

# The Bookbinder.

## BOOKBINDERS AND THE TIME DOCKET.

### The Controversy Crystallising Out.

Mr. Geo. Harraway's letter (*British and Colonial Printer and Stationer*, June 16th), referring to our comment on the binder and the time docket in the last bookbinding issue, serves a very good purpose in clearing away misapprehensions as to the workers' point of view and making it plain that the basic cause of opposition to the time docket is the inability of the employers themselves to clearly define how the time docket can assist to more accurate cost finding. Here we have a straight issue. Mr. Howard Hazell's communication contents itself with stating that the docket is in use, that difficulties have been overcome, and that the docket will be of benefit to the workers; but he does not define how the time docket will assist in the finding of costs.

Returning to Mr. Harraway's letter, we are inclined to think, from the nature of his after-remarks, that even he has not put the question he intended to. Perhaps Mr. Hazell also has taken this view, and has devoted himself to the question which is the main inference of Mr. Harraway's contribution, namely, "Can the binder record his time?"

### The Root of the Matter.

It is at once apparent that neither Mr. Harraway nor Mr. Hazell can give free vent to their personal thought and opinion owing to their official positions. For our own part, there is less need for reticence, and thoughts and experience may be frankly set forth. The time docket can be filled by the worker just as easily in the binding-room as in the composing department, provided that the form is arranged to suit the business. There is no need to discuss publishers' binding or any other straight run of work, because all are agreed that there is no difficulty here. The difficulty associated with miscellaneous batches of books disappears when the docket becomes practical. We quite agree that no man can, or will, give a scientifically correct analysis of his day's doings, and we are equally ready to admit that cost finding is not, and never will be, scientifically correct. Under the best conditions possible it will remain approximately correct. The manner in which every-day work is performed in the average binding-room makes it necessary to aim at securing an approximately correct record of the hours devoted to each job. In a small establishment separate

records of machine time can hardly be expected, and a flat rate all round would give practically correct results. In the large department where mass production on an elementary scale is a natural development, the machine workers are as easily able to record their time as hand workers. Even in the medium-sized bindery the modern department appoints its specialists for machine work, and the use of the docket will have a tendency toward better departmental organisation for the sake of improving the correctness of the records as well as for the facilitating of the work. This question of docket filling boils down, therefore, to the average-sized bindery and the treatment of miscellaneous work in batches.

### Dissection of Time.

Here we are presented with the problem "How is the binder to dissect his time?" For our own part, we would not ask the workman to spend time on clerical work of this description, and would rather adopt the following plan, which we term the Batch Cost System.

The overseer hands out the batches of books and maintains a Batch Cost Book in which the individual jobs comprising the batch are itemised, and a separate serial (Batch number) given to the batch. A rough description of size and binding will act as a guide later to time analysis. The binder merely records on his docket the individual numbers, and brackets them up with the batch serial. All the information now required from the workman is the number of hours spent on that batch during the day; and whether the batch is brought or carried forward. Extra work of any sort is noted below the batch. On the collection of the dockets each morning the overseer records against each serial the total hours spent and repeats the performance daily until the job is complete. Individual times from the marbler or finisher, and also any special records of machine time, can be dealt with by the office in the ordinary way. When the overseer gets his total batch hours on any one job he dissects the time, allowing so much to each individual job. From this record the costing clerk takes his particulars of completed jobs daily.

Every morning the cost clerk receives the daily dockets from the overseer and posts up the total hours to his Value of Production sheets without needing to wait for completed jobs.

### How Cost-Finding is Facilitated.

And now we come to answer the question,

"How can the time docket assist to more accurate cost finding?" In the first place, there is no room for understatement or overstatement of hours spent on work. As to the possibility of inaccuracy in dissecting the times, the fact of starting out on a set sum total of hours which at the most have only to be divided over a few books, plus the fact of constant daily practice is sufficient guarantee of approximate accuracy. The mental labour involved in the assessment is much less than that involved in starting without any data and guessing at every job.

The daily docket presents the costing office with the basis of the Value of Production record, and until it is possible to produce this record for every department in the works the Costing System will fail to yield its full benefit. The fact must be grasped that a time docket recording *daily* the hours spent on work and specifying the work on which it is spent is absolutely indispensable to the cost-finding and cost-recording system.

It is quite likely that in those towns where the docket is admitted not every bookbinding establishment is using them, and it is equally certain that in those towns where the docket will shortly be accepted a number of houses will not use the privilege. That does not affect the issue, save that it indicates so much educational work for the Federation among the masters. But what does affect the issue is this: that the most progressive, the most efficiently organised and best-managed establishments in certain towns are finding their efforts to develop and improve the binding department thwarted by their inability to establish an organised method of recording and ascertaining the cost of production.

---

THE manufacture of fibre board boxes has been commenced at a new factory specially erected by the Clarke Bros. Paper Mills, Ltd., Glen Falls, St. John, New Brunswick.

RUNNING out from Bagshot School on his seventh birthday, Frederick Wooders was knocked down and fatally injured by a motor car driven by Mr. Cecil Sturgis, paper merchant. At the inquest a verdict of "Death from misadventure" was returned. Mr. Sturgis undertook to bear the expenses of the funeral.

## NOTES AND NEWS.

### A Period of Difficulty.

Again there is very little to record except a month of bad trade and increased unemployment in the bookbinding industry. Taken all round, however, it appears that the binding trade has not been quite so depressed as the allied branches of the industry. On the other hand the possibility is that the other sections will more quickly feel the benefit of the resumption of work in the coal industry. A mild boom in printing is already being looked forward to, and no doubt by about September there will be a very much brisker demand for printed matter than we have experienced since the earlier period of 1919. There is a grave doubt whether publishers will find it possible to issue new works to any extent this year, for the season is approaching and there is a decided reluctance to note the high cost attendant on production as things are. There is no doubt the book trade is in an unenviable position and conditions are all against it. Possibly when wage adjustments are settled and the materials market is in a more stable condition, sufficient confidence will be restored to warrant the publishers in embarking on new schemes with some degree of justification.

### Binding Materials.

Binding materials have undergone very little change during the month, mainly because the coal stoppage brought the market to a standstill. Mills employed in the manufacture of the various types of material were closed and real difficulty was encountered in securing supplies of many sorts. With the return of the miners the mills will now be able to get back to business and wipe off what few orders they have in hand. The commencement of the second half of the year finds many bookbinders short of material and buying will immediately have to be resorted to. It will be some time before the consumer reaps any benefit from the wage reductions which have already taken place in many industries other than our own. Eventually it will work through, but not until the full week of hours is being worked. Then we may look forward to further slight reductions in the cost of

20 & 21, QUEENHITHE, LONDON, E.C.4.

## Paper Agents and Merchants.

PRINTINGS, ART PAPERS, WRITING PAPERS,  
CHEQUE AND DUPLICATOR PAPERS, Etc..

material. Meantime we have our own wage adjustment to look to, and here again there will be no difficulty if only we can get busy. A lower selling price for bookbinding will have to prevail if the industry is to make headway. Sacrifice on the part of finance and labour will have to be made to ensure this, and if labour is now sacrificing something through short time and will eventually sacrifice something on the standard wage, it can be said with equal truth that finance has been facing serious loss and an extremely critical phase for the same length of time. A low margin of profit will have to run tally with the lower standard wage in order to bring the cost of books and binding down to a level which will develop the demand.

### The Leather Market.

Leathers are being offered by reputable houses at very reasonable figures, and according to well-informed critics there is very little prospect of any further reduction this year. The boot trade will very shortly be making demands on the leather market which will help to stiffen the prices of raw material. Fancy goods manufacturers also will shortly place their requirements, which have been held over for so long. The latest list of light leathers quotes the following as average prices per square foot: Coloured basils, thin, 8d. and 9d.; stout, 9d. to 1s.; rough sheep, 8d.; fleshers, 7d.; roller basils, 8d. and 9d.; glazed skivers, 7d.; embossed skivers, 7d. to 8d.; pastegrains, 8d. to 10d.; rough morocco, 10d.; rough calf, best, 1s. 6d.; seconds, 1s. 2d.; fair calf, best, 2s. 3d.; seconds, 1s. 9d.; pigskins, 1s. 9d.; Anglo hides, 2s. to 2s. 6d. Apart from these regular prices some very cheap clearance offers are being made, among which we have seen pastegrain skivers at 6½d., pigskins at 1s. 6d., Anglos at 2s. and Persians at 9d.

### Miscellaneous Materials.

Labelcloths have recently been reduced again, and standard qualities are listed at 1s. and 1s. 1d. per yard. American cloths and calicoes remain at last month's figures. Glue is firm for the time being, as also are bookcloths and buckrams. Goldleaf is likely to remain at its increased value for some time. Strawboards are still obtainable at the £7 basis figure, but this price is not likely to hold good much longer. Millboards are too dear in comparison with other types of binding material, and until a decided fall takes place there will be no buying for stock. Marble papers are in the same category, though here many houses have at last come to realise that books can be lined up with other things than marble paper. A Belfast manufacturer sends out a reduced price list of linen threads which shows up to great advantage against the prices quoted by smallware people and binding material agents.

MESSRS. W. L. OLDFIELD have transferred their office from 1, Kingsland-green, to his factory, Dyko Works, Mildmay-avenue, Islington, London, N.1.

## Spanish Customs Tariff.

### Modifications and an Exchange Surtax.

The *Gaceta de Madrid* for June 4th contains a Royal Order, dated June 3rd, which makes certain modifications of the new Provisional Customs Tariff established by the Royal Order of May 17th (particulars of which were given in our pages) and provides for the levy of surcharges on the Customs duties to counter-vail depreciated foreign currencies. The preamble to the Order refers to the intention of the Spanish Government to accord to Spanish industries a degree of protection as high as is compatible with other Spanish interests, and to the necessity of amending certain of the Tariff rates with this object.

The only modification of interest to the pulp and paper industry refers to "pulp for papermaking, clippings of paper and waste paper." The duties fixed by the Royal Order of May 17th were 2 pes. per 100 kilos. (1st Tariff), and the 1 pes. per 100 kilos. (2nd Tariff). By the Royal Order of June 3rd these rates are altered to 2 pes. in the first tariff and 0.50 pes. in the second.

The Royal Order of June 3rd provides that, by way of compensation for the injury which the depreciation of foreign currencies may cause to Spanish industry, a surcharge on the Customs duties is to be established, to be graduated according to "co-efficients" fixed for Class and Group of the Customs Tariff. These "co-efficients," applied to (*actuando sobre*) on the differences between 100 and the average official quotation of the foreign currencies concerned, will determine the percentage surtax to be applied to the amount of duty otherwise leviable. The "co-efficients" are fixed by the Royal Order in respect of paper and manufactures thereof as follows: I.—Pulp for papermaking, cuttings of paper and waste paper, 10 per cent. II.—Paper in an unmanufactured condition, 18 per cent. III.—Prepared or manufactured paper, 32 per cent. IV.—Wall-paper and the like, 40 per cent. V.—Printed and engraved paper and photographs, 40 per cent. VI.—Cardboard and miscellaneous paper, 25 per cent.

THE LINDENMEYR & JOHNSON PAPER CO., LTD., announce that Mr. H. J. Burholt has been appointed buyer and manager of their mills department. Mr. Burholt received his early business training with this Company some sixteen years ago, when they traded under the name of Henry Lindenmeyr & Sons. He has since gained a wide experience of all classes of papers (both British and foreign), which should prove beneficial to the Company's already successful business. We wish Mr. Burholt every success in his new venture.

MILLER & PARKER, LTD., wholesale stationers and paper agents, owing to the expansion of their business, have been compelled to take larger premises at 6, Dyers Buildings, Holborn Bars, E.C.1.

## New Inventions.

### Creasing Leather and Similar Material.

An invention patented by Mr. Ernest Jas. Lower and Mr. Alfred Chas. Ware relates to a machine for making a creased line or lines on one or both sides at the edges of leather or similar material and particularly at the edges of articles such as note books, letter cases, purses, and the like. The machine being fitted with small creasing wheels enables the operator to guide the work round small corners without difficulty. The body of machine is made of cast iron, the shafts and the two wheels known as the creasing wheels are made of mild steel. These two creasing wheels project from the front of the machine and rotate in the same direction at different speeds, giving a burnishing effect on the material used. A small jet of gas is played continuously on each wheel to maintain a regular heat. These two creasing wheels are set one above the other perpendicularly. The material to be operated on passes between these, guided by hand by the operator. The bottom wheel runs with its shaft in two bearings and level with the top of this wheel is a steel platform on which the work is guided between these two creasing wheels. The top wheel is also fastened to its shaft, but in order to overcome any inequalities in the thickness of the material it is constructed to slide vertically of about  $\frac{1}{4}$  inch. To maintain the pressure on the material two small springs are instituted to allow for any rise and fall, the tension on these springs being regulated by means of a small hand screw. One creasing wheel is designed with a flange in order to burnish the side or edge of the material and to act as a guide on the work during the operation. The drive on the main shaft is taken up by two separate trains of gear wheels inside the machine in order to give an unequal speed to each shaft carrying the two creasing wheels. A small handle is fitted at the top of the machine to give a slight lift on the top shaft whilst the work is placed between the creasing wheels. This top shaft is made in two parts, the back portion being run in two fixed bearings and the front portion in two bearings which slide vertically in order to give the necessary rise and fall as required. The two halves are coupled together by means of a coupling made of two plates, in one being cut a slotted hole and in the other a pin fitted which fits into this slot to allow for a sliding motion when the front portion is not in line with the back. By removing the lower creasing wheel and substituting a loose roller immediately beneath the upper creasing wheel the

operator is able to run the machine with one wheel only in order to crease one side of the material about to be operated upon.

### Ruling Machines.

Improvements are patented by Mr. J. S. Hewitt-Bates in ink reservoirs for pen ruling machines in which ink is conveyed from the reservoir by threads of wool, etc., to a flannel supplying the pens constructed with a notched supporting flange F, Fig. 1, on the front to enter between the pen bar I, Fig. 5, and an upper bar H, and with a longitudinally

extending rod A' on which is pivoted a shield C extending over the woodwork to support the threads E. The shield may be held in lifted position by a hinged strip J, Fig. 6. The reservoirs may be made of aluminium and of various lengths, and small reservoirs D, Fig. 5, with hook-like flanges may be supported on the ends of the large reservoirs, either inside or outside, and supply ink of a different colour to threads extending therefrom.

### Loose-Leaf Binders.

In a loose-leaf binder, invented by Mr. P. Baumer, the leaves are held between clamping-plates by longitudinally adjustable holding devices, have slotted holes surrounding these, and have slotted perforations to engage guide pins used during the leaf changing operation. One or both of the clamping-plates are preferably made of soft metal, having harder metal brushes to receive the screw ends of the pins. In the form shown, the rails 2, 2', to which are hinged the covers 3, are clamped together by suitable means, preferably screw bolts 4, 5, 7, which hold the leaves 1 accurately by engaging the holes 6. For

## An Advocate of Good Printing.

Mr. CHAS. T. JACOBI.

To those acquainted with printing trade history it is not surprising that the famous American society of book-lovers, the Grolier Club, should some few years ago have gone to the expense of compiling a handsome volume setting forth the history of the Chiswick Press, London. Not very many printing offices have sufficient interest and honour attaching to their name to merit such attention at the hands of bibliophiles of the United States, but the Chiswick Press is a rare exception, which has, by its work, compelled the typographical historian to mention it as an outstanding participant in the development of English printing. And in the annals of this famous press for the past forty years or so no name takes a more prominent place than that of its long-time chief, a printer of world-wide reputation, Mr. Charles Thomas Jacobi.

It would take more than this short article to do full justice to Mr. Jacobi's long and interesting association with the printing craft in all its phases, and in attempting to set forth a brief biographical sketch within the available space we are necessarily able to do but little more than mention seriatim the many different activities and achievements associated with the name of one who is, in the fullest sense of the term, a master printer.

The Chiswick Press—one of the oldest of the English printing houses, it having been founded by Charles Whittingham in 1789, first in London, and then for many years at Chiswick—is situate in an old-world corner of London on the eastern border of Chancery-lane, namely, Took's court, where it has been established since 1828. It was in this neighbourhood that Mr. Jacobi was born, and his craft record shows an unbroken association with the Chiswick Press for a long period. In the service of the Chiswick Press Mr. Jacobi set his first stick of type, and he still remains as director and consultant to the company. At an early age he entered upon a seven years' apprenticeship, on the conclusion of which he was given the position of assistant, which he occupied for seven years. Then his ability and industry received due recognition by his being promoted, while still in his "twenties" to managerial status, and he remained as manager for 15 years, when he became the managing partner, a position which he maintained for over 20 years. Under his control the Chiswick Press has accomplished much exemplary work; indeed, even a partial list of the commissions in fine printing with which the firm under his control has been entrusted would make very impressive reading. For this success Mr. Jacobi's influence is largely responsible, his wide knowledge and sound judgment in matters of typography being well known, and the work of the Chiswick Press having been conducted in accordance

with the principles he advocates and under his own careful personal surveillance.

### Literary and Other Activities.

Some evidence of Mr. Jacobi's experience in the technique of his craft is to be found in his many writings, some of which have become recognised text-books of the printer's art. His writings include the article on "Printing" in the last edition of the "Encyclopædia Britannica"; "The Printers' Vocabulary"; "The Printers' Handbook," third edition; "On the Making and Issuing of Books"; "Printing," sixth (revised) edition; "Gesta Typographica"; "A Few Suggestions of Plain Letterings for Artists and Others," second edition; "Some Notes on Books and Printing," fourth (revised) edition; and numerous pamphlets, articles, etc. These and his other writings have been of the utmost utility in the cause of craft education, a subject in which Mr. Jacobi has shown keen practical interest. Further educational work has included his acting as examiner in typography to the City and Guilds of London Institute and other bodies, while he is a past representative of the L.C.C. Education Committee on various advisory Committees, and is or has been a member of Saint Bride Foundation Institute, the Bolt-court School of Engraving, the Camberwell School of Arts and Crafts, the Aldenham Institute and the L.C.C. Book Production Committees. He is an honorary life member of the Saint Bride Institute, for services rendered. His interest in the spread of craft knowledge has also led to his membership of the Art Workers' Guild, the Arts and Crafts Exhibition Society and the Design and Industries Association; also of the Bibliographical Society and the Authors' Society, while his membership of the London Topographical Society is evidence of the keen interest he takes in the history of Old London, a subject on which he speaks with some authority. He has also lectured at many places in London and the provinces.

### Local and International Services.

Then, on the organisation side of the craft, Mr. Jacobi has rendered prominent services. He is a past vice-president of the London Master Printers' Association, on the council of which he has served since about 1896; he is also a past chairman of the Union House Committee.

His international activities have included service as juror at the Franco-British Exhibition, 1908, also as juror at the Exposition Internationale, Bruxelles, 1910, while he was awarded a silver medal for printing, book-binding and stationery at the Turin Exhibition of 1911.

A Citizen and Stationer, as well as a prominent master printer, Mr. Jacobi is often to be met with when London printers are on important occasions gathered together, and he takes a close interest in all that pertains to the good of the craft. At his home he is able to show a collection of books and typographical rarities of exceptional interest to the printer, and he is always pleased to discuss the intricacies of the craft of which he

is a master. Although he is one of the printing trade's veterans, his retirement from the more active management of the Chiswick Press leaves him with a big fund of energy and ability still available for useful work, and he is now able to indulge more freely in what is to him a hobby as well as a profession, viz., the utilisation of his knowledge and experience for the purpose of helping others out of any difficulty by acting as a referee, arbitrator, or lecturer, etc., presuming, of course, that the services required of him do not conflict with the interests of his old Press. As this fact becomes more widely known there will no doubt be many calls for the information, advice, and assistance which Mr. Jacobi's achievements in the printing world prove him to be exceptionally well qualified to render.

"WHAT A COMPOSITOR SHOULD KNOW," by W. H. Slater. London: The Borough Publishing Co., 132, Church-road, Canonbury, N.1. 3s. net.

This is the first of a series of handbooks that has been prepared for the use of students in technical schools and others who desire to obtain a knowledge of the art of printing, and deals with the work of the compositor in an ordinary printing office in a thorough and practical manner. Beginning with a description of the point system and its advantages, the book goes on to tell how type is made, the metals used in its manufacture, and their proportions, are discussed, and the various qualities given by the admixture of lead, copper, antimony and tin are pointed out. The designing, punch cutting, and casting by hand and machine are dealt with, and the proportions of letters in founts of varying characters are referred to. Having dealt fully with the types used by the compositor, the author goes on to describe the tools and appliances that he must handle to bring the types into formation for printing from. Frames, dustproof cabinets, cases, composing sticks, furniture and other spacing materials, chases, galleys, mechanical and other quoins, imposing surfaces, and the many appliances that the compositor handles in the course of his work are all dealt with fully, and having thus familiarised the craftsman with a description of his tools and their uses, the book goes on to teach him how to handle them to the best advantage, and gives instructions, that, if followed, will enable the willing worker to become a fast compositor, or as they were termed in the old days "a whip." After dealing with the best methods of composition, there is given a chapter on distribution, or "clearing," as it is usually termed in the workshop. Here instructions are given as to

the best way to clear solid matter or display matter, how best to cleanse it, and put it away in the cases in such a way that when wanted for use again it will be free from all dirt. The author of the handbook is Mr. W. H. Slater, who for upwards of 27 years gave successful instruction to the students of the Borough Printing Classes, which were noted for the highly trained printers they produced. Mr. Slater knows his subject well and in this little volume he gives freely of the fruits of his knowledge.

"TOOL AND MACHINE SETTING," by Philip Gates. London: Sir Isaac Pitman and Sons, Ltd. Pott 8vo. Price 2s. 6d. net.

This well-printed and freely-illustrated little volume makes a useful addition to Messrs. Pitman's "Technical Primers" series. By one who is a machine shop superintendent, also a lecturer in engineering drawing at Aylesbury Technical School, Mr. Gates' manual gives plain and practical assistance to those who may encounter difficulties in the use of engineers' tools. Milling, drilling, tapping, boring, grinding and press tool work are among the subjects dealt with.

"IS TRADE UNIONISM SOUND?" by J. H. Bunting. London: Benn Brothers, Ltd. Cloth gilt, circa 8½ in. x 5½ in. Price 6s. net.

A good deal of interest has already been aroused by this book, which was printed and privately circulated during the War by the Garton Foundation. It is not one more of the already too numerous examples of partisan polemical writing, but is rather a thoughtful and thought-provoking examination of the principles underlying present-day industrial collectivism as represented by the trades unions and the employers' associations. Mr. Bunting thinks that such bodies have been attempting in vain to alter by force the natural laws of economics. Basing his contentions on principles which are common ground with all parties, and on statistics of accepted accuracy, he maintains that artificial adjustments in the price of either labour or any commodity defeat their own object by restricting the free play of supply and demand. He proposes to Labour that its unions shall, for a period of three years, and under defined safeguards, cease to be agents for securing a minimum wage, and become instead registrars of labour and the means by which it shall receive a greater proportion of its own product. In place of endeavouring to fix wages, the unions are to register the rate paid by the employer of every worker, with the conditions of employment. Wherever an employer is found to be paying less than the market wage, or imposing bad conditions, the unions will facilitate and assist pecuniarily the removal of workers to places where better wages and conditions are offered. Every worker is to arrange his own terms with employers, the union helping him by affording the information which enables him to sell his services where they have the greatest worth. Thus an avaricious employer would be restrained by the competition of

better men and labour would secure the highest available wage. Employers are to be encouraged to train workers to become more efficient producers: where a trade pays generally a rate of wages much below the average, workers are to be helped to enter more remunerative trades, the cost of training being advanced to them. This, he contends, would raise the wage in these employments, through the competition of better paid trades, while workers would be protected against unscrupulous employers, and would be ensured a just and increasing wage, by greater production and consequent lower prices which would enable the working community to consume a greater part of its own product, thus increasing the demand for labour and securing to it better market conditions. The result would be a fall in the rate of interest and a rise in "real wages" far more advantageous to the worker than the fixed minimum which in practice is always the maximum too; and a better understanding between Capital and Labour.

The book is one worthy of careful consideration by both employers and workpeople in these days when industrial conditions are obviously in the melting pot and when many of the best spirits in the ranks both of Capital and of Labour are feeling the crying need for some better means than yet exists for regulating industrial conditions.

## The Value of Good Cardboard Boxes

The need of attractive and durable cardboard boxes for packing goods for export is emphasised by Capt. P. G. Holms, British Vice-Consul at Guadalajara, Mexico. He calls attention to a recent report to the Department of Overseas Trade as to the lack of attractiveness of many of the samples of goods sent from the United Kingdom to Mexico. The following are samples which have come to his notice indicating the value of cardboard boxes, which are not always of the right sort: Fountain pens are sent unwrapped in thin cardboard boxes. No show cases, show cards or descriptive material are provided with them for display purposes. Excellent leather goods are packed in flimsy and inartistic cardboard boxes, with the result that the edges of the goods are liable to be damaged. Buyers complain that they have to repack those goods in more attractive boxes. In spite of this drawback, however, sales have been good. Tweed and cashmere patterns are fastened with a brass staple and compare unfavourably with the American method of mounting patterns in well-bound books, in which prices and details of widths, weights, etc., are neatly typewritten against each pattern. These criticisms show to what extent the work of the papermaker, the paper boxmaker, of the bookbinder and the printer assists in developing commerce.

**AN Advertisement is always working.**

## British Paper Trade.

"It is difficult to keep a despondent note out of a report on the present state of trade in the papermaking industry," says the *Manchester Guardian Commercial*. "Paper mills have been closed down all over the country, and even with the settlement of the coal trouble some time would elapse before business could be actually resumed. There is no demand for pulp at all from this country, and the Continental markets are idle. Most of the mills are very much overstocked, and it is reported that many papermakers are officially claiming *force majeure*. The position of pulp agents and sellers is likely to develop on awkward lines, for the contracts for pulp which they had with Scandinavian suppliers were in the majority of cases not half completed, and the pulp suppliers, who had to buy their timber twelve months ahead, are unable to gain any concessions at all from the timber suppliers in the backwoods of Scandinavia, who do not appear to appreciate the conditions existing here.

"Paper prices are fluctuating, and figures below production costs are offered. Prices generally have fallen considerably. The printing trade is very quiet, and a deal of whole, or partial, unemployment exists."

MESSRS. CHARLES MORGAN AND CO., LTD., are offering a wide range of stocktaking bargains. Their writing and printing, arts, surfaced and tinted papers are high in quality and low in price. Special attention is drawn to their cover paper de luxe, "Ye Olde Century."

# The Rapid and Efficient Upkeep of Printing Plant

By C. W. BRETT.

*In this Article the Managing Director of Burimar, Ltd.—the  
World's Scientific Master Welders—draws attention to an  
Important Recently-Developed Department of Engineering Science.*

While the general outlook in the printing and allied trades has recently become more reassuring, the time has not yet arrived when the whole industry can view the future with absolute complacency. Markets are opening; opportunities are presenting themselves; but the position is still full of anxiety. The high cost of raw material, the universal industrial unrest, the tightness of money, and many other factors, conspire to sustain an atmosphere of uncertainty.

The printing trade, of course, is not alone in this; conditions the world over are still unstable; and though rumours of coming trade booms reach our eager ears, producers everywhere are still awaiting their advent.

In the circumstances, it is incumbent upon directors of production to prepare for a trade revival by the purposeful practice of rigid economy. Now is the time to set one's house in order, and to place each enterprise upon a sound basis.

Few capable business men have failed to organise and readjust the administrative side of their concerns, but we fear too many have failed to appreciate the immense opportunity which exists for the practice of "cellar-to-attic thrift."

## The Maintenance of Machinery.

Strangely enough, when considering economies, many men overlook the possibilities of the workshop, and do not realise that important savings in time and money can be effected in the heavy items which go down under the heading "Maintenance Charges."

The printing trade, in particular, is open to criticism in this matter, for although a reliable, inexpensive, and permanent system of mechanical upkeep exists, a large number of printers keep their plant in commission by the costly and unnecessary method of replacement. Now the replacement of a worn or fractured or damaged component or machine is not, in point of fact, a repair at all, but the purchase or part purchase of a new whole. Repair involves the reconstruction or rehabilitation of the original fabric, so that it is restored to its pristine condition, yielding precisely 100 per cent. efficiency.

Now, there is only one process whereby this can be accomplished, only one method by which industrial metals can be homogeneously united, built-up, or otherwise made good, and this unique manner of restoring disabled machinery to full service involves the practice of scientific welding, or autogenous fusion, as it is sometimes called.

## What Can be Done.

In the compass of a short article it is clearly impossible to enter into a detailed description of a scientific and highly technical process; but in order to convey some idea of its scope and utility to master printers, we cannot do better than append the following incomplete list of machines which have been rapidly, inexpensively, and permanently returned to full service:—

Gas, oil, petrol, electric or steam power units (all parts, whether in cast iron, cast steel, wrought iron, alloy steel, aluminium, bronze,

or gun metal), guillotines, cutters, folders and gummers, stitchers, ruling machines, sheet feeders, presses (all descriptions) bookbinding and lithographic plant, perforators and

autogenous fusion can only be entrusted to the specialist, the man who has spent years in the laboratory and the workshop studying the intricate problems of metallurgy, and the

**This Press Broke through Excessive Strain.**

punchers, drilling machines, cornering machines, binders, typecasting machines, embossers, trimmers, sewing machines, wrapping machines, die cutters, stampers, waste-balers, linotype, composing or type-setting machines of all kinds, hoists, elevators, run-aways, weighing machines, and all kinds of transport units, including industrial trucks, vans, tenders, or lorries, steam, petrol, or electrically driven.

Each of these machines has been repaired—often without unbolting from its base or dismantling—in a few hours, at a fraction of the cost of replacement; and each, having been subjected to rigorous laboratory tests before delivery, has stood up to the heaviest demands that can be made on a new machine.

So much for the efficiency of the process; it now remains to utter a few words of caution as to the manner in which scientific welding is applied.

Admittedly it is a comparatively simple matter—given the requisite equipment—to unite two pieces of industrial metal by fusion; but mere junction, as has been conclusively proved by X-ray, radio-metallographic, and microphotographic examination, is not necessarily welding. Too often laboratory tests reveal in the efforts of untrained and unqualified welders a large number of serious defects, of which the following may be taken as representative: hard-beads, cold-shuts, oxidation, injury to main fabric, out-of-alignment, warping, distortion, flaws due to uncontrolled contraction and expansion, faults arising out of improper thermal preparation, or the use of an unsuitable “feed-rod” or electrode.

These things prove that the practice of

normal and abnormal behaviour of all descriptions and grades of metals under high-temperature treatment. Anyone can do a job

**Welding Experts made a Sound Repair  
In Record Time and at  
Reasonable Cost.**

anyhow, but to do it as should be done is work for the expert.

A 50 per cent. reduction in upkeep charges, and a permanent and 100 per cent. efficient repair is well within the powers of the welder, but only when he has the skill, ingenuity, experience and patience which comes of special training. But even then, success does not rest entirely with the competent operator; he must work under the direction of an expert metallurgist who has specialised in each of the half-dozen welding processes commonly employed. The "one-process" man is not in a position to undertake all classes of repairs, any more than a surgeon with one lancet can perform all sorts of critical operations.

Scientific welding, the sole means of metallic repair, can be relied upon to maintain all descriptions of plant and machinery in almost constant commission, but only when it is applied by qualified craftsmen. Cases are on record in which a net saving of three hundred pounds has been effected, but there are other cases—when work has been entrusted to incompetent operators—where a net loss of a thousand pounds has had to be faced through the destruction of valuable machinery.

In this, as in every other scientific process, good results depend upon technical skill, and an adequate equipment; given these things, however, autogenous fusion and 100 per cent. efficiency are synonymous terms.

Scrapping disabled machinery is the antithesis of economy; scientific welding is its apotheosis.

## Openings for British Trade, etc.

Inquiries have been received by the Department of Overseas Trade (Development and Intelligence), 35, Old Queen-street, London, S.W.1, to whom further inquiries should be addressed with the reference number quoted.

### HOLLAND.

H.M. Consul-General at Rotterdam reports that he has been approached by a reliable firm of that city, who desire to obtain the representation for Holland of a United Kingdom manufacturer of bookbinding cloth, calicoes and moleskins. Applications for name and address must be sent to the Department of Overseas Trade. (Reference No. 18.)

In the current issue of *Marshall's Monthly Message*, the house organ of the Marshall Engraving Co., is to be found some very sound advice to advertisers on the value of illustrations in advertisements.

THE lectures delivered at the International Advertising Exhibition on advertising are to be published in book form next month, under the title, "What I Know About Advertising," the volume being handsomely turned out by Spottiswoode, Ballantyne and Co.

An Advertisement is always working.

## A Holiday Home for Printers.

### Outcome of Joint Industrial Council.

Printers in the Cardiff district—where the principles of Whitleyism have been adopted with enthusiasm and put into practical application by the District Committee of the Joint Industrial Council—are now reaping some of the fruits of the consequent more harmonious co-operation of employers and employed. The social and other amenities that have been forthcoming are many, but at this season when summer holidays are so much to the fore, special interest attaches to the Holiday Home at Weston, which owes its existence chiefly to the joint efforts of Mr. Frank Murrell, chairman of the Cardiff District Committee, and Mr. James Ford, secretary of the workmen's side of the same body. At this Home, which is managed by the Cardiff District Committee, the terms are so low that it is practically cheaper for employees to live there than at home. Printing trade workers of the district are subscribing 1d. per week towards the maintenance fund, and we understand there is a movement afoot on the part of the employers which may result in their taxing themselves also so as to guarantee the maintenance of the Home.

As regards the character of this institution, we have it on first-hand information that the Home is a very pleasant place to stay at, and we note that, on a card that is being sent round to local chapels notifying members of vacant dates available for holidays, quotation is made from one of "many letters of appreciation" received, the writer speaking in very high terms of the comfort of the Home and of the excellent manner in which it is conducted.

Cardiff printers are beginning to glimpse some of the big possibilities of all-round betterment which the Whitley principles involve. It is no exaggeration to say that the work done by the Joint Industrial Council in the Cardiff area has resulted in a complete change for the better in the attitude of local printing trade employees towards their employers. The activities of the Cardiff District Committee should not be lost sight of by the trade in general, as in this respect Cardiff is providing a most interesting object lesson for the whole industry.

ACCORDING to Messrs. Jordan and Sons, Ltd. there were registered at Somerset House between January 1st and June 30th last 76 private stationery companies representing capital of £780,000; 38 companies under the heading of publishers (36 private), with capital of £308,700; and 18 newspaper companies (17 private), the capital being £211,300. Messrs. Jordan state that the number of companies registered in the half year show a great decrease compared with the corresponding period of last year.

## Alfred Evans Memorial.

### Tribute to a Great Trade Union Leader

The late Mr. Alfred Evans not only did a great service as general secretary of the National Union of Printing and Paper Workers, but he left a lasting memorial in the form of a convalescent home at Carshalton, where so many printers and paper workers have found rest and renewed health in delightful surroundings. In this Home, which is now named after him, the authorities have

placed in the porch a bust of the late general secretary, so that all who visit the Home may visualise the man who founded it.

The ceremony of unveiling the bust was performed on July 2nd by Mr. A. E. Holmes, general secretary of the Printing and Kindred Trades' Federation. In doing so, Mr. Holmes paid a tribute to the valuable work which Mr. Evans performed on behalf of the printing and kindred trades, and for the Trade Union movement as a whole.

The bust bears the following inscription:—

"Alf. Evans, General Secretary, 1889-1918 Founder of this Convalescent Home, 1915."

Mr. T. G. Newland, general secretary of the Printing and Paper Workers' Union, who succeeded Mr. Evans in that office, in moving a vote of thanks to Mr. Holmes, referred to the great benefits which the Home conferred upon members of the National Union. He mentioned that during the past twelve months 127 men and 227 women were in residence, while the income from contributions alone amounted to £7,987 as against an expenditure of £3,556. Mr. Newland also referred to the number of valuable gifts which had been made to the Home, the principal one being the new bridge across the river which was presented by the West Herts branch of the Union (John Dickinson). The Home has accommodation for 49 patients, and there are at present 30 in residence.

Mr. H. Chalk, president of the Paper Workers' Section of the Union, presided over Saturday's proceedings, and Mr. G. Harroway, the president, was among those who attended.

## THE Worshipful Company of Stationers.

At the last Court of the Worshipful Company of Stationers, Mr. Edward Unwin relinquished the Mastership after a year of valuable and progressive work on behalf of the company. Mr. C. R. Rivington, J.P., D.L., former Clerk of the Company, now occupies the chair.

At the same Court the following well-known gentlemen were elected Liverymen of the Company:—Sir R. H. Baird, K.B.E. (Messrs. W. G. Baird, Ltd., Belfast), Major Dudley P. Forman, B.A. (Messrs. Thomas Forman and Sons, Nottingham), Captain Frank Petty (Messrs. Petty and Sons, Leeds), Mr. E. N. Mathieson (Messrs. Burrup, Mathieson and Sprague, Ltd.), Mr. E. F. Stanford (Messrs. Edward Stanford, Ltd.), and Mr. S. J. Baker (Mr. R. H. Ruddock).

## Paper Manipulation Fees.

H.M. Commercial Secretary at Prague has forwarded a revised list of the "Manipulation" Fees payable on certain goods exported from or imported into Czecho-Slovakia. The rate of the Export Manipulation Fees is half per cent. in the case of the following goods: Cardboard and manufactures thereof; cigarette papers; cellulose (pulp); paper (including coloured paper and parchment paper) and paper goods of all kinds except post cards; stationery and books; and wood flour for manufacture of paper. In the case of paper spun yarn, string and semi-paper goods the rate is one-fifth per cent.

Manipulation fees on imports include post cards, congratulatory and similar cards,  $\frac{1}{2}$  per cent.; photographic papers, 5 per cent.

# Printers' Managers and Overseers ASSOCIATION.

## Monthly Meeting.

### Business Matters Warmly Discussed.

The Parent Association of the P.M. and O.A., at their monthly meeting on the 5th inst., had a warm evening in two senses of the phrase. The summer weather did not prevent a good turn out of members, and although at the opening of the proceedings business was conducted in rather phlegmatic fashion, a change soon took place, and the meeting proved to be an exceptionally lively one.

The presence in the chair of Mr. A. E. Jarvis (president) for the first time since his recent illness was not allowed to pass without comment. The secretary referred to the point before proceeding with the evening's agenda, and Mr. S. M. Bateman and Mr. E. H. Berryman took the opportunity of expressing on behalf of the members the Association's welcome to the returning president and congratulations on his satisfactory recovery. This was very heartily supported by the meeting, and Mr. Jarvis briefly replied, mentioning how very near he had been to the "beyond," and returning thanks for appreciative remarks that had been made regarding his services to the Association.

After the reading and approval of the minutes of the June meeting the nominations of candidates for membership were put to the vote, and the following gentlemen were elected, several of them present receiving a personal welcome from the president:—Mr. H. K. Jeal (Love and Malcolmson, Ltd., Redhill, works Manager); Mr. J. E. List (Livermore and Keetch, 44 and 46, Hampstead road, Euston, general manager, letterpress); Mr. E. A. Littlewood (Bradbury, Wilkinson and Co., Ltd., 25, Farringdon-road, E.C.1, overseer, lithographic); Mr. H. W. Mitchell (Sidney Mitchell, Ltd., 74, Fann-street, E.C.1, general manager, letterpress); Mr. O. Olding (Love and Malcolmson, Ltd., Redhill, overseer, letterpress machine department); Mr. C. Sims (the *Essex Telegraph*, Ltd., Colchester, overseer, composing); Mr. G. Thynne (Victoria House Printing Co., overseer, rotary letterpress).

### Annual Report and Accounts.

It was agreed that the annual report, already circulated to members, be taken as read, and, after the usual formal moving and seconding, the report was approved without discussion. The secretary remarked that the report and balance-sheet had, according to rule, been sent round to the Centres, and he read comments which he had received from the provinces expressing satisfaction at the Association's continued success as indicated by these documents.

The balance sheet was then considered, the different sections being taken separately. The sections relating to the general fund, the benevolent fund and the death benefit fund

were approved without discussion. When the *Managing Printer* account was reached Mr. S. A. Dawson broke the spell of silence, and a good deal of discussion ensued. Questions as to "Book Debts," "Printing and Stationery," and "Management Expenses and Commission," were put and answered to general satisfaction. In the end, the motion to approve the account was carried, Mr. Dawson himself acting as seconder. The capital account was then approved without debate.

The Association's auditors, Messrs. H. J. Forder and W. H. Mann, expressed their entire satisfaction with the way in which the accounts of the Association were conducted, Mr. Mann adding a word of criticism as to the manner in which some of the Centres sent in their quarterly reports, causing unnecessary work to the Parent Association.

On the president's putting before the meeting the recommendation of the Council "That Mr. H. Blackwell be co-opted as technical secretary to fill the vacancy caused by resignation of Mr. H. R. Whipps," it was proposed, seconded and agreed that the recommendation be approved.

### The New Technical Institute.

There was next put before the meeting a recommendation of the Council with regard to the new Printing Technical Institute. The recommendation was "That the Association contribute the sum of £65 per annum towards a fund of £2,500 required yearly by the London County Council for a period of five years from the date of the opening of the school."

Mr. J. R. Riddell, as chairman of the Association's technical committee, moved that the recommendation be approved. He referred to the need for a technical school adequate to the requirements of the printing industry. Hitherto no trade associations had identified themselves with any technical institute, but by passing this recommendation the P. M. and O. A., which had always made technical education a foremost plank in its platform, would have representation on the governing body of the new school.

Mr. J. A. B. Reed seconded.

Mr. S. M. Bateman raised a doubt as to whether the Association would be quite in order, according to its rules, in adopting this recommendation. He also asked how the figure of £65 had been arrived at.

Mr. J. C. Pugh told how he, with other representatives of the Association, was present at a meeting at which Lord Riddell had put down the respective amounts which he thought would be fair to suggest as subscriptions payable by the different trade associations, trade unions, etc. Mr. Pugh went on to urge the desirability that the P. M. and O. A. should not be left out of the scheme.

Mr. Forder raised an objection to centralisation of educational facilities.

Mr. Bateman again suggested doubt whether the proposition was in order without alteration of the rules of the Association.

The secretary said he took it that, in accordance with rule, the sanction of the Centres would have to be obtained before money from

the General Fund could be used for this purpose.

Further discussion ensued, in the course of which it was mentioned that the trade unions were heart and soul in favour of the scheme, that and provision of the £2,500 in question would give over the government of the school to the trade, whereas if the money were not forthcoming the L.C.C. would carry on the school independently. Mr. Dawson put forward as an amendment that the words "Parent Association" be substituted for "the Association," thus making the proposal purely a London matter. Several members, however, including the president, thought that Provincial members, who were known to be very keen on technical education, should at least be given the opportunity of making it an Association matter.

The president first put to the meeting a resolution pledging the Association to find the £65 required. This was carried with but two dissentients. Mr. Dawson's amendment was then put, but was negatived by a large majority. Finally the Council's recommendation as printed was put and was heartily carried.

The last item on the agenda was "general business." Under this heading Mr. Pugh found opportunity to reply to some strongly worded criticisms made in print by Mr. J. Campbell, with regard to the Association's Death Benefit Fund. Mr. Pugh delivered a very vigorous speech, and the general secretary joined in by adducing pertinent facts and figures anent the points in dispute. Mr. Campbell then spoke at some length in reply, and finally Mr. Pugh spoke again. In regard to some of the matters touched upon, personal feeling ran regrettably high, but the discussion probably served a good purpose by letting in light upon some questions of much internal interest to the Association.

## A Cornwall Press Outing.

The compositors engaged at the Cornwall Press, Paris Garden, S.E. (formerly Richard Clay and Sons) held their annual outing on Saturday last, when a party of nigh a hundred proceeded from Waterloo to Hampton Court, and thence by launch to Windsor. Mr. J. Griffiths (works manager) and his assistant (Mr. Baker), accompanied the party, which also included the overseer of the composing room (Mr. T. C. Bell) and his deputy (Mr. Cattermole), the overseers of the foundry (Mr. Forsyth), the machine department (Mr. W. H. Hagan), and the reading department (Mr. W. A. Perkins), and representatives of the office staff (Messrs. G. Pond, Bessell and Nobbs).

Arrived at Hampton Court, the party made for East Molesey lock, where they embarked on the "Princess Beatrice," many being surprised to find, after reading the alarming paragraphs in the daily press of late, that there was so much water in the Thames; at

any rate, there was sufficient for the purposes of the expedition. On board, waters of a different character had been provided, and, judging by events, they were needed, for under the parching rays of the sun, the store was rapidly depleted. The excursionists found delight in the vocal and instrumental efforts of some of their number, especially in the humorous contributions of the irrepressible Mr. Tommy Temple, of whom it may be said that age does not wither nor custom stale his infinite variety. Songs, duets, quartets and piano solos there were in such profusion that space does not allow of a full catalogue of performers and performances, but it were shame indeed to omit to mention the hard efficient work accomplished by Mr. Vause as accompanist.

At Chertsey the party "onlighted" (as the ancient English has it), and found at the Bridge Hotel a capital cold collation, to which full justice was done. Mr. Griffiths (the works manager) presided, and arrayed on his right and on his left was the galaxy provided by what the old soldier of the company described as "the headquarters staff." There was but little speechmaking, though what there was of oratory was of a superior order. The Father of the Chapel (Mr. G. C. Edwards) is a man of eloquence, but not of loquacity, and consequently in proposing the toast of "The Firm," he said just the right thing in the right way in the fewest possible words. Mr. Griffiths (in replying on behalf of Messrs. Iliffe, the proprietors of the Cornwall Press, showed that he too knew what to say and how to say it. Both speeches were much acclaimed.

Returning to the "Princess Beatrice," the journey to Windsor was resumed to the accompaniment of more music, and when the Castle Hotel was reached, something short of six o'clock, tea came very acceptably. Before leaving the tea table the chairman (Mr. Griffiths) paid a deserved tribute to the labours of the stewards, for whom response was made by Mr. H. Addison, who placed the real credit for the excellent arrangements on the shoulders of the Father and Clerk of the Chapel, Messrs. G. C. Edwards and W. C. Chapman.

The members of the party, after an hour or two spent in strolling round the Royal Borough, returned to Waterloo by train, the convivial spirit being maintained to the end, particularly in one compartment, where "Old Tom" (familiarity on this occasion will be pardoned) kept his companions in fits of laughter.

The unanimous verdict was "a unique gathering"—weather and every concomitant circumstance combining with Cook's and the committee to make everything go without a hitch.

A GARDEN FETE is to be held on Saturday July 23rd, in Manor House Hospital Grounds, North End-road, Golders Green, in aid of the first Labour hospital (Industrial Orthopaedic Society). Mr. T. E. Naylor, J.P., is one of the speakers of the occasion.

# Trade Notes.

A LARGE firm of London printers is one of the concerns which have, in view of the coal situation, installed oil fuel in place of coal.

**WILLS.**—The late Mr. Peter Langford Brook Saunders, Eccles, printer, left £9,408; Mr. T. W. Twyford, of Newcastle-under-Lyme, chairman of the *Staffordshire Sentinel*, left £236,765.

**MR. THOS. ABBEY** (London Society of Compositors) is working hard to raise a pension in connection with the Printers' Pension Corporation. His list of subscriptions now reaches £260, but he requires £400 in order to achieve his object.

News has been received of the death of Major Douglas Story, late of the 5th (Reserve) Battalion Middlesex Regiment, a well-known journalist, who until lately was director of information in Bengal. Major Story was found dead in a train near Kotah (Rajputana).

THE Joint Industrial Council meeting of July will be an important one: officers for the year will be elected, and reports of special interest from the Unemployment Committee and the Apprenticeship Committee will be presented, affording material for earnest discussion.

THE Costing Committee of the Federation of Master Printers are taking active steps to impress upon the printing industry the importance at the present juncture of maintaining a fair level of prices. Special literature is to be issued and meetings arranged in different parts of the country.

At a meeting of the Council of the Newspaper Proprietors' Association last week, with Lord Riddell (vice-president) in the chair, the following resolution was passed:—"This Council desires to urge upon the Imperial Conference the vital importance of taking every possible step to increase facilities for communication within the Empire as early as possible."

**ESPERANTO.**—French printing trade workers are forming a *Groupe espérantiste des Travailleurs du Livre*, with a view to encouraging the study among French printers of the international language, Esperanto. It is intended later to form an international Esperanto Society among those engaged in the arts of book production, and the starting of an international typographical magazine in esperanto is contemplated.

At Durham Summer Assizes last week John George Chipchase, 50, printer, and John George McKenzie Chipchase, 22, printer, on bail, failed to answer to their names when called. The charge against the defendants was of conspiracy to obtain by false pretences from his Majesty's Foreign Office a passport purporting to be for one John Smith, at Darlington, between January 27th and February 8th. His Lordship made an order estreating the recognisances.

**MR. FREDK. SANDERSON**, editor of the *Sunday Pictorial*, left £7,665.

By the death, in his 74th year, of Dr. Axel Lille, Finland has lost one of its best journalists.

THE *Darwen Gazette*, the official Conservative organ for the Darwen Division since 1885, ceased publication last Thursday. The paper maintained its old charge of 1d. throughout.

**MR. G. H. WINTERBOTTOM** (the Winterbottom Book Cloth Co.) is among the signatories to a manifesto pointing out, on behalf of merchants, the evil effects of the Safe-guarding of Industries Bill.

We are asked to state that the "Motor Coach A.B.C.," mentioned in our last issue, is not printed by the Morland Press of 190, Ebury-street, S.W.1, but by another firm of the same name at 165, Southampton-street, S.E.5.

**MR. WATKIN WYNNE**, one of the founders and the manager of the *Sydney Daily Telegraph*, has died. Mr. Wynne was a leading and much respected figure in Sydney newspaper circles. He introduced the linotype into Australia, and invented various mechanical devices.

THE Military Governor of Cork has issued a proclamation stating that, as there is reason to believe the *Irish Catholic Herald* has been used and is likely to be used for purposes prejudicial to the restoration or maintenance of order in Ireland, he prohibits its sale in the martial-law area as from July 15th.

A TELEGRAM from Rome reports the discovery by the police at Milan of an enormous establishment for the printing of forged notes for 1,000 and 500 lire. Notes to the value of 650,000 lire have been seized, but the forgers admit that the establishment had printed 90,000,000 notes, and that this enormous stock had been passed abroad.

THE death is announced of Baron Bernhard von Tauchnitz, the head of the well-known Tauchnitz publishing firm. Baron Bernhard, who was 80 years of age, had been at the head of the great Leipzig house since the death of his father in 1895. He was the pioneer in Europe of the reproduction of foreign works, especially English.

It is announced that the late Mr. Middleton Greathead, of Darlington, who died some years ago, left £1,000 for the establishment of a scholarship at the Darlington Grammar School confined to sons of journeyman printers in the town. Mr. Greathead was himself a printer. The bequest was subject to a life interest, which has now expired.

**MR. W. LEONARD TOD, J.P.**, chairman of Wm. Tod, Jun., and Coy., stated at the annual meeting at Polton, that papermaking had been badly affected by the general slump in business. Since the beginning of January the mill had been on short time, and now it was closed till the miners' strike was settled. The usual dividend on preference shares was declared. An interim dividend was paid on the ordinary shares last autumn.

### FORTY-THIRD YEAR.

Printed and Published **EVERY THURSDAY**  
by **STONHILL & GILLIS**,  
at 58, Shoe Lane, London, E.C. 4.

Tel.: Stenhill, Fleet, London. Phone: 8407 City.

**SUBSCRIPTION:** Per Annum, 8s. 8d. (POSTAGE EXTRA).

**Charges for Trade Advertisements:**  
(Full page 8 by 5½ ins.)

Whole Page ...	£4 10 0	s. d.
Half Page ...	2 10 0	One-eighth Page 17 6
Third Page ...	1 17 6	One-third Column 22 6
Quarter Page...	1 10 0	One inch in Column 9 0

An Extra Charge for Cover and Special Positions.  
Discounts according to Number of Insertions.  
Representatives throughout the United Kingdom and  
also in Australia, India, South Africa, United States  
Canada, etc.

All communications for the "BRITISH AND COLONIAL  
PRINTER AND STATIONER" should be addressed and  
Cheques and Post Office Orders made payable to—  
**STONHILL & GILLIS, 58, SHOE-LANE, LONDON, E.C. 4.**

Copies may be purchased at the Offices, as above  
or from Messrs. W. H. Everett and Son, Ltd., news-  
agents, 11, St. Bride-street, E.C. 4.

THURSDAY, JULY 14, 1921.

## Current Topics.

### The Wages Position.

TO-DAY (Thursday) is the date agreed upon for the resumption of the adjourned wages conference between the Federation of Master Printers and the Printing and Kindred Trades' Federation, and we go to press on the eve of these negotiations. It will be remembered that at the previous meeting, on June 28th, it was found necessary to adjourn the conference on account of difficulties encountered in arranging that the Printing and Kindred Trades' Fed. should negotiate for the whole of the unions in the industry. While these difficulties have been in part overcome, there remain, we understand, two unions, viz., the Typographical Association and the Amalgamated Society of Lithographic Printers, which decline to join with the rest and authorise their federation to act for the unions as a whole in this matter. Questioned as to whether the decision of these two societies would affect the attitude of the P. and K.T.F.

towards negotiating on behalf of all the other unions in the Federation, Mr. A. E. Holmes, the Federation's secretary, said he was unable to give any definite answer. He added that an administrative council of the P. and K.T.F. was to be held to-morrow (Friday) to receive reports as to the decisions of the federated societies with regard to maintaining a united attitude in the negotiations, of the council would also receive a report of to-day's conference with the Federation and Master Printers. The Employers' Federation has, we learn, arranged to meet the Typographical Association to-day at a conference immediately following that with the P. and K.T.F. while a conference with the Lithographers is to take place shortly after.

### A Strike of Publishers?

THE publishers are out once more with a piteous cry as to the cost of printing. It will be generally admitted that there is urgent need for the reduction of printing trade costs so as to enable printers to comply with the growing demand for some reduction of prices, but not all printers will accept without question the plea of the publishers that while the printer's bill to the publisher has been steadily and freely lengthening, the publisher has failed to do himself justice in the prices he charges for the finished volume. But be that as it may, the Publishers' Association is hot on the track of cheaper printing. Its latest manifesto is of special interest as it takes the form almost of an appeal for a publishers' strike to force down printers' prices. The following resolution was passed at a meeting of the Council of the Publishers' Association held on July 7th, 1921: "In view of the fact that in most trades a reduction of wages has taken place, and that no such reduction has taken place in the printing and allied trades, members are strongly advised to abstain, so far as possible, from putting out any new books, new editions or reprints until a substantial reduction of the very high prices now prevailing is made." This move of the publishers is worthy of serious notice as being one more indication of the fact that customers are holding over orders for printing because they think that some reduction of printers' prices is now due, but the above quoted resolution is open to the very serious criticism that it apparently assumes that a reduction of wages in the printing industry ought to be followed by a reduction of prices in about the same ratio. While the wage factor is a very important one—and any substantial reduction in wage rates would doubtless be reflected in

some fall in prices—yet the wage factor is only one of many, and to make this assumption of equal-ratio reduction of wages and prices shows a lamentable disregard of costing science.

• • •

### Some Federation Council Matters.

THE Council of the Federation of Master Printers at its meeting yesterday considered a number of very important matters. The unsatisfactory replies received from the Postmaster General were severely commented upon, and it was decided to take further steps to secure reduction of the postal rates before certain branches of the printing industry suffer irreparable injury. Another important point discussed related to paper box-making. It appears that the Trade Board Department of the Ministry of Labour are anxious to define more clearly the operations coming within the scope of the paper box-making trade board, and in doing so they propose that printing, gold blocking, etc., in the box-making factory shall come within the scope of this trade board. Exception was taken to these proposals, and the Federation will no doubt make effective protest in the matter.

### A Weekly Rest Day.

PEOPLE are so much occupied with the worries of business details that they are apt to overlook some of the important movements which are afoot. One of these is represented by the activities of the International Labour Organisation for dealing with labour questions set up under the Peace Treaty. Two conferences have already been held—one in Washington in 1919 and the other in Genoa in 1920. A third is due to take place in Geneva in October next. Set down on the agenda for the forthcoming conference is the question of an international agreement to regularise the adoption of the principle of a weekly rest day of 24 hours. This day, it is suggested, should be Sunday, though exceptions are proposed in the case of works of public utility. The fact that the principle of a weekly rest day is not recognised in many foreign countries shows how far the United Kingdom has gone with its week-end respite. The object of those who are behind the International Labour Organisation is to co-ordinate the conditions in the various lands. Much benefit would arise from such a readjustment, since the long hours in some parts of the world represent unfair competition with labour in this and other countries where working conditions are better.

## Personal.

LORD BURNHAM presided at a luncheon given by the Newspaper Proprietors' Association at the Savoy Hotel, in honour of the Belgian journalists in this country in connection with the visit of the King and Queen of the Belgians.

ON the Provisional General Committee which is making the arrangements for the complimentary dinner to be given to Sir William Ewert Berry, Bart., on Wednesday, July 20th, at the Savoy Hotel, are many prominent printers as well as almost every London newspaper proprietor.

THE growth of the Berry control has been watched with much interest by printers. Sir W. E. Berry, with his brother, Mr. J. Gomer Berry, first established the *Advertising World*, and from that small beginning there followed the control of a number of papers that are in the first rank of journalism. Last year they purchased the historic publishing house of Cassell and Co. and later acquired Kelly's Directories.

MR. CHAS. R. RIVINGTON, who has been the Upper Warden of the Stationers' Company for the past year, will succeed Mr. Edward Unwin as Master. He was elected to the Court some eight years ago and was for some time clerk of the Company.

MR. W. H. BURCHELL stimulated a vast amount of interest in the subject of "Printing Office Management" at a meeting on Tuesday night of the South-West London Master Printers' Association at Lavender Hill.

MR. J. D. WISE (the President) was in the chair, and there was an unusually large gathering, the discussion being so interesting that it was decided to take up the subject again in October.

MR. FRANCIS W. HIRST, editor of *Common Sense*, before sailing for California to fulfil a lecturing engagement at Leland Stanford University, was honoured last week by a dinner at the Savoy, when he received a hearty send-off from a distinguished gathering of literary and political friends of all parties.

TO COMMEMORATE his 50 years' service with the firm of Messrs. Horne and Son, Ltd., publishers of the *Whitby Gazette*, the directors gave a staff dinner recently, and presented Mr. Edmund Hall, "father of the chapel," with a wallet containing £25 in Treasury notes, Mrs. Hall receiving a gold brooch. The gift from the employees was a Chippendale 8 days' chiming clock.

## Commercial Intelligence.

### CURRENT SHARE PRICES.

Amalgamated Press, 95s., 95s. 7½d.; Associated Newspapers, 7 p.c. Cum., 16s. 3d., Pref., 14s., 13s. 7½d.; Byrom, 14s. 9d.; R. W. Crabtree and Sons, 8 p.c. Cum. Partg. Pref., 6s. 6d.; *Daily Mirror* Newspapers, 8 p.c. Cum. Pref., 17s. 9d.; John Dickinson, 24s., 24s. 3d.; Educational Supply Association, 6 p.c. Cum. Pref., 11s. 3d.; International Linotype, 51½, 51; Lamson Paragon Supply, 18s., 17s. 6d., Pref., 11s. 1½d., 10 p.c. Cum. Pref., f.p., 20s. 9d.; Charles Marsden and Sons, 6 p.c. ### DIVIDENDS AND REPORTS.

LANSTON MONOTYPE.—The Lanston Monotype Corporation announces interim dividend at rate of 2 per cent. for six months ended March 31st last.

### NEW COMPANIES.

TOWN TOPICS, LTD.—Capital £500, in £1 shares; proprietors and publishers of newspapers, journals, magazines, books and other literary works, etc. Private company. Subscribers: C. T. Twort and F. A. Saxon. First directors: H. E. Beesley, F. P. Stopford and C. T. Watney. Registered office: 14, New Bridge street, E.C.

RICHARD JACKSON, LTD.—Capital £17,000, in £1 shares, to take over the business of a bookseller, fine art dealer, stationer, printer and publisher, carried on by Richard Jackson, at Commercial-street, Albion-place and Belgrave-street, Leeds. Private company. Subscribers: R. Jackson and R. Jackson, Junr. First directors: R. Jackson and R. Jackson, junr., L. M. Smithson and L. Smith. Registered office: 16 and 17, Commercial-street, Leeds.

ORCHID REVIEW, LTD.—Capital £1,000, in £1 shares, to take over the business of proprietor and publishers of the *Orchid Review*, carried on by Mrs. Caroline A. B. Rolfe, at 12, Lawn-crescent, Kew, as "Frank Leslie and

Co.," and to carry on the business of printers, publishers, etc. Private company. Directors: J. J. Cypher, D. A. Cowan, J. M. Black, F. K. Sander and H. H. Smith. Registered office: 70, Sheen-road, Richmond, Surrey.

SANDERS, AUSTIN AND CO., LTD.—Capital £1,000, in £1 shares; advertising, printing and stationery agents, dealers in advertising novelties, programme printers, dramatic and musical publishers, manufacturers of and dealers in apparatus and appliances for making, presenting or reproducing photographic or other pictures, etc. Private company. Directors: T. Sanders and I. T. Austin. Registered office: 50, Charles-street, Cardiff.

GUINEA AND WEST AFRICA ENTERPRISES, LTD.—Capital £3,500, in £1 shares; merchants, shippers, manufacturers, and wholesale and retail dealers, printers, etc. Private company. Directors: Captain J. E. Gilkes, Major G. R. Heathcote, M.C., C. C. Berryman, F.A.I., and G. B. Barnett. Registered office: 2, Hans-road, S.W.3.

SIMPSON'S (LONGSIGHT), LTD.—Capital £500, in £1 shares; to take over the business of Simpson's Midway Drug Store, 920, Stockport-road, Manchester, and to carry on the business of chemists, stationers, photographic apparatus dealers, etc. Private company. First directors: J. S. Simpson and C. Simpson. Registered office: 920, Stockport-road, Longsight, Manchester.

H. REEVE ANGEL AND CO., LTD. (London).—Capital £42,000, in £1 shares (12,000 pref.); agents for manufacturers of, and dealers in, paper and pulp and articles made therefrom, etc., and to adopt an agreement with H. R. Angel. Private company. Subscribers: H. R. Angel and A. E. Squire. First directors: H. R. Angel, R. J. Angel, and A. E. Squire.

H. O. DANIEL, LTD.—Capital £10,000, in £1 shares; manufacturers of, and dealers in, paper, dealers in esparto and other grasses, jute, flax and other fibrous rags, etc. Private company. First directors: H. C. Pateson, L. C. Pateson, and H. O. Daniel. Registered office: 97, Queen Victoria-street, E.C.

WIGGINS, TEAPE AND CO. (EXPORT), LTD.—Capital £1,000, in £1 shares; wholesale, export, and manufacturing stationers, printers, newspaper proprietors, papermakers, manufacturers of envelopes and all kinds of covers for use in transmission of articles, mill-board, cardboard, railway tickets, and photographic, artistic or other articles, etc. Private company. First directors: P. W. Wood, A. E.

Parke, F. L. T. Barlow, K. Barlow, T. L. Parke, L. W. Farrow, W. G. Hay, J. Horsburgh and J. P. Hepburn.

### COMPANY MORTGAGES AND CHARGES.

Fresh Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 1908, and Satisfaction registered pursuant to Section 97 of the same Act. (The registration of Satisfaction is not compulsory).

LABOUR PUBLISHING CO., LTD.—Issue on May 26th, 1921, of £100 debentures, part of a series already registered.

CONTINENTAL A.B.C., LTD. — Debenture dated June 23rd, 1921, to secure all moneys, not exceeding £1,000 which the mortgagees may pay under their guarantee to the company's bankers. Charged on the company's undertaking and property, present and future, including uncalled capital. Holders: Dr. E. G. Reeve and C. Humphries, 36, Basinghall-street, E.C.

WALLASEY PRINTERS, LTD.—Issue on June 17th, 1921, of £300 debentures, part of a series already registered.

W. P. NIMMO HAY AND MITCHELL, LTD. (publishers, London).—Satisfaction in full on May 31st, 1921, of debentures dated September 26th, 1917, securing £2,000.

### The Bookbinder and the Time Docket.

SIR,—Having followed with great interest the articles and correspondence in your journal, may I venture to add a word?

With many other employers I attended a mass meeting of over 500 operative bookbinders in Manchester under the chairmanship of Mr. Harraway and can testify to the absolute fairness of his dealings as between employer and employed; this meeting was called to enable the master bookbinders of Manchester to endeavour to persuade the men to consent to the use of the time docket. Has any sensible employer in any other trade on earth ever heard of such a degrading position for an intelligent body of responsible employers to be placed? This should not be a question of polite endeavour to persuade, but the time docket should be demanded as a right and as a matter of common sense is an undoubted necessity in order to insure accurate cost.

It is regrettable that Mr. Hazell left the opening for Mr. Harraway to twit him on the question of difficulty in the way of introduction of the time docket into the bindery. *There is no difficulty.*

The only point where trouble arises is the unfortunate necessity for continually preaching costing to the master binder. With a

proper costing system the time docket is indispensable—for how can work be costed without time, and who is better able to record his time than the honest workman on the job?

As a point of difficulty, Mr. Harraway has brought up the threadbare example of the binder who is given the "miscellaneous parcel of books." The employer looks to that man to handle the "parcel" in the way he considers most economical from the point of view of time, and if there are twenty work tickets (which is unlikely) connected with the "parcel," he can lump his time for all; the dissecting process is done in the proper place—the costing office—for after all there are efficient costing clerks to whom employers often pay high salaries, but whose efforts towards efficiency are handicapped by this senseless objection on the part of certain men to the use of the time docket. It is high time the white kid glove method of dealing with such obtusity should be superseded by a bold and firm policy of common sense.

I would ask Mr. Hazell, Mr. Harraway and all others interested in the subject to read the remarks I had pleasure to make at the Scarborough Conference on May 30th last, from which I quote the following:—"In spite of this ridiculous position (the refusal of the binders in Manchester to use time dockets) advance upon advance in wages have been granted to the bookbinding operatives and I do not believe that any other Federation of employers would have done what the master bookbinders have done in the way of concessions in wages and conditions without the most necessary *quid pro quo* "TIME ON WORK" as it can only properly be obtained through the medium of the workman's time docket."

Yours etc.,

HOWARD VICK

(Member of the Costing Committee,  
Manchester M. P. Association).

Manchester, July (th).

[We hope to find room in an early issue to print Mr. Vick's address delivered at Scarborough.—Ed.]

THE Fisher Bookbinding Co. (1912), Ltd., Herne-hill, announce that owing to the firm's annual holiday, the factory and offices will be closed from Monday, July 25th, till Tuesday, August 2nd, inclusive, and re-open Wednesday, 3rd.

At the recent funeral of Mr. Harry Hyssett, of Weston-super-Mare, the printing trade was well represented. Deceased was formerly an able and popular local journalist, and for the past twelve years head of the firm of Messrs. Hyssett and Son, printers, High-street. There were many beautiful floral tributes, including those from the Somerset District Master Printers' Association, the members of the executive of the Weston-super-Mare Advertising and Entertainments Association, the co-directors of the United Billposting Co., the Victoria Bowling Club, St. Kew Lodge of Freemasons, and the staff.

## Printing, Bookbinding & Kindred TRADES OVERSEERS' ASSOCIATION.

### Monthly Meeting.

In spite of a delightful summer evening there was a good muster of members at the usual monthly meeting of the Association held on the 15th inst. at St. Bride Institute, Bride-lane, E.C.4. The president (Mr. A. W. Hunt) occupied the chair and the vice-chairman (Mr. H. Milton) ably supported.

Among the subjects which came under discussion was the new technical school at Stamford-street for the printing and allied trades which the L.C.C. propose to institute next year. The scheme is meeting with general approval among the various sections of the trade, and it is realised that if adequate financial support is given, the more likely it is that the scheme will be run on business lines and conducted by practical men engaged in the industry. In order to set the school going, and to give the trade control in its affairs, the L.C.C. are asking from the industry £2,500 per annum for a period of five years, and when it is remembered that the printing trade is the second largest in the metropolitan area the amount required should be easily forthcoming.

### Correspondence.

A lengthy correspondence included letters from Mr. Robt. H. Swift, superintendent of the Alf. Evans Memorial Home, relating to the visit the Association is paying to Carshalton on the 23rd inst. A letter was also read from Lord Riddell, which included the text of a resolution passed at a meeting of the Council of the new technical school, which was moved by Mr. Howard Hazell, L.M.P.A., and seconded by Mr. W. C. Warren, general secretary of the Electrotypers' Society, that the members of the Council of the Printing and Kindred Trades' Technical School consult their constituents in order that their suggested annual contributions towards the maintenance of the proposed technical institute be increased by at least one-third. A further letter, received from Mr. L. R. Barks, of Hull, stated that he would be grateful to get into touch with any of the London members before taking over an appointment in the colonies. A letter from Mr. B. J. Sansom, one of the examiners at the recent examination at Stationers' Hall, stated that out of the whole of the papers only one received a mark of under 50, and Mr. Peacock wrote thanking the Association for its generous support to the Bookbinders' Pension Society.

In reference to the last item, it was agreed, on the motion of Mr. W. Vernum, seconded by Mr. W. H. Hillman, that the sum of three guineas as last year be sent to the Pension Society.

In regard to the letter of Mr. Sansom, the secretary said that the distribution of prizes takes place at Stationers' Hall on September

16th, and as subscribers to the fund members were entitled to be present.

A new member, Mr. W. F. Cribb (binding), Messrs. J. Miles and Co. received from the president on behalf of the Association a cordial welcome to membership.

### Outing to Carshalton.

The secretary next referred to the arrangements for the visit of the Association to the Alf. Evans Memorial Home, Carshalton, on the 23rd inst., at which date he said Mr. Swift was doing all he could for the comfort and enjoyment of the overseers and their ladies on that occasion.

### The New Technical School.

The president, in supporting the school, said the money that was required from them was to be spent for a noble object, that of improving the minds of the apprentices in the different sections of the trade, and called upon Mr. Eden as representing the Association on the Council of the new Technical School, to speak on the matter.

The secretary explained how far they had proceeded with the scheme and said that owing to the need for increased revenue the sum required from the trade for five years was now £2,500 per annum. He spoke of the great benefit that would accrue to their section of the trade through such a school. It was not to be an art school, but if they supported it sufficiently, there was no reason why the bindery and the warehouse should not be fully represented in its activities, and if its ideals were realised, and he saw no reason why they should not, they were going to secure in the future an efficient apprentice, which alone would be a great acquisition to the workshop. He would like to know that evening what amount the Association was going to subscribe towards the first half-yearly instalment.

Mr. T. Hill proposed, and Mr. Milton seconded, that the Association subscribe the amount suggested from them of £25 a year towards the maintenance of the school.

As an amendment Mr. S. J. Wills moved and Mr. J. Lee seconded that the amount be £10 a year.

Mr. J. Cox, in supporting the smaller amount, said they had other things to consider, and under the circumstances he thought they would be better advised to hold their hands and reserve their liberality.

Mr. F. C. Peacock said if they were informed of what effect the amount suggested would have on the funds, they would be in a better position to vote on the matter.

Mr. A. G. Aves said with the increase of the subscription they would secure roughly an extra £80.

Mr. F. J. Ibbott asked if there were any data forthcoming from the apprentices as to how they regarded the matter.

Mr. Eden said the waiting list of students at St. Bride was sufficient answer to that.

On being put to the vote the amendment was carried, followed by a substantive motion—unanimously agreed to—giving power that if the Association's financial resources war-

ranted it, the amount voted could be augmented.

"Trade Difficulties" next appeared on the agenda for open discussion, and useful contributions were made by Messrs. Peacock, Cox, Milton, T. Hunt, Ibbott and Aves.

A vote of thanks to the chairman closed the proceedings.

## Swiss Import Duties.

### New Provisional Customs Tariff.

By a Legislative Decree of the Swiss Federal Assembly, dated February 28th last, the Federal Council was authorised, as a provisional measure, "to adapt the Customs Tariff duties to the present economic situation, and to bring the new duties into force at a date which shall appear most suitable." The Federal Assembly is, before June 30th, 1923, to decide whether the decisions taken by the Federal Council shall be maintained or, if necessary, what modifications shall be made in such decisions. In virtue of the powers thus conferred, the Federal Council issued, in the *Recueil des Lois Fédérales* for June 15th, a Decree dated June 8th, introducing a new Provisional Customs Tariff as from July 1st. The *Board of Trade Journal* contains the details of the new tariff schedule.

Class VI. includes paper and products of the graphic arts, and the revised rates of duty are given below in francs and cents per 1,000 kilograms, the figures in parenthesis representing the previous rates:—

#### Printing Machinery.

In Class XII. appear machines for typographic printing and other graphic processes; bookbinding machines. The heading printing presses, which bear a revised duty of 20 francs per 100 kilograms. (2.00), includes printing presses properly so-called, such as rotary machines, "presses en blanc," "presses en blanc doubles," Boston presses, hand presses, cylindrical printing machines and automatic layers for printing presses; also the following stereotyping apparatus:—Stereotyping machines and apparatus for casting type ("à fondre à plat et à rond"), presses for stamping and for drying the print, rotary dryers for the print, apparatus for casting rollers, as well as casting furnaces and stereotype furnaces for melting and re-melting metal for graphic processes, electrically heated. Other machines for typographic printing, etc., bear a revised rate of 10 francs, compared with a previous duty of 2 francs.

#### Bookbinders' Wares and Wares of Cardboard.

Cardboard boxes for packing, cardboard tubes not covered, whether printed or not; cardboard cut out for boxes, whether folded or not, or slightly cut for folding, 60.00 (25.00).

Paper bags, cornets and capsules, 80.00 (30.00).

Envelopes: Packed loose, 80.00 (30.00); in boxes, cases, etc., with or without notepaper (stationery), 120.00 (40.00).

Cardboard and paper for Jacquard looms, 40.00 (30.00).

Business books, notebooks, etc., 120.00 (40.00).

Note.—All books used for writing, copying, drawing, pasting, etc.

Book covers, 120.00 (40.00).

Calendars stuck on cardboard and leaf calendars, 100.00 (35.00).

Bookbinders' wares and board wares not elsewhere specified in the General Tariff: Ornamented with paper and cardboard: Albums for pictures and cards, 100.00 (20.00); other, 150.00 (50.00).

Bobbins of paper or board for spinning mills, and for twisting, 60.00 (30.00).

Ornamented with silk, lace, artificial flowers, etc., paper flowers, 350.00 (120.00).

Other, 150.00 (50.00).

The Tariff of Export Duties includes rags and waste paper, the revised duty being 2 frs. per 100 kilograms, as against 1 fr. previously.

#### Paper and Board not Printed—(1) not having undergone any additional Process since Manufacture.

292 Grey cardboard; straw and wood paste-board, leather board, etc. 10.00 (4.00).

Cardboard in sheets less than 0.5 square metres in area is included under No. 330.

Packing paper: 293 Rough on both sides, weighing from 100 to 400 grammes inclusive per square metre. 15.00 (5.00).

194 Not elsewhere specified in the General Tariff, including oiled paper. 20.00 (7.00).

295 Corrugated paper. 25.00 (8.00).

296 "Patent packing" and similar paper. 20.00 (8.00).

297 Tarred paper. 20.00 (8.00).

Note to Nos. 292-297.—The weight of 400 grammes per square metre is taken as the limit distinguishing packing paper (Nos. 293-297) from board (No. 292), so that goods weighing up to 400 grammes inclusive are still classed as packing paper, whilst those weighing over 400 grammes are regarded as board.

Glass, sand and emery paper are included in goods manufactured with emery (Class VIII., No. 630).

298 Blotting paper and blotting board, filter paper, even folded up in the shape of filters. 30.00 (10.00).

299 Tissue paper weighing 25 grammes or less per square metre. 25.00 (10.00).

Note.—Tissue paper weighing over 25 grammes per square metre is included, according to kind, under Nos. 298, 301 or 302.

Printing and writing paper, letter paper, drawing paper: 300 Of one colour, weighing from 45 to 55 grammes per square metre, containing wood (paper for newspaper printing. 20.00 (8.00).

301 Other. 25.00 (10.00).

302 Of more than one colour. 35.00 (13.00).

Cardboard, weighing per square metre: 303 From 200 to 300 grammes, inclusive. 30.00 (12.00).

304 More than 300 grammes. 35.60 (12.00).

Note.—Paper weighing less than 200 grammes per square metre is included in Nos. 300-302.

### (II.) Having undergone some Additional Process since Manufacture.

305 Ruled paper and board. 35.00 (12.00).  
Cardboard (pappen): 306a Coated with chalk or covered with chalk-coated paper. 25.00 (8.00).

300b Worked in colours, with impressed designs. 25.00 (10.00).

Papers and board: 306c Coated with chalk on one side only, worked in colours, plain, 30.00 (10.00).

306d Coated with chalk on one side only, not worked; coated with chalk on both sides or covered with chalk-coated paper; crinkled, perforated paper; gummed paper; non-sensitised paper, 40.00 (15.00).

306c With impressed or coloured designs (shagreened, watered, embossed), 20.00 (10.00).

(Note to Nos. 305-6—Paper of the kinds specified above, with graphic signs, is dutiable, according to kind, under Nos. 312-18).

307a Oiled paper, paraffin-coated paper, tracing paper and waxed paper, 40.00 (20.00).

307b Tin foil paper, 20.00 (5.00).

307c Parchment and parchmented paper and imitations thereof, 25.00 (10.00).

307d Chemically-prepared paper and sensitised paper, 40.00 (20.00).

308 Paper and board cut into strips less than 25 centimetres wide, even if in rolls, 50.00 (16.00).

309 Paper and board made up for retail sale, 50.00 (25.00).

310 Cardboard covered with natural-coloured paper, 25.00 (8.00).

311 Paper not elsewhere specified in the General Tariff, combined with tissues, 40.00 (16.00).

### Printed Paper and Board.

(Note.—More particularly job printing, picture postcards, advertisements, posters of all kinds, placards, labels, etc.).

Paper and board, printed or lithographed:—  
Of one colour: 312 In loose sheets or sewn, 90.00 (30.00).

313 Bound or framed, 100.00 (40.00).

Of more than one colour: 314 In loose sheets or sewn, 110.00 (35.00).

315 Bound or framed, 150.00 (45.00).

Paper and board printed by other than typographic or lithographic process (phototypes, photogravures, engraving on copper, steel, etc.): 316 In loose sheets or sewn, 150.00 (50.00).

317 Bound or framed, 180.00 (65.00).

318 Cut cardboard for mounting photographs, 80.00 (30.00).

Playing cards, 200.00 (200.00).

Wallpaper, 35.00 (12.00).

### Books, Reviews, Prints (Booksellers' Wares and Products of the Graphic Arts).

Printed books, 5.00 (1.00).

Maps and Charts, 5.00 (1.00).

Music, 5.00 (1.00).

Prints and Engravings:—Photographs: Unframed, 60.00 (5.00); framed, 130.00 (65.00).  
Other: Unframed, 100.00 (5.00); framed, 130.00 (65.00).

Pictures: Unframed, 50.00 (5.00); framed, 130.00 (65.00).

to Barimar*

TRADE MARK.

**Barimar, The World's Scientific Master Welders**, make welding repairs that no other concern in the world can do. Barimar's record for repairs to broken machine parts of all kinds is an outstanding achievement in modern engineering practice, and proves to all machinery owners that the **BARIMAR WAY** is not only the money and time-saving way, but that it is the **BEST** way.

**Barimar** gives you a Money-back Guarantee for all machine part repairs; quick delivery; reasonable charges. The following list, though fairly comprehensive, by no means includes all the repairs to printing machinery that are made by Barimar in the course of a year:—

*Guillotines, Cutters, Folders and Gummers, Ruling Machines, Drilling Machines, Type-casting Machines, Sewing Machines, Wrapping Machines, Stampers, Linotype and Type-setting Machines of all kinds.*

**The Barimar Metallurgical Process** repairs Scored Cylinders of any types in **TWO** days under the Barimar Money-back Guarantee. No welding, re-grinding or new pistons and rings needed by this process. Send postcard for "Folder B.P." post free.

**The Welding Test.**—Covers scientific welding repairs to all types of machine parts. Every Printing Works Manager needs this book. Write "Manual B.P." on your letter heading; enclose 6d. in stamps for this book. If you have a repair to be made now, omit stamps.

**How to Send Repairs to Barimar.**—Remove all fittings; attach two adhesive labels showing your name and address as sender; consign, carriage paid, to "Dept. B.P.," Barimar Ltd., 10, Poland Street, London, W.1, or to our nearest Branch—Manchester, Birmingham, Leeds, Newcastle, Cardiff, or Ireland. Send advice and instructions by post.

*If no Branch is convenient, address all repairs and correspondence to:—*

## Standardisation of Paper.

### The Position of the Wholesale Stationer and Paper Merchant.

Those of us who remember the delightful character of Fag in "The Rivals" will remember how, when roundly scolded by his master, Capt. Absolute, he appealed for sympathy to his audience, only to lose that sympathy a moment later by a disgraceful and uncalled for attack on the poor page boy.

A somewhat similar position is shown by recent speeches on the matter of Standardisation of Paper, and the necessity or uselessness of the Wholesale Paper Merchant. I hardly know whether the paper merchant can be likened to "Fag," as so far he has not attempted recrimination, but I feel he has some claim to rather more sympathetic treatment than he has received.

Mr. Howard Hazell's first proposals for Standardisation were put before my Association and thoroughly discussed by them. His suggestions were principally concerned with paper as used by printers, but while this by no means covers the stocks necessarily held by the paper merchants, certain of his suggestions were not objected to by us, and suggestions were made to make a drastic change somewhat more easy of accomplishment.

It is by no means a simple matter to vary sizes and weights which have been of universal adoption for many years past, and the difficulties my Council see are principally—

(1) In the education by printers of their customers, the eventual users, to conform to such sizes and weights as have been suggested or may be suggested.

(2) The adaptation or provision of machinery by the mills which may be necessary to produce such variations.

The position of the wholesale paper merchant is a simple one. He is not anxious to see variations in sizes or substances which will necessitate the keeping of increased varieties of stocks which are already a serious matter, but in the main his business is to supply the requirements of his customers, and so far as he is concerned it must be eventually the will of the actual user, expressed through the printer, which will dictate the stock he holds. So long as the details of alteration are kept within reasonable limits and within the capacity of the mills the paper merchant will naturally keep in stock such papers as he can most readily procure and easily sell.

As to the paper merchant being a "necessary evil," is any useful purpose served by such exaggerated language? This matter has been brought up in after-dinner speeches *ad nauseam*. Is the variety and true urgency of a printers' business really understood by some of these speakers? It would be no unusual thing for even a comparatively small printer to require small quantities of a dozen different papers every day. Where is he to get them except from a stockholder; and is it seriously intended that the makers should all

hold stocks in all the principal markets and incur all the trouble and expense of retailing in small quantities? The "necessary evil" has had what satisfaction could be obtained by supplying the wants of the trade during the past few months at a loss to himself of sums which would astonish some of his abusers who seem to have overlooked the matter which should have been within their knowledge.

My council hold that the members of their Association represent a class of merchant which is an economic necessity and who has filled a not dishonourable part in the general trade of the country. In so far as it is possible for a closer union either with the printers on the one hand or the paper mills on the other, my Association has always been willing to co-operate and are ever ready to thoroughly discuss and consider any means which may tend to the advancement and the easier handling of a trade which, as has been truly stated, comes into daily and hourly use for every purpose of life.

R. G. HARVEY GREENHAM,  
General Secretary,  
National Association of Wholesale  
Stationers and Paper Merchants.

## New Inventions.

### Securing Formes on Presses.

In an invention patented by Messrs. Linotype and Machinery Ltd., the cylinder bearers of flat-bed printing machines are adapted to serve as side bars for securing the forme, so that the space usually occupied by the notched side-bars secured to the bed just inside the bearers may be utilised for accommodating a larger forme. The cylinder bearers 2, 3 on the bed 1 are provided with series of recesses, 4, 5 to receive the ends of the adjustable cross-bars 6, 7, the recesses opening on the inner edges of the bearers, as shown in

Fig. 3, so that their upper surfaces are uninterrupted. The recesses 5 are deeper than the recesses 4, enabling the ends of a cross-bar to be secured in a pair of opposite recesses first by inserting one end in a recess 5 and then moving the bar to the left to engage its other end in a recess 4, a catch 8 pivoted on a screw 9 being then turned down to engage the inner edge of the bearer. One of the cross bars 6 is preferably formed with wedging surfaces 11 for use when locking-up wedges are employed. If expansible metal quoins are employed, the bar 6 is reversed with its flat side inwards, a tapped hole 10 being provided, as shown, so that the pivot screw 9 of the catch 8 may be attached in the position required.

### Intaglio Printing.

Mr. H. de Clerq has patented an apparatus for making inked or intaglio impressions from relief printing forms which comprises stationary guiding means for directing the forms in succession between two rollers which move the form and a sheet of paper, etc., between them solely by their friction and without the employment of a conveying band. The sheets are supplied to the forms automatically or by hand, and the forms may be inked by known means, or may be used without ink. Alternatively the forms and the sheets may be fed

to a stationary impression block against which they are pressed by a reciprocated roller. The figures show a machine in which the forms are fed over stationary guides 9, 10, Figs. 3 and 4, to a position beneath a stationary impression block 11, which is adjustably supported by an extensible rod 12 clamped to a pivot 13 after adjustment to the desired position. Printing is effected by a travelling roller 29 which is mounted in a strap 19 oscillated by a crank 20 to which it is adjustably connected. In the movement of the roller 29 to the left, it is held up to printing position by the engagement with fixed tracks

14, 15 of axially-movable spring-pressed wheels 16, 17 mounted on the shaft 18 of roller 29. After printing has been effected, the wheels 16, 17 are moved inwards by the action of inclined stops 25, 26 on hub portions 23, 24 integral with the wheels 16, 17, and the roller moves vertically by gravity and the hubs 23, 24 rest on the guides as the roller returns towards the right, at the end of which movement the roller is raised by inclines 27, 28 acting on the wheels 16, 17.

### Composing Machines.

Under an invention by Messrs. P. W. Druitt and W. R. Gilpin, in machines such as described in Specifications 1903/00 and 11870 13, in which the matrices of a justified line are separated and presented singly to the mould, means is provided for casting from matrices having more than one character. The presentation plunger *a*, which clamps the matrices against the mould, has a vertically sliding head *a'* which may engage a fixed alining stop *c'* on the mould or may be supported at a higher level, when the lower characters of the matrices are to be used, by

means of an alining bar *b* mounted to slide on the plunger. When the upper character of a matrix is to be cast from, the bar *b* is retracted and the head *a'* is depressed on to the stop *c'* by a lever *f* and a spring-pressed plunger *f'* carried by a vertically moving slide *i*. The head *a'* is raised as the plunger *a* retires, by a stop *g* which engages an incline *f'* on the lever *f*. The change in position of the bar *b* is effected by a cam *h* carried by the plunger *a* and adapted to be rotated by a ratchet-wheel

# London Printers Inspect America

**An Interview with Mr. George Eaton Hart, who has  
Just Returned from a Tour of the United States.**

That the United States have a good deal to teach even the up-to-date London master printer—though there are nevertheless some respects in which we are ahead of the Americans—is the opinion of Mr. George Eaton Hart, of St. Clement's Press, after a very instructive tour of investigation across the Atlantic. As has been previously mentioned in these pages Mr. Hart, accompanied by Mr. C. H. Lea (Williams, Lea and Co.) and Mr. E. W. Carter (W. Speaight and Sons, Ltd.), set out for America at the beginning of May, with a view to visiting many progressive printing houses in the States and comparing their equipment and methods with those in vogue in this country. Mr. Hart got back to London last week, his travelling companions having shortly preceded him, and the *British and Colonial Printer and Stationer* representative has had the privilege of a chat with him in the course of which he spoke of some of the impressions he received in inspecting the printing establishments of our friends of the Stars and Stripes.

## **An Extensive Investigation.**

Mr. Hart and his fellow travellers found themselves very cordially received by printers in America, by whose courtesy they were able to make a thorough practical examination of the way the printing industry is carried on in a number of the larger cities of the United States—including New York, Philadelphia, Boston, Washington, Chicago, Buffalo and Rochester. They were able to get a pretty adequate insight into the plant and methods adopted in the American printing

office of to-day, also into the organisation of the American printing industry, both on the side of the employers and the work-people.

## **Where the Americans Score.**

In regard to premises and mechanical equipment Mr. Hart speaks unhesitatingly of the superiority of the American printer over his British confrère. American printers, he says, lay out very much more capital in their businesses than we do over here, with the result that they have not only far more impressive and more convenient premises, but also are better provided with labour-saving machinery, with a consequent gain of business efficiency. American printers, he says, are putting in new plant and are continually inventing new machinery for the carrying on of operations in respect of which British printers are satisfied either with old-fashioned methods or, at the best, with the replacement of machinery which is really out-of-date. By better equipment the American can often make one operation of a job of which the British printer makes three.

The wide adoption of automatic feeders and folders and of rotary machinery exemplify this particular kind of enterprise, and it is shown also in the great advance that has been made in the adoption of mechanical type-setting. In the big newspaper offices of America the machine-setting of display type is universal, and it is not an uncommon thing to find a great daily newspaper in the production of which not a single line of movable type has been used.

### Points of British Superiority.

In some other respects, however, the British printing office is equal, if not superior, to that in America. Mr. Hart cited the composing-room as a case in point. He has, he says, seen no composing-room in the States to beat some of those to be found in first-class London houses.

In regard to organisation, again, Mr. Hart formed the opinion that British printers have the advantage. Both on the part of the Typothetæ and the labour unions he found less compact organisation than ours. This was particularly noticeable in regard to the strikes now in progress, there being many instances of important "open" shops even in highly organised cities. A fact worthy of mention was that where a large printing firm finds its work held up through trouble with the union, it can often carry on comfortably by the simple process of discharging union hands and declaring "open" shop. What Mr. Hart pointed to as a very laudable feature of the Typothetæ organisation was the compulsory working of the costing system in the offices of all members. This does much to encourage fair prices, and, in Mr. Hart's opinion, is extremely beneficial to the industry as a whole.

### Technical Education.

Technical education being a matter in which Mr. Hart is especially interested, he lost no opportunity of observing American practices in this field. Here again he found that the British printing industry has nothing to fear from comparison; in fact, Mr. Hart came back feeling very proud of the general education that is available in this country for the apprentice of to-day, and particularly of the very high grade of technical education that is open to the printer in London and in some of our large provincial towns.

Mr. Hart returns from a rather strenuous holiday feeling that there is certainly "some hustle" going on across the "Pond," although it is perhaps not altogether the kind of hustle that would be universally appreciated here. While he feels that to the go-ahead young printer, eager to make his way in the world, the United States offer better opportunities than are to be found in this country, Mr. Hart, nevertheless, finds it very pleasant to be back in London; he maintains that for the enjoyment of life in general, and especially for the man getting on in years who hopes for a larger measure of rest and comfort in the days to come, there is nothing to beat the Old Country after all.

MESSRS. JOHN HADDON AND CO., the well-known typefounders and printers' engineers are following up the interest aroused by their exhibits at the Printing Exhibition by sending prospective customers a well-produced and freely illustrated pamphlet which describes and illustrates, among other things, the Babcock "Optimus" Fine Art Two-revolution Press, the Babcock Standard High Speed Drum Cylinder Press, the "British Victoria" Art Platen, and the Caxton Rotary Power Perforator.

## Gazette.

### A WORD OF CAUTION.

In giving the official Gazette information, it must be distinctly understood that we take official records as we find them, and accept no responsibility for inaccuracies, while, as an almost invariable rule, the facts will be found correct. We advise our readers, before forming hasty judgment, to consider that there may be in each case satisfactory explanation which does not appear on the records.—Ed.]

### ENGLAND AND WALES.

#### PARTNERSHIPS DISSOLVED.

Charles Henry Irons and John Muir, 213, Hoe-street, Walthamstow, paper bag makers.  
Herbert Gummer and Walter Buckingham George, printers, Clayton Works, Oakfield-road, Croydon.

Robert Atchison and Thomas Chas. Crane, bookbinders, 3, McLean-buildings, New-street-square, E.C.

Harold William Peacock and Reginald Hugh Ellison Thomas, printers, 33, Hanover-street, Liverpool.

Patrick Cassin and John Lloyd Owen, general stationers, 62, Oxford street, W.

Daniel John Rawkins and Charles H. Preston, advertising agents, 37, King-street, Covent-garden.

#### RECEIVING ORDERS.

Newman, Ronald Moore, 40, Torrington-square, journalist, July 13th. Public examination, October 14th, at Bankruptcy-buildings, Carey-street.

Charlton, Randal, 119, Park-road, Hanover-gate, journalist, July 8th. Public examination, October 19th, at Bankruptcy-buildings, Carey-street.

## The Trade Turning Point.

After reviewing recent developments in the industrial situation, the following remarks on the consequent position of the paper trade appear in *Paper and Progress*, the home journal of Strong, Hanbury and Co., Ltd.:—Generally speaking, we are inclined to the view that the inevitable reaction will set in. At the beginning of the depression, stocks began to accumulate owing to falling prices causing buyers to hold off the market. These stocks have by now most certainly been considerably reduced, and in consequence any sort of demand should set the wheels of trade in motion once again. Then will vanish those parcels which, to the detriment of the printer's own stock, are now from time to time offered at prices far below the actual cost of production, and, with the disappearance of the "boom-time" speculator, legitimate trade will again assume a proper competitive level with prices based on cost. It will most assuredly be of the very greatest benefit to all engaged in the craft of printing when the present unwarrantable fluctuations cease, for without stability there can be no confidence.

## S.-W. London Master Printers.

## Sale of Process Plant.

### Mr. W. H. Burchell on Office Management.

The usual monthly meeting of the South-West London Master Printers' Association was held at Stanley's Restaurant, 237, Laven-der-hill, S.W., on July 12th, when there was a good attendance of members. The chair was occupied by the president, Mr. J. D. Wise (Messrs. Wise and Co., Battersea). At the conclusion of the usual business, Mr. W. H. Burchell, hon. secretary of the Central Dis-tricts Association, delivered a thought-pro-voking address on "Printing Office Manage-ment."

Mr. Burchell began by emphasising the need for cleanliness in the printing office, and in this connection he read some very practical hints by Dr. H. A. Ellis, M.B., which the Joint Industrial Council has issued in leaflet form. Passing on to the subject of time-keeping, Mr. Burchell laid it down that punctuality on the part of workpeople was a *sine qua non*, and he claimed that both house docketts and departmental docketts were essential to the proper conduct of the business. The duties of the works manager were next considered in detail, and special stress was laid upon the need for close personal acquaintance, co-opera-tion and good feeling between the manager and the workpeople he controls. Several points were mentioned indicating the great gain to employees and the firm alike accruing from a work managers' personal interest in the individual jobs of employees, whereby he is able to give encouragement and oppor-tunity to those capable of rendering improved service. Mr. Burchell next traced a job through the different departments, and had some practical detailed advice to give as to the conduct of the counting house, the com-posing room, the store and the machine room. The subject of price-cutting and especially of country competition was caustically dealt with, and severe criticism passed upon much of the reckless estimating that too often passes muster to-day. Remarks upon some important minor details of the printer's busi-ness, such as insurance and valuation, brought to an end a thoroughly practical and helpful address.

A long discussion followed, in which several of the members took part, and on the propo-sition of Mr. A. Spring (Messrs. Shield and Spring) it was unanimously agreed that as the subject was of such absorbing interest the dis-cussion should be continued at their next meeting, in October. Mr. Burchell consented to introduce the subject again on that occa-sion, and said he hoped to have further inter-esting and instructive items to put before the members.

A hearty vote of thanks was accorded to Mr. Burchell for his excellent heart-to-heart talk, and he made suitable reply.

**An Advertisement is always working.**

The process plant of the London Etching Co. (1919), Ltd., was sold last week, by order of the liquidator, the sale being conducted at Anderton's Hotel. Among the prices realised were the following:—A 15 in. by 12 in. polished mahogany process camera, by Pen-rose and Co., fitted with screen carrier, ad-justment gear, revolving shutter dark slide, together with the 12 ft. bolted swing carrier, rack and pinion gearing, carriage, two copy boards, holder and suspension ropes, £14. A 10 in. by 9 in. mahogany process camera, with two dark slides, extension box, and a 7 in. by 5 in. "Optimus" R.R. lens, by Perkins, Son and Rayment, with mirror box and stops, £2 5s. A 12 in. by 10 in. "Cooke" process lens, series V. 16.5 focus, fitted with Penrose prism and stops, £12. A pair of "Angold" process arc lamps, by the General Electric Co., with switches, resistance and cabling, together with the overhead traverse gear and a pair of adjustable iron standards, £11 15s. A number of line screens, mostly by Max Levy, were offered and the following are a few of the bids at which they were knocked down: a 12 in. by 10 in. 80-line screen, £2; a 15 in. by 12 in. 100 line, £8; a 10½ in. by 8½ in. 120-line, £2 15s.; a 10½ in. by 8½ in. 133-line, £4 5s.; a 15 in. by 12 in. 133-line, £16 10s.; an 8½ in. by 6½ in. 150-line, £2 10s.; an 11½ in. by 9½ in. 175-line, £12 10s.; and a 5½ in. by 4½ in. 400-line, 15s.

An iron circular saw bench, fitted for power, with gauge and 24 in. by 20 in. casting iron table and six spare saws, sold for £10 10s., and another saw bench 19½ in. by 18½ in. casting table and six spare saws brought £5 5s. A radial arm router, by Schniedewend was knocked down for £7 10s., and a half h.p. electric motor for £8. A similar electric motor, but not fixed, went for £6 5s.

About four thousand packets of London view post cards, containing six cards each, were sold for £2 5s., and sixty original book plate blocks, together with the original book plate drawings went for 16s.

**LINOTYPE TYPOGRAPHY.**— Linotype and Machinery Limited provide further evidence of the wide applicability of Linotype print-ing in a handsomely produced booklet which they have recently published showing the Linotype Clearface Bold Series. This series is of admirable design and produces an excellent effect in page form. The whole of this booklet, including elaborate ornamental borders, is set on the Linotype, and the whole of the Clearface Bold Series is set out in the centre opening, so that the Linotype user is able to see at a glance what sizes of this par-ticular type are available, together with de-tails of the fount schemes in each case. The other pages in this booklet are devoted to ex-amples of bookwork, catalogue, magazine, and general commercial display, entirely set in the Clearface Bold Series.

## Leeds Printers' Day.

### Successful Sports Outing Benefits Charities.

Leeds printers, their wives, sweethearts, children, and friends, gathered together in great crowds on Saturday, July 9th, to have an afternoon of fun and sport on the famous grounds of the Leeds Athletic Club at Headingley. A big sports programme had been prepared by an energetic and hard-working committee and there were over 1,000 entries for the various events. Many valuable prizes were offered, and in addition six handsome trophies were presented for competition for the more important events. The donors of the trophies were:—Mr. R. D. Chorley, of Messrs. Chorley and Pickersgill, Leeds; Messrs. J. Dickinson and Co., Hemel Hempstead; Messrs. Linotype and Machinery Limited, London; The Leeds Technical School (printing section); Messrs. T. G. and J. Jubb, of Leeds; and Messrs. The Richardson Printing Ink Co., Ltd., of Gateshead. Many interesting races were run, and the Leeds printers showed that they had abilities on the sports field as well as in the workshop. During the sports the Armley and Wortley Prize Band rendered musical selections. Mr. Henry Jenkinson, the chairman of the Sports Committee, and Miss Jenkinson, presented the prizes to the successful competitors. It is calculated that over 5,000 people were present and as the proceeds will be devoted to printers' charities it is hoped that a good sum will be available for the Printers' Pension Almshouse and Orphan Asylum Corporation, the Natsopa Memorial Convalescent Home, and the Carshalton Convalescent Home. The Committee are to be congratulated on the success of their first venture which should encourage them to go forward in their good work of promoting social intercourse and fellowship amongst those engaged in the industry.

The following is the list of winners: 50 Yards Flat Race Handicap (Boys under 13).—1, F. Cawood; 2, E. Glyde; 3, T. Dowson. 40 Yards Flat Race Handicap (Girls under 13).—1, C. M. Kilner; 2, N. Moore; 3, W. Pease. 100 Yards Flat Race Handicap (Boys under 16).—1, E. Sewell; 2, G. L. Harrison; 3, E. Walker. 60 Yards Flat Race Handicap (Girls under 16).—1, J. Briggs; 2, L. Burton; 3, A. Bloxham. 440 Yards Flat Race Handicap (Chorley Trophy).—Heat Winners.—E. Hill, T. Smith, F. Ledson, J. W. Stables, E. Smith, W. E. Howland, and F. S. Sheridan. Final.—1, Ledson; 2, Sheridan; 3, Stables. 60 Yards Flat Race Handicap (Women).—1, M. Cain; 2, F. Rostrum; 3, L. Demain. 100 Yards Flat Race Handicap for Men (Dickinson Trophy).—Heat Winner: W. E. Howland, T. Smith, W. Boardman, G. F. Bland, F. Ledger, A. Glendinning, A. Fields, J. W. Ward, A. Bacon, and H. Wilkinson. Final.—1, Howland; 2, Wilkinson; 3, Ward. 60

Yards Veterans Race (Men over 45).—1, S. Craven; 2, J. H. B. Pearson; 3, R. Worthy. 400 Yards Women's Relay Race for Works Team of four (Linotype Cup).—1, Electric Printing Works team; 2, Alf. Cooke, Ltd. (A Team). One mile Relay Race for Works Teams of four. (Technical School Trophy).—1, Petty and Sons team; 2, Electric Printing Works team. 220 Yards Hurdle Race Handicap. Heat Winners.—A. E. Newton, G. Roberts, H. Wilkinson, J. W. Ward, and T. T. Richardson. Final.—1, Newton; 2, Ward; 3, Wilkinson. Tug of War for Works Teams of six men. (Jubb Shield).—Alf. Cooke, Ltd., beat Horsell and Co., Ltd.; G. Mann and Co., beat Electric Printing Works; Petty and Sons beat Jowett and Sowry. Semi-finals—Mann's team beat Alf. Cooke's team, Petty's team beat Jenkinson's team. Final—Mann's team beat Petty's team. Women's Tug of War for Works teams of six. (Richardsons' Shield).—Alf. Cooke's (A team) beat Electric Printing Works; Petty and Sons' team beat Alf. Cooke's B team; Alf. Cooke's C team beat H. Jenkinson's team. Semi-finals—Alf. Cooke's A team beat Alf. Cooke's C team. Final—Alf. Cooke's A team beat Petty's team. 440 Yards Obstacle Race Handicap. Heat Winners.—L. A. Wain, A. Bacon, W. W. Douglas, J. Clayton, W. H. Stones, and H. Coomer. Final.—1, Bacon; 2, Wain; 3, Coomer.

## STATIONERS' COMPANY

AND

## Printing Industry Examination.

### Summer Term Costing Pass List.

The result of the summer term costing examination, held at Stationers' Hall on June 29th, 1921, has just been received and the examiners report that the percentage of passes maintains the high average shown in the April examination, although the standard of marks obtained is not quite as good. The students have grasped the principles of the System very well and the result as a whole is satisfactory. The following is a list of passes:—

FIRST CLASS PASS.—M. H. Bhatt, H. E. Green, B. T. Kale, T. E. J. Mercer, F. A. Morris, E. F. Mortimore, G. V. Nye, Miss E. M. Ramsay, \*W. P. Robson, H. W. Scarleett, E. U. Stanton, Miss M. Woods.

SECOND CLASS PASS.—E. G. Baker, L. Birchby, C. E. Minson, W. A. Spiller, E. J. Toner, F. Williamson.

\*First prize, £2 2s. †Second prize, £1 1s.

THE CLYDESDALE METALLIC Co., of 33, Cannon-street, E.C.4, send us printed examples showing the brilliant effect produced by their "Clebronite" Bronze Powder, which is stocked in four varieties, viz., light, middle, deep and extra deep shades.

## Trade Union Matters.

The proposed new technical school is meeting with great favour in the lithographic section of the trade, the Amalgamated Society of Lithographic Printers having decided to support the scheme right up to the full quota required of them.

Although the scheme is being generally approved by the printing trade as a whole it has been remarked that the amount prescribed to be subscribed by the different trade unions as at present allocated to them will not amount to the required sum of £2,500 per annum for five years as desired by the L.C.C.

In regard to the new school the National Society of Operative Printers and Assistants have had the matter under consideration, and the general secretary has been directed to forward an explanation of the members' opinion, as well as to raise the question of the allocation of the Guarantee Fund in view of the small percentage of their members entitled to receive technical education.

The second ballot taken by the National Society of Operative Printers and Assistants on the question of a levy v. increased contributions has resulted in favour of the former by a majority of 1,483.

In accordance with the suggestion of the Joint Industrial Council that each of the J.I.C. joint secretaries should be given an assistant, the Printing and Kindred Trades Federation has appointed, as assistant to Mr. A. E. Holmes, Mr. G. E. Middleton, a member of the National Union of Journalists, until recently of Manchester.

Museum 607 is the new telephone number of the Printing and Kindred Trades Federation—now at 60, Doughty-street, W.C.

The half-yearly report of the Typographical Association shows an increase of membership and an increase of over £14,000 to the funds.

We are glad to state that the dispute which has been in progress between Mr. Yeates and his employees has terminated with honours even. Both parties have come to an understanding on the points at issue and work at the establishment is now proceeding at almost its normal level.

We are asked to deny the statement which has found its way into the trade and daily press to the effect that the litho artists at Bromley are advocating a 25 per cent. reduction in prices, and that the employers favour a 15 per cent. price reduction and a 6s. wages cut.

The statement referred to, which seems to have no foundation in fact, and of which we ourselves inadvertently fell foul, appears to have originated from the *Daily Herald*, a none too trustworthy source—strangely enough—in regard to printing trade union movements.

The Amalgamated Society of Lithographic Artists, are, by the way, advising their members not to undertake work in Canada for the present.

## Wrapping Paper & Boxed Stationery FOR HOLLAND.

A communication has been received in the Department of Overseas Trade from the British Consulate General at Amsterdam stating that a firm of commission agents in Holland are desirous of being placed in touch with United Kingdom manufacturers of cheap wrapping paper and boxed stationery with a view to taking up their agency for that country.

The applicants, who have been established some years, are reported to be of fair standing. They are known to be honest and pay regularly, are considered good for their engagements and are stated to possess a small capital. They already represent three United Kingdom firms manufacturing stationers' sundries, one of whom in a recent conversation with an officer of the Department, spoke highly of their capabilities and stated that he could recommend them to any British firm desiring to do business in Holland.

The applicants state that there is a much better opening for boxed stationery than for compendiums or pads in Holland, as with the latter goods there is severe foreign competition. They are also of opinion that there is a good opening for rough packing paper of British manufacture which does not appear to have been introduced into that market to any extent.

The name and address of the applicants will be furnished to United Kingdom manufacturers on application to the Department of Overseas Trade, 35, Old Queen-street, Westminster, S.W.1.

The Commercial Secretary to His Majesty's Legation at Montevideo (Capt. Eric C. Buxton) reports that a local firm are desirous of obtaining samples and quotations from United Kingdom manufacturers of high-class writing and printing papers. The name and address of the firm referred to may be obtained by United Kingdom manufacturers interested on application to the Department of Overseas Trade, 35, Old Queen-street, London, S.W.1.

THREE cases of lead poisoning were reported in the printing trade during June.

### The Bookbinder and the Time Docket.

SIR,—Mr. Howard Vick's contribution appearing in your issue of the 14th inst. on the above question is very interesting reading, and if he will permit me to say so, does not rebound to his credit. To tilt at Mr. Hazell for leaving himself open for me to twit him on the difficulty in the way of the introduction of the time docket into the bindery, should have made him careful not to leave himself open to a similar attack, and he cannot blame me for availing myself of the opportunity.

I well remember the meeting referred to by Mr. Vick in Manchester, and am glad to receive his testimony as to my impartial conduct on that occasion in the chair. Now, sir, at that important meeting much opposition to the time docket was expressed by the membership, and many material points were raised in relation to the difficulty of time-recording in the bindery.

May I at once say that in my opinion no speaker from the employers' side was able to deal successfully with the points raised; nay more, such remarks as "we realise the difficulty there," "we should have to make allowances there and strike an average" and "you must leave that to the employers themselves," are specimens of replies (revealed by my notes) by the employers in their attempts to show that the time docket was essential to scientific cost finding.

Mr. Vick in his communication says "there is no difficulty." May I ask Mr. Vick, if such is his confirmed opinion, how he came to miss such a glorious chance of clearing away the errors in the minds of over five hundred operative bookbinders, if no such difficulties existed?

No, sir, the coming of time dockets into the bindery can only be accomplished without trouble by a full recognition of the difficulties I have before outlined, and a mutual trust and understanding on both sides, that when difficulties do present themselves, they will not be used detrimentally against the worker should the time taken be longer than formerly, when the same difficulties did not exist.

I also deplore very much the spirit of Mr. Vick's communication. Such phrases as "this should not be a question of polite endeavour to persuade, but the time docket should be demanded as a right," and "it is high time the white kid glove method of dealing with such obtuseness should be superseded by a bold and firm policy of common sense" is the way that leads to trouble, and is certainly not in harmony with the new spirit as between employer and employed, that we heard so much of during the war. I again assert that only by a better understanding of each others' difficulties and more trust in one another, can this

question be satisfactorily solved, and not by such a belligerent attitude as Mr. Vick has given expression to.

Yours etc.

GEO. HARRAWAY,  
General President,

National Union of Printing, Bookbinding,  
Machine Ruling and Paper Workers.  
London, July 18th.

## In the Newspaper Realm.

THE Newspaper Press Fund has received a donation of £200 from the Management Committee of the Football League for allocation to the relief of widows and orphans.

MR. PHILIP KERR has accepted an invitation to join the board of the United Newspapers (1918).

MR. ALFRED BARNES, chairman of the London Co-operative Society, has joined the board of the *Daily Herald*, Ltd.

MRS. ANNIE BESANT's action in the Court of Session for alleged slander has failed. She claimed £1,000 damages from the *Daily Graphic* in respect of an article which appeared in December, 1917.

AFTER a lapse of seven years, due to the war, the cricket fixture, alternately held in London and Nottingham, between teams representing the *Daily Telegraph* and the *Nottingham Daily Guardian*, took place on Saturday at Trent Bridge, by the courtesy of the Notts County Cricket Club, the *Guardian* winning a close game by one wicket.

DR. WILLIAM WALLACE, the well-known Scottish litterateur, and formerly editor of the *Glasgow Herald*, died at Glasgow on Sunday in his 78th year.

THERE has just appeared a new Labour journal known as the *Labour Monthly*. It is published at the price of 1s. by the Labour Publishing Co., 6, Tavistock-square, London.

A SENSATION was created last week at the Marcel menagerie in the Montmartre, when M. Thetard, one of the editors of the *Petit Parisien*, entered a cage in which there were two performing lionesses and successfully took the place of their trainer.

THE death has occurred of Mr. John Lobb, 81, former managing editor of the *Christian Age*.

THE death occurred last week of Mr. Cornwallis H. Smith, who was for 50 years a member of the staff of *The Times*. During the greater part of that time he was in charge of the City reporting department. As a Freemason, Mr. Smith was initiated a member of the Gallery Lodge many years ago, and was elected W.M. in 1910.

THE death has occurred of Mr. Robert Brazier, a well-known journalist.

An Advertisement is always working

## Trade Notes.

THE death is announced of Mr. Thomas Strowger, master printer and stationer of Wigan, at the age of 77.

In the travelling exhibition scheme organised by the British Institute of Industrial Art one class is devoted to "Art of the Book—Binding, Printing, Illustration, Calligraphy and Illumination, Posters, etc."

SIR J. CAUSTON AND SONS, Clapham, have reduced their working week to 40½ hours, and adopted the five-day week. Rumour says that the Co-operative Printing Society is about to adopt the 44-hour week.

AT Chippenham Session the case was dismissed in which Messrs. Billing, Jarrett and Read, Ltd., billposters, of Bristol, were summoned for alleged disfigurement of the landscape at Corsham, by an advertisement hoarding.

LIKE our postal authorities here, the Australian Postmaster-General has raised a storm by his new postal rates. "A book" may be sent through the post at 4d per lb., "printed matter," however, is 8d. Disputes as to what a "book" is are raging.

FIRE broke out on Wednesday of last week in the bookbinding workshops at Colombes, Paris, of Messrs. Hachette, the publishing firm. Owing to a lack in the supply of water, the firemen were unable to check the fire, and the damage is estimated at over £80,000.

THE Library Association, 33, Bloomsbury-square, W.C.1, will hold an International Conference at Manchester School of Technology on September 12th to 17th. An exhibition of appliances, books, and fine printing will be a feature of the Conference.

THE London County Council Highways Committee has rejected a petition from workers engaged on Saturday nights upon work connected with Sunday newspapers, asking the Council to run on Sundays half-hourly services of trams on all routes between the hours of 4.30 and 7 a.m.

SIR T. VANSITTART BOWATER has received a circular posted in Belgium for which the postage was 10c. (equivalent to ½d). This, it is pointed out, would have cost at least 1½d. if posted in England. In asking what the Post Office is going to do, the recipient asks: "Is this likely to reduce the loss on our postal service, etc.?"

L.M.P.A. WINTER PROGRAMME.—In September there is to be held a joint meeting of the presidents, secretaries and officials generally of all the District Associations of the London Master Printers' Association for the purpose of fixing lectures, etc., for the different associations during the winter months. The principal object will be to avoid clashing of fixtures and to promote intercourse and co-operation between master printers in different parts of London.

MESSRS. GARRATT and ATKINSON, of Warwick Works, Ealing, send us, several very attractive specimens of their work in half-tone, line and colour blocks.

A BIG scheme for advertising South Africa by the use of printed matter of all kinds is being undertaken by the Publicity Department of the South African Railways.

SPORTSMEN of all kinds will be keenly interested in the July Number of *Pearson's Magazine*, for it is a special sports number and has features devoted to golf, cricket, boxing, and rowing.

THE Golden Cockerel Press, of Waltham Saint Lawrence, Berks, is a communal venture in which authors and producers alike share in the profits of co-operative book-production.

MESSRS. JAS. BROADLEY, LTD., of 82, Blackburn-road, Accrington, send us an illustrated catalogue, printed by themselves, indicating some of their many lines in printing and stationery supplies.

We have received the July number of the *Falcon*, the quarterly house organ of Messrs. Spottiswoode, Ballantyne and Co. This well-designed, handsomely produced and brightly written magazine makes a very creditable representative of this country's achievements in this particular line, and compares favourably with the best house journals we have seen.

MESSRS. RAINES AND PORTER, LTD., of Hull, send us advertising matter showing effective use of some of the inks, including gold and silver inks, in the manufacture of which they specialise. The makers claim for their inks that they are ready for immediate use, will not separate in the tin, give absolutely free working, will not accumulate on slab or rollers, have a brilliancy equal to that of metallic powders, and will "wash-up" as ordinary letterpress inks.

MESSRS. WALKER BROS., Lawefield-lane, Wakefield, are making a cupboard for printers' rollers which, they claim, not only enhances the tidiness of the printing office but also saves from 25 to 50 per cent on roller bills. This cupboard, known as the "Apex" roller cupboard, stands underneath the feed board, is strongly built, holds two complete sets of rollers, which are always at hand, and it does away with the old method of standing the rollers against steam pipes, damp walls, etc., where they are in the way and are also subject to injury.

THERE has now appeared the second number (July) of the current volume of the *Print-Collector's Quarterly*, which is the first volume to be published in England after the transfer of the magazine from America. This excellent magazine proposes to cover a very wide range, as it will deal with both old and modern work, and with all forms of etching, engraving, lithography, wood engraving, etc., by all recognised masters of these different mediums, including modern English, American and Continental masters.

### FORTY-THIRD YEAR.

Printed and Published **EVERY THURSDAY**  
by **STONHILL & GILLIS**,  
at 58, Shoe Lane, London, E.C. 4.  
Tel.: Stonhill, Fleet, London. Phone: 8407 City.

Copies may be purchased at the Office, as above or from Messrs. W. H. Everett and Son, Ltd., news-agents, 11, St. Bride-street, E.C. 4.

THURSDAY, JULY 21, 1921.

## Current Topics.

### The Wages Negotiations.

ON Thursday morning last, conference was resumed between the Federation of Master Printers and the Printing and Kindred Trades Federation, the proposals of wage-reduction being very fully discussed. Mr. James MacLehose, M.A., LL.D., was in the chair, representing the employers, and Mr. C. W. Bowerman in the vice-chair, representing the trade unions for whom their Executive was authorised to act, viz., all save the Typographical Association and the Amalgamated Society of Lithographic Printers, both of which bodies insisted upon negotiating separately. After a full discussion, the following proposal was submitted by the employers:— "That a reduction in wages of 5s. per week from the wages paid to all adult members of unions affiliated to your Federation for whom you were empowered to negotiate, shall take effect on the pay-day in the week ending August 6th, and a further 5s. per week reduc-

tion on the pay-day in the week ending September 3rd, and a similar reduction of 5s. per week on the pay-day in the week ending October 1st, and that a reduction in wages to all qualified women workers of 2s. per week shall take effect on the pay-day in the week ending August 6th, a further 2s. per week on the pay-day in the week ending September 3rd, and 1s. 6d. per week on the pay-day in the week ending October 1st, and a corresponding adjustment of the wages scale to the male learners and junior women workers and piece workers. In making these proposals, we have in our minds the serious position of the industry and a cost of living index figure of 125." Mr. Bowerman said this proposal would be considered, and a reply would reach the employers by July 22nd. We understand the administrative council of the P. and K.T.F. is, accordingly meeting on the day previous, i.e. to-day (Thursday).

\* \* \*

### Joint Industrial Council to Act.

FOLLOWING the conference with the Printing and Kindred Trades Federation, the employers' representatives conferred last Thursday afternoon with the Typographical Association—Mr. MacLehose in the chair, and Mr. J. D. French in the vice-chair—when the whole question was again thoroughly discussed, and the chairman put forward a proposal, similar to that above mentioned, that the reduction in wages should take place by three steps, between August and October. Mr. French stated that the Typographical Association were not prepared to agree to any reduction of wages, and Mr. MacLehose intimated that the question would now be referred to the Joint Industrial Council, which had been convened to meet on July 26th. The employers' representatives have also met the representatives of the lithographers' society, the meeting taking place last Tuesday. We understand, however, that an *impasse* was reached as in the case of the T.A., and that consideration of the position will be resumed under the auspices of the Joint Industrial Council. In view of the meeting of the J.I.C., a special meeting of the Council of the Federation of Master Printers is being called, to take place at Stationers' Hall on the 25th.

### Reduction in Paper Imports.

A YEAR ago paper imports were on a larger scale than pre-war. Last month's returns, however, show a tremendous slump, the outcome of an utter lack of movement in the paper trade, and the baleful effects of the coal

strike on industry generally. During June the total imports were 572,541 cwts., a decrease of 1,267,870 cwts., or 68·8 per cent., as compared with the corresponding month of last year. The total value dropped from £3,586,984 in June, 1920, to £1,065,251 last month, a decrease of 70·3 per cent. The principal imports fall under the classification of printings and writings, and owing to the large arrivals from Newfoundland (164,030 cwts.), last month's total quantity, amounting to 355,860 cwts., shows an increase of 84,981 cwts., as compared with June of last year. All other imports show large decreases, the most noteworthy being in strawboards, amounting to 751,336 cwts. The receipts of wrappings also mark a big decline, viz., 392,655 cwts. During the six months ended June the imports of paper, etc., amount to 2,726,296 cwts., a decrease of 4,226,858 cwts., or 60·7 per cent., as compared with the first half of last year. The total value stands at £5,778,809, a reduction of £8,464,678, or 59·4 per cent.

### Paper Exports.

WITH a poor home market, any relief to the paper manufacturer in the export field is still a matter for the future, the effects of the coal strike not being readily eradicated. Shipments last month amounted to 104,557 cwts., a decrease of 71,064 cwts., or 40·4 per cent., under the quantity exported in June of last year. The values show a drop of from £940,374 in June, 1920, to £490,912 last month, equal to 47·7 per cent. Last month's shipments of printings were 58,440 cwts., a decrease of 21,228 cwts. as compared with the corresponding month of last year. This decline was solely due to the poor demand on the part of foreign countries, particularly France; for instance, only 9,226 cwts. were shipped to Foreign Countries during June, as compared with 33,541 cwts. for the corresponding month of last year. On the other hand, British Possessions are increasing their demand for printings, last month's supplies amounting to 49,214 cwts. as against 46,127 cwts. in June of last year, this development being practically due to Australia. In writings, trade with France is practically nil, and consequently shipments to Foreign Countries fell from 4,813 cwts. in June of last year to 2,088 cwts. last month; supplies to British Possessions also mark a heavy reduction, viz., from 12,718 cwts. to 4,905 cwts. The total exports of British writings last month were only 6,993 cwts., a decrease of 10,538 cwts. as compared with June of last year. When the returns for the last six months are analysed, the depreciation in ex-

ports is by no means so drastic as that of the paper imports into the United Kingdom. The total shipments amount to 752,607 cwts. of the value of £4,550,776, a decrease in quantity of 22·3 per cent. and an increase in value of 0·3 per cent. as compared with the first half of last year.

## Personal.

MR. R. A. AUSTEN-LEIGH, president of the London Master Printers' Association has just returned from France, where he attended the annual conference of the French Master Printers as the representative of the Federation of Master Printers, and yesterday (Wednesday) he presided at the monthly lunch of the London Association at the Connaught Rooms.

MR. W. HOWARD HAZELL, on the same occasion, spoke on the new Central Printing School for London.

MR. J. R. RIDDELL was the chief speaker at a meeting of the Association of Master Printers of W. and N.W. London on Tuesday evening, when he aroused much interest by an address on Technical Education. He mentioned that the sum of £2,500 per annum for five years required for the new printing technical institute had already been guaranteed.

MR. WARREN G. HARDING, printer-president of the U.S.A., is now an honorary member of the Typothetæ of Washington—the master printers' organisation. With his letter of acceptance of membership came one of his photographs on which he had written: "To the Typothetæ of Washington, D.C., with cordial and fraternal greetings.—Warren G. Harding."

MR. W. R. CUMMINS, hon. treasurer, North London Master Printers' Association, in connection with his hobby of gardening, has been successful in winning at local shows this year, six first prizes, one second, one third, and a Silver Challenge Cup for best four bunches of hardy perennials.

A SONG, "The Last Wish," recently published by the Newman Publishing Co., bears on its title page two names well known in the London printing trade, the words having been written by Mr. H. Williams, of the Clerkenwell firm of H. Williams and Co., while his manager, Mr. W. Douglas Brown, is the composer of the music.

WE congratulate composer and author, and are pleased to hear that many letters of appreciation have been forthcoming in respect of this musical production, which, as emanating from two representatives of a firm of printers' engineers, can surely lay claim to being a unique achievement.

## DIVIDENDS AND REPORTS.

**EDWARD LLOYD, LIMITED.**—Profit of Edward Lloyd, Ltd., for 1920, after allowing for capitalisation expenses, depreciation, providing for bad and doubtful debts, estimated excess profits duty, income-tax, corporation tax and contingencies, was £119,876, plus £10,977 brought in, making £130,853, less interest on pension account, directors' and auditors' fees, head office and transfer office expenses, £7,201, leaving £123,652. Directors recommend final dividend on Ordinary shares at rate of 3d. per share, free of tax, making 5 per cent. carrying forward £21,464. Profits, after making provision for expenses, show decrease of £105,236 compared with 1919.

**EWART AND COLLIS, LTD.**—The accounts of Ewart and Collis for the year 1920 show a net loss on working of £44,459, exclusive of directors' fees £1,693, and dividend on Preference shares for the year (including tax) £15,158. The debit balance brought forward was £1,273, making a total debit of £62,583. The directors in their report state that under the circumstances no dividend upon the Ordinary shares can be paid. At an extraordinary meeting on Friday a committee of inquiry was duly appointed. The directors were pressed to resign, but though the chairman,

Sir Henry Bax-Ironside, and another member expressed their willingness to do so, the others refused to commit themselves to any definite action.

## NEW COMPANIES.

**REGENT ADVERTISING SERVICE, LTD.**—Capital £1,000 in £1 shares; advertising agents, printers, stationers, lithographers, etc. Private company. Subscribers, A. E. Wright and E. W. Keen. Registered office: 4, London-wall-buildings, E.C.

**HATTON PUBLISHING CO., LTD.**—Capital £1,000 in £1 shares; to take over the businesses of John Tagg and Co. and the Philomena Press, Ltd., advertising contractors, of Liverpool. Private company. First directors: W. Jones, J. Tagg, E. Houghton, W. A. Whitton and H. E. Wright.

**A. FREEMAN AND CO., LTD.**—Capital £20,000 in £1 shares; general merchants, manufacturers of and agents for chemicals, leather goods, machinery, felt goods, fancy goods, stationery, music, etc. Private company. Directors: A. L. L. Freeman and J. J. Freeman. Registered office: 4, St. Mary-axe, E.C.

**MILNER AND GREEN, LTD.**—Capital £2,000 in £1 shares; to take over the business of manufacturers' agents and East India merchants carried on by Milner and Green, at 8, Moor-lane, E.C., and to carry on the business of general warehousemen, manufacturers and importers of and wholesale and retail dealers in leather, stationery and fancy goods, etc. Private company. Directors: H. Milner and H. H. Green. Registered office: 8, Moor-lane, E.C.

**DAVID J. CLARK, LTD.**—Capital £30,000 in £1 shares; printers, lithographers, stationers, paper rulers, bookbinders, publishers, die stampers, Christmas card manufacturers, engravers, etc. Private company. First Directors: D. J. Clark, D. J. Clark, jun., and T. P. M. Clark. Registered office: 25, Royal Exchange-square, Glasgow.

**XPRES PRINTERS, LTD.** (Northampton).—Capital £1,500 in £1 shares; printers, engravers, publishers, etc. Private company. Directors: H. S. Rushden and E. Knight.

**SPENSER PRESS, LTD.**—Capital £50,000 in £1 shares; to take over the business of printers and box and packing case makers carried on by Abdulla and Co., Ltd., at 43 and 45,

Great Eastern-street, 56, 58 and 60, Curtain-road, 32, Holywell-lane, and 101, Clifton-street, London. Private company. Subscribers: H. J. Pool and J. Keen. Subscribers appoint directors.

**LIVERPOOL ECONOMY STORES, LTD.**—Capital £75,000 in £10 shares; to take over the business of wholesale and retail silk mercers, etc., manufacturers and importers of and wholesale and retailers dealers in leather goods, stationery and fancy goods carried on by Joseph Tarlo, L. Cohen, Joel Tarlo and S. Samuels, at 4-18, Deane street, and Market-street at the rear, Liverpool, as the "Liverpool Economy Stores." Private company. Subscribers: Joseph Tarlo, L. Cohen, Joel Tarlo and S. Samuels. Registered office: 4-18, Deane-street, Liverpool.

**HEATH WRAPPER CO., LTD.**—Capital £3,500 in £1 shares; to acquire from B. B. Binks, J. A. T. Crowther, E. N. Kent-Lemon, F. Heath and G. D. Heath, carrying on business at Mirfield, Yorks, as "The Heath Wrapper Co.," certain letters patent No. 139,610 of 1919 relating to an invention known as "Heath's Patent Wrapper," and to carry on the business of wholesale or retail manufacturers of and dealers in wrappings, labelling, stamping or packing machines of all kinds, etc. Private company. Directors: F. Heath, G. D. Heath, B. B. Binks, J. A. T. Crowther and E. N. Kent-Lemon. Registered office: Paragon Iron Works, Halifax.

**JAMESONS (ST. BRIDE'S), LTD.**—Capital £3,000 in £1 shares; music publishers, etc. Private company. Directors: J. D. Adkinson and Mrs. A. M. M. L. Smith.

**BRITANNIC POPULAR MUSIC CO., LTD.**—Capital £1,000 in £1 shares; wholesale and retail music publishers and dealers, etc. Private company. Directors: J. D. Adkinson and Mrs. A. M. M. L'Epine Smith.

### COMPANY MORTGAGES AND CHARGES.

Fresh Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 1908, and Satisfactions registered pursuant to Section 97 of the same Act. (The registration of Satisfactions is not compulsory).

**WEBBERLY, LTD.** (printers).—Mortgage dated July 6th, 1921, to secure £2,000 charged on certain premises in Hanley. Holders: Leek and Moorlands Building Society.

**ALLEN STRONG AND CO., LTD.** (paper merchants and agents, etc., London).—Particulars of £25,000 debentures authorised July 4th, 1921; present issue £10,000; charged on the company's undertaking and property, present and future, including uncalled capital.

**JOHN HEATH AND CO., LTD.** (manufacturers, paper and stationery articles, etc.).—Mortgage on certain properties in Birmingham, dated June 30th, 1921, to secure all moneys due or to become due from company to Lloyd's Bank not exceeding £5,000.

**WALTER FLETCHER (ILFORD), LTD.** (manufacturers and printers of advertising show cards, labels, boxes, stationery, etc.).—Mortgage on leasehold factory premises in Roden-street, Ilford, dated June 18th, 1921, to secure all moneys due or to become due from company to Barclay's Bank.

**CANNON AND CLAPPERTON, LTD.** (paper manufacturers, etc., Sandford-on-Thames).—Satisfaction in full on May 28th, 1921 (a) of first debentures dated January 17th, 1902, to January 13th, 1909, securing £4,900, and (b) of second debentures dated March 31st, 1910, securing £5,000.

**JOHN RISSEN, LTD.** (stationers, etc., London).—Particulars of £2,100 debentures authorised June 7th, 1921; whole amount issued; charged on the company's undertaking and property, present and future, including uncalled capital, subject to such of the debentures issued in 1912 as are outstanding.

**IRISH PAPER MILLS CO., LTD.** (London and Clondalkin, co. Dublin).—Satisfaction to the extent of £3,300 (being balance) on June 14th, 1921, of charge dated March 13th, 1915, securing £30,000.

**FRICKERS, LTD.** (printers, Upper Norwood, S.E.).—Debenture dated June 20th, 1921, to secure £3,675, charged on the company's undertaking and property, present and future, including uncalled and unpaid capital. Holder: Miss A. Abraham, 12, Waldegrave-road, Upper Norwood, S.E.

### BANKRUPTCIES, etc.

**Re BARNETT ROSOFF**, printer and stationer 77, Brick-lane, Spitalfields, lately trading as The Process Art and Commercial Printing Co., at 13, Hague-street, Bethnal Green, E.—This bankrupt who petitioned the London Bankruptcy Court in August, 1919, applied to Mr. Registrar Mellor on July 12th for an order of discharge. The official receiver reported that the bankrupt returned liabilities £1,011 and the assets had realised £55 1s. A Russian Pole, the applicant came to London in 1901. In July, 1915, he started the printing business but knew nothing of the art. The trade increased, but in October, 1918, he was ordered to pay £200 damages, to a boy employee who was injured by machinery from which the guard had been inadvertently removed by someone. In the previous August, the bankrupt contracted to buy £1,400 worth of paper; he received £665 worth and had it manufactured into writing pads for the army in France; there was a heavy fall in the prices offered for the manufactured article, the bankrupt induced the paper merchants to cancel the balance of the contract, and to accept a payment of £200 on account of actual deliveries; he subsequently paid a further £72, and still owed them a balance of about £400. The business came to a stop on the signing of the armistice in November, 1918; he subsequently sold off the stock of pads and all his machinery and closed the business in March, 1919. As offences the official receiver alleged

(1) insufficiency of assets to equal 10s. in the £ on the amount of the liabilities; (2) omission to keep proper books of account; (3) trading with knowledge of insolvency; and (4) misconduct in making repayment of loans to family and friendly creditors to the amount of £180, to the exclusion of trade liabilities aggregating £680. His Honour upheld the report and suspended the discharge for two years and six months.

**RE STEPHEN FORDHAM**, late of 1, Reeves-place, Hoxton, N., cardboard box manufacturer.—Creditors under this failure met at the London Bankruptcy Court on July 18th, before Mr. Warren, official receiver. No accounts were lodged, but the chairman reported that the debtor roughly estimated his liabilities at £2,000 and valued his assets at between £700 and £800. The debtor had stated that he formerly managed the business for his grandmother, but at the end of 1919 it was assigned to him on condition that he paid her £100 cash and allowed her £3 a week for life. He continued it successfully until some six months ago, when there was a considerable drop in the price of stock and the sales resulted in a loss of 50 per cent. A resolution was passed for Mr. A. G. White, C.A., 14, Old Jewry-chambers, E.C., to act as trustee and wind up the estate in bankruptcy.

**RE J. BANNISTER AND Co.**, printers and box manufacturers, 96, Laburnum-street, Kingsland-road, N.E.—The first meeting of creditors under this failure was held last week at the London Bankruptcy Court. Mr. W. P. Bowyer, senr. official receiver, reported that George Newton Osborne had attended under the proceedings, and stated that he was apprenticed to a printer in 1878 and had been in the trade more or less ever since. At one time he was manager of printing works at Cincinatti, at a salary of \$20,000 per annum. In 1915 he purchased for £400 a printing business then being carried on at 27, Old Jewry-chambers; it progressed under his management and in 1917 he purchased further printing plant and removed to the above address. In July, 1919, he took up box-making, and further premises were taken at Brunswick-street, where a fire occurred in October, 1919, causing damage to the extent of £19,000, but he could only recover £5,000 compensation. Subsequently there was another fire at the Laburnum-street premises, but his claim to £8,300 relating thereto had been practically admitted. The debtor attributed his position to heavy interest charges and bad health which had debarred his regular attendance at the business. No statement of accounts had been lodged, but the debtor roughly estimated his liabilities at £20,000 and valued the assets at £12,500. A resolution was passed for Mr. A. Willmott, C.A., 14, Old Jewry-chambers, E.C., to act as trustee and administer the estate in bankruptcy.

**EGHAM URBAN COUNCIL** has been taken to task by the Secretary of State for using the Crown as part of the seal on notepaper, and has been called upon to discontinue its use.

## The "Cambridgeshire Times."

### New Machinery Installed.

The printing office of the *Cambridgeshire Times*—Messrs. G. Sharman and Co., March—has just made an important change in its machinery, a Wharfedale two-feeder, which had become inadequate to meet the growing demands of the newspaper, being removed to give place to a Cossar New Model web machine by Payne and Sons, of Otley.

Messrs. Sharman and Co. express great satisfaction at being able to make the change, as the new press will, they say, enable them to produce their issues more quickly and without the great amount of labour involved in the use of the old-fashioned two-feeder machine, while at the same time avoiding the difficult and wasteful operation of stereotyping, which has to be employed in connection with the rotary presses on which the daily and other large newspapers are printed. In the Cossar New Model Press as compared with the old Wharfedale two-feeder machine the speed is very greatly increased, the size of the issue can be varied as the pressure of news or advertisements may require, pages can be "left open" till a much later hour, so enabling an improved classification of features, and the inclusion of an increased amount of late news.

The type bed of the new Cossar machine is stationary, whilst the impression cylinders and the inkers have a continuous movement. The cylinders, of which there are two for each deck, are traversed over the type forms and returned overhead by continuously-running endless chains, in which the cylinders are journaled. The inking rollers also are traversed over the type and returned underneath the bed by continuously-running endless chains, the inking rollers being mounted in brackets carried by these chains. The machine, which weighs about sixteen tons, will print pages six or seven columns in width, and the issue can be of four, six, eight, ten or twelve pages, or even larger should occasion require. The delivery speed for a paper of any size from four to sixteen pages is 4,000 copies per hour, with all the pages cut and folded, and with the papers counted into dozens.

**CANADIAN COPYRIGHT.**—It was largely due to the printers of New York that the United States passed stringent and very advantageous copyright regulations according to which copyright in the U.S. is granted only to books printed from type or plates made in the United States. The new copyright bill passed by the Canadian House of Commons, chiefly through the strong efforts of Canadian printers, does not make production in Canada essential for copyright but does much to counter the unfair advantage given to the U.S. by American copyright legislation, and confers new protection to Canadian competition with British book-producers.

## Printing Notes from Australia.

A deputation consisting of the executives of the Queensland Typographical Union and representatives of the Government Printing Office employees waited on Mr. Fihelly, the acting premier, to consider the alleged insanitary conditions which have been reported to exist at the Government Printing Office.

The Government Printer, Mr. A. J. Cumming, in conversation with a newspaper representative, denied that dirty and insanitary conditions prevailed in some portions of the building. On the contrary Mr. Cummings declares that the Government Printing Office is the cleanest, best ventilated and best lighted printing office in the Commonwealth.

Rumours have recently been current to the effect that there was a probability of a large number of hands in the Government Printing Office being placed on short time.

Representatives of the Printing Industry Employees' Union recently waited upon the Home Secretary and asked that the Health Department should test the atmospheric conditions prevailing in certain printing offices, who alleged that the atmosphere in some of the printing establishments was inimical to the health and welfare of the employees concerned. It was stated that more than two-thirds of the deaths in the trade were due to pulmonary and occupational diseases.

The Home Secretary, in a reply, said that one of the essentials to health was cleanliness and if the inspections were properly carried out there should be little of which to complain.

Judgments have been awarded by Mr. Justice Macnaughton who has been considering an application for increased wages made by the Queensland branch of the Printing Industry Employees' Union. Dealing with the claim made by the process engravers Mr. Justice Macnaughton said that competition from the south was being keenly felt and that work was being sent down to Sydney. He considered that the rates both for males and females were considerably above the basic rates and would grant no change in the prevailing rates of pay.

An award has also been made on behalf of the Brisbane daily newspapers and papers in the South, Central and Northern divisions. The judge, in delivering his judgment, said that, despite the depression, the wage for compositors of £4 15s. was altogether too low and he had agreed that the rates of wages for compositors above the minimum and under £5 should be increased by 6s., and the rates of compositors above £5 would be

dealt with when the draft award was being discussed at a later date.

## The Scottish Printing Trade.

(By Our Edinburgh Correspondent.)

ALTHOUGH the composition of the coal dispute and the belief that the worst of the industrial unsettlement is past induce confidence of a general trade revival, there are no definite grounds for optimism in the paper and allied trades for the immediate future. It is not expected in Scotland that there will be any improvement in the publishing trade until at least the early autumn.

THE printing trade is still very quiet, with a number of firms on part time, although here and there one hears of better things. The West of Scotland, on the whole, is even worse than the East. Printers complain bitterly of quite unprecedented "cutting" of prices, and there seems no immediate prospect of any approach to stabilisation.

FIRMS who have had contracts running for many years have been knocked out on counter quotations, which appear to be quite ridiculously cheap, and the differences in these cases between the highest and lowest estimates are difficult to explain. For instance, in a recent contract in the East of Scotland the highest offer was round £1,400 and the lowest was just over £400, while in another contract the firm who had held it for close upon fifty years were cut out by an offer about 33 per cent. lower. These tenders were made before any arrangement had been come to for wages reduction, but even a gamble on the probability of lower costs does not cover the discrepancy.

BUSINESS is rather better in the boxmaking trade on account of firms who have been holding off during the coal strike having to come into the market for immediate wants, which there may be some difficulty in supplying before the Trades Holidays, which occur at the end of this month. The buying, however, is rather of a hand-to-mouth character.

VERY many of the paper mills will re-open as soon as supplies of coal are available, and in many cases will be able to keep going to renew stocks which have become depleted. There are, however, few signs of steadying, and prices are still very erratic on account of the keen competition for such business as is passing.

THE recent death of Mr. J. P. Ford, the well-known paper merchant of Glasgow and Edinburgh, has aroused widespread regret in trade circles. This long-established firm, however, will continue to be carried on under the management of his nephew, Mr. James Ford, who has been associated with the business since its inception.

It will be remembered that Mr. Lewis Evans, J.P., the ex-president of the Paper-makers' Association, kindly made a gift to the Association of his library of books connected with the history of papermaking. Additional contributions have been received from Mr. W. Raitt, Mr. W. W. de Buriatte and Mr. H. Brady, and these form a substantial nucleus of a technical library which Mr. A. W. Foster is anxious to extend for the general use of the industry.

MR. HARRY BECKER has accepted the invitation to stand as the Anti-Waste Candidate at the next General Election for Peckham.

THE Kellner-Partington Paper Pulp Co., Ltd., 26, Cannon-street, Manchester, and Blackfriars House, New Bridge-street, London, also 16, Westmoreland-street, Dublin, have been appointed sole selling agents in Great Britain and Ireland for the a/s Hamang Papir-fabrik, whose specialities are bank, tinted banks, bible printings and pot papers.

## Paper Box Wages.

The Paper Box Trade Board propose to reduce the minimum time rates for female workers, other than learners, from 9½d. to 8½d. per hour, the piece work basis time rate for all female workers from 9½d. to 8½d. per hour, and the minimum time rates for the classes of skilled male workers of 23 years of age and over by 1d. per hour, with corresponding reductions in the rates for the skilled male workers of younger ages and in the overtime rates for all skilled male workers of 18 years and over.

## Stationery in Egypt.

German stationery is being sold at many Italian and Greek shops in Egypt, at very low prices, and the material appears to be of a good class, says H.M. Commercial Agent in Egypt. For five sheets of notepaper and five envelopes only five miliemes, or 1½d., is charged.

## Corrugated Paper.

Mr. A. Cartier, engineer, a specialist in the manufacture of corrugated paper and boards since the introduction of this industry into France, has completed the study of an improved machine to produce 10,000 kilogrammes of corrugated paper in rolls daily. Considering that the best existing machines only produce 3,000 kilogrammes per day an idea can be formed of the value of the new machine. This same inventor in 1902 made an improvement in the manufacture of double faced corrugated paper with a machine producing as much as 8,000 kilogrammes daily of double-faced paper, 120 by 130 centimetres. This machine is still working at the works of Mr. Cartier at Fontafie (Charentes) manufacturing double-faced paper weighing from 500 to 1,250 grammes per square metre. A triple-faced double corrugated board can be made on the same machine.—*La Papeterie*.

**BURY PAPERMAKING CO., LTD.**—The half-yearly meeting of the shareholders of the Bury Papermaking Co., Ltd., Gigg Mills, was held at the Chamber of Commerce Rooms, Bury, on Friday, Mr. J. Preston presiding. The report of the directors was adopted and the dividends declared. Mr. George E. Anderson was re-elected a director and Messrs. C. M. Merchant and Son were reappointed the auditors.

**CHARLES MORGAN AND CO., LTD.**, are sending round a fine range of envelopes, both as to qualities and sizes, while their prices are strictly competitive.

**MR. ROBERT W. BROOKS**, president of the Brooks Paper Co., St. Louis, U.S.A., is paying his first visit to Europe with Mrs. Brooks, and is naturally "taking notes" on the paper trade *en route*. He was much impressed by his tour of the battlefields.

## New Inventions.

### Sheet Delivery for Platen.

In a sheet delivery device for a platen press of the kind in which a gripper carries the printed sheet in an upward direction out of the press, the gripper delivers the sheet to a second carrier which conveys the sheet to the delivery table, while the gripper returns to a position directly above the platen so as to be in a position to seize the sheet immediately

upon the opening of the platen. As shown, the delivery gripper *h* is carried by a lever *b* pivoted to the machine frame and operated by a rotating cam *d* acting through a lever *e* and a link *g* which is adjustably connected to the lever *b*. The gripper deposits the sheet on to an oscillating flyer *i* which is operated by the cam *d* through a lever *k* and rack *l*, and deposits the sheet on the delivery table *n*. A reciprocating gripper may be employed instead of the oscillating gripper shown, and the flyer may be replaced by an endless conveyor. The inventors are Messrs. Horn and Schneider.

### Embossing Machines.

Mr. J. B. Smalley has patented a machine or press for embossing in gold, etc., leaf which is provided with a pair of rollers rotated by mechanism actuated by the work-table to draw off a measured length of the leaf-carrying strip from the supply roll. The invention is shown applied to a known type of press in which gold leaf with its supporting paper or like strip 6 passes from a supply roll 7 beneath

embossing dyes 3, against which a work-table 1 is raised by a cam and hand-lever 5. The strip 6 is drawn forward intermittingly by rollers 8, 9, kept in frictional contact by springs 19, the roller 8 being provided at its end with a ratchet-wheel 11 actuated by a spring-pressed pawl 12 pivoted to a slide 13 provided with a slot 25 engaging a fixed pin 14 and pivoted to a lever 15 pivoted at 16 and operated by contact with the table 1 when this is pushed forward. A flexible connection

21 attached at one end to the lever 15 and at the other to a plate 22 provided with a series of holes 23 any one of which may engage a fixed pin 24 whereby the normal position and hence the throw of the lever 15 may be varied to vary the amount of the strip 6 drawn off. A spring 18 retains the slide 13 in its normal position, and the contact of the pin 14 with the end of the slot 25 limits the movement of the slide 13 in the operative direction.

### Lithographic Inks.

A lithographic ink avoiding necessity for damping the stone or other printing surface, as patented by Mr. F. C. Fitzgerald, comprises ordinary lithographic ink incorporated with a mixture of one or more grease resisting materials, such as glycerine, glycol, levulose, or other polyhydric alcohols, or magnesium butyrate or like esters, and one or more deliquescent materials such as calcium chloride

or nitrate, potassium phosphates, sodium lactate, or sodium magnesium chloride. Other ingredients may be added, for example, gum, cresol or phenol, organic acids such as oxalic or tartaric acid, soaps such as sodium or potassium stearate or palmitate, solvents such as ether, alcohol, benzene, ethyl acetate, or carbon tetrachloride, and thin lithographic varnish.

### Printing Press Cylinders.

Messrs. A. Terrey and J. H. W. Smith have patented an invention in which the impression cylinder of a printing press is mounted in eccentric bearings adapted to be rotated by hand to trip or untrip the cylinder, the drive being transmitted directly through a co-axial coupling, such as an Oldham coupling, so as

not to be affected by the adjustment of the cylinder. The shaft *a* of an impression cylinder is mounted in eccentric bearings *b* and *c* rotated by a hand-operated shaft *g* having pinions *f*, *f'* engaging teeth *d*, *e* on the bearings *b*, *c* respectively. One end of the shaft *a* is connected by a form of Oldham coupling *i*, *j*, *k* to a driving-shaft *m* driven by spur, chain, helical, or worm gear. A spring-pressed pawl *p* engaging a double ratchet sprocket *o* on the shaft *g* locks the bearings *b*, *c* in their adjusted

positions. The bearings *b*, *c* may be operated independently and the teeth *e* may be formed on a rim *e'* adjustably secured to the bearing *c* by bolts *z* passing through angular slots in the rim, so that the bearing *c* may be adjusted relatively to the bearing *b* when both are rotated by the same shaft. A worm drive for the shaft *m* is also described, the worm-wheel being mounted in an oil-bath, and the shafts *m*, *a* supported in ball and roller bearings respectively.

THE OLDEST TRADE PROTECTION OFFICE IN THE UNITED KINGDOM.

ESTABLISHED 1776.

**PERRY'S**

Trade Protection  
Offices.

(W. R. PERRY, LTD.),

12, Coleman Street, London, E.C.2.

Status Inquiries made as to the position and standing of Traders and others.

**PERRY'S GAZETTE and LIST OF CREDITORS**

are Published weekly, and are invaluable to every one in business.

# Central School of Printing.

## London Scheme Making Headway: Definite Recommendations to London County Council.

Definite steps are now being taken to establish the much-talked-of Central School of Printing in London. The Education Committee of the London County Council last week decided to recommend the Council to approve in principle the establishment of a central printing school in South London, and that the suggested premises be taken as from December 1st next for 99 years, at an annual rental of £1,800. The Higher Education Sub-Committee stated in a report that, since 1917, the printing trade had urged the establishment of a central institution worthy of the trade in London. It was estimated that 60,000 persons were engaged in the Metropolitan printing and allied trades. The sub-committee had been negotiating with the trustees of certain premises in South London, whence the St. Bride Foundation School could be transferred.

### The Need.

It was appropriate that this matter should be the subject of an address by Mr. W. Howard Hazell at the monthly lunch of the London Master Printers' Association on Wednesday week. Mr. Hazell, at the invitation of the chairman (Mr. R. A. Austen-Leigh), explained the present position of the scheme. He mentioned that St. Bride Foundation Printing School had been a great success with its 1,500 pupils, who attended two or three times a week. As, however, they had only some 5,000 square feet of floor space, they could imagine how crowded the school was, and how unsatisfactory the small rooms were for their purpose. At that school they had a comprehensive curriculum: there were classes for boys who entered the business as errand boys or layers-on, and there was a whole-time

class for one year for the sons of master printers, who went through the various departments, receiving instructions in costing, estimating and order-clerks' work. Recently they had added to the curriculum a course in accountancy and economics at the School of Economics. Some master printers thought that if their sons understood printing, that was all that was necessary; but the sooner master printers understood economics and book-keeping, the better for them and for the trade.

### Southwark-street Site.

Mr. Hazell went on to say that for some time the L.C.C. had considered starting a large central printing school for London. The school at the Polytechnic had been discontinued and also the school at the Aldenham Institute. The only other school in central London, except St. Bride, was at Camberwell and there was a certain amount of instruction in arts and crafts at the school in Southampton-row. The County Council had considered purchasing a large school in Stamford-street, and the committee representing all the interests concerned regarded this as the best site obtainable. The Council were prepared to go on with the scheme, but it would cost £20,000 for the removal, strengthening the building, providing machinery and so on, and the annual expense would be about £12,000. The scheme was fully elaborated 15 months or two years ago, when they were all living in a fool's paradise and did not realise that the bills would come home to roost. A fit of economy had since come over everyone, and the attitude of the Finance Committee of the Council was that they were not prepared to go to this large ex-

pense for one industry in London unless the industry was prepared to subsidise the school. If the printing industry were prepared to do this, it was agreed that they should control the school practically entirely.

#### **The Industry's Contribution.**

It was suggested that the printing industry should find the sum of £2,500 per annum for five years, and if they did so the Council would then go on with the scheme. A large number of associations concerned had already promised their support, and the London Master Printers' Association were prepared to give £675 for two years, which was their quota of the subsidy, and they would recommend future councils of the Association to continue that subsidy for a further period of three years. The newspaper proprietors and the weekly newspapers had also promised their share, and some of the trade unions had done likewise, while others were favourably considering the proposal, in spite of the financial burden which they were now carrying. The Stationery Office were prepared to give £100 a year. Up to the present they had received guarantees of £1,900 or £2,000 per annum. The Education Committee of the County Council had considered the matter on the previous afternoon, and Sir Robert Blair reported that he was convinced that the printing trade was going to find the £2,500 per annum. At the new school they had in view they would have not 5,000 but 50,000 sq. ft., and with that accommodation they would be able to take in all the pupils necessary. At the present time, it was a very unfortunate thing that lads who were willing to go in for technical instruction were debarred from entrance because there was not the cubic capacity to enable them to do so. It had been suggested that leading firms in the printing trade should guarantee a sum per annum for the next five years to meet the deficit, if the amount coming from the trade unions and a few other associations, who had not yet replied, did not make up the £2,500. London was the most important printing centre in the whole world. Those who had been to Germany and seen the accommodation provided there for the printing trade would realise what Germany thought was necessary for the instruction of the printing craft. He hoped that in another 12 months the printing trade of this country would be represented by a technical institution where all the young men would have the opportunities necessary to enable them to assist in promoting the prosperity of their industry.

The Chairman mentioned that there were some who did not even yet appreciate the necessity for education. If their trade was to keep in the van such instruction was essential. If, however, there were any who felt sufficiently interested in education to make a contribution towards the proposed central school, then Mr. Hazell would tell where to send it.

NEWSPAPER life is said to be well pictured in a forthcoming film, "The Dear Fool," by Artemas.

## **Mr. J. R. Riddell on Technical EDUCATION.**

#### **W. and N.W. Master Printers' Meeting.**

In addressing the meeting of the Association of Master Printers of W. and N.W. London at Westbourne Park Institute on Tuesday of last week, on "Technical Education for Printers," Mr. J. R. Riddell, principal of the St. Bride Foundation Printing School, contrived to invest his subject with a great deal of interest, and despite the prevailing summer lassitude, to evoke a lively discussion.

Matters of business first claimed the attention of the meeting, including additions to membership. It was proposed, seconded, and agreed, that the Association send to Mr. Bridges, organiser of the recent Printing Exhibition, an expression of thanks for his kindness in entertaining the Association's representatives.

#### **Moral Element in Education.**

Mr. Riddell was then called upon, and had a cordial reception on rising to speak. He first drew attention to the need that craft education should include moral training as well as instruction in details of craftsmanship. He deplored the lack of moral responsibility in many of the lads of to-day, and gave some indication of his methods of inculcating in students habits of punctuality and honest application in the carrying out of the studies undertaken.

Going back to the "bad old days" of technical education, Mr. Riddell said the early attempts at providing technical instruction without adequately qualified teachers and in ridiculously short courses of study had made it plain that an impossible task had been attempted. Nevertheless, the benefit of those early efforts was being reaped in the technical education of to-day. There were now good schools, though none of them was perfect, and their imperfections were largely due to indifference on the part of the crafts which were calculated to benefit most by the work attempted. He referred particularly to the inadequate response of lithographic students to the educational facilities provided. Although at St. Bride they had many excellent litho students, their numbers were not in proportion to those in other sections of the industry. Lithography specially lent itself to technical instruction, and there were many opportunities offering to the lithographer of to-day which would be lost unless he awoke to take advantage of the possibilities before him.

#### **The New Technical Institute.**

The old apathy, however, was passing away, as was shown by the great interest taken in the scheme at present in hand for the provision of a new technical institute in London of the nature of a university of printing.

Turning aside to review briefly the progress of technical education in printing that had made the new institute a necessity, Mr.

Riddell told how, four years before the Fisher Act became operative, London master printers were working out voluntarily at St. Bride the principles aimed at in that Act. He recounted his efforts to start day classes, and how he had succeeded in doing so even in the most difficult period of the War, 1916. He traced the growth of the classes at St. Bride, saying that hundreds were now being refused admission, and that this year there were 1,500 individual students in the same place, where at one time 300 to 350 had been thought an unmanageable number. As it was impossible that this should go on, some active spirits in London printerdom—and here Mr. Riddell made mention with high appreciation of the services in the cause of craft education of Mr. George Eaton Hart, Mr. Edward Unwin, and Mr. W. Howard Hazell—got together to consider what could be done, and the suggestion of the new institute was the result. A committee was elected representing all sections of the craft, employers, managers, and work-people, with Lord Riddell as chairman, and this committee worked out a scheme in accordance with which each section should contribute something towards the maintenance of the projected institute. The proposal now was that at least £2,500 per annum for five years should be raised by organisations in the trade, in consideration of which sum the printing trade would nominate the governing body and so would have the control of the school. Mr. Riddell added that at a recent meeting of the committee the required sum of £2,500 had been guaranteed. The money was not all raised yet, but those present at that meeting had undertaken to raise what was lacking, so that the scheme could be proceeded with. He further stated that London printers had a good friend in Sir Robert Blair, who was keen to get the new school started without delay.

#### **Craft Education of the Future.**

Going on to speak of the great advantages that would accrue from the move from the present inadequate accommodation at St. Bride to much larger premises at the new institute, Mr. Riddell expressed the hope that the institute would prove to be a real Printing University to which people would come from all over the world, and he said he thought it might be possible in time for students to obtain, through its classes, degrees and other honours from London University.

Looking ahead to the educational possibilities of the future, Mr. Riddell urged that more attention should be paid to the careful selection of apprentices, and he made suggestions for improved methods in such matters as the payment of apprentices, the insertion in indentures of more definite terms regarding the training promised, and the provision of general preliminary education that should have a direct bearing upon the vocation of printing. In closing, Mr. Riddell pointed out the connection between improved education and higher production in the workshop; he maintained that the training of apprentices in the elimination of non productive effort would make for more economic production.

Members' appreciation of the lecture was indicated by hearty applause, and the chairman, Mr. E. W. Wormald, gave verbal expression to their interest in what had been said. Mr. J. R. Burt, the hon. secretary, opened the discussion by referring to the question of the teaching of mechanical composition to apprentices, and on this and several other of the many points touched on in the address a good deal of interesting discussion ensued.

The meeting concluded with a hearty vote of thanks to the lecturer, moved by Mr. F. A. Perry and seconded by Mr. A. T. Philp.

## **Envelopes for Egypt.**

A communication has been received in the Department of Overseas Trade from His Majesty's Commercial Agent for Egypt (Mr. E. H. Mulock) under date July 1st, 1921, in which he transmits copies of the specifications, conditions of contract, etc., relating to a call for tenders for the supply of 1,013,400 buff envelopes, size 20 by 14½ centimetres, required by the Central Stationery Stores, Ministry of Finance, Cairo, for the year 1921-22.

Tenders will be received by the Central Stores Department, Ministry of Finance, Cairo, up to noon on August 25th, 1921.

A copy of the specification, etc., may be inspected by United Kingdom firms interested on application at the Inquiry Office of the Department, 35, Old Queen-street, S.W.1, while further copies are available for loan, in order of application, to firms whose works or offices are situated in the Provinces and who may not find it convenient to call at the Department.

## **Paper Box Wages.**

The Paper Box Trade Board (Great Britain), have agreed to issue a notice of proposal to vary the general minimum time rates for female workers other than learners from 9½d. to 8½d. per hour, and the piece-work basis time rate for all female workers from 9½d. to 8½d. per hour, with corresponding variations in the minimum rates for learners and in the overtime rates. The Board also propose to vary the general minimum time rates for the classes of skilled male workers of 23 years of age and over by a reduction of 1d. per hour, with corresponding reductions in the rates for the skilled male workers of younger ages, and in the overtime rates for all skilled male workers of 18 years and over. No variation is proposed in the rates for other male workers.

THE British Paper Co., Ltd., Frogmore Mill, Hemel Hempstead, Herts, have joined the Federation of British Industries.

## London Master Printers' Association

### Wages, etc., Discussed at the Monthly Lunch.

There were so many interesting topics to be discussed at the monthly lunch of the London Master Printers' Association on Wednesday of last week, that the president of the Association (Mr. R. A. Austen-Leigh), who was in the chair, was unable to enlighten members upon his recent visit to France as a delegate of the National Association to the conference of the French Master Printers' Association. The subjects which engaged attention, after the cooling and refreshing lunch, were wages, payment for holidays, and the proposed Central School of Printing.

The chairman first of all introduced the subject of wages, and described the progress of negotiations. He referred to the effort to negotiate with all the unions together instead of with the 23 individually. They were so far successful, that they had met all together, with the exception of two—the T.A. and the lithographers. That meeting was of quite a pleasant nature, and while they had not receded from their demand for a reduction of 15s. for men and 5s. for women, they did offer that the reduction should be taken in three instalments, in August, September and October.

Mr. J. C. Coppock, vice-president of the national Federation, addressed the gathering at the request of the chairman, and said that they and the Federation appreciated the brilliancy of the London president in connection with the various negotiations, and they were looking forward to the time when he would preside, not only over the destinies of the London Association, but also over the national Federation.

### An Appeal for Unity.

Coming to the question of wage-reduction, Mr. Coppock expressed the hope that they were all in earnest on this question, and that, if they decided upon a course of action, all of them from John O'Groats to Penzance would stick together. He was not suggesting that they should hastily enter into a fight or a lock-out or put in notices, but he did maintain that once a decision was taken, they should present an unbroken front. The future welfare of the printing trade in this country depended, particularly at this moment, upon some reduction in the price of their product. The demand was being made from various quarters. The publishers had already made it in London and throughout the country, and he knew that in various areas trade was suffering from the fact that the cost of their product was so high. Master printers had to make up their minds that the cost of printing had to be lowered, and the members of the unions had to agree to a reduction in their wages. Therefore, whatever the Federation decided to do should receive the unanimous backing and support of the whole country, and, as a result

of the reduction, place the printing industry on a firmer basis than it now occupied. (Hear, hear).

Mr. H. A. Bethell, president of the Lancashire and Cheshire Alliance, also addressed the members, and incidentally suggested that the Master Printers' Association ought to provide adequate accommodation for their delegates from the provinces so that they could meet in comfort and discuss the weighty problems which came before them in a calm and cool atmosphere.

Mr. Howard Hazell's address on the new Central School for Printing, which was also given on this, the last monthly lunch before the summer vacation, will be found in another column.

## Trade Union Matters.

THE wages question, now being negotiated, is the subject most to the fore among the trade unions of the printing and allied trades. In the current negotiations one of the most noticeable features, to the student of trades unionism, is the lack of a united front on the side of the men's organisations.

THE holding aloof of the L.S.C. and the Electrotypers and Stereotypers, as well as the Typographical Association and the Lithographers, from the negotiations as conducted by their own federation is further evidence of that conflict between the desire for the general good on the one hand and the hope of individual advantage on the other which makes so difficult an approach towards amalgamation among the too numerous unions existing in our industry. Thus one cannot be surprised that amalgamation proposals—though at least it can be said that the men's federation is now instructed to draft a scheme—are still much in the "pious hope" stage.

WITH the August Bank Holiday upon us it may be stated that the previous arrangement holds goods as to payment, and that the following rule applies to future Bank Holidays:—"In the case of any employees who are working short time payment for Bank Holidays shall be one-sixth of the weekly wages earned taking the average of the four weeks immediately prior to the holiday. Payment shall be made at the full rate if full time is resumed in the week in which the Bank Holiday occurs." Payment for the annual week's holiday is to be made at the full rate without any deduction because a firm may have been working short time.

THE death has taken place suddenly of Mr. S. H. Fry, Highbury, London, who, with his father, was a pioneer in the photographic paper and plate-making trade.

### Standardisation of Paper.

SIR,—Mr. R. G. Harvey Greenham, secretary of the National Association of Wholesale Stationers and Paper Merchants, in your issue of July 14th, refers to the scheme for standardisation of paper.

This scheme was submitted to the Federation of Master Printers, and approved by them, and then revised by a committee consisting of representatives of the wholesale stationers, papermakers and envelope manufacturers, and some modifications were made in the scheme I had originally prepared. The revised scheme was then submitted to the wholesale stationers and papermakers, but, after some months of consideration, the reply given was that they could not accept the scheme, and no alternative suggestion was made.

The Federation of Master Printers at their Annual Congress at Scarborough, in May, again approved the scheme, and a fresh effort will shortly be made by them to obtain an agreement on the question.

Mr. Greenham in his article states: "It is by no means a simple matter to vary sizes and weights which have been of universal adoption for many years past." The difficulty that printers are faced with is that there is *no standard universally adopted*, and the suggestions are made with the idea of eliminating the many varieties that exist, and consequent difficulties and errors.

Briefly, the scheme is as follows:—

That the present uncertainty and variation in sizes should be removed, and standard sizes adopted:

That certain standard weights should be recognised as the normal weights, to be stocked by wholesale stationers.

That the variable number of sheets to a ream should be eliminated, and a standard of 500 sheets per ream be adopted.

That the use of a name such as "Demy" for paper of more than one size should be abandoned.

The above suggestions only apply to regularly stocked standard papers, which would usually be stocked by every wholesale stationer, and would be in considerable demand. This would not prevent any printer ordering, or a wholesale stationer stocking, any special size or weight if their business required it.

The advantage of the above standardisation would be considerable. Paper stocks would be greatly reduced owing to the uniformity of sizes and of packing, and less capital would be required by all concerned. Errors in estimating and manufacturing would be reduced.

The economy that would result from the change would help to reduce the price of paper, which would stimulate the demand,

and it would be to the ultimate benefit of all the trades concerned.

I earnestly hope, with the renewal of negotiations, it will be possible to arrive at some agreement as to standardisation.—Yours, etc.,  
W. HOWARD HAZELL.

52, Long-acre, London, July 15th.

### The Bookbinder and the Time Docket.

SIR,—At first sight it would appear that Mr. Harraway has "given it me in the neck," but I can assure him I shall require a lot of "knocking out."

After reading my letter of July 6th (published in your journal of 14th) Mr. Hazell wrote me a most courteous letter in which he said "I did not realise that I gave Mr. Harraway any opening to 'twit' on any difficulty in the introduction of the time docket, but wished to make it quite clear that there is no difficulty"—so much for Mr. Harraway's allegation as regards Mr. Hazell.

It now appears, however, that I have laid myself open to attack. It cannot be on account of anything contained in my letter, which even Mr. Harraway practically admits is uncompromising. The vulnerable point, then, appears to be in the fact that I did not join in the acrimonious discussion which took place at the Manchester meeting, where, it cannot be denied, the attitude of the men was unreasonable, inflexible and bordering upon turbulence. For a small minority of employers to attempt to convert 500 or 600 irrational men in the space of an hour was as hopeless a case as it was a degrading spectacle, and nobody with any self-respect would stand up and be bullied by the men for whom he was unfortunate enough to be finding employment.

I have no apology to offer and no excuse to make for anything contained in the letter which Mr. Harraway so deeply deplores. I affirm and maintain that in no other trade but bookbinding would a workman find employment if he refused to furnish time on work. It is astounding that master binders should allow Rule No. 17 to stand in the rules of the National Union of Bookbinders and Machine Rulers without taking drastic steps to get it eliminated—it reads as follows:—"No member shall be allowed to time his work except on special jobs only, this custom being conducive to task work. And any member working piecework, or upon any other terms than weekly wages, will be fined the sum of £1."

I have no hesitation in saying that no other federation of employers would negotiate with a trade union which countenanced such an abomination; the rule is at once a menace to the trade, the negation of business, a disgrace to the organisation which allows it to remain on its books and a standing reminder to master binders of their feebleness and irresolution.

Yours etc.,

HOWARD VICK,  
(Member of the Costing Committee  
Manchester M.P. Association).

Manchester, July 25th.

# “SLOGGER”

## AUTOMATIC SHEET FEEDER

### Latest Improvements on the “SLOGGER.”

1. Aluminium Stroker Arms avoiding all bending.
2. More accessible Pile Raising Adjuster. Absolutely self-locking. No lock nuts to work loose.
3. Automatic side lay giving perfect register.
4. Fine thread Caliper Adjustment which immediately stops machine and feeder if two or more sheets are stuck.
- 5, 6 & 7. Stopping, Starting and Trip Handles. All controls in one place.
8. Bevel Drive instead of Chain.
9. Fan for air draft mounted in one unit on Base of Feeder.
10. Leather collapsible joint to allow air-box movement without the use of perishable rubber.
11. Air throttle control adjusted in a few seconds for any thickness of paper on board.
12. Pile Raising Handle for raising pile to starting height at the commencement of each loading.

## Trade Notes.

MEMBERS of the Publicity Club of London evaded the printing of Saturday's London *Evening News*.

LOCKETT, CROSSLAND AND Co., Manchester, and Messrs. R. Hoe and Co., Ltd., London, have become members of the Federation of British Industries.

THE object of the Advertisements Bill, 1921, introduced in the House of Lords by Lord Askwith on July 14th, is to enable local authorities to require the removal of unsightly advertisements.

"THE company considers that the poster would be unacceptable to the public," is the explanation given by Electric House in respect of the banning by the Underground of the Grand Guignol poster "The Old Women."

UNDER the style of "J. Bartlett and Co.," the business of Mr. J. Bartlett, bookseller, stationer and printer, of 63, North End, Croyden, is now being conducted in partnership with Mr. W. E. Goodson and Mr. A. B. Samman, who have been with Mr. Bartlett for 37 and 28 years respectively.

THE Paper Bag Trade Board proposes to reduce the minimum rates. The suggested reductions of time rates vary from a penny to 1½d. an hour in the case of all workers 21 years of age and over, and proportionate reductions for younger and less-experienced workers. The piece-work basis time rate it is proposed to reduce from 9½d. to 8½d. an hour.

CITY AND GUILDS EXAMINATIONS. — The Department of Technology of the City and Guilds of London Institute has issued its Programme for the Session 1921-1922 (John Murray, price 3s. 6d. net). It contains general regulations and syllabuses for examinations in about eighty departments of technology, including typography, lithography, book-binding and paper manufacture.

THE POST CARD PUZZLE.—Questions have been asked in the House, without receiving satisfactory replies, as to why picture post cards, bearing not more than five words of simple greeting, according to regulation, were being surcharged a penny at certain offices, while at others cards stamped with a penny and containing five words of commercial information passed without any surcharge.

PRINTERS' CHESS. — There has just been formed a Chess League for the printing and allied trades, and the programme for the forthcoming season is now in course of preparation. Seven firms have already joined the League, namely, the Amalgamated Press, S. H. Benson, Ltd., Cassell and Co., Oxford University Press, St. Clement's Press, Simpkin, Marshall and Co., W. H. Smith and Son. Further applications for membership of the League will be welcomed by the Hon. Secretary, Mr. R. B. Stannard, Oxford University Press, Amen Corner, E.C.

THE death has occurred of Mr. William Skeat, 74, principal partner of the firm of Messrs. Milne and Hutchinson, printers and stationers, Aberdeen.

AT the Victoria and Albert Museum, South Kensington, a temporary exhibition of wall-papers and posters is now open to the public in Rooms 95 to 99 of the Sheepshanks Galleries.

EMPLOYEES of Messrs. Ormerod Bros., Rochdale, litho and letterpress printers, held their annual outing to Morecombe last Saturday. The journey was by char-a-bancs through some of the finest country in the county.

IN celebration of its centenary, which occurred on July 2nd, the *Englishman*, of Calcutta, the oldest Indian daily paper, issued a special supplement, which contained interesting reminiscences of the long career of this famous paper.

IN the person of Mr. James Brown, Newcastle-on-Tyne has recently lost an old and highly esteemed printer, who, prior to his retirement from the position of overseer with Messrs. R. Ward and Sons, of Newcastle, had been in the employ of that firm for forty-six years.

IN a series of actions in which the Forward Printing and Publishing Co. (Glasgow) and another were sued by the Pearl Assurance Co., Ltd., and another for damages in respect of alleged slander in the *Forward* newspaper, the actions were dismissed last week, with expenses to the defendants.

THE appeal of the National Labour Press, Manchester, and two members of the committee of the Workers' Movement, against the convictions imposed by the Salford Stipendiary for having been concerned in the issuing of seditious pamphlets was dismissed at the Salford Borough Sessions on Friday. The Labour Press had been fined £50.

DESIGNS submitted in the Owen Jones Competition, 1921 (Royal Society of Arts) are being exhibited at the Victoria and Albert Museum, South Kensington (Room 132, Department of Textiles), examples in book-production and ornamental leather work being included. The exhibition will continue until September 17th—10 a.m. to 5 p.m. (Sundays, 2.30 to 6.0 p.m.)

FOX TALBOT MEMORIAL.—It is now forty-four years since the death of Henry Fox Talbot, upon whose researches the present-day practice of photography and photo-engraving has been built up. At the recently-held Photographic Convention at Bristol, an opportunity was taken by his grand-daughter, Miss M. Talbot, to present his collection of experimental apparatus and results to the Museum of the Royal Photographic Society. So far, no steps have been taken by British photographers to perpetuate the memory of their distinguished fellow countryman. To remedy this omission the Council of the Royal Photographic Society (35, Russell-square, W.C.1), has opened a fund by means of which some permanent memorial may be set up at Lacock, where his home was, and where his experiments and discoveries were made.

## Current Topics.

### Wages: A Step Towards Settlement.

SOME approach towards agreement in the wages negotiations was reached on Monday when there was a further conference between the Federation of Master Printers and the Newspaper Society, on the one hand, and the Printing and Kindred Trades Federation on the other. Mr. J. MacLehose presided, and Mr. C. W. Bowerman occupied the vice-chair. On this occasion, as at the last conference, the men's federation was not empowered to represent the Typographical Association nor the Society of Lithographic Printers; this time, however, it was stated that the London Society of Compositors and the Society of Electrotypers and Stereotypers were also not represented. The conference was successful in leading to a compromise whereby it was agreed that all the parties represented should make the following recommendation to their respective organisations: "That a reduction in wages of 5s. per week from the wages paid to all adult male members of unions affiliated

to the Printing and Kindred Trades Federation for whom the federation were empowered to negotiate shall take effect on the pay day in the week ending August 13th, and a further 5s. per week reduction on the pay day in the week ending September 10th. For all fully-qualified women workers it was decided that a reduction of 2s. per week be made on the pay day in the week ending August 13th, with a further reduction of 1s. 6d. per week on the pay day in the week ending September 10th; also a corresponding adjustment of the wages scale to the male learners and junior women workers, and also pieceworkers."

\* \* \*

### Forthcoming Negotiations.

THE Joint Industrial Council of the Printing and Allied Trades met at Montague House, on Tuesday, and discussed the position existing between the Employers' Federation and the Typographical Association, the London Society of Compositors, the Stereotypers and Electrotypers' Society, and the Amalgamated Society of Lithographic Printers. A resolution was unanimously passed recommending the parties to resume negotiations, and it was provisionally agreed that these meetings should take place on Wednesday, August 3rd.

### The Irish Printing Trade.

PRINTERS in Ireland are, like their English confreres, finding it a difficult matter to achieve those reduced prices for printing by which alone any considerable improvement in trade can be expected. Their feelings in the matter were indicated at the annual meeting of the Irish Master Printers' Association, held at Dublin on the 18th inst., when a resolution was unanimously passed refusing to recognise or consider any changes in working conditions which would entail either increase in cost, restrictions of privileges at present existing, or demands for increase of wages. It was further resolved that the time has come to press the memorial for a reduction of 15 per cent., on present wages. The unfortunate effects of high prices were stressed in the report of the general secretary (Mr. V. D. Hughes) which, however, showed that the organisation had increased in membership during the year, and its finances were in a strong position despite the fact that the condition of trade in the provinces could not be regarded as satisfactory. The newly-elected or re-elected officers of the Association are: Mr. T. J. W. Kenny, re-elected president; Mr. H. L. Glasgow, vice-president; Mr. J. J. O'Leary, Dublin, hon. treasurer, and T. F. McGahan, hon. secretary.

### Unemployment Decreasing.

STATISTICS for the month of June indicate a lessening of unemployment in the paper, printing and allied trades. Although the improvement is not very marked, it is a step in the right direction, and will gain momentum as time goes along. Unfortunately, other industries on the whole do not appear to have shown the same improvement on the average. The total unemployment at June 24th in the paper trade was 15,529 (10,109 males and 5,420 females). The corresponding figure on May 27th was 17,027. Those who were partially unemployed on June 24th were 11,675, compared with 12,332 in May. As the total number of insured workpeople at the end of May was 56,840 (38,590 males, 18,250 females) the percentage of total unemployment works out at 27.3, and partially employed to 20.54. Decreases in unemployment are also recorded in the manufactured stationery section and in the printing, publishing and bookbinding section of the industry. In the case of manufactured stationery the number of persons unemployed dropped from 10,600 to 9,807 in June, while the figures for the partially employed decreased from 9,269 to 9,093. The total percentage of 27.64 is represented by 14.34 per cent. in the case of the totally unemployed, and 13.3 in the case of the partially employed.

### Personal.

LORD BURNHAM has given some 65 to 75 acres of woodland adjoining Burnham Beeches to the Corporation of London for the enjoyment of the public, in memory of his father. The woodland, which is worth about £10,000, is to be known as "Fleet Wood" in allusion to Lord Burnham's father's journalistic career.

LORD BURNHAM was president at a luncheon last Thursday, when representatives of various industrial co-operative and other organisations gathered at the Hotel Cecil in honour of Mr. Edward Owen Greening, "the father of the co-operative and co-partnership movement."

SIR GEO. ROWLAND BLADES, M.P., has been establishing records in a variety of directions lately. Only recently he performed a remarkable golf feat, and on Sunday he was among the prominent residents who marched through the streets of Sutton in procession, headed by the Salvation Army band, and afterwards addressed a large gathering on the Green, organised by the local branch of the League of Nations.

THE Controller of His Majesty's Stationery Office has appointed Mr. J. G. Hughes-Roberts

to be his private secretary in place of Mr. L. S. Gray, promoted.

SIR DAWSON WILLIAMS, editor of the *British Medical Journal*, was at Durham University last week presented with the honorary degree of D.Litt., while Dr. Alfred Cox, medical secretary of the *British Medical Journal*, was granted the M.A. degree.

CONGRATULATIONS to Mr. Charles Baker, proprietor and editor of the *Newspaper World*, who has just celebrated his 70th birthday and the completion of his 50th year in journalism.

THE event was made the occasion yesterday for a happy little ceremony at the offices of the Newspaper Proprietors' Association, Lord Burnham presenting to Mr. Baker on behalf of "friends and admirers in the newspaper and periodical world" a handsome piece of furniture combining writing desk and sectional book-case, while Mrs. Baker was the recipient of a rose-bowl—both gifts being suitably inscribed.

MR. J. MACLEHOSE, M.A., LL.D., president of the Federation of Master Printers, is to present the prizes and certificates to St. Bride students at the School's public meeting in September.

DR. HEADLAM finds it necessary to give up the editorship of *Church Quarterly Review*, which he has held since 1901. The *Review* will be edited in future by members of the Faculty of Theology of King's College, London.

ON the occasion of the recent silver wedding of Mr. Charles Bartlett, for 30 years commercial manager of the Exeter district for the *Western Morning News and Mercury*, the proprietors of the journal presented to Mr. and Mrs. Bartlett a silver teapot, sugar basin and milk jug.

IN the composing-room of the *Wigan Observer* presentations were recently made to two members of the printing staff, Mr. J. Smith and Mr. W. H. White, who retired on superannuation after having worked for the proprietors for over 53 and 47 years respectively.

MR. G. C. ROBERTSON has just joined the staff of Messrs. Livingstone, Page and Co. Educated at Merchiston Castle, where he, like so many others at that famous Scottish School, distinguished himself on the playing fields, Mr. Robertson, in 1914, was gazetted to the Royal Scots, in which he served throughout the war. In 1919 he began his paper trade career with Messrs. Alex. Pirie and Sons, Ltd., Aberdeen. Our golfing friends in the Stationers' Society will be interested to learn that Mr. Robertson is a scratch golfer.

### DIVIDENDS AND REPORTS.

**WYMAN AND SONS.**—Wyman and Sons recommends dividend of 10 per cent. free of tax, on ordinary shares for the year; £10,000 to general reserve, making £40,000; about £13,000 forward, after payment of corporation profits tax and directors' additional remuneration.

**WELDONS, LTD.**—The net profit of Weldons, Ltd., for the year ended June 30th last amounted to £37,312 against £72,949 in the previous year. Of £41,152 brought forward, excess profits duty and corporation profits tax for the previous year absorbed £17,211, and adding the balance (£23,941) to the net profit there is a total of £61,253. The directors propose a dividend on the ordinary shares at the rate of 10 per cent. per annum for the last half of the year, together with a bonus of 2½ per cent. (making 12½ per cent. for the year), and to carry forward £28,753. Last year £10,000 was set aside in respect of depreciation of investments, and the total distribution amounted to 20 per cent.

### NEW COMPANIES.

**CARDINAL RIBBON AND CARBON CO., LTD.**—Capital £800 in £1 shares; manufacturers, importers and exporters of and dealers in all

kinds of ribbons for use on machines, requiring printing ribbons, carbon papers, stationery, books, etc. Private company. First directors: B. E. Close and E. J. Gabb. Registered office: Chiswell House, Finsbury-pavement, E.C.2.

**CHISSICK AND CO., LTD.**—Capital £2,000 in £1 shares; makers of all kinds of goods from leathers, imitation leathers, paper, linen, cardboard and other materials, manufacturing stationers, printers, diesinkers, bag and box makers, etc. Private company. Directors: F. A. Squire and M. Chissick. Registered office: 15, Dorset-street, Salisbury-square, E.C.

**ARTHUR HALLIDAY AND CO., LTD.**—Capital £5,000 in £1 shares; manufacturers of and dealers in paper and articles made from paper and pulp, dealers in esparto and other grasses, jute, flax and other fibres, bleaching and other materials, colouring matters, stains, dyes and pigments, etc. Private company. First directors: A. Halliday and Mrs. A. Halliday. Registered office: 69, Corporation-street, Manchester.

**GLENALLEN (ENGRAVERS), LTD.**—Capital £1,500 in £1 shares (200 5 per cent. cumulative preference); advertising contractors, press agents, printers, stationers, billposters, engravers, etchers, artists, block makers, publishers, etc. Private company. First directors: D. E. Allen and C. J. Tompkins. Registered office: 105, Colmore-row, Birmingham.

**WILLIAM BURNS (LARKHALL), LTD.**—Capital £3,000 in £1 shares; to acquire, as from 31st March, 1921, the business of a wholesale stationer, letterpress and lithographic printer and account book maker carried on by W. Burns, at Clydesdale Printing and Stationery Works, Larkhall. Private company. First directors: W. Burns, Miss R. W. Burns and T. Lang. Registered office: 42, Union-street, Larkhall.

**ROLO, LTD.**—Capital £1,000, in £1 shares; manufacturers of and dealers in duplicating machines, wax and other stencils, inks, etc. Private company. First directors: G. A. Ashcroft and Miss Martha Stall. Registered office: 53 and 54, Chancery-lane, W.C.

**HARWELL (BIRMINGHAM), LTD.**—Capital £1,000, in £1 shares; to take over the business of wholesale paper merchants, printers and paper bag makers, carried on at 4, Broad-street, Birmingham, as "John Harris and Sons (Birmingham)," and to carry on the business of general dealers, bookbinders, box-makers,

stationers, die stampers, picture framers, toy dealers, tobacconists, leather merchants and advertising agents. Private company. First directors: H. F. Harris and H. T. Welling.

**CHARPENTIER, LTD.**—Capital £6,000, in £1 shares (1,000 non-cumulative preference); to acquire the business of Charpentier and Co.; to adopt an agreement with A. Moth and H. E. Moth, and to carry on the business of printers, engravers, publishers, etc. Private company. Directors: A. Moth and H. C. Moth. Registered office: 46, High-street, Portsmouth.

**ERCOLI VALERIO AND SONS, LTD.** (London).—Capital £500, in 10s. shares; printers, publishers, newspaper proprietors, etc. Private company. First directors: E. Valerio and G. Savani.

**"GEOGRAPHIA" SALES ORGANISER, LTD.**—Capital £1,000, in £1 shares (800 ordinary and 200 "B"); advertising contractors in connection with newspapers, journals, magazines, maps, books and other literary works and undertakings, general advertising agents, etc. Private company. First directors: A. Gross, C. A. Sherring, G. H. Le Grys and F. G. Crowley. Registered office: 3, King's-court, Fleet-street, F.C.

**ALDWYCH PUBLISHING CO., LTD.**—Capital £500, in £1 shares. Private company. First directors: C. Blake, C. Heasman, W. F. Webb, J. Casanova and H. S. Macintosh. Registered office: 149, Strand, W.C.

### COMPANY MORTGAGES AND CHARGES.

Fresh Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 19-8, and Satisfactions registered pursuant to Section 97 of the same Act. (The registration of Satisfactions is not compulsory).

**P. D. EASTIES AND CO., LTD.** (Newspaper Proprietors).—Mortgage dated July 13th, 1921, to secure £2,000, charged on 39, St. George's-street, Canterbury. Holders: Kent and Canterbury Permanent Benefit Building Society.

**MENT MILNE AND PARTNERS, LTD.** (Paper Merchants and Agents, Manufacturers of Paper Bags and other Wrappings and Containers, etc., London).—Issue on June 10th, 1921, of £1,000 debentures, part of a series already registered.

**DEVERELL, SHARPE AND GIBSON, LTD.** (Newspaper Proprietors, etc., London).—Satisfaction in full on January 31st, 1921, of mortgage and Land Registry Charge, both dated April 21st, 1920, securing £2,500.

**AMALGAMATED PHOTOGRAPHIC MANUFACTURERS, LTD.**—First debenture, dated July 8th, 1921, to secure £100,000, charged on company's undertaking and property, present and future, including uncalled capital, subject as to part thereof to a prior mortgage. Holders: Branch Nominees, Ltd., 15, Bishopsgate, E.C.

**W. AND G. FOYLE, LTD.** (Printers).—Mortgage dated June 28th, 1921, to secure £1,000

on 65, Grand-parade, Green-lanes, Tottenham. Holder: Mrs. J. Hill, 75, The Drive, Golders' green, N.

**F. J. PARSONS, LTD.** (Newspaper Proprietors, Printers, Publishers, etc., Hastings).—Satisfaction in full on June 24th, 1921, of debentures dated October 15th, 1897, securing £14,000.

**E. T. W. DENNIS AND SONS, LTD.** (Art Publishers and Printers, etc.).—Mortgage on certain lands and buildings in Scarborough dated July 5th, 1921, to secure all moneys due or to become due from company to London County, Westminster and Parr's Bank.

**FRANK DONALD, LTD.** (Printers, Birmingham).—Mortgage dated June 24th, 1921, as collateral security to debentures for £2,750, charged on certain land and premises in Red-ditch, Worcester. Holders: T. Wiggins-Davies, International Exchange, Edmund-street, Birmingham.

**ALBERT POLE AND SON (1914), LTD.** (Printers, Stationers, etc.).—Mortgage on 46 and 47, Merchant-street, Bristol, dated July 8th, 1921, to secure all moneys due or to become due from company to London County, Westminster and Parr's Bank.

## Gazette.

### A WORD OF CAUTION.

In giving the official Gazette information, it must be distinctly understood that we take official records as we find them, and accept no responsibility for inaccuracies, while, as an almost invariable rule, the facts will be found correct. We advise our readers, before forming hasty judgment, to consider that there may be in each case satisfactory explanation which does not appear on the records.—Ed.]

### ENGLAND AND WALES.

#### PARTNERSHIP DISSOLVED.

Johnson, Thomas, and Johnson, Harry Thomas, Nantwich, printers, so far as concerns Thomas Johnson.

Powelson, Sidney Stephen, and Johnson, William Owen, letterpress printers, 208, Chapel-street, Salford.

Berlin, Karl Gustaf Herman, and Ridley, Reginald Cartmell, paper agents, 3, Laurence Pountney-hill, E.C.

#### RECEIVING ORDERS.

Newman, Ronald Moore, 40, Torrington-square, journalist, July 13th. Public examination, October 14th, at Bankruptcy-buildings, Carey-street.

Charlton, Randal, 119, Park-road, Hanover-gate, journalist, July 8th. Public examination, October 19th, at Bankruptcy-buildings, Carey-street.

Hine, Shirley Angus Egerton, 133 to 136, High Holborn, stationer, July 10th. Public examination, October 21st, at Bankruptcy-buildings, Carey-street.

## Printing, Bookbinding & Kindred TRADES OVERSEERS' ASSOCIATION.

### Visit to the Alf. Evans Memorial Home, Carshalton.

Ideal weather conditions favoured the annual outing of the Association which took place on Saturday, when a visit was paid to the Alf. Evans' Memorial Home, Carshalton, Surrey. As a testimony to the keen interest the members have taken in the Home since its inception it may be mentioned that this was the third visit the Association has made in the space of five years. The party, numbering close on 50 ladies and gentlemen, left town of their own choice as to time, making their way to Carshalton as fancy led them, many arriving at the Home in the morning intent on deriving as much as possible of the benefits of the salubrious air and the scenes afforded by the beautiful surroundings in which the Home is situated. Among those who accompanied the party were Messrs. A. W. Hunt, Aves, Eden, Fleming, T. Hunt, Daines, Walker, Lee and Latimer.

The Home, with its magnificently-wooded ground, covers an area of 30 acres, and is maintained almost entirely by the members of the National Union of Printing, Bookbinding, Machine Ruling and Paper Workers, from whom a 3d. is deducted weekly from the subscription and earmarked for its support.

The establishment is capable of taking at the present time up to 41 inmates, and these come from all parts of the country for a three weeks' stay free of all cost. Mr. R. H. Swift, the superintendent, with the help of Mrs. Swift, have already earned the grateful thanks of the trade for their devoted labours and have justified the ideals as set by the founder of the Home, the late Mr. Alf. Evans.

Before tea an inspection was made of the vinery, conservatories, the vegetable and fruit gardens, the piggery, dairies, cowsheds, etc., Mr. Swift, who acted as cicerone, explaining in an interesting manner the many features of interest to be seen. Much appreciation was here expressed by the visitors at the cleanliness and care which it was very evident had been bestowed on this part of the Home's activities.

Mr. Swift next took his guests for a pleasant stroll along the banks of the River Wandel—running through the grounds—in the course of which a halt was made on the picturesque Dickinson Bridge on to which a delightful cooling breeze arose from the waters. Continuing the journey the party made an itinerary of the woods, and special interest was evinced at the numerous species of wild flowers abounding here, many members of the party taking particular delight in the picking of the dewberry which was growing in profusion all around.

After an excellent knife-and-fork tea had been served—most of the comestibles being of

the Home's own produce—freedom was given for further walks, while some of the members took advantage of the opportunity of challenging the reputations of their confreres at croquet and bowls.

By this time a "dump" in the shape of cut flowers, cucumbers, grapes, nectarines, peaches, etc., had been deposited on the lawn in front of the house and Mr. G. A. Eden (general secretary of the Association) soon disposed of his "lots" in genial auctioneering fashion, some very good bargains being obtained.

### Thanks.

Before leaving for home Mr. Swift escorted the company round the interior of the building and took the opportunity of saying how pleased he was at entertaining the Association there that day. In the course of his remarks he explained how the establishment was maintained, and said on an average their patients put on eight pounds in weight in the course of their three weeks' stay. One thing he felt very strongly about, and which he was going to use his whole endeavours to remedy, was the fact that patients had been sent to them as a result of insanitary conditions prevailing in the factory and they had discovered in many cases that on getting back to work these same patients were faced with the same conditions as before they came; thus undoing all their work. He appealed to overseers and employers to co-operate with him in his endeavours to get this sort of thing remedied. Another good point about the work of the Home was the medical inspection which the patients had to undergo on entering, for their doctor had discovered that in 29 instances they were infected with tuberculosis, which but for that examination would probably not have been known until it was too late.

Mr. A. W. Hunt (president of the Association), in voicing the feelings of the visitors, expressed his cordial appreciation of the good work being accomplished by Mr. and Mrs. Swift and his staff, and said the magnificent Home bore a tribute to the memory of the late Mr. Alf. Evans. In the name of the Association he tendered to Mr. Swift and his staff the thanks of the members for the enjoyable day they had spent.

Steps were then turned homewards with feelings that the day's sightseeing would always revive lively recollections of a day well spent. The stewards were Messrs. Aves, Eden and T. Hunt.

THE annual meeting of the Associated Irish Newspapers was held at Dublin on the 19th inst. By invitation of the directors of the Irish Paper Mills, the members visited Clondalkin in the afternoon.

THERE seems now to be ground for hope that the Press of India is to be freed from some of the shackles with which it is hampered. The findings of the Press Act Committee are welcomed by all shades of opinion, and it is generally agreed that the repeal of the Act is desirable, and that it will harmonise with the new political conditions prevailing in India.

CONTROVERSY is running in our American contemporaries on the question of whether or not a foreman should hold a trade union card. There is much difference of opinion amongst employers, some maintaining that it is to the employer's advantage that the foreman should not be a trade union man, while others regard the union foreman as best able to act as intermediary between workpeople and management to the benefit of both parties.

## Paper Manufacture.

### Passes at the City and Guilds Examination.

The following is a list of the candidates who have passed the examination on paper manufacture this year set by the City and Guilds of London Institute (Department of Technology):—

GRADE I.—Alexander C. Quin, Penicuik; Robert Hamilton, Penicuik; Alexander Crerar, Penicuik.

FINAL EXAMINATION.—John Wm. Berriman, Greenhithe; Edward J. Guild, Maidstone; Apurba Kumar Sen, Manchester; Joseph S. Preston, Bury; Joseph M. Walton, Glossop; James Newton, Glossop; Leonard H. Alder, London; Malcolm E. Halcrow, Surbiton; Lionel A. Haylett, London; John R. Turner, London; Roland M. Harvey, Staines; Mahesh Prasad Bhargava, Manchester.

## German Paper Trade.

According to the *Papier Zeitung* exports have almost completely ceased. Exporters ascribe this to the foreign trade commissions who require 20 per cent. more than the prices quoted in the markets of the world. The *Reichs-Arbeitsblatt* gives the following sketch of the German paper industry during the month of April, with regard to labour:—The number of workmen employed has further decreased. Provincial reports also announce numerous dismissals of workmen and decreases in production, especially in Pomerania and Schleswig-Holstein, owing to stoppage of trade with the occupied territory and foreign countries, due to measures taken by the Entente. In Silesia and Hanover large paper mills have closed and others are expected to do so. In Saxony there is unemployment and reduction of working hours in mills, but board works are in full swing. News from other provinces is usually bad, except in the case of certain paper mills. Board manufacture, though hitherto good will suffer in turn, unless foreign trade revives. At the Breslau Spring Fair some good export orders were obtained, but the Frankfurt had little result.

A DONATION of \$250 has been made to the N.A.T.S.O.P.A. Memorial Home from the American Pressmen's Union.

STRIKE trouble is still widespread in the printing industry of the United States. Latest figures show that throughout the country there were over 20,000 employees in the printing trades on strike at some time during the period from May 1st to July 1st. The total number of shops said to have gone "open" number nearly 800, according to available statistics.

## Government Contracts.

Contracts were placed with the following firms during June:—

### Stationery Office.

#### PRINTING, RULING, BINDING, ETC.

Printing Groups 2 and 5 (1921).—Eyre and Spottiswoode, Ltd., London, E.C.

Binding 1,410 Telephone Directories, 40,000 Copies Manual of Military Hygiene.—J. Adams, London, E.C.

54,250 Sunshine Cards, 1,000,000 forms U.I.A. 3, 1,000,000 forms U.I.A. 69.—J. Corah and Son, Loughborough.

2,000,000 Notice of Arrears Cards.—John Heywood, Ltd., Manchester.

1,000,000 Unemployment Insurance Cards.—H. Howarth and Co., Ltd., Manchester.

50,000 Posters.—Johnson, Riddle and Co., Ltd., London, S.E.

Printing Groups 3, 4 and 10 (1921).—Harrison and Sons, Ltd., London, W.C.

750,000 forms E.D. 31, 1,000,000 forms S. 131/A, 600 Skeleton Guard Books, Account Book Binding, etc., Divisions I., II., and XII. (1921), 700 books, Register of Marriages.—Waterlow and Sons, Ltd., London, E.C.

144,000 Post cards for National Gallery.—Clarke and Sherwell, Ltd., Northampton.

7,774 Slips for G.P.O. Registers.—Charles and Read, Ltd., London, W.C.

## Customs Regulations.

**Australia.**

The Victorian House of Representatives at Melbourne has passed the new duties on imported paper, news-print being taxed £3 per ton, while British news-print is free of duty. A general desire was expressed to encourage British mills.

The Australian Government has introduced in the House of Representatives a Bill establishing a Tariff Board composed of three members—two drawn from the outside and paid fees, and a chairman, who will be an official of the Customs Department. It will be the duty of the Board to make recommendations on matters referred to them by the Minister of Trade in regard to revision of duties and the granting of bounties.

A series of resolutions in connexion with the Bill have been proposed embodying a scheme on the Canadian lines to check dumping. The Minister, if satisfied that dumping may prejudice Australian manufacturers, may proclaim a maximum of 15 per cent. additional duties. Provisions are included to meet importations from countries whose exchange is depreciated by increasing the duties on a fixed scale as the currencies fall below par.

**Poland.**

Playing cards; wall paper and borders thereof are among the goods upon which from June 8th the Customs duty will be increased by an "agio" of 14,900 per cent. when paid in paper, so that 150 paper marks must be paid for each gold mark leviable under the Customs Tariff.

Replies to Box Nos. to be addressed to the Offices, "BRITISH AND COLONIAL PRINTER AND STATIONER," 58, SHOE LANE, LONDON, E.C.4.

**THE WORLD'S**

## Paper Trade Review

IS PUBLISHED EVERY FRIDAY AT  
 58, Shoe Lane, London.

# LORILLEUX & BOLTON LTD

## In the Newspaper Realm.

At the complimentary dinner given on Wednesday week at the Savoy Hotel to Sir William Ewert Berry, Lord Leverhulme was in the chair, and there was a distinguished company of over 400 representatives of newspaper and business interests, including Lord Riddell, Lord Burnham, Lord Dewar, Sir Frank Newnes, Sir Arthur Spurgeon, Sir Rowland Blades, Sir Herbert Morgan, Sir Fredk. Bowater, Mr. Geo. Eaton Hart and Mr. Harold Cox. In the course of the proceedings, Sir Herbert Morgan presented Sir William Berry with a silver salver, suitably inscribed, on behalf of some old friends.

It is announced that Mr. T. P. O'Connor, M.P., intends to revive *M.A.P.*, the popular weekly journal which he conducted from 1898 for a number of years.

"THE TIMES" held their annual sports at Ravensbourne on Saturday in beautiful weather, which was in marked contrast to that of the previous year. There were about 400 entries for a large variety of events, and the competitors and friends and relations between them probably made up a crowd of about 2,000 people.

NEWSPAPER cup results at Bisley, last week, were: *Daily Telegraph* Cup, Capt. W. Gray; *Graphic* Cup, Commander A. W. Brooks; *Daily Graphic* Cup, Mr. C. H. Cave.

JOHN LOUIS DE BRON, news vendor, charged with the murder of his wife, was found guilty at the Old Bailey last week, but was recommended by the jury to mercy. Sentence of death was passed.

### OBITUARY.

MR. CHARLES H. HANSON, who was for many years a member of the editorial staff of *The Times*, on Thursday night at his London residence, aged 76.

MR. HENRY JOHN INFIELD, founder, in 1868, *Brighton Daily News*, the first halfpenny morning newspaper in the kingdom, and of the *Sussex Daily News*, the *Evening Argus*, the *Southern Weekly News*, and associated papers at Eastbourne, in his 77th year; was a past chairman of the Press Association, and a former vice-president of the council of the Newspaper Society.

MR. A. J. WILSON, aged 80, well known in London journalism and for many years editor of the *Investors' Review*.

MR. R. F. BANKS, for many years head of the reading department of the *Manchester Guardian*, a position from which he retired in 1909.

MR. CECIL DERRY, chief sub-editor of the *Sunderland Echo*, at West Hartlepool, after a short illness; he was formerly connected with the *Western Mail*, and the *London Star*, and was a Hereford man.

MR. G. F. KIRKMAN, of New Ferry, aged 96, for over forty-seven years the proprietor and editor of the *Protestant Standard*.

## The State of Employment.

Employment continued slack during June in all branches of the printing, bookbinding and paper trades, but showed a slight improvement on the previous month, more especially in the bookbinding trade. Short time is still general.

The percentage of workpeople in the printing, publishing and bookbinding trades unemployed as indicated by the employment books or out-of-work donation policies lodged at Employment Exchanges was 9.5 per cent. at June 24th, as compared with 9.7 per cent. at May 27th. In addition, 4.2 per cent. of the workpeople were claiming benefit in respect of short-time working at June 24th, as compared with 4.3 per cent. at May 27th.

Letterpress printers in London were partly on short time and partly on overtime, the returns received showing that out of nearly 3,000 workpeople employed, 1,200 were on short time, and nearly 1,000 were on overtime.

Short time in the letterpress and lithographic printing trades has slightly decreased in amount during the month; although nearly 60 per cent. of the 8,250 workpeople covered by the returns are still on short time, the average amount was only 12 hours short of full time, compared with 14 hours short in May. In the bookbinding trade the percentage of workpeople, covered by the returns, shown as being on short time, was just over 60 per cent., the amount of short time averaging 16 hours per week.

The coal shortage and general depression have increasingly affected the paper trade during June, employment being reported as worse than in the previous month.

According to returns received by the *Labour Gazette*, out of 76,643 members of trade unions in the printing industry, the percentage of unemployed at the end of June was 7.5 as against 8.2 at the end of May last and 9.9 at the end of June a year ago, there being a decrease of 0.7 per cent. on the preceding month, but an increase of 0.6 on a year before. In the bookbinding section, out of a trade union membership of 15,083, the percentage of unemployed is given at 8.5 at the end of June, as against 10.1 at the end of May last and 0.6 at the end of June, 1920—a decrease of 1.6 per cent. on the previous month, but an increase of 7.9 on a year before.

Returns made by employers for the week ended June 25th shows the number of workpeople in the printing offices concerned to be 9,534, an increase of 0.5 per cent. on the previous month, but a decrease of 11.5 on a year before. The wages paid amounted to £34,397, an increase of 1.2 per cent. on the previous month, but a decrease of 16.4 on a year before. In the bookbinding trade employers' returns showed 5,137 workpeople, an increase of 3.5 on the previous month but a decrease of 9.6 on a year before. The total of £10,810 paid to workpeople represented an increase of 5.6 per cent. on the previous month but a decrease of 24.4 on a year before.

### Strawboard Supplies.

The countries supplying the British market with strawboards during June were as under:—

Port of Importation.	Country whence Consigned.	Quantity. Cwts.	Value. £
London	Netherlands	38,316	18,812
Liverpool	"	281	210
Bristol	"	7,717	6,966
Goole	"	18,915	9,639

Glasgow	Canada	50	107
Leith	Netherlands	47	134
Hull	Finland	*987	1,386
Total		<b>5,591</b>	<b>10,888</b>

\* Deduct to amend, March.

### Leatherboards.

The imports of leatherboards into the United Kingdom during June were as under:—

Port of Importation.	Country whence Consigned.	Quantity. Cwts.	Value. £
London	Sweden	40	60
"	Netherlands	200	122
"	Austria	576	624
Hull	Sweden	297	844
Manchester	Austria	849	1,629
Total		<b>1,961</b>	<b>2,778</b>

THE OLDEST TRADE PROTECTION OFFICE IN THE UNITED KINGDOM.

ESTABLISHED 1776.  
**PERRY'S** Trade Protection Offices.  
 (W. R. PERRY, LTD.),

12, Coleman Street, London, E.C.2.

Status Inquiries made as to the position and standing of Traders and others.

**PERRY'S GAZETTE and LIST OF CREDITORS** are Published weekly, and are invaluable to every one in business.

**DEBTS RECOVERED and PAID OVER PROMPTLY.**

Particular attention is called to the fact that this is the only **TRADE PROTECTION SOCIETY** that possess at its offices in London Registers containing full Bankruptcy and other Registered Information, together with Status Information **FOR THE WHOLE OF THE THREE KINGDOMS.**

**TERMS** from £1 ls. upwards, according to requirements. **PROSPECTUS** and further particulars on application to the above offices.

## New Inventions.

### Rotary Printing Machines.

In rotary machines having a number of separate printing couples, patented by Messrs. R. Hoe and Co., the couples, instead of being driven directly, are driven by the associated inking mechanisms, the arrangement preventing the drive being impaired by the sag-

ging of the couples. In the machine shown, the couples 1, 2 and 7, 8 are offset vertically and the inking mechanisms, comprising inking drums 5, 10, are arranged between the two couples. The inking drums 5, 10 are geared to the form cylinders 1, 7 respectively and are geared to a vertical shaft 12 which is geared to the main driving shaft 15.

### Shortening Cylinder Machines.

In order to reduce the overall length of a two-revolution cylinder machine to a minimum, the delivery mechanism invented by Mr. E. Hanauer is reduced in length and the positions of the inking apparatus, cylinder, and feed board are so modified that no part of the machine projects beyond the end positions of the reciprocating bed frame. As shown in Fig. 2, and in comparison with the usual arrangement of machine shown in Fig. 1, the length of the delivery mechanism from the take-off roller 18 to the extreme end of the delivery board 7 is reduced from about  $2\frac{1}{2}$  times the length of the printed sheet to about  $1\frac{1}{2}$  times this length, so that the delivery

mechanism does not project beyond the end position 14 of the reciprocating frame 1. The consequent encroachment of the delivery board on the space ordinarily occupied by the inking apparatus in front of the cylinder 5 necessitates the displacement of the inking rollers 6, ink trough 11, and the intermediate rollers 12, 13, to a position shown in Fig. 2 to

the rear of the cylinder 5. The latter is mounted directly over the driving gear 4 of the reciprocating frame 1, enabling the feed board 8 to be mounted in a more forward position so that its rear end does not project beyond the end position 15 of the reciprocating frame.

### Mounting Blocks for Stereos, etc.

Wood, metal, or other mounting blocks A for process blocks, electrotypes, stereotypes,

and embossing, blocking, or other printing plates or clichés are formed, under a patent by Messrs. Hood and Co., Ltd., and H. W.

Hood, with a bevel B, and the usual bevel on the printing plate C is bent downwards to correspond with the bevel on the mounting block, so that the edges of the printing plate are more out of the way of the inking rollers, and type matter may be composed much closer to the block's surface. The copper

plate is secured to the mount by screws or nails, as shown at D. Instead of a bevel, the mounting block may be formed with a rabbet and the edges of the printing plate, etc., turned over at right angles to engage therewith, as shown at E. Specifications 2168/85, 3120/85, and 8881/87 are referred to.

PRICE TWOPENCE.

## Costing in the Bindery.

Mr. Howard Vick Surveys the Present Position.

Mr. Howard Vick, head of the firm of Messrs. Vick, Ashworth and Co., of Manchester, is an enthusiastic advocate of scientific costing in every department of a printing business. As a member of the Manchester Costing Committee of the Federation of Master Printers. Mr. Vick was asked to address the recent cost congress at Scarborough on the subject of "Binding Costing," and his remarks in that connection will doubtless be read with interest by many who were unable to be present at the congress.

Commencing with some apologetic remarks disclaiming special qualification to handle the subject allotted to him, Mr. Vick remarked regretfully upon the absence of the time docket in Manchester binderies, and said that it passed his comprehension how it could be reasonably expected that a man could come from Manchester where workmen absolutely decline to furnish time on work, and deliver a convincing address on "Binding Costing," Mr. Vick then continued somewhat as follows:—

### **Necessity for Bindery Costing.**

In no part of the business, is accurate costing more necessary than in the bindery. In the days before scientific costing was installed in my factory we used to look upon the binding department as a sort of necessary but wasteful adjunct to the printing department, but now in spite of the fact that we are working the Costing System under difficulty, owing to the absence of time dockets—though we do get time dockets from the women—we find our binding department the most consistently remunerative end of our business. I assure you that the costs we ascertain are stagger-

ing, particularly in the case of high-class account books.

This brings me to a word on estimating. Experience teaches that, generally speaking, estimating is done in a very slovenly manner. This is often because estimating clerks are only such in name and have no real technical knowledge of their job. How many master printers are really masters of their job? This is I believe the kernel of the whole question of price-cutting. Only the man who really knows *how* a job should be done—the number of operations necessary to complete it, the numerous handlings it gets from the moment it enters the order department until the cashier has received the cheque for its payment—realises the cost and need for profitable return; but there are far too many men in the trade who look at a job and give their opinion as to "what it is worth," without compiling necessary details of information. I have here a time docket which allows for 42 operations in the binding department. How many printers examine and allow for all necessary operations in binding jobs? it should set us all thinking. You cannot arrive at the cost price of even a four quire foolscap folio book, ruled and printed, paged and indexed, bound half red basil, by looking at it and saying it is *worth* "so much." It is worth just so much as it cost to produce and you want a profit, so you need to make a series of calculations such as Paper, Ruling, Printing, Sewing, Ends, Binding, Paging, Finishing, Despatch. If you don't do it you don't get a fair price for your book and probably are unwittingly damaging the reputation of a fellow craftsman; besides, few of us get such magnanimous con-

sideration from the tradesman who supply us with the necessities of life.

### **Costing Improves Status.**

I should like to lay special stress on the importance of the Costing System in the bearing it has on the relationship of one printer to another. As soon as one has the system working, one is almost sure to find that prices hitherto charged were far too low, and then the conundrum presents itself "How can I get orders in competition?" I will frankly admit that my firm would have adopted the Costing System many years before it did, but for the difficulty in answering that question. We felt that we were not getting sufficiently remunerative prices, but that if we raised them we should surely be cut out by competitors. Well, there are two ways of looking at the proposition. First: if you cannot sell your product at a price which shows a reasonable profit on its cost of manufacture, you are better selling catsmeat, because you can't go on like that forever—and surely you are entitled to something more for your labour and enterprise than a bare existence. Secondly: with the Costing System installed and properly working, you will be better off with one-half, one-third, or even less business than you were doing without it and will have far less worry and anxiety; but when you are satisfied that the Costing System has shown you the weakness in your organisation you will use every effort to bring others into line, thus lessening reckless competition and improving the status of the trade.

The application of the Costing System to control the cost production and profit of Bookbinding has not made the same advance as in the printing end of the trade. The true cost of bookbinding is an unknown quantity where guessing at costs takes the place of hard facts and systematic cost-recording. The customer obtains advantage, and the binder's fellow craftsmen suffer unnecessary injustice which leads to price-cutting. There is no end to this price-cutting once begun, and an impoverished trade is the final result. Bookbinding differs so much from printing that a correct appreciation of cost is more difficult to obtain except by systematic measures.

### **Hourly Costs Must be Known.**

It must be clear that no business can be soundly carried on unless some attempt is made to control the cost of production—flat rates are futile unless arrived at as a result of sound accounting. Scientific accounting is a guide to intelligent economy which is as essential to success for any concern as is skill to an artisan. One of the facts to be seriously faced is that the Costing Department is not a dead expense and a liability, but on the other hand, is, or will be, if rightly handled, one of the most important and valuable assets in the organisation of the business. It should, therefore, be the aim of every binder to ascertain by accurate accounting or costing, the hourly cost of every machine, process and operation in the department. The basis of this cost is the number of chargeable hours worked, which

can only be accurately ascertained by the time docket. The various forms provided under the Federation Costing System enable the management to collect and analyse the hours spent on the various machines and processes, and calculate each week the exact value of work turned out for comparison with its cost. Time-wasting methods are detected and improvements effected which may lead to greater output with corresponding better status for the operative, because a sound business guided by progressive methods assures that profit without which labour cannot obtain the reward it often unreasonably expects. Ignorance of cost, consequently followed by cut prices, spells insecurity and inability to give that fair consideration to the worker which would ensure the status to which he appears so anxious to attain. In the interests of uniformity, efficiency and accuracy the Federation Costing System is, as a matter of fact, and should be regarded by all master binders as, indispensable.

Here I would ask leave to introduce a quotation from an article on costing which appeared recently in an American journal. "Losses caused by ignorance are enormously greater than losses caused by dishonesty. The concerns whose accounts are kept by incompetent accountants are the ones from whom ruinous competition is to be feared. The manufacturer who through lack of ability to keep correct accounts is not properly informed as to the true cost of his product or the true cost of service rendered, is the one who under the stress of competition impoverishes himself by accepting selling prices that are insufficient fully to cover the true cost of that which he gives in exchange. Incompetent accounting is the cause of more failures than all other causes combined. It gives incorrect information as to the cost of products and services which leads to the acceptance of insufficient compensation, a course that must result in failure with a certainty from which there is no escape." I commend the application of these remarks to master bookbinders generally, for there must be few in the trade who are completely satisfied with the profit they extract from it.

### **The Costing System is Succeeding.**

In America—as in this country—the standard cost-finding system has met with great success in spite of very bitter opposition from many members, and the tragedy of it was that the very members who opposed or were indifferent to it were the ones who needed it the most. Isn't this exactly what costing enthusiasts are finding here? In spite of almost insuperable difficulties the results accomplished in America have been wonderful. May we not hope for equally satisfactory results from the earnest campaign of our own Costing Committee?

I leave my subject with just one other thought. While I presume it will be generally conceded that all business men are in business for what profit there is in it—yet in these latter days it will hardly be denied that the thought of "Service" has taken deep root

in the hearts of the best business men of this country and I believe we are all desirous of rendering the greatest possible service, not only to our immediate customers but to the age in which we live. It is only through a true knowledge of the cost of that service that we shall be able to reach the highest peak of efficiency, which should be the goal to which all of us are striving.

## Newspaper Losses.

Globe Newspaper Co., Ltd.

The difficulties of conducting a newspaper in these days of high costs of production and trade depression were emphasised at meetings of creditors and shareholders, held last week in London, under the compulsory winding-up order made on April 26th against the Globe Newspaper Co., Ltd.

A statement of affairs showed unsecured liabilities £34,576, and assets valued at £8,377, but it was intimated that after allowing for preferential and other claims, there could be no dividend for the unsecured creditors.

Mr. E. T. A. Phillips, official receiver, reviewing the history of the paper, stated that in February, 1920, an agreement was made between Mr. Robert Donald and Mr. Lawrence Lyon, then an M.P., for the sale of the paper to the latter for £24,000.

Mr. Lyon was unable to provide the second instalment of the purchase price, and on June 24th, 1920, the present company was promoted by a London bank.

Mr. Robert Donald held £7,000 debentures on his own account, and £15,000 for the liquidator of the former company of Business Newspapers, Ltd.

Publication of the paper by the company resulted in a heavy loss from the commencement. In 7½ months the loss was £32,718.

The failure was attributed to lack of capital, the heavy cost of labour and material, and inability to obtain advertisements, owing to depression in trade.

The official receiver added that £31,361 of the unsecured liabilities was due to Mr. Clarence Hatrey, who had been managing director for the bank, on his loan account.

The copyright of the newspaper was sold last February for £750.

The liquidation was left in the hands of the official receiver.

**DEPARTMENT OF OVERSEAS TRADE.**—For some weeks rumour has been very busy with the future of the Department of Overseas Trade. The life of the Department has been short, but in its chequered career it has again and again been the subject of investigation, and now, it is said, its activities are to be severely curtailed in the interests of economy, says *The Times* (Trade Supplement).

An Advertisement is always working.

## Printers' Pensions Annual Festival

Sir William Waterlow to Preside.

The last annual dinner of the Printers' Pension, Almshouse and Orphan Asylum Corporation, held on November 11th, 1920, was an overwhelming and unprecedented success—as was only to be expected in view of the fact that the president on that occasion was none other than H.R.H. the Prince of Wales. The president at this year's festival is to be Sir William Waterlow, K.B.E., to whom therefore, falls the very difficult task of attempting to follow worthily the magnificent lead given by the Prince. The state of trade is not favourable to the easy compilation of heavy subscription lists, so that it is all the more necessary that the hearty co-operation of the whole of the trade should be behind the new president in the heavy task to which he has put his hand.

In order to meet a few of the supporters of the institution, and to enlist their sympathy Sir William recently gave a luncheon at Stationers' Hall, and put forward on the occasion a few proposals in connection with his presidency. Stress was laid on the fact that at the present time the sum being paid away in pensions to the aged is no less than £17,000. In addition, there are some 1,250 War orphans on the books, and the maintenance of these entails on outlay of upwards of £10,000. It is hoped to give a helping hand to each and all of these children until they are of an age at which they can go out into the world, and the estimate formed of the total expenditure which will be necessary in this direction amounts to no less a sum than £75,000. In conclusion, Sir William appealed to all, masters and men alike, associated with the profession to give him all the support they possibly could in the task he had set before himself.

Mr. T. E. Naylor, of the London Society of Compositors, and Mr. Howes, of the Society of Machine Minders, promised to become Stewards, and to enlist the interest of those whom they represented in the good work; and Mr. R. A. Austen-Leigh, Sir Frederick Bowater, Mr. C. J. Drummond, J.P., and others similarly assured Sir William of their readiness to co-operate in every way possible.

Difficult though times may be, there is no reason why the next festival, which is to be held on November 2nd, should not be a great success, and this it will be if all those engaged in the printing and allied trades will seize the opportunity to assist, in large or small degree, in the praiseworthy endeavour to which the enthusiastic efforts of the new president are being devoted.

WHEN buying some note paper at my stationer's yesterday I remarked that it lacked the usual watermark. "Yes, sir," said the obliging shopman, "that's on account of the drought, you know, sir!"—C. J. A. in the *Daily News*.

## Trade Union Matters.

THE question of wage-reduction still dominates the horizon of printing trade unionism, and, of course, the proposed reductions come in for much unfavourable comment. The objection most commonly heard is that the cost of living has ceased its downward movement and is at present on the rise once more, so that the moment is inopportune for the reduction proposals.

NEVERTHELESS, the substantial modifications made in the employers' demands after the negotiations with the Printing and Kindred Trades Federation—the total suggested decrease of men's wages being made 10s. instead of 15s., and the date of the first 5s. cut being postponed a week—would seem to offer reasonable hope of a peaceful settlement. Such a settlement may shortly become an actuality so far as most of the unions of the men's federation are concerned, the executives' recommendation having been made in that direction. The ballot on the subject is, however, still in progress, and the outcome uncertain.

THE London Society of Compositors held a special delegate meeting last week, and the outcome of the proceedings was that the meeting carried the committee's recommendation that the employers' proposals for reduced wages be resisted. A further special delegate meeting was arranged for yesterday (Wednesday) evening, to follow the resumed conference with the employers. It was thought that ballot papers on the employers' proposals would probably be issued to-day (Thursday), these being returnable next Monday.

It is no secret that in connection with the present wages dispute the L.S.C. is making a special levy of its members to the extent of 7s. 6d. per week to combat the proposed reductions.

THE L.S.C. maintains that their rates have not increased in the same proportion as those of the other departments of the industry; during the time wages were increasing they stood by the federated societies in the flat-rate increase, although the other unions were actually getting a higher percentage increase.

It is reported that in more than one printing office notices of wage-reduction have already been posted.

At a meeting of the Imperial Conference, a resolution was passed recommending that a conference of representatives of the patent offices of His Majesty's Dominions should be held in London at an early date to consider the practicability of instituting a system of granting patents which should be valid throughout the British Empire.

## Printing Industry and Slack Time.

A matter of much interest to the printing trade arose in the House of Commons on Monday, when Mr. Bowerman (Deptford) asked the Financial Secretary to the Treasury if he would consider the desirability of advising the various Government Departments to put in hand any printing matter that might have been held in suspense, thereby assisting the printing industry to tide over what was usually the slackest period of the year. Mr. Hilton Young replied as follows:—The only Government printing orders which are being held over relate to Departmental services which are being discontinued or substantially reduced, in view of the imperative need for economy in public expenditure. I cannot see my way to modify the instructions already issued to Departments for reducing their demands for printing services to a minimum. But the printing of matter which is essential is not subject to suspension at this or any other period of the year, and its execution will proceed accordingly.

## New British Patents.

### Applications.

- Bugler, A.V., Linotype and Machinery Ltd., and Stern, C. L. 19,316.
- Crossley J. Toy paper boxes. 19,593.
- Hanson, C. J. W. Loose-leaf note books, etc. 19,859.
- Krassilnikoff, N. S. Loose-leaf binder, etc. 19,558.
- Mason, A. Envelopes for gramophone records. 19,500.

### Specifications Published.

#### 1917.

- Mascord, G. W. Printing machines. 166,166, 166,167, 166,168.
- Mascord, G. W. Rotary printing presses. 166,169.

#### 1918.

- Mascord, G. W. Printing machines. 166,183.
- Mascord, G. W. Rotary printing machines. 166,188.

#### 1920.

- Lang, E. L., and Lang, G. H. Marking or printing machines. 166,363.
- MacGregor, R. M. Letter cards. 166,383.
- Milligan, R., and Lumex, Ltd. Envelopes. 166,420.
- Miller, H. C. Loose-leaf binders. 148,865.
- Langston Monotype Corporation, Ltd. (Langston Monotype Machine Co.). Typesetting and composing machines. 166,466.

## "Owen Jones" Competition Results.

The results are announced of the prize competition for students of schools of art arranged by the Royal Society of Arts in accordance with the terms of the Owen Jones Trust.

Notices were issued in October last stating that six prizes would be offered under the usual conditions, each prize consisting of the Society's Bronze Medal, and a copy of a book or books on applied art, of a value not exceeding £2, to be selected by the successful competitors. In addition to these, a special prize of £20 was offered for the best design (irrespective of class) submitted.

One of the prizes was gained with a design for a poster, the winner being H. S. Evans, of the School of Art and Design, Nottingham, while the same student shared with an exhibitor in the textile section the special prize of £20.

Commended students in the book-production section were: W. A. Dillnutt, L.C.C. Camberwell School of Arts and Crafts, Peckham-road, London, S.E. (hand tooled binding).

H. S. Evans, School of Art and Design, Nottingham (design for a title page).

Catherine E. Franks, School of Art, Technical Institute, Leyton, E. (design for a tail piece).

E. Owen Jennings, School of Art, Leeds (hand-tooled bookbinding).

E. H. Turner, L.C.C. Camberwell School of Arts and Crafts (hand-tooled binding).

H. T. Vallance, School of Art and Design, Nottingham (design for a poster).

Ruth M. Wood, School of Art, Exeter (illuminated Service of the Holy Eucharist).

## Welsh University Printing?

The Court of Governors of the University of Wales, at a recent meeting, considered a recommendation that a University Press Board be formed, with a view to the establishment of a University Press. Mr. Cyrus T. Clissitt, of Newport, warned the Court that it was treading on very dangerous ground. Speaking with 37 years' experience of newspaper work, he said that the difficulties the Board would be faced with from a financial point of view were such that the public bodies represented on the Court would require an assurance that the Board would consist mainly of men who had a full and complete knowledge of the commercial side of the venture. Eventually the matter was referred to the Council for further consideration, and for a report to be tendered.

The late Mr. Alexander Francis Lamb, of Leyton, printer and publisher, left £8,149.

## Paper Bag Wages.

At a meeting of the Paper Bag Trade Board (Great Britain) held recently it was agreed to issue a notice of proposal to reduce the minimum rates at present in operation in the trade, the principal reductions being as follows:—

### General Minimum Time Rates.

(A) Female Workers: Female workers of 18 years of age and over, from 9½d. to 8½d. per hour.

(B) Male workers: (i.) Machine tacklers of 23 years of age and over who have had not less than 3 years' experience as machine tacklers, from 1s. 8½d. to 1s. 6½d.; (ii.) paper bag cutters of 23 years of age and over who have had not less than 3 years' experience as machine cutters, from 1s. 6½d. to 1s. 5d.; (iii.) hydraulic pressers, slitters, stock-keepers, packers and despatchers after 3 years' service after the age of 21 in the same occupation, from 1s. 5½d. to 1s. 4½d.; (iv.) male workers of 21 years of age and over other than those specified in (i.), (ii.) and (iii.) above, from 1s. 4½d. to 1s. 3½d.

As regards machine tacklers, paper bag cutters, hydraulic pressers, etc., of lesser age and/or experience, and as regards male and female learners for whom the Trade Board have fixed minimum rates of wages, the Trade Board propose to reduce such minimum rates in proportion to the proposed reductions respectively set out above.

### Piece Work Basis Time Rates.

All female workers, from 9½d. to 8½d.

### Overtime Rates.

Overtime rates to be calculated on the proposed general minimum time rates or piece work basis time rates as the case may be.

Statutory notices setting out the rates in full will be sent in due course to all employers in the trade whose names and addresses are known to the Trade Board and a period of two months will be allowed from the date of the issue of the notice of proposal during which objections may be lodged.

## A Useful Printing Catalogue.

Mr. W. T. Berry, the acting librarian of the St. Bride Foundation Institute, has compiled a useful "select list of books on practical printing, modern English and American text books in the Technical Library" of the institution. Printed by the students of the St. Bride Foundation Printing School in good, clear style, it is provided for the convenience of those using the library. It includes all the new volumes published by the Typothetæ Library of America, and is altogether very representative of up to date books on printing. The value of the list is increased by the indication in each case of the contents of the volume.

## Mr. Harry Becker.

### A Live Anti-Waste Candidate for North-west Camberwell.

Mr. Harry Becker, who has been asked to stand as the Anti-Waste Candidate in opposition to Dr. Macnamara in North-west Camberwell at the next general election, will put up a very good fight. His many friends in the paper trade are taking a very earnest interest in his candidature, and his victory will be exceedingly popular. This is not Mr. Becker's first essay as a Parliamentary candidate, because he made a gallant fight in

Photo, W. S. Stuart, Richmond.

MR. HARRY BECKER.

Anti-Waste Candidate for North-West Camberwell.

Bermondsey at the last election under the banner of the discharged soldiers.

Mr. Harry Becker is a well-known figure in the paper trade, and although only 29 years of age he has had a wide business experience, not only in this country but abroad. He was educated at Uppingham and has travelled extensively. Following a tour in France and Germany he started in business in this country, but his energy and enthusiasm called for wider fields to conquer, and he went over to America, where he acted as salesman for the Parsons Trading Co. Early in 1915, however, he returned to this country with his wife and

daughter, six weeks old, and joined the army for war service. He served in France for three years as a private.

As most of his friends know, Mr. Harry Becker is now managing director of the French Paperstock Co., Ltd., and it is by his energy and enthusiasm that this important business has been built up. A man of enormous energy and business initiative, he is known to be one of the most successful paper salesmen in the country, possessing all the characteristics of a born salesman—urbanity, initiative, determination, alertness and the faculty for quick decision.

The premises at 24-30, Bermondsey-wall, are well adapted for the large business which has been created. Important connections have been made both at home and abroad in paper, strawboards, and waste papers. The company, in fact, is one of the largest importers of strawboards in this country, and it performs a very useful service in providing stocks for printers and box-makers. Large stocks are held at Bermondsey, and there are admirable facilities for the reception and despatch of goods. The site, which is on the river front, is one of the most commodious on the Thames, having four wharves and extensive warehouses, while ample stocks can be kept ready at hand. Everything in the way of paper and stationery is handled, including krafts, browns, super-calendered and M.F. printings, bag papers, special French papers, and so on *ad infinitum*. Altogether the company carries large selections of paper and strawboard. Among the lines handled by the French Paperstock Co. is the well-known Brenchtock Bond special watermarked paper. Ancillary businesses carried on include the manufacture of paper bags, the baling of waste paper by a 100 ton baling press, and lighterage work. A specially large business is done in news-print, and some big contracts have been placed with the company. A fleet of motor cars is maintained for the rapid transit of paper stocks, while the free access to the river enables goods to be either received or despatched across the seas with ease.

Mr. Harry Becker is an attractive personality, and admiration for his business capacity is shared alike by his large staff and a wide circle of acquaintances in the paper trade. Anything that he takes in hand has to "go." It is Mr. Harry Becker's intention to follow a political career, and in this direction his enthusiasm and other gifts are likely to carry him far.

The Income Tax Payers' Society has been formed with the object of protecting the rights and privileges of income-tax payers. One of the objects of the Society is to simplify the machinery of assessment by protecting the taxpayer against the duplication and complexity of forms. Among the members of the General Council are Sir J. J. Baddeley, Sir H. Birchenough, Sir Rowland Blades, M.P.; Viscount Burnham, Sir F. Newnes, Sir A. Spurgeon, Sir A. Tuck and Sir W. A. Waterlow.

# Trade Notes.

MR. JOHN WATT, secretary of the Scottish Typographical Society, who has been prevented by illness from taking part in the current wage negotiations, has died after an operation.

KNOWN to a good many people in the printing trade is Mr. W. J. Fawn who was last week given twelve months' hard labour for a fraud upon Mr. G. E. Parker, printing manager of the Temple Press, the fraud being in connection with a bogus Masonic Lodge.

THE firm of Raphael Tuck and Sons, Ltd., was among the many business houses which were signatories to the appeal concerning the present serious financial situation of the country issued on Thursday by merchants, manufacturers, and shipowners of the United Kingdom.

THE Federation of Master Printers having inquired of the Chief Inspector of Taxes as to whether the extra depreciation allowance of 50 per cent. above the normal rates would be extended for the year 1921-22, the Chief Inspector has replied that such further extension cannot be made.

THE death has occurred of Mr. Peter Begg, a director of Messrs. R. and R. Clark, Ltd., printers, Edinburgh. He had been associated with the firm for nearly 50 years. He was president of the Edinburgh Master Printers' Association and was a well-known member of the Edinburgh printing trade.

IN our issue of July 21st we published a paragraph (received from a contributor) containing a statement that Messrs. Joseph Causton and Sons, Ltd., of Clapham, had decided to reduce working hours and to adopt a five-day week. We are officially informed that the information is inaccurate and misleading, and we therefore regret its publication.

AUTHORITY OF J.I.C.—At the next meeting of the Joint Industrial Council, to be held on October 11th, Mr. F. Murrell is to move: "That it is desirable that steps be taken to secure powers to make all unanimous decisions of this J.I.C. obligatory on all engaged in the industry, provided that it can be shown that employers employing 75 per cent. of the workpeople and 75 per cent. of the operatives are represented on the J.I.C."

At its last meeting (on the 26th ult.) the Joint Industrial Council passed the following resolution:—"That this J.I.C. regrets the refusal of the Government, under Section 5 of the Unemployment Insurance Act, 1921, to approve special unemployment insurance schemes, and urges upon the Government the expediency of giving all encouragement to industries which are prepared to discuss schemes for industrial insurance against unemployment." It was understood that this resolution did not pledge either side to support any scheme for a special unemployment insurance.

THE late Mr. George Neves, of Rochester, editor and part proprietor of *Chatham and Rochester News*, left £29,270.

PARTNERSHIP has been dissolved between Thomas Stanley Procter and Harold Higgin Shellard, printers, 121 and 123, Bridge-street, Bradford.

THE publisher of the Indian extremist journal *Independent* has been sent to prison for a year in default of providing security to be of good behaviour.

THE Press Association is informed that an action for libel has been commenced against the proprietors, editor, and printer of *Truth*, by Mr. Horatio Bottomley, M.P.

MR. W. H. SLATER, author of "What a Compositor Should Know," contributes an article on "The Type and the Man" to the latest issue of the *Monotype Recorder*, issued by the Lanston Monotype Corporation.

A LARGE number of representative Brightonians, including many members of the staffs of newspapers and printing establishments of which he was founder, attended the funeral, last Thursday, at Patcham, near Brighton, of Mr. Henry John Infield, J.P.

OUR national humorist, *Punch*, has just celebrated his 80th birthday, and the event is signalled by the publication of the first two volumes of "Mr. Punch's History of Modern England," which cover the period 1741-1874, and which are to be followed by two further volumes. Publishers: Cassell and Co.

PROFIT-SHARING.—Messrs. George Routledge and Sons, Ltd., have just completed their first year's trading under their profit-sharing scheme for the year ending March 31st, 1921, whereby the employees receive a dividend calculated on their year's pay at the same rate as the ordinary shareholders. The dividend this year is 10 per cent., as against 8 per cent. last year, and the board is of opinion that the staff has to a large extent earned its own dividend by increased efficiency and zeal, and by economies made in working expenses.

POST CARD POSTAGE.—A Press representative has been informed at the G.P.O. that no decision has been arrived at concerning any alteration in the 1½d. rate for post cards, although the Postmaster-General is keeping constantly in mind the possibility of a revision of rates which may benefit the public; indeed, he hopes that a return to the old rates will be possible, and such return will be introduced immediately the accounts warrant it. Sir Adolph Tuck, managing director of Messrs. Raphael Tuck and Sons, is supplying the Postmaster-General daily with extracts from hundreds of letters from the largest picture post card firms all over the country, which state that the new rates mean a drop of anything from 30 per cent. to 90 per cent. in their sales. Many of them say that the trade is being entirely ruined. Sir Adolph Tuck states that there cannot be the slightest doubt that if the sales show such an enormous drop the revenue must do so also.

## FORTY-THIRD YEAR.

THURSDAY, AUGUST 4, 1921.

# Current Topics.

## The Wages Negotiations.

THE first week of August finds a very unsettled and rather disquieting state of affairs in respect of the negotiations on the subject of wage-reductions in the printing and allied trades. As already reported, the representatives of the Printing and Kindred Trades Federation—with the exception of the four unions which have insisted upon separate negotiations—agreed last week to recommend to their members the acceptance of the employers' revised demand, in accordance with which the first instalment of the proposed wage-reduction should come into effect next week, i.e., on the pay day in the week ending August 13th. The P. and K. T. F. is now balloting its members on the subject of this recommended agreement, but the result of this ballot will not, we understand, be known until next week. As regards the four unions which are acting independently of their federation, viz., the Typographical Associa-

tion, the London Society of Compositors, the Society of Electrotypers and Stereotypers and the Society of Lithographic Printers, no kind of agreement has yet been reached, but negotiations between these unions and the employers are being resumed as we go to press (Wednesday).

## Production and Cost.

MANUFACTURERS and those who are identified with the industries of the country are greatly concerned as to the future welfare of Great Britain. It is not only that our own position gives cause for apprehension, but the rate at which other states are recovering ground lost through the war is so much greater than here that, unless something is done to improve production and lessen cost, we shall find ourselves behind in the race for commercial supremacy. In Belgium and Germany, for instance, the workpeople have settled down to work in real earnest. According to a recent visitor to those countries, the workpeople are giving not merely a normal day's work, but a day and a half. They are evidently very conscious of the need for re-establishing their trade and commerce, and are not sparing themselves, any more than they did during the war, in rehabilitating their country from the industrial standpoint. This gentleman found things very different over here. Our workpeople, he says, are making nothing like the effort of their late enemies. If this is so, then it is time there came an alteration. So grave is the situation that a meeting of business men, representative of all sections of finance, trade and industry was held at the Mansion House, London, last week, "to consider the grave economic situation which now faces the nation, with a view to impressing upon his Majesty's Government and all classes of the community the imperative need of increasing production and reducing expenditure, so that the wealth annihilated by the war may be restored." It is believed that with the exercise of economy, both personal and public, and greater industry on the part of everyone, the credit of the nation can rapidly be restored.

## Germany Making Headway.

EVIDENCE is forthcoming from many directions that Germany is making great headway in her effort to restore her industrial and commercial status. Mr. Garvin, in the *Observer*, remarks cryptically, "Everyone will know soon enough that Germany is beating us again and why. She has improved her whole national organisation for economic victory. We have scrapped ours." Then we have it

on the authority of Mr. W. A. S. Hewins that "there are countries which are almost up to their pre-war trade, whereas Britain is only up to 31 per cent." He asserts that unless we have a definite trade policy, and get round the corner, we will come precious near to bankruptcy.

### Real Co-operation.

BUT we are not likely to do that if only the British working people will be true to their traditions. We are, perhaps, apt to be a little too critical of ourselves; but that does no harm; quite the contrary. At the same time we may derive some consolation from the present outlook, and the remarks of Dr. Macnamara, the Minister of Labour, emphasise this point. "All over the country employers and employed in numberless industries are sitting down together in frank consultation and conference and are making agreements which avoid stoppage of work," he said, and added: "As Minister of Labour, I cannot over-state my admiration for the spirit of mutual self-respect and intercourse with which these difficulties are negotiated and brought in many industries to a successful conclusion by agreement without strike. That is the way out. What we want now is the determination not only that the revival in trade shall not be hampered by more strife, but that it shall be taken advantage of to the fullest extent." Mr. E. W. Randle, in the *Industrial League Journal*, emphasises the need for real co-operation in this paragraph: "Low cost of production for export can only be attained by labour giving more work for their wage, the manufacturer and trader being content with moderate profit, the banker providing cheap money, and the Government relieving the burden of taxation. Given these, the wheel begins to turn, our exports are in demand, our manufacturers once more grow busy, unemployment diminishes, and the Government revenues automatically grow. If labour and capital will not co-operate in a spirit of self-sacrifice both equally suffer and the inadequacy of trade means unemployment for labour and non-productivity of capital, without which the nation's expenses cannot be met." In order that the best results may be secured it follows that each party to the contract must do his utmost to fulfil it. Otherwise the scheme naturally fails. So if British industry is to hold its own each unit in the community must make the full contribution demanded by the situation.

THERE is a general slight recovery of orders in the paper trade.

## Personal.

THE Speaker (Mr. J. H. Whitley) was the guest of the members of the Parliamentary Press Gallery at their annual dinner, held at the House of Commons on Saturday. The numerous company included: Lord Riddell, Sir Emsley Carr, and Mr. C. W. Bowerman.

SIR G. ROWLAND BLADES and Lady Blades attended on Thursday night the Lord Mayor's annual banquet at the Mansion House to the Chancellor of the Exchequer, and the bankers and merchants of the City of London.

MR. A. E. GOODWIN, secretary of the Federation of Master Printers, left London for Cromer on Saturday, the commencement of his summer holiday having been arranged for that date, but the current wage negotiations have necessitated his return to town this week. This parallels his last year's experience, when the Manchester-Liverpool dispute caused a similar interruption of a well-earned holiday.

MR. R. A. AUSTEN-LEIGH, president of the London Master Printers' Association, in addition to his editorial duties in producing a new number of the *Falcon*, which is the house magazine of Messrs. Spottiswoode, Ballantyne and Co., Ltd., has just issued a third edition of his "Illustrated Guide to the Buildings of Eton College," and a new work entitled "The Eton Register, 1751-1790." The latter is very favourably noticed in *The Times* (Literary Supplement) of last week.

MR. GEORGE HARRAWAY (general president) and Mr. T. G. Newland (general secretary of the National Union of Printing, Bookbinding, Machine Ruling and Paper Workers, are at present at Geneva, attending the international labour conference being held there in connection with the League of Nations.

AT the Press Club, Fleet-street, last Thursday, Mr. W. O'Malley, who is shortly leaving this country on medical advice to take up residence in Ireland, was the recipient of a cheque subscribed by his many friends in the newspaper world to mark the esteem in which he is held and regret at his departure.

AT Kingston Parish Church, on Monday, at the wedding of Miss Burridge to Mr. William Grimes, a printer employed at a local newspaper office, fellow-workmen of the bridegroom formed a triumphal arch from the church door to the gate. They were armed with implements of their trade, including long wooden composing sticks, mallets, shooters, stereotypers' beating brushes, lye-brushes, galleys containing confetti, and waste paper baskets. The guard of honour were in their shirtsleeves and wore white aprons, and a printer's reader was armed with a pencil 3 ft. long.

## DIVIDENDS AND REPORTS.

WELDON'S, LTD.—The 23rd annual ordinary general meeting of Weldon's, Ltd., was held on Friday last at the Savoy Hotel, Strand, under the presidency of Mr. A. T. Hollingsworth (the chairman of the company). The chairman, after some general comments on the world-wide depression during the period under review, went on to refer to the accounts, and mentioned that the Excess Profits Duty and corporation taxes to June 30th, 1920, account for the depletion of carry-forward by some £17,210. He remarked that during most of the year under review, paper and printing had been at their highest prices, and, while there was a slight reduction in paper during the last few months, printing still remained unaffected. Hence the company's revenue had been adversely affected in common with every publishing enterprise—their one bright spot, although not a profitable one, being a record revenue from advertisements. The proposed dividend was agreed to, making 12½ per cent. for the year.

"LIVERPOOL DAILY POST, MERCURY, AND ECHO."—Interim dividend on ordinary shares at rate of 12½ per cent. per annum for half-year ended June 30th, 1921, payable, less tax, August 12th,

RAPHAEL TUCK.—Profit of Raphael Tuck and Sons for year ended April 30th, 1921, after

providing for directors' and managers' remuneration, was £41,508. Directors recommend final dividend of 10 per cent., making 10 per cent. for year, placing to special dividend reserve £2,586, carrying forward £5,136.

MESSRS. VALENTINE AND SONS, LTD., Dundee, have a gross profit for the year of £5,713. After writing off depreciation and income tax and adding balance brought forward, the sum available is £11,173. During the first half of the year the profits were considerable, but owing to increased cost of paper, labour, etc., and also the fall in trade the profits were reduced. Stocks have been written down to market value. No further payment is to be made meantime of dividend, but it is hoped to pay a dividend before the end of the year.

BROWN, STEWART AND CO., LTD.—The accounts of Brown, Stewart and Co. for year ended April 30th, 1921, after providing £13,784 for depreciation, deducting £6,500 for interim dividends paid on ordinary and preference shares, and including £47,500 brought forward, show a credit balance of £6,261 to be carried forward.

HARTLEPOOL PAPER MILL Co., LTD.—The general meeting held on Tuesday was adjourned, as the accounts for the year ended April last are not yet completed, owing to negotiations which are taking place in connection with a proposed amalgamation in which the company is interested. The directors hope to submit details of the suggested amalgamation at an early date.

## NEW COMPANIES.

PREMIER PAPER AND PRINTING CO., LTD.—Capital £500, in £1 shares; stationers, paper merchants, contractors for printing, lithographers, typefounders, stereotypers, etc., and to adopt an agreement with F. E. White. Private company. Subscribers: F. E. White and J. R. H. Inkster. Registered office: 11, Poultry, E.C.

LAUREL BANK SCHOOL CO., LTD.—Capital £3,500, in £1 shares, to adopt an agreement with Miss M. A. H. Watson, M.A., of 4, Lilybank-terrace, Hillhead, Glasgow, to acquire or establish and carry on schools and training colleges, etc. Private company. Subscribers: H. N. Watson and J. H. Gordon.

A. D. LANG, LTD.—Capital £1,100 preference and 100 ordinary shares of £1 each; general manufacturers, buying and selling

agents, printers, lithographers, manufacturers of chemicals, etc. Private company. First directors: A. W. Hill and A. A. D. Lang. Registered office: 4, Vigo-street, W.1.

**SEMAPHORE, LTD.** (London).—Capital £500 in £1 shares (275 "A" and 225 "B"); importers, exporters and manufacturers of and wholesale and retail dealers in electrical apparatus, fancy goods, stationery, leather goods, etc. Private company. Subscribers: J. Portaine and W. Wadden. First directors: J. Portaine, E. E. G. Boite, W. H. Edridge, H. M. Harris and J. Weller.

**ROCK HILL CHINA CLAY CO., LTD.**—Capital £30,000, in £1 shares; producers of, manufacturers of and dealers in china clay, china stone, tin, tin ore, building stone and bricks, etc., and to adopt an agreement with A. M. Richards, S. H. B. Richards, W. T. Richards, R. H. Richards, F. M. Richards and J. W. Williams. Private company. First directors: A. M. Richards, S. H. B. Richards, W. T. Richards, R. H. Richards, F. M. Richards and J. W. Williams. Registered office: Stenalees, St. Austell, Cornwall.

**BENJAMIN BENNETT, LTD.**—Capital £35,000, in £1 shares (25,000 8 per cent. cum. pref.), to take over the business of manufacturers of hats and cardboard boxes carried on by T. Weatherill, W. G. Squires and H. W. O'Cleex Lightfoot, at Dunstable and Luton, as "Benjamin Bennett." Private company. Directors: T. Weatherill, W. G. Squires and H. W. O. Lightfoot. Registered office: 61, George-street, Luton.

**WIDE WORLD AGENCIES, LTD.**—Capital £10,000 in £1 shares; commission, export, import and advertising agents, publishers, etc. Private company. First directors: A. Casson and H. G. P. Catchpool. Registered office: 51, Tothill-street, Westminster.

**KENSINGTON FINE ART SOCIETY, LTD.**—Capital £2,500 in £1 shares; to take over the business of an art dealer carried on by M. Ruët at 26, Alfred-place, Kensington, as "The Kensington Fine Art Society." Private company. First directors: M. Ruët and C. E. Plummer. Registered office: 26, Alfred-place West, South Kensington, S.W.

**DOMINION PAPER CO., LTD.**—Capital £3,000 in £1 shares; manufacturers of and dealers in wallpapers, paper, pulp and pulp products, paints and colours, varnishes, etc. Private company. Directors: A. H. Young, W. E. Bamber and J. G. E. Abbott. Registered office: 11, South Castle-street, Liverpool.

**PERSONALITY PHOTO PRESS, LTD.**—Capital £500 in 400 10 per cent. participating non-cumulative preference shares of £1 each and 2,000 ordinary shares of 1s. each; general, cinema and press photographers, proprietors of books, newspapers, magazines and other publications, etc. Private company. First directors: F. Hopwood and Albert L. Jarché. Registered office: 22, Furnival-street, E.C.4.

**MORFORD AND GOODMAN, LTD.**—Capital £30,000 in £1 shares (15,000 preference); to

take over the business carried on 35-43, High-street, and 5, Thames-street, Staines, as "Morford and Goodman," and to carry on the business of drapers, manufacturers of and wholesale and retail dealers in leather goods, stationery and fancy goods, etc. Private company. First directors: G. H. Leavey, W. N. Goodman, C. R. Goodman and A. D. Jukes. Registered office: 39, High-street, Staines, Middlesex.

**UNITED SERVICES MANUFACTURING CO., LTD.**—Capital £6,000 in £1 shares; manufacturers, exporters and importers of and dealers in tobacco, dealers in leather goods, stationery and fancy goods, chemicals, etc. Private company. First directors: Isidore Jacobson, Sidney T. W. Taylor, Roger I. Dansey, Keith W. G. Boddy and Solomon Teff. Registered office: 28, Lower Regent-street, S.W.

**SPEERE PUBLICITY SERVICE, LTD.**—Capital £5,000 in £1 shares (1,000 8 per cent. participating cumulative preference); to take over the business of advertising agents and contractors, carried on by C. M. Tregurtha, T. E. Grainger and A. P. Johnson at 2, New-court, Carey-street, W.C., as the "Speere Publicity Service." Private company. First directors: C. M. Tregurtha, T. E. Grainger and A. P. Johnson. Registered office: 2, New-court, Carey-street, W.C.

### COMPANY MORTGAGES AND CHARGES.

Fresh Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 1908, and Satisfaction registered pursuant to Section 97 of the same Act. (The registration of Satisfaction is not compulsory).

**ALEXANDER SALTON, LTD.** (printers, newspaper proprietors, general stationers, fancy goods dealers, etc.).—Mortgage on 26, George-street, West Blackpool, dated July 8th, 1921, to secure all moneys due or to become due from company to National Provincial and Union Bank of England, Ltd.

**L. UPCOTT GILL AND SON, LTD.** (printers, etc.).—Issue on July 11th, 1921, of £2,000 debentures, part of a series already registered.

**LEWIS MATHIAS AND CO., LTD.** (music printers, etc., London).—Issue on July 1st, 1921, of £125 debentures, part of a series already registered.

**WELBECK PUBLISHING CO., LTD.**—Particulars of £1,400 debentures, authorised July 1st, 1921; whole amount issued; charged on the company's property, present and future, including uncalled capital.

**FLEETWAY PRESS, LTD.**—Satisfaction to the extent of £2,500 on June 30th, 1921, of "B" debentures dated July 28th, 1920, securing £58,200.

**LENDRUM, LTD.** (manufacturers of paper and papermaking materials, London).—Deposit on July 21st, 1921, charged on 15, Quay-street, Manchester, to secure all moneys due or to become due from company to Lloyds Bank, not exceeding £6,000.

**CENTRAL PAPER MILLS, Co., LTD.** (Wakefield).—Debenture dated July 5th, 1921, to secure £4,000, charged on company's property, present and future, including uncalled capital (if any). Holders: S. H. Stocks, 15, Bradford-road, Cleckheaton; and H. J. Wells, 2, Princes-street, E.C.

**F. J. PARSONS, LTD.** (newspaper owners, etc.).—Particulars of £25,000 debentures, authorised February 2nd, and covered by trust deed, dated June 29th, 1921; present issue, £18,050; charged on various freehold and leasehold properties in Hastings, Bexhill, Sandgate, Hythe and Folkestone and the company's undertaking and other assets, including uncalled capital. Trustees: A. Blackman, F. W. Coles, Margaret Oliver, J. Parsons and E. A. Parsons.

**W. C. B. WADE, LTD.** (publishers, stationers, etc., London).—Debenture dated July 9th, 1921, to secure £2,000, charged on the company's undertaking and property, present and future, including uncalled capital. Holder: W. Livesey, 13, Hope-street, Liverpool.

**STANDARD CATALOGUE Co., LTD.**—Satisfaction to the extent of £10,750 on June 30th, 1921, of B.S.E. debentures, dated September 10th and November 15th, 1920, securing £19,500 notified; also issue on July 11th, 1921, of £250 E.S.C. and £10,000 B.S.E. debentures, parts of a series already registered.

**BENNING AND GREEN, LTD.** (printers, etc., Marlow).—Debenture, dated July, 19th, 1921, to secure £475, charged on the company's undertaking and property, present and future, including uncalled capital. Holder: Mrs. G. A. Cripps, St. Ives, Maidenhead, Berks.

**G. E. HANCOCK, LTD.** (Newspaper Proprietors, Clevedon, Somerset).—Particulars of £300 debentures authorised May 31st, 1921; whole amount issued; charged on the company's undertaking and property, present and future, including uncalled capital.

**EASTBOURNE AND DISTRICT BILLPOSTING AND ADVERTISING Co., LTD.**—Satisfaction in full on July 13th, 1921, of mortgage dated November 13th, 1918, securing £75.

**A. MEGSON AND Co. (LEEDS), LTD.** (Printers, etc.).—Mortgage dated July 8th, 1921, to secure £4,500 charged on certain land and premises in Potternewton, Leeds. Holders: Leeds Permanent Benefit Building Society.

**HUGH STEVENSON AND SONS, LTD.** (Manufacturers of plain and fancy boxes, cases, tubes, bags, etc.).—Particulars of £175,000 debentures authorised June 17th, 1921; whole amount issued; charged on various properties in Manchester, Perth, Glasgow, Birmingham, Leith and London and the company's undertaking and property, present and future, including uncalled capital.

**JACKSON, HARTLEY, AND JACKSON, LTD.** (Paper Manufacturers, London).—Particulars of £5,000 debentures authorised July 8th, 1921; present issue £3,000; charged on company's property, present and future, including uncalled capital.

## BANKRUPTCIES, etc.

*Re* HORACE VICKARS REES, formerly printer and publisher, 14, Fetter-lane, E.C., and elsewhere.—The public examination of this debtor was held on July 28th before Mr. Registrar Mellor at the London Bankruptcy Court, the accounts showing liabilities £4,990 and assets £100. Replying to Mr. W. Boyle, official receiver, the debtor stated that two previous failures were recorded against him; in October, 1880, he paid a composition of 5s. in the £ on liabilities of £985; in January, 1890, he was bankrupt with liabilities £686 and no assets, but was granted a discharge which became effective on September 6th, 1919. Since 1908 he had carried on business successively as a publisher, a music seller, a nursery gardener, a music publisher and as a printer and publisher. In January, 1920, he formed "Hardwick's Gothic Press, Ltd.," with a nominal capital of £6,000, to take over the business of a printer and publisher then being carried on at 14, Fetter-lane, E.C., he (debtor) received £1,000 in shares and acted as managing director at a remuneration of £250 per annum until February last, when a receiver was appointed for the debenture holder. Witness attributed his failure and insolvency to losses in connection with, and to his liability under guarantees given on behalf of various companies in which he had been interested. The examination was concluded.

*Re* J. W. MILWARD (trading as J. W. Milward and Co.), printing contractor, 368, Strand, W.C.—This case came before Mr. Registrar Francke at the London Bankruptcy Court on July 29th upon the debtor's application for approval to a scheme for the payment of a composition of 5s. in the £. The accounts show liabilities £1,544 against assets £89, and the official receiver reported that as a sum of £270 would be required to carry through the scheme, the terms were reasonable and calculated to benefit the creditors. There still remained a balance of about £60 to be deposited at the Court. In reply to the registrar the debtor said he desired a further adjournment of one month, by which time he expected to receive a commission on a substantial printing contract. The application was postponed till October 14th.

**INDIA.**—The evolution of India from an agricultural to an industrial country is evidenced by the issue of a new technical journal, under the title of *Industrial India*. The first number published by the Tava Publicity Corporation, Ltd., Bombay and London, is produced on modern lines, art paper being used, with coloured cover. Editorially, *Industrial India* has been planned to deal each month with the different phases of industry, under the following six main headings: industries, manufactures, power and power transmission, organisation, transport and science.

Efforts are to be made to secure the passing of the Safeguarding of Industries Bill before Parliament is prorogued in August.

## Printing Notes from Australia.

### **A Surprise Printing Bill—Printing Trade Wages—44-Hour Week Application—Trade Union Amalgamation—Paper.**

*(From Our Sydney Correspondent.)*

The Commonwealth Government is confronted with an unexpected bill for £100,000 for material ordered from England in 1914. When the Government Printing Office placed the order, it could not be executed on account of war-time conditions. Now the order has been filled and the prices show an increase on the 1914 quotations.

The point of interest is that the present Government did not know of the existence of the order till the Printing Office Bill came up for consideration, when they were surprised to find themselves faced with this large commitment and for dealing with which special measures will have to be taken.

Mr. Justice Macnaughton, in the Arbitration Court at Brisbane, has given his award as to when the new increases in wages should take effect. The union claimed that as the application was filed last year they should date from the delivery of the judgment on May 12th. His Honour decided, however, that the increases should date from March 1st, and in order to mitigate any hardship that might be caused by the retrospective order the increases could be paid in instalments, except where an employee was discharged.

An exhibition of the Government printer's work has been held in Sydney, which sets out to demonstrate the progress made in Australia in the art of printing and colour reproduction. Professor Jeffrey, of Harvard University, expressed his admiration of many of the examples shown, and said in regard to the lifelike reproduction of timbers on to the plate nothing like it had been produced in the United States.

The hearing of the libel action brought by Thomas Joseph Ryan, M.P., against the proprietors of the *Mercury* newspaper, Hobart, in the High Court of Australia, has again been adjourned for further hearing. The hearing of the case is attracting large crowds of listeners to the building.

The hearing was continued on the application for a 44-hour week now being made by the printers of Sydney. Speaking against the proposal Mr. S. Musgrave, president of the County Press Association, said that there were 230 country newspapers being issued out of 189 offices, while at the time of the inception of the Association there were 370 newspapers and 230 offices.

For the employees Mr. Edward Quealey said that by bringing the country equipment up-to-date any loss resulting from the proposed shorter hours would be overtaken.

The printers of Perth are also making an application for an increase in wages from 1s. 10½d. to 2s. 6d. per hour and a decrease in the working week from 48 to 44 hours in five days, Saturday morning work to be counted as time and a-half.

An award of £150 with costs has been made by Judge Schofeld, Sydney, on behalf of a compositor who stated that he had been incapacitated from following his employment due to the disease of lead poisoning contracted in the course of his employment at Simmon's, Ltd., printing works.

It is expected that the bookbinders, female bookbinders, carton and cardboard box makers and the Typographical Society will definitely amalgamate. The new organisation in Victoria will embrace 4,000 members. The committee is now at work drawing up rules to govern the organisation, which will be a branch of the Printing Industry Employees Union of Australia.

THE Conference of the Australian Provincial Press Association has been seriously considering the question of customs duties on imported paper, and a deputation waited on the Minister for Trade and Customs (Mr. Massy Greene) to urge that the maximum duty on paper should be 30s. per ton.

MR. GREENE, in replying, said that the paper duty was purely a revenue duty, and that it did not pretend to be anything else. He would, however, confer with the Treasurer on the subject, as he recognised that a duty which might not affect the metropolitan papers could affect the provincial Press. He was doubtful whether the Government would agree to give up revenue by fixing a maximum duty.

PAPER mills generally have started up again now that fuel is available once more. Full time, however, has not yet been resumed in many cases, a paucity of orders still being experienced.

THE Port of London has recently admitted printing paper from Belgium and Austria, 245 reels of wrapping paper from Germany, 46 reels of packing and wrapping paper from Czecho Slovakia, and varying quantities of paper from Finland.

# The Bookbinder.

## Bindery Costing.

The question of the introduction of adequate costing methods into the bindery remains a topic of the utmost urgency. A welcome move in the right direction was made at last week's meeting of the Joint Industrial Council when the subject was given consideration. The difficulty of applying the costing system to binderies in the Manchester area was brought before the meeting, Mr. A. E. Holmes presenting a report on the matter, and Messrs. Goodwin, Bethell and Harraway joining in the discussion. The outcome was a decision to appoint a sub-committee of six a side to investigate and report on the Federation Costing System, with special reference to its effect upon the employees in the industry. This should mean that the subject now receives a thorough and reasoned consideration which must result in some nearer approach to scientific treatment of bindery costs. The urgency of this matter is stressed, we notice, in the current *Circular* of the Federation of Master Printers, in which a paragraph on "Binders' Dockets" contains the following: "Considerable correspondence has taken place on the question, and the *British and Colonial Printer and Stationer* deserves the thanks of every bookbinder (both employer and employee) for the steps it is taking to bring the question to the front. Accurate cost-finding is impossible under the system which permits time to be entered on the cost sheet in the factory, or even where a foreman allows his staff to fill in the whole of their time at the end of the day. No time books should be allowed in the departments, and every record of time should balance with the time for which wages are paid, and should pass into the costing department at the end of every day."

## Prices of Bookbinding Materials.

Prices of bookbinders' materials have not altered materially from those quoted in our last bookbinding issue, although in many instances there are evident signs of a further drop in prices. We hear of a firm in the north of Scotland that is making a big bid to reduce the cost of raw pigskin material. The cost of tapes and cotton goods are also spoken of as likely soon to be on the fall. Strawboards are being quoted at anything from £8 10s. per ton basis; bookbinders' cloth, which is falling in price, is now 1s. to 1s. 4d. per yard; wires—according to gauge—are 58s. 6d. to 89s. 6d., which records a drop in price from those ruling a month or two back.

## Boards and Paper.

THE market price of Dutch strawboards seems to have levelled itself at £8 10s. per ton (basis price), and very little is being seen of the £6 or £7 offers which were in evidence some weeks ago. As yet, there is no demand, however, and very little likelihood of any appreciable increase in the near future. Wood pulp boards are quoted £25 to £30 per ton, and supplies are not by any means over-abundant. Foreign unglazed bank is on offer at 5½d. per lb., for ton lots, but the standard qualities are still between 6d. and 7d. per lb. German S.C. mechanical is available at 3½d. per lb., and glazed mechanical at 3d. to 3½d., according to substance. Some exceptional offers of Belgian printings are also announced, while high grade manillas are quoted £48 to £60 per ton.

## Adhesive Bookbinding Composition.

Mr. E. R. Royston has patented a method by which the edges of a number of sheets or leaves are bound together by an adhesive composition which is flexible when dry and allows the book or writing pad so formed to be laid open flat at any point, or to be bent or flexed without injury. In applying the binding composition, some parts of the edges are left free, so that adjacent sheets may be stretched apart slightly to permit the insertion of a loose sheet, such as a piece of carbon paper; or so that one or more of the sheets may be torn out without disturbing the remaining sheets. The adhesive consists of 35 parts smoked plantation or fine Para raw rubber, mixed by rolling with the same amount of unsmoked first latex, adding 10 parts silica oxides or magnesium carbonate or fossil flour, 13 parts calcium chloride, 6 parts calcium hydroxide, and 1 part colouring matter. This mixture is stirred into a solvent consisting of 70 parts carbon tetrachloride and 30 parts benzol to which a suitable deodorant is added. East India gum may also be added to minimise the tendency of the composition to become doughy and to assist quick drying.

It would be hard for any customer or prospective customer of Messrs. Wm. Strain and Sons, Ltd., Belfast, to read month by month the witty and good-humoured pages of that firm's little house-organ the "Monthly Statement" without getting the impression that the Strain printing house was one with which it would be rather pleasant to do business. That's one function of a good house organ.

## Marbled Paper and its Uses.

### The Introduction into England.

The Committee on Bibliography of the Technical Association of the American Pulp and Paper Industry has issued a bibliography of marbled paper compiled by Mr. Dard Hunter, who contributes an historical introduction.

The art of marbling consists in the production of patterns and designs on paper by means of colours so prepared as to float upon a preparation of mucilaginous liquid, usually made from boiling Irish moss. These colours are transferred to the paper by applying the sheet to the colour floating on the top of the liquid. The colours, which are dropped on the liquid, are kept from running together by the use of ox-gall. By dragging the colours with a comb, made with wire teeth set at even or uneven intervals, an endless variety of patterns may be made. The forms and effects appearing in the colours will be transposed to the sheet of paper when it comes in contact with the floating pigment. The sheets are dried and burnished with a stone burnisher which gives a very high degree of finish. Most of the modern kinds are left dull and have a more artistic appearance than the highly finished papers.

Marbled papers are used for fly-leaves or end-papers in books and for the covering of fancy boxes and in any work where surface coloured paper can be used. The finest marbled papers are stained or coloured by hand, but machines have been invented that imitate this work in an indifferent way.

It is thought that marbled paper was invented at the end of the sixteenth century by the Turks, but was first used for the forwarding of books by the French binders. One of the earliest examples known is in an Album Amicorum, bound in 1600 for Jean de Beauchamps which contains 24 leaves of marbled paper of poor quality. A much better specimen may be seen in a book bound by Le Gascon about 1616. This volume is now in the British Museum and the marbled paper is of the wavy or combed pattern. In the National Gallery in London there is a collection of 34 different varieties of marbled paper from the same year, most of which are of the conservative combed pattern without much display of originality. All of these early examples are thought to be of Turkish manufacture.

Macé Ruet, a Parisian stationer (1606-1638), is usually given the credit of the discovery of the manufacture in France. Marbled paper was first known in England about the year 1625, but was not used for the forwarding of books until the latter half of the century. At that time the best marbled paper was made in Holland and some years later the Dutch paper in the size of foolscap was exported to England wrapped around small parcels of toys and passed free of duty. When the paper was taken from the toys it was carefully

pressed and sold to the English bookbinders for use in their finest bindings. In some of the old English bindings it was quite apparent that the end-papers had been crushed and wrinkled before being used for the purpose of binding.

At the beginning of the eighteenth century a Frenchman named Le Breton was considered to be one of the best makers of marbled paper in France and he became widely known for his skill in producing beautiful specimens.

Coloured printed paper was also used, especially in Southern Germany, for the forwarding of books. It was made in Augsburg with the worn blocks that were discarded by the calico printers. Paper with patterns in gold and colours, which began to be used for the binding of books in the seventeenth century in South Germany and North Italy, was in the eighteenth century introduced into Holland and thence to England. There has never been much marbling done in America, most of the paper of this kind used in that country has always been imported, especially from Germany.

The collecting of marbled papers is a very interesting pursuit and it is astonishing the vast assortment of colours and forms that present themselves. Mr. Dard Hunter started a collection a dozen years ago and the assortment has reached a total of 1,600 specimens, dating from the prosaic examples of the 17th century to the unique, futurist forms of the present day. It is quite possible, in marbling, to arrange the colours on the surface of the liquid so that the forms of fish, birds and the like are brought forth and really very artistic and pleasing effects may be made. For the student who wishes to delve into the mysteries of marbling the books of Woolnough and Halfer will be found the most comprehensive works to be found in the English language.

# Standardisation of Paper.

## A Suggested Scheme from India.

The subject of the standardisation of paper is very much to the fore just now, not only in the United Kingdom, but in the English-speaking countries overseas. Curiously enough, just as the controversy was renewed in our columns, a proposed scheme comes to hand from India, and is outlined in the following letter:—

To the Editor of the "British and Colonial Printer and Stationer."

SIR,—A few years ago I read an article in an American trade journal on the standardisation of paper sizes, which revived my interest in a subject that for about a quarter of a century (of paper dealing) had claimed a certain amount of my attention, but to which I had never been able to devote much time, and upon which I had never progressed so far as to express an opinion in any really public way. In 1919, however, in London, I discussed the matter with various people intimately associated with paper and printer's ink, including a well-known maker of printing machines at Otley. During the last two years I have been able at intervals to give more attention to the subject, and, as I understand that some movement in the direction of general standardisation may at any moment be launched, I am impelled to put forward my conclusions.

Along with the American journal aforesaid, I must render tribute to a New Zealander, whose name I have forgotten, for the root idea—the hypotenuse oblong. How much older the idea may be, I cannot say, and, for the purpose of the allied trades, it does not matter.

The hypotenuse oblong is an oblong the shorter sides of which are equal to the side of a given square, while the longer sides are equal to the hypotenuse or diagonal of that square. Its peculiar gift is that it repeats itself, that is to say, that doubled or halved it retains the same proportions. Add to this that these proportions are the most pleasing that a plain oblong, without any embellishments, can possibly assume. Some people call it the Golden Oblong, and it is a curious thing that in other things than sheets of paper—in pictures, in the facade of a building, in the dimensions of a living-room or public hall—this Golden Oblong always pleases.

Leaving other things alone, however, we find in the allied crafts concerned with paper and books that this oblong continually crops up wherever the artistic is allowed to dominate the issue. It is the proportion of all the most pleasing magazines and periodicals of recent origin. (Any one can test this readily for himself—the proportion is roughly 70 by 99.)

I have said enough of the æsthetic side; the really surprising thing is the immense practical utility of the idea. Imagine the

heart-breaks that would have been saved to all concerned with paper and print if, instead of the chaos that exists at present, we had had from the beginning a short series of five or six sizes in paper which regularly increased in such a way that each larger size overlapped all round the next smaller size and the smallest double size was only the next remove from the largest broadside.

I have spent considerable time lately in an endeavour to reconcile this new idea to existing usage, and I propose now to put before you a scheme, the simplicity of which was not arrived at in a day. I need not detail the processes by which I arrived at the measurements here given, but I will admit that I have been surprised, in the later stages of the investigation, to find how little needs to be done to make standard sizes at least possible. The final surprise, when I had plotted out my super-crown, super-post, super-demy, super-medium and super-royal, was to find that, in either one or other of two countries of Europe—the United Kingdom and France—every one of these sizes was approximately in existence.

The first stage of my proposal is (as a concession to use and wont) that we standardise and name seven sizes: Foolscap, note, crown, post, demy, medium and royal—using the not unpleasant proportions of crown as our guide. This gives us:—

OLD SIZES.		STANDARD.	
Foolscap ...	13 $\frac{1}{2}$ × 17	Foolscap ...	13 $\frac{1}{2}$ × 18
Pinched post or note ...	14 $\frac{1}{4}$ × 18 $\frac{1}{2}$	Note ...	14 × 19
Crown ...	15 × 30	Crown ...	15 × 20
Large post ...	16 $\frac{1}{2}$ × 21	Post ...	16 $\frac{1}{2}$ × 22
Demy ...	17 $\frac{1}{2}$ × 22 $\frac{1}{2}$	Demy ...	17 $\frac{1}{2}$ × 23
Medium ...	18 × 23	Medium ...	18 $\frac{1}{2}$ × 24
Royal ...	20 × 25	Royal ...	20 × 25

(I have always disliked foolscap and demy in 8vo. or 4to.; indeed, who ever asks for them, except through use and wont? These two must suffer change.)

The second stage is to add (in a qualified sense) five super sizes. These I have already named; they are the hypotenuse oblong sizes and give a regular progression in sizes from the smallest 32mo. to the largest quad (or less or more). Thus:—

	Inches.	C.M.
Super-crown ...	15 × 21 $\frac{1}{2}$	39 × 55
" post ...	16 $\frac{1}{2}$ × 23 $\frac{1}{2}$	42 × 61
" demy ...	17 $\frac{1}{2}$ × 25	45 × 64
" medium ...	18 $\frac{1}{2}$ × 26 $\frac{1}{2}$	48 × 68
" royal ...	20 × 28	51 × 72

I have said that these sizes (approximately) exist. Thus:—

A. Imperial (half sheet)	(U.K.)	15 × 22 inches.
B. Columbian	(France)	43 × 62 C.M.
C. Grand	(France)	45 × 63 C.M.
D. Petite Soleil	(France)	50 × 68 C.M.
E. Super-royal	(U.K.)	20 × 20 inches

All that it amounts to, then, is that we adopt three French sizes, and re-name them, that we re-name Imperial, "double super crown," keep our super royal, and insist on standard measurements. It will then become possible for the progressive spirit, printer or stationer or account-book maker, to drive the displeasing into the dust-bin of oblivion.

If the paper trade will give us a scheme like

this, for both writing and printing papers, with 500 sheet reams, abolish the quire and standardise weights on the grammes per sq. metre basis, I do not think that anyone worth more than a quire of foolscap will raise any outcry.

Yours, etc.,

D. L. MUNRO.

Calcutta, India, June 18th, 1921.

P.S. (June 27th).—Since writing the foregoing I have read your remarks and the proposals of Mr. Alfred Watkins as set out in the *British and Colonial Printer*, May 5th, 1921. Mr. Watkins will be interested if he will find access to *The Printing Art* (American) files of a few years back (I regret I cannot give the date), where he and all interested will find a very full exposition of the subject. The most interesting thing in the article is a composite diagram showing that a large number of high-class magazines, refusing, under the impulse of the artistic sense, to be content with what has so long contented the papermaker and book-producer, break away from precedent, and in their pursuit of the artistically pleasing find the geometrically perfect—the Golden Oblong.

I wonder if Mr. Watkins will accept my Super Post, Demy and Medium with the existing Imperial and Super Royal in place of his three new sizes. Believe me, I tried *three* sizes, and I tried *four* sizes (like the American writer referred to) and it was not until I arrived at *five sizes correlated to five standardised existing British sizes* that I saw daylight. I feel perfectly sure that it is this linking up with the old sizes, more than anything else, that will recommend the new series to papermakers, the printer and the stationer, and account-book maker. It is to be noted that the standard and the super sizes are identical in one dimension.

I agree most heartily with your remark on the "too big dose." Progress by steps has been one of my leading principles in working on this problem. I propose therefore, for the consideration of the master papermakers and the master printers, the following as the first step, or steps:—1. Standardisation of sizes—Foolscap, Note, Crown, Post, Demy, Medium and Royal (to be so named) in the measurements given in my letter, adding to these, for the present, Old Foolscap (13½ by 17). 2. Adding three (French) sizes to give the Hypothenuse series of evenly graded sizes. This with Imperial and Super Royal would give—Super Crown, Super Post, Super Demy, Super Medium, Super Royal (to be so named) in the measurements given in my letter. 3. The 500 sheet reams, for all papers: printing, writing, and account book.

I have no hesitation in saying that, if some arbitrary power were to impose such a system upon them, 99 per cent. of all the papermakers and book producers involved would heave a great sigh of relief and ask why it wasn't done ages ago.

And this percentage would include *all* the progressives.

D. L. M.

## THE NATIONAL ASSOCIATION OF Wholesale Stationers and Paper MERCHANTS.

### National Council Meeting.

At a meeting of the National Council of the National Association of Wholesale Stationers and Paper Merchants held at the Council Chamber, 11, King's Bench-walk, Temple, E.C.4, on Thursday, July 14th, various items of great interest to the trade in general were under discussion.

The President (Mr. J. W. Cooke) gave the outlines of a scheme under which members of the Association would be entitled to a special rebate on all insurances. This scheme was discussed at great length and left in the hands of the general secretary and a small sub-committee for further information and report.

The question of standardisation also came under consideration, and it was agreed by the members of the Council that wholesale stationers and paper merchants as a body would be only too willing to adopt any scheme which was demanded by the consuming trades as a whole.

Mr. F. M. Carson (vice president) detailed at length the efforts which a sub-committee appointed recently had made, by interviews and correspondence with various shipping companies, to remove the present anomaly by which the freight of foreign paper carried at ton rate was transported at so much lower price than English shipping at measurement rate, and brought to the notice of the Council a letter to the general secretary on the matter which conveyed the decision of the Rates Committee of the Australian and New Zealand Lines to reduce materially the rate of freight on *all* paper in bales or reels.

It was also announced that the final of the National Cup Golf Competition between Mr. Dykes Spicer (Southern District) and Mr. A. Parkinson (Northern District) would be played on a neutral course near London early in September.

## Paper Index Numbers.

Compared with an index number of 100 as the average for 1919, news-print paper production in the United States rose to 114 in June, 1920, and fell from 108 to 90 between January and February this year, rising to 94 in March and 101 in April. Shipments were as low as 84 in February. Stocks rose in inverse ratio, being 135 in January last and 175 in March.

Production of all other paper, which rose to 132 in July last year, fell to 74 in January, and in the three succeeding months was 76, 83 and 76. Shipments were lowest in June—67. Stocks rose from 101 in January to 120 in April.

## BINDERS TO THE PRINTING TRADE.

**P**RINTERS who have the facilities for folding, sewing and casing up, can be supplied with cases made in Leather, Rexine, Pluviusin, Imitation Leather, Cloth, or any other material, blocked or embossed in Gold, Imitation Gold, White or Coloured Foil Leaf, ink in any colours.

Our staff consists of more than 300 capable workers, provided with the most up-to-date machinery.

# The Standardisation of Paper.

The Way Opens to a Definite Step Forward in the  
Direction of an Urgent but Much-Postponed Reform.

The past history of the agitation for paper standardisation in this country is a rather disheartening record of praiseworthy efforts that have apparently been allowed to fail of fruition. The unsatisfactory state of affairs—some have called it “chaos”—which still obtains in respect of paper sizes, weights and nomenclature bears sad evidence of the conservative indifference with which earnestly reasoned pleas for betterment have been met by many of those who stood to benefit most by a forward policy. It would seem, however, that the way is opening at last, giving promise of some definite instalment of a reform that is imperative in the interests both of the paper merchant and of his best customer, the printer.

It will be remembered that in our issue of July 14th there appeared a communication from Mr. R. G. Harvey Greenham, general secretary of the National Association of Wholesale Stationers and Paper Merchants, in which he indicated the difficulties in the way of paper standardisation, but affirmed the readiness of paper merchants as represented by his association to co-operate in any practicable means for facilitating the conduct of the paper trade. This communication of Mr. Greenham's was commented on in the *World's Paper Trade Review* in the following fashion:—

“At last the Wholesale Stationers have found the courage to come into the limelight on the standardisation question. They are solicitous for the printer in so far that they are anxiously concerned about his customers conforming to the suggested standards. The fact that at successive congresses all the

printers of the country have adopted the standardisation proposals counts for nothing apparently. But despite the Gammeter machine and the good corporation and bank business, the printer still remains the wholesaler's customer, and his best customer too. When the wholesaler comes to realise this thoroughly, he will perhaps conform in more ready fashion to the printer's requirements. It is late in the day for the merchant to assume this solicitous concern for his customer's customer. Printers are not so blind to their own interests as to approve a reformation which will react against them. It is not through pleasing the customer that the existing state of chaos in regard to paper standards has been reached. On the contrary, it has been caused through merchants pleasing themselves as to the standards they have selected. Then, again, in the matter of stock economy, has not the Printers' Federation repeatedly pointed out the recent unexampled opportunities for introducing the new standards when stocks were non-existent? Is not the present time the very moment for specifying new stocks on the approved basis? In its very elements the standardisation scheme aims at stock economy. As for re-adjustments at the mills, we understand that the makers are ready and willing to adopt the scheme; hence the futility of argument on that score. Taken all round, the Wholesalers' Association has a weak case and appears to realise the fact. Why, then, not get down to business?”

## Is Standardisation Demanded?

Mr Harvey Greenham follows up this comment by a letter to the current issue of the

*Review*, in which he complains that the said comment hardly places the subject in its right light. It is not, he says, a question of the wholesaler having a weak case, but rather that up to the present the consumer trade has put forward no case for him to answer.

Mr. Harvey Greenham also writes to the *British and Colonial Printer and Stationer* the following letter which we have pleasure in giving in full:—

"It has been observed that the article over my name which appeared in your issue of July 14th under the above heading has drawn forth a response from Mr. Howard Hazell which appears in a recent issue of your publication, and in this respect I feel sure that I cannot do better than set out below *in toto* a letter from Mr. F. M. Carson, a vice-president of the National Association of Wholesale Stationers and Paper Merchants, and president of the Southern District of that Association, which appeared in the *World's Paper Trade Review* of August 5th, being a reply to an editorial note and to a similar letter from Mr. Howard Hazell in that paper on this much-debated subject.

"In addition, I should like to bring to the notice of your readers the following experience of some of our members which will be of interest as indicating the position of the wholesale stationer in this matter.

"A similar outcry to that which we are now experiencing was commenced some years ago, and our members in question were anxious to be one of the first to comply with what appeared to be their customers' requirements. The demand then was that cream laid should be made 504s to the ream, instead of 480s, as was then the universal custom. All stocks of large post and double foolscap cream laid were accordingly duplicated, giving 18—480s, 19—504s, 21—480s, 22—504s, 23—480s, 24—504s.

"Although the public demand appeared to be for 504s, it is an actual fact that nearly every making of 504s was left on our members' shelves, and eventually they had to take out the extra quires and convert the reams into 480s.

"It would seem obvious to everyone concerned that it is to the interests of the wholesale stationer himself—as it is to any other class of distributor—that he should supply his customers' requirements. This he is now, and always has been, only too willing to do; and when there is a real and serious demand from the consuming trade for any alteration in the present system, the wholesale stationer will be perfectly willing to adopt any suggestions which are put forward by such consuming trade as a body."

### The Paper Merchants' Case.

Mr. F. M. Carson's letter, to which Mr. Harvey Greenham desires to call attention, is the following:—

"I have read with considerable interest your editorial of the 15th July on the matter of standardisation of paper, and as chairman of a committee of wholesale stationers who considered Mr. Howard Hazell's scheme, am much at variance with the conclusions at which you arrive.

"You state that there is an existing state of chaos in regard to paper standards caused through merchants pleasing themselves as to the standard they have selected. Do you seriously suggest that this is a fair statement of the case? There are certain anomalies I know, but I am aware of no state of chaos. Do you suggest that printers are demanding stocks of certain sizes and weights which wholesale stationers refuse to supply? I do not find this demand.

"I have been trying since your editorial was published to find out when and how the sizes and weights usually specified were originated, and have had some interesting correspondence with mills and experts on the matter. They seem to agree, as one mill writes, 'That the reason why the various sizes of papers are what they are is lost in the past generations.'

"There is a book, 'Paper and Paper Making,' by Richard Herring, the founder of my firm, published in 1863, and we have other papers of his of about the same date, in which he gives details of sizes of papers in his day. Writing sizes are the same and many wrapping sizes also. While Mr. Hazell in his letter of the 15th July is correct in saying that there is no standard universally adopted, there is, at all events, old-established custom to work on.

"I am convinced that there are no insuperable difficulties in the way of an arrangement which should be to the benefit of all concerned, but submit that the movement to this end must begin with the printer.

"Mr. Hazell has already gone to considerable trouble over this matter, and if he could assure me that the Federation of Master Printers will adopt his scheme, I will bring the subject up before the wholesale stationers for further discussion. If he can go one step further and get his colleagues to translate their decision into actual orders to the wholesalers, I feel confident his difficulties will be largely overcome.

"After all, the wholesaler is bound to stock such papers as his experience teaches him are most generally demanded and easily sold."

**CZECH TRADE CRISIS.**—The business crisis of Czecho-Slovakia (says the Berlin Exchange correspondent) is reported to be growing worse. Reductions of output, discharges of workmen, and shortening of hours of work are reported by nearly all industrial branches. Pig-iron, machine, chemicals, textiles, glass and paper industries are affected.

**COMPENSATION CLAIM SETTLED.**—At Blackburn County Court, the Star Paper Mill, Ltd., Feniscowles, were respondents in an action in which Joseph M. Namee, labourer, sought to recover compensation for injuries sustained in an accident on December 15th last whilst unloading coal at the mill. He then strained himself, and had since been totally incapacitated. Mr. H. Backhouse (for claimant) said he and Mr. James Chapman, junr., of Manchester (for respondents), had agreed upon the sum of £75 in settlement of the claim. This was sanctioned by the Judge.

## Standardisation of Paper.

### U.S. Government Takes Action.

A message from Washington, through the American Pulp and Paper Association, states that in an effort by the paper industry to simplify the Government's placing of contracts for its supply of paper, an important conference was held between the Specifications Committee of the Joint Printing Committee of Congress and the American Paper and Pulp Association's Advisory Committee for the Bureau of Standards. The result will be added efficiency in future Governmental purchases, making for economy and for a simplification of conditions of sale which will extend the field of possible bidders, and thus possibly assist in cutting the cost to the Government of prices on the material it uses.

The conference, which was followed by a discussion of technical problems by the paper manufacturers and officials of the Bureau of Standards, was devoted chiefly to problems of sizes, weights and similar conditions in paper specifications.

Before the detailed problems were discussed, however, Mr. W. J. Raybold, president of the American Paper and Pulp Association, told the committee that the manufacturers were anxious to be of every service in peace, as they had been in the war days, to the Government. He said that too strict technical specifications might eliminate many possible bidders for Government business, while reasonable requirements should be maintained to the point of giving the Government every possible protection, and at the same time encourage manufacturers to bid for the Government's business. By this procedure he said that the lowest possible prices for paper of the necessary standards could be secured.

DOCTORS are in possession of knowledge and training that could save industry over £100,000,000 a year, writes Dr. Edgar L. Collis in the current issue of the *Journal of Industrial Welfare*. It has been proved that a reduction in labour turnover alone, worth £70,000,000 annually, can be saved by medical supervision and hygienic conditions.

**THE HOUSE COMMITTEE.**—Brief but comprehensive indications of the very useful function that can be performed by a house committee in a printing works is contained in the following little appeal to the staff of Messrs. Hill, Siffken and Co., Ltd. (Grafton Printing Works), appearing in the latest number of *Sticks and Stones*, the firm's house journal:—"It is hoped that everybody will take an interest in the existence of this committee, remembering that it is their representative body, working with the management for the general good. If you have an idea, don't hesitate to bring it before your representative. What the committee wants are suggestions of a practical nature, which will add to the efficiency of the works and the general welfare of us all."

## Warning from New Zealand.

The secretary of the New Zealand Related Printing Trades Association has, with the approval and under the direction of his executive, sent a letter to the general secretary of the Typographical Association warning British workers in the printing and allied trades from emigrating to New Zealand under mistaken notions as to trade conditions in that country. In the course of his letter he says:—

"I am directed to bring under your notice the fact that among the immigrants to New Zealand are a number of typographers, letterpress printers and bookbinders, some of whom have entered into contracts which vary from the conditions laid down in the industrial awards governing the printing trade here.

"The arrival of only a score of printers in the course of a year in such a small country as New Zealand can have only one result. Either the local men or the newcomers have to give up the trade and try something else, or find themselves unemployed.

"In the Dominion of New Zealand there are about 1,000 typographers. These include linotype and monotype operators, stone and bulk hands, jobbing compositors, and, indeed, all machine and handsetting workers. Of letterpress printers and bookbinders there are about 1,000. From these figures you will note that the printing trade comprises, in workers, about as many as are employed in, say, the city of Birmingham, England. You can easily imagine what would happen if a number of printers decided to go to Birmingham to seek work in normal times. In the city of Christchurch there are no more than 36 jobbing compositors, and the arrival of even one man is sufficient to upset the balance between employment of all and unemployment of some.

"My object in writing to you is to request your co-operation in the work of preventing persons from coming to New Zealand who cannot hope to find employment here at their own trade. Quite a number of these immigrants, on arrival, find that conditions in the country have been presented in a more favourable than truthful light, and their disappointment, when they realise that they 'have got to like it,' is sometimes very keen."

**DIPLOMA FOR JOURNALISM.**—The pass list for the examination for the diploma for journalism, 1921, University of London, issued last week, is as follows:—A. T. T. Allen, F. J. Aylett, F. F. Balmforth, W. J. C. Berry, E. Betts, U. Bryan, C. B. Davy, Phyllis H. Denham, H. H. England, F. H. Fisher, V. W. Garratt, Phyllis Gibbons, H. P. Haddow, A. M. Hancock, F. D. Hoys, J. R. Hunt, R. R. C. Jameson, E. C. Laidlay, F. A. Lawson, H. G. Lewis, C. E. L. Phillips, J. H. Plummer, J. H. Rider, W. Robertson, N. Rolson, J. L. C. Rodrigo, B.A., B. D. Cecily Ryder, B.A., G. W. Tyson and B. T. Utley. A list was also published of students who have passed in one subject.

## A Well-known Foundry Manager.

Mr. A. Chadwell, whose portrait accompanied by a few incidents of his career, we are pleased to give in this issue, is the popular president of the Electrotypers and Stereotypers Managers and Overseers' Association. For many years before he was appointed to his present office Mr. Chadwell was actively identified with the Association, serving on its committees and in various other capacities. Like many other similar organisations, this association was at one time on the point of

Mr. A. Chadwell.

being dissolved for want of support, but it is to the credit of Mr. Chadwell and those who came into contact with his influence that it has become so potent, for to-day it practically has every stereotyping overseer within its membership. Mr. Chadwell has also been president of the Stereotypers' Auxiliary for the last five years, during which time this auxiliary has been very successful in raising large sums, while at the same time he has stimulated a deeper interest in the aims and objects of the Printers' Pension Corporation in the electrotyping section of the trade.

Mr. Chadwell, after serving his apprenticeship with George Spottiswoode (Spottiswoode and Ballantyne) received his first appointment as overseer at Messrs. Perkins and Bacon, and from here transferred his services to the foundry of Messrs. Hayman, Christie

and Lilly. It was while Mr. Chadwell had charge of the foundry in this firm that Mr. John Hayman, who was at that time chairman of the London Master Printers' Association, boasted that he had got the finest foundry in London. After a stay for 10 years at this establishment Mr. Chadwell went to his present position at the United Newspapers, Ltd., where for the last 15 years he has had charge of all the foundry productions of this important concern.

Mr. Chadwell's services have been requisitioned on several occasions by many firms seeking expert practical advice. In this connection he has represented Messrs. R. Hoe and Co., at Milan, Paris and Lille, H. Williams and Co., in Paris and Dublin, and Messrs. Penrose and Co. at Belfast, in which city it may be mentioned he started the first foundry. He has also been on similar expeditions for the Lanston Monotype Corporation, and in addition to this Mr. Chadwell started the foundry and supervised the production of the first picture paper on the continent, the *Excelsior*.

There are few newspapers in London where the dry flong is in general use, but notwithstanding this Mr. Chadwell has never been silent in his advocacy of it, for he claims that, though it is more difficult to master than the wet process, it gives a greater saving of time and is far more economical when one becomes accustomed to its use.

Mr. Chadwell has always been a strong devotee of all kinds of sport, and is an old volunteer, serving for fifteen years in the 2nd Fusiliers, where he distinguished himself as a shot, winning the Recruiting Championship of England in 1891. He was successful in winning a swimming championship in 1897-8 and has also been a keen follower of boxing. In later years he won the Kitchener gold medal in the Printers' Rifle Championship, as well as being the best shot in Lord Roberts' League. He is also the possessor of three medals obtained in the newspaper championship when *Lloyds' Weekly Newspaper* won the printing shield.

Mr. Chadwell is still a member of Spottiswoode's Fellow "Ps.," and speaks with no little pride as being the only stereotyper who has continued his connection with that now famous coterie of worthies.

---

"OPTIMISM from Bristol" is the title of a little booklet, the very sight of whose delightfully-designed pages is calculated to bring uplift of spirit to the victim of trade depression. It comes to us from the house of Edward Everard, 37 and 38, Broad-street, Bristol. To the hunter for cut prices this handsomely-produced piece of printing is not likely to suggest a promising field, but the real business optimist who, as the contents tells us, is out for the finest printing talent he can discover, can hardly fail to be stirred to interest by these few pages, in which the capabilities of the artist, the typographical designer, and the printer combine to show how very impressive and confidence-inspiring really good printing can be.

## Trade Union Matters.

ANOTHER union is added to the four already declining to act with the other unions of the Printing and Kindred Trades Federation in the wages negotiations. This is the Printing Machine Managers' Trade Society, which at a delegate meeting last Friday decided, with only one dissentient, to break away from the Federation, and to act independently, strongly opposing the reduction. Application has accordingly been made, we understand, for a separate conference with the employers.

THE time of difficulty experienced by the National Society of Operative Printers and Assistants has brought in its train—as is too often the case in such circumstances—a crop of accusations and rumours unfavourable to the Society's officials. We are glad to note, however, that these underhand attacks have received a wholesome corrective, a vote of confidence in the officials having been passed unanimously by a delegate meeting of the Society's newspaper workers and also by a meeting of the general house workers.

A COMMUNICATION appeared in the *Daily Herald* last Friday giving "news" from Bromley as to some sensational voting on the part of local members of the Society of Lithographic Artists and Process Workers; it was also stated that the Bromley branch advocates a 25 per cent. reduction in prices "owing to the large profits and fall in cost of materials." However, our inquiry at the headquarters of the union mentioned elicited the information that there is no Bromley branch in existence, that the reference to ballot figures was quite inaccurate, and that the demand for a 25 per cent. reduction of prices was as mythical as the Bromley branch from which the said demand was alleged to have originated. We note that the *Herald* has since published a correction by the secretary of the trade union.

AS A result of an interview which the general secretary of the Typographical Association has had in London with the Chief Inspector of Taxes, it has been arranged that in the case of machinememen a deduction of £2 10s. per annum, for overalls and tools, may be made from income for income-tax purposes; in the case of compositors (hand and machine) the amount of deduction allowed is £2 per annum. This decision is operative as from April 6th last.

TRADE union insistence on the inaccuracy of the Ministry of Labour's estimates as to the cost of living is borne out by the recently published final report by the Trade Union Congress Joint Committee on the Cost of Living. The inquiry had shown that on a conservative estimate the cost of living in September, 1920, was 189 per cent. above that of July, 1914, whereas according to the

Ministry of Labour the increase between these two dates had only been 161 per cent.

A motion of great interest to trade unionists came before Mr. Justice Branson, sitting in the Vacation Court, last week, when certain members of the National Society of Operative Printers and Assistants asked for an injunction to restrain the society from refusing to accept their weekly contributions. The members in question refused to pay the levy on which the society recently agreed, but tendered their weekly contributions. The officials accepted the latter, but allocated them to the levy account, marking arrears accordingly. The legality of the levy is the important point in dispute. It was agreed that there should be no order, but the society agreed to accept the contributions without the levy, pending the trial of the action and without prejudice to any question.

## Printers' Outings.

HILL, SIFFKEN AND CO., LTD.—For the recent 32nd annual outing of the staff of Messrs. Hill, Siffken and Co., Ltd., London, the objective chosen was the Bridge Hotel, Chertsey. There was a goodly gathering at the dinner, Mr. H. C. Hill being in the chair, supported by Mr. E. Hill and Mr. W. L. Gray, directors. After an hour or two spent in after-dinner oratory and music, the company passed the remainder of the day in boating, driving and strolling round, enjoying the beautiful country and river scenery of the neighbourhood. The ladies of the firm spent the same day at Southend. They travelled by char-a-banc or train, meeting for dinner at Garons Restaurant, and the afternoon was spent amidst the maze of delights which only Southend can offer. Both parties reflected the admirable spirit of comradeship which pervades the social gatherings of this firm.

HARROGATE "HERALD" PRINTERS.—The staff of the firm of Robert Ackrill, Harrogate, printers of the local *Herald* newspaper, had a most enjoyable outing on the occasion of their annual wayzgoose on the 23rd ult. Travelling in large coaches from Harrogate via Knaresborough, Boroughbridge, Scawton Moor, Thirsk, Ripon and so home again, the party passed through some of the most picturesque parts of the county of Yorkshire, enjoying a journey which printers in many parts of the country might envy, and which, despite a little interference by rain, was heartily appreciated by the participants.

PAPER STREAMERS.—The Theatre and Music Halls Committee in a report to the L.C.C. say that no objection need be raised to the use, in moderate quantities, of paper streamers and temporary decorations made of paper at dances, provided the paper is rendered non-inflammable.

## Printing, Bookbinding & Kindred TRADES OVERSEERS' ASSOCIATION.

There was a large gathering of the Association at the usual monthly meeting held on Tuesday evening at St. Bride Institute, Bride-lane, E.C.4. The president (Mr. A. W. Hunt) occupied the chair, and Mr. H. Milton (vice-president) supported. At the conclusion of routine business, Mr. A. J. Daines, who is always popular at these gatherings, gave an interesting lecture entitled "Jack London's Philosophy."

The minutes of the last monthly meeting having been read and confirmed, several items of correspondence were presented. A letter from Mr. F. C. Peacock thanked the Association for its valued donation to Bookbinders' Pension; from Mr. L. R. Barkes, who is undertaking an appointment in Montreal; Mr. Aves, on holiday, sent his best wishes to the members; from Mr. J. R. Riddell, agent the new technical school, in which he stated that £1,900 out of the £2,500 required, had been promised, and that the remaining £600 was practically assured.

The following new members were unanimously elected to membership: Messrs. W. J. Evans—warehouse—A. White and Co.; F. May—warehouse—H.M.S.O. Press, Harrow; S.J. Cass—binding—H.M.S.O. Press, Harrow; T. H. Layton—binding—Waterlow and Sons; J. W. Bridges—pattern card department—A. White and Co.

The president extended to the new members a warm welcome, and hoped they would always find in the Association a bond of brotherhood.

A report on the visit to the Alf Evans Memorial Home, Carshalton, Surrey, was next presented, and it was moved and carried that the small expense attaching to the outing should come out of the Entertainment Fund.

Inquiries were asked with respect to the arrangements being made for the Whist Drive in November and the Bohemian Concert in December, and a reply was given that these were being dealt with and would be reported to the members in due course.

Before dealing with the philosophy contained in the writings of Jack London, Mr. Daines briefly traced the life of his author, his early occupation as a newspaper boy to his becoming an oyster pirate, up to the days when he acquired, through his attendance at a night school, and the assistance of a sister, a passion for reading and with it a thorough understanding of men and life. Special mention was made by Mr. Daines of Pat Glendon, the boxer, in the "Abysmal Brute," in which Jack London portrayed the pseudo sporting proclivities of the American prizefighter. Another character dealt with, Wolf Larsen in the "Sea Wolf," depicted the brutal type of cultured man. Mention of the author's association with John Barleycorn, and his passion for writing a thousand words a day, with the aid of the

cocktail, brought an interesting lecture to a close.

The meeting ended with a vote of thanks to the lecturer, moved by the secretary and seconded by Mr. J. Lee.

## Municipal Trading in Kent.

Printers are prominent among the many Kent traders who are strongly opposed to the stores department of the Kent Education Committee on the ground that it is not fair that they should have to compete against an undertaking run by means of the county rates. It is interesting to note that a deputation of grocers has waited on the members of Parliament for the county to urge a public inquiry into the scope and operations of the stores department, which, it was stated, has an annual turnover of £250,000.

Mr. W. H. Kent, for the grocers, said that since 1914 the staff had increased by 29, making 47, while the salaries had increased from £2,260 to £10,290. Originally the Kent Education Committee dealt only in educational articles, such as desks and books, but the scope of the department had been tremendously widened and almost every description of goods was dealt with.

At the last meeting of the Kent County Council Alderman E. W. Hussey, chairman of the Finance Committee, said that a sub-committee had been appointed to see how the expenditure of the stores department compared with that of similar departments elsewhere.

## Foreign Samples Exhibition.

The Department of Overseas Trade—whose permanent address for the display of foreign samples is at 7-11, Old Bailey—has lately made several additions to its collection of exhibits relating to the paper trade. The Department is constantly receiving samples of competitive goods from abroad, and quite recently has arranged to augment its collection by the addition of specimens of tissues, boxed stationery, filter papers, etc. In each case particulars will be given of the markets from which the goods have been received, together with their respective prices.

It may not be generally known that the Department of Overseas Trade is at the service of the business community in supplying information and securing samples for use of manufacturers, when they are unobtainable by any other means.

Among recent additions is a specimen of "news-print" of Japanese manufacture, which finds its way into the Siamese market. This is dated April, 1921, and is priced 4½d. per lb. c.i.f. Bangkok. Another grade of "news-print" from the same market and of German manufacture is priced 10d. per lb. c.i.f. Bangkok.

# Trade Notes.

MASTER printers of Wales are to hold a conference at Aberystwyth on September 17th, their headquarters for the day being the Queen's Hotel.

**BRITISH TRADE EXHIBITION.**—Sir P. Lloyd-Greame (Parliamentary Secretary, Overseas Trade), in the House of Commons on Monday, said it was the intention of his department to hold a British Trade Exhibition next year at the White City, where it was accommodated last year.

AN important development in the printing trade is reported from Manchester district. Under the title of The Glossop Printers, Ltd., the whole of the printers in Glossop and Hadfield—two country towns a few miles from Manchester—have amalgamated.

THE Postmaster-General agreed to receive a deputation from the Joint Industrial Council of the Printing and Allied Trades yesterday (Wednesday), at the General Post Office North, to discuss the effects on the printing industry of the increases in the postal rates, which effects the facts adduced prove to have been most detrimental.

**ROCHDALE PRINTER CRICKETERS.**—The printers of Rochdale have arranged a series of cricket matches which are proving very interesting. Messrs. Ormerod Bros. have met and defeated Messrs. Wrigley and Son and the *Rochdale Observer*, and meet the latter team in a return match next week. The *Observer* defeated the *Rochdale Times*, and the two papers combined have a fixture with the Borough Police Force. Some excellent cricket has been shown, the *Observer* compiling over 100 runs against the *Times* team last week.

**GOVERNMENT AIR PUBLICATIONS.**—In the House of Commons last week, Mr. J. Parker (Lord of the Treasury), on behalf of Captain Guest (Minister of Air), informed Mr. E. Harmsworth that Air Vice-Marshal Higgins was placed in charge of the Central Editing Section on January 17th, 1921 and the cost of the section since its institution was about £1,350. The production of training and other text books, embodying the principles of air warfare as evolved during the war, was a work of great importance and responsibility.

**EXPORTS TO U.S.**—The Fordney Bill to revise the United States tariff will, if passed, make still more difficult than at present the export of paper and printed matter to the States. A provision which will render the new rates distressingly indeterminate as well as in many cases seriously higher than hitherto, is the adoption of the new principle that the duties leviable are to be calculated not upon the actual cost, as indicated by the English invoice, but upon a fanciful figure (apparently to be guessed at by the Customs authorities) held to represent what the cost would have been to produce the goods in the United States.

THERE appeared last week the July quarterly issue of that well-produced house organ *Oyez Notes*, of the Solicitors' Law Stationery Society.

THE Czecho-Slovak Department for Foreign Trade has reduced the export tax on all kinds of paper, paper goods, writing and drawing requisites from a half per cent. to a quarter per cent. on the invoice price.

JOHN L. DE BRON, the Somers Town news-vendor, who was found guilty at the Old Bailey of the murder of his wife at St. Pancras, is to be reprimed. His sentence will probably be commuted to penal servitude for life.

**INDIAN PRESS REPRESSION.**—The Repressive Laws Committee at Simla has concluded the examination of witnesses, and is now engaged in writing its report. It is anticipated that it will recommend the rescinding of the Rowlatt Act.

**ITALIAN TARIFF.**—The new customs Tariff for Italy contains a very long list of items relating to paper, cardboard and products of the graphic arts (Tariff Nos. 846 to 865), there being in most cases co-efficients of increase ranging from 0.2 to 0.6.

**OBITUARY.**—At East Grinstead, last week, Lady Truscott, wife of Sir George Wyatt Truscott, ex-Lord Mayor of London, a past Master of the Stationers' Company, and a past president of the Federation of Master Printers; Mr John Samuel Hart, of Lockinver, head of the firm of Hart's Advertising Agency in London.

**MESSRS. JAMES WILLING, LTD.,** newspaper advertisement contractors, who have been in business in the Strand for over 45 years are compelled to seek new offices owing to the acquirement of their premises under the Strand Widening Scheme, and move on August 11th to 30, King-street, Covent-garden, W.C.2.

**WILLS.**—Col. William Edward Goddard, of Cottingham, chairman of Messrs. Goddard, Walker and Brown, Ltd., printers, Hull, aged 83, £24,037; Mr. S. R. Hutt, of Harlesdon, for 52 years associated with the publishing house of Macmillan, £2,276; Mr. William Graham, of Haltwhistle, printer and stationer, £5,217; Mr. John Lobb, of Balham, S.W., chief proprietor *Christian Age*, aged 80, £180; Mr. Henry Pickersgill, of Carlisle, lithographer, late of Leeds, aged 65, £4,229.

SOME extension of the man-in-the-street's knowledge of newspaperdom may result from a new card game, entitled "Fleet-street," which has been put upon the market by the Chad Valley Company, Harborne. The cards are arranged in groups according to the classification of the newspapers and periodicals represented on the face of each card, and the object of the game is to complete a group after the cards have been shuffled and dealt. The game proceeds something after the manner of an old favourite which went under the name of "Pit."

**FORTY-THIRD YEAR.**

**Printed and Published EVERY THURSDAY**  
by **STONHILL & GILLIS,**

at 58, Shoe Lane, London, E.C.4.

**Tel.: Stonhill, Fleet, London. Phone: 8407 City.**

**SUBSCRIPTION: Per Annum, 8s. 8d. (POSTAGE EXTRA).**

**Charges for Trade Advertisements:**

(Full page 8 by 5½ ins.)

Whole Page ...	£4 10 0	s. d.
Half Page ...	2 10 0	17 6
Third Page ...	1 17 6	22 6
Quarter Page ...	1 10 0	9 0
	One-eighth Page	17 6
	One-third Column	22 6
	One inch in Column	9 0

An Extra Charge for Cover and Special Positions.

Discounts according to Number of Insertions.

Representatives throughout the United Kingdom and also in Australia, India, South Africa, United States Canada, etc.

All communications for the "BRITISH AND COLONIAL PRINTER AND STATIONER" should be addressed and Cheques and Post Office Orders made payable to—**STONHILL & GILLIS, 58, SHOE-LANE, LONDON, E.C.4**

Copies may be purchased at the Office, as above or from Messrs. W. H. Everett and Son, Ltd., news-agents, 11, St. Bride-street, E.C.4.

**THURSDAY, AUGUST 11, 1921.**

## Current Topics.

### The Wages Negotiations.

As we go to press (Wednesday) the results of the ballots conducted by the numerous trade unions are being returned, but figures are not obtainable for publication. The employers' proposals upon which the ballots are being taken are, it will be remembered, in the following terms: "That a reduction in wages of five shillings per week from the wages paid to all adult male members of unions affiliated to the Printing and Kindred Trades Federation for whom the Federation were empowered to negotiate, shall take effect on the pay-day in the week ending August 13th, and a further 5s. per week reduction on the pay-day in the week ending September 10th. For all fully qualified women workers, it was decided that a reduction of 2s. per week be made on the pay-day in the week ending August 13th, with a further reduction of 1s. 6d. per week on the pay-day in the week ending September 10th,

also a corresponding adjustment of the wages scale to the male learners and junior women workers and also piece workers." The Typographical Association, London Society of Compositors, Amalgamated Society of Lithographic Printers and Electrotypers and Stereotypers' Society were not parties to this provisional agreement, and these unions have since been joined by the London Printing Machine Managers' Trade Society which was a party to the provisional agreement, but has since declined to participate in the ballot and has joined the four unions above-named in resisting a reduction. The whole position is thus a most difficult one and is being reviewed by the Joint Industrial Council.

• • •

### Paper Standardisation.

THE correspondence which we embody in an article on another page indicates, we think, that the time is ripe for a final—a successful—effort to reduce to accomplished fact some of those very reasonable reforms in paper specifications for which reformers, Mr. W. Howard Hazell at their head, have been striving so long. What the revised scheme is which Mr. Hazell and his colleagues urge for adoption, was outlined in a letter which Mr. Hazell contributed to the *British and Colonial Printer and Stationer* of the 28th ult. Proposed schemes of reform have, of course, been legion—our last week's issue showed still another one, from India, which we printed for the sake of its inherent interest—but this is a matter in which idealism has to be rigidly held in check by consideration of the hard facts of the position with due tenderness to the interests of all parties concerned. The ideal in paper standardisation, basing sizes on the golden rule or hypotenuse oblong, has long been advocated in America, where Mr. Werner is the chief protagonist. On occasions we have referred to the scheme, but, while recognising its artistic merit, have always felt that it was a commercial impossibility. Where magazines and special *de luxe* productions are concerned the artistic ideal can be realised without difficulty, if not without expense. The new proposals, emanating from India, are interesting, but belated. If there are ordinary obstacles in the way of getting the printers' official scheme of standardisation accepted by wholesalers, the difficulties encountered by a scheme aiming at artistic standardisation would be absolutely insuperable. It is too late in the day to bring forward fresh schemes. The one before the trade now has been modelled, revised, shaped and fitted to suit the needs of the English

paper trade. The smallest and largest paper users and paper producers have shared in the development of the scheme. It has been under discussion for years, and practical men all over the country have devoted close consideration to its probable workings and applications. It is safe to say that nothing can be devised which will more simply and easily fit in with practice and custom while at the same time achieving the purpose for which it is set out. The one thing necessary now is for every user of paper to concentrate upon getting standardisation into practice. Once begun, all the doubts and difficulties of the paper merchant will vanish, as they always do when a well thought-out system replaces an old and chaotic series of customs.

\* \* \*

### Standardisation of Printing Machines.

ALTHOUGH the standardisation of printing machinery and parts has been mooted in this country no very definite results have, we believe, been forthcoming. It is interesting to notice that such standardisation—which holds promise of increased efficiency and economy to those who achieve it—is being energetically tackled in Germany. We learn from a recent issue of a German technical journal that the German Society of Book Printers has a committee now considering the standardisation of machinery, this committee holding regular sittings at three or four monthly intervals at Leipzig. In May the sizes and number of ink rollers, the thickness of cylinder plates, feeding and delivery arrangements, lubrication, guards, the numbering of all parts to simplify the ordering of replacements, point *versus* metric system, platen thickness, diameter of spindles, etc., were discussed. Sub-committees on rotary machines, news presses and platen machines have been formed and they are in touch with the machine makers and their association. It would seem opportune that the matter should again be made a subject of investigation in this country.

\* \* \*

### "Carriage Paid."

THE question is now being debated: "Should all goods be sent carriage paid regardless of weight?" Personally we think it is a sound and businesslike policy for all merchants and manufacturers to adopt. In combination with a scale of quantity concessions, there is no difficulty in arranging selling prices which will amply recover to the sender all his carriage costs. Naturally the customer must pay in the regular order of things; but if carriage be accepted as a general expense

to be recovered in the normal sale price of the product, there is a better opportunity of widening the sphere of activity and improving the sales. Printers have a rooted antipathy to paying carriage on paper, and that is one of the reasons why some Southern houses find it difficult to develop their business among Northern paper users. There are other reasons, no doubt, but one obstacle to a widened sphere of trade would be removed if the principle of "carriage paid" could be accepted for general application in the paper trade.

## Personal.

SIR W. E. BERRY has promised to preside at the annual dinner of the Readers' Pensions Committee to be held at the Holborn Restaurant on October 8th.

THE Central News celebrated the jubilee of its foundation by a banquet held on Friday when over 200 guests accepted invitations to be present, including Viscount Burnham, Lord Riddell, Lord Dalziel of Kirkcaldy, Sir William Ewert Berry and Mr. C. W. Bowerman, M.P. Among the very numerous messages of congratulation received was a telegram from the King, and one from the printer-President of the United States.

MR. BERIAH EVANS was presented last week, at the hands of Mr. Lloyd George, with a testimonial in the form of a cheque for £1,000, in recognition of his services to Wales as journalist, dramatist and writer.

MR. BYROM, chairman of John Wild and Sons, Ltd., Radcliffe, on Thursday, the seventh anniversary of the outbreak of the war, unveiled at the works a bronze tablet erected to the memory of the firm's employees who fell in the war.

MR. THOMAS E. DOWNES has been re-elected a director of Messrs. Brown Stewart and Co., paper manufacturers.

MR. REGINALD A. PALMER, chief clerk at the Original Turkey Mill, Maidstone (Hollingworth and Co.), was married at Maidstone to Miss Frances Chipps, of Hertford, Connecticut, U.S.A., whom he met during the war while stationed at High Wycombe. Numerous wedding presents included a dinner service from the employees at the mill.

UNIONS REJECT WAGES PROPOSALS.—As we close our pages for press we learn that, although the ballot of the Printing and Kindred Trades Federation is not yet completed, the results show that the voting is against the acceptance of the employers' wages proposals.

## DIVIDENDS AND REPORTS.

**RYLANDS AND SONS**.—Report of Rylands and Sons for half-year to June 30th, 1921, states that there is a loss of £1,263,315, caused by unprecedented fall in values of stock-in-trade—which at December 31st stood at £3,301,446—and losses under heavy contracts, all of which have been cleared or provided for. Directors recommended transfer of £250,000 from reserve, and propose dividend of 8 per cent. per annum on preference shares and 10 per cent. per annum on ordinary shares, both less tax. Balance from last account was £117,493, plus claim in respect of excess profits duty to December 31st, 1920, £283,851, estimated excess profits duty recoverable for half-year to June 30th, 1921, £917,094, making £1,318,438, less loss for half-year £1,263,315, leaving £55,123 plus proposed transfer from reserve £250,000, making £305,123. After paying proposed net dividends, £112,000, there will be carried forward £193,123. Reserve fund will then stand at £250,000 and insurance contingency fund at £350,000, making total reserve £600,000.

**NORTH OF IRELAND PAPER MILL**.—Shareholders in this company, whose works are at Larne and Ballyclare, last week received the following intimation, signed by the chairman of the company, Mr. J. H. Pilling:—"On account of the present depression of the paper trade and the unsatisfactory working result for the past half-year, your directors consider it inadvisable to pay an interim dividend at this period."

## NEW COMPANIES.

**NEAR EAST, LTD.**—Capital £25,000 in £1 shares; to take over the business now carried on by Near East, Ltd., at 14, Devonshire-square, E.C., or elsewhere, and to carry on the business of newspaper publishers, printers, stationers, lithographers, typefounders, etc., and to adopt an agreement with the said old company and J. Peters, the liquidator thereof. Private company. Subscribers: H. J. V. Greere and A. K. Williams. First directors by subscribers. Registered office: 1, Devonshire-square, E.C.2.

**SHAKESPEARE PRESS (BIRMINGHAM), LTD.**—Capital £5,000 in £1 shares; printers, lithographers, engravers, publishers, bookbinders advertising agents, etc. Private company. First directors: H. E. Keating and C. O. Gervais. Registered office: Stratford Works, Hinckley-street, Birmingham.

**PRECISION MACHINE TOOL CO. (ACCRINGTON), LTD.**—Capital £3,000 in £1 shares; to take over the business of manufacturers of machine tools and printers' machinery and appliances carried on by B. W. Helliwell and I. Alston at Hyndburn Works, Accrington. Private company. First directors: Bertie W. Helliwell, Israel Alston and Robert E. Roberts.

**FRY AND QUIGLEY, LTD.**—Capital £1,000 in £1 shares; toy manufacturers, printers, stationers, fancy goods dealers, etc. Private company. First directors: A. Fry and T. Willis. Registered office: 32-6, Gourley-street, South Tottenham, N.

**HENDERSON, WADDELL AND CO., LTD.**—Capital £500 in £1 shares; export and import merchants, advertising agents, printers, publishers, manufacturing chemists, financiers, etc. Private company. First directors: R. H. Waddell, H. Polak (?) and H. G. Boyd. Registered office: 182-3, Fleet-street, E.C.

**CLINTON-WALL PUBLICITY, LTD.**—Capital £2,000 in £1 shares; to take over the business of an advertising specialist agent and contractor carried on by F. W. Wall. Private company. First directors: F. W. Wall and C. H. Clinton. Registered office: Warwick Chambers, Corporation-street, Birmingham.

**CLUB PHOTOGRAPHER, LTD.**—Capital £500 in 500 "A" and 2,000 "B" shares of 1s. each and 1,500 "C" shares of 5s. each; to acquire the business of proprietors and publishers of the magazine known as "The Club Photo-

grapher," carried on at 9, Eberle-street Liverpool. Private company. First directors: G. E. Peachy, J. Rowatt, W. H. Gleave, W. H. Marquis and W. G. Reed. Registered office: 9, Eberle-street, Liverpool.

**ALFRED BELL AND CO., LTD.**—Capital £10,000 in £1 shares; to take over the business of a fine art publisher and dealer carried on by A. Bell at 6, 7 and 8, Old Bond-street, W., as Alfred Bell and Co. Private company. Directors: A. Bell and P. E. Sampson. Registered office: 6, Old Bond-street, W.

**MODIN AND CO., LTD.**—Capital £25,000 in £1 shares (15,000 8 per cent. cumulative preference); to acquire the business carried on at Palmerston House, Old Broad-street, E.C., as "Modin and Co.," and to carry on the business of timber merchants, agents and growers, manufacturers of and dealers in timber, wood pulp and paper, woodwork of all kinds, etc. Private company. Subscribers: Karl E. Friman and Ivan Lundborg.

### COMPANY MORTGAGES AND CHARGES.

Fresh Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 1908, and Satisfaction registered pursuant to Section 97 of the same Act. (The registration of Satisfaction is not compulsory).

**ALEXANDER SALTON, LTD.** (printers, general stationers, fancy goods dealers, etc.).—Mortgage on 7, 9 and 13, Dover-street, West Hartlepool, dated July 13th, 1921, to secure all moneys due or to become due from company to National Provincial and Union Bank of England.

**LABOUR PUBLISHING CO., LTD.**—Issue on July 26th, 1921, of £500 debentures, part of a series already registered.

**UNITED STATIONERS, LTD.**—Particulars of £2,500 debentures authorised July 5th, 1921; present issue, £2,000, charged on company's property, present and future, including uncalled capital. Satisfaction in full on July 12th, of debentures dated May 29th, 1921, securing £200 also notified.

**A. W. ELLIS AND CO., LTD.** (wholesale stationers, London).—Particulars of £200 debentures, authorised July 13th, 1921; present issue £150, charged on the company's undertaking and property, present and future, including uncalled capital.

**STANDEN AND TAYLOR, LTD.** (stationers, Reading).—Debenture dated July 9th, 1921, to secure £300, charged on company's undertaking and property, including uncalled capital.

**HOW A PRINTER GOT RICH.**—He started poor as the proverbial church mouse twenty years ago. He has now retired with a comfortable fortune of £50,000. This money was acquired through industry, economy, conscientious effort to give full value, indomitable perseverance, and the death of an uncle, who left him £49,999 10s. 6d.—*Strain's Monthly Statement.*

## New De-Inking Process.

Mr. George A. Leavet claims to have discovered a process whereby it is possible to reduce the price of paper 30 per cent. and one which will make the world independent of the failing wood pulp supply. The process involves a method of de-inking old books and periodicals so that the paper may be used again without the addition of fresh pulp, of which, according to present formulas, 80 per cent. is required.

Mr. Joseph G. Myerson, attorney for the inventor, put it tersely when he said of the new process that: "Any chemist can remove the ink. The problem has been to do so cheaply and without so spoiling the texture by chemical action or by boiling that print cannot be applied again. Mr. Leavet has found a quick process which requires neither expert supervision nor new machinery, and employs cheap and easily obtainable chemicals. In the past it has been difficult to wash the de-inked pulp thoroughly, but this obstacle has also been overcome in the new method."

According to the inventor, good book paper of all grades is now being made from pulp obtained from used stock. Stationery will also be made in the same way, the principle involved in its manufacture being the same.

The discovery is being tried out under practical conditions. The proper selection of chemicals is one of the vital features of the new method, and these are applied with soap under pressure, after which the solution is washed in an improved type of rotary screen and dried in an ordinary wet machine.

**FEWER UNEMPLOYED.**—The live registers of the Employment Exchanges in the United Kingdom show that on July 22nd there were approximately 1,870,000 persons wholly unemployed, as compared with 2,013,671 during the previous week, a decrease of about 143,500.

## Caxton Convalescent Home,

Limpsfield, Surrey,

Devoted exclusively to the use of Men and Women engaged in the Printing, Bookbinding, Stationery, and Kindred Trades. Patients received from all parts of the Country.

A Subscription of Three Guineas annually by an Employer, Society or Workshop gives the right to nominate a Patient each year for a Three Weeks' residence at the home, including rail fare.

Penny-a-week Subscriptions from employees are earnestly solicited. Annual Subscribers (minimum 4/-), through a collector or direct to the Office, are entitled to a Three Weeks' stay at the Home entirely free.

## ASSOCIATED WITH THE HOME IS : : : : THE PRINTERS' WAR MEMORIAL

Commemorating the Printing, Bookbinding and Allied Trades' share in the Great War.

**£2,500** still required to complete the Scheme.  
**DONATIONS INVITED.**

London Office:                      Tal.:                      Secretary :  
3, CURSITOR ST., E.C.4. Holborn 197.      S. J. WHITE

## New British Patents.

## French Paper Duties.

### Revised Coefficients of Increase.

With reference to the French Presidential Decree of June 29th providing for a complete revision of the "coefficients of increase" applicable to the French Customs duties, the following are the former and present "coefficients of increase" as they apply to paper:—

Article.	Former	Pres't.
From CLASS XXVI.—PAPER AND MANUFACTURES OF PAPER.		
Paper or pasteboard ...	3 *	3 *
Wall-paper (other than Lincrusta-Walton and the like) and borders for wall-paper:		
Velveted, metallised, stamped, varnished, and imitation leather ...	1.3	3.6
Other ...	1.3	4
Duplicating paper with a greasy surface, tracing paper, and so-called carbon paper, for the stylus and for typewriting ...	3	3
Albumenised photographic paper, not sensitised (arrow-root, treated with salts) ...	3	4
Paper and films sensitised with salts of silver or platinum in sheets or rolls ...	3	3.8
Carbon paper ...	3	4
Paper sensitised with salts of iron (ferro-prussiate, ferro-cyanate, gallate of iron) ...	3	3
Board, in sheets or plates (including vulcanised): millboard, papier maché, carton-pierre; cut, grooved or shaped board; cardboard boxes, covered or not with paper ...	3	3
Cylindrical and conical tubes for use in spinning or weaving ...	—	3
Cardboard ware (cartonnages) ornamented with paintings, reliefs, stuff, wood, plaited straw, common metals, etc. ...	3	6.5
Lincrusta and the like ...	3	6.5
Articles of board or cellulose:		
Moulded, compressed or hardened, with or without reliefs, bobbins and tubes of hardened cardboard for spinning and weaving ...	3	3
Lacquered or covered with a uniform varnish ...	3	5.5
With painted or inlaid decorations.	3	4.6
Albums, simply in boards, for pictures, collections or drawings, blank or in colours ...	2.2	2.2
Engravings, facsimile engravings, photographs, photo-collographs and the like, prints, lithographs, etc. ...	2.1	2.1
Photographs (other than those having an artistic or documentary character) ...	1.5	2.1
Photographs and the like, in sheets or cut into cards, menus, etc. ...	2.1	2.1
Rolls or reels for cinematographs:		
With impressions ...	1.6	1.6
Sensitised ...	1.6	1.8
Printed matter of all kinds, other than those specified above, in black or in colour ...	2.1	2.1
Pipes and tubes of bituminous paper	—	3

\* The coefficient is not applicable to the under-mentioned papers, when destined for printing newspapers and periodicals:—(a) Machine-made, other than fancy, weighing over 30 gr. per sq. metre. (b) White coated "fancy" paper.

# Paper Imports into Spain.

## The New Draft Customs Tariff Sets Out New Rates of Duty.

In our issue of June 23rd we published details of the Provisional Spanish Customs Tariff. The Spanish Government has since (July 8th) published the text of a new Draft Customs Tariff for Spain, which has been framed by the Permanent Commission of the Customs Board (*Junta de Aranceles y Valoraciones*). The Royal Order directing the publication of the Draft Tariff provided that, within a period of two months from July 8th, the Customs Board would receive representations and petitions on the subject of the Tariff proposals, which might be submitted in writing by industrial or commercial bodies, or private individuals, who may consider their interests to be affected by the proposals. At the end of the period of two months, the Draft Tariff, together with all representations received, is to be reviewed by the Customs Board, who will, as soon as possible thereafter, submit to the Spanish Government the definitive draft of a new Tariff.

In the proposed new Import Tariff the projected rates under both the "First" and "Second" Tariffs are shown. In this connection, it is explained that, in virtue of an exchange of Notes between the Spanish and British Governments of 1894, products and manufactures of the United Kingdom are entitled to the application of the "Second" Tariff rates on importation into Spain, together with any reductions of those rates which may be granted by Spain, by Treaty, to other European States, with the exception only of such special Tariff concessions as Spain may accord in favour of goods of Portuguese origin. Products and manufactures of other parts of the British Empire are entitled to similar treatment on importation into Spain, with the exception only of the Commonwealth of Australia, which has withdrawn from the Arrangement of 1894.

Following are the details of the New Draft Tariff relating to paper, etc., the items being considerably elaborated on those which appeared in our previous issue:—

CLASS VII.—PAPER AND MANUFACTURES THEREOF.		1st Tariff.	2nd Tariff.
GROUP I.—RAW MATERIALS.		Pes. c.	Pes. c.
Wood pulp:—			
Mechanical (47) ... ..	100 kilogs.G	1 50	0 50
Chemical (cellulose) (47) ... ..		1 80	0 60
Clippings of paper, cardboard, rope, twine, etc.; waste paper, and fibrous material in fragments ... ..	100 kilogs.G	0 25	0 10
Old rags of vegetable fibres for making paper pulp (48) ... ..	"	0 45	0 15
GROUP II.—PAPER UNMANUFACTURED (EN RAMA) (49).			
Endless paper for printing or wrapping, not cut (51):—			
White or coloured, glazed or not, weighing per square metre:—			
Up to 20 grammes inclusive ... ..	100 kilogs.	150 00	60 00
From 21 to 45 grammes, containing mechanical wood pulp (50) ... ..	"	120 00	40 00
46 grammes and upwards, containing mechanical wood pulp (50) ... ..	"	90 00	30 00
From 21 to 45 grammes, without mechanical wood pulp (50) ... ..	"	125 00	50 00
More than 45 grammes, without mechanical wood pulp (50) ... ..	"	113 00	45 00
Unsize (50 bis):—			
Polished (alisado) or glazed, weighing from 46 to 61 grammes per square metre, in rolls and containing more than 60 per cent. of mechanical wood pulp (50) ... ..	100 kilogs.	25 00	8 50
Polished (alisado) or glazed, weighing from 46 to 61 grammes per square metre, containing more than 60 per cent. of mechanical wood pulp, in sheets (50) ... ..	100 kilogs.	50 00	10 00
Paper in sheets or reels, weighing 61 grammes and upwards per square metre, and containing more than 60 per cent. of mechanical wood pulp (50) ... ..	100 kilogs.	90 00	18 00
Of any weight or colour, without mechanical wood pulp, and with water marks (50 and 54) ... ..	100 kilogs.	163 00	65 00
Of the natural colour of the pulp, not bleached nor glazed, weighing per sq. metre:—			
Less than 20 grammes: or paper for wrapping fruit ... ..	100 kilogs.	90 00	36 00
20 grammes or more, unsuitable for writing or printing; or common packing paper such as straw paper, cap paper, and coarse brown paper ... ..	100 kilogs.	60 00	20 00
Paper on rolls (semi-ordinario), suitable for packing, coloured (except white and aluesado) satined or not, weighing 65 grammes and upwards per square metre, and containing mechanical wood pulp ... ..	100 kilogs.	105 00	35 00
Other unmanufactured paper not specified in the Tariff ... ..	100 kilogs.	165 00	60 00

(47) This number only applies to paper pulp perforated in such a manner that it can be used for no other purpose than the manufacture of paper or pasteboard. When the pulp is not perforated, the Customs will cut the sheets, at the expense of the importer, so that it may not be utilised for any other purpose. Pulp not perforated is dutiable as common pasteboard.

Mechanical wood pulp is distinguished from the chemical pulp (cellulose) in that the pouring of a drop of fluoroglucina on the pulp will produce a red colouring in the mechanical, but not in the chemical pulp.

(48) This number applies only to rags which are used exclusively for the manufacture of paper. Importers must prove that the said materials have been used for the manufacture of paper, by means of a certificate from the Authorities giving a bond to pay the difference between the corresponding duties which bond will be cancelled by the Customs Administration on receipt of the certificate.

## GROUP III.—MANUFACTURES OF PAPER (52).

	1st Tariff.	2nd Tariff.
Paper:—	Pes. c.	Pes. c.
White or coloured, cut, of any weight ... .. 100 kilogs.	210 00	70 00
Primed with gelatine or so-called linen paper or deckle edge paper (papel de barba) made by hand or machine, and primed after manufacture (53) ... 100 kilogs.	195 00	65 00
Made with the Diana or like apparatus, the pulp containing special fabrics or fancy colouring (53) ... .. 100 kilogs.	150 00	60 00
Parchmented ... .. 100 kilogs.	135 00	54 00
Paraffined ... .. 100 kilogs.	120 00	40 00
With designs dry stamped, or imitations of edgings or lace (54) ... .. kilog.	3 00	0 90
Simply tarred ... .. 100 kilogs.	200 00	40 00
Tarred and reinforced on the inside or outside with thin fabric or cotton, jute or similar textiles ... .. 100 kilogs.	180 00	60 00
Not tarred and reinforced with fabrics of any kind ... .. 100 kilogs.	200 00	70 00
Parchment, or paper prepared from cellulose acted on by sulphuric acid and afterwards washed with basic products, crystal and glass-like (vitron) paper 100 kilogs.	183 00	65 00
Coated on one or both sides with a mineral material, dull or polished ... 100 kilogs.	183 00	65 00
Covered with thin sheets (hojuela) of wood ... .. 100 kilogs.	330 00	66 00
Covered with a sheet (lamina) of metal or with metal powder or by galvanic processes ... .. 100 kilogs.	156 00	52 00
Paper and cardboard albumenised or coated with any substance whatever for photography:		
Sensitised ... .. kilog.	4 00	1 25
Not sensitised ... .. kilog.	3 00	0 75
Wall-paper in rolls:		
Printed on a natural back ground ... .. 100 kilogs.	135 00	45 00
Printed on a dull or shiny back ground ... .. 100 kilogs.	225 00	75 00
Embossed with gold, silver, wool, crystal and similar materials ... 100 kilogs.	360 00	120 00
Cut up, cut out into flowers, crimped in the shape of lanterns, lamp shades, and other similar manufactures ... .. kilog.	3 00	0 90
Spun ... .. kilog.	3 00	1 00
Woven paper fabrics in the piece ... .. kilog.	5 00	1 50
Sacks and other manufactures with a basis of paper yarn or woven paper fabrics, not included in other Tariff Nos. ... .. 100 kilogs.	500 00	175 00
Cigarette paper:		
In tubes or cut into leaves for books ... .. kilog.	4 00	1 50
In packets (librillos) ... .. kilog.	5 00	1 75
Music paper ... .. 100 kilogs.	500 00	150 00
Cut:		
In strips less than 18 mm. in width ... .. kilog.	2 50	0 80
In rolls, from 18 to 300 mm. in width ... .. kilog.	2 10	0 70
Bags, with or without inscriptions ... .. 100 kilogs.	225 00	75 00
Paperboard (cartulina) (55):		
Without working or stucco:		
Of a size equal to or greater than 50 by 65 cm. ... .. 100 kilogs.	125 00	50 00
Of a smaller size; and that of hand-made linen paper ... .. 100 kilogs.	163 00	65 00
Stuccoed and coloured, goffered or not ... .. 100 kilogs.	160 00	80 00
Moulded into articles of any kind ... .. 100 kilogs.	200 00	100 00

## GROUP IV.—PAPER STATIONERY (56).

Envelopes:—		
Without crests, in boxes or packets of more than 200 ... .. 100 kilogs.	300 00	100 00
With crests, and those without crests when imported in boxes of less than 200 ... 100 kilogs.	375 00	125 00
Cases and boxes of writing paper, with or without envelopes, ruled or not, put up for retail sale with the covers printed or not:		
Without crest ... .. 100 kilogs.	360 00	120 00
With crest ... .. 100 kilogs.	450 00	150 00
Account books, letter copying books, registers, copy books, counterfoil books, photograph albums, stamp albums and the like; plain, ruled or printed (57)		
100 kilogs.	270 00	90 00

(49) Unmanufactured paper ("papel en rama") means paper which has not undergone special manipulation since its manufacture, made in one operation ("de modo continuo"), without the addition of fibres or colouring by means of special apparatus.

(50) The presence of mechanical wood pulp can be detected by means of a drop of nitric acid, which will not have any effect if the paper does not contain mechanical wood pulp. To determine the proportion of mechanical pulp, fluoroglucin is to be used. This produces a red colouring, which is darker the more mechanical pulp there is in the paper; the approximate quantity can be determined by comparison with the standard specimen, allowing a tolerance of 10 per cent. from the 60 per cent.

(50 bis) All paper which permits lines made with pen and ink on one face to penetrate to the other is considered as unsized paper.

(51) All paper, the smallest dimension of whose size is more than 57 cms. in the case of paper in sheets, or whose width is more than 30 cms. in the case of paper in rolls or on bobbins, is classed as unmanufactured paper, not cut.

(52) Paper which during or after its manufacture has been subjected to processes which changed its form or exterior aspect is considered as manufactured paper.

(53) In order to distinguish these papers, it is sufficient to scrape the surface, the ink being absorbed by the pulp, owing to the lack of size.

(54) Dry-stamped designs are distinguished from watermarks because the lines of the former are more defined; the latter are found to be slightly stumped (difuminadas).

(55) By paperboard ("cartulina") is understood the product obtained by sticking together two or more sheets of paper; uncut paper in reams, the weight of which exceeds 200 grammes per square metre, is also considered as paperboard.

(56) Articles obtained by varying the shape of the paper, ruled or bound and packed specially for retail sale, are included under this heading.

## GROUP V.—PRODUCTS OF THE GRAPHIC ARTS ON PAPER OR CARDBOARD.

	1st Tariff. Pes. c.	2nd Tariff. Pes. c.
Separate labels cut out, or printed in large sheets without cutting out; commercial printed matter; invoices and cheques (58):		
Produced by typographic or lithographic processes:		
In one colour ... .. 100 kilogs.	375 00	125 00
In various colours ... .. 100 kilogs.	490 00	180 00
Produced by heliographic processes or processes other than typographic or lithographic or with inscriptions of leaf metal ... .. 100 kilogs.	500 00	200 00
Post cards and photographs ... .. 100 kilogs.	7 00	2 50
Pictures or engravings, bound or on separate sheets of paper, of paperboard, of cardboard, or of papers stuck on cardboard:—		
Produced by typographic or lithographic process:—		
In one colour ... .. kilog.	7 00	9 50
In various colours ... .. kilog.	7 00	2 75
Produced by heliographic processes or processes other than lithographic or typographic, or with inscriptions of leaf metal ... .. kilog.	8 00	3 00
Maps of all kinds ... .. kilog.	6 00	1 25
Music, engraved or printed by any process whatsoever ... .. kilog.	3 13	1 25
Books, booklets, periodicals and other similar printed matter, whether bound or not:—		
In the Spanish language:—		
Coming from and published in Spanish-speaking countries (57, 59 and 60) ... .. kilog.	25 00	10 00

(57) The bindings shall be dutiable separately, according to kind.

(58) Relief work is considered as letterpress, and bronzed articles as articles of two colours.

(59) The authors or publishers of works in Spanish, printed abroad, are the only persons who may, on payment of duty, introduce the same into Spain fifteen days after a bibliographic notice has been published in the "Gaceta" by the Ministry of Public Works (Fomento). This notice, once published, is sufficient to authorise subsequent importations, except in the cases of distinct editions or of copies which do not accord in some detail with the notice published, a new authorisation being necessary in such cases. Periodicals printed abroad in the Spanish language do not require previous authorisation for their introduction into Spain.

(60) Mixed dictionaries of Spanish and any other foreign language, and books in Latin are considered as being in the Spanish language.

(61) The product obtained during the course of manufacture by superimposing sheets of paper in wet state, without any adherent other than pressure, is considered as cardboard. The minimum weight per square metre is 350 grammes; that of less weight being dutiable as paperboard ("cartulina").

(62) Boxes of cardboard, lined with paper, which are imported as packing for handkerchiefs, shirt-fronts, buttons, piece goods, and similar articles, are free of duty, in accordance with Disposition V.

Replies to Box Nos. to be addressed to the Offices,

### Paper Prices in South Africa.

There is little evidence of shortage of local stocks indicated as far as Johannesburg is concerned, although certain lines are coming forward very tardily. Current prices fluctuate occasionally, but the general tendency is certainly on the downward grade. The effect of the coal strike has not yet been evidenced as regards the mills quotations, but the consensus of authoritative opinion inclines to forecast an increase on the current prices, which are known to be below actual cost of production. Johannesburg prices for local stocks, at June 2nd, are given as follows:—M.F. and S.C. Printings, 10d.-10½d. per lb.; Imitation Arts, 10½d.-11½d. per lb.; Real Art, 1s. 2½d.-1s. 3½d. per lb.; Banks and Bonds range between 1s. 6d. and 2s. per lb.; M.G. Poster, 11d.-11½d. per lb.; Glazed Tinted Printings, 9d. per lb.; Pure Vegetable Parchment, 1s. 6d. per lb.; and I.V.P. ranges from 1s. 3d. to 1s. 6d., according to quality, some of the common grades being as low as 11½d.-1s. 0½d. per lb.—*South African Printer and Stationer.*

## New Inventions.

### Creasing and Scoring on Printing Machines.

In a printing machine, patented by Messrs. R. Hoe and Co., the cutting, creasing, or scoring devices, carried by a movable support, co operate with the delivery mechanism to cut, crease or score the printed sheets, and means are provided for throwing the support out of operation without interrupting the drive of the printing couple. The invention is particularly adapted for creasing or scoring box blanks prior to folding. As shown, the cutting or scoring devices 9 are mounted on a reciprocating bed 10 co-operating with a sheet delivery cylinder 11. The main shaft 16, driven by a belt 18 from an electric motor

20, carries a gear 21 engaging a spur gear 22 loose on a short shaft 23. A spur gear 27 secured to the gear 22 drives the cylinder 11 through the gears 28, 29, and the gear 29 drives the transfer cylinder 14 and impression cylinder 6 through the gears 30, 31. The gear 22 is formed with a clutch 22' to drive the shaft 23 when desired through a slidable clutch 24 fast on the shaft 23, and the shaft 23 is connected by a universal joint 39 to a shaft 37 carrying a gear 36 engaging a rack 33 on a bracket 34 secured to the bed 10. The gear 36 alternately engages the upper and lower surface of the rack 33, the shaft 37 oscillating in a guide 40. A bearer disc 44 on the gear 36 may run on a guide 43.

### Feeding Sheets.

In this invention piles of sheets of cardboard, millboard, etc., are fed to the pile tables of box-making, printing, and like machines, by means comprising an elevator which is driven by a clutch adapted to be thrown out automatically when the pile has been raised to the required level. As shown, a pile of sheets

mounted on a support is moved from ground level over rollers 3 on a platform 2 of a cage 7 which moves over vertical guides 1 and is fitted with counter-weighted cords 6', and a raising-cord 6 actuated by a drum 5 which is driven from a motor 18 by mechanism comprising a dog clutch 19 and sprocket gearing 14, 15, 16. The drum 5 is fitted with a pawl and ratchet for retaining the elevator in its raised position, and the pawl can be operated by link and lever mechanism to permit the cage 7 to descend. When a pile of sheets is placed in the cage 7, a lever 20 is actuated to

throw in the clutch 19, and a detent 22 engaging a bracket 23 holds the clutch in operation against the action of a spring 21 until the detent is actuated by a rod 24 and a follower 25 which is engaged by the cage when it has attained the desired level. The clutch is thus operated to throw out the winding device, and the cage stops at such a level that the pile of sheets can be moved over a roller 26 to be dealt with by further mechanism as described in Specification 162,887. The patentees are A. Ritchie and Son, Ltd., and J. Cullen.

### Continuously-driven Cylinder.

A machine of the kind described in specification 145,938, in which an impression cylinder is driven continuously in the same direction by two sets of gears which alternately take up the drive which is transmitted from racks on the bed to the cylinder by the said gears one set of which has one more pinion than the other, is constructed with a cylinder C as shown in Fig. 7, which is cut away for half of its periphery, and this cylinder is carried in a carriage B which is reciprocated by crank mechanism from a

power shaft *p*. The double pawl drive for the cylinder *C* is the same as in the Specification referred to above. The carriage *B* is fitted with delivery bands *r* which are driven from

Where the bent ends of the strips face towards each other, as shown in Fig. 2, split or other pins *s* are inserted between the ends so as to draw the strips together.

a pinion on the shaft of *C* by chain gearing and a free wheel device which drives the bands only during the backward or non-printing stroke of the carriage. The patentee is Mr. H. Bonham.

### A Holder for Standing Type.

A holder for standing type matter, patented by Mr. J. B. Brind, comprises a rectangular frame, composed of four metal or other strips 1, 2 having bent forked ends 3, Fig. 5, which

are arranged to interlock with each other and are secured together by means of pins or clips. The forked ends of the strips may be arranged to face away from each other, as shown in Fig. 1, C-shaped clips 6 having inturned ends being engaged with the ends of the strips so as to tighten them around the type matter.

### Photo-Mechanical Printing.

Under an invention by Mr. M. de Sperati a photographic negative is converted into a printing surface by resensitising the negative with bichromate and exposing it from the back. Negatives on glass or on flexible films can be used to obtain rigid or flexible printing surfaces. Reproductions from negatives which it is not desired to destroy can be used and negatives with images broken up by dots may be used. The silver image is first treated in a bath of bichloride of mercury and ammonia to make the image portions more absorbent to water and more repellent to ink. The negative is then resensitised with bichromate and printed through the back. The original image may be dissolved out before or after resensitising. The resensitised negative, after exposure, is washed in running water. It may then be dried and, when required for printing, prepared by a bath of water, glycerine, and ammonia, prior to inking.

### Safety Printing Process.

The object of an invention by Mr. C. W. Lacher is to prevent the photographic reproduction of bank notes or other securities, and the whole or a part of the design is printed in such colours that, if photographed, directly adjoining or superposed parts of the design, or of the design and ground, show no, or only slight, difference in brightness on the photographic plate whether or not a colour filter is employed. Several methods of producing the design are described. In one method, a negative and a positive of the design are printed in exact register in the colours having the above described property. In another method the design is printed in one or more colours upon a coloured paper or upon a paper printed in colour from a grained or lined plate. In a third method, the design may be printed with discharged colours on a coloured ground.

# Employers' New Wages Offer.

**Improved Terms Submitted After General  
Rejection of the Proposed 10s. Reduction.**

It was not until about midnight on Wednesday of last week that intimation was made to the Joint Industrial Council of the Printing and Allied Trades, in protracted sitting at the Ministry of Labour, that the ballot taken by the Printing and Kindred Trades Federation on the employers' amended proposal for a reduction in wages of 10s. per week for men and 3s. 6d. for women had been rejected by a very large majority. The final figures of the voting were not ascertained; sufficient evidence of the adverse majority having been submitted to the Council, it was deemed unnecessary, in view of the Council's subsequent decision, to complete the compilation of the returns. The voting of the London Society of Compositors showed an overwhelming majority for rejection, the figures being:—For the reductions, 1,089; against, 9,506; majority against, 8,417. The L.S.C. voting also sanctioned a levy of 7s. 6d. a week on the members.

The Joint Industrial Council was thus faced—at midnight—with a deadlock on the wages question. The Council, however, continued its good offices (it did not disband until 2 a.m.), and after further lengthy discussion its hopes of finding a way out of the impasse found expression in the following resolution:—"This Joint Industrial Council recommends the employers to reconsider the position, and recommends the trade unions to

immediately ballot their members on any revised proposal which may be submitted by the employers' organisation for a reduction."

## **The New Terms.**

Adjournment followed, and further deliberations on the part of the employers' representatives were productive of revised proposals to be put before the members of the various trade unions. The new terms are the following:—"A reduction of 7s. 6d. per week in the wages of men, of which 5s. shall take effect on the pay-day in the week ending August 27th and 2s. 6d. on the pay-day in the week ending September 24th, and a reduction of 3s. per week in the wages of qualified women, of which 2s. shall take effect on the pay-day in the week ending August 27th and 1s. on the pay-day in the week ending September 24th, and a proportionate reduction for male and female learners and apprentices."

These new terms are now being submitted to ballot by the trade unions, there being on this occasion, we understand, a separate ballot for each union affected by the employers' proposals, the Federation of Master Printers having made the offer direct to the individual unions.

An intimation was made to the Joint Industrial Council that the employers had fulfilled their obligation under the Constitution of the Council, and in the event of this

proposal being rejected would be free to take any action they thought fit.

### Is It Peace?

Thus the possibility of an early peaceful settlement rests once more in the hands of the members of the printing trade unions—but this time, no doubt, with a much greater likelihood of an amicable agreement.

The employers' original demands, it will be remembered, called for a wage reduction of 15s. Thus the present proposals, which embody a second modification of the original terms, indicate a remarkable concession to the contentions of the unions' representatives; the arguments which carried weight against the 15s. cut are therefore not necessarily of any cogency when applied to a proposed reduction of only half the amount first specified. Those who think that a basis of agreement has at last been reached have certainly some ground for their hope. There are indications that many members of the unions concerned realise what a strong case there is to-day for some retrenchment upon the wage status of the phenomenal period now tending to a close, and this realisation is doubtless evidenced in the agreement of the union executives to take no action that would prejudice the decision of their members—which means, we take it, that any executive not able to recommend the acceptance of the new proposals will at any rate refrain from advising their rejection.

**THE** live registers for the 23 Employment Exchanges in the L.C.C. area show that on August 5th there were 166,600 persons wholly unemployed, apart from the number of short-time workers. The registrations disclosed a decrease for the week of over 3,800.

**NATIONAL HEALTH INSURANCE.**—In the House of Commons Sir A. Mond (Minister of Health) informed Dr. McDonald (C.U., Walsley) that he was considering whether the time had not come for a general inquiry into the working of the National Health Insurance Acts.

**L.M.P.A. HANDBOOK.**—There has just been issued as a neat 88-page brochure a "Handbook of the London Master Printers' Association," containing a mass of information of special value to the Association's members. It contains particulars of the constitution of the council and committees of the L.M.P.A., names of the officials of the district associations, and a directory of the general membership, as well as important reference matter in respect of agreements with trade unions, the rules of the L.M.P.A. and of the Federation of Master Printers, and other matters. A notable innovation in the directory of members is the addition of telephone numbers.

## The Unions and Wage-Reduction.

### Is the Ballot a Fair Test of Opinion?

At the present juncture in the wages dispute, too much emphasis can hardly be placed upon the importance of the trade unionists' ballots. Upon these ballots depends the adoption or the rejection of any attempted peaceable settlement of the question at issue, and upon these ballots may ultimately hang decisions as to the continuance or stoppage of work in some sections of the trade—decisions of the very gravest moment to the industry as a whole. How important, therefore, that those taking part in the ballots should be fully informed as to the circumstances in respect of which their decisions have to be made!

We have received a letter on this vital matter from a correspondent, well known in the trade, who holds the view that many of the work-people voting in the present dispute are doing so without having had the true condition of affairs made plain to them. This he regards as an insuperable obstacle to that mutual understanding on which alone any lasting peace can be based.

Our correspondent remarks that in the case of a certain ballot paper before him, votes for or against are asked on two propositions: first, the acceptance of the proposed wage-reduction; second, the imposition of a levy in the case of the proposal being rejected. His complaint is against the circular letter which accompanies these questions, and which he regards as quite inadequate to its purpose of informing the voters on the points at issue. This circular letter, he says, merely indicates that the employers have asserted that wage rates must come down, and goes on to hint a subsequent submission of the dispute to the Joint Industrial Council, while a final statement is made to the effect that the executive committee feel that the reduction proposal is not justified and that they cannot recommend its acceptance.

"Now it seems incredible," he writes, "that the employers have not made the serious condition of the printing trade clear to the union delegates; but on the face of the statements of the ballot paper, the ordinary apathetic rank and file members who rely on their executive could only come to the conclusion that the demand for a reduction of wages has been made without adequate reason or is a capitalist tactic. Thus an overwhelming vote against acceptance must be anticipated."

He concludes: "How can members of any union realise the anxieties of the employers from such a totally inadequate statement, or have any real understanding of the position of both parties? Before any lasting peace can be attained or progress made in creating an atmosphere of harmony and mutual understanding, different methods than shown by this ballot paper must be adopted."

## Trade Union Matters.

THE Northern Group of the Typographical Association has this month "come of age," and the event was accordingly celebrated at Newcastle-on-Tyne on the 6th inst. T.A. branches of the district were well represented at an afternoon conference, and after the conference a company of over 70, including ladies, sat down to tea. Among those present were Mr. Leslie Smith (president, local Master Printers' Federation) and Mrs. Smith, Mr. C. Bowes, Mr. C. Allen (R. Robinson and Sons Ltd.), and Mrs. Allen, Mr. H. Chesterton (Bealls, Ltd.), Mr. Reed (Messrs. Mawson, Swan and Morgan). The participation of the employers was a noticeable feature of the proceedings, and Mr. J. D. French, general president of the Typographical Association, expressed the hope that the kindly feeling which prevailed in the industry between the employers and the T.A. would long continue. He was not in favour, he said, of an exhibition of force by either side. Mr. J. Barron, the Group secretary, and member of the National Executive, thanked the employers for their courtesy and practical and gratuitous assistance in publishing the coming-of-agesouvenir.

THE Trade Union Congress this year will have before it a report submitted by the Trade Union Education Inquiry Committee, which was set up in October last at a conference of the representatives of national trade unions called to receive a report of the first year's work of the Workers' Educational Trade Union Committee. A copy of the report has been prepared in pamphlet form, and issued at 4d. by the Caledonian Press, Ltd., 74, Swinton-street, W.C. Branches of trade unions and other labour bodies may secure quantities at reduced rates.

THE President of the Board of Trade was asked in the House last Thursday whether he was aware that the report of the Labour Committee indicated that the cost of living to-day was 28 points higher than the figures indicated by the Board of Trade returns, and that this discrepancy had prevailed since September last year; and, having regard to the fact that a £1 5s. a week pre-war wage was now £2 14s. 9d. on the basis of the Board of Trade figures, and on the basis of the Labour Committee figures should be £3, and having regard to the very serious importance of this matter to the whole of the workers of the country, he would have further inquiries made. Mr. Baldwin replied that, while the Labour Committee regarded the Board of Trade figures as being unduly low, a great many people regarded them as unduly high.

**COST OF LIVING RISES.**—The average level of retail prices on August 2nd was 3 per cent. more than on July 1st, and 122 per cent. above the level of July, 1914, says the *Labour Gazette*.

## Towards Better Lighting.

Printing is an industry in which the question of proper lighting ranks as a matter of first-rate importance, and printers will therefore note with interest the appearance of the second report of the Departmental Committee which has been investigating lighting conditions in factories and workshops.

The Committee point out that generally speaking one type of shade is adapted to one type of lamp only, and that to maintain suitable lighting change of type of lamp often necessitates change or re-adjustment of the shade.

Several forms of glare, the Committee finds, are still to be met with in factories. Discomfort may be caused to the worker by the presence of a strong light in or near his line of vision, or a worker entering a room may be momentarily dazzled and may incur additional risk of accident.

The Committee recommend that "to minimise two forms of glare every light source (except one of low brightness, i.e., of not more than five candles per square inch) within a distance of 100 feet from any person employed shall be so shaded that no part of the filament, mantle or flame is distinguishable through the shade, unless it be placed so that the angle between the line from the eye to an unshaded part of a source and a horizontal plane is not less than 20 degrees, or in the case of any person employed at a distance of six feet or less from the source, not less than 30 degrees."

Another form of glare, it is pointed out, may be remedied by suitable placing or screening of lights to prevent direct reflection into the eyes of the worker.

As extensive alterations may be necessary in many factories, the Committee propose that a reasonable time-limit should be given before the suggested requirements become operative.

## Printers' Postage Deputation.

A deputation from the Joint Industrial Council of the printing and allied trades, introduced by the president, Mr. James MacLehose, waited upon the Postmaster-General last week, and laid before him certain details with reference to the effect of the recent increases in the postal rates on the picture post card section of the printing industry and circular and catalogue printing. Mr. A. E. Goodwin, Colonel Fletcher, Mr. Dennis, and Mr. Valentinespoke on behalf of the trade. The Postmaster-General promised to give careful consideration to the views expressed, and intimated that he would acquaint the deputation with any decision that might be reached at an early date.

### The Bookbinder and the Time Docket.

SIR,—Absence from England prevented me from replying before to the letter of Mr. Vick, appearing in your issue of July 28th.

It is not my desire to prolong any useless controversy with Mr. Vick on the question of time recording in the bindery, but will leave him and his pugnacious attitude to be dealt with by his more reasonable friends inside the Master Printers' Federation.

My purpose in replying to Mr. Vick is to correct one or two mis-statements appearing in his last communication, as witness the reference to Mr. Hazell. Reference to the preceding correspondence will clearly show that I have made no allegation as regards that gentleman, but simply repeated the words contained in Mr. Vick's own letter printed in your journal of July 14th.

As regards Mr. Vick's own position, I cannot certainly understand how he ever so far forgot himself as to attend the meeting at all, seeing that the time allotted for same could only end in a "hopeless and degrading spectacle." Does Mr. Vick think that Mr. Goodwin, Mr. Severs and other such gentlemen have no self respect, seeing that they did not think it degrading to address the meeting, and moreover were listened to with attention and respect?

In reference to Rule 17 of the N.U.B. and M.R. referred to by Mr. Vick as an abomination, I would like to remind him that the rules of the Union are a matter for the members alone, who are just as capable of looking after the interests of the trade from their own practical view point as Mr. Vick is from his side, and I personally hope that the time is far distant when it will be necessary to consult Mr. Vick, or any other employer in the drafting of rules for the government of any trade union.

Both of Mr. Vick's letters breathe the spirit of the "mailed fist," and that is why I deplore them. If the costing system is the necessity that the employers claim it to be both for their own interests and the improved status of the workman, then I claim that it has only to be clearly demonstrated to them, to get it accepted.

I trust the Master Printers' Federation will not be influenced by firebrands of the type of Mr. Vick, but will be content to await the result of the investigations of the Special Committee into the Costing System decided upon at the last meeting of the Joint Industrial Council, before taking any further action.

Yours, etc.,

GEO. HARRAWAY,

General President,

National Union of Printing, Bookbinding,  
Machine Ruling and Paper Workers.

44, Blackfriars-road, London, S.E.1.

### The All Evans Memorial Home.

SIR,—I have read with interest your excellent report in your July 28th issue of the recent visit by the Printing, Bookbinding and Kindred Trades Overseers' Association to our Convalescent Home, but there is just one word used which is calculated to convey an entirely wrong impression, namely, that the Home is partly maintained from charitable resources. I refer to the word "almost" in the second paragraph of the report, viz.: "The Home with its magnificently-wooded ground covers an area of 30 acres, and is maintained *almost* entirely by the members of the National Union," etc.

I have to point out that ever since the Home was purchased by our Union it has been maintained *entirely* by the special  $\frac{1}{4}$ d. per week paid by the members for that purpose.

I may mention that our Convalescent Home Fund balance-sheet for last year shows a clear gain of £3,174 18s. 5d. on the year, after meeting all items of expenditure, and the Management Committee are on the lookout for another suitable Home in the North as it is their intention, when trade gets back to normal conditions, to secure such property for the convenience of our convalescent members in the North.

Yours, etc.,

WM. ROSS,

General Secretary, Papermaking Section.  
55, Victoria Buildings, Victoria-street,  
Manchester, August 8th, 1921.

A JAPANESE commercial mission is being sent to India to investigate the needs of the market and to expand Japanese commercial influence there. Among the sample commodities to be carried by the party to India are paper, paper manufactures, stationery and dyes.

**Mr. F. V. Brooks.**

A WELL-KNOWN figure is removed from the lithographic world by the death, on the 7th inst., of Frederick Vincent Brooks, the hereditary head of the old lithographic firm of Vincent Brooks, Day, and Son, Limited, and a leading authority on all the subjects connected with lithography and sun-copying, on which matters he wrote the articles in the latest edition of "The Encyclopædia Britannica." He was also chairman of G. W. Bacon and Co., Ltd., map publishers, official printer to the Senefelder Club, and was a personal friend of Charles Dickens. A correspondent of *The Times* writes of him as follows:—Born to a Chartist father 72 years ago, Brooks was educated at Bishops Stortford, where he became personally known to Cecil Rhodes. He obtained a scholarship for Sidney Sussex College, Cambridge, but was called early to business. As a young man he distinguished himself on the river. For years he was the popular captain of the old West London Rowing Club, and became well known as "Daddy" Brooks. An excellent swimmer and a good boxer, he was also much more than an average amateur actor. Succeeding his father early as head of the business, he reproduced the first *Vanity Fair* cartoon for Mr. Gibson Bowles in 1869—that of Benjamin Disraeli—and continued his connection with that journal almost without break until the end of its cartoon series. He was not only a master-craftsman, but a real artist in his own line, as may be judged generally by the work of the firm ever since it won the gold medal at the Great Exhibition of 1862 for a reproduction of Mulready's picture, "The Wedding Garment." He was also a very active Churchman. Well known and greatly respected as he was for his integrity and quick grasp of detail, he was in great demand as an arbitrator in business disputes. Brooks was a very kind-hearted and unselfish man, and was regarded with affection by his employees. Probably his last kindly action was to arrange for a service to be held at Holy Trinity Church, Kingsway (close to his company's works in Parker-street), before the funeral at Wandsworth Cemetery, for the convenience of all the members of his staff. Two sons are left to carry on the business after the hereditary manner. Both are ex-soldiers, and one of them, Captain W. Vincent Brooks, who gained the Military Cross, was wounded and taken prisoner by the Germans in May, 1916.

MR. W. M. EGGLESTONE, who died at Stanhope, Weardale, on Saturday, in his 84th year, earned by his writings the title of the "historian of Weardale." In his early days he established a printing press at St. John's Chapel (of which place he was a native), publishing an annual Weardale Almanac.

## Exhibition of Wall-papers & Posters

Owing to unforeseen circumstances there has been some delay in the re-decoration of the Sheepshanks Galleries of the Victoria and Albert Museum, and rather than leave the Galleries unoccupied for a further space of time, it was decided to arrange a purely temporary exhibition of wall-papers and posters, which is now open to the public in Rooms 95-99.

Of special note among the wall-papers is a French set, of the Empire period, of 25 sheets representing a continuous picture of a hunting scene, making a run of 44 feet for the complete papering of a small room. This was given by Sir William Ingram, Bart., to whose generosity is also owing a particularly fine series of nine panels of a painted Chinese wall-paper. There are other examples of Chinese papers, and from these one passes to examples illustrating the history of British papers from the early 16th century to the designs of William Morris, Walter Crane and other modern artists.

The posters, which represent a selection only from the large collections now in the Museum, are arranged to show the work of different countries, Great Britain, the United States, France, Germany, etc. The British section contains a very early example of a poster designed by Walter Crane in 1888; notable work by the "Beggarsstaff Brothers" and Aubrey Beardsley, who at the start, set a very high standard for English poster art; and groups of work by living artists such as Frank Brangwyn and Spencer Bryse. A recent large acquisition has enabled the Museum to show a remarkable series of early French posters by well-known artists, such as Chéret, Steinlen, Toulouse-Lautree, Grasset, Mucha, etc. In every country posters played a very prominent part in the history of the war, and were used for every form of propaganda. British and French war posters are well represented, among the latter being famous works by Steinlen, Faivre, Poulbot, Willette, Roll and others; while special interest attaches to chosen examples of German posters, which hold their own by sheer force and efficiency.

"THE THUNDERER, LONDON."—A letter from Kansas City, addressed "The Thunderer, London, England," has been delivered by the Post Office authorities at the offices of *The Times*.

PRINTERS' SHOOTING COMPETITIONS.—The printers' annual miniature rifle meeting will be held on Saturday, September 3rd, on the range of the Wimbledon Park Rifle Club, Southfields. Prizes valued at over £100 will be fired for. Ladies and gentlemen connected with the printing trade wishing to enter for the competitions can, by enclosing a 2d. stamp, obtain copies of the programme from the hon. secretary, Mr. A. J. C. Pescud, 158, Erlanger-road, New Cross, S.E.14.

## Trade Notes.

**MESSRS. REES AND SPRING**, of Balham, have started a travelling motor bookshop.

**THE Toronto Type Foundry Co., Ltd.**, have taken over Intertype representation in the Dominion of Canada, succeeding Messrs. Miller and Richard.

**MR. ROBERT DONALD** has acquired the well-known Sunday paper, the *Referee*. There will be no change in the character of the paper, and Mr. George R. Sims will continue his 45-year-old feature, "Mustard and Cress."

**LINOTYPE AND MACHINERY LIMITED**, engineers and printing machinery manufacturers, in consequence of the expiration of the lease of the offices which they have occupied for many years at 188, Fleet-street, are removing to No. 9, Kingsway, London, W.C.2.

**MR. C. H. ST. J. HORNBY**, chairman of the festival dinner of the News-vendors' Benevolent Institution, announced for October 12th, is sparing no effort to achieve a record "plate" this year, £10,000 being the amount aimed at. Donations may be sent to the chairman of the Institution at Strand House, W.C.2, or to the secretary, at Memorial Hall Buildings, Farringdon-street, E.C.4.

**POSTAL RATES.**—It was stated on behalf of the Postmaster-General on Tuesday, that the regulation as to the five words of greeting allowed on a post card for a penny, instead of the full rate of 1½d., will not be altered. The Postmaster-General believes that early next year the financial situation of the Post Office will be bettered, so that the extra rates on cards and letters now imposed may then be taken off.

**PICTURE POST CARD SLUMP.**—Doubtless typical of the position at holiday resorts in general is the report in the Press from Blackpool stating that when the picture post card could be bought at a penny and the postage was only a halfpenny visitors to Blackpool used to send the cards away by the dozen; nowadays picture post card trade has dwindled to comparatively small proportions and there are complaints all round, particularly about the high postage rate.

**STRIKE AT W. H. SMITH AND SONS.**—A sudden strike of factory hands employed by W. H. Smith and Sons, Strand House, occurred on Tuesday. The cause is said to have been a proposed wage reduction, claimed to be made under an agreement with the Stationers' Society, the factory workers maintaining that they were covered by agreement with the London Master Printers' Association. Members of the Union of Printing, Bookbinding, Machine Ruling and Paper Workers left work in sympathy early in the afternoon, but by evening it had been agreed to resume work under usual conditions, while the matter goes to arbitration.

**COMPOSITORS** and others employed in the book trade at Roubaix have threatened to come out if rates of pay are reduced.

**GERMAN PRINTERIES.**—A new edition, 1921, has appeared of the well-known directory of the German printing trade, "Klimschs Adressbuch der Deutschen Druckereien."

**S.O. CONTRACTS.**—To the list of houses supplying the Stationery Office with paper must be added the name of Mr. Ralph Dennis, the speciality being travelling set-off paper.

**KENYA COLONY**, East Africa, has increased some of its import duties. Engraved pictures and photographs are now subject to 20 per cent. *ad valorem* and playing cards to 30 per cent. *ad valorem*.

It is reported from Washington that the House has passed the Senate resolution for the appointment of a Commission to negotiate with Canada for the repeal of the export duties on wood-pulp and print paper.

**ARRANGEMENTS** are well in hand for the holding of the Press Congress of the World at Honolulu, Hawaii, October 4th-14th. The British Empire Press Union representative is to be Col. E. Frederick Lawson, assistant managing director of the *Daily Telegraph*.

**EMPLOYEES** of 30 printing works in Bordeaux went on strike last week, refusing to accept a 10 per cent. wage reduction. The strikers, numbering about 800, threatened to call out the newspaper compositors if they did not obtain satisfaction.

**MR. SAMUEL GOMPERS**, president of the American Federation of Labour, attending the conference of the International Typographical Union at Quebec, expressed his strong approval of the Disarmament Conference, and urged that Labour should be directly represented.

In connection with the new Spanish customs tariff as formulated by the Customs and Valuations Committee in that country, the Spanish Government is open to receive in writing within the next six weeks complaints or requests in relation to the proposed tariff from industrial, agricultural, commercial or economic bodies or from individuals.

**CAPTAIN W. E. ROLSTON**, managing editor of the *Cologne Post*, the English newspaper of the British Army on the Rhine, died at Cologne last week from heart failure, after three hours' illness, the seizure occurring while he was attending the Summary Court in connection with a strike of compositors in the employ of the *Post*.

**THE Congress of Belgian Journalists** at Namur on Sunday, unanimously adopted a resolution declaring that the Congress, assembled for the first time since the liberation of Belgian territory, gladly takes the opportunity to send its colleagues of the Allied Press, especially the British Press, an assurance of the feelings of fraternity which Belgian journalists feel for those who with them fought for the defence of justice and the liberty of peoples.

## Printing Notes from Australia.

**Printers' 44-Hour Week — Melbourne Printers' Overseers Meet—Newspaper Prices Raised—Local Printing Advocated—Big Duties on Stationery Goods—Book Trade Difficulties—A Postal Anomaly—New Company—English Publishers Protected.**

*(From Our Sydney Correspondent.)*

THE position of the trade unions with regard to the 44-hour week is strengthened by the recent decision at Sydney of Judge Beeby, in the special Court constituted by the Eight-Hour (Amendment) Act, 1920, on the question of the application of the 44-hour week to country printing offices. His Honour, in giving his decision, said that some of the country newspapers had expressed themselves as favourable to the change to a 44-hour week—not a large proportion, but some. They said that the change was working satisfactorily, and in some cases little or no difference was reported as the outcome of the reduced hours. It was in the establishments which employed any substantial number of hands that some difference was made. A number of these would have to bear some additional cost of production until that inevitable readjustment took place, which generally did take place after the shortening of working hours. He thought that it was better for the trade that there should be a standard working week for the whole industry. The position was that there was a recommendation which had been gazetted by the Crown, applying the 44-hour week to the whole printing industry. He did not propose to recommend to the executive that that gazetted regulation should be altered.

FOR the last 30 years members of the Melbourne Printers' Overseers Association have met annually at dinner. The last gathering was held recently, and proved to be most enjoyable. Mr. A. J. Woodham, president, occupied the chair, and among the visitors were Mr. D. Macdougall, president of the Master Printers' Association; Mr. O. Owens, president of the Victorian Master Process Engravers' Association, and many representatives of supply houses. Messrs. J. Steele and R. Skinner, past-presidents, were presented with gold badges as souvenirs of their terms of office.

HIGHER prices of newspapers are still being attained, and both the Melbourne morning dailies, the *Age* and the *Argus*, have each raised their price to 2d. per copy.

THE Printing Trades Union at Sydney is making an effort to induce business people to acquire their printing matter locally, and

with this object a conference is being arranged with the idea of inducing the Minister for Trades and Customs to increase the tariff fees on this class of goods.

THE secretary (Mr. Bell) says that Australia, for the year 1918-19, paid £520,822 in duty on manufactured stationery, pictures, coloured supplements, cardboard boxes, inks, and matrices for stereotyping purposes, the total value of the goods being £5,543,880. For imported books, fashion plates, music, periodicals, etc., £669,811 was paid, the tariff being £275. Of this amount New South Wales received goods to the value of £305,697, the duty paid being £131. The State also paid £15,319 for Christmas and birthday cards, menus, programmes, etc., for the same period, while 47,463 dozen packs of playing cards, valued at £16,184, were received in Australia, New South Wales taking 22,284 dozen packs, and Victoria 21,734 dozen packs.

CONSIDERABLE discussion is taking place in the Melbourne press over the definition of a book for postal purposes. It is alleged against the postal authorities by virtue of their power of regulation they have arbitrarily introduced a new definition, which declares that a book is no longer a book if it does not comply with the conditions that have been laid down under the postal rates. No one can understand the principle on which a distinction has been created between one kind of book and another.

A NEW company has been registered under the style of W. A. Pepperday and Company, Limited, capital £20,000 in £1 shares, to purchase from W. A. Pepperday and Company all their rights, title, and interest in the business of printers, stationers, etc., carried on by that firm at 119a, Pitt-street, Sydney; to print and publish a newspaper or newspapers, and to carry on the business of newspaper proprietors, printers, publishers, type founders, booksellers, etc.

AT Melbourne on June 18th Mr. Justice Starke gave judgment in the action brought by Blackie and Co., a well-known English publishing house, against the Lothian Book Publishing Co. in respect to an alleged infringement of the copyright of a book entitled "The Warwick Shakespeare: Henry V." "I have no difficulty," said his Honour, "in deciding on the facts that Blackie and Co. are entitled to the copyright in its book under the law in force prior to the passing of the British Copyright Act of 1911, and are now entitled to the substituted right given by that Act. His Honour issued an order perpetually restraining defendants from publishing or selling their book containing certain specified passages or notes.

WHILE not directly subsidising the British Empire Exhibition of 1923, the Government has undertaken to participate in the guarantee fund to the extent of £100,000.

**FORTY-THIRD YEAR.**

agents, 11, St. Bride-street, E.C.4.**

**THURSDAY, AUGUST 18, 1921.**

## Current Topics.

### The New Wage-Reduction Proposals.

THE long-drawn-out negotiations on the question of wage-reduction in the printing and allied trades are carried an important step further by the new terms which it was agreed, towards the end of last week, to put to the ballot among the trade unions concerned. On a preceding page we give the revised terms, together with some particulars of the latest negotiations and of the subsequent state of affairs. It is expected that the returns of the new ballot will be available not later than the 25th inst. Meanwhile the employers have been circularised by their organisation to the effect that they should take no individual action in the direction of reducing wages until definite instructions are issued, as will be done immediately the outcome of the ballot is known.

### Is the Ballot Fair?

ATTENTION is drawn elsewhere in this issue to the ballot papers and the accompanying letters which, in the current wages dispute, have been circulated by the various trade union executives to their members. That these communications should not unfairly prejudice the issue put to the vote is a matter of vital importance, and we therefore put forward our correspondent's contentions for what they are worth. We doubt, however, whether our readers, on the side either of the employers or of the workpeople, will attach much importance to the objections raised. While some of the circulars in question were unobjectionable, there were others which, perhaps, were not quite so; and it would be as well to bring out into the light of public print anything of this kind that offends too obviously against fair play. But can it be maintained that any considerable number of trade union voters are unaware of the true state of affairs in the trade to-day? The prevalence of unemployment, the unemployment levies, the working of short time—these are some of the things that bring home in very concrete fashion the unsatisfactory present condition with which the whole printing industry is faced. Moreover, the cost of printing, and the printing trade's internal affairs, receive frequent notice in the daily and periodical Press, and we believe that the producers of printed matter are no whit behind other workpeople in the avidity with which they utilise the printers' finished product.

### Paper Imports.

LAST month's imports of paper, etc., into the United Kingdom were over 63 per cent. under those for July of last year, the respective totals being 522,724 cwts. and 1,424,768 cwts. The reduction in boards, wrappings and printings was very pronounced. Of the comparative total decrease last month of 902,044 cwts., printings were responsible for 195,912 cwts., wrappings for 253,116 cwts., boards for 426,376 cwts., and coated papers for 15,146 cwts. The total value of last month's imports was £928,533, a drop of £2,524,081, or 73 per cent. as compared with July of last year. The total imports for the seven months ended July amount to 3,249,020 cwts. of the value of £6,707,342, decreases of 61 1/2 per cent. in quantity and 62 per cent. in value as compared with the corresponding period of last year.

MR. W. S. DROMGOOLE, of Liverpool, partner of the firm of Dromgoole and Co., newspaper proprietors, aged 55, left £3,319.

## Personal.

LORD AND LADY SOUTHWARK have celebrated their golden wedding, having been married on August 10th, 1871, and they received many congratulations.

His Lordship, who is head of the printing firm of Sir Joseph Causton and Sons, sat for many years in the House of Commons, first for Colchester, and afterwards for West Southwark. He was a Lord of the Treasury in 1892-5, and Paymaster-General 1905-10. Lord Southwark is well known in the City, where he has been president of the London Chamber of Commerce.

LORD DALZIEL was entertained at dinner at the House of Commons last week by his Parliamentary friends, irrespective of party, in recognition of his long service as M.P. for Kirkcaldy, and his prominence as an active private member, from his first election in 1892 down to his retirement this year.

THE King has authorised Sir Davison Dalziel, Bart., M.P., the founder of Dalziel's News Agency, to wear the Cross of "Officier" of the Legion of Honour conferred upon him by the President of the French Republic for services rendered to France during the war.

MANY friends of Sir William Sutherland, M.P.—among them Lord Dalziel, Sir William Berry, and Mr. G. H. Roberts, M.P.—met on Tuesday at the Hotel Russell to entertain him at dinner in celebration of his forthcoming marriage, which takes place next week.

MR. FRANK BIRD, whose retirement at the end of the year from the secretaryship of the Newspaper Society is announced, recently completed fifty-one years of active business life.

HE is a veteran master printer, having taken part in the 1896 meetings from which originated the Federation of Master Printers, and having been for years the secretary first of the Bradford, and later of the Manchester Master Printers' Association. His work for the Newspaper Society during the past six years has been very successful.

THE marriage took place on the 9th inst. of Mr. Raymond Heath, nephew of Mr. J. Dunbar Heath, managing director of Perkins, Bacon and Co., Ltd., the postage stamp and bank note engravers of Southwark, to Miss Vera Greatrex, of Hatfield Broad Oak, Essex.

MR. RAYMOND HEATH, who is a skilled mechanic, has recently entered the firm to take charge of the new machinery which it has been found necessary to instal owing to the large increase of business.

MR. G. J. GRAY, who has been for over 45 years with Messrs. Bowes and Bowes, well-known Cambridge booksellers, has been made the recipient, on the occasion of his marriage, of a handsome silver watch from members of the staff.

MR. GRAY has just earned the gratitude of those interested in the early history of printing by publishing, through his firm, a very useful booklet on "John Siberch, the First Cambridge Printer, 1521—1522."

MR. W. A. FOSTER, of Messrs. Jarvis and Foster, Bangor, one of the founders of the well-known Bangor Golf Club, has been given a beautiful gold watch by the club members on relinquishing, owing to ill-health, the hon. secretaryship of the club, an appointment he held for many years.

MR. J. L. GARVIN, editor of the *Observer*, was married on Monday at Hampstead to Mrs. Woods, eldest daughter of Mrs. Harry Taylor and of the late Captain Harry Taylor, King's Messenger.

MR. W. C. SMART, the newspaper manager of Messrs. W. H. Smith and Son, this year completes fifty years' service with that famous firm.

MR. FREDK. LEE, of Faversham, Kent, formerly proprietor of the *Todmorden Advertiser*, Todmorden, near Manchester, has celebrated his golden wedding.

MR. A. E. DENT is visiting the United States on a tour of technical investigation, having just completed a term of service as manager to Dalziel Foundry, Ltd.

## Standardisation of Paper.

### Discussion to be Resumed.

MR. W. Howard Hazell writes us under date August 13th, saying that he notices with interest the further correspondence in our pages on the question of the standardisation of paper, which shows that the Association of Wholesale Stationers and Paper Merchants are willing to reconsider the matter, and attempt to arrive at an agreement. He proposes, he says, as soon as the holiday season is over to approach the various associations interested, and to renew the discussion, in the hope that an agreement may be reached shortly.

FOR assaulting a nurse, and also Sir Robert Bruce, editor of the *Glasgow Herald*, who came to her assistance, a man named McNeil was fined £5 at Ayr on Tuesday.

M. and Miss Margaret A. Joyce, Stogursey, Somerset, and Mrs. M. L. Parsons, 45, Listria-park, Stoke Newington, N.

UNIVERSAL BUSINESS AGENCIES, LTD. (general merchants, publishers, printers, etc., London).—Issue on July 29th, 1921, of £200 debentures, part of a series already registered.

KIDDERMINSTER BILLPOSTING CO., LTD.—Satisfaction in full on June 23rd, 1921, of mortgage dated July 18th, 1912, securing £225.

### BANKRUPTCIES, etc.

**Re ALEXANDER MACDONALD**, Printers' Agent, 3, Finsbury-square, E.C.—The public examination of this debtor was held on August 9th, before Mr. Registrar Mellor at the London Bankruptcy Court, the accounts showing liabilities £616 and assets, "furniture £5." Questioned by Mr. F. T. Garton, Official Receiver, the debtor stated that he commenced businesses above in March, 1920, being allowed the use of his father's office at 3, Finsbury-square; the business consisted of obtaining printing orders and getting them executed; he made very little profit on the orders and had been mainly dependent upon his father. His failure was caused by the slump which set in last September and by lack of capital. The examination was concluded.

**Re SHIRLEY ANGUS EGERTON HINE**, wholesale and retail stationer, 133-6, High Holborn, 384, Essex-road, Islington, and late of 125, Anerley-road, S.E.—The first meeting of creditors under this failure was held on August 3rd at the London Bankruptcy Court. Mr. F. T. Garton, official receiver, reported that the debtor had stated that upon being demobilised in 1920, he purchased the business of Tonelly Radfirth, which was carried on at 133, High Holborn. The purchase price of the business was £800, and he paid £400 on account, the balance being still owing. In August, 1920, he bought a stationer's business at 384, Essex-road, for about £400, and in September, 1920, he purchased a stationer's business at 125, Anerley-road, S.E., for £700. About that time Commander Chamberlain agreed to advance him £2,000 at 10 per cent. interest, in order that he could extend his business, and that amount was still owing. In June last he sold the Anerley business for £750 and used that money in paying pressing creditors. He paid a deposit of £262 10s. on the purchase of a commercial motor car which he intended to use in his business. The purchase price of the motor was £1,050, payable by instalments spread over 18 months. His object in buying that car was to be able to sell in remote places and avoid railway charges. About the middle of June last a creditor commenced pressing him, and on the advice of Mr. Willmott he called a meeting of his creditors on July 15th, when a statement of affairs was presented showing unsecured liabilities £5,244 17s. 6d and assets £1,562 4s. The debtor was unable to make any offer of composition to the meeting and on the advice of his solicitor he filed his petition. He attributed his failure to inexperience in business, and the existing abnormal condi-

tions. Mr. Willmott, C.A., 14, Old Jewry-chambers, E.C., was elected trustee, with the following committee of inspection: Mr. A. R. Iago (J. Dickinson and Co., Ltd.), J. W. Neale and Commander Chamberlain.

## Gazette.

### A WORD OF CAUTION.

In giving the official Gazette information, it must be distinctly understood that we take official records as we find them, and accept no responsibility for inaccuracies, while, as an almost invariable rule, the facts will be found correct. We advise our readers, before forming hasty judgment, to consider that there may be in each case satisfactory explanation which does not appear on the records.—Ed.]

### ENGLAND AND WALES.

#### PARTNERSHIP DISSOLVED.

Charles Cox and Walter Sharland, printers, 150, High-street, Southampton.

#### THE BANKRUPTCY ACT, 1914.

##### RECEIVING ORDERS.

Harry Gospel, 1a and 3a, Bland's Cliff, Scarborough, picture post card dealer. August 10th.

Arthur Howell, 16, Ducie-avenue, Whitworth Park, Manchester, letterpress and lithographic printer. August 12th.

## Openings for British Trade, etc.

Inquiries have been received by the Department of Overseas Trade (Development and Intelligence), 35, Old Queen-street, London, S.W.1, to whom further inquiries should be addressed with the reference number quoted.

### AUSTRALIA.

A well-known Sydney firm desire to obtain the representation of U.K. manufacturers of gold, silver and aluminium leaf, wall-paper, etc., for the whole of Australia on a commission basis. (Reference No. 87.)

A firm in Sydney, who have had considerable experience with wholesale and indent firms, desire to undertake the representation of United Kingdom manufacturers of paper, boxboards and wall-paper for the whole of Australia, upon a commission basis. (Reference No. 102.)

### SOUTH AFRICA.

A Cape Town business man, at present in this country, desires to obtain the representation of United Kingdom manufacturers of stationery, wrapping paper, etc., for South Africa. (Reference No. 109.)

THE death has occurred of Mr. Frank Evans, for many years a member of the law reporting staff of *The Times*.

A BRITISH Consul in South America says local trade opinion is that British manufacturers and exporters should, as soon as possible, adopt the metric system of weights and measures. Brazil is a very large country, making rapid strides towards national development, and in the past she has been content to tolerate English weights and measures because she was in need of our products. Together with her own internal development,

in which the metric system is a concomitant part, Brazil has now other countries for her custom, and they have adopted her system.

MR. THOMAS PERCY, of Hill-Top-avenue Cheadle, Hulme, Cheshire, founder and late chairman of Percy Brothers, Ltd., the Hotspur Press, Manchester, left £16,299.

ELECTRIC trucks are used in Japanese paper mills for transporting bales of paper.

**PAPER STRIKE IN NEWFOUNDLAND SETTLED.**  
 —The employees of the Anglo-Newfoundland Development Company's Paper Mills, who have been on strike since May 1st, on Saturday accepted the company's terms with slight modifications, and resumed work on Monday. The settlement affects about 2,000 men, who will be subject to a wage reduction averaging 20 per cent.

NOTICE is given by the Patent Office of an application having been received for the restoration of an expired patent, entitled "Improvements in and relating to paper, or the like, for wrapping or parcelling sweet-meats or other suitable foodstuffs."

A DUTY of 30 per cent. *ad val.* is imposed in the United States on hats composed of tissue paper.

## Proposed U.S.A. Customs Tariff.

The following is Schedule 13, dealing with with Paper, etc., of the Bill for the revision of the United States Customs Tariff, which has passed the House of Representatives, and is now under consideration in the Senate:—

### Paper and Books.

PAR. 1301. Printing paper, not specially provided for, one-fourth of 1 cent per pound and 10 per cent. *ad valorem*: *Provided*, That if any country, dependency, province, or other subdivision of government shall forbid or restrict in any way the exportation of (whether by law, order, regulation, contractual relation, or otherwise, directly or indirectly), or impose any export duty, export licence fee, or other export charge of any kind whatsoever (whether in the form of additional charge or licence fee or otherwise) upon printing paper, wood pulp, or wood for use in the manufacture of wood pulp, the President may enter into negotiations with such country, dependency, province, or other subdivision of government to secure the removal of such prohibition, restriction, export duty, or other export charge, and if it is not removed he may, by proclamation, declare such failure of negotiations, setting forth the facts. Thereupon, and until such prohibition, restriction, export duty, or other export charge is removed, there shall be imposed upon printing paper provided for in this paragraph, when imported either directly or indirectly from such country, dependency, province, or other subdivision of government, an additional duty of 10 per cent. *ad valorem* and in addition thereto an amount equal to the highest export duty or other export charge imposed by such country, dependency, province, or other subdivision of government, upon either an equal amount of printing paper or an amount of wood pulp or wood for use in the manufacture of wood pulp necessary to manufacture such printing paper

### Paper Board.

PAR. 1302. Paper board and pulpboard, including cardboard and leather board or compress leather, not laminated, glazed, coated, lined, embossed, printed, decorated or ornamented in any manner, nor cut into shapes for boxes or other articles and not specially provided for, 10 per cent. *ad valorem*: *Provided*, That for the purposes of this Act any of the foregoing less than one-thousandths of an inch in thickness shall be deemed to be paper; sheathing paper, roofing paper, deadening felt, sheathing felt, roofing felt, or felt roofing, whether or not saturated or coated, 10 per cent. *ad valorem*.

PAR. 1303. Filter masse or filter stock, composed wholly or in part of wood pulp, wood flour, cotton or other vegetable fibre, 1½ cents per pound and 15 per cent. *ad valorem*; indurated fibre ware, masks composed of paper pulp or papier maché, manufactures of

pulp, and manufactures of papier maché not specially provided for, 23 per cent. *ad valorem*.

PAR. 1304. Papers commonly known as tissue paper, stereotype paper, and copying paper and all papers not specially provided for in this section, weighing not over 8 pounds to the ream of 480 sheets on the basis of 20 by 30 inches, and whether in reams or any other form, 6 cents per pound and 15 per cent. *ad valorem*; if weighing over 8 pounds and less than 12½ pounds to the ream, 5 cents per pound and 15 per cent. *ad valorem*; crepe paper 6 cents per pound and 15 per cent. *ad valorem*: *Provided*, That no article composed wholly or in chief value of one or more of the papers specified in this paragraph shall pay a less rate of duty than that imposed upon the component paper of chief value of which such article is made.

PAR. 1305. Papers with coated surface or surfaces, not specially provided for, 5 cents per pound; papers with coated surface or surfaces, embossed or printed otherwise than lithographically, and papers wholly or partly covered with metal or its solutions (except as herein provided), or with gelatin or flock, 5 cents per pound and 15 per cent. *ad valorem*, papers, including wrapping paper, with the surface or surfaces wholly or partly decorated or covered with a design, fancy effect, pattern or character, except designs, fancy effects, patterns or characters produced on a paper machine without attachments or produced by lithographic process, 4½ cents per pound, and in addition thereto, if embossed, or printed otherwise than lithographically, or wholly or partly covered with metal or its solutions, or with gelatin or flock, 17 per cent. *ad valorem*: *Provided*, That paper wholly or partly covered with metal or its solutions, and weighing less than 15 pounds per ream of 480 sheets, on the basis of 20 by 25 inches, shall pay a duty of 5 cents per pound and 17 per cent. *ad valorem*; gummed papers, including decalcomania paper not printed, 5 cents per pound; cloth lined or reinforced paper, 5 cents per pound and 17 per cent. *ad valorem*; papers with paraffin or wax-coated surface or surfaces, vegetable parchment paper, grease-proof and imitation parchment papers which have been super-calendered and rendered transparent or partially so, by whatever name known, all other grease proof and imitation parchment paper not specially provided for, by whatever name known, 3 cents per pound and 13 per cent. *ad valorem*; bags, printed matter other than lithographic, and all other articles, composed wholly or in chief value of any of the foregoing papers, not specially provided for, and all boxes of paper or papier maché or wood covered or lined with any of the foregoing papers or lithographed paper, or covered or lined with cotton or other vegetable fibre, 5 cents per pound and 20 per cent. *ad valorem*; plain basic paper for albumenising, sensitising, baryta coating, or for photographic or solar printing processes 3 cents per pound and 15 per cent. *ad valorem*; albumenised or sensitised paper or paper otherwise surface coated for photographic purposes, 3 cents per pound and 20 per cent. *ad valorem*;

wet transfer paper or paper prepared wholly with glycerine or glycerine combined with other materials, containing the imprints taken from lithographic plates, 30 per cent *ad valorem*.

### Letter Paper.

PAR. 1307. Writing, letter, note, drawing, hand-made paper and paper commercially known as hand-made paper and machine hand-made paper, japan paper and imitation japan paper by whatever name known, and ledger, bond, record, tablet, typewriter, manifold and onion-skin and imitation onion-skin paper, bristol board of the kinds made on a Fourdrinier machine, calendered or uncalendered, 3 cents per pound and 15 per cent. *ad valorem*; but if any of the foregoing is ruled, bordered, embossed, printed, lined, or decorated in any manner, other than by lithographic process, it shall pay 10 per cent. *ad valorem* in addition to the foregoing rates.

PAR. 1308. Paper envelopes not specially provided for, folded or flat, if plain, shall pay the same rate of duty as the paper from which made and 5 per cent. *ad valorem*; if bordered, embossed, printed, tinted, decorated, or lined, 10 per cent. *ad valorem* in addition to the foregoing rates.

PAR. 1309. Jacquard designs on ruled paper, or cut on Jacquard cards, and parts of such designs, 23 per cent. *ad valorem*; hanging paper, not printed, lithographed, dyed, or coloured, 10 per cent. *ad valorem*; paper-hangings with paper back or composed wholly or in chief value of paper, not printed, lithographed, dyed, or coloured, 5 cents per pound; printed, lithographed, dyed, or coloured, 20 per cent. *ad valorem*; wrapping paper, not specially provided for, 23 per cent. *ad valorem*; blotting paper, 2 cents per pound and 10 per cent. *ad valorem*; filtering paper, 5 cents per pound and 15 per cent. *ad valorem*; paper not specially provided for, 23 per cent. *ad valorem*.

### Standard News-Print Paper.

PAR. 1658. Standard news-print paper: *Provided*, That whenever the President shall ascertain as a fact that any country, dependency, province, or other sub-division of Government forbids or restricts in any way (whether by law, order, regulation, contractual relation, or otherwise, directly or indirectly) the exportation of, or imposes any export duty, export licence fee, or other export charge of any kind whatever, either directly or indirectly (whether in the form of additional charge or licence fee, or otherwise), upon printing paper, wood pulp, or wood for use in the manufacture of wood pulp, he may by proclamation declare such ascertainment setting forth the facts; whereupon, and until said proclamation shall be revoked, there shall be levied, collected, and paid upon standard news-print paper, when imported either directly or indirectly from such country, dependency, province, or other sub-division of Government, a duty of 10 per cent. *ad valorem*, and, in addition, thereto, an amount equal to the highest export duty or other export charge imposed by such country, dependency,

province, or other sub-division of Government, upon either an equal amount of printing paper or an amount of wood pulp or wood for use in the manufacture of wood pulp necessary to manufacture such printing paper.

Replies to Box Nos. to be addressed to the Offices,  
"BRITISH AND COLONIAL PRINTER AND STATIONER," 58, SHOE LANE, LONDON, E.C.4.

## SPECIAL PREPAID ADVERTISEMENTS

SITUATIONS VACANT, REPRESENTATIVES or MANAGERS REQUIRING POSITIONS, AGENCIES, BUSINESSES WANTED or FOR DISPOSAL, MACHINERY and MISCELLANEOUS.—Charges for Advertisements of the above class are Three Shillings for 21 Words or under; One Shilling extra for every line or portion after. Seven words to be reckoned for each line.

SITUATIONS WANTED.—Special Rate for Operatives only: One Shilling and Sixpence for Twenty-One Words and One Penny per Word after. Minimum charge One Shilling and Sixpence. Cash to be sent with order.

Telegrams: STONHILL, FLEET, LONDON.  
Telephone: No. 8407 CITY.

## Situations Wanted.

APPOINTMENT required; experience includes Statistics, Graphs, Trading Accounts, Installation and working of Costing System as advocated by Master Printers Federation.—Write Box 13844.

PRINTING TRADE.—ASSISTANT MANAGER or OVERSEER seeks situation, home or abroad; thorough knowledge; willing worker; good testimonials (last Government); teetotaler; ex-service man.—Betty, 23, Springfield-place, Wellington, Somerset 13845

## Miscellaneous.

WASTE PAPER: ITS RECOVERY AND RE-MANUFACTURE. By James Strachan. A Fund of Information; price 12s. 6d.—Stonhill and Gillis, Publishers, 58, Shoe Lane, London, E.C.4.

## METROPOLITAN BOROUGH OF LAMBETH.

### Printing and Stationery.

THE LAMBETH BOROUGH COUNCIL invites Tenders for Printing and Stationery, for the period of three years from the 1st October, 1921, as follows:—

- Rating Department Printing.
- General Printing.
- Stationery.
- Books and Bookbinding.

Tender forms, particulars and conditions, may be obtained from the undersigned. Sealed Tenders are to be delivered not later than Twelve o'clock noon on Thursday, the 1st September, 1921.

BRUCE PENNY,  
Town Clerk.

Lambeth Town Hall,  
Brixton Hill, S.W.2.

"PRINTING FOR BUSINESS," by Joseph Thorp.  
London: John Hogg, Paternoster-row. Pp.  
180 + xii.; 9 in. x 5½ in. Price 10s. 6d. net.

We are in receipt of a copy of this book, which is not intended so much for the use of the practical printer as for those who have to avail themselves of his services. The ignorance prevailing among users of printed matter as to the conditions under which the work is done in the printing office is often the cause of much unnecessary worry and trouble to the printer who has to deal with copy given him which has been prepared by some one ignorant of the technical requirements of the job in hand, whether it be a circular, a booklet, or a bound volume. Mr. Thorp has written his book with a view to the instruction of these non-technical people, and for their benefit goes over the entire field of printing in a clear and succinct manner that will enable the merest novice to understand the conditions under which the printer works, giving him a knowledge of paper and type, machines, the various engraving processes and other matters that go to the production of the finished piece of printed work. The routine of the composing room is dealt with at length, and the formation of types described, as well as their composition, and the printing section as represented by the machine room is so well set forth that the details should be easily grasped by anyone. The various methods of illustration are dealt with, and many practical examples given. In this connection, it may be remarked, it often happens that the customer cannot understand why so much time has to be spent in making-ready a process block. Here Mr. Thorp shows two identical blocks side by side, one untouched, the other properly made ready, and this example makes plain at a glance the great difference in the results obtained. Sound instructions are given as to the preparation of copy, the reading of proofs, the writing of advertisements, the choice of type and what to avoid, and there are useful tables and calculations that are of a serviceable character. The book is profusely illustrated with diagrams and examples to illustrate the text, and is so clearly written that its contents may be easily grasped by the business man who is in want of knowledge about his printing orders. We have but one little grumble about it; in the illustration showing a compositor at work the upper case has a division too few in its width and one too many in the depth. Mr. Thorp is not a practical printer, but has an extensive knowledge of the practical side of the business and an amateur's love for the craft with which he is closely connected, he being printing consultant to Messrs. W. H. Smith and Son. The book is dedicated to Mr. Emery Walker as a pioneer of the printing revival in Europe and America.

LETTERING: A HANDBOOK FOR ARTISTS, ARCHITECTS, DESIGNERS, SIGNWRITERS AND CRAFTSMEN. By Arthur E. Payne. A.R.C.A. Lond. B. T. Batsford, Ltd., 94, High Holborn, London. Crown quarto, 46 pp., paper wrapper. Price 3s. 6d. net.

The examples of lettering included in this book are of those forms which the author, in fifteen years' teaching experience, has found to be in constant demand. Short courses of lettering instruction to craftsmen, says the author, often compel a teacher to restrict his examples to the plain essential types. It is usually found that few of such students can, at first, find practical value in the use of, or even discriminate between, the historic examples. The author has therefore presented in this book a series of forms which he thinks are likely to be of the most practical value to the craftsman to whom a knowledge of plain lettering of good design is essential.

We think the author has shown good taste, as well as the wisdom that comes of experience, in the compilation of this volume, which contains twenty whole-page plates, in which an extensive variety of complete alphabets are included, with capitals, lower case letters, numerals, etc., supplemented by many practical diagrams of instructions which greatly simplify the methods of constructing the forms shown. Examples of excellent roman capitals, thin line alphabets, block letters, "Gothic" alphabets and italic alphabets are included, with variations of style. Considerable attention is devoted to the correct spacing of letters, words and sentences, with practical examples in each case. Display work also receives a brief consideration.

Accompanying the illustrations are twenty pages of sound instruction, written in a plain and practical manner, which simplify the art of drawing letters and numerals of good design.

Students of printing, as well as artists, architects, designers, signwriters and other craftsmen will find this volume very useful both as a text book and as a work of reference.

THE Export Association of Finland has issued a volume under the title of "Finland's Export Register, 1921," which will be very useful to all who have already or desire to cultivate commercial relations with that country. The work, which is neatly printed and arranged, sets out the articles of export and import in alphabetical lists and the names and addresses of Finnish firms at home and abroad. Sale price is Fmk 75 ex-Finland.

In an action by Messrs. W. V. Bowater and Sons, Ltd., against Messrs. Winturn and Clark, paper agents, of Fleet-street, a claim was made for £28 for two tons of white newspaper. As pointed out by plaintiffs' counsel, an extraordinary affidavit was put in by the defendants to the effect that the plaintiffs had only delivered one ton of paper, and leave to defend was given in consequence. His Honour Judge Atherley-Jones found for the plaintiffs, and awarded High Court costs.

## New Inventions.

### Cylinder Printing Machines.

Mr. D. T. Powell has patented an invention in which the main frame 2 of a cylinder printing machine of the one or two revolution type is constructed as a single steel casting, instead of being composed of separate side frames and cross pieces bolted together, and is mounted on a cast-iron base 1. The bowl rails 3, 4, 5, 6 are also parts of the frame casting, and the standards for the cylinder 7 may be cast with the frame. The type bed 8, also of cast steel, is cored and bridged for lightness, and is planed flat on both sides 9, 10. The main driving shaft 17, carrying the gear 13 actuating the gear train for driving the cylinder and the wheel 18 for reciprocating the bed, and a gear 20 for driving a sub-shaft 22, are fitted to a casting 11, which is readily removable in case of breakdown or for renewal of these parts. The train of gears 14, 15, 16, actuating the cylinder driving wheel 12 is fitted inside the main frame, the gear wheel

16 being supported in a swing frame 15<sup>a</sup> to keep it in mesh when the cylinder 7 is tripped. The inking apparatus preferred comprises the inking rollers 37 supported in brackets 29 linked at 42 to an aluminium or light metal frame 32 hinged at 35, and a continuously rotating distributing drum A with distributing rollers 40, 41, always in contact therewith, the distributing drum and rollers being carried by a rising and falling frame 26 so as to make contact with the ink table 40<sup>a</sup> as it comes beneath them in one direction of its traverse only. Forks 37<sup>a</sup> supporting the inkers 37 are adjustable by means of eccentric tubes 30 within split sockets on the brackets 29 to vary the contact of the inkers 37 with riders 36, and

by means of eccentric disks 31 to vary the contact of the inkers with the form. The distributing drum A is rotated in one direction by means of a chain or band drive from the shaft 22, and the frame 26 carrying the distributing drum and rollers is raised or lowered by a rod 23 jointed to a pivoted lever 24 which is actuated by a cam on the shaft 22. The printed sheets are taken from the strippers 33 and deposited on the delivery board 45 by a series of grippers carried and moved backwards and forwards by the jointed parallel motion device 44. This delivery mechanism is attached

to a bracket 45<sup>a</sup>, and is operated by a pinion 47 and rack bar 46 jointed to a lever 25 actuated by a cam on the shaft 22.

### Multi-Coloured Pictures.

An invention by the Soc. Anon. per la Fotographia Autopanomatica is intended to secure correct register of a plurality of single colour partial pictures for the purpose of making a multi-coloured picture on paper, expansion or contraction of the picture receiving paper is prevented by sticking it on a non-extensible support, such as metal, glass, celluloid, etc., before the partial pictures are applied, the paper being removed from the support when the multi-colour picture is complete. The adhesive may be applied to the support and the paper then stuck on, or it may be applied to the back of the paper, in which case it is dried off and moistened just before sticking on the support in order to prevent creasing. To avoid the soaking necessary to remove the finished picture from the support, which might cause damage to the picture, the surface of the glass, metal, etc., support may be coated before applying the paper with talc, collodion, celluloid, wax,

india-rubber, oxgall, etc., to diminish the adhesion of the adhesive thereto, so that the paper may be readily drawn off when the adhesive is dry, or a non-drying adhesive may be used. The pictures may be produced by printing off, by absorption, by transfer, or photo-mechanically.

### Feeding Sheets.

In an invention patented by Messrs. Ritchie and Son, Ltd., and J. Cullen piles of sheets of cardboard, millboard, etc., are fed to the pile tables of box-making, printing, or other machines by mechanism comprising carrier chains of the usual kind and in conjunction with these chains are arranged rollers which can be moved to a position above the level of the chains to enable a pile support to be manipulated easily to position the pile on the chains, the rollers then being lowered to permit the chains to forward the pile into correct position on the pile table. The invention is described in connection with an elevator of the kind described in Specification 161,430 for raising the pile and its support from ground level to the level of the table on which the

chains and rollers referred to above are arranged. The rollers A are mounted on shafts M carried by cranks O, which, when in the position shown in Fig. 5, are above the chains B, and the pile support C can then be readily moved from the elevator over a fixed roller O on to the rollers A. When the pile is correctly positioned, the cranks D are moved to lower the rollers A by means of a rod P attached to a slide H which is guided by horizontal slots L and pins K, and is fitted with vertical slots L' which operate the cranks. The chains B then move the pile to the desired position on the pile table.

### Photo-Mechanical Printing.

In an invention by Mr. H. Kuhn the process described in the parent specification is applied to etching processes by hand or power press engraving. No normal exposure is used but two layers are used in printing or previously in the negative process, one under exposed and the other over exposed, and they are printed one over the other in the same colour. The covering error is avoided in that in the long print the grain of the shades is intentionally thrown over or made to print blind, either in the original etching of the copper layer or by after etching. In the long print the shades then appear grey and are capable of showing clearly the shade detail brought out in the short print.

### Rotary Delivery Apparatus.

Messrs. E. Stott and Dawson and Sons, Ltd., have patented an invention that relates to delivery apparatus for rotary printing machines having the usual grippers mounted on chains, etc., for taking the printed sheets from the impression cylinder, comprising a number of moving platforms carried by endless chains and adapted to receive the sheets from the grippers, said platforms being spaced apart so that the sheets can be deposited therefrom alternately, or successively on to receiving boards at different points, or on to transverse delivery carriages. The printed sheets, taken

from the impression cylinder B by grippers on the chains D, are received on platforms carried by endless chains E, F, G, H, and pushed therefrom by projecting fingers on shafts J, L, N, so that they are deposited alternately on to a plurality of receiving boards, three in the arrangement shown. Instead of providing fixed receiving boards under the platforms, the sheets may be dropped on to carriages K, M, O, on which are mounted rollers with endless tapes, etc., and which are geared to travel laterally at the proper times to deliver the sheets to trays P, Q, R.

# Standardisation of Paper.

A Pressing Need for the Printing  
Trade and How it Could be Met.

By W. HOWARD HAZELL.

One of the greatest difficulties of printers at the present time is the high cost of production, and anything that can reduce the cost will be of great advantage to all interested in the trade.

The present methods of handling and dealing in paper are full of anomalies, and are the growth of many generations, and the time has come when standardisation should be adopted. If sizes, names and weights are systematised, much less stock would have to be carried by wholesale stationers and others, and time would be saved and mistakes avoided in giving out and calculating the costs of paper. Thus, less capital would be employed, and time saved, which would reduce the cost of printing.

Standardisation on the point system has been adopted with type, and every printer is convinced of the great advantage as compared with older methods. Similar advantages would be obtained if the methods of dealing in paper could be standardised.

The following suggestions apply to paper, cards, boards, pasteboards, Bristol boards, etc., but exclude wrapping papers, straw-boards and millboards. The principal features of the scheme are :—

1. That all paper should be sold by weight per thousand sheets.
2. That standard sizes for papers usually kept in stock should be recognised throughout the trade.
3. That the use of a name for two different sizes of paper should be abandoned.

4. That standard weights should be adopted for the standard sizes.

The present method of selling paper by a ream containing a variable number of sheets, leads to the duplication of stock, endless enquiries as to the number of sheets, and the certainty of many mistakes being made. Printing papers are usually sold with 516 sheets to the ream, sometimes with 50cs. or 504s. Envelope papers have 508 sheets to the ream, and writing papers are sold with either 480, 500 or 504 sheets to the ream.

If a printer wishes to print a pamphlet or book on ordinary printing paper, he buys his reams containing 516 sheets, but the illustrations on art paper he inserts in the book are printed on paper which is sold with only 480 sheets to the ream. A stationer sells envelopes by the 1,000 or 100, and sells with them note-paper by the ream of 480 sheets, and thus sells articles that are to be used together in different numbers. In account books, letter books, etc., various methods are adopted. Letter books are usually sold according to the number of pages, and some account books are also sold by pages; but ledgers are usually sold according to the number of quires of paper, some of the sheets being pasted on to the cover or on to the endpapers, so that the customer has some difficulty in verifying the amount of paper. Pasteboards, etc., are sold in grosses, and are principally used for producing goods that are sold per 100 or per 1,000.

Printers nearly always receive orders and

issue their instructions in thousands, and their work would be very much simplified if the "thousand" were adopted as the unit for purchasing and giving out paper. For example, a printer requiring 775 sheets for a job now has to write the following details:—1, ream, 12 quires, 7 sheets double demy, 480's, 40 lbs. Under the new system with the standard weights (as explained later on) he would write, 775 double demy 80 (the number 80 is the number for the standard weight of paper). Paper could be packed in 1,000's, reams of 500's, 250's, or 100's according to the size or weight, but always in some decimal proportion of the "thousand" unit.

It has been suggested that paper should be supplied with a few sheets of "overs" in each package, in order to produce even quantities. It is impossible to find any number of sheets to a package that will satisfy all users. If a job consists of a long run of circulars printed on one side of the paper, probably 504 sheets to a ream would produce perfect 500's. If a job were printed on both sides, 504 sheets might not be sufficient. If, however, the job consists of only 1,000 copies, printed on both sides in two colours, it is evident that 504 sheets would not be nearly sufficient. As there is no number of sheets to a ream that would meet all these difficulties, it is far simpler to adopt a ream of 500 (which is the standard in America) and then to issue the overs that may be necessary according to the length of run and character of the work. It would be quite simple for each printer to establish a percentage of overs for the different classes of work; thus, common letterpress might require five or ten to the thousand; good quality work not exceeding 1,000 copies, 2 per cent. or twenty to the thousand; good quality two-colour work, 3 per cent. or thirty to the thousand. This method of giving out the amount of overs dependent on the quality of the work would undoubtedly be more economical than the present system of giving out reams with a variable number of sheets and expecting a fair number of overs; or in other cases, giving out reams containing a smaller quantity of sheets, and then using overs when required.

When the "thousand" is adopted as the unit, the quire of 24 sheets should be abandoned, and in its place 25 sheets could be adopted as the unit for smaller quantities than a ream. As 25 sheets would be the 40th part of a thousand, it would be easy to calculate the price of 25, and multiples of 25 will make even 100's, which is the quantity the printer works in; whereas quires of 24 sheets have not this advantage.

(To be continued.)

**PRINTING WORKS FIRE.**—Six men and a girl had a narrow escape from being burnt to death at Cardiff on Tuesday, when a fire broke out on the premises of the Quick Press Printing Co., and the seven occupants, including Mr. Edward Dobbins, the son of the proprietor, working on the top floor, had to dash through the flames in order to escape.

## Government Contracts.

Contracts were placed with the following firms during July:—

### Stationery Office.

PRINTING, RULING, BINDING, ETC.

18,500 Ships' Rotation Books, Account Book Binding, Division VI. (1921).—J. Rissen, Ltd., London, E.C.

12,500 Books, Marriage Certificate Forms, 500,000 Unemployment Insurance Forms, 12,300 Tablet Diaries.—J. Corah & Son, Loughborough.

7,500 Pads, Form P. 119, 50,000 Registry Jackets, Account Book Binding, Division VII. (1921).—Waterlow and Sons, Ltd., London, E.C.

Binding 4594 "Manual of Air Force Law."—Webb, Son and Co, Ltd., London, E.C.

Binding, 3,595 Pilot Books, 4,175 Naval Rate Books.—J. Adams, London, E.C.

Account Book Binding, Division V. (1921).—Barclay and Fry, Ltd., London, S.E.

50,000 Tally Books.—Pruie, Appleton and Co., Ltd., London, E.C.

250 "Tithe Apportionment" Covers.—W. Brendon and Son, Plymouth.

5,000,000 Forms for G.P.O.—H.M.S.O. Press, Harrow.

10,000,000 Forms, A/cs. 455.—J. Robertson and Co., Ltd., St. Annes-on-Sea.

10,000 Pads, Pensions Forms.—Alf. Harrison and Sons, Leeds.

10,000,000 Forms, A/cs. 455.—John Worrall, Oldham.

Binding 3,000 Books, "Electrical Measurements."—Woolnough and Sons, London, N.

100,000 Tax Forms.—Mackenzie and Storrie, Ltd., Leith.

4,000 Rough Note Books.—Willmott and Sons, Ltd., London, E.C.

Binding, 161 Army Record Books.—Tee and Whiten and J. Mead, Ltd., London, S.E.

500 Army Book 403.—Warrillows, Ltd., Birmingham.

600 Old Age Pensions Supplementary Registers.—McCorquodale and Co., Ltd., Wolverton, Bucks.

Bookwork Printing, Scotland, Group VII. (1921) Sec. C.—Lindsay and Co, Edinburgh.

6,525 Tablet Diaries.—J. E. C. Potter, Stamford, Lincs.

30,000 Books, Form Med. 40.—Bemrose and Sons, Ltd., Derby.

PRINTING SUNDRIES.—W. J. James, London, S.E.; Fry's Metal Foundry, London, S.E.; Hewitt, Bros., London, N.

THE reports of the three Committees engaged in special investigations on the staffing of Government offices were issued last Thursday as a White Paper (Cond. 1461, price 6d. net). The three departments reported upon are the Board of Trade, the Department of Overseas Trade, and the National Savings Committee. Important suggestions are made towards the greater economy and efficiency of the Board of Trade and the Department of Overseas Trade.

## The State of Employment.

In the paper, printing and bookbinding trades employment during July was still bad generally, but on the whole was slightly better than in the previous month. Short time continued to be worked in most districts.

The percentage of workpeople unemployed in the printing, publishing and bookbinding trades, as indicated by the employment books or out-of-work donation policies lodged at Employment Exchanges are stated by the *Labour Gazette* to have been 8·5 at 29th July, as compared with 9·5 at 24th June. In addition, 1·7 per cent. of the workpeople were claiming benefit in respect of short time working at 29th July, as compared with 4·2 per cent. at 24th June.

With letterpress printers employment continued slack but improved slightly on the previous month, less short time being worked. In the lithographic printing trade employment continued about the same as during June, and short time was prevalent. Returns received by the Ministry of Labour covering nearly 7,500 workpeople in the letterpress and lithographic printing trades showed that almost 42 per cent. of these workpeople were working on an average 11 hours per week short of full time.

Employment in the bookbinding trade continued bad, but showed an improvement generally and more particularly in London. Of about 3,850 bookbinders covered by returns received, over 58 per cent. were working short time to the average extent of 13 hours per week.

Of a total membership of 99,246 in printing, bookbinding and paper trade unions reporting to the Ministry of Labour, 7,384, or 7·4 per cent., were unemployed at the end of July, this being a decrease of 4·9 per cent. on the previous month but an increase of 6·4 on a year before.

**POSTAL RATES.**—It is announced that there is a probability that next spring the 1½d. postage rate for letters and the penny rate for post cards will be restored. This is in accordance with the intimations made to the master printers' recent deputation to the Postmaster-General. The P.M.G., we understand, promised to give the Master Printers' Federation early notification of any change proposed.

**A USE FOR PRINTERS' ERRORS.**—"It is a curious fact, says a writer in the *London Mercury*, "that the imperfections of human-kind, though in general they are frowned upon by the world, should, in their typographical reflex, be valued as things of great price. The reason is, of course, obvious, however queer the result may be, for misprints are usually the mark of the first issue of a book." Thus the real first issue of Goldsmith's "Vicar of Wakefield," two volumes, 12 mo., published at Salisbury in 1766, can be recognised by its having page 159 numbered in error 165 in the first volume, and the misprint "Waekchfield" on page 95 of the second.

## Trade Union Matters.

As THE result of statements made at the London delegate meeting of the National Society of Operative Printers and Assistants regarding the administration of that Society, a public debate is to be held between Mr. George Isaacs, the general secretary, and Mr. Smith of the Society; time and place to be arranged later.

THE Typographical Association ballot paper on the question of a 7s. 6d. reduction in wages was issued to the members last week-end. A circular accompanying the paper gave concise details of the negotiations that have transpired on the subject, concluding with the statement that "In conformity with the recommendation of the Joint Industrial Council the Executive Council submit the question to the decision of the members without any comment." The opinion of the membership is also asked on the question of paying a levy of 7s. 6d. per week to create a fund for lock-out purposes, which, if carried by the ballot, will commence immediately.

The quarterly report of the Leeds Branch of the Typographical Association states that the feature of the quarter has been the enormous amount of the unemployment and short time experienced. The short time record shows a shortage of 45,315 hours for the quarter, while the expenditure on account of the special branch unemployment fund—£742—exceeded the income by £285. The gross expenditure for the quarter reached £6,860, a record for the branch. The report adds that at present there is no sign of any improvement in trade, but it is hoped that the worst of the industrial depression has passed.

MR. E. J. P. BENN, C.B.E. (Messrs. Benn, Bros., Ltd.), recently returned from the United States as one of the delegates from the Industrial League and Council to the Civic Federation of America, is reported at some length in the current issue of the *Industrial League and Council Journal* on the subject of labour conditions in the two countries. Putting to Mr. Sam Gompers the question of whether America is fifty years behind us in matters of social reform, Mr. Benn was indignantly assured that the U.S.A. are a hundred years ahead of us. The true test of the success of a labour movement, said Mr. Gompers is not to be found in the violence of its political programme, but in the social and economic status of the workers.

THE printing of two morning dailies—the *Daily News* and *Daily Chronicle*—was among the night sights of London that attracted the interest of the 60 men and women who, guided by the Selborne Society, made an all-night tour of London last week.

## Thefts of Stereo Metal.

**Said to Amount to Several Thousands.**

Thefts of stereo metal running into several thousands of pounds' worth were alleged during the hearing of a case on Saturday in the Guildhall court.

Upon charges of stealing and receiving from Plough-court, Fetter-lane, 9 cwt. of hard stereo metal value £25, and during April five tons of metal value £300, the property of Dalziel's Foundry, Ltd., Wm. Hy. Pember, stereotyper, Tooting, in the service of the foundry, Charles Hill, 52, carman, of Hornsey-road, and Henry Caleb Peek, 38, metal merchant and cartage contractor, of Watterfield-road, Clapton, were remanded.

Detective Glasspool said he saw Pember wheel out of the foundry a truck laden with stereo metal. In Norwich-street he met Hill with a van. The stereo metal was transferred to the van and Hill and a boy drove away to Gray's-inn-road.

The officer said he followed them to Hoxton and there asked Hill what he had got in the van and where he was taking it. He replied, "Metal. I have got to take it to my governor's (Peek's) stable in Pitfield-street."

They went to the stable and Peek was seen. He made a statement. Detective-sergeant Johnston apprehended Pember, and he admitted that he had been stealing the metal for 12 months.

Alderman Jacobs agreed to accept two sureties of £200 each for Peek, one in £25 for Hill, and refused bail for Pember.

## Hand-Made Paper Exhibit.

Mr. Dard Hunter, whose interest in paper-making is world-wide and who is well known in this country, has got together an interesting exhibit of hand-made paper appliances which will form a permanent feature at the Smithsonian Institution in Washington. The exhibit occupies a case in the Division of Graphic Arts and represents examples of laid moulds of different sizes which have been used for making hand-made papers in old-established mills in Europe, moulds which have been used for forming the light and shade watermarked portraits and the different dies, etc., used in making these moulds. Many specimens of fine watermarks are shown, as well as the actual woven marks in metal on which the samples of paper were made. There are also specimens of paper with watermarks dating from the middle of the fifteenth century to the present, showing the different stages of developments that took place in the laid and wove moulds during that period. Deckle edges of all varieties are shown, also illustrations and photographs of old mill interiors, beating engines, etc.

## St. Bride Students' Work.

This year's "Portfolio" of the work of the students at St. Bride Foundation Printing School consists largely of that very creditable volume "St. Bride Students' Cake," to which we have previously referred—a volume which not only serves to show a high standard of excellence in letterpress work and in illustration by various processes, but which also is effecting the additional meritorious purpose of helping to raise the £600 which St. Bride Students have bravely set out to raise for the founding of a St. Bride Students' Printers' Pension as a memorial to those of their fellow students who made the supreme sacrifice in the Great War. We understand that well over £200 has been raised of this amount, but the greater part of the money has still to be obtained. A copy of the "Cake" goes to everyone who contributes not less than 10s. to the fund. The other specimen productions to hand are indicative of the comprehensive range of the instruction given, which is calculated to be an excellent practical preparation for meeting the actual condition of an up-to-date printing works. A striking example of high-light photographic offset printing is the School Calendar, very delicately reproducing a pencil sketch. Of the good workmanship of the brochure "A Brief Outline of the History of the Worshipful Company of Stationers," we have previously made mention, while other specimens are a window bill, the School "Chronicle" (printed in newspaper style), a linotype-set pamphlet reproducing last session's lectures, and a booklet "Souvenir of St. Bride School Dinner." In judging these specimens one is apt to forget that they do not purport to be the work of expert craftsmen, but only the efforts of students under expert supervision. They bear eloquent testimony to the capabilities of the St. Bride Printing School, whose next session commences on September 19th.

THE Printing and Allied Trades' Charity Sports Association will hold their annual gala at Shoreditch Baths on Saturday evening, August 27th. Two team championships will be decided (daily Press and general trade), in addition to a 33-yard gentlemen's open handicap and a 33-yard ladies' open handicap. Particulars can be obtained from the hon. secretary, Mr. A. G. Wills, 42, Heber-road, East Dulwich, S.E.

WHITEFRIARS PRESS SPORTS.—The annual athletic sports of the Whitefriars Press Club were held on Saturday, on the Angel County Cricket ground, Tonbridge. The 100 yards' handicap (members) was won by R. Knight. In the 100 yards open handicap F. Mortimer (Whitefriars Press) and E. J. Noakes (unattached) ran a dead heat, and tossed for prizes, Mortimer winning the spin of the coin. The 440 yards open handicap was won by S. Leigh (Tonbridge Invicta).

### The Docket in the Bindery.

SIR,—While conscious that I may be disturbing a hornet's nest by joining in the discussion on this question, I think it equitable to express the collective view of my Association.

The use of the docket in the bindery must be determined by the individual concern. Generally a large firm will be able to use it profitably on the longer runs of work available, while the small miscellaneous shop will invariably spend more time on the effort than is warranted.

It is not to be denied that the docket, coupled with the complete approved costing system, would tell the small binder exactly what covers his costs, at the same time the size of his bills would tell his customer also, and the latter might object to pay for the upkeep of such comparatively expensive clerical machinery to determine small charges with fractional accuracy.

Even in a large factory (and especially at the present slack time) workers may be given such a variety of odd jobs that they would either spend a considerable time making out a correct docket or group the tasks under that convenient term, "miscellaneous." The experience of the foreman or overseer would then be required to give the correct cost.

Given a fair-sized shop with a good run of work, however, the system becomes practical. The longer runs eliminate clerical work on the part of the craftsmen and the docket entries are few and less fictitious.

The introduction of machinery into the bindery tends to produce consistency in output. Complicated operations are now being performed by more complicated machinery, and tasks once considered impossible by other than hand labour are now fed into a machine as a matter of course, thus making the regularity of the performance more easily chargeable under the docket system.

Given an efficient overseer the true line of demarcation will be known, together with the utility or futility of the docket.

Yours, etc.,

GEO. A. EDEN,

General Secretary,

Printing, Bookbinding and Kindred  
Trades Overseers' Association.

London, August 23rd.

SIR,—As a member of the trade interested in the correspondence appearing in your journal on the question of the introduction into the bindery of the Costing System of the Federation of Master Printers, I am sorry to see that such well known exponents of varying opinions, Mr. Vick on the one hand and Mr. Harraway on the other, should have slipped into personalities in the discussion of

so important a subject. The task of securing a better system will not be made easier by the use of irrelevant cavilling.

If the system as propounded by the Federation is to bring benefit to the bookbinding section of the trade, let us have it. If by its general adoption it provides the means of exactly allocating the correct proportion of labour, material and expenses in order properly to price work executed in the binding department, then certainly one is entitled to postulate its utility as a medium of arriving at efficient cost-finding. If the system, on the other hand, does not provide these means, as some of its opponents assert, and is not applicable to the bindery—especially with miscellaneous work, because of the multiplicity of operations the binding of a book has to undergo, involving its being many times picked up and dropped in the course of the work—then it would seem that the best method to follow is the old one of leaving it to the efficient overseer, who knows from experience in giving out work how long approximately a job should take to execute, and is thereby qualified to estimate the actual cost of the job to the department under his control.

The solution of the whole question, therefore, lies with the experts—both among the costing specialists and the practical workers—who should be able to decide as to whether the system is applicable or not.

In regard to arguments sometimes put forward of the vindictive use of the docket against the men because of its possibilities of revealing minimum production, it must not be forgotten that in other departments of the trade, composing, machining, etc., the productive ability of each man is known from the records made on the daily or weekly timesheet, and it cannot be justly stated that unfair use has been made in the past of these records to any large extent.

Yours, etc.,

"FOREEDGE."

London, August 23rd.

GERMAN PRE-WAR DEBTS.—The attention of British subjects resident in this country who have pre-war debts owing to them from branches outside Germany of German undertakings whose head office is in Germany, is drawn to the fact that apart from their remedy against the branch, they may be entitled to claim payment alternatively from the Enemy Debts Clearing Office. In the event of their being any doubt as to recovery of such debts from the branch, British creditors will be well advised to file a claim against the head office with the Enemy Debts Clearing Office, Cornwall House, London, S.E.1. It is essential, however, that any such claims should be received by the Clearing Office before September 30th.

HERR HUGO STINNES, the German industrial magnate, is reported to have acquired the greatest publishing house at Zurich, and to intend to exercise a personal control over the publications issued from it.

# “SLOGGER”

## AUTOMATIC SHEET FEEDER

### Latest Improvements on the “SLOGGER.”

1. Aluminium Stroker Arms avoiding all bending.
2. More accessible Pile Raising Adjuster. Absolutely self-locking. No lock nuts to work loose.
3. Automatic side lay giving perfect register.
4. Fine thread Caliper Adjustment which immediately stops machine and feeder if two or more sheets are stuck
- 5, 6 & 7. Stopping, Starting and Trip Handles. All controls in one place.
8. Bevel Drive instead of Chain.
9. Fan for air draft mounted in one unit on Base of Feeder.
10. Leather collapsible joint to allow air-box movement without the use of perishable rubber.
11. Air throttle control adjusted in a few seconds for any thickness of paper or board
12. Pile Raising Handle for raising pile to starting height at the commencement of each loading.

### BRITISH THROUGHOUT.

**Perfect Automatic Register. No continual re-loading.**

## Trade Notes.

PRINTING and publishing companies increased their capital in July to the extent of £509,400.

THOMAS FENN, 32, printer's machine minder, of Sutton-dwellings, Rotherhithe, died at Bermondsey Hospital last week from tenanus consequent upon his being knocked down by a horse.

MR. JOSEPH DIXON was last week found dead in bed at his home at Wigan. Prior to his retirement from business eight years ago, he was for a long time foreman at the Wigan printing works of Messrs. Platt.

BRITISH INDUSTRIES FAIR.—Application forms were issued last week by the Department of Overseas Trade to firms desirous of being represented in the British Industries Fair at the White City, from February 27th to March 10th next.

THE new Leyton Urban District Council has provided 100 handsome diaries for its members. Three-quarters of the books are gilt-edged, and bound in scarlet morocco, with the name of each councillor embossed in gold letters on the cover. The cost is stated to be £105 8s.

PRINTERS' BISLEY.—The "miniature Bisley," organised by the Printing and Allied Trades' Charity Sports Association is to take place this year on September 3rd, on the ranges of the Wimbledon Park Rifle Club. An attractive list of competitions has again been arranged, and the number of entries indicates that interest in the meeting is well maintained.

WILLS.—Mr. Thomas Hooley, of Chesterfield, Mile-end-lane, Stockport, printer, £10,394; Mr. T. E. Gatehouse, Tulse Hill, Surrey, former editor of the *Electrical Review*, £23,345; Mr. A. P. Sinnett, Ladbroke-grove, W., formerly editor of the *Hong Kong Daily Press* and of the *Pioneer of India*, and at one time a leader writer on the *Standard*, later a vice-president of the Theosophical Society, £3,216; Mr. Frederick J. Grant (74), Burnley, interested in Lancashire cotton mills, paper works, and printing concerns (net personalty £27,804), £28,960.

"COMPS" VISIT HOP GARDENS.—By way of annual "wayzgoose," a charabanc ride to Halstead and a tour round the hop gardens was made by the composing staffs of the Victoria House Printing Co. and the Pelican Press, on Saturday. Headquarters were established at the Polhill Arms, Halstead, where the party played cricket, enjoyed country rambles, light luncheon, dinner and tea. The last-mentioned was under the chairmanship and vice-chairmanship of Messrs. Barrow and Baynes. The toast of "The Firm" was enthusiastically acknowledged, and the goodwill of the directors was expressed towards the employees. A very pleasant outing ended with a concert.

A PAPER bag was the vehicle of the will of a North London plumber who committed suicide last week.

A LONG queue of applicants embarrassed a Newcastle business man who advertised last week for a bill poster.

WIDESPREAD regret has been occasioned by the death of M. Ernest Daudet, the well-known French journalist and *littérateur*.

THE funeral of the late Mr. J. H. Walter, sub-editor on the staff of the *Newcastle Daily Journal*, took place at St. Andrew's Cemetery, Newcastle, on Friday.

"SUICIDE whilst of unsound mind" was the verdict at an inquest at Kilburn last week on William R. Stevens, law publisher, Chancery-lane, who, it was stated, had suffered from an internal complaint.

IN a forthcoming new monthly, *Art and Women*, women writers will deal with art, craft, decoration, literature, the theatre, music, philosophy and education.

MR. A. T. SIMMONS, who has died from pneumonia, aged 56, at his Kew home, was the joint editor of the *Journal of Education and School World*, as well as Inspector of Secondary Schools for the University of London.

NEWSPAPER compositors of Cork have received an increase in wages of 2s. a week as from July 8th, making rates after change—Morning news, case 102s. 6d., linotype 112s.; evening news, case 95s., linotype 102s. 6d.

THE North of Ireland Section of the Professional Golfers' Association decides its tournament in connection with the *News of the World* £750 Tournament to-day (Thursday) on the Donaghadee Course, Co. Down.

PRESIDING at the Motherwell Police Court on Saturday, Bailie Hugh Ferguson refused to convict a man charged with stealing Sunday morning papers. The Bailie remarked that so far as he was concerned, he would not convict anyone for taking away all the papers that came to Motherwell on a Sunday.

CENTRAL NEWS JUBILEE.—Over 100 members of the staff of the Central News Agency assembled on Saturday evening at dinner at the Connaught Rooms to celebrate the jubilee of the Agency. Mr. W. P. Forbes, the managing director, who presided, was presented with a gold cigarette case, cigarette holder, and match box, as a mark of appreciation and esteem from the staff. Mrs. Forbes was handed a basket of carnations and roses.

MR. DAVID WILLIAMS, printer and bookseller, Caroline-street, Bridgend, died suddenly on Wednesday. Mr. Williams had taken an active part in public life, and was extremely popular in and around Bridgend. In the early political contests in the Mid-Glamorgan division he played a leading part. He was a member of the South Wales branch of the Master Printers' Association. He leaves a widow and an only daughter, Miss Marjorie Williams, who served as a Red Cross nurse in France from 1914 onward. His son, Lieut. Stanley Williams, was killed while on active service.

THURSDAY, AUGUST 25, 1921.

## Current Topics.

### The Wages Ballot.

THE position with regard to the wages negotiations remains in much the same position as described in our last issue. The many unions concerned are balloting individually on the new proposals, and in few cases are the returns expected before to-day (Thursday). Announcement is made that the London Society of Machine Rulers has completed its ballot and the result is a rejection of the terms offered. It should be noted, however, that this society is not—as erroneously stated by the *Daily Herald*—a section of the National Union of Bookbinders, Machine Rulers and Paper Workers, but is a small independent union, and the result of their ballot gives no basis for judging which way the voting as a whole will go.

### Continental Competition.

THERE are rumours that printing orders of considerable magnitude are being placed on

the Continent by consumers in this country. We hear, for instance, that big consignments of paper bags have been ordered from Prague. Much is heard too of printing orders going to Belgium, and it seems clear that the Continental countries, including Germany, are losing no opportunity of reaping the advantages which are given them by the high costs in this country coupled with the depreciated exchanges over the Channel. The time calls urgently both for the cutting of costs on the part of British printers and for the loyal support of home industry by the buyers of printing.

### Paper: Wholesale and Retail.

THE Organisation Committee of the Master Printers' Federation are considering the question of direct trading between wholesale stationers and retail consumers. It is high time that some sort of understanding should be reached in regard to what is undoubtedly a fast growing practice. For long enough certain wholesale stationers and paper merchants have been in the habit of conducting desultory business with retail consumers, and although there are some cases in which the transactions are fair and legitimate, there are others in which ordinary business etiquette has been simply ignored. Now that automatic duplicating machinery is being installed in many commercial offices, and large customers are attempting to fill their own printing requirements, the question of direct trading is becoming acute. There are numerous examples of customers who, after having bought and printed their own paper, are calling upon the printer to supplement their work with some subsidiary process, as perforating or gum-tipping. This is distinctly lowering to the prestige and status of the trade, and wholesale paper merchants, whose turnover is made mainly by sales to the printer, should pause before giving a helping hand in the business. The houses of best repute set their faces resolutely against going behind the printer's back, and are appreciated accordingly. Those who have less regard for the interests of their best clients should give consideration to the fact that the Master Printers' Federation is among the very strongest organisations in the country, and if a boycott were arranged it would be carried out to its utmost limit.

### The U.S. Tariff.

THE export of British goods is likely to be very adversely affected by stringently protective tariffs under the consideration of various foreign countries. In recent issues we dealt with the United States tariff and also the new

draft customs tariff of Spain. The apparent object is to raise up a strong protective wall against competitive imports. The U.S. tariff—known as the Fordney Bill—introduces a valuation clause which reads as follows:—

... the word "value" wherever used in this Act or in any other law relating to the appraisement or the classification of imported merchandise shall mean the price on the date of exportation of the imported merchandise at which comparable and competitive products of the United States were ordinarily sold or freely offered for sale in the customary wrappings, coverings and containers, whether holding liquids or solids, to all purchasers in the ordinary course of trade, including all costs, charges and expenses, in the principal market, or markets, of the United States; or, when such value cannot be ascertained to the satisfaction of the appraising officer, shall mean the values of the imported merchandise on said date for sale (whether or not there shall be an actual sale) for consumption or use in the United States. . . . In determining the value for sale appraising officers may take into consideration, among other matters, the selling price or cost of production of comparable products of the United States and of articles made therefrom or from like imported materials. . . . keeping always in mind the legislative intention that duties *ad valorem* shall be assessed upon the fair market value of the imported merchandise in the United States.

In practice the effect of this definition will be to nullify, for the purpose of levying duties, any advantage of price which foreign goods may have over American products, and to cause duties to be levied upon imported goods, regardless of the invoice or f.o.b. price, at the value, at the date of export, of competitive American goods. As the rates of duty are, in nearly if not all cases, higher than those provided in the 1913 tariff—that now in force—the adoption of this American valuation will be an added burden of such weight as to render it in some cases almost and in others quite impossible for British exporters of competitive goods to continue to deal in the American market. Another important point is that in certain cases it will be necessary for the British manufacturers to give details of the composition of their products. The schedule relating to paper was given fully in our last issue. We learn, however, that certain amendments have been adopted, one of them being in connection with the paragraph on coated surface papers, striking out of that section the words "whether produced in the pulp or otherwise except," and inserted in lieu thereof "except designs, fancy effects, patterns, and characters produced on paper machines without attachments or produced." Also in connection with grease-proof and

imitation parchment paper, the duty of two cents per pound and 15 per cent. *ad valorem* was struck out and in lieu thereof the duty was made three cents per pound and 13 per cent. *ad valorem*. Also in connection with jacquard designs or ruled paper the following clause was inserted, "not printed, lithographed, dyed, or coloured." Another amendment in the paper board section inserted the following: "test or container boards of a bursting strength above 60 pounds per square inch by the Mullen or Webb test, 15 per cent. *ad valorem*." The U.S. tariff is causing anxiety to manufacturers in this country, and we anticipate that British trades affected will lose no time in bringing before the Government specific cases of hardship.

## Wages Ballot Results.

We learn at the moment of going to press (Wednesday), that the London Society of Compositors has rejected the employers' proposals by a majority of 6,081, the figures being: against acceptance, 8,496; for, 2,415. Though the ballot figures of the Printing Machine Managers' Trade Society and of the Society of Electrotypers and Stereotypers are not available, we hear that in both these cases also the majority vote is against the acceptance of the proposals submitted.

## Personal.

THE HON. WILLIAM BROOKES, president of the New South Wales Master Printers' Federation, visited London this week but has since left town for the Continent.

SIR JOHN JAMES BADDELEY is the senior of seven Aldermen eligible for election as Lord Mayor. Sir John has been a member of the Corporation since 1886, and succeeded Sir George Faudel-Phillips as Alderman of Farringdon Within Ward in 1912. He was Sheriff, in 1908-09, and was knighted during the visit of the late Tsar. Lady Baddely is, like her husband, a Justice of the Peace for the County of London.

DR. JOHN MACGREGOR, of Duke-street, W.1 honorary physician of the Newspaper Press Fund, is engaged to Mrs. Frank Horsell, of Leeds, widow of Mr. Frank Horsell, late head of the printing ink firm of Frank Horsell and Co., Ltd.

MR. J. H. SMITH, on retiring from the position of secretary of the Nuneaton Branch of the Typographical Society, has been presented by the branch with a gold-mounted fountain pen.

## DIVIDENDS AND REPORTS.

**RAPHAEL TUCK AND SONS, LTD.**—The trading of Raphael Tuck and Sons for the year to April 30th, after providing for bad debts, depreciation, etc., resulted in a profit of £47,364, against £62,955. After deducting directors' and managers' remuneration, £5,855, and adding the amount brought forward, £4,965, there remains £46,473. The directors propose a final dividend on the ordinary shares for the latter half of the year, at the rate of 10 per cent. per annum, making 10 per cent. for the year, against 12½ per cent. A sum of £2,586 is transferred to special dividend reserve, against £10,000, and £5,137 is carried forward.

**BENN BROTHERS.**—Profit of Benn Brothers for year to 30th June, 1921, was £24,836, plus £5,711 brought in, making £30,547, less directors' percentages £4,986, leaving £25,561. It is proposed to add £2,000 to general reserve, bringing account up to £8,000. Dividend of 15 per cent., less tax, on ordinary shares, carrying forward £8,453.

**KELLY'S DIRECTORIES.**—Report covering 12 months to end March last, shows that profit was £89,044, which, with amount brought forward, £32,714, makes £121,758. After provision for the preference dividend, directors recommend final dividend on ordinary, which, with interim paid in December, will make return of 10 per cent. for year, together with

bonus at rate of 5 per cent. on amounts paid up, and leaving £51,657 to be carried forward subject to excess profits duty and corporation profits tax for years ended March, 1920 and 1921. In March, 1920, bonus of 33½ per cent. was paid in fully-paid ordinary shares out of reserve, and in respect of 1919-20 dividends totalling 17½ per cent. were paid on present capital.

**BROMPTON PULP AND PAPER CO., LTD.**—This Canadian company has passed its quarterly dividend. Mr. F. N. McCrea, M.P., the president, says: "Although the earnings of the company have been satisfactory, the present disturbed financial and trade condition makes it inadvisable to deplete the cash resources of the company by the distribution of a dividend on the common stock."

## NEW ISSUE.

**WARRILLOWS, LTD.**—An issue of 50,000 ordinary shares of £1 each is shortly to be offered to shareholders of Warrillows, Ltd., in the proportion of one new share for every seven held. The new shares are offered at 21s. per share, payable 2s. 6d. on application, 8s. 6d. on allotment and 10s. on November 1st, 1921, and will rank for dividend as from July 1st, 1921. It is stated that negotiations are proceeding for a fusion of the interests of Thomas de la Rue and Co. and Warrillows, Ltd.

## NEW COMPANIES.

**MOORE AND HOLE, LTD.**—Capital £10,000, in £1 shares; dealers in and brokers of vegetable and mineral oils, turpentine, rosin, gums, tallow, etc. Private company. Permanent directors: C. Moore and H. H. Frost. Registered office: Billiter House, Billiter-street, E.C.3.

**D. O. S. ASSOCIATES, LTD.**—Capital £80,000, in £1 shares; to take over all the shares in the Drawing Office Supplies, Ltd., of 51, Cheapside, E.C., and to carry on the business of lithographers, photographers, photo and photo-mechanical plan printers, map and plan mounters, draughtsmen and tracers, manufacturers of and dealers in stationery, photographic papers, chemicals, instruments, etc. Private company. First directors: W. Monkhouse, H. J. Hall and J. S. Walker.

**ROBERT JEPSON AND SONS, LTD.**—Capital £20,000, in £1 shares (5,000 pref.); to take over the business of wall-paper, paper-hangings, paint, colour and varnish merchants and dealers, carried on by J. E. Jepson and Susannah Jepson at 27, Northgate, Blackburn, as "Robert Jepson and Sons." Private company. First directors: J. Byrne, A. P. Bevan, A. W. Gibson, F. Jepson and W. H. Behn. Registered office: 42, Seel-street, Liverpool.

**BRITISH SAMPLES, LTD.**—Capital £3,000 in £1 shares; to organise and conduct exhibitions in the United Kingdom and other countries with the object of promoting British manufacture and trade, and fostering the relationships between manufacturers and consumers throughout the world, and between exporters abroad and consumers in the United Kingdom and other countries, and for that purpose to co-operate with newspapers in cataloguing and advertising of exhibits; to act as agents for exhibitions organised by other concerns, etc. Private company. Subscribers are: G. B. Crowder and H. G. Russell Smith. Registered office: 51, Lincoln's-inn-fields, W.C.2.

**W. C. MILLER AND CO., LTD.**—Capital £7,000, in £1 shares; to take over the business of a paper and twine merchant carried on by W. C. Miller at Bartholomew-close, E.C. Private company. First directors: W. C. Miller and Edith C. Miller. Registered office: 35-7, Bartholomew-close, E.C.1.

**POLYGON MANUFACTURING CO., LTD.**—Capital £20,000, in £1 shares. Manufacturers, buyers, sellers, and brokers of, and agents for, ink, printing and office equipment, office utensils and furniture, stationery, ribbons, etc., and to adopt agreements (1) with J. Scott, St. Barbe Baker, G. Booker and J. Sayer (trading as the Polygon Ink Co.), and (2) with the Derby Manufacturing Co., Ltd. Private company. Subscribers: A. Baker and D. D. Cleary.

**CHINESE DIRECTORY AND PRESS, LTD.**—Particulars of the Chinese Directory and Press, Ltd., have been filed at Somerset House, pursuant to section 274 of the Companies' (Consolidation) Act, 1908. The company was incorporated in Singapore. The British address is at 51, Fenchurch-street, E.C., where Siow Choon Leng is authorised to accept service of process and notices on behalf of the company. Directors: Siow Choon Leng, Soh Swee Joo, and Oug. Koon Kiat. No memorandum or articles of association has yet been filed.

**WHITLEY, BROWNE AND CO., LTD.**—Capital £4,275, in 4,000 shares of £1 each and 11,000 shares of 6d. each; to adopt an agreement with H. S. Browne and C. Pearce-Brown, and to carry on the business of advertising contractors and agents, etc. Private company. First directors: E. H. S. Browne, C. Pearce-Brown, L. F. Stephenson, and H. M. Rosby. Registered office: 27, Maddon-street, W.1.

**TUTORIALS, LTD.**—Capital £1,000, in £1 shares (950 pref.); to adopt an agreement with E. M. Taylor and to carry on the business

of tutors, text book writers, printers, publishers, etc. Private company. First directors: E. M. Taylor and P. M. Taylor. Registered office: 48, Gresham-street, E.C.

### COMPANY MORTGAGES AND CHARGES.

Fresh Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 1908, and Satisfaction registered pursuant to Section 97 of the same Act. (The registration of Satisfaction is not compulsory).

**WHITFIELD AND NEWMAN, LTD.** (newspaper proprietors and publishers, Devonport).—Satisfaction in full on July 21st, 1921, of debentures dated September 15th and December 14th, 1917, securing £300 and £90 respectively.

**WHITFIELD AND NEWMAN, LTD.** (newspaper proprietors, etc., Devonport).—Particulars of £1,700 debentures authorised July 21st, 1921, present issue £1,600; charged on the company's undertaking and property, present and future, including uncalled capital.

**MIDDLESEX COUNTY TIMES PRINTING AND PUBLISHING CO., LTD.**—Satisfaction in full on August 1st, 1921, of debentures dated June 24th, 1915, securing £9,600.

**SPOTTISWOODE, BALLANTYNE AND CO., LTD.**—Satisfaction to the further extent of £10,000 on July 31st, 1921, of 1st and 2nd, mortgage debentures dated December 28th, 1900, securing £140,000 of which £137,000 was outstanding on July 1st, 1908.

**CAMBRIDGE AND DISTRICT ADVERTISING AND BILLPOSTING CO., LTD.**—Deposit on August 6th, 1921, of deeds of 14, St. Andrew's-terrace, Cambridge (subject to prior charges) to secure all moneys due or to become due from company to Lloyd's Bank, not exceeding £400.

**PARRETT AND NEVES, LTD.** (newspaper proprietors, Chatham).—Satisfaction in full on July 30th, 1921, of charge dated October 11th, 1911, securing all moneys due or to become due from company to bankers.

**GLOSSOP PRINTERS, LTD.**—Particulars of £5,000 debentures, authorised July 4th, 1921; present issue £2,650; charged on the company's undertaking and property, present and future, including uncalled capital.

**J. B. BLACKMORE AND CO., LTD.** (printers).—Mortgage on 85, Merton High-street, Wimbledon, dated August 6th, 1921, to secure all moneys due or to become due from company to Barclay's Bank.

**E. B. HARWOOD AND CO., LTD.** (stationers, printers, etc.).—Land Registry Charge on 117, Middlesex-street, E.C., dated July 28th, 1921, to secure all moneys due or to become due from company to National Provincial and Union Bank of England.

**HILDESHEIMER AND CO., LTD.** (publishers, London).—Statement under Section 12 (old charges outstanding on July 1st, 1908, now first registered) mortgage dated May 24th, 1907, securing £9,000.

### BANKRUPTCIES, etc.

Re ARTHUR HENRIQUES VALENTINE, 73, Moorgate-street, E.C.—This debtor failed in June with liabilities £3,417 and assets of no realisable value. He attended last week before Mr. Registrar Mellor at the London Bankruptcy Court, and in the course of his public examination stated that in December, 1918, he became associated with one Abraham Henry Schmigelsky, commonly known as "A. Henry" in the formation of "Henry and Valentine, Ltd.," for the purpose, primarily, of selling the goods of "E. J. Hay and Co., Ltd.," picture post card publishers and wholesale stationers, but which, after a time, was mainly concerned with the purchase and export sale of fancy goods. The business was carried on at a profit till the end of 1919, but was afterwards unsuccessful owing to the dishonesty of employees and a slump in prices. The company had gone into liquidation and witness attributed his own failure to his being called upon to meet liabilities incurred by him on behalf of the company. The examination was concluded.

## Gazette.

### A WORD OF CAUTION.

In giving the official Gazette information, it must be distinctly understood that we take official records as we find them, and accept no responsibility for inaccuracies, while, as an almost invariable rule, the facts will be found correct. We advise our readers, before forming hasty judgment, to consider that there may be in each case satisfactory explanation which does not appear on the records.—Ed.]

### ENGLAND AND WALES.

#### PARTNERSHIPS DISSOLVED.

Harry Clare, Albert Henry Newbery, and Herbert John Waller, publishers, Newport, Mon. Frederick Henry Hubbard, Frank Walton Dickenson, and Ada Dickenson, papermakers' agents, 23 to 28, Fleet-street, E.C.

### THE BANKRUPTCY ACT, 1914.

#### RECEIVING ORDER.

Austin, Maud Mary (trading as The British Waste Paper and Paper Stock Merchants), 42 and 44, Manchester-road, Notting-hill, and 43, Aliwal-road, Clapham Junction, August 20th. Public examination December 7th, at Bankruptcy-buildings, Carey-street.

## Value of Fine Printing.

Writing on the subject of "Business Efficiency" in the *Manchester Guardian*, a contributor wisely draws attention to the power which fine printing and good paper can confer upon publicity matter. He recalls having recently seen some very effective booklets produced in Manchester. They were not examples of *belles lettres*, he says; they were business documents. "To be precise, they were brochures issued to customers and friends by business houses, either to record an achievement or to commemorate a birthday. One of them was bound in panne calf, lettered in gold, a joy to the eye. The type possessed that bold, dignified legibility which spells perfection in printing. The colour prints were a delight to the connoisseur. Yet this beautiful souvenir was a business document. The firm who issued it evidently realised that the supreme message would be conveyed not by the typescript only, but by the beauty and perfection of the format and printing. It conveyed a subtle atmosphere of prestige. Now prestige is an asset which has as much value to a firm as anything material. The dome of the old Royal Exchange was dignified by these words: 'A good name is rather to be chosen than great riches.' That is a motto which inevitably sends a business man to the best printers. Much used to be said about the pride of the old landed families of England. *Noblesse oblige!* But cannot a business accumulate traditions, develop pride? Is there no *noblesse oblige* in a fine old business house? Evidently the firms who celebrate their birthdays and jubilees and centenaries by publishing a perfectly printed brochure heartily believe there is. This principle applies equally to the ordinary stationery. Stationery suggests the atmosphere of a firm. The letter headings, the invoice forms, the circulars, the catalogues, are a firm's silent witnesses. An advertisement recently published in America puts this message in a striking way. It shows a circular resting upon the typewriter, but looking out of the circular, as it were, there is the ghostly figure of a salesman raising his hat to the reader. There is a sermon in that advertisement. Every bit of stationery is a silent salesman. A letter heading should be 'the outward visible sign of an inward spiritual grace.'"

## Cardboard Box Industry.

According to the Trade Correspondent of the *Birmingham Post*, the cardboard box trade is experiencing a lean time, consequent upon the general scarcity of money, and the indisposition or inability to buy on the part of the public. There were signs of a partial revival about February, but the coal strike intervened, and put a sudden stop to the improvement. Enquiries show that whilst the retailers have fairly good stocks of boxes the manufacturers have not, so that once trade begins to move the demand is likely to quicken immediately. It is felt, however, that already the slump has continued too long to permit of a full execution of the Christmas trade, which has generally brought grist to the mill. For cardboard attaché cases the demand shows a falling-off. One Birmingham firm has recently placed on the market a novelty in the shape of a vacuum flask carrier, which seems to have been received favourably by the retail trade and by the public. The advantages of the article are that it is light, strong, well made and heat-resisting, and it is offered at a popular price.

The trade has not a great deal to fear from foreign competition at the moment. Things are as bad abroad, apparently, as they are here. A traveller who recently returned from Holland reports that a large box factory there, which closed during the war, has not yet reopened owing to lack of orders. Germany is coming into the field again with raw material. So far we are not taking in large quantities, but enamelled and flint papers are coming over. Germany is also endeavouring to find markets for box tops printed in several colours. Once she possessed a large proportion of the trade in this line. Now America is making some headway with these goods. But of late years British printers have made considerable strides, and hopes are entertained that ere long they will be able to satisfy all our requirements. With regard to the high-class fancy boxes for chocolates and the like, the French, with their more artistic temperament, have always been ahead of us, but they do not seriously interfere with the British trade in any other way. When the situation improves it is expected that the keenest competition will be experienced in the case of collapsible or folding boxes, and here it is that the Japanese may make a bold bid. Obviously, they cannot pay freightage on rigid boxes, but with goods that can be

packed in small compass they are likely to be strong competitors.

At present there are not employed on full time more than a third of the girls who followed the occupation of box-making before the war. Many of the older hands have left the trade in the meantime, and the number of learners entering has been so small, owing to lack of work, as to give some ground for uneasiness. It is feared that, should the trade recover to any extent suddenly there might be a shortage of experienced workers. Through the Paper Box-making Trade Board, which has done a good deal to maintain amicable relations between employers and employed, notice has been given recently of a reduction of 1d. an hour in the minimum rate for males and females. The rates of unskilled workers, and of males under 21, it is not proposed to interfere with.

## British Imports of Millboards.

During July the following consignments of millboards were received at British ports:—

Port of Importation.	Country whence Consigned.	Quantity. Cwts.	Value £
London	Finland	2,929	3,276
"	Sweden	4,339	7,065
"	Norway	788	1,081
"	Austria	200	835
"	Canada	5,208	9,902
"	Germany	200	185
"	France	45	167
"	Netherlands	40	75
Liverpool	Canada	1,452	2,009
"	United States	988	2,753
Bristol	Canada	206	560

Belfast	Austria	28	54
Dublin	Sweden	325	824
Total	...	11,668	28,790

### Strawboard Supplies.

The countries supplying the British market with strawboards during July were as under:—

Port of Importation.	Country whence Consigned.	Quantity. Cwts.	Value. £
London	Germany	227	124
"	Netherlands	65,359	31,058
"	Belgium	904	692
Liverpool	Netherlands	697	489
Bristol	"	7,854	8,981
Goole	"	9,655	4,228
Horwich	Belgium	1	4
Hull	Netherlands	7,201	8,761
King's Lynn	"	305	153
Manchester	"	7,937	4,326
"	Belgium	215	175
Newcastle	Netherlands	55	35
Stockton	"	80	30
Dundee	"	730	383
Grangemouth	"	1,002	937
Leith	"	1,561	1,511
Belfast	"	219	214
Dublin	"	421	526
Deduct to Amend Return for May:		104,414	57,656
Liverpool	United States	—	300
		104,414	57,356

### Leatherboards.

The imports of leatherboards into the United Kingdom during July were as under:—

Port of Importation.	Country whence Consigned.	Quantity. Cwts.	Value. £
London	Sweden	214	290
"	Norway	140	173
Hull	"	320	470
Manchester	Sweden	526	840
"	Norway	95	120
Preston	"	140	203
Total	...	1,435	2,096

## Australian Notes.

**Australian-Made Cardboard Claimed to be Insufficient to Meet Consumers' Requirements—A Plea for the 1914 Tariff—Imports of Strawboard from Japan—Paper from Australian Wood—Government Aid in Assisting Experiments.**

(From Our Sydney Correspondent.)

CLAIMING that it was not possible for them to secure a sufficient quantity of Australian-made strawboard to meet their requirements, representatives of the master printers, box-makers, and carton makers and their employees in Queensland, New South Wales, Victoria, and South Australia have waited upon Mr. Massey Greene, Minister for Trade and Customs, and asked that the 1914 tariff should be adopted in reference to strawboard rather than that proposed in the schedule now before Parliament.

FIGURES regarding the quantity of strawboard and similar commodities used in the industries were placed before the Minister, who promised to give the request consideration.

It was pointed out that the proposed duty on foreign strawboard was £3 10s., whereas under the 1914 tariff it was only £2.

As to the contention that the Australian mills could not supply local requirements, Mr. Greene said his information was that with the recent additions to the mills, all demands for strawboard in Australia could be supplied.

MEMBERS of the deputation said that in order to fulfil their requirements it had been necessary to import strawboard from Japan. This was inferior in quality to the Australian article, and was much dearer, the price being £30 to £35 a ton, as compared with £20 a ton for the Australian board. The annual consumption in Australia was nearly 20,000 tons.

THE State Governments are giving financial assistance to firms experimenting in the manufacture of paper from Australian woods. The result of these experiments has so far been distinctly encouraging.

THE Junior Philatelic Society, which is organising the next International Stamp Exhibition in London, offers premiums of £20 and £10 to artists and others for competitive designs suitable for stamps for use on air mails. Full particulars of the contest may be obtained from the Hon. Secretary, London International Stamp Exhibition, 44, Fleet-street, London, E.C.4.

## Trade with South Africa.

Mr. W. G. Wickham, his Majesty's Senior Trade Commissioner in South Africa, is at present in this country on an official visit, and is prepared to interview, at the Department of Overseas Trade, from September 1st to September 16th, firms who desire to obtain information as to trade possibilities in the Union of South Africa. Mr. Wickham will be pleased to meet manufacturers and merchants who may wish to consult him in regard to steps to be taken for opening up trade, and among the matters on which he is prepared to give information and advice are the general state of trade in South Africa, method of marketing and distributing of goods, terms of payment, rates of customs duties, and general information as to openings existing for British goods. London firms who are desirous of consulting Mr. Wickham should communicate immediately with the Department of Overseas Trade, 35, Old Queen-street, London, S.W.1, quoting the reference 3092/T.G., and indicating briefly the subject on which the interview is desired. Mr. Wickham will subsequently visit some of the principal industrial centres of the United Kingdom.

## Paper Box Manufacturers' ASSOCIATION.

Letters patent have been granted recently to the Canadian Paper Box Manufacturers' Association, an organisation formed "to uphold the standard of the paper box business by educating the general public to a realisation of the usefulness and increasing necessity of the paper box, and the extent and size of the paper box industry." The Association's head office is in Toronto.

A WEEKLY newspaper for Germans in South Africa, *Der Deutsch Afrikaner*, has been started at Pretoria.

Replies to Box Nos. to be addressed to the Offices, "BRITISH AND COLONIAL PRINTER AND STATIONER," 58, SHOE LANE, LONDON, E.C.4.

## SPECIAL PREPAID ADVERTISEMENTS

**SITUATIONS VACANT, REPRESENTATIVES or MANAGERS REQUIRING POSITIONS, AGENCIES, BUSINESSES WANTED or FOR DISPOSAL, MACHINERY and MISCELLANEOUS.**—Charges for Advertisements of the above class are Three Shillings for 21 Words or under; One Shilling extra for every line or portion after. Seven words to be reckoned for each line.

**SITUATIONS WANTED.**—Special Rate for Operatives only; One Shilling and Sixpence for Twenty-One Words and One Penny per Word after. Minimum charge One Shilling and Sixpence. Cash to be sent with order.

Telegrams: STONHILL, FLEET, LONDON.  
Telephone: No. 8407 CITY.

## Situations Wanted.

**BOOKBINDING: VELLUM FINISHER** (soc.), age 26, seeks permanency; used to high-class work; knowledge of Gold Blocking; used to London house. —Box 13846.

**STATISTICAL CLERK and COSTING EXPERT**, age 34, seeks appointment; knowledge of all departments; experience includes Installation and Working of Costing System as advocated by Federation of Master Printers. —Write Box 13812.

## Miscellaneous.

**BOOKS on Printing, Lithography, other Technical, Commercial, and all other subjects; second-hand and new; books on approval; catalogue 431 free; mention wants. Books purchased.** —Foyles, 121, Charing Cross-road, London. 13831

**BUCHANAN'S EQUIVALENT WEIGHT CALCULATOR.** A Time-saving Pocket Companion for Papermakers and Paper Users. Standard size (12-in. long), in boxwood; £2 2s. —Stonhill and Gillis, Publishers, 58, Shoe-lane, London, E.C.4.

# LORILLEUX & BOLTON LTD.

## Paper Prices in Germany.

### Protests by Users.

(Specially Translated for the BRITISH AND COLONIAL PRINTER AND STATIONER.)

News-print prices have formed a subject of discussion in the Reichstag. As to complaints as to high prices, news-print manufacturers declare that makers of the finer classes of paper have chiefly benefited.

Nevertheless, according to the views of "A Paper User," makers of news-print have also made large profits, due in some measure to the export trade. That paper mills in general have paid well is clear from the dividend returns of the limited companies, viz., from 20 per cent. to 60 per cent., after very liberal depreciation, carry over, etc., and in spite of greatly increased capitalisation.

The complaint is made that the continual raising of prices has produced an artificial dearth which seems to justify the general cry for a speedy reduction in prices. Unfortunately the paper mills resist the cry or give it scant notice.

It is urged that mills in the convention should exert themselves in the general interest of the trade, and again resume the good old and well tried trade customs. Conventions are only good and helpful to the general community when they take equal pains for all those interested—maker, merchant and user. When, however, they go beyond their justifiable province, and become trusts to exploit the public, they are harmful, and must be fought by measures taken in Parliament.

The pulp mills considerably modified prices in May, but paper users still wait for a corresponding reduction by the paper mills. On the other hand, last year the increases in prices to twice, or even four times the former figures, were quite automatic.

The owner of a stationery business goes on to criticise the rules laid down by the Convention. Packing has now to be paid for, although formerly, when only small profits were made, it was free! He has been charged 48 M. for two small boxes which came by post, and had evidently made some five or six journeys already. He calls upon the wholesalers, dealers and users to resist such impositions, and also demands a return to the custom of allowing 2 per cent. discount from cash accounts, as his own customers expect him to make such an allowance.

**NEW YORK COMPOSITORS' WAGES.**—The printing trade of New York, though it has escaped the upheaval experienced in many other cities on the question of the 44-hour week, is apprehensive of coming trouble on the question of wage-reduction. A wages agreement expires on October 1st, and there is a demand for a reduction of wages, which it is thought the compositors' union will not easily concede in the new agreement.

## New Australian Customs Duties.

The office of the High Commissioner for Australia has received official advice of the following further amendments in the Commonwealth Tariff:—

Goods.	British Preferential Tariff.	Intermediate Tariff.	General Tariff.
Paper, viz.: news printing, not glazed, mill glazed or coated, on rolls not less than 10 inches in width, or in sheets not less than 20 inches by 25 inches or its equivalent ... per ton	Free	£3	£3
Tissue and tissue cap paper, and paper for paper patterns, in sheets or rolls	6s. 15%	7s 20%	8s. 25%
per cwt or ad val			
whichever rate returns the higher duty.			
Writing and typewriting paper, plain, not including duplicating—			
(1) Sheets not less than 16 inches by 13 inches	ad val	5%	10%
(2) Sheets less than 16 inches by 13 inches	ad val	30%	35%
(1) Wrapping (paper) of all colours (glazed, unglazed, or mill-glazed), browns, caps not elsewhere specified, casings, sealings, nature or ochre browns, sulphites, sugars and all other bag papers, candle carton paper, paper felt and carpet felt paper ... per cwt.	8s.	9s.	10s.
(2) Fruit wrapping (paper) as prescribed by Departmental By-laws ...	Free	Free	Free
(3) Bags, n.e.i. ... per cwt	12s.	13s.	14s.
Cartridge paper of all colours (glazed, mill-glazed, rough or smooth), duplicating paper, absorbent paper for copying machines, and blotting paper, irrespective of weight ... per cwt.	8s.	9s.	10s.
Surface coated paper n.e.i., plain or embossed, marble or foil paper, also, subject to Departmental By-laws, boxmakers' design printed, fancy coated or friction glazed covering paper	ad val	Free	5%
(1) Omit "n.e.i."			10%
(2) n.e.i.; paper hangings or wall papers ...	ad val	15%	20%
Boards, n.e.i. ...	ad val	25%	30%
			40%

In item 838 is inserted after the word "purposes" "pictures used or intended to be used in the manufacture of box tops, pad covers, calendars, almanacs and the like," the respective tariffs for which are per lb. 8d., 9d., and 10d., or ad val. 35 per cent., 40 per cent. and 45 per cent., whichever rate returns the higher duty.

The intermediate tariff is not yet operative.

FREE me not from duties and responsibilities—but strengthen my resolution and add to my courage.

# New Inventions.

## Assembling Printed Sheets.

Apparatus for assembling the printed, cut, and folded parts of books issuing from a book-printing machine comprises two or more parallel conveyers each provided with a plurality of boxes for receiving the book parts, and a corresponding number of rows of devices for pushing the book parts into the boxes, which pushing devices are adapted to be rendered operative according to requirements, whereby, when printing books made up of a smaller number of parts than the number of strips which can be printed by the machine, the latter may be operated at its full printing

capacity to assemble and deliver simultaneously two or more such smaller books. In the machine shown, adapted to print a web cut into nine strips folded into nine book parts, three endless conveyers *a*, *b*, *c* are provided, each having nine boxes simultaneously in horizontal position, the book parts issuing from the printing machine in the direction of the arrows *n* with their edges resting on bands *o* and adapted to be pushed into the boxes by pushers *p* on rods *q* operated by three series of two-armed levers *s* mounted on shafts *t* and actuated by cams *x* on shafts *v*. For assembling books of nine parts, the conveyor *a* only is utilised, the nine pushers mounted over it

being all rendered operative. Fig. 3 shows the adaptation of the apparatus for printing and assembling simultaneously three three-part books by using all three conveyers *a*, *b*, *c*. A stop plate *y* is provided against the boxes on the conveyor *a* in the positions 1, 2, 3, to arrest the book parts to be delivered to these boxes, and the pushers over the remaining six boxes of this conveyor are rendered inoperative by throwing the cams *x* out of action. Other stop plates *y* are provided against the boxes on the conveyor *b* in the positions 4, 5, 6, and against the boxes on the conveyor *c* in the positions 7, 8, 9, the pushers over the remaining boxes of these conveyers being rendered inoperative. The three three-part books are delivered by the conveyers to the collecting devices *l*, *k*, *i*. By suitable arrangement of stop plates and adjustment of the pushing devices, books of different sizes can be printed and assembled simultaneously by the machine, for example, a four-part book and a five-part book, two two-part books and one five-part book. The invention is by the Maschinenfabrik Augsburg-Nürnberg Akt. Ges.

## Folding Cardboard Boxes.

Mr. F. J. Shirley has patented an invention in which a folding box made of cardboard, etc., has a hinged lid secured in its closed

position by means of a lip which overlaps the edge of the lid remote from the hinge, means

integral with the box blank being provided to prevent the lip from lifting. In the arrangement shown in Figs. 1 and 2, the box is formed from a blank by turning up the sides 3, 4 at right angles to the bottom 2 and then folding a skeleton part 13 . . . 16 over the open top of the box, the flaps 9, 10, 19, 20 being folded in so as to close the end of the box. The part 13 . . . 16 then forms a support for the hinged lid 1, which is secured in its closed position by tucking its shaped edge 23 below the rim 13. Instead of removing the centre of the part 13 . . . 16, it may be provided with parallel slits forming sections that may be turned down into the box to constitute parallel partitions running from front to back of the box. In a modification, the part 13 . . . 16 is scored and slotted as shown in Fig. 8, the two flaps thus formed being turned down into the box to form supports for tubes of paste, etc. In this arrangement the lid 1 has a tongue 41 adapted to engage a slit 40 in the portion 13. According to another modification, part of the front 4 of the box is hinged to turn down as shown in Fig. 12, and an extension flap 43 folds over the lid 1, which has slits 46 to receive locking tabs 44.

## Paper Cutting Machines.

Mr. W. F. Penn has patented an invention that relates to apparatus for dividing rolls of paper into sheets by first cutting the rolls

into strips, superposing these by passing them over guide-rolls inclined to the travel of the strips to change the direction thereof and finally severing the superposed strips transversely into sheets. The apparatus is particularly applicable for cutting paper bearing rows and columns of watermarks, means

being provided for adjusting the strips so as to bring the respective watermarks into coincidence before division into sheets is effected. The paper *b* is fed from a roll to cutters or knives *d*, shown as pairs of co-operating rotary knives which sever into strips *b*<sup>1</sup>, *b*<sup>2</sup>, *b*<sup>3</sup>, *b*<sup>4</sup>, these being led beneath inclined guides *e* adjustably mounted by bolts moving in slots in the framing, thus allowing the strips to be superposed and to move in a direction inclined to that of the sheet. The strip *b*<sup>1</sup> passes directly over a guide-roll *j* to the feed rolls *f* but, in order to allow the watermarks on the other strips to be brought into coincidence, the strips *b*<sup>2</sup>, *b*<sup>3</sup>, *b*<sup>4</sup> are previously led over guide rods *k*<sup>1</sup>, *k*<sup>2</sup>, *k*<sup>3</sup>, *k*<sup>4</sup> and looped over rollers *m*<sup>1</sup>, *m*<sup>2</sup>, *m*<sup>3</sup>, *m*<sup>4</sup> capable of longitudinal adjustment by means of screws *o* rotated by bevel-gearing through hand-wheels *q*. From the guide-roll *j* and feed-rolls *f*, the strips pass to a rotary blade cutter *s* co-operating with a block *r*, by means of which severance into sheets is effected.

## The Bookbinder and the Time Docket.

A Review of this Important Question  
as it Appears at the Present Time.

The controversy on the subject of time dockets in the bindery, which has been well maintained in this journal since June 9th, has served a distinctly useful purpose, and has probably had some bearing on the recent decision to appoint a six-a-side committee to investigate the Federation Costing System, with special reference to its effect upon the employees in the industry. We are now able to look back on the whole of the correspondence, and form some sort of conclusion as to its general trend. The most striking feature is the fact that, along with the majority of the trade union officials, Mr. Harraway is sympathetic toward the general inauguration of the time docket as a piece of the cost-finding machinery. The courage embodied in a frank statement of opinion on a contentious subject by a trade union leader in a trade paper is a matter not lightly to be passed over. With sympathy and commonsense on the workers' side, it will not be very long before the docket is recognised and accepted by every branch of the Binders' Union.

### The Workers' Apprehension.

There were passages in the recent correspondence which clearly evinced the necessity for similar attributes on the employers' side. If the docket is to be a workable thing when it comes, we shall need the goodwill of the employees to render it so. For that reason we personally view with some concern the inability of some employers to appreciate the workers' viewpoint, not only on the docket, but on other things equally important. However, the great majority of workers and employers in the binding industry are honest in their efforts and fair in their feelings toward

each other. The return to the employer is just about commensurate with his concern for the interests of his workers, and in nothing more than in the working of the costing system routine. Mr. Harraway spoke of the unscrupulous employers and foremen who used the workers' times unfairly against themselves and their colleagues. As far as foremen are concerned, they are members of the union, and the treatment of such unworthy members should surely be a matter safe with the branches. At least, we would like to think so. As to employers, there are doubtless a select few who might stoop to such a practice, but the inevitable result of administrative misuse of the system is operative misuse. From the very moment that unscrupulous application of recorded data begins, faulty time recording and cooked figures are served up by the worker in self-defence. On both sides we can quite afford to disregard this aspect of cost-finding and recording.

### Is There a Practical Difficulty?

According to Mr. Harraway, the one really serious obstacle to the immediate general recognition of the docket is the inability of employers to define how it can assist to more accurate cost-finding. At some length we explained this in the *British and Colonial Printer and Stationer* of July 7th, but for some reason Mr. Harraway failed to respond. That was a disappointment to us personally, inasmuch as we took some pains to go into the whole subject from a practical viewpoint. If the basic cause of the workers' opposition to the docket consists in a practical difficulty which they claim to exist, surely the soundest

method of approaching a solution is to concentrate on that particular point. While we ourselves endeavoured to do that, the other parties to the controversy drew a barrel of herrings over the track and settled down to their own peculiar repast. The docket question is really too serious a matter to provide the basis for a bellicose or recriminative demeanour.

### The Obstructive Wall.

The best and most progressive houses in the trade want to get on with their costing organisation. In every other department of the allied trades the costing system is working smoothly and well. In a hundred different ways, which become apparent at one time and another, the records bring along information which helps to provide the foundation for improvement, progress and development. At the binding department there is a stone wall which bars the way to sound business organisation. The builders and upholders of the wall believe it to be a necessary safeguard of their interests. The removal of the wall is a matter for brains rather than force. When the men behind it are satisfied that by its removal their interests will not suffer, they will help to pull it down. The crux of the whole thing is enlightenment. We cannot help but interpose here once again our hope that Mr. Harraway will at least acknowledge our effort at enlightenment afore-mentioned.

The administrative side of the industry must incline sympathetically to the men's view-point. Perhaps this six-a-side committee will provide the best possible opening for seeing eye-to-eye. Meantime those houses whose sole desire is to conduct their business on sound and visible lines, must carry on patiently, securing reliable records from the departments where they are possible and accepting unhelpful figures from the departments in which the dockets are withheld.

## Printing Examinations.

The prizes and certificates gained by printing students at the examinations held last session will be presented by Sir William A. Waterlow, K.B.E., J.P., at Stationers' Hall on Friday, September 16th, at 6.30, when Mr. W. Howard Hazell, J.P., chairman of St. Bride Printing School, will preside, supported by leading representatives of the printing industry.

It is expected that interesting information will be given in reference to the development of technical education and the proposed new printing trades technical college. All who are interested in technical education are cordially invited to be present.

**NEW YORK BINDERS' STRIKE.**—The binding strike, which began on April 1st in New York terminated disastrously for the unions about a month ago, when the binderies with open-shop organisation completed their forces with the old men now anxious to come back and practically regained their pre-strike output.

## The Imprint on Posters.

### Stiff Fines at Hertford.

Before the Hertford County Bench on Saturday, the *Daily Mirror* Newspapers, Ltd., were summoned at the instance of Herbert Creasey, printer, of Hertford, for printing posters in connection with the Hertford Division Parliamentary election which failed to bear upon the name and address of printer and publisher. There were four summonses for printing posters which failed to bear on the face the name and address of the printer and publisher, fifteen summonses for publishing and thirteen for posting, in addition to a further summons for failure to include the cost of the posters in the return of the candidate's expenses.

Sir Richard Muir, for the defence, asked for an adjournment, as sufficient time had not been allowed to investigate the law on the subject. Sir Ellis Hume Williams, for the prosecution, objected to adjournment. He suggested that the Bench should proceed with the cases of printing, publishing and posting bills without the imprint on them. The Bench agreed to an adjournment of the indictable case, but they decided to hear those relating to the posters without imprints.

The first summons proceeded with, alleged that on June 15th at Bishop's Stortford, the defendants caused to be posted divers posters having reference to the election which failed to bear the name of the printer and publisher, contrary to Statute.

Sir Hume Williams, after reading the section, said the defendants were liable on summary conviction to a fine not exceeding £100. The necessity for the imprint was that they could find out who was responsible for the statements made.

Sir Ellis called evidence to the effect that the defendants had the bills posted upon their own authority, and that payment for the posting was not included in the election returns.

Evidence was called in support of counsel's statements, and a fine of £50 and £21 costs was imposed. The second case was similar, but in respect of posters put up in Hertford, and in this case a fine of £25 and ten guineas costs was imposed. The Court then adjourned the remainder of the cases till October 15th.

The solicitors for the proprietors of the *Daily Mirror* have written to the Press emphasising the fact that the proceedings were wholly undefended, Sir Richard Muir having appeared as counsel for the *Daily Mirror* simply to apply for an adjournment of the proceedings.

**MR. AXEL HERMAN HAIG**, the etcher, who has died at Southsea, aged 85, was a native of the island of Gotland, in the Baltic. He did many lithographs and other drawings in his time, but for the past thirty years had devoted himself to etching.

## The Composer's Wage.

### Case Stated for the L.S.C.

On behalf of the London Society of Compositors, Mr. T. E. Naylor (secretary) has issued to London master printers a letter in which he argues that present conditions do not justify any reduction at all in the wages paid to the London compositor.

"After conferring with the Federation of Master Printers," he writes, "we were informed in the first instance that we must accept a reduction of 15s. That is to say, the moderately paid compositor was asked to submit to a reduction that would bring his wages below the pre-war level.

"As this proposal was put forward on the ground of falling prices, we ask you to remember that prices are again rising, and that the compositor's present wage of £5 per week leaves no margin for reduction. Here are the figures:

Composer's Pre-War Wage, 1914.	Present Wage.	Wage Increase percent- age.	Government Cost of Living Figure. June.	Wage Increase Percentage after 15s. Reduction.	Amount below Pre-War Wage after 15s. Reduction.	Labour Committee's Cost of Living Figure. June.	Amount below Pre-War Wage after 15s. Reduction.
Hand ... 39s.	100s.	156	119	117	8d.	141	8s.
Machine... 45s.	105s.	133	119	100	6s. 4d.	141	18s. 8d.

"It will be noted that the position of the machine compositor is worse than that of the hand compositor by 17 points.

"The cost-of-living figure issued by the Ministry of Labour is under-stated, hence the additional comparison in the above table with the cost of living figure issued by the official Labour Committee. Apart from the difference of 22 points between the two computations, on the Government figure itself the London compositor is brought below the pre-war level. Another fact to be borne in mind is that between 1902 and 1914 prices rose by 15 points without any increase of wages—to the London compositor. Add that 15 points to the Government figure, 119, and he is a further 5s. to the bad.

"It must also be pointed out that during the period when prices rose from 156 to a maximum of 176, the London compositors' wage was no more, and for part of the time actually less, than it is now. He was working at a fairly considerable loss.

"In asking us to accept that reduction, the Federation of Master Printers not only said in effect that the London compositor must be content with a lower wage, but that the past seven years shall be made barren of any improvement; while they also ignore the substantial advance made by other sections of the trade.

"Gentlemen, we ask you, Is this fair to the

London compositor? Are you justified in posting notices of a wages reduction, which our members will be instructed to regard as notice of dismissal?

"Since the foregoing paragraphs were written, prices have again risen. The cost of living have gone up to 122 points (August 2nd), with indications of a further rise. Is this the time to press for a reduction of wages? Will not such a course lead to trade disturbance and unsettlement, and deaden the spirit of co-operation so essential to high production in the good time that is coming? These questions convey their own answers.

"The proposed reduction of 15s. was altered to 10s., and later to 7s. 6d., but that makes little difference to our case as stated above. We contend, moreover, that the compositor's wage before the war was so inadequate that present conditions do not justify any reduction at all. No one can say that at 2s. 1d. per hour the compositor is overpaid.

"We confidently face the issue raised, relying on your sense of fairness to do what is right, and appeal to you not to depreciate the position of your most highly skilled craftsmen."

## Employers' Reply to Mr. Naylor.

The London Master Printers' Association is circulating a letter, in which reply is made to Mr. Naylor's statement in regard to the wages of the London compositor. The accuracy of the official index figure is maintained, and a comparison of pre-war and present wages is made, showing that the London compositor is to day receiving 13s. 6d. above the pre-war standard, while, if account is taken of the reduction of working hours and the yearly holiday, the compositor will still, after a reduction of 7s. 6d., be 10s. a week better off.

MESSRS. SUCKLING AND Co. are showing some remarkably fine Bible printings and thin coated art papers, the product of a mill for which they have recently acquired the agency. These are speciality papers which are outside the scope of the bulk of our own mills and they meet a need which the user often finds it difficult to fill even in normal times. The chief features of the new lines are quality and efficiency, factors which are not always present in imported grades of uncertain origin.

## Standardisation of Paper.

### A Pressing Need for the Printing Trade and How it Could be Met.

By W. HOWARD HAZELL.

(Continued from page 182).

When the "thousand" is adopted as the basis, prices would be quoted per thousand sheets. This system will very greatly simplify the calculation of the cost of small quantities of paper. Every 10s. in the price per thousand is 1s. per 100 sheets. If the price per thousand be turned into pence the price of smaller quantities could be found instantly by moving the decimal point, as the following example shows:—

If a "thousand" cost 22s. 9d....	273	pence.
One sheet	" ... ..	273 "
Ten sheets	" ... ..	273 "
One hundred sheets cost	... 273	"

Under the present system, before the price of any small quantity of paper could be found, it is necessary to find out the number of sheets in the ream in order to calculate the price per quire; but when the "thousand" is adopted as the unit this uncertainty is removed, and the price of small quantities is found very quickly.

Records kept of paper used are very much simplified, as under the present system it is necessary to total the reams, quires and sheets, and convert them into reams, but if the "thousand" be the basis the addition of these figures automatically converts the sheets into "thousands."

The present anomaly of using the names Demy, Medium, etc., for different sizes of papers when they are supplied in writings or printings, should be abandoned, and distinctive names given, so that no word is used to represent two sizes of paper. Certain sizes of paper, such as Double Crown, are always of a uniform size when supplied by any wholesale stationer, but in other sizes there is considerable variation amounting to as much as quarter or half an inch. This variation only leads to confusion and uncertainty, and if standard sizes were agreed on for all the named papers, it would be of very considerable advantage to papermakers, wholesale stationers and printers. When the named papers and regular sizes are standardised, every wholesale stationer would naturally stock these sizes. In addition he would stock such "out" sizes, which would be sold by inch measurement and not by name, as he found desirable. It is not intended that the scheme for standardisation should eliminate the "out" sizes, exceptional packing, etc., which may be required for certain branches of the trade.

When the sizes have been standardised, it would also be possible to have standard substances, i.e., it would be recognised that stationers would stock standard sizes in stan-

dard weights, and the standard weights would be obtainable in all sizes. It very often happens that a printer may quote for a job printed in double crown. If the quantity be very largely increased, he may wish to print it in quad crown, or even in eight crown, but he is not certain that he would be able to obtain equivalent weights in the three sizes of paper. The advantage of having standard substances is that when a mill is making paper, it could make and store in the reel paper of the standard thicknesses, and cut them to the single, double or quad sizes, and printers would know that they could obtain the standard thicknesses from any stationer. Another advantage is that these standard weights of paper could be sold by number, and the substance number based on the number of grammes per square metre of paper. The number of grammes would not affect the printer at all, as it is only a basis of measurement which would be dealt with by the papermaker, and the printer and stationer would deal with the paper by number. For instance, paper No. 80 (which is 80 grammes per square metre) would weigh:—

Large post	... ..	40
Demy	... ..	45
Double foolscap	... ..	51
Double crown	... ..	68

A printer would know that if he ordered paper No. 80 in demy or quad demy, crown or quad crown, he would get paper equivalent to 45 lbs. demy per thousand sheets, and many calculations and inquiries would be saved.

The above is an outline of the suggestions that have been worked out for the standardisation of paper and boards. There is no doubt that if these suggestions, or some modifications thereof, be adopted, there would be very considerable reductions in the amount of stock that is carried in the paper and printing trade, the number of errors and the time spent in calculating prices and quantities. These advantages must lead to a reduced cost, and when cost is reduced, there is naturally an increased demand, which is the crying need of the printing trade at the present time. Any improvement of old-fashioned and obsolete methods adds to efficiency, and efficiency is a stepping-stone to higher profits and improved conditions generally.

**NEWSPAPER STANDARDISATION.**—Standardisation of newspaper sizes in America is being promoted by the National Editorial Association, which announces that the committee appointed to recommend suitable sizes decided upon the following:—Seven column—20 in. long and 12 ems wide; six column—19½ in. and 13 ems wide. Those who support the adoption of uniform sizes argue that by the adoption of those sizes the papermakers and press manufacturers will be able to eliminate many sizes now required, and prices may be lowered.

THE employees of Messrs. Parbury Bros., printers, Coventry, held their annual outing to Worcester (via Broadway) on Saturday by motor charabanc.

## State Printing and Economy.

### Printers' "Ring" Alleged.

Attention is drawn in the report from the Select Committee on Publications and Debates Reports, issued on Thursday as a White Paper, to the fact that the gross total for the ordinary services, stationery and printing amounts to over £5,000,000, as compared with £1,200,000 for the year 1912-13. There is, however, a reduction of £992,630 in the estimates for 1921-22 over the estimates for the year 1920-21, of which amount £400,000 represents the decrease in the cost of printing registers, etc., under the Representation of the People Act.

The number of the contractors who took up the printing of the register amounted to 750, proceeds the report. The Controller, in his evidence, stated that there had been a ring of the contractors as against the Stationery Office, but that owing to the longer time which the Stationery Office had to put out the contracts, and the fact that they placed them all over the country, the prices fell considerably; but adds, it is only fair to the contractors who did the work to state that the Committee were not in a position to hear evidence from them on this point.

The Committee urge the urgency of their recommendations as to the appointment of Departmental Committees in view of the greatly enhanced cost of stationery.

With reference to the establishment of the Stationery Office Printing Works, which are now in running order at Harrow, the Committee express the opinion that the present would not appear to be an opportune time to increase the establishment of a Government printing office, or to make further large purchases of machinery, in view of the great slackness in the printing trade throughout the country; as a result of this slackness of trade very favourable contracts could no doubt be made with private firms, and the spending of large sums of Government money on the setting up of new printing presses and the engagement of a considerable staff does not appear to be necessary.

The Committee also recommend that no advertising contract shall be extended, but that a new tender shall be asked for each year, and that this contract shall be open to all advertising agents.

THE death occurred on the 21st ult., at Sheringham, Norfolk, of Thomas Brady, aged 75, superannuated member of Binders, and Machine Rulers' Society, for many years with Messrs. Macmillan and Co.

An addition to monthly periodicals is *Form*, a magazine of the arts (originally published as a quarterly), edited by A. O. Spare and W. H. Davies, printed and published by the Morland Press, Ltd., 190, Ebury-street, S.W.1. The first number of the new issue is to be published in October.

## Trade Union Matters.

AFROPOS of the wages question, in many of the unions during the years of war, especially those engaged on war work, there was a great influx of members, the nature of the work done then making it economically possible to pay a high wage in comparison with the unions that were not affected in the same way. Now that attempts are being made to bring about more normal conditions, it is found that difficulties present themselves in the paying of an uneconomic wage to a large section of the workers, who before the war were in receipt of much lower remuneration.

THE various trade unions during the war years shared alike the same flat-rate increases, irrespective of skill and craftsmanship. From these and many other points of view, we find it being urged in various quarters that, in order that the printing craft may be able to cope with present conditions, and be able to resume its pre-war status, due regard should be given to the question of skill and craftsmanship as the criterion for securing a more just and equitable remuneration.

In keeping with the unfortunate experience of trade unionism generally is that of the Leeds Typographical Society, whose quarterly report says that the main feature of the past three months has been the enormous amount of unemployment and short time in the city. The expenditure on account of the special branch unemployment fund has exceeded the income by more than £285, while the gross expenditure for the quarter exceeds £6,860—a record in the history of the society.

In the paper trade employment continues slack, and of nearly 7,000 workpeople for whom returns were received 52 per cent. are working an average of 12 hours per week short time. A number of employers report a shortage of fuel.

OWING to statements which have been made by responsible labour leaders, the Federation of British Industries points out that it takes no part in politics whatever, and has never at any time supported or worked for Parliamentary candidates.

PENSIONS BAZAAR.—As the result of a bazaar arranged by the Watford employees of Messrs. Waterlow and Sons, Ltd., on Saturday, the Printers' Pension, Almshouse and Orphan Asylum Corporation will benefit by at least £750.

THE officials of the Lloyd Memorial Home, Deal, have recently acquired, at a cost of £2,000, a number of residential houses, which are to serve as an annex to the Home. This new addition will be capable of giving accommodation to 200 people.

## Unemployment Decreasing.

### Position in the Paper and Allied Trades.

Unemployment is decreasing in the paper and allied trades, but the decrease is especially marked in papermaking and staining. The estimated number of insured workpeople in papermaking and staining is put at 56,840, comprising 38,590 males and 18,250 females. At July 29th the number of unemployment books and out-of-work donation policies remaining lodged was 6,851, representing 4,174 males and 2,677 females. The percentage unemployed works out at 12.05 (10.82 in the case of males and 14.67 in the case of females). The total decrease compared with June 24th in unemployment is thus 15.27 per cent. (15.36 per cent. males and 15.07 per cent. females).

The estimated number of insured workpeople in the manufactured stationery trade is 68,390, of whom 22,580 are males and 45,810 females. Total unemployment at July 29th was 8,237, a figure which included 2,224 males and 6,013 females. The percentage of unemployment was 12.04 (9.85 in the case of males and 13.13 in the case of females). These figures represent a total decrease compared with June 24th of 2.30 per cent. (2.29 per cent. males and 3.28 per cent. females).

In the case of the printing, publishing and bookbinding trades the decrease in unemployment shows a smaller variation. The estimated number of insured workpeople is 220,160, made up of 144,590 males and 75,570 females. Total unemployment at July 29th affected 18,623 workpeople (11,906 males and 6,717 females). The total percentage of unemployment was 8.66 (8.23 males and 8.89 females). The total decrease compared with June 24th was 1.05 per cent. (0.56 per cent. in the case of males and 2.00 per cent. in the case of females).

Short time continues to be a feature of the papermaking and staining industries, and the total percentage of 10.23 was among the highest recorded in the *Labour Gazette*. The total number of workpeople who were on systematic short time on July 29th in this particular trade was 5,813 (3,725 males, 2,088 females). The total decreases, compared with June 24th were 5,862 (males 3,697, females 2,165). As already stated, the total percentage on short time was 10.23 (males 9.65 and females 11.44). Compared with June 24th, there was a total decrease of 10.31 per cent. (males 9.58 per cent. and females 11.86 per cent.).

In the manufactured stationery industry 5,132 workpeople were on short time at July 29th, representing 778 males and 4,354 females. The total decrease, as compared with June 24th, was 3,961 (853 males and 3,108 females). The percentage of workpeople on short time at the end of July was, total, 7.50 (males 3.45, females 9.50). The figures represent a total decrease of 5.80 per cent. (males 3.77 per cent., females 6.79 per cent.).

Although the total number of workpeople

employed in the printing, publishing and bookbinding section of the allied industries is considerably in excess of those engaged in other branches, the number on short time at July 29th was less, the total being 3,827, made up of 1,544 males and 2,283 females. The total decrease compared with June 24th was 5,309 (2,395 males and 2,914 females). The total percentage of workpeople on short time at the end of July was 1.74 (1.07 males and 3.02 females). Compared with June 24th, the total decrease is 2.41 per cent. (1.65 per cent. males and 3.86 per cent. females).

For what it is worth, we may mention the figures furnished by certain employers as to the number of workpeople employed and the amount of wages paid in the week ended July 23rd. The total employed is 10,704, an increase of 23.9 per cent. compared with the previous month, but a decrease of 13.7 as against the position a year ago. The wages paid amounted to £29,070, an increase of 21.1 per cent. on the previous month, and a decrease of 25.6 per cent. as compared with a year before.

## British Industries Fair.

### Opportunity for Printers.

Invitations are just out asking industrial concerns and business houses to secure space at the British Industries Fair which will be held at the White City, Shepherd's Bush, from February 27th to March 10th next. The accommodation last year was found to be more suitable than at the Crystal Palace, and the same plans as to classification will be made. Thus allied trades will be kept together so that visitors will run no risk of missing anything they ought to see.

There is again a prospect of a good display of stationery and printing goods, but it is hoped that more actual printers also will see their way to exhibit at the Fair.

A section of the Fair will be again devoted to paper, printing, publishing, stationery and stationers' sundries and office appliances. Hitherto actual papermakers have not taken advantage of the opportunities which the Fair offers for advertising British paper, and it is thought in some quarters that it is high time they did so. While trade is not particularly good at the moment, this is just the time to prepare to capture it when it is again in full swing. All the papermakers will be grouped together and will be housed in the same building as the printers and stationers. The more imposing the show made, the more impression will be made upon the home and foreign visitors who will be attracted to Shepherd's Bush.

It may be mentioned that of the 3s. 6d. per square foot that is charged for floor space, 6d. goes in advertising overseas, and with a new confectionery section added next year there will be more money available for this purpose.

## Trade Notes.

MR. JOHN MACAULAY, Greenock, one of the proprietors of the *Greenock Telegraph*, left £16,872

FROM Cape Town is announced the death of Mr. Edmund Powell, ex-senator and formerly editor of the *Cape Argus*.

THERE was a large attendance of the general public and of the Order of Oddfellows, with which he had been connected as an official for many years, at the funeral on Monday of Mr. David Williams, printer and stationer, Bridgend.

DESCRIBING himself as a printer in Glasgow, Louis Gilbey or Ginsburg, aged 32, was at Bootle, Liverpool, on Friday, committed to prison for three months with hard labour for having obtained by false pretences a diamond ring, value £19.

WILLS.—Ald. Arthur Truelove, Wolstenholme-road, Sheffield, cardboard-box manufacturer—£54,317; Mr. Amos Gibbins, Liverpool, printer (net personalty, £1,322), £1,377; Mr. Lanfear Robson Tanner, of Frome, printer and binder, £47,388; Mr. Robert Brazier, of Oxford, journalist, £1,926; Mr. David Roberts, Swansea, a director of the *Cambria Daily Leader*, £24,500.

FOR wilfully breaking a pane of glass, valued at £1, at the premises of Odham's Press, Ltd., Long-acre, W.C., printers of *John Bull*, George Pressley, 40, teacher of dancing, of King-street, Aberdeen, was at Bow-street last week fined 40s., and ordered to pay the amount of the damage. The defendant was a heavy loser in the Farrow's Bank disaster, and took objection to remarks about the failure by Mr. Bottomley in *John Bull*.

POSTAL RATES ABSURDITY.—A large piece of white cardboard, measuring 24-in. by 12-in., the maximum size allowed for post cards, and containing an address and the impression of a rubber stamp advertisement, and franked with one penny stamp, was duly delivered. During its transmission this gigantic "post card" must have been a nuisance at every step. Yet the Post Office seeks no more than a penny for handling it, while the ordinary post card conveying only the message "Arrived safely" must bear a 1½d. stamp.

PROCESS BLOCK TRADE MARK.—In respect of the new registered mark (recently illustrated in our pages) used by members of the Federation of Master Process Engravers an interesting case has cropped up in the Midlands in which a non-Federation house was discovered to have sold blocks bearing this mark. Inquiry by the Federation, however, elicited the fact that the blocks had been made by a Federation house and paid for at Federation prices by the first purchaser, but had then passed through the hands of the second seller, a foreign agent. Steps are being taken, we understand, to prevent such a thing recurring.

MAXIMILIAN HARDEN'S *Die Zukunft* is to cease publication.

BREECHES BIBLE.—General Henry Alexander Cockburn, of Eskgrove, Inveresk, Midlothian, who died on August 20th, bequeathed his copy of the Breeches Bible to his son.

THE *Hull Daily News*, by a campaign against the high cost of living, has earned a special expression of thanks from the Hull Branch of the Typographical Association.

U.S. PRICES.—In spite of the drop in paper price and binding costs, it costs as much to make a book in the United States as it did a year ago, as there were decided increases in printing costs last fall on the wage increase and again on May 1st, when the 44-hour week went into effect.

FORDNEY TARIFF.—Major George Haven Putnam, the well-known New York publisher, is one of those who, in view of the provisions of the proposed new U.S. tariff, predicts that the burden of the proposed duties will bring practically to an end the importation of European books in editions.

LIBRARIANS AND PUBLISHERS.—The annual conference of the Library Association is to be held at the College of Technology, Manchester, during the week beginning September 12th. The publishers' exhibition, associated with the conference for the first time last year, is expected to have grown to such an extent as in itself to mark the conference as one of the most important ever held by the association. The space available at the college is being eagerly taken up by the leading publishing houses.

FORTHCOMING LONDON DAILY. — Rumour develops in respect of the expected launching in London of a first-class daily newspaper on Independent Liberal lines. Mentioned in connection with the project are Sir Charles Stormer, the controller of the *Sheffield Independent*, *Birmingham Gazette*, and the *Northern Echo*, and the proprietors and editor of the *Westminster Gazette*, while it is stated that the machinery and other plant to be used will be those of the *Standard*, unused since the demise of that journal.

INSTITUTE OF JOURNALISTS. — Apropos of the holding by the Institute of Journalists of its annual conference at Bournemouth on the 31st ult., Mr. Robert Donald wrote to *The Times* urging that the occasion be used for an inquiry into the position and prospects of the institute, which is in a bad way financially. "The deficit on the year," he writes, "is £630—more than one-third of the amount received in subscriptions—£1,568. The secretariat salaries are about 55 per cent. of the income from members, and with office expenses nearly 60 per cent. The vigorous rival organisation, the National Union of Journalists, without the advantage of age or of a Royal Charter or of endowment, has three times as many members—all working journalists—and nearly four times the subscriptions, and only spends 15 per cent. on its officials or 22 per cent. with office expenses."

**FORTY-THIRD YEAR.**

*Printed and Published EVERY THURSDAY*  
 by **STONHILL & GILLIS,**  
 at 58, Shoe Lane, London, E.C. 4.  
**Tel.: Stonhill, Fleet, London. Phone: 8407 City.**

**SUBSCRIPTION:** Per Annum, 8s. 8d. (POSTAGE EXTRA).

**Charges for Trade Advertisements:**

(Full page 8 by 5 1/4 ins.)

Whole Page ...	£4 10 0		s. d.
Half Page ...	2 10 0	One-eighth Page	17 6
Third Page ...	1 17 6	One-third Column	22 6
Quarter Page...	1 10 0	One inch in Column	9 0

An Extra Charge for Cover and Special Positions.  
 Discounts according to Number of Insertions.

Representatives throughout the United Kingdom and also in Australia, India, South Africa, United States Canada, etc.

All communications for the "BRITISH AND COLONIAL PRINTER AND STATIONER" should be addressed and Cheques and Post Office Orders made payable to—**STONHILL & GILLIS, 58, SHOE-LANE, LONDON, E.C.4**

Copies may be purchased at the Office, as above or from Messrs. W. H. Everett and Son, Ltd., news-agents, 11, St. Bride-street, E.C.4.

THURSDAY, SEPTEMBER 1, 1921.

## Current Topics.

### Ballot Results.

THE results of the wages ballot have given rise to a position that holds dangerous possibilities. Ballot figures have not been made public, but it is known that while the offered terms of wage-reduction (5s. and 2s. 6d. men; 2s. and 1s., women) have been accepted by the National Union of Printing, Bookbinding, Machine Ruling and Paper Workers, the Amalgamated Society of Lithographic Artists, the Society of Women employed in the Book-binding and Kindred Trades (Miss Forsyth's Union), and the Women's Section of the National Society of Operative Printers and Assistants, they have been rejected by most of the male workers, including the members of the Typographical Association, the Scottish Typographical Association, the National Society of Electrotypers and Stereotypers, and the trade unions confined to the London area.

### A Difficult Position.

FOLLOWING upon the ascertainment of the ballot results, the Federation of Master Printers has instructed its members to give notice to members of the trade unions who have rejected the proposals that wages will be reduced by 7s. 6d. per week on the pay day in the week ending September 24th. We hear that, in view of this development, some of the trade unions are instructing their members that the posting of notices of wage-reduction is to be taken as notice of termination of contracts. Thus the position holds all the possibilities of serious trouble for the industry. We are confident, however, that affairs will not be allowed to drift to a climax without the most vigorous efforts on both sides to find some peaceable way out of the threatened stoppage. At the time of printing (Wednesday) the position is being considered at important meetings of the London Master Printers' Association and the Administrative Council of the Printing and Kindred Trades Federation of the United Kingdom. The very good relations hitherto existing between the two sides are still being maintained, and while this is the case there is ground for hope that the dispute may admit of a pacific settlement.

• • •

### The S.O. and a Printers' "Ring."

THE charge is once more preferred—in the White Paper dealt with on another page—that efforts towards economy on the part of H.M. Stationery Office are thwarted by a "ring" among contracting printers. It is admitted, however, that the said printers have not been given opportunity of presenting any evidence in refutation of the charge. It was in 1907, we believe, that a similar allegation was put forward, and on that occasion the printers were able to produce convincing evidence that the charge was false. More will doubtless be heard of this matter, and we think the contractors of to-day will have a strong case to present in contradicting the present accusation, for is it not common knowledge that the severe competition for Government work makes it necessary that the printers who hope to secure contracts or to maintain those they hold should quote the lowest prices they reasonably can? It is gratifying to note, by the way, that in the same White Paper support is given to the printing trade's contention that the expansion of State printing schemes would serve no purpose of public advantage, but would act rather in the direction of the extension of the realms of "squandermania."

**The Increased-Postage Blunder.**

THE remarks of Sir Adolph Tuck at the annual meeting of the company over which he presides (reported on another page) have again brought into the limelight the subject of the ill effects of the recent increases in postal rates. The big profit shown by this very successful company is not a valid argument in the hands of the official advocates of the new taxes on trade, as the company's picture post card business, immense as it is, represents only 10 per cent. of the total turnover of Messrs. Raphael Tuck and Sons, Ltd., and—more important still—the damage inflicted by the Post Office imposts can hardly be reflected in this year's balance-sheet, which deals with the financial year ending on April 30th. We commend to the serious attention of the Postmaster-General Sir Adolph Tuck's figure of 50 per cent. as representing the ascertained cut in picture post card business, directly attributable to the revised postage regulations. If sales are halved, postages are halved; therefore, even when the increased postage is allowed for, the result must be a heavy decrease in Post Office revenue instead of the substantial increase bargained for. Moreover, all the signs go to show that the increased rates for printed matter are operating in the same unfortunate direction, the Post Office revenue failing to benefit while trade in general and the printing industry in particular suffer a most damaging handicap. The Press of the country appears to be unanimous in its condemnation of this anti-business policy of officialdom. A leading financial journal goes so far as to remark that "it sometimes seems a pity that a definite penalty should not await any Minister who follows a wrong course against the plainest warning and with disastrous results." We are not out for scalps, but we do urge that this question of postage be given early reconsideration before further and almost irremediable harm is inflicted on British industry.

**HOME COUNTIES PRINTERS' OUTINGS.**—Any master printer in the Home Counties area who has not received an invitation to be present at one of the four attractive group outings arranged by the Home Counties Master Printers' Alliance should communicate with the secretary of the Alliance (24, Holborn), a most interesting series of gatherings having been arranged, to which all printers in the Home Counties will be welcomed.

AMONG the firms which have recently become members of the Federation of British Industries are Messrs. Hugh Stevenson and Sons, Ltd., Manchester, and the Federation of Paper Tube Makers, Rochdale.

**Personal.**

THE printer-President of the United States has honoured another printer by appointing as Governor of Hawaii Mr. Wallace B. Farrington, publisher of the Honolulu *Star-Bulletin*. Both Mr. Harding and Mr. Farrington are members of U.S. master printers' organisation, the United Typothetæ.

LORD NORTHCLIFFE last week, given an official welcome by the authorities of Auckland (N.Z.), said he had no intention of starting a newspaper in Australia.

MR. F. L. ARMSTRONG, general secretary of the Employers' Federation of Envelope Makers and Manufacturing Stationers, has been appointed secretary of the Newspaper Society in succession to Mr. Frank Bird. During his association with the Envelope Makers Mr. Armstrong has made a special study of labour problems, and his knowledge and experience in this connection will stand him in good stead in the new office which he will take up in conjunction with his old. The part-time services of Mr. D. G. Little are to be retained. The Newspaper Society, by the way, are taking new offices in Salisbury-square.

THE Mayor of Swindon, Alderman E. Jones, who is blind, last Thursday started at the offices of the *Swindon Evening Advertiser* the new rotary press installed there. He took away as souvenirs the first dozen papers he had printed.

AMONG seven new magistrates on the Commission of the Peace for the city of Wells is Mr. J. C. Davis, the representative of the *Western Gazette* for the Wells district.

SIR HENRY GRAYSON, M.P., Chairman of H. and C. Grayson, the Liverpool ship-builders, and his son, Mr. Rupert Grayson, have joined the Board of the Eveleigh Nash Publishing Co., which in future will be known as Eveleigh Nash and Grayson, Ltd.

THE *Montreal Star* announces that Mr. F. Crandall, for ten years its executive editor, has taken over the publication and management of the *Vancouver World*, which he and his associates have recently purchased. Mr. Crandall is a director of the Canadian Press Ltd., is prominent in Canadian journalism, and, as honorary secretary of the Canadian Press Committee last year, successfully planned and carried out the meetings and Canadian tour of the Imperial Press Conference.

MR. W. MONKHOUSE, president of the Drawing Office Materials Association, is spending a holiday at Le Toquet, France.

## DIVIDENDS AND REPORTS.

**CROPPER AND Co., LTD.**—Report of Cropper and Co. for year to June 30th, 1921, shows net profits, after deducting depreciation, etc., of £18,129, plus £2,997 brought forward. It is proposed to pay on ordinary shares a final dividend of 2½ per cent, making 5 per cent. for year, writing off expenses in connection with new issue of capital £2,088, and carrying forward £2,793.

## NEW COMPANIES.

**R. ACKRILL, LTD.**—Capital £20,000 in £1 shares: to take over the business of general printers, newspaper proprietors, printers and publishers, billposters, advertising agents, lithographers, electrotypers, engravers, type-founders, typecutters, booksellers, stationers and dealers in type, ink, paper and other materials, etc., carried on by W. H. Breare and Ellen Breare, at Harrogate, Ripon, Pateley Bridge and elsewhere as "R. Ackrill." Private company. First directors: W. H. Breare,

Ellen Breare, R. A. Breare, J. B. Breare and L. D. Breare. Registered offices: Herald-buildings, Montpellier-parade Harrogate.

**WILLIAM EGLINGTON, LTD.**—Capital £2,500 in £1 shares; proprietors and publishers of newspapers, journals, directories, magazines, books and other literary works, printers, stationers, lithographers, etc., and to adopt an agreement with W. Eglington. Private company. Subscribers: W. Eglington and W. E. Eglington. Registered office: 76, Finsbury-pavement, E.C.

**JOHN PETERS, LTD.**—Capital £1,000 in 750 shares of £1 each and 5,000 founders' shares of 1s. each; to take over the business of a print seller and publisher carried on by J. Peters at Guildhall-buildings, Navigation-street, Birmingham. Private company. Subscribers: J. Peters and W. Bigland. Registered office: Guildhall-buildings, Navigation-street, Birmingham.

**GLASGOW CIGARETTE PAPER CO., LTD.**—Capital £1,000 in £1 shares; to acquire the business of manufacturers of patent cigarette paper machines and cigarette paper tubes carried on at 364, Broad-street, Mile-end, Glasgow, by D. Molian as the "Glasgow Cigarette Paper Co." Private company. First directors: J. Gillies and D. Molian. Registered office: 133, St. Vincent-street, Glasgow.

## COMPANY MORTGAGES AND CHARGES.

Frash Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 1908, and Satisfaction registered pursuant to Section 97 of the same Act. (The registration of Satisfaction is not compulsory).

**LYLE TRADING AND MANUFACTURING CO. LTD.** (stationers, printers, engravers, manufacturers of photographic apparatus, envelopes, paper bags, tickets, boards, furniture, etc., London).—Satisfaction to the extent of £50 on May 26th, 1921, of debentures dated March 28th, 1907, securing £5,000.

**MAYHEW BROTHERS, LTD.** (trade manufacturing stationers, etc., London).—Particulars of £500 debentures authorised July 30th, 1921; present issue £200; charged on company's property, present and future, including uncalled capital.

**PHILIPSON AND SON, LTD.** (process engravers and art photographers, etc.).—Mortgage dated August 9th, 1921, to secure £2,000.

charged on 18 and 20, Oxford-street, New-castle-on-Tyne. Holder: W. Vincent, 15, Moonfield, Highwest Jesmond, Newcastle-on-Tyne.

**GREENFIELD AND CO., LTD.** (box manufacturers).—Mortgage dated August 12th, 1921, to secure £1,500, charged on land with Victoria Mills thereon, in Salford, Lancs. Holder: Mrs. M. Field, Aynsome, Oakfield-road, Didsbury, Manchester.

**MARSDEN AND CO., LTD.** (proprietors and publishers *Textile Mercury*, etc., Manchester).—Particulars of £8,000 debentures, authorised August 16th, 1921; whole amount issued; charged on the company's undertaking and property, present and future, including uncalled capital.

**JAMES SMITH AND SON, MUSIC SELLERS, LTD.** (Liverpool).—Satisfaction in full on February 4th, 1920, of mortgage debentures dated May 15th, 1913, securing £5,000 (notified August 16th, 1921).

**IRISH PAPER MILLS CO., LTD.**—Trust deed dated July 28th (supplemental to deed dated May 25th, 1921, securing £150,000 debentures) charged on certain freehold properties, rights, easements, appurtenances, plant and machinery, etc. Trustees: National Provincial and Union Bank of England.

**ASSOCIATED PAPER MILLS, LTD.** (formerly Amalgamated Paper Mills, Ltd.).—Particulars of £150,000 debentures authorised July 29th, 1921, whole amount issued; charged on the company's undertaking and property, present and future, including uncalled capital. The company undertakes to grant disposition in security on the Kelvindale Paper Mills, Maryhill, Glasgow.

## Gazette.

### A WORD OF CAUTION.

In giving the official Gazette information, it must be distinctly understood that we take official records as we find them, and accept no responsibility for inaccuracies, while, as an almost invariable rule, the facts will be found correct. We advise our readers, before forming hasty judgment, to consider that there may be in each case satisfactory explanation which does not appear on the records.—Ed.]

### ENGLAND AND WALES.

#### PARTNERSHIPS DISSOLVED.

Harry Barnett Woodburn, Martin Henry Jenkins, and Alfred Clifton Griffin, wood engravers, Bangor House, 68, Shoe-lane, E.C. Georges Thorelle and Maxwell Winter, sellers of gold leaf, 118 and 119, Cheapside, E.C. Charles Edward Henry Wann. Stanley Alexander Victor Probyn and Ernest Harris Siddway, advertising agents, 458, Seven Sisters-road, N.

#### THE BANKRUPTCY ACT, 1914. RECEIVING ORDER.

Hackett, H. D., 47, Leage-street, Old-street, waste paper merchant, August 24th. Public examination, December 9th, at Bankruptcy-buildings, Carey-street.

## The Picture Post Card Trade.

### Raphael Tuck and Sons' Report.

Despite the adverse effect upon the picture post card trade of the recent alteration in postal rates—occurring late in the concluded trading year—a very satisfactory report was presented at the ordinary general meeting of Raphael Tuck and Sons, Ltd., held on Wednesday of last week. Sir Adolph Tuck, Bart., the chairman of the company, presided, and drew attention to the fact that the present company has now entered upon its 21st year, and the business has completed the fifty-fifth year of its existence in one unbroken line. He was able to state that, so far as volume is concerned, the past year's trade was the largest in the history of the company, actually above last year's figures, which were then the highest on record. On the other hand, the expenditure during the twelve months under review, from May 1st, 1920, to April 30th, 1921, was abnormally high. With regard to the company's Paris branch, the poor state of trade in France, coupled with heavy and unfair taxation, was compelling the directors to consider the advisability of closing this branch, and working the French market from London.

### Post Card Postage.

Dealing at some length with the question of the increased postal rates, Sir Adolph reviewed the great efforts made by the trade in opposition to these imposts, but he added that the final upshot was that the carefully considered opinion of the picture post card trade, the opinion of all practical men, and of almost the whole of the Press of the country was simply ignored, and instead, the advice of a few gentlemen comfortably seated behind their desks in St. Martin's-le-Grand, was taken, and this ill-considered increase rushed through Parliament. What was the result? From the very day the postage was raised—namely, June 13th—the predicted drop in the sale of picture post cards occurred, and as chairman of the committee combating this blunder, it had fallen to his (Sir Adolph's) lot to receive many hundreds of communications from retailers throughout the country, many of them couched in strong language, giving the actual percentage of the loss of sales from the day the increase started, this loss averaging nearly 50 per cent.

The company's trade in Christmas and New Year cards, birthday cards and greeting cards generally was reported to be maintaining its strong position.

The net profit was stated as £47,363 odd, and the proposed dividend of 10p.c. and allocation of profits as indicated in our commercial intelligence pages last week, were approved.

**MESSRS. J. A. HARGREAVES AND SON**, paper merchants, announce they have removed to 11, Garden-street, Leeds.

# Canadian Copyright Act, 1921. Benn Brothers and Bureaucracy.

The Board of Trade have received copy of the Canadian Copyright Act, 1921, assented to on June 4th, 1921, which amends and consolidates the Law relating to copyright. This Act repeals all existing copyright Laws in Canada, both Imperial (in so far as they are in force in Canada, and provided that legal rights existing at the time of repeal are not prejudicially affected) and Canadian. It will not come into operation until proclaimed in force by the Governor in Council.

By Section 4 copyright is conferred upon every original literary, dramatic, musical, and artistic work, if the author was at the date of the making of the work a British subject, a citizen or subject of a foreign country which has adhered to the revised Berne Copyright Convention of 1908, and the Additional Protocol thereto, or resident within H.M. Dominions; and if in the case of a published work, the work was first published within H.M. Dominions or in such foreign country. Registration is optional, but a certificate of registration is to be *prima facie* evidence of the existence and ownership of copyright.

Section 13 provides that if the owner of the copyright in a book fails to print the book in Canada, and to supply the reasonable demands of the Canadian market by means of copies printed in Canada, any person may apply in the prescribed form to the Copyright Office for a licence to print and publish the book in Canada.

When such a licence has been granted, importation of copies, except in certain specified cases, is prohibited under Section 27 of the Act. The principal exception is that copies of any book lawfully printed in the United Kingdom or in a foreign country which has adhered to the Convention and Additional Protocol, and published and sold in that country, may be imported into Canada, subject to any evidence of facts required by the Canadian Customs.

A VERY useful little book on "Rules and Conduct of Debate," by G. K. and T. E. Naylor, has been published by Ellis and King, 20, Willowbridge-road, Canonbury, N. (Price 2s.).

MESSRS. SLATER AND PALMER send us specimen prints showing how effectively very varied subjects—from landscape to portraiture—can be executed in three-colour work by the use of their yellow No. 97, red No. 99, and blue No. 98.

MESSRS. JOHN DICKINSON are making a special mail card, 8 by 10 ins., suitable for transmission through the post at a penny. The size of the card, which is made from Dickinson's 8-sheet international quality pasteboards, can be used, as the firm's own announcement shows, as a means of effectively advertising and illustrating special lines of goods.

At the twenty-fifth annual general meeting of Benn Brothers, Ltd., held on Friday, the proposed dividend making 15 per cent. for the past year was approved and Sir John Williams Benn, Bt., D.L., J.P., L.C.C., had some interesting remarks to make.

Mentioning that, as the net result of their considerable investment, the shareholders receive a sum of £11,307, he said that to secure this no less than £180,000 had passed, in one way or another, to wage-earners, and approximately £20,000 to the National Treasury. Reductions of wages were in the air, and it might be perhaps assumed that this £180,000 will grow less. He did not think so. It was true that this large item represented the highest wage standard extant in our industry, but in his judgment any wage reduction would really result in a total increase of this labour item, as the result would be extension of business.

Severely criticising governmental interference with industry, he remarked that the present rate and manner of taxation offers a premium to bankruptcy and unemployment. As an example, he cited the recent corporation tax. "It is not to Labour," he said, "but in another direction that we have to look for the greatest obstacle to activity and progress which now bars the industrial path. The bureaucrat must be swept out of the way."

**DANISH PRISON NEWSPAPER.**—The Danish prison authorities, in connection with the introduction of reforms, are considering the adoption of the American idea of the publication of a newspaper for prisoners. The paper will cover political, home, foreign, and general news, and possibly have pictures.

**FOREIGN POSTAGE RATES.**—The Postmaster-General finds it necessary to draw attention to the fact that considerable numbers of insufficiently stamped letters are being sent through the post to places abroad and more especially to the Continent. A loss of revenue to the British Post Office is involved, as such letters are duly forwarded and charged on delivery with double the amount of the deficiency; but the surcharge is retained by the foreign administrations. The prepaid rate of postage on letters for all foreign countries (except the United States of America and Tangier) is 3d. for the first ounce and 1½d. for each succeeding ounce or fraction of an ounce; from the United Kingdom to British Possessions generally, the United States, Tangier and H.M. ships and troops on foreign stations, the letter rate is 2d. for the first ounce and 1½d. for each succeeding ounce or fraction thereof. The dispatch of mails will be greatly facilitated if the correct rate of postage is prepaid.

Don't work for applause. Work for results. The applause will then take care of itself.

## Printing for the Blind.

### Work of the National Institute.

In providing the blind with reading matter, inestimable service is rendered by the National Institute for the Blind (Great Portland-street), whose well-known president is Sir Arthur Pearson, Bart., G.B.E., and in whose list of vice-presidents are several names familiar to printers, including those of Viscount Northcliffe, Viscount Rothermere, Sir T. Vansittart Bowater, Bart., and Sir W. Robertson Nicoll, M.A., LL.D. It will be remembered, too, that Major H. Fordyce-Birch, late secretary of the London Master Printers' Association, recently transferred his services to the Institute.

The Institute's editorial and publishing department is mainly concerned with the production of books and magazines in the two embossed types, Braille and Moon. The extent of this branch of the Institute's work may be gauged by the number of publications issued during the year ending March 31st, covered by the annual report which has just reached us. The figures are:—Braille publications, including music, 250,295; Moon publications, 22,460; while 8,279 volumes, newspapers and pamphlets were supplied free to the National Library for the Blind during the year.

Fourteen Braille magazines and newspapers are published, and particular mention should also be made of the Braille and Moon editions of the Bible which are published and extensively circulated.

Embossing processes being of great utility in the production of educational and other apparatus for the blind, the Institute's printing department has made this branch of the trade the subject of some valuable and experimental work under the direction of Mr. J. Acton, and some very interesting "pictures" for blind readers have formed part of the results achieved.

Books of an educational and special character are provided by the manuscript department, where every effort is made to meet the constant demands for educational works of all descriptions; 1,428 volumes were produced by this department during the year.

The loss to the Institute by its gifts and by the sale at a greatly reduced price of its Braille literature, apparatus, etc., represented during the year the sum of £24,293.

THE export of paper cuttings and waste paper, rags, white, and vegetable fibre from Spain is prohibited.

THE Swedish Consul General for Peru, who is now on a visit at Gothenburg for the purpose of preparing more intimate commercial relations between Sweden and Peru, states that among other things paper can now be exported to and sold in Peru, which is able to send cotton, rubber, sugar, etc., in return.

## Printing and Allied Trades CHARITY SPORTS ASSOCIATION.

### Successful Swimming Gala.

Some fine swimming was witnessed at this annual event of the Association, which took place on Saturday at Shoreditch Baths, Hoxton. Many of the trade and open events were keenly contested, and during the evening a graceful diving display was given by the ladies of the Mermaid Swimming Club. The officials were Sir William A. Waterlow, K.B.E. (president), Edgar L. Waterlow and J. J. Keliher (vice-presidents), A. G. Wills and H. F. Parker (secretaries), and A. Hudson (timekeeper).

Among the trade events was the 33 yards team championship of the printing trades for the John Fry Cup, which resulted in an easy and popular win for the Belle Sauvage Club, with Waterlow's 2nd, and the Amalgamated Press 3rd.

The relay race for teams representing the London daily newspapers resulted in the handsome Borthwick Challenge Bowl being retained by *The Times*, who swam over, there being no challengers.

Besides several interesting open events there was also some good sport witnessed in the Polo match, which resulted in a win for Avondale over Penguin by three goals to one.

The satisfactory manner in which the gala was organised reflected much credit on the officials.

TENDERS are invited for printing and stationery for the Limavady Board of Guardians and Rural District Council (latest date September 5th) and for the Maldon Union and for the Rural District Council of Maldon (September 21st).

ALLEGED PARCHMENT FRAUD.—At Mansion House Police Court Frederick Harvey, 66, printer's cutter, and Edward James Stocker, 45, electrician, both living at Victoria-road, Holloway, were charged with being concerned together in obtaining by means of a forged order four reams of parchment paper, value £3 17s., from Messrs. Wiggins, Teape and Co. (1919), Ltd., with intent to defraud. On the previous day the accused called at prosecutors' warehouse, and Harvey presented an order purporting to be signed by Messrs. Driver, stationers, of 62, Carter-lane, E.C. The manager noticed that the order was not on Drivers' usual form, and he communicated with them by telephone. The order was not signed by Drivers, nor by their authority. Detective-sergeant Addison stated that there had been complaints of 12 similar transactions, and Harvey answered the description of a man wanted. A remand was granted, bail for Harvey being refused.

# The Bookbinder.

## To-Day's Book-Covering Materials.

The slump in orders and the high costs of paper and printing have led recently to the adoption of some rather unorthodox and undesirable materials for book covers. Like the cretonne craze, which has made ladies' dresses uncomfortably reminiscent of ottoman covers, the craze for cheapness has produced books the sight of which would have sent a shiver down the spine of a binder-craftsman of the olden days; indeed, even these very cretonnes have been seen on productions which hitherto have appeared in bookbinders' cloth.

There are signs now that the boom in cheapness has passed its zenith, and a return is beginning toward materials more worthy of the binder's skill. Genuine "full bindings," however, are still largely out of the running, for prices of leathers are prohibitive for ordinary purposes; moreover, the cost of the raw material is still rising, and though no one seems to know just why prices should be thus appreciating—contrary to the movement in prices of most commodities—there seems little basis for anticipating an early break in the leather market. More reasonable prices, nevertheless, are bound to come, and their coming may be hastened somewhat by the present action of binders in subsisting largely on stocks and exercising the greatest caution where buying has to be done. With paper cheaper, and hopes not yet dead that printing prices may follow suit, there should soon be some signs of revival in the use of leather—the binder's material *par excellence*. Meanwhile, it is satisfactory to learn that there has of late been a slight but perceptible strengthening of the demand for the better quality cloths, which means the fuller utilisation of the art of the craftsman and the capabilities of the binder's machinery, both of which can give a better account of themselves when working with the more substantial materials. On the other hand, the fact must not be overlooked that the cheaper coverings have their place. Many of the materials which go by the rather disparaging name of "imitations"—imitation leathers, cloths, and the like—are of very serviceable quality; moreover, even for the more ephemeral of these materials it can be claimed that they fill a real need in giving merely temporary protection and neatness to volumes, necessarily cheap, intended only to be read and cast aside.

A glance at the stocks of some of the dealers in covering materials shows that the book-

binder of to-day has a most varied range of materials at his disposal, a range from which he should be able to make selections that will meet the requirement of every class of customer.

Imitation leathers are, of course, a line of manufacture that has made immense strides forward of late years. Some of the best products of this kind are scarcely distinguishable from the real thing, and some of them, while not remarkably good as imitations, have yet an attractiveness all their own. One of the latest things of the sort we have seen is the imitation chamois submitted to us recently among British Pluviusin specimens. This is a distinctive and attractive material, and is made in a number of different stock shades. It is a creditable addition to the same company's other imitation leathers.

In book cloths, one cannot but be impressed by the immense range of choice offered among the productions of the Winterbottom Book Cloth Co., a concern which has been in the market for 30 years or more, and has established a world-wide reputation. Among this firm's newer manufactures we find their art vellums in great demand, the excellent designs of these and their surprising variety of colourings rendering them very generally popular. The same makers' art canvas, art cambrics, art linens, etc., also enjoy deserved popularity, while fresh interest has lately been manifested in their "Winvis," a semi-waterproof material, which can be readily cleansed, while great advantages are claimed for it in respect of export requirements by virtue of its resistance to damp and to the attacks of destructive insects.

We hear there have been big demands lately, especially in respect of publishers' fiction binding, for the materials known as "Clochette" and "Fibrette," manufactured by Messrs. Garwood and Muddiman. Of these attractive imitation cloths, the former is a natural coloured substance, which wears the same colour all through, while the latter, surface coloured, has an exceptionally bright finish. In the purchase of these materials the binder is able to make special arrangements in regard to exclusive colours, etc., to enable him to satisfy publishers' requirements.

Among the more substantial materials of which we anticipate there will soon be more extensive use, mention must be made of Messrs. Nickerson Brothers' "Legal Buckram."

It speaks volumes for this buckram that it satisfies the severe requirements of the Bureau of Standards of the United States in the specification of buckram for binding volumes to be filed for record. We understand Messrs. Nickerson guarantee this material to be free from aniline dyes, all material attractive to insects, and to be absolutely sun-fast. The ease with which "Legal Buckram" works, the non-glossy under-side taking adhesive readily, is also a point in its favour, to which the practical binder attaches much importance.

In the market for buckrams it is probable more may soon be heard of the Manchester firm of T. Williamson and Co., whose linen buckram was not produced during the war. Messrs. Williamson, we understand, are considering putting this material on the market again, and anticipate being able to offer an all linen buckram at about the same price at which union buckram is selling to-day. The house of Williamson, by the way, can claim to have achieved something considerable in the way of development as manufacturers of bookbinders' cloths, etc., their business having grown from doing about a dozen shades in one quality to stocking about 40 different shades in three qualities, all of which can be embossed to a selection of about 40 designs, and when trade is normal selling several hundreds of rolls each week, this being exclusive of the trade in cotton and linen buckrams.

#### BINDING NOTES AND NEWS.

The bookbinding trade does not appear to have been quite so badly hit by the depression as the other side of the industry, but even so it is very difficult to find a house working full time. There are slight signs of improvement, except in the publishing section, and here no revival is expected until the cost of production warrants the issue of new editions. At the time of writing the result of the second ballot on wages is unknown, but if our anticipation is correct the wages question will be no nearer a definite settlement by the time these notes appear in print than it is now. The negotiations are extremely delicate, and the situation is full of dangerous possibilities so that our best course is to leave other anticipations alone and trust to the common-sense of the respective leaders. Granted a settlement of the wages question and the exit of August, which was a fearful month, there are brighter possibilities of trade improvement for the remaining months of the year. Not many houses will in any event finish this year with their trading account on the right side.

#### Prices of Materials.

Not much change has taken place during the last four weeks in the price of bookbinding materials. Leathers are at low level and there is talk of a hardening process when the demand sets in. There is very keen competition between makers and little or nothing to choose between their prices when quality and reliability is taken into consideration. The current market values range close to the following figures: Paste-grain skivers, 7½d., 8½d. and 10d. per square foot; glazed skivers,

6d. to 8d.; grained skivers, 6d. to 8d.; glazed basils, 8d. to 11d.; roller basils, 8d. to 9d.; fair basils, 10d. to 1s.; grained basils, 9½d. to 1s.; rough sheep, 8d. to 10d.; rough sheep fleashes, 7d.; rough moroccos, 10d.; fair calf, 1s. 9d. and 2s. 3d.; rough calf, 1s. 2d. and 1s. 6d.; selected rough goat, 1s. 2d.; velvet calf, 2s. 3d.; grained velvet calf, 2s. 3d.; velvet persians, 1s. 4d.; glazed persians, 1s. 1d. to 1s. 4d.; hard grained goat, 2s. 1d.; pigskins, 1s. 6d. to 1s. 9d.; Anglo hides, 1s. 6d., 1s. 9d. and 2s. to 2s. 6d. for best selected full covers.

#### The Slump in Boards.

Millboards have eased within recent weeks and the range of qualities on the market runs from the common foreign grey board at £25 per ton to the best black hand-made board at £50 per ton. Strawboards have no fixed value, as every binder who has asked for quotations must know. If there was a market value it would be in the region of £10 per ton for light substance unlined boards of first grade. Dutch quotations approximate to £8 10s. per ton when all the charges are covered. All this counts for little in the face of the absolute slump and the heavy stocks in store which are accumulating storage cost all the time. Some agents and merchants are willing and anxious to sell out at £8 per ton with an extra charge for small lots and carriage. For large orders £7 per ton (light weight basis) is a common quotation, and this week a special temporary offer at £6 per ton has been circulated.

#### Glues, Gold and Cloths.

Glues have resumed their downward trend and to-day quotations include best Scotch pale unstamped squares at £60 per ton. Reliable binder's glue can be secured at 52s. to 56s. per cwt. Gold leaf is steady at a figure in advance of earlier quotations. One or two importers who are well bought are offering stocks at an advantage to the buyer while they last. Bookcloths remain firm at the July level excepting for imported qualities which are being sold at about 2d. per yard below our standard makes. A second quality of English bookcloth is on the market at 1s. per yard. Buckrams range from 3s. 5d. (union material) to 4s. 6d. per yard, and the prices are firm. Calicoes are quoted from 6d. to 8d. per yard, and there is no immediate prospect of any decline. American leather cloths have recently been reduced, but the proprietary imitation leathers remain unaltered.

#### Lining Paper Demand.

Marble papers are in poor demand and increased attention is being paid to fancy lining papers. Messrs. L. S. Dixon and Co., of Cable-street, Liverpool, and Messrs. Samuel Jones, Ltd., of London, are offering useful patterns for the bookbinder. There is still a need for a cheap but good looking and suitable lining paper for stationery book end papers. Something cheaper than marble paper is needed, and there is no necessity to attempt any imitation of marbling effects. An English production at the present time could claim the market and deal to the marble paper trade a blow which it would not survive.

### Belgian Flints.

Belgian flints of remarkably fine finish, almost rivalling the gelatine surface, are being quoted to-day at 25s. per ream in double crown.

### Brisk Leather Development.

Messrs. A. and J. Shaw, Ltd., of Grantham, have appointed a new representative for the North and contemplate opening an office and storeroom in Manchester. There is a great need for leather stocks in that city, ranking, as it does, as the centre of the largest book-leather using fraternity in the country. A go-a-head house could secure many orders simply on the basis of prompt delivery, especially for small urgent orders. The great difficulty lies in securing accommodation, for there is not an available office anywhere near the centre of the city.

# Where Are We Drifting?

**Rocks Ahead in the Wages Dispute. Is there  
no Wiser Policy than that of Sitting Tight?**

There are well-informed people in the trade who seem to regard the current wages dispute as of little moment, maintaining that there is no likelihood of its resulting in a stoppage of work—and indeed it will reflect discredit on the printing industry if it does. Nevertheless, we may well point out, without adopting an alarmist attitude, that the present deadlock holds possibilities of trouble much more widespread than that of the Liverpool-Manchester struggle of last year, a struggle the damaging effects of which for both sides are still fresh in memory.

The negotiations in regard to the wage-reduction proposals have reached an unfortunate impasse in which each side seems to be entrenching itself behind protestations of the justice of its case and the strength with which it will be able to maintain the right in case of a fight. Meanwhile the Joint Industrial Council appears to be off the field, it having been informed that all its requirements on behalf of peace have been fulfilled.

Are both sides to sit tight, then, while the ship of the printing industry drifts on towards the rocks ahead? The position, as we see it, is a most dangerous one. Those who imagine that one side or the other is only waiting for a favourable moment to concede its contentions, are, we believe, liable to be painfully disillusioned. Both sides give evidence of being in dead earnest. On the side of the Employers' Federation it is claimed that the whole country shows remarkable determination, employers being almost solid for the posting of notices, whilst the result of last week's card vote of the London Master Printers' Association is reported to have

shown that employers employing a large preponderance of trade union members were posting notices, and we are further informed that many more houses than indicated by that vote have adopted the same course. On the men's side also we see no sign of recession from the position taken up. There is, we believe, behind the opposition of the unions much genuine fear that the status of the industry is in jeopardy and that for trade unionism to put up a strong fight is the only thing that can save the situation.

## **Some Grievances Alred.**

We have heard put forward on the men's side one or two suggestions or complaints in respect of the employers' attitude, but these seem to be of little weight. It has been objected that the employers have given no guarantee of decreased unemployment in return for the reduction of wages. We hardly see how they can do more than point to their customers who clamour for reduced printing prices and are openly looking to wage-reduction as the occasion for a drop in price. And reduced prices must mean the release of some printing orders that have, undoubtedly, been withheld, and so tend toward increased employment.

Another suggestion is that the employers should either promise that no further reductions shall be demanded, or shall state definitely what future demands may be expected. Here again it seems difficult to see what (without any supernatural gift of prophecy) the employers can answer unless they responded with some sliding scale—which the unions repudiate. And even grant—

ing the acceptance of a sliding scale in respect of the cost of living, is it reasonable to fix wage scales for the future without any regard to possible big variations in the state of trade?

In any endeavour to find a way out of the present *cul de sac*, attention might well be given to the possibility of framing a proposal which should be more generally acceptable than the present demand by virtue of establishing certain relations between future wages and both these variables, but our own opinion is that the chief factor responsible for the uncompromising attitude of certain of the craft unions is the question of the comparative status of the different sections of the trade. Is not the backbone of their attitude to be found in the claim that it is unjust to expect the more highly skilled workers to accept exactly the same wage-reduction as the quite unskilled, whose status has been disproportionately raised during the war years?

#### **The Root of the Trouble.**

This question of comparative status, we are aware, bristles with difficulties; but perhaps these difficulties are not insuperable. Is not this question a matter better worth fighting about than the present bone of contention? Certainly it holds more promise of future peace in the industry, and of incentive to improved craftsmanship. Moreover, once this root question of comparative status had been fought out, and some rough lines of demarcation agreed upon, the important matter of national negotiations would be on much safer ground—a thing which is greatly desired by the employers, and which would be also to the immense advantage of the unions by providing that stronger central direction which trade unionism in general is now realising to be so important.

It is in this direction, then, that we look with least foreboding in casting round for some way of avoiding the dangers that loom large ahead. Is it not possible to arrive at some compromise in the present negotiations—which nevertheless will not have been useless—and bring to bear upon some bigger proposition all the intelligence and goodwill available, with a view to finding a solution of more lasting value to the trade?

If it is to be a fight to a finish on the present proposal of a flat rate reduction, we fear the outlook for the industry is very black indeed. We earnestly suggest that it is for those whose official positions and intimate inside acquaintance with the negotiations specially qualify them for the task, to get busy at finding what we believe is not impossible of discovery—an alternative proposition which will offer to both sides something more likely to tend towards the future peace and prosperity of the trade as a whole than the present proposal, which promises, we fear, to involve the industry in a conflict the unhappy consequences of which no one can foresee.

---

DUTCH strawboard free delivered is on offer in London at £13.

## **Printers and Newsagents' Efforts.**

While certain wage adjustments are coming into effect in various industries with September, efforts are still being made in the printing and other allied trades to arrange lower rates.

In this connection, important meetings were held on the 31st ult. among printers. A special conference of the Administrative Council of the Printing and Kindred Trades Federation of the United Kingdom was held in London to consider the position created by the ballot of unions on the question of accepting a reduction in wages of 7s. 6d. per week for men and 3s. for women. After over three hours' discussion in private, the following official statement was made by Mr. A. E. Holmes, secretary of the Federation: "The conference has been unable to decide upon united Federation action, and, as a result, negotiations will be conducted by the unions as hitherto with the Master Printers' Federation. At the same time, it was decided by the conference that the Executive Committee should do all it possibly can to bring about a satisfactory settlement."

Efforts by the master printers having failed to reach a settlement, instructions have been issued by the Federation of Master Printers to all their members throughout Great Britain to post notices intimating that a reduction of wages will take effect in the week ending September 24th in the wages of all members of trade unions who have not accepted the employers' modified proposal. Meetings of employers have been held in all parts of the country, including Manchester, Leeds, Edinburgh, Bristol, and elsewhere, and at these and at a largely attended meeting of the employers held in London on Wednesday the action of the Federation of Master Printers was endorsed.

#### **Newspaper Distributors.**

Arising out of unsuccessful negotiations with the National Union of Printing and Paper Workers, a special and representative meeting of the Federation of Wholesale Newsagents was held on Wednesday to consider the wages question. It was resolved unanimously that, owing to the continued depression in trade, it is impossible to maintain the present minimum wage of 90s. per week, and that, if the distribution of newspapers and periodicals by wholesale agents is not to cease, a reduction of 10s. at least is essential in the near future. It was also resolved, after considerable discussion, to make a further effort to arrive at an amicable settlement with the executive of the Paper Workers' Union. The sub-committee of the federation was authorised to arrange a conference with the representatives of the union at the earliest opportunity, and to report immediately thereafter.

---

THE Safeguarding of Industries Act is described by the French Press as "a menace to French trade."

## London Employers and the Notices.

### Special Meeting Discusses the Wages Position.

The question of posting notices of wage-reduction was discussed at the special general meeting of the London Master Printers' Association at Stationers' Hall on Wednesday afternoon of last week, when the gravity of the situation drew a crowded attendance of members.

Mr. R. A. Austen-Leigh, president of the Association, was in the chair, and in his introductory speech summarised the history of the protracted efforts towards wage-reduction, which started as long ago as February or March when the L.M.P.A. Council sent a resolution on the subject to the Federation Council. After referring to the proposal of 15s. reduction in men's wages (with proportionate reductions for other workers), the revised proposal of a 10s. reduction, and the final proposal of a 7s. 6d. reduction, Mr. Austen-Leigh mentioned the results of the latest ballot—the proposal having been accepted by the National Union of Printing, Bookbinding, Machine Ruling and Paper Workers, the Amalgamated Society of Lithographic Artists, the Society of Women Employed in the Bookbinding and Kindred Trades, and the Women's Section of the National Society of Operative Printers and Assistants, but having been rejected by the remainder of the unions. In view of this result, he said, the National Wage Basis Committee saw nothing for it but to issue instructions to all the Alliances of the Federation to post notices that week stating that a 7s. 6d. reduction would take place in a fortnight's time. The matter had been before the Council of the L.M.P.A. and the Council had recommended that the instructions be carried out, subject to confirmation by a general meeting. The present meeting had accordingly been called.

### The Case for Wage-Reduction.

Proceeding then to deal with the main question, Mr. Austen-Leigh expressed his conviction that there was a perfectly good case for reduction of wages. He referred, first, to the large amount of unemployment prevailing—successive increases having raised wages to such a level that the commodity had reached a price which customers would not pay; secondly, to the decided fall in the cost of living—the latest index figure, 122, being below the figure of 125 which obtained before the 1920 increases of 15s. in men's wages; thirdly, to the example of other trades, in which millions of workers were accepting reductions of wages. They had, he said, a clear case for reduction, and there was every reason why the Association should comply with the recommended posting of notices. Remarking that he thought notices would be universally posted in the country, Mr. Austen-

Leigh went on to speak of several considerations of loyalty and expediency which made this course imperative for London members, whilst he also dealt frankly with certain difficulties of the position. He concluded by stating that, before adopting the course recommended, the Council required to be assured that the contemplated action would be taken by employers employing a predominant number of trade union members; accordingly he urged that, instead of the usual show of hands, voting should be by cards on which members would indicate the number of trade union hands employed.

Mr. J. MacLehose, M.A., LL.D., president of the Federation of Master Printers, was then called upon by the chairman and, in a short but forceful speech, stressed the importance to the Federation of the action taken by London in this matter. It had been made abundantly clear, he said, that the employers were not asking for the reduction in order to put money into their own pockets, but were asking for what would enable them to turn out work at lower rates and so increase the work done and add to the prosperity of the trade as a whole. It was hardly reasonable to expect that other trades in which about 3,000,000 workers had already accepted reduced wages should be prepared to go on giving printing orders to workers who refused to accept any modification of their war-time wages. Dr. MacLehose told of most encouraging support received from the country, indicating that notices would be posted immediately throughout England and Scotland, and he urged London printers to support the Federation in this course.

Mr. Boyle proposed that the vote be taken by card; Mr. Alexander seconded; and the resolution was carried, with a single dissident.

Sir Wm. Waterlow then briefly addressed the meeting, giving further strong support to the course of action recommended, and moving: "That the instruction of the Federation Wage Basis Committee to post notices this week be confirmed."

Mr. Keen, from the body of the hall, seconded the motion.

Mr. J. E. Francis, of the Athenæum Press, at this point attempted to read a statement he had prepared in which he spoke with remarkable frankness of the profits and wages in his own business and, though admitting that his firm had been losing money for some weeks past, opposed the intended wage-reduction. His remarks gave rise to several heated interjections and, the immense preponderance of opinion being manifestly against him, he resumed his seat before having quite completed his statement.

Messrs. W. H. Truslove, C. Northam, H. R. Danford, E. J. Wood, A. E. Goodwin, H. C. Hill, F. W. White, A. Harris, J. Croft and T. Cumner all took part in further discussion, and the meeting concluded with the taking of a card vote.

A notable feature of the proceedings was the hearty applause that broke out whenever emphasis was laid on the justice of the pro-

posed wage-reduction. From the tone of the meeting one gathered that, despite the practical difficulties with which some members were faced, there would be a big majority in favour of the posting of the notices. This surmise has since—as reported on another page—been proved correct by the result of the card vote.

## Employers' Reply to Compositors.

Last week we printed *in extenso* Mr. T. E. Naylor's circular letter stating, on behalf of the London Society of Compositors, the case against wage reduction. We were able to make only a brief reference to a reply issued by Mr. Whyte on behalf of the London Master Printers' Association, this reply reaching us only just before going to press. As, however, the points in dispute are of great interest to all London printers, we give here in full Mr. Whyte's letter, which runs as follows:—

"A circular letter has been issued to the Employers by the London Society of Compositors, in which certain statements are made which may possibly mislead some Master Printers, although the reasons for taking the steps to secure a reduction in wages must be well known.

"The present condition of the Printing Industry is, admittedly, very unsatisfactory. Unemployment is serious, and short time is being worked in a large number of printing works. Orders have fallen off, and there is abundant evidence that the high cost of printing has checked the demand, and will have a still more serious effect if a reduction in cost is not made.

"The cost of living has undoubtedly fallen since the last increase in wages was given. This is admitted even in Mr. Naylor's circular, though he questions the correctness of the index figure of the Ministry of Labour. The best evidence that can be offered that the official index figure is reliable is the fact that it is accepted as a standard by which wages are now regulated for 2½ million workers, and that the Trade Unions representing these workers would not have accepted this figure unless, after careful inquiry, they were satisfied with the accuracy of its basis and method of calculation.

"When the wages of members of the L.S.C. in 1920 were 85s. per week, the cost of living index figure was 125. On August 1st the index figure was 122, and yet Mr. Naylor contends that if a reduction of 7s. 6d. is made, bringing it to 92s. 6d., the compositor's wage will be reduced below its pre-war level. The pre-war wage of a London compositor was 39s.; 122 per cent. equals 47s. 6d.; which gives a total of 86s. 6d. To-day the London compositor is receiving 13s. 6d. above the pre-war standard. No reference is made to the fact that, compared with pre-war days, the London compositor is working two hours less per week, and is also receiving payment for a

fortnight's holiday. The latter is equivalent to an addition of 4s. per week to wages, so that after this proposed reduction of 7s. 6d. is made it is obvious that the London compositor will be 10s. per week better off.

"But his position is really better than this, because the index figure is based on a smaller wage.

"In the L.S.C. circular, figures are quoted to show that the Linotype operator was even more hardly dealt with than the hand compositor, but this contention is based on the fallacy that because the lino operator was given 6s. more than the hand compositor in 1914 he should be given 15s. more than the compositor to-day.

"It has never been contended that the additional remuneration payable, for instance, to a machine minder for taking charge of large machines or an automatic feed should be increased because the cost of living had advanced.

"The majority of linotype operators in London are employed on piece rates, and therefore the example quoted is obviously misleading.

"It was not the employers who were responsible for the plan whereby flat rate advances were given during the period when the cost of living moved upwards. The L.S.C. leaders were strongly in favour of this plan. Surely if the same plan is adopted when the cost of living moves downward, the result will be an equitable adjustment, because a reduction of 7s. 6d. to a worker earning £4 a week obviously shows a proportionately larger percentage decrease than 7s. 6d. from one earning £5. In the first instance it is nearly 9½ per cent., and 7½ per cent. in the second.

"Another way of looking at the position is as follows:—Throughout the war, the advances given to the engineering industry were taken as a standard, and it is, therefore, interesting to apply these advances to the wages of compositors. The present engineering bonus is 33s. plus 12½ per cent. With this bonus the wages of hand and machine compositors in London would be 81s. and 87s. 9d. respectively, or 11s. 6d. and nearly 10s. per week below the wage now proposed, and 19s. and 17s. 3d. per week less than present wages. Nor is this all, for the engineering industry is now proposing still further substantial reductions. In face of these facts, it is hard to claim that the London compositor is being subjected to harsh treatment.

"Finally, the employers are asking the L.S.C. to accept this reduction in the interests of the industry as a whole."

At a crowded meeting of the Printers' Managers and Overseers' (Parent) Association on Tuesday evening, the transaction of the formal business was followed by a discussion on "Trade Questions." The secretary raised the interesting subject of the overseer's position in regard to the wages dispute, and a good deal of discussion, of a private character, ensued.

## Trade Union Matters.

ATTENTION to the grave question of the wages dispute is hindered this week by the absence from town of the principal officials of many of the unions concerned. These are at Cardiff, attending the fifty-third Annual Trades Union Congress which is being held in the Park Hall, Cardiff, on five days of this week. Congress elects the General Council this year by the new method. Each union has the right to nominate candidates to represent it in its group on the General Council. The printing trade's representatives on the General Council are Mr. H. Skinner (Typographical Association) and Mr. T. G. Newland (Printing and Paper Workers, etc.). The Scottish Typographical Association is included, along with the London Society of Compositors, Association of Correctors of the Press, Electrotypers and Stereotypers, National Union of Journalists, Amalgamated Society of Lithographic Artists and Designers, Amalgamated Lithographic Printers of Great Britain and Ireland, Amalgamated Society of Paper Makers, National Society of Operative Printers' Assistants, Printing Machine Managers' Trade Society, Amalgamated Association of Pressmen; Printing, Bookbinding Machine Ruling, and Paper Workers; Typographical Association, Wall-paper Workers' Union.

At the Trades Union Congress on Tuesday there was much severe criticism of the Government's cost of living figures. Congress adopted a resolution, moved by Mr. H. Thomas, instructing the General Council to press the Ministry of Labour to adopt a method of calculation that will reflect the actual facts as to the cost of living.

PROCESS workers have rejected wage reductions demanded by the Master Process Engravers' Federation, and are now balloting on a modified proposal carrying with it a stipulated reduction in the prices of process blocks.

BRISTOL printing workers have decided to organise federated chapels throughout the city.

THE general trade union experience of the inadequacy of the administrative allowances under the Unemployment Insurance Act is illustrated in the case of the Typographical Association. It was explained at the Association's delegate meeting at Hastings that the amount allowed to the Association by the Government towards the cost of administrative expenditure was one shilling for every full week's payment of benefit to an adult member, and half that amount in respect of each week's benefit paid to a juvenile member. The amount allowed being far from being sufficient to cover the expense and labour entailed, it was eventually decided by the Ex-

ecutive Council that 58 per cent. of the total allowance should be allocated to the branch secretaries. The sum of 7d. in the pound will therefore be sent to each branch secretary respecting his payments of benefits from December, 1920, to the end of the Association's financial half-year on June 25th last.

THE recent ballot of the members of the Typographical Association on the question of (1) joining with the Printing and Kindred Trades Federation in resisting the proposed reduction in wages, and (2) negotiating all wages movements through the T.A. wages agreement, resulted as follows:—(1) Yes, 7,282, No, 12,543. (2) Yes, 16,685, No, 3,006. Several branches showed majorities in favour of co-operating with the Printing Federation, but most of the large centres, especially Manchester, Liverpool, Birmingham and Leeds, voted overwhelmingly against the proposal. Practically every branch of the Association voted strongly in favour of continuing wage negotiations on the same lines as hitherto.

## Printing Works Advisory Committees

The printing establishment of Messrs. E. Hulton and Co., Ltd., Withy-grove, Manchester, is among the first in the North to establish a Works Advisory Committee. Interests in this prominent firm are varied. No less than 14 different trade unions contribute their quota of members to the complete staff of 1,500, and some of the sections have both day and night chapels.

At a representative meeting, convened by Mr. S. Cash, Welfare and Labour Secretary, the scheme for the formation of a Works Advisory Committee was outlined. Mr. F. S. Roberts took the chair. The suggested rules for the committee, as drawn up by the J.I.C., were approved by the forty representatives present.

After discussion, a resolution was passed that each section of the industry (day and night departments should count as one) should appoint a representative of the Executive, and these, together with the heads of departments, would form the Executive Committee. A difficulty in regard to the extensive general printing department (employing about 300 hands), under six different trade unions, was overcome by the appointment of separate departmental committees, elected by each section, to hold meetings once a month. Matters arising that could not be settled at the departmental meetings are to be referred to the quarterly meetings of the Executive.

Any department having matters of special interest to consider at the Executive meeting has power to co-opt an additional member to attend the Executive, to give expert evidence, but not to have a vote.

AN Advertisement is always working.

## Mr. H. Whetton : Printer-Journalist.

(Specially Contributed.)

Possibly acting upon the good old principle than an editor should be read and not seen, the managing-editor of the *British Printer*, Mr. Harry Whetton, is probably not nearly so widely known personally as his extraordinarily wide circle of influence in the trade would infer. He is an unquestioned authority on matters printerian and to him innumerable members of the printing and allied industries promptly refer when in doubt on some knotty or little known detail of trade information. It was on just such an occasion

Photo: Wykeham Studios, Ltd., London.

**Mr. H. Whetton.**

that I first came in touch with him, when Mr. Whetton had but recently assumed control of the "B.P."

Trained primarily for the technical side of the scholastic profession, he has always been a student, and possesses a fearsome array of diplomas, certificates and other little acknowledgments of hard work. He is widely read, with a taste for foreign languages.

He is a Yorkshireman, born at Huddersfield, and entered the service of the De Montfort Press, Leicester, when the renaissance of good printing was making itself felt. On the retirement of the founder of the "B.P.," Mr. Whetton quite calmly took up the reins and his skilful handling has carried this trade journal through many troublous times on to its present high position.

A man of many activities, he is also a very energetic director of Raithby, Lawrence and Co., Ltd., and sole manager of his firm's London and Export Department businesses.

He is the author of quite a number of trade text-books and articles, usually hidden under the familiar initials "H.W." and a welcome contributor on many subjects to magazine literature.

A tribute to the man is the fact that he has for some time been president of the Society of Printing Ink Makers—a manufacturers' association. He is credited with knowing something about printing ink, and has certainly fostered and led the society with rare success. He is a member of the Council of the British Standard Exporter, member of the Institute of Journalists, and in various other directions is identified with the progress of his profession as a printer-journalist.

Probably no one in the industry is more closely in touch with the "supply" trades—typefounding, printing ink-making, printers' engineering, papermaking, photo-engraving, and so on, and it is this which makes him so invaluable as a ready reference to inquirers. His correspondence testifies to the extent of this, and an extraordinary proportion of it is Colonial and foreign.

How many times has he been called upon to act as judge to arbitrate between printer and supply man, and printer and customer over trade details!

No reference to a man of many activities would be complete without some tribute to his untiring efforts in the furthering of technical education. Innumerable printers and others have solid cause to thank our friend for his kindly help and guidance, and his encouragement of the trade classes.

Some of us often gird at him because he is a modernist in print. He simply won't enthuse over old style and historical work. Politely interested, and knowing heaps more about such than most of us, he still pretends that he lives in the present and finds it quite enough to try to lead and encourage present-day aims at good printing in respect to display book and colour work.

E. N. S.

A VETERAN bookbinder is lost to the trade by the death at Winton Park, Cockenzie, on the 24th ult., of Mr. William Hunter, of Edinburgh, head of the firm of William Hunter and Sons, bookbinders, in his 97th year. When over 90 years of age, Mr. Hunter could still visit his office at 28, Queen-street, and do a job of work there.

THE September number of the *Bookplate Magazine*, a Lovat Fraser Memorial Number, marks the decease of this journal. An editorial article headed "Ave Atque Vale" announces that "With this number we say farewell. After two years, full of happy memories, the *Bookplate Magazine* ceases to be. We regret the need to make this announcement. . . . But it is impossible to continue without incurring losses heavier than the enterprise justifies. That is the sole reason why this, the eighth number, is also the last." Thus still another literary decease bears witness to the prohibitive costs of high-class typographical production for a limited public.

## Trade Notes.

**MR. TOM REES**, well-known South Wales journalist, died at Swansea on Tuesday, aged 55.

AT Lowestoft Police Court, Herbert E. Hildred, canvasser, was sentenced to three months' hard labour on a charge of embezzling £10 16s. received on behalf of the Modern Press.

THE prospectus has been issued of the part-time classes in printing and photographic technology of the Manchester Municipal College of Technology. The classes begin on October 3rd.

**MARKED** improvement in the conditions of the workers of this country is chronicled in the annual report of the Chief Inspector of Factories and Workshops for the year 1920 (H.M. Stationery Office, 1s. 6d.).

**MAIL** order traders are complaining of the burden imposed upon them by the increased postal rates, and it is stated as part of their case that revenues must suffer from the fact that they are using a smaller number of circulars.

**TENDERS.**—Eastbourne Union, contract for printing, latest date September 9th; County Council of Northumberland, tenders for printing agendas, minutes, books and general printing for one year from October 1st, next latest date September 16th.

**WILLS.**—Mr. James H. Smith, Brixton-hill, S.W., journalist ("Vigilant" of the *Sportsman* and prior to that "Jim the Penman" of *Sporting Life*), £968; Mr. Isaac Gaunt, of Horsforth, Yorks, advertising contractor, aged 37, £22,585.

**PRINTING IN PRISON.**—To convicts of Maidstone Gaol has been entrusted the printing of a book, dealing exhaustively with our prison system. This has been written by Sir Evelyn Ruggles-Brise, for many years Chairman of the Prisons Commission, and runs into about 300 pages. It has been put into type by workers serving sentences, and "run off" by their machinery.

**SOME FINE POSTERS.**—This year again the Underground Railways are to purchase the winning designs in the competition of the Royal College of Art, from which came the four striking recently-published posters of Wimbledon, Epsom, the North Downs and Boxmoor—posters by means of which the printer's art confers beauty and distinction on the wall where they are posted.

**ODHAM'S FURTHER EXTENSION.**—The business of the publishing house of Dean and Son, of Fleet-street, the proprietors of De-brett's Peerage, and of the well-known toy books, has been acquired by Odhams Press, Ltd. In an interview Mr. J. S. Elias, the managing director of Odhams Press, Ltd., stated that he will continue to run the business under its present style and traditions, but

that big developments may be immediately anticipated.

THE death is announced from Rio de Janeiro of Dr. Fernando Mendes de Almeida, director of the *Jornal do Brazil*.

THE latest suggestion for augmenting the revenue of the Post Office is to let space on the back of postage stamps for advertisements.

**PRIZES** to the amount of £40 were offered by the *Isle of Wight County Press* in a census competition, the list of winners appearing in the paper's issue of August 27th.

**CINEMA-GOERS** will soon be able to see on the screen a picture version of Sir Philip Gibbs's well-known novel of Fleet-street journalism, "The Street of Adventure."

**ROUMANIA.**—From a report issued by the Department of Overseas Trade, it appears the United Kingdom exported paper to Roumania in 1920 of the f.o.b. value of £8,600.

**WORLD PRESS CONGRESS.**—A congress of the world's Press is to be held at Honolulu from October 11th to 25th. The president of the congress is Mr. Walter Williams, Dean of the School of Journalism of the University of Missouri. The American delegates will leave Chicago on September 25th. The British delegates sailed by the "Aquitania" on Saturday, and before they get home again they will have visited Chicago, Minneapolis, Winnipeg, Vancouver, Seattle, San Francisco, Los Angeles, the Philippines, and Honolulu.

**BAXTER PRINTS.**—A wish having been very generally expressed that in addition to the Baxter Society Guarantee Stamps already issued (which are placed on the back of any genuine print submitted, and are in consequence hidden if print is framed) some method of certifying prints should be adopted which would be apparent from the front when the print is framed, and to meet this want, the Council of the Baxter Society have had struck a small circular die, which will in future be placed on the bottom of each print, stamped, in the case of a Baxter print at the bottom left hand corner, and of Le Blond or other Licensees at the bottom right hand corner.

**"TELEGRAPH" SWIMMING CUP.**—The final competition of the series of races for the *Daily Telegraph* silver cup took place in the Serpentine on Saturday. The competitions consisted of a short race (55 yards), a 220 yards race, and one in clothes (across the Serpentine), each year, the races extending over three years, or nine races in all. The first race for the cup was in 1915, and the further competitions were held over until more peaceful times. The 220 yards race on Saturday resulted as follows: H. B. Judd (138 sec. start), 1; Alderman A. H. Scott, J.P., L.C.C. (145 sec.), 2; H. Parkes (138 sec.), 3; John Harrison (130 sec.), 4. Judd won by two yards. The winning of the cup was to be decided on points awarded for each race, and Alderman Scott therefore takes it, with ten points, being the maximum number won.

**FORTY-THIRD YEAR.**

agents, 11, St. Bride-street, E.C. 4.**

**THURSDAY, SEPTEMBER 8, 1921.**

## Current Topics.

### Notices of Wage-Reduction Posted.

The proposal of the Federation of Master Printers to post notices has been carried into effect, this course having been endorsed by meetings of employers held in all parts of the country, including Manchester, Leeds, Edinburgh, Bristol and elsewhere, as well as by the special general meeting of the London Master Printers' Association, reported on another page. The Standing Labour Committee of the Newspaper Society also instructed its members that notices should be posted. The employers admit that a small but important group of periodical printers in London, which includes some firms printing daily and Sunday newspapers, were not in a position to give effect to the instructions because no action is being taken by the Newspaper Proprietors' Association, with which, as stated, all the London daily papers are associated. They state, however, that

important firms of commercial printers and book printers, with remarkably few exceptions, have posted notices. Wildly divergent views are abroad as to the proportion of trade union workers under notice, but there is evidence that, at any rate, a formidable number are affected.

### Unions' Divided Action.

LAST week's special conference of the Administrative Council of the Printing and Kindred Trades Federation of the United Kingdom was unable to decide upon united Federation action, and, as a result, negotiations will be conducted by the unions as hitherto with the Master Printers' Federation. At the same time it was decided by the conference that the Executive Committee should do all it possibly could to bring about a satisfactory settlement.

\* \* \*

### Beware of Rumours!

SENSATIONAL stories are circulating with regard to the notices of wage reductions. Of all mere rumours beware! The rumour has reached us that at last week's meeting of the L.M.P.A. there was much conflict of opinion, with many strong speeches made against the proposed wage reduction. That this was not so we can testify at first hand. Our report (on another page) of the meeting in question has been in no respect touched up by official hands; though brief, it is a fair résumé of the proceedings. Another sensational rumour we have heard is to the effect that it is practically certain that the L.S.C., at a delegate meeting arranged for this week, will decide to accept the employers' offer. This, however, is most emphatically denied by the Society's officials, who tell us that such an occurrence is out of the question, the proportion of their membership under notice being unexpectedly small.

\* \* \*

### The Non-Possumus Attitude.

It is plain that no way out of a wages *impasse* is possible while one side fixes on a precise figure—whether 15s. or nothing—and refuses even to discuss the slightest modification of its position. Thus it is complained that certain trade unions adopt an impossible attitude when they fail to put forward any proposals for solving the difficulties of the crisis, yet decline to budge an inch from the position that no reduction at all can be discussed, as the time is "inopportune." To this the masters retort that more prosperous times—and things cannot be worse than they are at present—would be less opportune still, and the

opportune time could therefore never come. It is to be hoped that even at the eleventh hour some way may be found of averting a stoppage, but the employers maintain that unless a change occurs in the non-possimus attitude referred to, a conflict is inevitable.

\* \* \*

### Current Paper Prices.

AMONG English mill papers of exceptional value which have recently passed under our notice is pure imitation art at 5½d. per lb. for making orders, 5¾d. from stock. Incidentally the margin of difference in price between stock lots and makings may be contrasted with the 2d. per lb. ratio obtaining in other quarters. Naturally some allowance must be made for storage costs and idle capital, customers' convenience, etc., but there are limits even to oncost. This by the way and merely as a hint. S.C. printing (pure) is quoted at 4¾d. to 5d. per lb. for makings and even less for large quantities. M.F. printings, free from mechanical, are obtainable at 4½d. and 4¾d. per lb., ton lots; glazed imitation parchment, 5d. per lb.; and cream wove common bank at 5d. to 5½d. E.S. writings, seconds quality, are quoted at 5d. per lb., fine quality at 6d. Tub-sized azure laids can be made for 6¾d. (common grade) and bonds at 6¾d. Duplicating paper can be secured at 5½d., plain blotting at 8d. and 9d., and drawing cartridge at 6d. per lb. and upwards. This is an indication of the trend, and proves conclusively that our home mills are giving the user every possible advantage. These prices are low-cut and apply only to orders for quantity. The quality of our papermaking is practically normal, and it may now be said that we are back on our regular lines.

\* \* \*

### Business Failures.

AS THE weeks go by more and more business failures are being recorded. The fear of bad debts is causing many houses to be much more stringent in their business dealings. There is need to exercise great caution, though it would have been more efficacious had the practice been indulged in at an earlier date. The present is the testing time for a great number of small concerns whose resources will not withstand the continued strain. Failing a quick recovery in trade, nothing but the E.P.D. rebate stands between these houses and failure. There is the other side of the question, that the exertion of pressure by large creditors on small debtors will merely hasten the declaration of bankruptcy in many cases. Much of the fortune of the trade hangs on the next four months.

## Personal.

MR. G. R. SIMS was given a complimentary luncheon in honour of his 74th birthday at Brighton on Saturday. A large number of the veteran journalist's friends were present.

MR. JOHN MACGREGOR, M.R.C.S., L.R.C.P., L.R.C.S., Edin., of 2, Duke-street, W., honorary physician to the Newspaper Press Fund, was married in the King's Weigh House Church, Duke-street, last week, to Mrs. Frank Horsell, of Leeds, widow of Mr. Frank Horsell, late head of the printing ink firm of Frank Horsell and Co., Ltd.

MR. JAMES MCINTYRE, late secretary of the Glasgow Printers' Managers and Overseers' Association, has left this country for Vancouver. He intends to make his home in British Columbia.

MR. THOMAS LESLIE PARKE, of the Hall, Withnell Fold, Chorley, Lancs, a director of Wiggins, Teape and Co. (1919), Ltd., has been appointed a justice of the peace for the County Palatine of Lancaster.

MR. HORACE J. CROPPER was re-elected a director of Cropper and Co., Ltd., at the annual meeting last week.

MR. DYKES SPICER (Southern District) and Mr. A. Parkinson (Northern District) are to play off the final (36 holes) in the Golf Cup Competition of the National Association of Wholesale Stationers and Paper Merchants on September 9th at Woodgate-park, Epsom, the country club of the R.A.C.

IN connection with the forthcoming conference of the Technical Section of the Paper-makers' Association in Edinburgh, Principal Laurie, of the Heriot Watt College, will give an official address of welcome at the opening of the conference on September 21st.

IN this connection we regret to learn that Mr. J. Strachan, who has done so much to promote the technical movement in Scotland, has been overtaken by illness. He had agreed to give an address during the Edinburgh meetings.

MR. ROBERT W. BROOKS, of the Brooks Paper Co., St. Louis, was much impressed by the friendly reception he met with during his recent visit to this country, and in a letter of thanks to one gentleman whom he met he expresses himself in this graphic fashion:—"Please know that whenever you come to St. Louis the Brooks latch string is on the outside and the hinges duly greased for you."

THE fellow who waits until conditions are just right before he starts, never starts.

"NET SALES."—The Association of British Advertising Agents' Audit Bureau, Ltd., has been registered as a company limited by guarantee. Objects: To promote the interests of British advertising agents and advertisers

relating to the ascertaining and verifying of the net sales of newspapers, magazines, periodicals and publications as mediums for advertising; to examine and audit the books of proprietors and publishers of such publications for ascertaining their net sales, and to issue statements or certificates relating thereto. The management vested in a council, first members of which are: J. Strong, P. de G. Benson, L. Harwood, W. H. Carr, W. S. Crawford, P. E. Derrick, L. G. Jackson, H. G. Saward, R. J. Sykes, and C. H. Vernon. No notice of situation of registered office was filed at time of incorporation. File number, 176,491.

### COMPANY MORTGAGES AND CHARGES.

Fresh Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 1918, and Satisfaction registered pursuant to Section 97 of the same Act. (The registration of Satisfaction is not compulsory).

**ERCOLI VALERIO AND SONS, LTD.** (Printers, Publishers, Newspaper Proprietors, etc.).—Particulars of £4,000 debentures, authorised August 15th, 1921; whole amount issued; charged on company's property, present and future, including uncalled capital.

"**DAILY NEWS, LTD.**"—Memorandum of deposit, dated August 17th, 1921, charged on deeds of property at Salisbury-square, Fleet-street, E.C., to secure all moneys due or to become due from company to Lloyd's Bank, not exceeding £50,000.

**DRAWING OFFICE SUPPLIES, LTD.**—Particulars of £44,000 debentures, authorised August 19th, 1921; whole amount issued; charged on the company's undertaking and property, present and future, including uncalled capital.

**A. STRAKER AND SON, SMITH BROS., LTD.** (Bookbinders, Stationers, etc.).—Satisfaction to the extent of £2,000 on August 19th, 1921, of first mortgage debentures dated March, 1906, securing £9,200.

**NATIONAL PAPER AND PULP CO. (1920), LTD.** (London and High Wycombe).—Satisfaction to the extent of £2,250 on March 7th, of debentures dated January 10th, 1921, securing £200,000.

### BANKRUPTCIES, etc.

*Re* **ERNEST LACEY**, bookseller and stationer, of 30, High-street, Chatham.—The public examination of this debtor was held at the Rochester Bankruptcy Court, on the 29th ult. The examination had been adjourned from July 11, when it transpired that debtor's gross liabilities amounted to £633 12s. 4d., and that there was a deficiency of £133 12s. 11d. The cause of the failure was said to be "want of capital, depression in trade, and inexperience in the business."

## Cropper and Co., Ltd.

### Position of the New Colthrop Mill.

Presiding at the twenty-fourth annual general meeting of Cropper and Co., Ltd., last week, the chairman (Mr. H. M. Killik) congratulated the shareholders on the fact that the company had successfully surmounted the grave difficulties with which all industrial businesses had recently been faced. The industrial crisis had affected the paper trade very severely, but it was satisfactory to know that the Colthrop Board and Paper Mills was able to distribute a dividend of  $7\frac{1}{2}$  per cent. for the year ended May 31st last. This was encouraging, because during the latter part of the period the mill was working short time, and the new mill, which will manufacture boards suitable for the business, owing to various unavoidable causes, had not then and has not yet been fully completed. It is hoped that the installation will be in working order in the course of a month or two.

Mr. Killik mentioned the fact that Containers, Ltd., only arrived at the producing stage at the time which coincided with the sharp decline in business and the fall in prices, and in consequence of the delay in the completion of the new Colthrop mill, considerable purchases of boards were made, which, had there been any indication of the subsequent slump, would not, of course, have been bought. Containers found themselves, therefore, in possession of a large stock of materials which showed a heavy depreciation.

## Alleged Thefts of Stereo Metal.

There was a further hearing at the Guild-hall, before Sir William Dunn, on Wednesday of last week of the case (reported in our issue of August 25th) concerning serious thefts of stereo metal. The outcome of the resumed hearing was that William Henry Pember, 41, stereotyper, in the service of the Dalziel Foundry, Ltd., Plough-court, Fetter-lane; Charles Hill, 52, carman; and his employer, Henry Caleb Peek, 38, metal dealer and cartage contractor, of Pitfield-street, Hoxton, were committed for trial at the Central Criminal Court on charges of being concerned in stealing and receiving metal, the property of Pember's employers, and of conspiring to steal and receive, between February and August of this year, about 53 tons of stereo metal, value about £3,000. The magistrate admitted Hill and Peek, who pleaded "not guilty" and reserved their defence, to bail.

Most of the shadows that cross a man's path in life are caused by his standing in his own light.

# Printing, Bookbinding & Kindred TRADES OVERSEERS' ASSOCIATION.

## Monthly Meeting.

There was a large gathering of the Association on Tuesday evening at St. Bride Institute, Bride-lane, E.C.4, Mr. H. Milton (vice-president) presiding. The principal feature of the evening's programme was a lantern lecture by Mr. G. W. Riley, Assistant Controller of Printing, H.M. Stationery Office, entitled "A Trip to Switzerland."

The minutes of the previous meeting having been disposed of, one or two items of correspondence were submitted.

Among these was a copy of a letter from Lord Riddell from the President of the Board of Education stating that the arrangements for the new technical school were well in hand; from Mr. A. E. Clifford saying he would give his lecture at an early date; from Mr. J. R. Riddell inviting the members to the distribution of prizes at the Stationers' Hall.

A new member, Mr. F. Saunders, binding and ruling department, H.M.S.O., Harrow, was unanimously elected to membership and received a hearty welcome from the chairman.

The proposed visit to Jackson's Millboard Mill on September 24th was next considered and it was proposed and seconded that the visit to Bourne End should be made by charabanc.

Mr. H. S. West said he thought the Association should support the good work being carried on at the Lloyd Memorial Home, Deal, and moved that the Association make an annual donation of three guineas.

This was seconded by Mr. W. Venum and heartily carried.

In a delightfully fascinating and homely way Mr. Riley explained with the aid of some 83 slides the many beautiful scenes of the Swiss Canton of Lucerne, the Lake and the many attractions of the surrounding district. Among the interesting pictures that were thrown on the screen was the Lion of Lucerne, the wonderful design by Thorwaldsen cut out of a solid rock as a memorial to the Swiss guard slain at the Tuileries. Other features in an absorbing lecture were the descriptions of the ascents and wanderings made by Mr. Riley on the great mountains which make Switzerland so world-renowned.

The chairman moved a hearty vote of thanks to Mr. Riley for his interesting lecture, which brought the meeting to a close.

At the last City and Guilds final examination in papermaking and testing the students from the L.C.C. School of Photo-Engraving and Lithography, Bolt-court, Fleet-street, E.C., gained two first and two second class certificates, being exactly one-third of the total successes in the United Kingdom.

## The Bookbinder and the Time Docket.

SIR,—Your review of the controversy on the above question, appearing in the issue of the *British and Colonial Printer and Stationer* for 1st September, is very interesting reading, and I want to place on record my appreciation for the frank, open, honest criticism bestowed upon both parties, and the able way you have always dealt with this much discussed question.

I regret very much if my silence on the article appearing in your journal under date of 7th July has been misunderstood, and am sorry for any personal disappointment my failure to reply may have caused you. My silence was entirely due to the fact that I subscribe wholly to the view point therein set forth, and I heartily acknowledge your efforts to raise this important question above the level of prejudice and ignorance to a clearer understanding, a more honest conception of the points at issue than that which has existed up to the present.

I am perfectly convinced that the question of the introduction of the time docket into the bindery can only be satisfactorily settled by the workers realising the imperative necessity for a scientific cost finding method in production, before the real value of work produced can be ascertained, and which is essential for the success of any business. Old-fashioned business methods of the mid-Victorian period are not applicable to present-day industrial development, and this I believe is recognised by the great majority of the workers.

Unfortunately, however, their experiences of changing methods in the past have convinced them that they have always been in favour of the employing class, as witness the immense growth of some business houses, the huge profits and dividends acquired by shareholders who toil not neither do they spin, and which leaves them, the workers, more insecure than ever before.

I am prepared to admit that modern industrial development demands more up-to-date methods for dealing with its present-day requirements, and that actual cost finding is essential to its success, but even so I am convinced that this will never come willingly from the worker, nor work smoothly, until he is assured of a more equitable share in the distribution of the results of his labour.

The introduction of the time sheet into the bindery, and the resistance of the workers to the same is but a phase of a much deeper and more complex problem, and something more than lip service from the employers that they have the workers' interest at heart will have to be forthcoming, in view of the efforts at speeding up production, cutting down wages, and the scandalous profiteering that is being

imposed at the present time, if we are ever to enter upon that period of industrial progress and peace, so essential to the interests of us all.

Thanking you for the opportunity afforded me for stating my views in the columns of your interesting journal, and the impartial manner in which you have always dealt with this question.—Yours, etc.,

GEO. HARRAWAY,  
President,

National Union of Printing, Bookbinding,  
Machine Ruling and Paper Workers.  
London, 5th September.

## Excess Profits Duty.

### Losses on Stock.

Attention of all members carrying heavy stocks of paper or other material is drawn by the Federation of Master Printers to those parts of the Finance Act dealing with E.P.D.

These are explained in a short leaflet (C.M.D.1270) issued by the Stationery Office for id.

Under pressure from the trading community, as represented by a large number of employers' organisations, the Treasury has accepted the principle that every trader shall be permitted to revalue his stock, as taken at the close of the final accounting period, on the basis of the prices current on 31st August, and to substitute under certain conditions this lower value for that at present standing in his accounts at the close of the final accounting period.

*Every business intending to avail itself of this enactment must take stock as at 31st August, 1921.*

For dealing with losses after 31st August, 1921, two alternative and mutually exclusive proposals are put forward, and each member must elect which he will employ.

(1) By the one method a period of two years from 31st August, 1921, is allowed in which to ascertain by actual realisation the value of the stock in hand at that date, and in the case of printers carrying stocks of paper it is presumed that they can charge paper out at the current market value for this purpose.

For the purpose of E.P.D. an allowance will be made in computing the profits of the final accounting period for any amount of which the sum realised is less than the cost or value at 31st August, 1921, whichever is the lesser. For the purpose of this claim obviously the whole of the stock must be considered, and valuation must be made on 31st August, 1921. Where the whole of the stock is not sold within two years, the remainder must be valued and brought into account.

(2) By the other method a period of four years is taken from 31st August, 1921, and if during that period the profits of the business are less than the "percentage standard," 80 per cent. of this deficiency will be repaid, provided it does not amount to more than 40 per cent. of the average Excess Profits Duty paid

for the two years immediately preceding the end of the final accounting period.

## No Injunction Against "Natsopa."

### Application Dismissed.

"Natsopa's" troublous experiences were again under legal consideration when, on Wednesday of last week, in the Vacation Court, London, Mr. Justice Branson heard the motion by three members of the National Society of Operative Printers and Assistants against representative officers of the Society for an injunction to restrain the officials, until the trial of the case of Dunn v. Bevan, from acting on an alleged ballot of last May for a levy, and on ballots purporting to have been taken in August on the question of accepting a reduction of wages proposed by the employers and altering the rules of the Society.

Mr. Spender Bower, K.C., said that, to meet the drain of unemployment and the demands on their funds caused by the coal strike, the Society proposed a levy on members. A ballot was taken on May 3rd, and there was a majority against the levy. On May 18th a circular was issued in which the officers of the Society announced their intention of re-submitting the questions to a fresh ballot. The plaintiffs' submission was that a second ballot was *ultra vires*. As regarded the other ballots, the plaintiffs submitted that they were void because the ballot papers were marked with members' numbers, and secrecy was thus destroyed, and because the rules could not by rule be altered within two years from May, 1920, the date of their last amendment.

Mr. Harold Morris, K.C., for the respondents said that there was nothing to prevent the second ballot on the levy, and that the plaintiffs would have been the first to complain if the Executive had resigned without first giving the Unions notice that they regarded the previous adverse vote as a vote of no confidence. To stop the levy now would throw the affairs of the Society into chaos.

His Lordship, in giving judgment, said that he could see nothing to prevent the Executive in good faith submitting to members of the Society more than once questions which the Executive thought had been wrongly decided. The rules of the Society had taken scrupulous care to preserve the secrecy of ballots. The fact that ballot papers were marked with the card numbers of members did not so clearly offend against the secrecy of the ballot as to demand the interference of the Court at this stage of the proceedings, though that might have to be considered at the trial. He did not think the plaintiffs were entitled to any interlocutory relief. The application was accordingly dismissed; costs to be the costs of the action.

His Lordship said he was asked for an interlocutory injunction. Whatever he decided was not a final decision, because that would be given by the judge who tried the action.

## In the Newspaper Realm.

IN connection with the Poplar Borough Council's fight for the equalisation of London rates, Mr. George Lansbury, editor of the *Daily Herald*, finds himself with fellow councillors in Brixton Prison, where, it is reported, he has had difficulty in carrying on his editorial duties.

THE issue of a new twopenny periodical entitled the *Londoner*, recalls a previous journal with the same title, which had a brief but brilliant run of six months 21 years ago.

THE meeting of the Newspaper Golfing Society will be held over the Royal-Cinque Ports course, Deal, on October 8th and 9th.

THE autumn meeting of the London Press Golfing Society will be held over the West Middlesex Club's course at Southall on Tuesday, the 27th inst. Play will consist of an eighteen holes stroke round for three prizes and for qualifying places in the challenge cup tournament, in which the awards will be the cup and gold, silver, and bronze medals. Entries close on the 23rd inst.

AN interesting link with the *Sheffield Daily Telegraph* of nearly half a century ago has been broken by the retirement of one of the firm's oldest employees, Mr. John Duckett, of Abbeydale, and last week his former colleagues, representing all departments, marked their appreciation of his valuable services and genial personality by presenting him with a handsome inscribed timepiece and a wallet of notes.

RESIDENTS of Wokingham and district who are between 65 and 68 are challenged by Mr. F. Staniland to a 22 miles walking race. St. Dunstan's Hostel for blinded ex-soldiers and sailors will benefit if the challenge is taken up. Mr. Staniland, who was formerly a missionary in Japan, has been for many years editor and proprietor of the *East Berkshire Gazette*.

MEMBERS of the *Star* foundry staff have held their annual picnic. Going to Hove by train, the party then drove to Bramber Castle. A musical programme contributed by Messrs. Crosland, Francis and Lawrence wound up an enjoyable day.

THE intention of the directors of the *Daily Herald* to reduce the price of the paper to a penny as soon as possible was announced at a meeting in Cardiff of first debenture holders *Daily Herald, Ltd.* Referring to the Northern edition, it was reported that a building in Manchester has been acquired, but it cannot be put into use until the necessary capital money has been raised. The debenture holders approved a plan for raising £100,000 by the issue of small debentures.

THE wages question in the paper industry is now definitely settled with the acceptance by the unions of the recommendations made by the Joint Industrial Council.

## Institute of Journalists.

Mr. Charles Wells, of Bristol, was appointed president of the Institute of Journalists for next year, at the annual conference, held at Bournemouth last week. The annual report of the institute, which was adopted, showed a falling off in membership from 2,119 a year ago to 2,007 on 30th June last. Commenting on the present state of employment in the profession, Mr. H. G. Cornish, consulting secretary, said they were now at the bottom of the very worst slump in journalistic interests.

The yearly accounts were adopted, Mr. F. Hinde pointing out that he submitted them with grave concern. The president, in submitting the decision of the council "that steps be taken to give effect to the proposals of a standing joint committee of the Newspaper Society and Institute of Journalists," remarked that the object of the council, which would be largely advisory, would be to promote peace and contentment, between the two bodies by bringing about a better feeling.

Col. E. F. Lawson will represent the Institute at the World's Press Conference at Honolulu. Bristol was chosen as the scene of next year's conference.

## Football.

THE first match of the season under the auspices of the Printing and Allied Trades Charity Sports' Association, was played on Saturday at New Malden. This year the Football League of the printing trade consists of 20 clubs representative of the biggest houses in London, and is divided into two sections of ten clubs each, A and B. The joint hon. sec. of the Football Section (Mr. Herbert J. Parker) is looking forward to a successful season this year and will be pleased to receive communications from those interested at 14, Berwyn-road, Herne-hill, S.E. 24.

Last Saturday's match at New Malden resulted in a win in Section B of the League of Cornwall Press over Fleetway Press by five goals to one.

AMERICAN PRINTING DEVELOPMENT.—According to the U.S. Government Census, the number of plants in the U.S. book and job printing and publishing industry in 1914 was 12,115. In 1919 there were 12,968 such establishments, or an increase of 853 plants. On the other hand, the value of the product in 1919 was \$600,503,000 as against \$307,331,000 in 1914. The number of plants increased only one-fourteenth while the value of the product nearly doubled. Another significant fact is a decrease in the number of newspaper and periodical plants, the surviving plants doing a vastly increased amount of business.

AN Advertisement is always working.

## Printers' Miniature Bisley.

The printers' annual miniature rifle meeting was held on Saturday on the range of the Wimbledon Park Rifle Club, Southfields, under the auspices of the Printing and Allied Trades Charity Sports Association, and attracted a large number connected with the printing trade, both male and female. The competition results were as follows:—

"Field" Challenge Shield.—1, *The Times*, 891; 2, *The Amalgamated Press*, 390; 3, W. H. Smith and Sons, 389.

"Walter Haddon" Challenge Cup.—1, W. H. Smith and Sons, 769; 2, *The Amalgamated Press*, 768; 3, *The Britannia*, 763.

Monotype Competition.—1, Mr. H. Wallace, 99; 2, Mr. F. A. Fenwick, 97; 3, Mr. A. Smith, 96.

*News of the World* Competition.—1, E. Butcher, 100; 2, A. D. Neville, 99; 3, G. E. Francis, 99.

*Daily Express* Competition.—1, W. R. George, 100; 2, A. D. Cartwright, 100; 3, A. D. Neville, 100.

*Pearson's Weekly* Competition.—1, A. D. Neville, 100; 2, W. Beck, 100; 3, G. W. Downs, 99.

*The Daily Telegraph* Competition.—1, Miss Davis, 96; 2, Miss Ingram, 95; 3, Miss MacDonnell, 92.

Newlands Competition.—1, A. Beck, 100; 2, G. E. Francis, 100; 3, J. G. Phillips, 98.

Society of Miniature Rifle Clubs Competition.—1, A. D. Neville, 100; 2, A. J. Mitchell, 99; 3, G. E. Francis, 99.

Belgrave Competition.—1, A. D. Cartwright, 100; 2, W. Beck, 100; 3, A. Neville, 100.

Graphic Competition.—1, W. R. George, 96; 2, A. Beck, 96; 3, S. Walker, 96; 4, A. W. Hodson, 96; 5, A. D. Neville, 96.

T. G. and J. Jubb Competition.—1, G. W. Booth, 98; 2, W. Beck, 97; 3, A. Beck, 97.

Charles H. Roud Competition.—1, A. D. Neville, 100; 2, W. Beck, 100; 3, S. Shinn, 99.

H. F. Parker Competition.—1, W. Evans, 99; 2, G. T. Booth, 98; 3, W. B. Reynolds, 98.

*The Sportsman* Competition (Championship of the Printing Trade).—Gold medal, A. D. Neville, 299; silver medal, J. G. Phillips, 295; bronze medal, W. Beck, 295.

John Fry Challenge Cup (Grand Aggregate Competition).—1, A. Beck, 979; 2, A. G. Neville, 978; 3, J. G. Phillips, 969.

## World's Speed Record.

Number 9 machine of the Laurentide Co., Grand Mere, Quebec, established a new world's record for high speed production of news-print paper on August 10th, by making more than 75 tons of paper at an average speed of 1,000 feet per minute. The machine ran safely at the terrific pace. This was the first time that news-print had been produced at this rate, says the *Paper Mill*.

Replies to Box Nos. to be addressed to the Offices.  
"BRITISH AND COLONIAL PRINTER AND STATIONER," 58, SHOE LANE, LONDON, E.C.4.

## SPECIAL PREPAID ADVERTISEMENTS

SITUATIONS WANTED.—Special Rate for Operatives only: One Shilling and Sixpence for Twenty-One Words and One Penny per Word after. Minimum charge One Shilling and Sixpence. Cash to be sent with order.

Telegrams: STONHILL, FLEET, LONDON.  
Telephone: No. 8407 CITY.

## Situations Wanted.

APPOINTMENT required; experienced Cost-Finding, Statistics, Graphs, Bookkeeping, Wages, Preparing Statements of Trading and Installation of Costing System advocated by Master Printers Association.—Write Box 13847.

## Miscellaneous.

BOOKS on Printing, Lithography, other Technical, Commercial, and all other subjects; second-hand and new; books on approval; catalogue 431 free; mention wants. Books purchased.—Foyles, 121, Charing Cross-road, London. 13831

## St. Bride Foundation Printing School, Bride Lane, Fleet St., London, E.C.4.

The Printing School "where things are done" re-opens on September 19th, 1921, with a curriculum suited to the needs of those engaged in the various sections of the Printing Industry. Early application should be made for enrolment at the School Office which is open from 10 a.m. to 5 p.m., and until 8 p.m. from September 12th, when Instructors will be present to advise students on suitable courses of study.

### A PUBLIC MEETING

will be held at Stationers' Hall on September 16th, at 6.30 p.m., W. Howard Hazell, Esq., J.P., in the chair. Certificates and prizes gained by technical students will be presented by Sir William A. Waterlow, K.B.E., J.P.

Those interested in Technical Education in the Printing Trades are cordially invited to attend.

## BATTERSEA POLYTECHNIC, LONDON, S.W.11.

Principal: ROBERT H. PICKARD, D.Sc., F.R.S.

TWO or Three Years' Full Time Day Courses in Chemistry, Physics, Mathematics, Engineering Subjects, and Paper Technology, for youths with a good general education, preparatory to their entering a paper mill or wholesale paper warehouse. For full details see Day Technical College Calendar, post free 4d., on application to the Principal.

### PAPER MAKING. R. Marx, B.Sc.

12 Lectures and Laboratory Classes on Monday evenings, 7.15 to 9.45, September to Christmas. Commencing September 26th, 1921. Fee 10s.

### PAPER TESTING. D. R. Davey.

1st Year Course.—25 Lectures and Practical Classes Friday evenings, 7.15 to 9.45. Commencing September 30th. Fee 20/-

2nd Year Course.—25 Lectures and Practical Classes Wednesday evenings, 7 to 9.30. Commencing September 28th. Fee 20/-

### COMMERCIAL PAPER COURSE. W. A. Cuss.

12 Lectures, Monday evenings, 7.15 to 8.45. Commencing January, 1922. Fee 10s.

Full particulars on application to the Principal.

# New Inventions.

## Feeding Sheets to Printing Presses.

A device invented by the Dexter Folder Co. for slowing down and straightening sheets prior to their being registered by the

devices which are fixed to the carriages and are movable in a vertical direction by screws on the gauges. As shown, a sheet 56 forwarded by a belt 57 is slowed down by gauges 49 with down-turned flanges 51 arranged near the front end of a guide 59 fixed at its rear end to a wider shoe or plate 54 carried by a support 52 on a carriage 21 which is reciprocated over a track bar 23, two or more of which are supported by a transverse shaft 26. The carriages 21 are each reciprocated by a connecting-rod 20 operated by an arm 18 on a rock-shaft 17 which is oscillated by cam and lever mechanism from a shaft 3. The gauge 49 is carried by a spring-controlled slide 40 fitted with a cam roller 41 which as the carriage 21

front stops of a printing press or like machine comprises two or more laterally spaced carriages reciprocated at a slow speed in the direction of feed of the sheet conveying tapes

and fitted with gauges which are movable into and out of the plane of movement of the successive sheets, and also with sheet-guiding

moves to the left moves down the inclined side of a cam block 29 then under a pivoted cam block 31 which maintains the gauges in sheet engaging position, and then up a cam block 28 past the end of the cam block 31, and finally as the carriage moves to the right the gauges are held in raised position by the movement of roller 41 on the upper surfaces of the cam block. The carriage 21 is fitted with flanges and a side plate to guide its motions on the bar 23, and at its upper end a gib 36 adjustable by screws 37 is interposed between the bar and upper frame 34 of the carriage. The spring 59 is maintained in the path of the sheet by a screw 61 carried by the

gauge 49, which acts through an aperture in plate 54, and the spring 59, acts as a frictional slow-down device. On the upward motion of the gauge 49 the spring 59 also moves out of the path of the sheet. The same firm has also patented an invention comprising automatic sheet-feeding devices, which also straighten the sheets prior to their being fed to front stops or the like, the devices comprising gauges mounted on reciprocating carriages moving on laterally spaced track-bars at a speed which is less than that of sheet-forwarding mechanism. Two or more movable gauges 30 are mounted on carriages 21 reciprocated along track-bars 22 by means of oscillating arms 18, and connecting rods 19, the arms 18 being on a transversely mounted shaft 14 oscillated by cam mechanism. The actual gauges 30 are flanges on a pivot 29 secured to an arm 27 mounted on a pivot 20 and formed with a cam-arm 31 and roller 32 for controlling the positions of the gauges. As the carriage 21 moves to the left in Fig. 2, the roller 32 engages an inclined cam surface 25' on a leaf spring 25 secured in a recess 23 in the bar 22 and is depressed thereby and by a corresponding incline on a guide-bar 26, so that the gauge engages an advancing sheet; and slows it down. As the several gauges move in unison, the sheet is eventually straightened by the action of the gauges. When the roller 32 reaches the end of the bar 26, it is raised by a spring 32' acting on a lever arm on shaft 20, and on the return motion it rides on the bar 26, the gauge being then above the sheet. During this return, the roller 32 presses on the spring 25 and forces it against the side of the recess 23.

#### Composing Machines.

Machines in which matrices are set up in line and then presented separately to the casting mechanism, as patented by Messrs. P. W. Druitt and W. R. Gilpin, are provided with means for casting low spaces by means of a divided mould blade. The set-notch of the space matrix *d*, Fig. 1, is stepped, the shallower part *d'* determining the set-width of the mould and the deeper part *d'* permitting the cut-off section of the blade to close the mould. The

two blades have lugs *a*, *b*, Fig. 3, arranged side by side to engage the two parts of the set-notch. For casting characters or type-high

spaces, the two parts of the notch are in one plane so that the casting ends *a*, *b* of the blades are in alignment. Specification 1903/00 is referred to.

## Caxton Convalescent Home,

Limpsfield, Surrey,

Devoted exclusively to the use of Men and Women engaged in the Printing, Bookbinding, Stationery, and Kindred Trades. Patients received from all parts of the Country.

A Subscription of Three Guineas annually by an Employer, Society or Workshop gives the right to nominate a Patient each year for a Three Weeks' residence at the home, including rail fare.

Penny-a-week Subscriptions from employees are earnestly solicited. Annual Subscribers (minimum 4/-), through a collector or direct to the Office, are entitled to a Three Weeks' stay at the Home entirely free.

### ASSOCIATED WITH THE HOME IS : : : : THE PRINTERS' WAR MEMORIAL

Commemorating the Printing, Bookbinding and Allied Trades' share in the Great War.

## Notes and Comments.

### **The Lifting of Trade Depression.**

IN the trades represented by the *British and Colonial Printer and Stationer* a severe slump has been experienced during the last eighteen months. Exporters found a sudden drying up of orders, and pressure for cancellation. The exchanges, of course, had a material bearing on the situation. With the gradual introduction of a lower level of values, the outlook is certainly more stimulating. We look to the energy and enterprise of our manufacturers to secure a fair share of that business in overseas markets, which is now gradually, if slowly, expanding.

### **British Trade Ship.**

A SPECIALLY designed exhibition ship under the title of "British Industry," will set sail from the Thames in the summer of 1923, for the chief ports of the world. During the ship's voyage of eighteen months' duration, a distance of 43,000 miles will be covered and thirty-four important trade centres visited. The table allows for a stay of from a week to a fortnight at each place, showing a total of 346 days during which the exhibition will be open. This British trade ship will be specially constructed for the purposes of an exhibition, and every detail of her equipment, from the engines to the fittings and furniture, will be an exhibit of British workmanship at its best. She will first proceed to the East Coast of South America, where there will be four ports

of call—Bahia, Rio de Janeiro, Montevideo and Buenos Aires. She will then sail to South Africa, calling at Cape Town and Durban, and thence to Australia, where the ports of call will be Fremantle, Adelaide, Hobart, Sydney and Brisbane. After proceeding to New Zealand, and calling at Wellington, Lyttelton and Auckland, the ship will steer north by way of Fiji to Yokohama, Kobe, Shanghai and Hong-kong. Seven days are allowed for docking and repairs at Hong-kong, and on the 358th day after leaving London the ship is timed to start on her home voyage *via* Manila, Saigon, Singapore, Batavia, Penang and Rangoon. In India the ports to be visited are Calcutta, Madras, Colombo, Bombay and Karachi, and on the way home the vessel will make a short stay at Aden, Malta and Gibraltar.

### **South African Trade.**

SOUTH Africa's trade, both in imports and exports, shows a big falling off as compared with last year. The figures for the first five months of this year indicate that imports to British South Africa have declined about 20 per cent. on the 1920 figures for the same period, whilst exports are about 45 per cent. down. We have not the detailed figures which would show the movements of imports in printed matter, printers' supplies, etc., but these doubtless still represent a substantial volume, despite the prevailing quietude, in

respect of which the printing industry does not differ from other lines of business. It is instructive to note that a committee of Transvaal master printers, meeting recently, regarded the imports of print and paper as so serious as to necessitate a special tariff of at least 50 per cent. They stated that during 1919 the amount of printing and stationery imported from overseas was greater in value than the printing, bookbinding and stationery actually produced in the country. The volume of these imports is still very large, though the latest figures indicate that the high costs of printing in the United Kingdom have led to a decrease in the amount of printed matter we have exported, whilst our exports of printing paper to South Africa have increased. There are, however, certain items of the printers' products that South Africa must at present import, and for the supply of these there will doubtless be increasing competition. Germany, of course, is well awake to the possibilities of the situation. A sample of her go-ahead methods is to be found in the advances recently made by a German firm of lithographic printers, who addressed a Johannesburg printing house, sending high-class samples of colour lithography.

#### **New Machinery Installations.**

SOUTH AFRICAN printers have experienced a slack time in common with their confrères elsewhere, and they are advised to "scout round" for business, and at the same time equip their establishments in a manner which will enable them the better to carry out future orders. Although a time of slackness is not generally regarded as a good one for pushing business, as a matter of fact men have really more time to receive visitors and to consider new schemes. In how many cases are improvements postponed from a period of activity to a later one of ease! Moreover, the plant and machinery have exhausted their efficiency during the busy time. It may be taken, therefore, that printers abroad are now thinking out new ideas of improved service. Colonial printers understand as well as anybody the pull which good and speedy work affords, and any new device for them to improve in these directions receives attention, particularly now that everything points to the bottom of the trade depression having been reached.

#### **Printers' Type in South Africa.**

If the criticism which is offered of the type founts in South African printeries is correct, there should be good business to be picked up

in the country by type founders. "In the majority of our offices," says the *South African Printer and Stationer*, "equipment will be found that is more fitted for a museum than for taking part in so competitive a business as the production of printing. Eliminate from the composing room these small, useless founts, for the reason that any equipment in the office not being continually used is a dead weight and a cost increase that should be avoided. Let our printers scrap these obsolete founts in their composing rooms which are the principal cause of time wastage in the least profitable department of the business. They should instal the most modern and labour-saving appliances available in the composing rooms and standardise all their whiting-out material strictly on the point system." Enterprising British firms might take advantage of the hint here conveyed.

#### **Opportunity in Boards or Boxes.**

A BRANCH of South African trade which has recently made great progress is the exportation of fruit. The fruit, we learn, is at present packed for export in wooden trays or boxes made as a rule from imported timber at considerable expense. The idea has, however, been mooted that these trays could be made from pressed paper boards, such as are now used for boxmaking and many other purposes in this country. The boards could be exported to South Africa in bales for manufacture there, or it might be possible to export made-up collapsible trays or boxes to meet the requirements. There is probably a big opening in this direction for British firms able to provide the right article on the right terms.

#### **Indian Printing Trade.**

ALTHOUGH there is continual slow progress in India towards the development of her home industries to cope with her need for goods, substantial imports of printed matter and printers' supplies must continue for some time to come. Quick industrial development in that country seems impossible of accomplishment, among the adverse conditions responsible being the Indian's natural preference for the agricultural as against the industrial state of life, the intermittent and usually comparatively inefficient nature of his labour, and the difficulties raised by the caste system in the way of industrial co-operation under workshop conditions. Thus India's own resources in the way of the production of printed matter are utterly inadequate. Although, according to the latest figures, the printing

trade ranks eighth among her national industries (on the basis of the number of workers employed), yet there are less than 150 printing establishments in the whole country and their total personnel numbers but little over 30,000. In these circumstances it is not surprising that British manufacturers, naturally favoured by the authorities, have found a considerable trade field in the great Dependency. The signs of the times, however, point to increased competition in future, especially from Germany. The new national spirit favours buying in the cheapest market, irrespective of Imperial preferences, and on this basis some Continental productions in the line of print and paper have, of course, a big pull over our own.

#### **"The Indian Importer."**

Those concerned with trade with India will be interested in the new monthly, "The Indian Importer," No. 1, vol. 1 of which has reached us. This first number makes a well-produced magazine, illustrated, containing 80 medium quarto pages. An important feature is the inclusion of many pages in Indian vernacular script, the intention being to reach not only European houses but also the native trader—whose requirements in respect of the printing craft may be expected as time goes on to grow by leaps and bounds. The publishers inform us that the printing and stationery trades will be specially covered. The number before us contains a number of appreciative "messages." Lord Curzon, as an ex-Viceroy, welcomes it as an effort "to foster the trade relations between the Indian importer and the British manufacturer and producer," and looks to it for "the promotion of cordial relations between the Indian bazaar purchaser—a class very formidable in numbers and increasingly powerful in influence—and that portion of the British community that is employed in catering for his needs." Mr. Thomas Ainscough, Senior Trade Commissioner in India and Ceylon, expects the new publication to "play an important part of increasing usefulness" in "the great developments of the future." Sir William Meyer, the High Commissioner for India, dwells upon the importance of bringing Indian importers and British exporters into closer touch with one another. And Sir Maneckji Byramjee Dadabhoy, as one of the leading Indian business men, welcomes the paper as a means of "promoting a mutual good understanding between Englishmen and Indians." The new journal, which incorporates the *Bazaar Trades Journal*, *Indian and Eastern Apparel* and the *Hardware and Ironmongery*

*Gazette*, is printed and published at Allahabad by the well-known Pioneer Press.

#### **Egyptian Government Contracts.**

H.M. COMMERCIAL Agent for Egypt calls attention to the fact that contracts for the supply of goods to the Egyptian Government have been lost through the failure on the part of British firms to comply with the conditions of tender. These conditions stipulate that tenders can only be submitted by firms having a resident agent in the country, and that tenders should be accompanied by a provisional deposit of two per cent. on the value of the offer in money. This deposit may be replaced by a letter of guarantee from an approved bank in Egypt, and does not necessarily involve any outlay of capital. Copies of the general conditions of tender which form the basis of the conditions which apply to all public tenders may be obtained on application at the Department of Overseas Trade, together with a memorandum of information for the use of those United Kingdom firms who are desirous of submitting tenders.

#### **British Printing Engineers' Opportunity.**

AUSTRALIAN printers are anxious about the trend of business and their future profits. A cost system is strongly advocated and closer attention to economical production. In endeavouring to overcome the trade depression some printers are accused of price-cutting shamelessly. Lower costs are essential if profits and wages are to be maintained. This seems an excellent opportunity for the manufacturers of labour-saving machinery and plant in the old country to advocate their wares in the colonies. There is a decided sympathy with British firms if their prices are right, and if any advantage is to be given it will certainly go to them. Supply houses should not lose the opportunity presented, for in helping Colonial brethren to meet the difficulties of the present situation they will be helping themselves also.

#### **Ink Supply in Canada.**

The supply of printing inks is a line in which the British exporter must have some very special "pull" on behalf of his wares if he is to find a footing in Canada, the Canadian requirements in this direction being largely catered for by Dominion manufacturers. According to a preliminary survey of "The Ink Industry," issued by the Dominion Bureau of Statistics, practically all of the printing

inks used in Canada in 1918, were made in Canadian factories, only about one-seventh of the total quantity having been imported; while not more than one-third of writing inks used were of foreign origin. Printers' rolls made in the same industry were worth \$134,835. Of the fourteen plants engaged in the production of inks and related products nine were in Ontario, two in Quebec, two in British Columbia and one in Manitoba. The total capital invested in these plants at the end of the year amounted to \$1,022,089, of which lands, buildings, fixtures, machinery and tools represented \$341,701.

### Toronto Strike Dragging On.

ACCORDING to latest advices, the Toronto printing trade is still in the throes of the strike, and British craftsmen who are desirous of emigrating to the Dominion are advised by their unions not to do so at present. The trouble is placing a great burden upon the industry, and there are yet no signs of peace. There is no prospect of either side giving way, or reaching a compromise over the matters in dispute, the most important of which is the question of the forty-four hour week. On the one hand, the employers are going ahead with the work they have in hand and are improving their plans for the future operation of their plants under conditions more to their liking than those to which the strikers will agree. On the other hand, the strikers utterly scout the idea that they may soon be forced to give up the struggle by reason of lack of funds. New heart, if they needed it, was probably put into them by the speech made the other day in the Toronto Labour Temple by Mr. John McParland, the President of the International Typographical Union, who was passing through the city, and stopped off to address the striking printers and their wives. Mr. McParland told them that "the International Typographical Union can carry on the fight for the forty-four hour week indefinitely." He said that of the 40,000 members of the union employed in the commercial printing branch, 31,000 were now enjoying a forty-four hour week, and 8,000 men in the United States and Canada were now on strike for the same principle. On the subject of the union's financial ability to continue the payment of strike pay to this big total of men, he said that the total contributions to the defence fund amounted to \$1,000,000 per month, while the disbursements to striking members totalled only \$800,000 a month. Thus a large surplus, at the rate of \$200,000 a month, was being piled up, he added, and

the union was consequently able to carry on the struggle as long as the employers wished to hold out. So there the matter stands—a very pretty example of an irresistible force meeting an immovable body!

### U.S. Tariff Bill Revision.

In some quarters the spirit of the Fordney Bill is regarded as being against trade with foreign countries, which is exactly opposite to the Republican doctrine. The Americans are now feeling a severe falling off in foreign trade, and this gives quite a different complexion to the Fordney Bill as drafted. We have already published in our pages the proposed tariff on paper and manufactures. The paragraph (1310) relating to books, etc., is as follows:—Books of all kinds, bound or unbound, including blank books, slate books and pamphlets, drawings, engravings, photographs, etchings, maps, charts, music in books or sheets, and printed matter, all the foregoing not specially provided for, 20 per cent. *ad valorem*; books bound wholly or in part in leather, the chief value of which is in the binding, not specially provided for, 33½ per cent. *ad valorem*; books of paper or other material for children's use, printed lithographically or otherwise, not exceeding in weight twenty-four ounces each, with more reading matter than letters, numerals, or descriptive words, 20 per cent. *ad valorem*; booklets, printed lithographically or otherwise, not specially provided for, 7 cents per pound; booklets, wholly or in chief value of paper, decorated in whole or in part by hand or by spraying, whether or not printed, 15 cents per pound; all post cards (not including American views), plain, decorated, embossed, or printed except by lithographic process, 26 per cent. *ad valorem*; views of any landscape, scene, building, place or locality in the United States, on cardboard or paper, not thinner than eight one-thousandths of an inch, by whatever process printed or produced, including those wholly or in part produced by either lithographic or photogelatin process (except show cards), occupying thirty-five square inches or less of surface per view, bound or unbound, or in any other form, 15 cents per pound and 20 per cent. *ad valorem*; thinner than eight one-thousandths of one inch, 2 dols. per thousand; Christmas and other greeting cards, printed lithographically or otherwise, or decorated in whole or in part by hand or by spraying, 30 per cent. *ad valorem*.

The specialties of Messrs. Samuel Jones and Co., Ltd., it may be mentioned, find a good market in South America.

## Trade Opportunities in S. Africa.

### Trade Commissioner's Optimism with Regard to the Future.

Mr. W. G. Wickham, Trade Commissioner for South Africa, who is paying another visit to this country in order to give to manufacturers at home information as to the possibilities that exist for further extending their business in South Africa, has favoured a representative of the *British and Colonial Printer and Stationer* with a few observations on one or two points of interest.

#### Freightage.

On the subject of the comparative charges between British and foreign shippers the exporters in this country had nothing to fear. Important as the question was to British manufacturers and exporters of printing materials, Mr. Wickham did not consider foreign competition in shipping rates to be very serious at the present time. Having got back in volume of trade to pre war conditions he was sure the home manufacturer of printing materials, with the advantage he has of the preferential tariff, would be able to compete successfully with foreign competitors in the Colonial markets.

Regarding the possibilities of increasing printing orders in South Africa, Mr. Wickham said that the field was already well covered by the home manufacturer, nearly every one of our big houses in almost every section of the trade being represented there. The trade position, although dull at the moment in the South African market, was sound at the bottom, and Mr. Wickham was firmly of opinion that before very long things were going to get better, although he was convinced that it was no use trying to push things too fast. Everything was ready for a big business, in which the printing trade would participate in no small degree, between this country and South Africa. The money was there, and all that was now required was organisation, in which latter function the services of his department were at the disposal of the home manufacturer to give information relative to the requirements of the South African trader.

With reference to high-class printing work Mr. Wickham thought that British productions had gone up in favour enormously in recent years, and he was confident that for really high-class work no other country could compare with them. It was in this special sphere of activity also that the British printer held a strong position, for in good quality printing his productions were far superior to those executed by the Colonial printer.

#### Style of Printing Required.

Speaking of the particular style of printing required by the South African business man, Mr. Wickham said they had their likes and dislikes. The American presentation of type and illustration was too pronounced, in fact

it had been overdone. The style of printing in demand among South African tradesmen, while they always desired work of good quality, showed a preference for work which is quiet in typographic get-up and more after the style generally characteristic of the British printer, and to some extent the Dutch.

Mr. Wickham, while admitting the whole position to be difficult, with the exchanges as they were, was confident that if this country devoted its whole energies towards securing a large export trade it would have nothing to fear from foreign competition in Colonial markets.

## South African Trade Information.

### Provincial Tour of Trade Commissioner.

Mr. W. G. Wickham, his Majesty's Senior Trade Commissioner in South Africa, is engaged on an official tour of this country for the purpose of discussing with firms the possibilities and conditions of United Kingdom trade with the Union of South Africa. The first part of his tour includes the following towns:—Leicester on September 19th 21st; Nottingham on September 22nd-23rd; Sheffield on September 28th-30th; Leeds on October 3rd-5th; Bradford on October 6th-11th.

Firms in these centres desiring to interview Mr. Wickham should communicate immediately with the secretary of their local Chamber of Commerce. Arrangements to visit other industrial centres will be made and notified in due course.

## Overseas Exporters.

### Effects of the Financial Crisis and Exchange Depreciation.

The directors of Overseas Exporters (1919) propose to place the company in voluntary liquidation. In a circular they state that "owing to the action of certain creditors, who have commenced proceedings against this company for the recovery of their accounts, we find it necessary to call the shareholders together to consider the position and the advisability of going into voluntary liquidation with a view to reconstruction.

"Our inability to meet our accounts as they have become due is due to various causes. Among them may be mentioned the financial crisis (which has affected this company very seriously, preventing it from obtaining discount on its foreign bills), the great fall in foreign exchanges, making it difficult for the company's debtors to meet their liabilities on due date, and complications caused through the coal strike."

A resolution for winding-up is to be submitted to a meeting of shareholders in Manchester. It is proposed that Sir William Plender be liquidator.

# Paper and Print—Export Figures.

**Although Shipments Mostly Show a Decline, the Outlook is Brighter.**

The export trade has been greatly hampered during the present year by many adverse influences. The lack of buying capacity on the part of overseas markets, the exchanges, labour troubles—all have had their effect. The trades represented by this journal have suffered in the general depression, and naturally the following returns show a heavy falling off in the export of many manufactures. There is, however, a better feeling, and British firms are showing a most enterprising spirit to take every advantage of the "turn of the tide." Our colonies favour the Mother Country, and in addition the Eastern markets offer strong potentialities. America is giving attention to the East, also to new inventions to revolutionise production, and it is for us not to be behindhand in the field. What is wanted is co-operation, goodwill and intelligence on the part of employers and employed. Given this, with the usual British grit and enterprise, there need be no fear but that a great expansion in overseas trade will be realised.

## Boards.

Although at the present time boards—comprising millboard, strawboard, cardboard, etc.—are by no means in active demand for export, yet it is encouraging to find that the shipments during the eight months ended August last show an increase as compared with the corresponding period of last year, the respective total quantities being 59,115 cwts. (of the value of £193,502) and 52,393 cwts. (valued at £194,092). For the pre-war period of 1913 (January-August) the exports of boards were 76,394 cwts. of the value of £72,159. British mills are showing considerable enterprise in providing plentiful supplies of all grades of folding and rigid boards for the box making and allied trades.

## Boxes and Cartons.

With the growth of boxed goods, and the dainty and attractive designs put on the market by British houses, it may safely be expected, with more normal conditions ruling, that the export trade in these goods will develop in importance. The demand during the present year for boxes and cartons of paper and cardboard (including folding boxes) has been rather slack, the shipments during the eight months ended August having amounted to only 13,404 cwts. of the value of £97,682, a reduction of 2,340 cwts. and £14,866 as compared with January-August of last year. During the corresponding period of 1913 the shipments reached 32,442 cwts., valued at £54,754. Our manufacturers, however, are anticipating an improvement in the demand,

and they are to be congratulated on the up-to-date equipment of their factories to meet competition.

## Coated Papers.

The slump in trade has seriously affected the demand for printed and embossed paper hangings, the exports during the last eight months dropping to 31,070 cwts., as against 102,205 cwts. during the corresponding period of last year, the values being £256,884 and £564,047 respectively. Other sorts exported during January-August of this year amounted to 16,201 cwts., of the value of £207,700, and last year to 22,810 cwts., valued at £265,833. Taking the eight months period, the shipments in 1920 exceeded those in 1913, when the demand for hangings amounted to 93,606 cwts. (£229,592), and other sorts 19,949 cwts. (£89,396).

## Packings and Wrappings.

Very little export trade has been done so far this year in packings and wrappings. The drop in shipments amounts to nearly 70 per cent., as compared with the corresponding eight months of last year—79,491 cwts. as against 259,051 cwts., the respective values being £229,222 and £524,842. Foreign competition is very keen.

## Paper Bags.

Trade depression clearly shows itself in the export demand for paper bags, which amounted to only 10,490 cwts. (£59,924) for the eight months ended August, as compared with 21,220 cwts. (£87,272) and 34,812 cwts. (£37,995) for the corresponding periods of the years 1920 and 1913.

## Playing Cards.

Only 24,520 dozen packs (682 cwts.) of playing cards were exported during January-August last, as against 45,153 dozen packs (1,062 cwts.) last year, and 81,023 dozen packs (2,383 cwts.) in 1913, the values being respectively (£16,567, £23,902 and £18,062).

## Printed Books.

The demand for printed books for overseas markets does not show any serious reduction. For the eight months ended August of this year the shipments amounted to 184,509 cwts., and for last year 187,405 cwts., the respective values being £2,285,509 and £2,349,608. During the corresponding period of 1913 294,544 cwts. of printed books were exported, valued at £1,729,225.

## Printing Paper.

The returns relating to the exports of printing paper show a heavy reduction:—

Jan.-Aug., 1921	487,410 cwt	£1,979,516
" 1920	568,030 "	2,305,720
" 1913	1,338,084 "	1,269,030

An encouraging feature, notwithstanding the decrease in total quantity, is that an improved demand has been experienced on the part of British Possessions. During this year the shipments amounted to 387,551 cwt. as against 334,667 cwt. last year. Foreign countries took 99,859 cwt. only this year, as against 233,963 cwt. last year, there being a very heavy falling off in shipments to France.

Australia has largely augmented her purchases of British printings, the supplies this year amounting to 194,141 cwt. (£705,944) as against 60,331 cwt. (£217,110) last year.

India, during January-August of last year, took British printings to the extent of 154,824 cwt. (£570,042), but during the present year the demand has dwindled considerably, the shipments amounting to only 67,312 cwt. (£282,986).

South Africa is also an improving market. The exports for the eight months ended August of this year amount to 51,005 cwt. (£212,656), as against 40,550 cwt. (£174,513) last year.

New Zealand is also buying more largely, the quantity exported during the last eight months being 32,470 cwt. as against 19,212 cwt. a year ago, the respective values being £124,772 and £75,878.

Shipments to Canada are also on a larger scale, but supplies to Ceylon and Straits Settlements show a reduction.

#### Printing Type.

Although considerably under the pre-war period, the exports of printing type show extremely favourably compared with last year:—

Jan.-Aug., 1921	214 tons	£80,232
" 1920	168 "	46,672
" 1913	377 "	63,744

#### Stationery Exports Valued at £1,556,289.

Envelopes (not including boxed stationery) were exported during January-August to the extent of 16,760 cwt. of the value of £176,353. This falls short of the quantity for the corresponding period of last year, viz., 35,172 cwt. valued at £245,707. The returns for the pre-war period (January-August, 1913) were 24,420 cwt., of the value of £57,076.

Other sorts (including account, note and exercise books, etc.) were shipped during January-August to the extent of 90,657 cwt. of the value of £1,379,936 as against 101,870 cwt. valued at £1,224,355 for the corresponding period of last year.

#### Tissues.

British tissues hold a good reputation in overseas markets. The eight months' shipments were 7,529 cwt. of the value of £117,213. During January-August of last year the exports were 8,612 cwt. valued at £106,043.

#### Writing Paper in Large Sheets.

Over 36 per cent. reduction is shown in the exports of writings as compared with a year ago. The returns are as under:—

Jan.-Aug., 1921	86,980 cwt.	£569,998
" 1920	136,353 "	794,190
" 1913	140,607 "	306,014

Owing principally to the limited purchases on the part of France, shipments to foreign countries dwindled from 44,429 cwt. last year to 18,061 cwt. this year. Supplies to British Possessions during the present year amounted to 68,919 cwt. as against 91,932 cwt. last year.

Australia is the principal market, taking (during January-August last) 22,804 cwt., of the value of £132,014, followed by:—India, 20,508 cwt., £129,872; New Zealand, 10,293 cwt., £57,734; South Africa, 5,159 cwt., £36,246; Straits Settlements, 2,160 cwt., £18,015; Ceylon, 1,086 cwt., £7,579; Canada, 894 cwt., £6,880.

## Opportunity for British Book Paper.

### Inquiries from the Pacific Coast.

A recently organised company of merchants' importers and exporters in San Francisco have intimated to the Acting British Consul-General at that city that they are desirous of getting into touch with United Kingdom firms with a view to ascertaining whether it is possible for business to be done in superfine and super-calendered book papers of United Kingdom manufacture on the Pacific Coast.

It is stated that the majority of the houses on the coast obtain their foreign supplies through the agency of shippers in New York, and it is thought that by importing direct via Panama Canal it would be possible to introduce British products advantageously into the San Francisco district.

The applicants will, it is stated, act as buyers in regard to the purchase of paper, and are prepared to arrange a letter of credit at any bank in the United Kingdom that may be indicated.

The directors and officers of the company are reported to be men of integrity and good standing. The firm was formed about a year ago, with the object of doing an import and export business with Scandinavia, but the manager and assistant manager, who are both Swedes, have expressed their strong hope of doing business with the United Kingdom.

The name and address of the company referred to may be obtained by United Kingdom firms interested on application to the Department of Overseas Trade, 36, Old Queen street, London, S.W.1.

MR. W. H. SILVESTER, of West Drayton, is among the successful contributors of articles on papermaking subjects to our Chicago contemporary, the *Paper Industry*, which offered prizes ranging from \$5 to \$300 for articles published.

FORESIGHT is the product of intelligent action.

## Colonial Notes and News.

### AUSTRALIA.

A NEW union, to be known as the Printing Industry Employees' Union, is to take the place of the various trade unions hitherto existing in the printing trade. By the middle of July the arrangements for amalgamation were practically complete. The new union will include the male bookbinders, the female bookbinders and stationery employees, cardboard boxmakers, and the Typographical Society members. A provisional board of management is to be constituted, to consist of 15 delegates from each section, together with the present board of management of the Typographical Society, with two delegates from Ballarat. The existing union officials will carry on under the board of management until January 1st, when the officers will have been elected. The new organisation will consist of 3,500 members in Victoria and 8,000 throughout Australia. A special meeting will be held in October.

It has been announced officially that Mr. H. E. Powell has been appointed Acting Government Photo-lithographer of South Australia, owing to the retirement of Mr. A. Vaughan. He will succeed to the permanent position on the completion of Mr. Vaughan's period of long leave. Mr. Powell is an officer of artistic gifts, and he will bring to his new duties a valuable, practical equipment. Mr. Powell was born in 1871, and entered the service on July 18th, 1887. He has had 34 years' experience in the department. Mr. Powell's assistance in the production of much of the lithographic work for the Education Department (various children's reading, drawing, and copy books, maps, and so on) has been recognised by more than one Director of Education. A "Waite" offset machine is to be installed in this department, and it should not be long before all the old style machines are superseded by presses of more modern type.

A NOTABLE figure in Australian journalism passed with the death of Mr. Watkin Wynne, general manager of the *Daily Telegraph*, Sydney, at his home at Waverley, in his 78th year, on July 8th. In 1879, Mr. Wynne, backed by a small Ballarat syndicate, started the *Daily Telegraph* in Sydney, and throughout his career took a keen interest in journalism from the Imperial as well as the Australian aspect. In recent years he was a delegate to Press conferences held abroad. From his early boyhood Mr. Wynne lived within touch of printing machines. He was only eight years old when he was brought to Geelong by his parents from Essex, England. When his school days were over, he went to work with a jobbing printer at Ballarat. His ambitious employer determined to start a newspaper in Ballarat called the *Evening Post*. In this way

Mr. Wynne began his association with newspaper work, and it lead, after experiences with several other newspapers, to his becoming chief of the great Sydney daily. In the mechanical production of the modern newspaper Mr. Wynne had an expert interest. He had long worked on the plans of a typesetting machine. He it was who installed the first Mergenthaler linotype machine in Australia. And he made some important improvements, for which he held the patents, in the linotype and the modern printing press.

MR. T. J. RYAN, M.H.R., decided, on the advice of his counsel, to appeal against the decision of the High Court in his case against the Hobart *Mercury*.

At a meeting held in the Brisbane Town Hall on July 13th, it was decided to form a Queensland Authors and Artists' Association. One speaker urged that the Education Department should be asked to have an entirely new set of school readers issued. It was decided that one of the aims of the association should be the encouragement of Australian art and literature directly by means of an alteration of the copyright law, providing for the local printing of all books with a view to securing Australian copyright.

### NEW ZEALAND.

PAPER manufacture is being carried on successfully in New Zealand by New Zealand Paper Mills, Ltd. Not being able to meet the whole of the demand in the country, the company is installing another machine made by Bertrams Limited, Edinburgh. There are three mills in operation—at Auckland, Dunedin and Maitāwhiri, with an output of some 6,700 tons per annum. The new machine is for the last named mill. Such has been the demand for the company's products that the mills have been running continuously without a break. The pulp is chiefly from Sweden, though some was received from Canada, but the quality and methods of shipment have been subjected to criticism. Considerable research has been undertaken with local fibres, and it is hoped soon to be able to employ a pulp of local manufacture.

### SOUTH AFRICA.

TENGO JABAVU, founder (in 1844) and editor of the native newspaper *Imvo Zibantu*, has died at Cape Town.

MR. L. E. NEAME has been appointed editor of the *Rand Daily Mail* in succession to the late Dr. Ward Jackson.

THE *Arrow*, devoted to sport and the stage, is a new weekly published in Johannesburg.

MR. B. K. LONG, B.A., has accepted the position of editor of the *Cape Times*. He was formerly foreign editor of *The Times*.

# A Colonial Printer Visitor.

## The Hon. Wm. Brooks, M.L.C., Discourses on the Printing and Paper Situation in Australia.

An interesting visitor to this country at the present time is the Hon. Wm. Brooks, a member of the Legislative Council of New South Wales, an alderman of the city of Sydney, and the holder of many other public positions in that part of the world. On the business side he is managing director of the firm of Messrs. Wm. Brooks and Co., Ltd., printers, publishers and manufacturing stationers, together with many other side lines such as envelope making, paper bag making, box making, etc. The firm have headquarters in Sydney, Viotoria and Brisbane. Mr. Brooks' name is well known in this country from the position he held as Paper Controller in Australia during the war.

During his visit to this country Mr. Brooks is inquiring into municipal affairs as well as industrial matters generally, as he has been president of the Employers' Federation in New South Wales for the past six years. On the industrial side he has had some very interesting interviews and chats both with the employers' organisations here and with a group of members of the House of Commons who are keenly interested in the industrial legislation of Australia.

"The excuse made for my trip home is business," said Mr. Brooks to a representative of the *British and Colonial Printer and Stationer*, "but the real reason is pleasure. Speaking from a business point of view I have always found my visits ultimately profitable."

### Trade Prospects in Australia.

Speaking of trade and the prospects of business in Australia Mr. Brooks observed: "I think we are just in the same position in regard to trade as you are in this country. We had a real good time up to towards the end of last year, but the slump has now arrived. Trade and commerce in Australia are generally suffering, not exactly a recovery, but from the effects of an inflated period which followed the war. In Australia as in this country, large firms of merchants and manufacturers have this year had to write down the value of their stocks by at least one half. There is with us, as with business men in this country, quite a period of financial difficulty. The banks and financial institutions have to carry a very heavy burden; but there is nothing approaching a financial crisis. We are probably suffering in Australia, as you are here, from Government interference with business and private enterprise and also from Government extravagance. We are just as badly in need of an anti-waste campaign in Australia as you are here. This only goes to show that all British communities are built on the same lines and meet and overcome the same difficulties from decade to decade.

"What I would like the people of this country to realise is that we are just as sensible and just as foolish as any British community, that we are just as financially sound and just as hard up as other British communities, but that we are just as safe in regard to meeting our obligations as any section of British traders in any part of the British Empire. Investors can just as safely, so far as ultimate security is concerned, lend their money to a Labour Government in Australia as they can lend it to any Government they are likely to have at the head of affairs in Great Britain."

### The Printing Industry.

With regard to the printing community in Australia, Mr. Brooks described it as quite an important one, although small as compared with the industry in this country.

"We really only cater for our own local requirements," he remarked, "whereas British traders and manufacturers in all sections of industry aim at an export trade. We have all the assistance that a high tariff can give us to protect us against the printers of the outside world. We do not object to this, even though in principle we may be free traders, because we recognise fully that we can meet all our own requirements, and can turn out just as good work in Australia as they can turn out in London or any city in the United Kingdom.

"At the same time we naturally have to buy largely from outside sources, and there is a universal desire to do all the buying we can from the Old Country. Eliminating any question of friendly or unfriendly feelings towards other countries, we are obsessed—if I may use the word—with the necessity of trade within the Empire in order to maintain the position of the British people in the commercial markets of the world. This applies to all sections of traders in Australia, and if British manufacturers can give us the stuff, they will get the orders. This necessarily means that the British manufacturer must be able to supply his goods in reasonable competition with other manufacturing countries, and this should not be difficult, seeing that right throughout our tariff there is a substantial preference given to British goods."

### The Labour Situation.

Dealing with the labour situation in Australia, Mr. Brooks said: "We are meeting with just the same labour troubles in the printing industry in Australia as are being met with in Great Britain. Wages have been unduly inflated owing to the high cost of living, and there will no doubt be a good fight before they are brought back, even

though the cost of living is proved to be falling.

"We also have claims for shorter hours, and, in fact, the Australian workman takes his cue from the aims and objects of Trade Unionism in other parts of the world. It may be taken for granted, therefore, that any concession or sacrifice of trade customs which is made in this country will sooner or later follow in Australia. This tends to show us that our interests are bound up in one another; and just as in a city or in a state or in a dominion individuals or groups of employers will, for what they conceive to be their individual benefit, give concessions which must ultimately affect the whole of the industry, so concessions secured in any part of the Empire will ultimately be successfully claimed in all the countries under the British flag."

### Relations with British Printers.

Mr. Brooks has been delighted during his visit to have the opportunity to be brought into touch with the president and officers of the Federation of Master Printers in this country. He is, by the way, almost the perennial president of the Master Printers' Association in New South Wales. At all events he has held the office for quite a number of years, and any attempt to pass it on to other shoulders has, up to the present, been thwarted.

"I had a very pleasant chat with Mr. MacLehose, president of the Federation of Master Printers, at what I may term his own fireside in his business office in Glasgow," remarked our visitor. "I need hardly say that from the moment we met his attitude was one of unreserved friendship. I gleaned quite a lot of valuable information and am taking back some literature, with the promise that we will reciprocate by sending along to London any literature from our end which may seem to be useful."

### The Paper Situation.

Invited to address himself to the paper situation in Australia, Mr. Brooks said: "In regard to paper, supplies were difficult to procure during the war. The Government were also reminded by the British Government that we were using too much shipping space for the importation of paper into the Commonwealth when every foot of shipping space was required for the transportation of war materials. The Australian Government did me the honour of appointing me Paper Controller, and the intention was that all supplies of paper to the Commonwealth should be controlled and limited by the Paper Control working under a ministerial department. We got as far as drawing up plans and apportioning the quantities of paper to be used, particularly by the newspapers, by which alone we would have saved from 35 000 to 40,000 tons of shipping space per annum; but just when we were ready to put the regulations into effect the Germans caved in, the Armistice was declared, and I joyfully assured the Government that there was no further need for the control of paper.

"We paid extraordinary prices for paper in Australia; but, generally speaking, we

could get what we required provided we were prepared to pay for it. Orders were given for import without any limitation as to cost, the price to be the best possible at date of shipment. I leave it to the imagination of your readers as to what we occasionally paid in such circumstances. All that, however, is past, and we are now sharing the general reductions which have taken place, especially during this year.

### Sources of Supply.

"In paper as in other raw materials we are keenly desirous of getting our supplies from Great Britain. Of course, there are some papers which we have to get from other countries, particularly news-print and kraft and sulphite papers. In news-print and kraft we deal as largely as possible with Canada; but Scandinavia has been quoting advantageous prices for some little time past.

"It will be many years before we shall manufacture many kinds of paper in Australia. We are producing good wrapping paper and various kinds of boards; but outside that our paper production is a negligible quantity. Our consumption of paper and paper materials, printing inks, machinery and all the requirements of the printing and allied trades have grown by leaps and bounds during the past 10 or 12 years. At present the prices quoted for British machinery are too high to induce orders unless under stress of absolute necessity. We hope, however, that there will be a readjustment of prices in the near future, and that all classes of machinery required by Australian printers, bookbinders, and manufacturing stationers produced in this country will be equivalent in efficiency and output to the machinery which is obtainable in other countries.

"American printing and other machinery are pushed very keenly in Australia, just as American paper and inks are. In printing inks particularly I have always been sorry to see high-class inks imported from America when they could just as well have been supplied by British makers. It seems to me sometimes that there is hardly sufficient push or advertising of British products in this direction. The Americans are very keen when they are after business, and they are not keen to-day and slack to-morrow, but they are keen all the time. That is where British manufacturers sometimes fail. It must not be overlooked, further, that Australian printing ink manufacturers are catering well for the printing trade requirements. At the same time, the quantity of high-class inks imported is quite considerable."

**PAPER MILLS CLOSE FOR LACK OF ORDERS.**—The paper mills at St. Paul's Cray, Kent, have closed down for an indefinite period. The plant is being repaired and the office staff remain at work. A notice states that arrangements have been made to pay the workers unemployment benefit on the premises, under Section 2 of the Insurance Act. Depression in the printing trade, and consequent falling off in orders, are said to be the causes of the closing down.

## The Wage-Reduction Dispute.

### Statement by the Employers.

The resumption of negotiations opens up possibilities of important developments in respect of the wages dispute, which, as reported last week, had reached an impasse. The seriousness of that impasse is indicated in the following statement to the Press, issued by Mr. A. E. Goodwin, the secretary of the Federation of Master Printers:—

"The general public and commercial community, particularly those who use printed matter, may find themselves seriously inconvenienced in the course of another week owing to the crisis in the printing industry, where notices have been posted in nearly all the houses doing book and commercial work, and in a great number where periodicals are printed, to the effect that wages will be reduced by 7s. 6d. per week. As many members of the trade unions are accepting this intimation as a notice of dismissal, it is clear that very little printing will be carried out after next week, unless wiser counsel prevails.

"The employers claim that they are not to blame for this serious state of affairs. They have been obliged to take some action in consequence of the serious condition of the industry, shown by the great amount of unemployment in the trade, mainly due to the fact that prices are so high to-day that customers have to a large extent ceased to give out printing orders.

"Moreover, the employers added 15s. to the wages of their men during 1920, as the result of the fact that the index figure of the cost of living moved up from 125 to 176, and seeing the figure has now fallen back to 122 the employers consider that they are really entitled to take 15s. off the wages, but it has been the boast of all connected with the industry that, despite all the difficulties of adjusting wages and working conditions during the war, settlements have always been amicably reached, and therefore on objection being taken to so large a reduction the employers reduced their original demand from 15s. to 10s.

"Responsible officials of a number of the unions recommended the acceptance of the 10s. reduction. When, however, 10s. had been refused by a ballot, the employers, still desiring a peaceful settlement, brought the matter before a joint industrial council of the trade, and adopted a resolution of that body further to abate their proposal bringing it down to 7s. 6d. A fresh ballot was taken on this proposal, and certain large unions accepted the reduction, but other important ones refused, mainly, it is said, because their leaders declined to make any recommendation at all as to whether the proposal should be accepted or rejected.

"The employers feel they have gone as far as they possibly can, and therefore posted notices last week saying that the reduction would begin to operate after next week. They have no intention of putting the amount saved

by the wage reduction into their own pockets, but intend to pass it on to their customers, in order to encourage the demand for printing.

"In view of the amount of unemployment and short time prevailing to-day, of the fall in the cost of living, and of the fact that nearly all other industries have accepted similar reductions, and in most instances more substantial reductions, they feel no hesitation in laying their case before the public."

### Statement by Mr. T. E. Naylor.

Interviewed at Cardiff before the week-end, Mr. T. E. Naylor, secretary of the London Society of Compositors, is reported to have said: "I venture to appeal to those London firms who have posted notices to make sure before allowing them to take effect that their interests will not be seriously jeopardised by such action, for once we have parted company there will be no return of our members to those offices until general agreement is reached."

Late news on the wage dispute will be found in this week's "Current Topics."

## Librarians and Printing.

Library officials from all parts of the United Kingdom are assembling in Manchester for the annual meeting of the Library Association. Sir Chas. Oman, in addressing the conference on Tuesday said that either all printing save of school-books and novels produced in large quantities must stop, or the wages of printers and binders must come down. He would deplore the effecting of this by something in the nature of a lock-out by all concerned in the writing and publication of printed matter; but inconvenient, as this might be, it would be better than a continuance of the present state of things, which made impossible the publication of all specialised matter.

**THE JOURNALISTS' ORGANISATIONS.**—Speaking at a meeting of journalists at Cardiff on Sunday, Mr. Thomas Jay, president of the National Union of Journalists, in dealing with recent suggestions and conversations having for their object a better feeling between his organisation and the Institute of Journalists, said that while he could not advise his executive council to meet the Institute in order to bring about a working arrangement or a working agreement between the two bodies, because he felt that that would lead to greater misunderstanding, he was quite prepared, if approached on the definite question of fusion, to bring about a preliminary meeting of the two executives to find, if possible, a basis for fusion. He believed that fusion was in the interest of the profession.

A RECENT addition to the supply houses in Johannesburg is the firm of Messrs. Seligson and Clare, Ltd., who are offering a wide range of flat papers from English mills.

## Trade Union Leaders at Cardiff.

### A Complimentary Dinner.

Mr. A. L. Carter, president of the Cardiff and District Printing and Kindred Trades' Federation, occupied the chair at a complimentary dinner given at Cardiff on Tuesday of last week to the representatives of the trade attending the Trade Union Congress.

Proposing the toast of the Printing and Kindred Trades Federation, Mr. F. O. Roberts, M.P., said the gathering was being held at a most critical period so far as their trade was concerned. It was true to say that the trade union movement was being placed on its trial. He hoped the constituent societies of the Federation would not fritter away their energy and destroy their strength by disunion. He believed not only in federation but amalgamation, and he looked forward to the time when there would be one union and one card for all employed in the printing trade. (Applause.)

### The Current Wage Dispute.

Councillor G. A. Isaacs, National Society of Operative Printers and Assistants, in responding, said he thought they would still avoid the threatened disruption. He attached great significance to the fact that employees and employers were sitting down together in harmony at dinner when lock-out notices were actually posted up against the men. A lock-out would be a disaster for both of them. He had no hesitation in saying that the spirit that prevailed in the printing trade to-day was due to the conduct of the Printing and Kindred Trades' Federation, which stood for good relationship with the employers. The spirit to-day was certainly a thousand times better than it was in 1910.

Mr. T. E. Naylor, London Society of Compositors, also responded.

Councillor George Nelson gave the toast of the Joint Industrial Council, to which the Right Hon. C. W. Bowerman, M.P., replied. The latter said that after the speeches of Councillors Isaacs and Nelson his advice to the employers was to take heart. (Laughter.) He had yet to learn that war had done any good, either politically or industrially (hear, hear), and he felt sure advantage would be taken of the suggestions made that night and that a way would be found out of the present difficulty in the printing trade. (Cheers.) When he looked back on the work done by the Joint Industrial Council he was more than delighted. One result was that every man, woman, boy and girl had been able to have a week's holiday at full pay, and thanks to the goodwill of the employers they were able to have payment for statutory holidays besides. He hoped no one was going to jeopardise the good feeling that now existed between the parties, and that the members of the Joint Industrial Council would go away determined to do their utmost to put things right.

Mr. H. Skinner, Typographical Association, in proposing "The Master Printers' Federation," said if there was going to be a reduction there was only going to be one. Every man in the industry was determined that they would not go back to pre-war conditions. His candid opinion was that they could not accept a 7s. 6d. reduction. The employers told them that if they accepted a reduction there would be more employment, but he did not believe it and it could not be proved. Mr. Skinner characterised the Cardiff employers as the best in the Federation.

Mr. Robert J. Webber, general manager and director of the *Western Mail*, Ltd., who responded, said he was proud to be associated with the Master Printers' Federation, and he was sure there was not a single member of it who wanted to deprive any man of a reasonable return for his labour. The question that every employer had to ask himself was what he could afford to pay. He happened to know that many employers had lost thousands of pounds during the last few months. The men's organisation had excellent leaders throughout the country, and he thought they were particularly fortunate locally in having reasonable men like Mr. James Ford, district secretary, Mr. Carter and others to look after their interests. Very good feeling existed between the employers and the men, but he thought more could be done with the object of preserving the trade financially. If undercutting was going to be allowed it would make it extremely difficult for those employers who were anxious and willing to pay good wages to carry on. (Hear, hear.)

Mr. T. W. Tucker also responded, and endorsed Mr. Webber's remarks in regard to the position in the Cardiff district.

## The Italian Customs Tariff.

His Majesty's Consul-General at Milan (Mr. W. A. Churchill) points out that the new Italian Customs Tariff which came into force on July 1st does not appear to be generally known or understood by United Kingdom firms. The effect of the high exchange and the high customs tariff has been to bring imports into Italy from this country, in common with others, to a standstill. Exporters in Italy should, therefore, make careful inquiries as to duties and other points before shipping. The Department of Overseas Trade, 35, Old Queen-street, Westminster, S.W.1, is prepared to render assistance to inquirers in respect of these matters.

THE cinema film of the Prince of Wales' visit to the Devon Valley Paper Mill (Wiggins, Teape and Co., 1919, Ltd.), will be shown in London after its exhibition in Manchester.

PAPER suits, believed to be of German origin, are appearing on the British market, and some curious surprises have been experienced at laundries where the garments were sent to be washed.

# Printers' Managers and Overseers ASSOCIATION.

## September Meeting.

### Important Current Topics Discussed.

An intended smoking concert having been struck off the evening's agenda, attention was centred, at the meeting of the P. M. and O. A. held on the 6th inst., upon a discussion on "Trade Questions." The interest of this subject, in the present critical stage of the wages dispute, drew an overflowing attendance of members.

The minutes of the July meeting having been read and confirmed, three new members were elected in the usual way. These were: Mr. E. J. Christmas (E. W. Wormald and Co., 6 and 7, Moor-street, Soho, W.1. Overseer—Composing; Mr. R. G. Cordran (Messrs. Wass, Pritchard and Co., 85, Fenchurch-street, E.C. Overseer—Letterpress Machine-Room). Mr. A. S. Thatcher (Cassell's General Press, 32-36, Fleet-lane, Ludgate-circus, E.C. Overseer—Letterpress Machine).

The question of the Dublin Centre was next raised, the secretary moving the recommendation of the Council "That the Dublin Centre be dissolved on October 31st, 1921." Mr. Whittle explained that it was practically at the request of the Dublin Centre that it was now thought advisable to settle the Association's "Irish Question" by transferring Dublin members to the Centres to which they had originally belonged. No loss of members would be involved. The motion was duly seconded and was carried without discussion.

### Overseers and Trade Disputes.

The next item on the agenda being the report of the Council in respect of the Association's negotiations with the Typographical Association on the question of overseers' notices, the secretary and the president explained the position to date. With regard to members of the Association who are managers or overseers as those terms are understood in London—i.e., not merely working overseers—these will be allowed to tender one month's notice without prejudice to T.A. membership. In regard to working overseers, however, the position is still unsettled, the T.A. having urged that these should not be allowed to work after the expiration of the men's notices. Mr. Jarvis expressed the view that it was desirable that in future merely working overseers should not be admitted to membership of the Association. He pointed out that the Association's rules do not define the term "overseer" and "manager," and he suggested that the point should be rectified at the next revision of rules. Meanwhile he asked for the formal sanction of the meeting that the Council interpret the terms as may seem good to them. A motion to this end was accordingly moved, seconded and carried *nem. con.*

The meeting being open for general business, the secretary mentioned that Mr. C. J. Gray, a past president of the Association, had for nearly six weeks been confined to bed by illness. He would be pleased to see friends at his home at South Woodford. On the suggestion of the president, the meeting agreed that a letter of sympathy be sent from the Association to Mr. Gray.

The remainder of the meeting was of a private character, the position of the Association's members in respect of the present wages crisis being freely discussed.

## Circulars from the Continent.

### High Postage and Lost Printing.

An official at the General Post Office in London informed a Press representative on Friday that large postages of circulars were received in this country from the Continent, notably from Belgium. Some of them were printed on the Continent, but a considerable section comprised circulars from British firms, which entrusted their postage to Continental agents.

"Of course, one effect of this is that the revenue goes to the country of posting," said he official. "The practice is attributable to the rate of exchange, which makes it cheaper for British firms to have their circular posting done on the Continent. I do not think the high postal rates have much to do with it."

Asked whether the Postmaster-General could enforce any restriction, the official replied that the question was a very thorny one. "Broadly speaking," he added, "it is an infringement of monopoly to send a letter out of this country by any method other than the post. The Postmaster-General has expressed his readiness to take action in any case of that kind. But there is nothing to prevent British firms from having their circulars printed and posted on the Continent, and I know of at least one Belgian firm which undertakes business of that kind. The whole difficulty lies in the rate of exchange, and the Post Office cannot fix its rates in this country on a basis of the depreciated exchanges of Continental countries."

No information is yet available as to the financial results of the dearer post, but in October the General Post Office will be in a position to analyse the figures, and arrive at some sound conclusion.

MESSRS. ABEL HEYWOOD AND SON, LTD., Manchester, send us a copy of the 1922 edition of their 32-page illustrated almanac. This publication is of the same high class as in previous years. The illustrations are reproductions of the best photographs procurable, while the matter in the almanac is instructive and interesting.

agents, 11, St. Bride-street, E.C. 4.

THURSDAY, SEPTEMBER 15, 1921.

# Current Topics.

## The Wages Arrangement.

THERE is now every prospect that the question of reduced wages in the printing industry will be settled without resort to a strike. At all events negotiations were resumed on Tuesday, and the result is that another ballot is to be taken, the notices put up by the masters being withdrawn for the time being. Both the Printing and Kindred Trades Federation and the T.A. have agreed to this course, and it is particularly significant that the latter body has agreed to recommend acceptance of the revised terms. In the case of the unions, two in London have not yet given an undertaking to recommend acceptance, but negotiations with the L.S.C. are proceeding as we go to press. It can scarcely be expected in the circumstances that the ballot will reject the masters' proposals in view of the amount of unemployment existing and the arrangements for lower wages in other industries.

## Official News.

OFFICIAL statements were issued on Tuesday night notifying the results of the conference held between the parties earlier in the day. The following agreed statement was made by Mr. A. E. Goodwin, secretary of the Federation of Master Printers, and Mr. A. E. Holmes, secretary of the Printing and Kindred Trades Federation: "At a conference held in London to-day (Tuesday), it was agreed that the employers would suspend their notices so as to enable the unions to take a ballot of their members, to be returnable by September 27th, on the question that the first 5s. of the proposed reduction shall take effect on the pay-day in the week ending October 1st. In the event of the unions recommending the acceptance of the employers' terms, the second reduction, amounting to 2s. 6d., shall take effect on the pay-day in the week ending January 7th, 1922."

\* \* \*

## Position of the T.A.

THE agreed statement by Mr. A. E. Goodwin, secretary of the Federation of Master Printers, and Mr. H. Skinner, of the Typographical Association, is as follows:—"A conference was held to-day (Tuesday) between the Federation of Master Printers and the Executive of the Typographical Association, when it was agreed that notices posted in the printing trade in the provinces affecting Typographical Association members and expiring on the pay-day in the week ending September 17th, 1921, should be suspended until the pay-day in the week ending October 1st, 1921, and that the Typographical Association Executive should, in the meanwhile, take a ballot of its members with a recommendation for acceptance of the following proposal: A reduction in wages of 5s. per week on the pay-day in the week ending October 1st, 1921. A further reduction of 2s. 6d. on the pay-day in the week ending January 7th, 1922." As already stated the new attitude of the T.A. is significant, seeing that they had hitherto rejected any idea of a reduction of wages, and the turn which events have taken offers new hope of a peaceful settlement.

\* \* \*

## Export Hindrances.

COMPLAINT is frequently made of the heavy freight rates on shipments from this country, especially in comparison with those fixed in neighbouring countries. The suggestion is put forward that exporters are at the mercy of a shipping "ring" which has no regard for the welfare of British industry. Certain it is

that freights are higher here than elsewhere, and in the case of the Australian preference which is being given under the new tariff to British news print, the whole of that advantage is wiped out by the difference in freight. It is disquieting to learn that exports of home manufactures are placed under so serious a handicap by our own shipowners. There are sufficient hindrances which exporters have to face without the creation of unnecessary barriers, and the attention of the governing authorities should be given to this matter of freights.

### News-Print for the Australian Market.

CANADIAN manufacturers of news-print are alarmed at the prospect of losing their export business to Australia, and there is a strong movement to secure the same treatment as Great Britain enjoys. Formerly, Great Britain had to meet a duty of 5 per cent. *ad valorem*, against 10 per cent. on the part of other countries. The Australian Government, however, now allows free imports from Great Britain, whilst other countries, including Canada, have to pay a specific duty of £3. This duty is on much higher scale than formerly, and Canadian manufacturers urge a reciprocal agreement with Australia, feeling that the same treatment should be meted out to them as enjoyed by British manufacturers. A soreness is also felt that they should be placed on an equal footing with European and Scandinavian countries. As a matter of fact Canada seems to have shipped much more paper to Australia than the United Kingdom during the first quarter of the year, and their principal competitor appears to be Sweden, and to a lesser extent Norway and Holland, countries reported to be favoured in the way of lower freight rates. It will remove the irritation on the part of Canadian manufacturers to know, according to a report from Melbourne, that the Commonwealth Government intends to introduce a Bill to provide that, where satisfactory reciprocity arrangements can be made, the preference now given to manufacturers of the United Kingdom may be extended to goods of British Dominions. Some idea of the progress that is being made in the production of news-print in Canada may be judged from the fact that whereas at the beginning of 1920 Canadian news-print mills had a total capacity of 2,775 tons per day, at the beginning of 1922 it is estimated that this capacity will have been increased to 3,245 tons per day, and that by 1923 the news-print production of the Dominion will total over 1,000,000 tons per year.

## Personal.

LORD GREY has denied any connection between himself and any new London or other newspaper.

SIR HARRY BRITTAIN M.P., with a party of British journalists, has left London for Bucharest, at the invitation of the Roumanian Government, to make a tour of the country.

MR. ROBERT DONALD and Mr. A. G. Gardiner, together with other well-known writers and publicists, are signatories to a petition to the Home Secretary on the subject of the imprisonment of the Poplar Councillors, among whom is Mr. George Lansbury, editor of the *Daily Herald*.

MAJOR BRAMWELL TAYLOR, who has just sailed for Canada on the "Melita," and who is the son of Salvation Army officers, commenced a journalistic career as messenger boy in the editorial department of the Salvation Army's headquarters 21 years ago. For the last 18 months he has been editor of the Army's musical paper, the *Bandsman and Songster*, and he goes to Winnipeg to become editor of the *War Cry* circulating in Western Canada.

MR. A. W. STEVENS, assistant overseer on the composing staff of the *Western Mail*, Cardiff, was the victim of a shooting outrage in the early hours of Saturday, when cycling home on the lonely part of the Penarth road lying just past the Turnpike. Fortunately the assailant's aim in the dark was bad, though Mr. Stevens is suffering from a wound in the hip.

THE wedding of Miss Dorothy Kennedy Jones to Mr. George Brian Hersey took place at Llandrindod Wells on Wednesday of last week.

THE individual papermaking members of the Federation of British Industries have elected as their representative on the Grand Council Mr. C. R. Seddon, J.P., president of the Employers' Federation of Papermakers.

SIR ROBERT CARLYLE and Mr. Charles Baker have been re-elected directors of the Hartlepool Paper Mill Co., Ltd.

MAJOR MOORE is constantly exhibiting enterprise in developing the business of the Irish Paper Mills Co., Ltd., and he and Mr. Guinness attended the recent conference in Dublin to encourage the use of products of Irish industry—in this particular case Irish cigarettes packed in boxes made in Ireland of Irish board.

and engravings, blocks for letterpress printing, photographic and cinematographic goods, productions and appliances, fancy goods, leather, cloth and paper materials, etc. Private company. First directors: D. B. Buckland, H. J. Buckland, S. A. Hart and Samuel Reinish. Registered office: 43, Clerkenwell-road, E.C.

### **COMPANY MORTGAGES AND CHARGES.**

Fresh Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 1908, and Satisfactions registered pursuant to Section 97 of the same Act. (The registration of Satisfactions is not compulsory).

**CO-OPERATIVE PRINTING SUPPLY, LTD.** (London).—Particulars of £2,500 debentures authorised August 25th, 1921, whole amount issued; charged on the company's undertaking and property, present and future, including uncalled capital.

**VICKERY PRESS, LTD.** (printers, London).—Particulars of £1,000 debentures authorised August 8th, 1921, present issue £250; charged on company's property, present and future, including uncalled capital.

**DISPATCH PRESS (CRICKLEWOOD), LTD.**—1st mortgage debenture to "Bearer" dated August 12th, 1921, to secure £400, charged on the company's undertaking and property, present and future, including uncalled capital. Also 2nd mortgage debenture of even date to secure £1,880 on above-mentioned property. Holder: C. E. Routley, 26, Dersingham-road, Cricklewood.

**BRIGHTON HERALD.**—Satisfaction in full on August 24th, 1921, of mortgage dated September 29th, 1913, securing £300.

**KIDDERMINSTER BILLPOSTING CO., LTD.**—Mortgage dated August 13th, 1921, to secure £400, charged on certain lands and buildings in Kidderminster. Holders: Mrs. R. Moxon, Shelton Hall, Stoke-on-Trent, and W. J. Moxon, Burston House, Burston, Staffs.

**EDUCATIONAL PUBLISHING CO., LTD.** (Cardiff).—Particulars of £5,000 debentures authorised June 23rd, 1921, whole amount issued; charged on the company's undertaking and property, present and future, including uncalled capital.

THE British Manufacturers' Representatives Association of South Africa, with offices at Remington-buildings, 96, St. George-street, Cape Town, have modified the "Allied Firms Clause" of their constitution. Representatives of British houses who sold directly or indirectly late enemy goods sent out by their principals were practically barred membership, and to prevent a probable defection of so many members, it has been decided to delete the stipulation mentioned. The Association is watching carefully the action of local manufacturers with a view of securing increased tariffs on imported goods or the introduction of a system of restricted importations under licence.

## **Papermakers' Directory.**

Recent changes in the proprietorship of British and foreign paper mills and the creation of new pulp and paper companies render an up-to-date directory essential to all who are concerned with paper transactions. Since the Armistice there have been great alterations resulting from the reconstruction and the growth of the industry, which may now be said to have reached the stage of comparative normality. For this reason the 1921 edition of "The Papermakers' Directory of All Nations" (Dean and Son, Ltd., 21s. net, pp. lvi., 935) is all the more welcome. It is a complete guide to the principal paper, pulp and board mills of the world, and at last it has been possible to revise the Austrian and German mill sections, which, it is pointed out have remained almost in *statu quo* since the commencement of the war in 1914 so far as the entries in the Directory are concerned. This 30th edition consists of three main sections, arranged alphabetically. The first deals with mills in the United Kingdom (together with many useful lists of allied trades); the second to those in the Colonies and abroad; and the third gives a comprehensive register of mill productions under some 400 trade designations, classified according to the class of goods manufactured, country of origin, and name of firm. This third section will meet the needs of those who desire to know where and by whom certain grades and classes of paper are made, while the whole volume, published in its usual style, is well arranged and more complete than ever.

### The Bookbinder and the Time Docket.

SIR,—I think it will be conceded by those who have followed the correspondence, that although the language may have been emphatic, my previous letters to you have at least been completely relevant to the subject. I have carefully refrained from any remark that could be construed as objectionably "personal" (will your correspondent "Foredge" please note). My one "personal" reference was complimentary to Mr. Harraway and he acknowledged this in his letter published by you on July 21st. It is therefore not now my intention to be infected with the hot air inebriation which Mr. Harraway's absence from England has apparently caused him to suffer, he certainly doesn't know me or he would hardly characterise me as "pugnacious" or as a "firebrand"; over his coarse "personal" criticism it will be charitable to pass the kindly sponge of sympathetic oblivion.

There are one or two points, however, which with your kind permission I would like to make clear.

Mr. Harraway states that the purpose of his last letter was "to correct one or two mis-statements" of mine. If that was really the purpose, the letter was superfluous; if carefully and intelligently read, the correspondence will show that I have made no mis-statement whatever and I take the strongest possible exception to the falsity of the remark.

As regards my position at the meeting in Manchester: there were other platform speakers besides Mr. Goodwin and Mr. Sever, and when they were not addressing the meeting the men were either disputing the rulings of the chair or boisterously addressing one another; you can therefore judge how hopeless it would be for a humble and retiring individual like myself to "butt in"; apart from that, however, it appears that the method I have adopted has successfully aroused the interest and concern of, at least, Mr. Harraway. I imagine that Mr. Goodwin and Mr. Sever are fully competent to take care of their own "self-respect" and have a shrewd idea of their opinion of the meeting they so philanthropically addressed; I am quite sure that neither they nor my other "reasonable friends" in the Master Printers' Federation will be likely to take on the task of dealing with me and my peculiarities which Mr. Harraway has so generously relinquished and deputed to their care.

With regard to Rule 17 of the N.U.B. and M.R.; this is not a rule as Mr. Harraway states "for the government of a trade union." It is a rule of an operative association for the government of employers, and I again submit that master binders should not rest until such an execration is expunged; it is notable that

even Mr. Harraway has no excuse to offer for it.

In conclusion, I should like to congratulate Mr. Eden on his temperate contribution and "Foredge" for his timely letter in yours of August 25th. The ventilation of this important subject which has been in a stifling atmosphere for years cannot do other than good and you are entitled to the best thanks of all your readers.

Yours, etc.,

HOWARD VICK.

(Member of the Costing Committee,  
Manchester M.P. Association).

Manchester, Sept. 7th.

## Printing Classes in Leeds.

The winter session of the Department of Printing under the Leeds Technical School opens on Monday next, September 19th. Courses arranged for the coming session include typography, linotype, monotype, lithography (including transferring and offset printing), aerograph and finishing, printing machine mechanism, photo-mechanical processes, photography, bookbinding (including forwarding and finishing), machine book sewing and cost finding.

The case-room in the School is equipped with oak cabinets and frames and will accommodate 18 compositors at one time, and the accessories include a large assortment of modern type, rules, borders and metal furniture, all on the point system.

The equipment of the letterpress machine-room includes the latest No. 4 Miehle two-revolution press, the Caxtonette Platen, the Bremner Wharfedale and other machines. The lithographic machine-room is fitted with an L. and M. rotary offset, a Mann's rotary offset, and offset proof press, a Mann's double demy flat bed machine, a Mann's Broadway press, a rotary photogravure machine and a copperplate press. The lithographic artists' department is equipped with power-driven aerograph installation, Day's mediums and all requisites for litho technique and photographic finishing. The process department includes the latest process cameras by various makers, and also a selection of up-to-date routing and bevelling machines by Penrose's.

THE Federation of British Industries are issuing a Utrecht Fair edition of *The Bulletin*, printed in Dutch and English. The Fair, which is being held from September 6th to 16th, includes two main groups, devoted to printing and allied trades (with five sub-groups) and papermaking, etc. (with seven sub-groups). Well arranged and illustrated, *The Bulletin* is designed to circulate among buyers at the Fair and in the important market of the Dutch East Indies. It maintains the spirit of enterprise and service of the Federation of British Industries.

## Australian Paper Tariff.

### The Discussion on the British Preferential Rate.

Describing the proceedings in the House of Representatives when the tariff schedule was under consideration, the Melbourne correspondent of the *Manchester Guardian Commercial* refers specifically to the case of paper. He mentions incidentally that there have been informal negotiations between paper interests in the United Kingdom and the legislatures in Australia to obtain some commercial advantage over paper manufacturers in foreign countries, not excepting Canada, more particularly in respect to the import duty imposed on news-print by the Commonwealth. It was desired, it is understood, to secure a preference of £3 per ton for United Kingdom paper of this class.

Colour is given to this assumption, says the writer, by the somewhat peculiar procedure adopted in the House of Representatives when Division XIII. of the tariff schedule (paper and stationery) was approached. At the request of a Labour member the debate on the division was postponed until a day to be fixed, a later division of the tariff being proceeded with. The member stated that he had special material he desired to put before the House, but it was not at the moment complete.

#### Fixed Rate Preferred.

On the item being called on at the date fixed the Minister in charge said it had been represented to him that the Press was anxious for a fixed rather than an *ad valorem* impost. After much consideration he was prepared to make the duties: British preferential 10s. intermediate £2, and general £2 per ton. The deputy leader of the Country party moved that the rates be: British 10s., intermediate 25s., and general 30s. per ton. Notice was given by an extreme Protectionist member that he intended to move 10 per cent., 25 per cent., and 45 per cent., subsequently altered to 5 per cent., 10 per cent., and 45 per cent. respectively. The Minister later said that he "was prepared to go to the length of making the British preferential tariff free, leaving the intermediate and general rates as he first proposed, viz., £2 per ton, for the sake of revenue."

The member of the Labour party at whose instance the debate had originally been fixed then intimated that if his colleague's amendment in favour of a 45 per cent. general tariff was defeated the party would ask for 40 per cent., and they would fight the duty from point to point. "They stood for a British preference of at least £3 per ton." That, it is understood, was the suggestion of the British interests. The amendment for rates of 5 per cent., 10 per cent., and 45 per cent. was put and negatived by 23 votes to 14.

#### Extension to Canada.

An important statement was made by the Minister in the course of the discussion on this

item. He said, "The Ministry proposed to extend to Canada the British preference under the Tariff Bill," adding: "It was not proposed to extend reciprocation to any country other than a British dominion in regard to paper, but the intermediate tariff could be extended to countries other than British dominions." It is not quite clear at the moment whether Canada is to be included in British preference for all items or only for paper; but, as the concession is to be placed in the Bill itself, which has still to be presented, it is probable that the statement has the wider meaning. It is quite likely, however, that this concession, even in the matter of paper alone, will not quite please the United Kingdom manufacturers who have been moving in the matter.

## Paper Deterioration in India.

### An Examination of the Causes.

A lengthy paper on "The Perishing of Paper in Indian Libraries" forms part vii., vol. iii., of the Journal of the Indian Institute of Science. The investigation was undertaken at the Institute of Science on behalf of the Government of India by Mr. J. J. Sudborough and Miss M. M. Mehta. "Perishing" is defined as a brittleness which is so marked that folding the paper once or twice will cause it to break along the fold, and it is observed in many of the books in record offices and libraries. The conclusions which the investigators have arrived at as the result of an examination of numerous libraries in India do not differ greatly from the report of the Committee on the Deterioration of Paper in Europe published in the Journal of the Royal Society of Arts for 1898 (No. 46), or from the report of a similar committee in America which appeared as Report No. 89, Pub. 1909, U.S. Department of Agriculture.

Chemical perishing, as distinct from the destruction caused by micro-organisms, was investigated, and the conclusion arrived at is that the former type of perishing, which is by far the commoner, is due to hydrolysis of the cellulose molecules of the paper and their later decomposition into simple substances rather than to a process of oxidation. The type of paper found to be most resistant in India is a rag paper the fibres of which have not been weakened in the process of manufacture. Treatment which has been found to damage the fibre is prolonged digestion with alkali, over-bleaching, non-removal of the last trace of bleach by antichlor, and imperfect washing that leaves traces of acid in the paper, while rosin and filling material should not exceed a small fixed percentage. It is recommended that all books and documents of permanent value should be removed to libraries in hill stations with temperate climates or placed in special buildings in which complete air control can be maintained.

MESSRS. A. L. WISE AND SON, paper agents and merchants, of 43, Fleet-street, E.C.4, hold the important agency in the United Kingdom for Wargon's Aktiebolaget, of Wargon, Sweden. The annual output of this mill is 30,000 tons, embracing well-known brands of M.G. sulphite papers, M.G. bag reels, M.G. caps, M.G. envelope papers and news in reels or sheets.

MESSRS. ARCHIBALD AND CO., paper merchants, of 11, Pilgrim-street, E.C.4, have recently added further commodious warehouse room to their existing premises in Broadway. The new premises, which are at 4, Evangelist-court, Pilgrim-street, will enable the firm to extend very considerably their ranges of stock of art papers, printings, writings, banks and boards.

## Football.

Played at Kidwell, Lee Green, on Saturday, St. Clement's Press (2nd eleven) secured a win over Fleetway Press by 2 goals to 1. The fixture, in the Printing and Kindred Trades Football League (Section B), was keenly contested, and according to opinions expressed by both sides, should have resulted on the run of the play in a win for the latter team.

**BRITISH EXHIBITS AT LEIPZIG.**—In a report on the Leipzig International Exhibition of the Book Industry and Graphic Arts, 1914, at which the British exhibits included a valuable collection of rare editions of Shakespeare's works, the Department of Overseas Trade state that 98 per cent. of the objects displayed at the British Pavilion and the Graphic Arts Building have been returned. Claims for damage and missing objects amount approximately to £650 only. In view of the fact that the exhibits were stored in Germany during the war, these results are, it is added, as gratifying as they are surprising, and most creditable to all concerned.

### BATTERSEA POLYTECHNIC, LONDON, S.W.11.

*Principal:* ROBERT H. PICKARD, D.Sc., F.R.S.

**T**WO or Three Years' Full Time Day Courses in Chemistry, Physics, Mathematics, Engineering Subjects, and Paper Technology, for youths with a good general education, preparatory to their entering a paper mill or wholesale paper warehouse. For full details see Technical Day College Calendar, post free 4d., on application to the Principal.

**PAPER MAKING (Engineering).** R. Marx, B.Sc.  
15 Lectures and Laboratory Classes on Monday evenings, 7.15 to 9.45. Commencing October 10th, 1921. Fee 10s.

**PAPER MAKING & PAPER TESTING.**  
D. R. Davey  
*1st Year Course*—25 Lectures and Practical Classes. Friday evenings, 7.15 to 9.45. Commencing September 30th. Fee 20/-  
*2nd Year Course*—25 Lectures and Practical Classes. Wednesday evenings, 7 to 9.30. Commencing September 28th. Fee 20/-

**COMMERCIAL PAPER COURSE.** W. A. Cuss.  
12 Lectures, Monday evenings, 7.15 to 8.45. Commencing February, 1922. Fee 10s.

*Full particulars on application to the Principal.*

### LONDON COUNTY COUNCIL.

#### TYPOGRAPHY.

Day and Evening Classes are held at the undermentioned Institutions:

**Camberwell School of Arts and Crafts,** Peckham Road, S.E.4.—Afternoon Classes for Apprentices; Evening Classes for Journeymen and Apprentices.

**Central School of Arts and Crafts,** Southampton Row, W.C.1.—Day Technical Schools for Boys preparing to enter the Book Production (Bookbinding and Printing) Trades. Evening Classes for Journeymen and Apprentices. Early Evening Classes specially arranged for Apprentices.

**St. Bride Foundation Printing School,** Bride Lane, Fleet Street, E.C.4. Evening Classes in Printing, Typography and Lithographic Printing. Day Classes for Apprentices and others.

Full particulars as to fees, etc., may be obtained on application at the various institutions.

September, 1921

JAMES BIRD,

*Clerk of the London County Council.*

Replies to Box Nos. to be addressed to the Offices,  
"BRITISH AND COLONIAL PRINTER AND STATIONER," 58, SHOE LANE, LONDON, E.C.4.

## SPECIAL PREPAID ADVERTISEMENTS

**SITUATIONS VACANT, REPRESENTATIVES or MANAGERS REQUIRING POSITIONS, AGENCIES, BUSINESSES WANTED or FOR DISPOSAL, MACHINERY and MISCELLANEOUS.**—Charges for Advertisements of the above class are Three Shillings for 21 Words or under; One Shilling extra for every line or portion after. Seven words to be reckoned for each line.

**SITUATIONS WANTED.**—Special Rate for Operatives only: One Shilling and Sixpence for Twenty-One Words and One Penny per Word after. Minimum charge One Shilling and Sixpence. Cash to be sent with order.

**ADVERTISERS,** by paying an extra fee of Sixpence, can have replies addressed to the Office of this Journal under a number, and such replies will then be forwarded post free.

**LEGAL and FINANCIAL ANNOUNCEMENTS, TENDERS, PATENTS, SALES BY AUCTION, Etc.**—Two Shillings per line.

Telegrams: STONHILL, FLEET, LONDON.

Telephone: No. 8407 CITY.

### Situations Vacant.

**P**APER BUYER wanted by Waterlow and Sons, Ltd., London; must have a thorough knowledge of all classes of Paper and be of good business ability. Liberal salary and permanent position to an efficient and experienced man.—Apply, Secretary, Waterlow and Sons, Ltd., 26, Great Winchester-street, London, E.C.2. 13850

### Situations Wanted.

**A**PPPOINTMENT required (home or abroad); experience includes Wages, Statistics, Graphs, Bookkeeping, Trading Accounts, Installation and Working of Costing System as advocated by M.P.A.—Write Box 13848.

### Machinery for Sale.

**E**MBOSSED PLANT for sale.—Almost new.—Apply, St. Clement's Press, Portugal-street, W.C. 13849

**G**UILLOTINE CUTTING MACHINES for sale, by Furnival, Crossland, Salmon and Greig; 18-in., 20-in., 30-in. 42-in. and 48-in., both power and hand; offers wanted.—Phillips, Mills and Co., Ltd., Bridge Wharf, Battersea, S.W.11. 13851

### Miscellaneous.

**B**UCHANAN'S EQUIVALENT WEIGHT CALCULATOR. A Time-saving Pocket Companion for Papermakers and Paper Users. Standard size (12-in. long), in boxwood; £2 2s.—Stonhill and Gillis, Publishers, 58, Shoe-lane, London, E.C.4.

**W**ASTE PAPER: ITS RECOVERY AND RE-MANUFACTURE. By James Strachan. A Fund of Information; price 12s. 6d.—Stonhill and Gillis, Publishers, 58, Shoe-lane, London, E.C.4.

## Trade Notes.

THE *Carmarthen Weekly Reporter*, which was established 60 years ago, has suspended publication.

A PROPOSAL has been mooted that the co-operative movement should launch or acquire a daily newspaper.

REPORTS from Berlin on Monday stated that owing to a strike of electricians the Berlin newspapers cannot appear.

THE first number of the *Times of Mesopotamia* was issued on Monday, July the 11th. It is published at Basra, and with it is incorporated the *Basra Times*.

TO ASSIST the University, Messrs. Andrew Reid and Co., Ltd., have printed, free, for Armstrong College, Newcastle-on-Tyne, a calendar in handbook form.

COST OF LIVING.—To the criticisms made at the Trade Union Congress anent the Government's cost of living figures, it is understood that the Ministry of Labour is to issue an official reply.

ATTEMPTING to board a moving motor-bus in Oxford-street, Mr. Joseph Wilson (78), the well-known Oxford-street print seller, fell and fractured his skull, dying later in Middlesex Hospital. At the inquest a verdict of death from misadventure was returned.

AN inquest was held on Saturday evening at Box on the body of a man who was found lying dead in a field. It was stated deceased had a National registration card bearing the name of George Bancroft, 3, Clove-court, Canal-street, Stockport, machine paper ruler. The inquest was adjourned until September 27th.

MR. MEREDITH T. WHITTAKER, of the *Scarborough Evening News*, the well-known president of the Linotype Users' Association, has purchased the *Scarborough Daily Post* and the *Scarborough Weekly Post*. The *Daily Post* (an evening paper) will cease publication after October 1st. The *Weekly Post* will be published as hitherto.

L.C.C. CENTRAL SCHOOL.—We have received a copy of the Prospectus and Time-Table for 1921-2 of the London Central School of Arts and Crafts, Southampton-row. As usual, a section of the school's activities is devoted to the subject of book production, there being day and evening instruction in a variety of printing and allied crafts relative to the making of books.

THE Governor of the State of New York has signed a Bill which exempts women proof-readers and linotype and monotype operators from the law prohibiting women from working after 10 o'clock at night and before 6 in the morning. Thus hereafter they can work any and all hours of the day, the same as men. The other provisions of the law for the protection of women in industry remain in force.

LOEBER, LTD., are sending out a comprehensive price list for September, together with samples of cover papers, fancy papers, blottings, boards, tissues and transparents, etc.

ROBERT ERIKSON AND Co., LTD., have removed their offices to Midland Bank Chambers, 71a, Queen Victoria Street, London, E.C.4. Telephone number and telegraphic address are unchanged.

SUPPRESSED GERMAN NEWSPAPERS.—The Committee of the Reichsrat, which has been hearing appeals in connection with the recent suppression of certain newspapers, has decided to reverse the Government's decision in the case of six journals which were suppressed in respect of articles published before the issue of the President's decree. The most important of the six is the organ of the Pan-Germans, the *Deutsche Zeitung*.

WORLD'S PRESS CONGRESS.—It is now definitely arranged that the Press Congress of the World is to be held in Honolulu from October 11th to 25th, with a possible extension of the visit to twenty days. Among the British speakers will be Lieut.-Colonel E. F. Lawson, D.S.O., M.C., assistant managing proprietor of the *London Daily Telegraph*, who will represent the Newspaper Proprietors' Association, the Empire Press Union of Great Britain and the Institute of Journalists; Major Alexander Steven, proprietor of the *Northumberland and Berwickshire Newspapers*, England; Mr. B. G. Horniman, president of the Press Association of India.

PRINTERS' ADVERTISING.—In these days of keen competition printers are, in increasing numbers, taking their own medicine and sending out in their own behalf printed publicity matter to prospective customers. The latest example of printers' advertising to come into our hands is an admirably designed booklet issued by Messrs. Burrup, Mathieson and Sprague, Ltd. It is enriched with excellently printed three-colour illustrations from the firm's own originals, and its general get-up and production bear out the message it carries as to the effectiveness of high-class printing in impressing the reader with the "quality" character of the goods or service advertised.

INSTITUTE OF JOURNALISTS.—Mr. Robert Donald's recent critical remarks about the Institute of Journalists (summarised in a par in our issue of September 1st) have drawn forth a vigorous reply by Mr. George Springfield, the president of the Institute. Mr. Springfield writes from Bournemouth: "We do not need to come here to 'inquire into the position and prospects of the Institute.' That is our constant care. We know that, like other societies, our finances are in a less flourishing condition than we could wish; and we have already taken effective steps to remedy that, in these days, not uncommon state of affairs." Re membership figures, Mr. Springfield adds: "We are undoubtedly losing old members, but it is by death; and to say that we are not getting new ones is simply untrue. I am today reporting to the council the election of 44 new members since its last meeting."

# **“SLOGGER”**

## **AUTOMATIC SHEET FEEDER**

### **Latest Improvements on the “SLOGGER.”**

1. Aluminium Stroker Arms avoiding all bending.
2. More accessible Pile Raising Adjuster. Absolutely self-locking. No lock nuts to work loose.
3. Automatic side lay giving perfect register.
4. Fine thread Caliper Adjustment which immediately stops machine and feeder if two or more sheets are stuck
- 5, 6 & 7. Stopping, Starting and Trip Handles. All controls in one place.
8. Bevel Drive instead of Chain.
9. Fan for air draft mounted in one unit on Base of Feeder.
10. Leather collapsible joint to allow air-box movement without the use of perishable rubber.
11. Air throttle control adjusted in a few seconds for any thickness of paper or board
12. Pile Raising Handle for raising pile to starting height at the commencement of each loading.

### **BRITISH THROUGHOUT.**

**Perfect Automatic Register. No continual re-loading.**  
**Can be attached to any make of sheet-fed press or folding machine.**

# A Buyers' Guide to Supply Houses

Advertising in the "British and Colonial Printer and Stationer," with a brief reference to some of their Specialities.

## BOOKBINDERS' SUPPLIES.

- BRITISH LOOSE-LEAF MANUFACTURERS, LTD.  
27, Finsbury-street, London, E.C. Loose-leaf metal parts and accessories.
- JAMES BRANDWOOD AND CO., 21, Saville-street, Manchester. Marbling inks.
- THOMAS BROWN, 7, Albion-street, Manchester. English gold leaf, brown and white blocking powder.
- FISHER BOOKBINDING CO. (1912), LTD., St. Ann's Works, Herne-hill, London, S.E.24. Binders to the printing trade.
- GARWOOD AND MUDDIMAN, LTD., 77, Queen Victoria-street, London, E.C. Leather and leatherette, grains.
- WILLIAM GREENWOOD AND SON, Carlton Works, Halifax. Case making, gold blocking.
- NICKERSON BROS., 99 and 101, Worship-street, London, E.C. Tanners and manufacturers of moroccos, roans, etc.
- T. WILLIAMSON AND CO., 6, 8 and 8a, Palace-square, and 7, Pool-street, Manchester, and 30-31, St. Swithin's-lane, London, E.C. Cloths, label cloths, photograph cloths.
- WINTERBOTTOM BOOK CLOTH CO., 60, Wilson-street, London, E.C. Manufacturers of bookbinders' cloth, label cloth, morocco cloth, buckram, etc.

## COMPOSING AND TYPESETTING MACHINES.

- LANSTON MONOTYPE CORPORATION, LTD., 43 and 43a, Fetter-lane, London, E.C.
- LINOTYPE AND MACHINERY LIMITED, 9, Kingsway, London, W.C.2.

## ENGRAVERS, DIE SINKERS, Etc.

- BADDELEY BROTHERS, Moor-lane, E.C. Dies, embossing, perforating presses, relief stamping.
- BURLINGTON ENGRAVING CO., LTD., 322-326, Goswell-road, E.C.1. Process blocks, in colour, half-tone or line.
- B. DELLAGANA AND CO., LTD., 11, Shoe-lane, Fleet-street, London, E.C.4. Dellanick and Steeletto nickel steel printing surface, block makers, etc.
- DIRECT PHOTO-ENGRAVING CO., LTD., 34, Farringdon-street, London, E.C. Photo etchers, artists, designers.

## ENGRAVERS, DIE SINKERS, Etc.

- G. H. MADDIN AND CO., LTD., 10 and 11, Middle-street, Aldersgate street, London, E.C. Engravers, die-sinkers, cameo printing, embossing blocks.
- MARSHALL ENGRAVING CO., LTD., 12-14, Farringdon avenue, London, E.C. Embossing and process engravers, artists and photographers.
- W. MILES AND CO., 44, Houndsgate, Nottingham. Type-casting machines, engravers and cutters of oriental matrices.
- JOHN SWAIN AND SON, LTD., 89-90, Shoe-lane, London, E.C. Photo engravers, designers and electrotypers.

## ENVELOPE MACHINE MANUFACTURERS.

- DAVID CARLAW AND SONS, LTD., 31, Finnieston-street, Glasgow. "Leader" envelope folding and gumming machine.

## PAPER AND BOARDS.

- HENRY FEATHERSTONE, 13, Whitefriars-street, Fleet-street, London, E.C.4; Cables, "Fetipapmill, Fleet, London." Paper agent and merchant.
- W. LUNNON AND CO., 59, Carter-lane, London. Paper merchants. Supply Lunco paper in colours and white.
- J. AND J. MAKIN, 20, Mount-street, Manchester. Papermakers.
- JOHN H. SMYTHE, 2 and 4, Tudor-street, London, E.C.4. Paper contractor, engine and tub sized writings.
- THAMES PAPER CO., LTD., Purfleet, Essex. Paper boards for home and export.
- HARRY B. WOOD, 201-5, Produce Exchange, Manchester. Boards, dextrine, leather, wood pulp and straw.
- A. O. WRIGLEY AND CO., 20 and 21, Queenhithe, London, E.C.4. Paper agents and merchants.

## PAPER AND PRINTING TRADE PUBLICATIONS.

- STONHILL AND GILLIS, 58, Shoe-lane, London. Publishers of the *British and Colonial Printer and Stationer* and the *World's Paper Trade Review*.

The up to-date Colonial printer is naturally anxious to have information as to the latest

**PAPER AND PRINTING TRADE PUBLICATIONS.**

improvements in machinery, new processes, and all labour and time-saving devices. He is also very desirous of having a knowledge of paper prices and trade movements generally. There is a fund of information in the weekly issues of the *British and Colonial Printer and Stationer*, which appeals to printers, stationers, box makers, envelope makers, bookbinders, etc. Why not have the journal regularly delivered to your office or works? It is a good investment at a low price—13s. for one year (subscription 8s. 8d., plus 4s. 4d. postage). Send the publishers a remittance at once.

In the Colonies quite a number of movements are on foot to build pulp and paper mills. Who are the makers of special machinery? What is the selling price of wood pulp and other papermaking materials? What are the conditions of the world's pulp and paper markets? All this information, and much more, will be found in the *World's Paper Trade Review*. Interviews with leading men associated with the industry are published, latest inventions described and illustrated, new processes dealt with; in fact, its pages teem with practical information and commercial intelligence relating to paper, pulp, paper stock, engineering and the allied trades. Order the *Review*, which is published weekly, for a year, and send a remittance of 32s. 6d. to cover cost (subscription 26s. plus postage 6s. 6d.).

**PLANT AND MACHINERY.**

**BENTLEY AND JACKSON, LTD.**, Lodge Bank Works, Bury, Lancs. Papermakers' engineers.

**ROBERT BROWN AND CO.**, 119, Oakley-street, London, S.E.1. Printers', stationers' and general engineers.

**BUMSTED AND CHANDLER**, Cannock Chase Foundry, Hednesford, Staffs. Paper bag making machinery.

**EDMUND BUSH AND SON, LTD.**, Crown Point-road, Leeds. Hot-air drying apparatus for drying varnished and gummed sheets.

**AUG. BREHMER** (T. McAuliffe, British Successor), 12, City-road, E.C.1. Bookbinders' machinery.

**OSCAR FRIEDHEIM, LTD.**, 7, Water-lane, Ludgate, London, E.C.4. Cables, "Friedheim, London." Machinery for the bookbinding, printing and allied trades.

**A. T. GADSBY**, 42a, Denmark-hill, Camberwell, London, S.E.5. Bronzing machines, all-steel waste paper balers, gumming machines, etc.

**JOHN HADDON AND CO.**, Salisbury-square, Fleet-street, London, E.C.4. Printing machinery, type and sundries for the printer.

**PLANT AND MACHINERY.**

**HEWITT BROS.**, 6, Field-street, King's-cross, London, W.C.1. Cables: "Typochase, Phone, London." Stereotyping and electrotyping machinery.

**HOLLINGS AND GUEST, LTD.**, Thimble Mill-lane, Birmingham. Baling presses for waste papers, etc.

## Paper in South Africa.

The Department of Overseas Trade has sent out a report on the economic and financial conditions in South Africa as sketched by Mr. W. G. Wickham, H.M. Senior Trade Commissioner in South Africa. Very little is said about the allied trades or the prospects of paper manufacture in South Africa, although paper is included among several industries in which it is pointed out developments are or may be pending. A statement showing the imports into the Union shows, however, that paper was imported during 1920 to the value of £1,555,517, which compared with £1,018,740 in the previous year. In addition, stationery and stationers' goods were imported to the value of £1,871,291.

## S. African Government Printer.

### Colonial Career of a London Apprentice.

A recent visitor to this country, a printer who learnt his trade in our metropolis and who is now numbered among Londoners holding important Colonial appointments, is Mr. F. W. Knightly. On his taking temporary leave of South Africa, where he is Government Printer for the Union, Mr. Knightly was given a send-off dinner at Johannesburg by his friends in the printing trade, and he has just returned to his adopted country after an interesting visit to England, during which, by the way, he was able to attend the recent Printing Exhibition, where doubtless he picked up valuable suggestions for the improvement of the equipment of the Government Printing Works of South Africa. His career has been briefly outlined in a recent number of the *South African Printer and Stationer*, from which we clip the following particulars.

Born in London, Mr. Knightly was educated at Christ's Hospital, Newgate Street, and, at the age of 16, was apprenticed to Sir Philip Waterlow, of Messrs. Waterlow and Sons, Ltd., for a period of seven years, to learn the trade of printer and stationer. His apprenticeship was served in the Finsbury Market factory where he passed through the binding department, case room, litho department, machine department and paper warehouse. At the termination of his apprenticeship he was placed in charge of some of the railway contracts then held by Messrs. Waterlow and Sons, of London.

One memorable event occurred during his apprenticeship with Messrs. Waterlow, and that was the installing of a battery of linotype machines. These were put in a special room and covered round with fine wire gauze, as a precautionary measure against type or other missiles being thrown into the machines, and were generally looked upon with the greatest disfavour by the employees. However, in those days the management did not appear to realise the great power of the linotype, for, after a year or two, they were disposed of, to the great relief of the compositors.

In 1901, during the South African War, Mr. Knightly was engaged in London by Sir Percy Girouard, the then Director of Imperial Military Railways, to proceed to Pretoria to start a printing plant to supply the railway requirements.

At the conclusion of the South African Campaign Mr. Knightly removed his plant to new and larger premises at Germiston. Unfortunately, in November, 1903, the whole plant and stock of stationery was destroyed by fire, and a new start had to be made in wood and iron sheds alongside the old site.

In 1907, Mr. Knightly was offered the position of Government Printer of the Transvaal, to take over control of the Government Printing Works in Pretoria, and as the Rail-

way Department did not wish to lose his services, it was finally decided to amalgamate the two plants and staffs in Pretoria.

In 1908, the Government appointed Mr. Knightly a member of the Transvaal Tender Board.

On the consummation of Union, in 1910, Mr. Knightly was appointed Government Printer for the Union of South Africa, which comprised taking over control of the printing and stationery establishments of the other three Provinces who had contracts in the capital towns of the Provinces for their printing requirements. On the expiration of these contracts the work was largely concentrated in Pretoria, and the offices in Maritzburg and Bloemfontein were finally closed.

Mr. Knightly still retains a large staff at Capetown, who supervise the contract printing for Parliament, and the issuing of all Parliamentary publications, and where there is also a large stationery store for supplying the various Government Departments throughout the Cape Peninsula and the South-West Protectorate.

In 1910, Mr. Knightly was appointed a member of the Tender Board for the Union of South Africa, and in 1918 he was elected chairman of the Board.

This board deals with all tenders for supplies to the various Government Departments throughout the Union, which total several millions sterling per annum, and forms no small part of Mr. Knightly's official duties.

Under Mr. Knightly's direction considerable expansion has taken place in the Government Printing Works. Linotype and monotype installations and a rubber stamp-making plant have been introduced, and self-feeders have been affixed to printing and ruling machines. Other labour-saving devices in the shape of an auto-knockup machine and a Kelly press have been added to the plant, whilst a rotary printing machine, capable of printing and numbering in two colours one side of a job and printing and numbering in one colour on the other side, perforating, cutting and folding, all in one operation, is at present on order.

Mr. Knightly is a member of the Master Printers' Association and has always taken the keenest interest in the various trade problems.

**THE SHIPPING EXHIBITION.**—At the opening of the Shipping, Engineering and Machinery Exhibition at Olympia, last week, Sir Trevor Dawson, managing director of Vickers, declared that when recently in Germany he found workshops which were hives of industry, that labour worked harmoniously, and that output was very high. When it was considered that the average wages paid to our workmen were at the rate of say, 1s. 9d. an hour as against four marks current in Germany, equal at to-day's exchange to about 3d. it would be seen that our difficulties were enormous.

## New Inventions.

### Setting-up Forms.

An invention has been patented by R. Mc Kay covering a device for setting up forms for contents bills, posters, and the like for stereotype work. The device consists of a bed-plate 1 which is originally type-high, but, with the exception of end strips 2, is cut away to the depth of one pica, and the recess so formed is provided with grooves 4, each one pica in width and depth and spaced apart the distance of one pica. Letters 5 for use with the device are formed on plates the soles of which are provided with ridges to mate with

grooves 4, the letters being held in position by friction. Adjustable side strips 3, also formed on their underside with ridges to mate with the grooves 4, are provided, and in conjunction with the end strips 2, constitute a chase. When the type is set, the device is used for the preparation of the matrix in the usual way, a recess 8 on the end strips 2 and side strips 3 forming a ridge on the matrix to engage with the check on the casting box.

### Printing Plates.

Mr. A. E. Alexander has patented an invention in which a printing plate comprises a body or backing of fibrous material impregnated short of saturation with a phenolic condensation product and having a facing layer of phenolic condensation product or of metal. The plate is moulded under heat and pressure against a matrix or mould and in the preparation of the matrix from the type form an underlay may be employed so that the moulded plate is made ready for printing. Alternatively, the plate may be "made-ready" by subjecting it to pressure with an overlay in contact with its printing surface. The

plate may also be formed with means by which it can be easily registered on the bed of the press. Fig. 1 shows one form of plate blank comprising a number of sheets *a* of fibrous material, preferably fibre board made from old newspaper stock, impregnated short of saturation with phenolic condensation product and secured together by an adhesive consisting of phenolic condensation product, wood flour, and a solvent such as amyl alcohol, mono-nitro naphthalene or penta-chlorophenol. The outer faces are coated with layers *d* of phenolic condensation product and the blank heated in a press for about one minute to harden the layers *d* into a smooth non flowing skin. The mould or matrix preferably consists of a fibrous backing impregnated with phenolic condensation product and faced with an alloy of equal parts of tin and lead. Before moulding the

plate, the face of the matrix is treated with a solution of bicarbonate of soda and is then coated with a layer of a composition consisting of phenolic condensation product, a solvent of phenol such as mono-nitro-naphthalene or penta-chlorophenol, and small quantities of stearic acid and of fillers such as lamp black, iron oxide or copper peroxide. The matrix is then heated until the layer forms a dry skin. The matrix and plate blank are then placed face to face in a heated press to mould the blank and cause the layer to adhere firmly to the plate. The heating is continued until the phenolic condensation product in the plate is hardened to infusible form and the plate is then separated from the matrix while hot. Instead of facing layers *d* of phenolic con-

densation product, metallic facings secured to the body by the adhesive described above may be employed, but in this case the matrix is used without the coating layer described above. The plate may be "made-ready" for printing before the phenolic condensation product in the body of the plate is set to infusible form, by placing the plate C, Fig. 6, in a steam heated press with an overlay 7 in contact with the printing surface 5. The non-printing hollows of the plate may afterwards be deepened by a sand blast, the printing parts being protected by a paste of bees wax and resin oil. To facilitate registration of the plate 21, Fig. 7, on the bed 20 of the printing press, the bed may have a number of sockets 42 and the plate 21 is moulded with corresponding bosses 39, Fig. 11, by means of the specially formed moulding press plate 34 and the matrix 29 is positioned in the moulding press so that the bosses are formed in a predetermined position with respect to the marginal lines of the printing characters on the plate. Screws 43 in the plate 34 may be provided to form threaded bores in the bosses 39 to receive fastening screws for holding the plate on the printing press bed. In the manufacture of curved printing plates, the plate is moulded in the flat condition with grooves 47, Fig. 14, on the back, and while still flexible is bent over a cylindrical mandrel and held thereon by a weighted cover or hood.

#### Cutting Paper.

A patent recently granted to C. R. Pasquier (Paris), relates to apparatus for cutting into sheets, strips of paper, etc., such as are fed from a papermaking machine or the printing machine described in Specification 148,832, and consists in employing change-speed gearing, comprising a single removable toothed wheel, so that the speed of the rollers may be adjusted to vary the length of sheet cut. A

driven shaft 5 carries a wheel 8 driving through a similar wheel 9 a countershaft 10 bearing the detachable wheel 11 driving through a pinion 12 a wheel 13 on the shaft 14 of the lower feed rollers 15 against which the upper rollers 16 are spring pressed. To allow different sized wheels 12 to be used, the shaft of the wheel 12 is carried in a slot 21 formed concentrically with the shaft 14 of the roller 15. The cutter 22 is mounted on a bar supported at each end by links 24 pivoted at

24° to the framing and suspended by links 25 from arms 26 secured to a shaft 27, the knife being held in the raised position by springs 29 connected to arms 30 secured to the shaft 31 on which the links 24, 25 are pivoted.

FIG. 3.

Spring pistons 34 carried by the knife supporting plate are provided to clamp the work during cutting. Downward movement of the knife is effected by a cam 7 on the driving shaft 5 engaging a roller on an extension 32 of one of the arms 26.

#### Delivering and Feeding Sheets.

Under an invention by the Maschinenfabrik Augsburg-Nurnberg Akt. Ges., a stripper for removing printed sheets from the impression

FIG. 3.

FIG. 4.

cylinder of a printing machine consists of two similar pieces of sheet metal a, b welded or otherwise firmly united face to face and formed at one end d so that they may be clamped

upon a supporting spindle. As shown, the ends *d* are spaced apart and connected by two plates or bars *f* carrying a clamping screw *e*. Another invention by the same firm refers to a gauge for guiding sheets fed to high-speed printing presses formed of three superimposed pieces of sheet metal *a*, *b*, *c*, of which the lower two are rigidly connected for a portion of their length as by means of welding, and at their other ends are capable of encircling and being clamped to a holding spindle. The upper part *c* constitutes the gauge, and is held to the plates *a*, *b* by a screw *e*, and is guided by a slot *f* and lateral guides *g* while being adjusted in position.

PAPER for school purposes is scarce in the United States, very little of this class of paper being manufactured now, while available stocks have almost disappeared. The result is expected to be a scramble for what paper is in sight, and high prices are anticipated as a consequence.

## Printers' Educational Festival.

**Prize Distribution at Stationers' Hall Evokes  
Interesting Speeches from Leaders of the Trade.**

The historic Stationers' Hall was the scene of a crowded and very interesting meeting on Friday evening, when among those on the platform were many prominent master printers, trade union officials and others holding important positions in the printing industry. The gathering had been called together in the cause of technical education, and the principal item on the programme was the distribution of prizes and certificates gained by examinees of the Saint Bride Printing School and of the newly-constituted Stationers' Company and Printing Industry Examining Board, under whose combined auspices the function was held.

Mr. W. Howard Hazell, J.P., was to have occupied the chair, but found himself prevented by business. An emergency chairman was obtained in Mr. T. W. McAra, J.P., whose genial and able presidency at such gatherings is always welcome.

### **Ginger Among the Stationers.**

After tendering Mr. Hazell's apologies, Mr. McAra referred to the unfortunate fact that some of the historic buildings of the London livery companies were practically mausoleums so far as concerned the trades they were supposed to represent. He offered the thanks of the meeting to the Master, Wardens and the Court of the Worshipful Company of Stationers for the use of their historic hall, and mentioned also that the recent examination under the Joint Examining Board had been held in the same building, when some 400 students presented themselves. This welcome progressive movement on the part of the Stationers was the outcome of the efforts of some of the younger spirits of the Company. Mr. Unwin, for one, had, during his

year of office as Master, been introducing "a little ginger"; he wished their "young friend" every success in his efforts. At the Joint Examining Board examination, seven St. Bride students had been successful in gaining the special medals and prizes given by the Worshipful Company of Stationers, and four students from St. Bride had won the City and Guilds of London Institute's medals. In conclusion Mr. McAra called attention to "that very interesting confection," "Saint Bride Students' Cake" given to contributors to the Saint Bride Students' Printers' Pension Fund. He added that contributions to this fund would go to swell the subscription list of the next Printers' Pension Festival at which Sir Wm. Waterlow was to preside.

Mr. Edward Unwin, who said the Master of the Stationers' Company would have been present had he been in London, assured the meeting of the desire of the Company to do all they could to advance the craft of printing. He was thankful to know that the plethora of students at St. Bride would in the near future be housed in a much larger and more up-to-date building than St. Bride School. He urged the desirability of students' imbibing the spirit underlying the motto of the Rotary Club—"Service, not Self."

Mr. C. W. Bowerman remarked that he never entered the historic Stationers' Hall without a strong feeling of regret at the thought that no one, when he completed his time as a City apprentice, had advised him to apply to the Stationers' Company to be admitted as a Freeman of the City of London. He commended this course to the apprentices of to-day, laying stress on the dignity of the printer's craft which had rendered magnificent service to the civilisation of the world.

### Employers and the Trade Unions.

In view of the current wages dispute, special interest attached to the appearance together on the platform of the respective leaders of employers and trade unions.

Mr. R. A. Austen-Leigh (president of the London Master Printers' Association) tendered congratulations on behalf of the L.M.P.A. Council to the Committee of the St. Bride Printing School and its "most admirable Principal, Mr. Riddell," on the excellence of the work accomplished. He emphasised the willingness of the L.M.P.A. to give their share of assistance in the building of the great new school on the south side of the river, the contribution asked for having been gladly voted. Referring to the wide range of instruction available, he drew attention to the facilities for the study of economics by master printers and raised the question of their also learning the art of negotiation—so frequently in requisition of late. Drawing attention to some of the qualities demanded of those participating in negotiations between employers and employed, he mentioned straightforwardness, courtesy, patience—and sometimes even considerable physical endurance, on account of protracted sittings. In the printing trade, he said, the representatives of each side were able to recognise these qualities as being possessed by the chief representatives of the other side.

Mr. T. E. Naylor (secretary, London Society of Compositors) said he was glad to be in a position to say that, so far as the trade unions of the printing trade were concerned, they were heart and soul with the technical education movement. They were not altogether occupied with the art of negotiation, not always considering the best way of increasing wages and reducing hours of labour. They believed there was something in the trade of printing quite above any considerations either of money or time. (Applause.) Printing was not merely a trade, or a profession, but an art that had to be cultivated, understood, appreciated and studied in order that the worthiest ends might be achieved. Technical education was a means of adding some pleasure to the humdrum life of the compositor, or machine minder, or litho worker. The more one learnt, the more pleasant one's work became.

### "Ca' Canny" Policy Condemned.

Mr. Naylor turned next to the question of increased production, remarking that there was an opinion abroad amongst a large section of the workers that to produce more was a mistake because it put men out of work. He would rather say, he declared, that every means for economising production and reducing the quantity of labour necessary was a gain not merely to the firm, and to the trade, but actually to the men engaged in the work of production. It was a mistaken policy that led to the assumption that by doing less you employed more men.

Mr. Naylor concluded with some words of encouragement to any students who might, last session, have failed to gain any reward. He advised them to "keep on keeping on,"

assuring them that the aim of the thoroughly practical instruction available was to make them master craftsmen, a proud title which could be claimed by the efficient journeyman just as rightfully as by anyone else engaged in the craft of printing.

Mr. Ernest Judd (Master Bookbinders' Association), who remarked that "a well-printed book is a thing of beauty, and a well-bound book is a joy for ever," testified to the high quality of the papers in the bookbinding examination of the Joint Examining Board. As one of the examiners, he said these papers indicated that the teachers had a thorough knowledge of all branches of bookbinding, combined with the patience of Job.

Mr. E. H. Berryman (representing the Printers' Managers and Overseers' Association in the absence of Mr. A. E. Jarvis) expressed the interest of the P.M. and O.A. in technical education. He stressed the value to the printer of general knowledge, and recommended wider use of the excellent technical library at the St. Bride Institute.

Sir William Waterlow, before beginning the formidable task of distributing the numerous certificates and prizes, commented upon Mr. Naylor's speech, saying that he had listened to it with great admiration, and adding that the student who took Mr. Naylor's words to heart need have no fear for the future. It must be obvious, said Sir William, that the more technical education we had in the printing trade the better it would be for the worker and for everybody. He went on to recall some of the past history of printing trade education and told of the arrangements for building a new central institute and of the large measure of support that had been forthcoming from the whole trade, ensuring that the scheme would be put into effect. By means of education, he said, it would be possible to renew the old craft spirit which gave a man real pleasure in the production of good work.

After the prize distribution, Rev. A. Taylor, the Vicar of St. Bride Church, expressed the thanks of the meeting to Sir Wm. Waterlow and the other speakers. His short speech, interesting and humorous, gave indication of those amiable qualities which have made Mr. Taylor highly popular with his printer parishioners. It drew from Sir Wm. Waterlow a very appreciative response, with which the meeting ended.

**WELFARE WORK EXHIBIT.**—A number of members of the Welfare Workers' Institute are serving on a section of the Industrial Committee in connection with the World Service Exhibition which is to be held from October 3rd to 16th, in St. George's Hall, Liverpool, and the assistance of the Institute as a whole has been sought. Members are therefore urged to forward to the hon. secretary of the Liverpool branch, Miss K. E. Wilkinson, Messrs. Ayrton and Saunders, Ltd., 30-44, Duke-street, Liverpool (not later than September 25th), information, forms, records, statistics, charts and other material in regard to any working schemes of welfare work.

## The Wages Position.

### Ballot Results Awaited.

As announced last week, conferences between the Federation of Master Printers on the one hand, and the Printing and Kindred Trades' Federation and the Typographical Association on the other, resulted in agreement being reached that the notices posted by the employers intimating that a reduction in wages would take place in the week ending September 24th should be suspended, in order that a fresh ballot could be taken by the unions, the executives of the unions undertaking to recommend the acceptance of a reduction in wages of all their members of 5s. per week on the pay-day in the week ending October 1st, and a further reduction of 2s. 6d. per week on the pay-day in the week ending January 7th, 1922, with corresponding reductions in the wages of learners and piece-workers. The representatives of the unions also gave an undertaking that the ballot would be immediately taken and the result communicated to 24, Holborn, not later than the 27th inst. It was also agreed that the usual conditions as to short time and over-time should throughout this period be resumed.

Negotiations have had to be continued in the case of the London Society of Compositors, in respect of whom the position is increased in difficulty by the fact that there are in operation elaborate piece scales which are affected by any adjustment of the time rates. The Electrotypers and Stereotypers also have prolonged their negotiations with the employers.

The notices, it will be observed, have been suspended, not withdrawn, and presumably must come automatically into effect after the pay-day in the week ending October 1st, in the event of the employers' offer not being accepted.

The balloting of the unions is now being proceeded with, and results are awaited with much interest. Views on the present position will be found on our "Current Topics" pages.

**BOOKS NOT "DUMPED" IN U.S.**—Under date of August 6th, the Assistant Secretary of the United States Treasury issued instructions that his investigations have shown that books are not competitive in the sense intended by the provisions of the Anti-Dumping Law and therefore that appraisers need not treat book importations differently from the method employed under the old tariff. This opinion was given after the National Association of Book Publishers had taken the matter up with the Secretary of the Treasury. The publishers still suffer under the unfortunate rulings made under the present tariff law, which makes duties payable on two-thirds of the English list price rather than on the price paid for the goods.

## Envelope-Making & Manufacturing STATIONERY.

### New Wages Agreement.

Negotiations have been proceeding for some time past between the Employers' Federation of Envelope Makers and Manufacturing Stationers and the National Union of Printing, Bookbinding, Machine Ruling and Paper Workers with regard to the amendment of the schedule of wages originally issued by the Interim Industrial Reconstruction Committee in the industry. As the Federation and the Union had not arrived at a mutually satisfactory agreement in the matter, a meeting of the Interim Industrial Reconstruction Committee took place on September 15th, when after very careful examination of the condition of the industry, the following resolution was unanimously accepted: "That the reductions in the rates of wage made in accordance with the notices posted in the factories be incorporated in the schedule of wages appropriate to the industry, and that this committee recommends that the third reduction, of which notice had been given for September 24th, 1921, shall be deferred until January 14th, 1922, and that a further meeting of this committee shall take place on January 4th, 1922." It was arranged that the general secretary of the Interim Industrial Reconstruction Committee should revise the schedule.

The arrangement thus made is another tribute to the Whitley organisation, which, if it is allowed to operate, can ensure peace and harmony in industry. In this particular industry both sides have met under the auspices of the Interim Committee and have arranged matters with regard to wages on an amicable basis, a reasonable attitude having been adopted by all parties. It is particularly necessary, in view of the depression through which the trade is still passing, that everything possible should be done to keep the wheels of industry moving. Envelope-making and the manufacture of stationery have suffered like other industries, and it needs the united efforts of both sides, employers and employees alike, to bring back an era of activity.

**N.Y. PRINTING TRADE WAGES.**—Although New York printing houses have escaped a struggle on the 44 hours' demand, the employers having kept to their promise to yield the shorter week, a new threat of trouble confronts the trade. Printing trade workers of New York demand that, when present agreements come to an end on October 1st, a five-dollar increase be given. As this demand follows a shortened work, and reduced costs of living, there will doubtless be vigorous resistance on the part of the employers—especially as publishers in New York, as in London, threaten to withhold orders unless printers' charges are reduced.

### THE NATIONAL Association of Wholesale Stationers AND PAPER MERCHANTS.

#### National Council Meeting.

The twentieth meeting of the National Council took place at the Council Chamber, 11, King's Bench-walk, Temple, London, E.C.4, on Thursday, September 8th, when a number of matters affecting members of the Association were under discussion.

Various schemes for insurance against fire, under the Workmen's Compensation Acts, and against employers' liability generally, whereby a considerable saving in premiums would accrue to members, had been examined by the sub-committee set up at the previous meeting, and their report was now laid before the Council, the general secretary (Mr. R. G. Harvey Greenham) being instructed to communicate with the individual members on the matter.

It will be remembered that at the previous Council meeting the negotiations with the shipping companies as to the adoption of ton weight rates had been reported upon, and the Council was now informed that although the Calcutta Conference saw certain difficulties in adopting the principles now proposed, at the same time they had made a considerable reduction in their rates. The matter was fully discussed and the sub-committee was requested to continue negotiations.

A letter from the Ministry of Labour was read requesting all members to furnish the managers of local employment exchanges with any vacancies which might occur.

The attention of members was called to the British Industries Fair to be held in London in February and March, 1922, and also to the Commercial and Industrial Exhibition to be held in Brazil in 1922, information in connection with both of which could be obtained from the general secretary.

#### Paper Standardisation.

The question of standardisation which has been of late very prominent in the trade press was again carefully considered by the National Council and it was reported that Mr. Howard Hazell intended shortly to get in touch with the Association on the matter. A special committee was formed to go into the matter with him when the occasion arises.

The Council had before them a report of the present position as regards wages.

The National Wrapping Paper Section and the National Printings and Printings Section had held meetings on the same day, and it was arranged that the next meetings of the National Council and of these national sections should take place on October 13th.

A SERIES of practical articles on factory organisation and kindred subjects is now appearing in the *Journal of Industrial Welfare*, under the heading of "Health in the Workshop." Some matters of great practical importance are discussed.

### Trade Union Matters.

MR. W. ARDERN, secretary of the Hyde Branch of the Typographical Association, retires from the position after 20 years' service.

At the forthcoming annual delegate meeting of the National Society of Operative Printers and Assistants, Mr. G. A. Isaacs, general secretary, will debate the financial position of the society with Mr. L. Smith, of the *Daily Mirror*.

MR. G. W. TATHAM having been appointed to a position in Liverpool by the National Union of Printing, Bookbinding and Paper Workers, has resigned his seat on the committee of the North-Western Group of the "T.A." Mr. J. A. Pilling will fill the vacancy. As a mark of appreciation of Mr. Tatham's services the committee presented him with a pipe and case, bearing testimony to the good work Mr. Tatham had rendered in the cause of trade unionism.

THE Trade Boards, which have served important purposes in the regulation of minimum rates of wages, etc., in various trades, including those of paper bag making and box making, are to be overhauled. Trade union circles view with much apprehension the setting up of Dr. Macnamara's committee of investigation.

MANY trade unions have difficulty in getting back from the Ministry of Labour the money which, under the Unemployment Insurance Act, they have expended in the payment of benefits. The Typographical Association, however, reports a different experience, the reimbursement in their case having generally been prompt. The suggestion is made that this reimbursement is facilitated if branch secretaries of Trade Unions make their claims without delay, signing the necessary certificate V.I.A. 75.

THE Ministry of Labour has issued a defence of its cost-of-living figures against the criticisms made by the Joint Committee appointed by the Trades Union Congress, the Labour Party and the Co-operative movement. It is in the form of a long article in the current *Labour Gazette*, detailed objection being taken to some of the data on which the Labour index figure is calculated, and the allegation being made that as regards the supposed under-statement of the increases in the prices of certain items of expenditure, miscalculations by the committee are responsible for the differences revealed. It should be noted however, that the Joint Committee, in its report, advocated the adoption of a new basis on which to calculate the cost of living, and the Ministry of Labour views this suggestion with favour.

## In the Newspaper Realm.

A FIRE broke out on the premises of the old-established *Reading Observer* on Saturday night, and much damage was done.

THE latest journalistic amalgamation is that of the *Music Student* and *Musician*. The resulting joint magazine, priced at 1s., will be issued by the *Music Student*, Montague House, Russell-square, W.C.1.

THE history of the *Manchester Guardian*, which recently celebrated its centenary, is told by Mr. W. Haslam Mills in a book announced by Chatto and Windus.

THE *Saturday Review*, as reorganised, is under the editorial control of Mr. Filson Young, and among regular contributors will be Mr. Sydney Brooks and Mr. Hartley Withers, editor of the *Economist*.

A NEW monthly journal entitled *Russian Information and Review* is to appear next month, being issued by the Trade Delegation to Russia.

MR. C. H. HANSON, of 68, Osency-crescent, N.W., for many years a member of the editorial staff of *The Times*, and for some years on the editorial staffs of the *Edinburgh Review* and the *Scotsman*, and afterwards editor of the *Scottish Leader*, left £1,383. He was the son of the late Mr. James Hanson, for many years chairman of the Bradford School Board and founder and proprietor of the *Bradford Examiner*.

TO APPEAR shortly is the *Post Annual*, a new illustrated magazine under the management of Mr. Geo. Middleton, editor of *The Post*, the organ of the Union of Post Office Workers. Mr. Middleton is Labour Parliamentary candidate for Carlisle.

"DARWEN GAZETTE."—The jobbing machinery, and plant, and copyright of the *Darwen Gazette* were offered for sale by auction on Tuesday of last week. The opening lot consisted of the copyright of the newspaper, the *Darwen Gazette*, and the goodwill of the jobbing printing business. For these only £1 was offered, and the lot was withdrawn, the auctioneer pointing out that it would cost that to interview the solicitor, let alone the cost of the necessary deeds. The plant was sold piecemeal.

PRESERVING NEWSPAPERS.—The last issue of the New York *Public Library Bulletin* tells of the experiments made in 1914 to determine the best method of preserving the modern newspaper. In the end it was decided that the best method for both old and new stock was to cover both sides of the sheet with thin transparent Japanese tissue paper using a rice paste for this purpose. The treatment increases the strength of the sheet, cuts off the air from the paper, and reduces the legibility but slightly.

THE Berlin Communist daily paper, *Die Rote Fahne*, having had its publication

stopped by the police, the journal is appearing under a different title, which is changed every day.

LATEST statistics of the U.S. Bureau of Census show that more than eleven and a quarter billion copies of daily newspapers are printed annually in the United States, averaging one copy a day for every three and one-fifth persons of the country's total population.

THE story of the building up of a great American newspaper, one which has been said to have "probably the largest income of any newspaper in the world," is told in the "History of the *New York Times*, 1851-1921," published in commemoration of the twenty-fifth anniversary of Mr. Adolph S. Ochs's association with the paper as publisher.

WHY NEWSPAPERS DIE.—Investigating the cause of the high mortality among newspapers in the United States and Canada, an editor over the other side has figured out the position thus: In 1907 wages were at 100. In 1914 they had advanced to 178, and in 1921 the figure was 393. News-print from 100 jumped to 177 in 1914, and to 623 in 1921. Newspaper postage, which cost the normal of 100 in 1907, was 147 in 1914, and 337 in 1921. Ink was 100 in 1907; 200 in 1914, and to-day stands at 331. Editorial expense advanced from 100 in 1907 to 120 in 1914, and 241 in 1921. Miscellaneous expenses went from 100 in 1907 to 125 in 1914, and to 244 in 1921. By taking the average of all newspaper costs, it was found that while the average or index number of 1907 was 100, in 1914 it was 159, and in 1921 it reached the high mark of 411. More than 4,000 newspaper publications have thus gone out of existence in the United States and a corresponding number of them in Canada.

## Stole 53 Tons of Metal.

### Stereotyper Gets Fourteen Months.

At the Old Bailey on Wednesday of last week. William Pember (stereotyper), Charles Hill (carman) and Henry Caleb Peek (metal merchant), pleaded guilty to charges relating to the stealing of stereotype metal, the property of Dalziel's Foundry, Ltd.

Mr. Cecil Whiteley, K.C., stated that some 53 tons of stereotype metal, valued at about £3,000, had been stolen.

Pember was employed by the prosecutors. It was alleged that he stole ingots of metal, which were taken to the premises of Peek by Hill.

The Common Serjeant sentenced Pember to fourteen months' hard labour, Peek to six months in the second division, and Hill was bound over in his own recognisances to come up for judgment if called upon on the charge.

AN Advertisement is always working.

## Printers Visit Isle of Wight.

### Home Counties Alliance Outing.

The Home Counties Alliance of the Federation of Master Printers is, as we recently announced, holding a series of very attractive outings for its members. The first of these took place on Saturday, when, by invitation of the Isle of Wight Master Printers' Association, Home Counties printers visited the Isle of Wight. There was a considerable gathering of representatives and their wives from the adjoining counties. The day's programme commenced with a business meeting in the Council Chamber at the Guildhall, Newport, by kind permission of the Mayor, Mr. E. Munden, J.P., a cordial welcome being extended to Mr. D. Greenhill, President of the Alliance. The ladies of the party meanwhile visited Carisbrook Castle and toured the town, and at one o'clock there was a general assembly at the Unity Hall, St. Thomas's-square, where a very attractively-arranged luncheon was enjoyed. Mr. Greenhill presided, and amongst those present were his Worship the Mayor and the Mayoress, Mr. A. E. Goodwin, secretary of the Federation of Master Printers, Mr. P. D. Michael, secretary of the Home Counties Alliance, Mr. W. Blake, president of the Isle of Wight Association, Mr. G. A. Brannon, past president, Mr. F. H. W. Yelf, hon. treasurer, and the committee to whom the arrangements had been entrusted. Char-a-bancs awaited the party in the Square, and at two o'clock, despite the pouring rain, a start was made for Blackgang, where the Chine was visited, followed by a delightful walk through the Undercliffe, Ventnor, the rain by this time having ceased. At Shanklin tea was provided at the Rylston Gardens, and the beautiful Chine visited, after which the party separated, those travelling via Portsmouth being conveyed to Ryde by char-a-bancs, and the remainder for Southampton to Cowes. Despite the elements, which for a portion of the afternoon threatened to spoil the excursion, the proceedings of the day were a pronounced success. The beauties of the island, unfolded in the motor tour of about 45 miles, were greatly enjoyed, and very hearty thanks were accorded to the Isle of Wight Association for its unbounded hospitality and perfect arrangements, which contributed so largely to the success and harmony of the gathering.

Similar meetings and excursions are being arranged in other parts of the Home Counties.

WHAT is expected to be the largest printing plant in America is to be set up in Chicago by the Cuneo Hunneberry Co.

A REMARKABLE product of the printer's art is the latest edition of the Bible Society's booklet, "The Gospel in Many Tongues." Biblical selections in no less than 543 languages are included.

## London Printers Amalgamate.

We are officially informed that the well-known firms of Blades, East and Blades, of Abchurch-lane, E.C., and Finsbury, and W. W. Sprague and Co., of Bread-street-hill, E.C., have arranged a fusion of interests as from October 1st next and the two businesses will be converted into private limited companies under the titles of Blades, East and Blades, Ltd., and W. W. Sprague and Co., Ltd. The firms, although united, will thus retain the titles under which they have established their respective reputations, and both concerns will be conducted upon the same lines as hitherto, but with the advantage of being able to give better service and also to place greater resources at the disposal of their connections.

The new companies will be under the management of all the present partners of the two firms. The directors will be: Sir G. Rowland Blades, M.P. (chairman), Alfred F. Blades and A. J. B. Hubbard (joint deputy-chairmen), E. Sprague Oram and Laurence H. Blades.

There will be no issue of shares to the public.

Both firms have been established in the City of London for upwards of a century and carry on business as bank note engravers, security cheque printers, export stationers, etc. The fusion of two such important houses must materially strengthen their position and cannot fail to be conducive to their continued prosperity under united management.

## Openings for British Trade, etc.

Inquiries have been received by the Department of Overseas Trade (Development and Intelligence), 35, Old Queen-street, London, S.W.1, to whom further inquiries should be addressed with the reference number quoted.

### UNITED KINGDOM.

An application has been recorded at the Department of Overseas Trade, 35, Old Queen-street, S.W.1, for the name of manufacturers of the following (among other) articles:—Washable slate material, made of cardboard, as used in diaries, etc. British manufacturers of this material now in a position to supply are invited to make application for the name of the inquirer at the Department, where a sample may be inspected. (Reference No. D.O.T./755/T.M.Z.)

### SOUTH AFRICA.

A Cape Town manufacturers' representative, who is at present in this country, desires to obtain additional agencies for fancy goods, paper bags, stationery, etc. (Reference No. 186.)

# Trade Notes.

THE "Renown," on which H.R.H. the Prince of Wales is to sail for India, is equipped with a special printing office.

"FLEET WOOD," at Burnham Beeches, which Lord Burnham has given to the Corporation in memory of his father, will be dedicated on Monday, October 10th.

WARRILLOWS' NEW ISSUE.—It is announced that the issue of 50,000 new shares in Warrillows was largely over-applied for by that company's shareholders.

AMONG the week's partnerships dissolved is that between Arthur James Cullen and James John Lane, printers' suppliers, 121, Cathall-road, Leytonstone, Essex.

THE late Capt. William Edward Rolston (2/5 The Buffs), of Cambridge, founder and editor of the *Cologne Post*, the English newspaper published for the British Army on the Rhine, left £441.

INSTRUCTION at the Northampton Polytechnic Institute, St. John-street, E.C., covers the subjects of electrotyping, stereotyping and metallurgy, as well as general engineering and other branches of technology.

TWO ARTICLES by Sir Charles Marara, Bart., on "The Industrial Crisis and the Remedy," which appeared in the *Nineteenth Century and After* (July and September), have been reprinted as a booklet, published by Constable and Co.

THE Lancashire and Cheshire Master Printers' Alliance has arranged a big week-end rally at the Savoy Hydro, North Shore, Blackpool, from October 7th to 10th, and it is expected that Mr. J. MacLehose, M.A., LL.D., president of the masters' Federation, will attend.

MESSRS. WIGHTMAN AND Co., in addition to their Regency-street premises, now used for the ruling, account book, and binding sections of their work, have started a second factory known as Dugdale Works, Dugdale-street, Kennington, S.E.5, where they specialise in high-class printing.

A LITHOGRAPHIC artist named Morecroft was the victim of an attack alleged to have been committed in the darkness near Bristol Cathedral by a man armed with a knife or dagger. Albert Pritchard, 26, and his wife were, at Bristol on Friday, committed for trial on charges of attempted murder, unlawfully wounding, and demanding money by threats.

MESSRS. R. ROBINSON AND Co., LTD., the well-known Newcastle firm of manufacturing stationers, printers and bookbinders, have issued a centenary souvenir to celebrate the completion, in 1918, of "One Hundred Years of Progress and Development." It takes the form of a handsome brochure outlining the firm's history and containing a profusion of excellent illustrations showing the past and present premises and personnel of this progressive business house.

THE 113 tons of census papers are to be stored instead of destroyed.

A LARGE collection of Hogarth prints collected by the late Mr. Austin Dobson, of Ealing, has been presented to the London Library.

A PRINTER in Cape Town recently received the following inquiry: "Please quote for printing and binding one copy of a book written in ink." We have no record of what the costing expert said when he read this request!

CHARLES MORGAN AND Co., LTD., are sending out samples of their "September bargains" which deserve attention. Various papers and envelopes are included, which it is desired to clear in order to make room for new qualities now being manufactured.

THE New York Employing Printers' Association wishes not only to capture new recruits, but also to retain the enthusiasm of existing members. Accordingly it is announced that fifty two-man teams will be appointed to visit each member and bring the services of the Association to his attention.

MR. JOHN FREDERICK MOFFATT, of George-street, Edinburgh, and of Alyth and Lasswade, chartered accountant, a director of The Alliance Assurance Co., Ltd., and of the Carron Grove Paper Co., Ltd., who died on March 9th last, left personal estate in the United Kingdom valued at £169,961.

PRINTERS PICKET CHURCHES.—Standing outside the doors of the Methodist churches of Toronto on a Sunday morning and evening in August last, striking printers distributed among the members of the various congregations ten thousand circulars entitled, "Is It Nothing To You?" The distribution of the circulars was part of a concerted effort on the part of the striking printers to induce the Methodist Book Room and the book steward, the Rev. Dr. S. W. Fallis, to abandon their opposition to the 44-hour week.

At a well-attended meeting of the Electrotypers and Stereotypers Managers and Overseers' Association on Tuesday, the main part of the proceedings was of a private character. Messrs. W. C. Warren and G. Maidment, general secretary and London chairman respectively of the National Society of Electrotypers and Stereotypers, made a clear and able statement of the history and present position of the wages dispute as concerned their own section of the trade. They received the very cordial thanks of those present.

THE PRESS IN INDIA.—In the Indian Legislative assembly last Thursday, Sir William Vincent, the home member, introduced a Bill to give effect to the recommendations of the committee appointed some months ago, in pursuance of a resolution of the Assembly, to consider the working of the Press Act. This committee, in its report, recommended the repeal of the Press Acts of 1908 and 1910, though advising the retention of the power to confiscate openly seditious literature and the subjection of editors to the same liabilities as printers and publishers.

**FORTY-THIRD YEAR.**

*Printed and Published EVERY THURSDAY*  
by **STONHILL & GILLIS,**  
at 58, Shoe Lane, London, E.C.4.  
Tel.: Stonhill, Fleet, London. Phone: 8407 City.

**SUBSCRIPTION:** Per Annum, 8s. 8d. (POSTAGE EXTRA).

**Charges for Trade Advertisements:**

(Full page 8 by 5½ ins.)

Whole Page ...	£4 10 0

Quarter Page ...	1 10 0	One inch in Column	9 0		

An Extra Charge for Cover and Special Positions.  
Discounts according to Number of Insertions.

Representatives throughout the United Kingdom and also in Australia, India, South Africa, United States Canada, etc.

All communications for the "BRITISH AND COLONIAL PRINTER AND STATIONER" should be addressed and Cheques and Post Office Orders made payable to—**STONHILL & GILLIS, 58, SHOE-LANE, LONDON, E.C.4**

COPIES may be purchased at the Offices, as above or from Messrs. W. H. Everett and Son, Ltd., news-agents, 11, St. Bride-street, E.C.4.

THURSDAY, SEPTEMBER 22, 1921.

## Current Topics.

### The Wage-Reduction Movement.

BALLOTS on the latest proposals of wage-reduction in the printing and allied trades are now proceeding, as reported in detail on another page. The accepting of a cut in wages is, of course, never a matter for jubilation, and it was only to be expected that much opposition would arise when the time came for experiencing the downward arc of the high-costs curve. And, since the raising of the printer's status, if effected on a basis economically sound, must ultimately redound to the good of the whole industry, this opposition was a healthy sign, and not to be deplored. Status, however, is inseparably bound up with the factors of the cost of production and the demand for the printer's product. Wages can be raised without detriment to the industry only within certain definite limits, these limits being enforced by the natural processes of economics, whereby the over-enhancement of

costs is inevitably followed by a consequent drop in public demand; a healthy industry cannot be maintained if demand be allowed to drop below the necessary minimum. The employers' claim is that this minimum has been overpassed. In this they are supported by users of printing who express themselves both by verbal protest and by the withholding of orders. Moreover, the claim finds further support in the large body of unemployment in the trade, and in the general cost-cutting movement in other industries. And now the last-ditchers among our trade unionists are faced with the fact that an impressive volume of trade union opinion in the industry has expressed itself in favour of the case for reduction. A large number of workers have actually accepted reduced wages, and almost all the trade union leaders at last advise the adoption of this course. Some reduction of wages is now inevitable.

• • •

### The Position in London.

THE Typographical Association having recommended acceptance of the employers' revised proposals, the spot-light seems now to centre on London. It looks as though the ultimate difficulty may perhaps be found in the question of whether or not certain London workers shall be given preferential treatment. The flat rate system does not seem to us to be based on reason, and we have already put forward considerations in favour of some broad differentiation between different classes of workers on the basis of skill and training. But to make differentiation merely in favour of London workers as against similar workers in the provinces is a course that must give rise to very formidable objections. It must lead to still further aggravation of the disadvantages already suffered by London printers in respect of country competition. May it not be that if London trade unions succeeded in this direction they would be bringing about the compulsory exit of some of their own members out of London into the provinces? Book printing has already been largely driven from London into the country; the more leisurely orders in lithographic work have, we believe, gone in the same direction; periodical printing, also, seems increasingly inclined to follow suit; Stationery Office work, too, is steadily leaving us, and the establishment of a large distributing centre in Manchester seems likely to make it harder than ever for the London printing contractor to bid successfully. This aspect of the wages question is worthy of serious consideration, and we commend it to those who tend to favour the creation of still

further disparity between London and country printers' wages bills.

### Proof-Readers and Carbonic Acid.

THE comprehensive discussions of the British Association have not allowed even the humble printer's reader to escape notice. A not very complimentary light was thrown upon his efforts last week by Professor Waller who claimed that expenditure of energy bore direct relation to the amount of carbonic acid discharged. He added that at Printing House-square he had found that the output of carbonic acid in the *Times* proof-readers' room during  $7\frac{1}{2}$  continuous hours of night-work was hardly in excess of the output of the same men while at rest. However, before concluding that the readers' exertions were practically *nil*, we think the learned professor might satisfy us of the accuracy of his assumption that  $H_2CO_3$  bears the same relation to *mind* as it does to *muscle*.

### Paper Standardisation.

THE attention which has been drawn recently to the question of standardisation of paper is having some result, and negotiations between the printers on the one hand and the wholesale stationers on the other are likely to be resumed, it is to be hoped, with a more definite conclusion than arose from the previous conferences. Mr. Howard Hazell, it will be remembered, on the occasion of the World's Printing Congress in London, cast the blame for past failure upon the wholesale stationers and the papermakers, his scheme having, he said, been sent from committee to committee and finally shelved. Evidently the National Association of Wholesale Stationers and Paper Merchants are anxious to clear themselves of this reproach, and at the recent meeting of the National Council they appointed a special committee to go into the question of standardisation with Mr. Hazell. The attitude adopted by the papermakers all along has been that it is for the paper users to instruct them as to their requirements and the manufacturers will endeavour to fulfil them. In the meantime Mr. Hazell is probably pretty well occupied with the wages problem in the printing industry, though he can generally find time to do any piece of work the interests of the trade demand of him. It should not be long, therefore, before the parties are again in negotiation, and perhaps this time some practical scheme based upon Mr. Hazell's proposals may be found acceptable.

## Personal.

A COMPLIMENTARY dinner was given at the Hotel Victoria on Thursday evening to Sir James Campbell Percy, joint managing director of Mecedry, Percy, and Co., Ltd., proprietors of the *Motor News* and *Irish Cyclist and Motor Cyclist*. During the evening Sir James Percy was presented with a silver salver, and a suitable present for Lady Percy.

MR. J. CROWLE-SMITH, of Hazell, Watson, and Viney, Ltd., was one of the speakers at Friday's meeting of the Ecumenical Methodist Conference, when discussion centred on the position of the churches in relation to modern industrial problems.

ON October 4th, 1871, Mr. and Mrs. Wesley Petty, of Far Headingley, Leeds, were married by the Rev. Canon Temple at St. John the Evangelist's, Briggate, Leeds. Out of their family of eight sons and four daughters (three passed away in infancy) there are now 21 grandchildren and two great-grandchildren. Their five sons during recent years have greatly developed Whitehall Printeries.

MR. PETTY, born in 1847, was apprenticed to Webb, Millington and Co., printers, of Otley. He is chairman of Petty and Sons (Leeds), Ltd., and past-president of the Leeds and Yorkshire Master Printers' Association.

THE Printer-Mayor of Southwark (Mr. George A. Isaacs) recently approached the authorities of Southwark Cathedral, and offered to raise a body of voluntary window cleaners to clean the windows of the church, which have not been touched for twenty-five years. The dangers were pointed out, and the Mayor realised that it would be unwise for any but professional cleaners to attempt the work. Mr. Isaacs therefore determined to raise £100 in order that the work might be done before the winter. He has received £40 from local business men.

MR. PERCY BARRINGER (John Walker and Co., Ltd.), president, and Mr. Clifton Tollit (Tollit and Harvey, Ltd.), vice-president of the Stationers' Association of the United Kingdom, are sailing for America on the "Adriatic," to represent British stationers at the forthcoming conference of the National Association of Stationers of the United States at Atlantic City in October.

THE names of Mr. Frank L. Polk, under secretary of State during the Wilson administration, and Mr. Victor Lawson, newspaper publisher and owner, are mentioned in connection with the American Pulp Wood Commission to Canada.

## DIVIDENDS AND REPORTS.

ST. NEOT'S PAPER MILL CO., LTD.—The directors have issued the following notice to shareholders in connection with the second interim dividend of 2½ per cent.:—"Owing to the fact that in the case of the above company the year ending April 30th. 1921, is the last of the seven years fixed by the Government for adjusting Excess Profits Duty, and two or three important questions in connection therewith remain unsettled, the directors deem it desirable to postpone the issue of their annual report and accounts until these questions have been disposed of, but have decided to pay a second interim dividend of 2½ per cent. (free of tax), and enclose warrant therefor on amount of your holding."

## NEW COMPANIES.

TRADE STUDIO, LTD.—Capital £2,500, in £1 shares; to take over the business of artists and designers, process workers, photographers, block makers, and die sinkers, carried on by W. C. Perkins and W. Shillabeer at 75 and 179, Queen Victoria-street, E.C. Private company. Permanent governing directors: W. C. Perkins and W. Shillabeer.

DAWSON, PAYNE AND LOCKETT, LTD.—Capital £40,000; to take over the businesses

of printers' engineers carried on in London by Dawson, Payne and Elliott, Ltd., as "Payne and Sons (Otley), Ltd.," and "Hopkinson and Cope," and "William Dewsnap and Co.," and by W. H. Lockett and A. W. Lockett as "W. H. Lockett and Co.," and to adopt an agreement with Dawson, Payne and Elliott, Ltd., and W. H. Lockett and Co. Subscribers: Dawson, Payne and Elliott, Ltd., W. H. Lockett, and A. W. Lockett. Private company. First directors: W. Payne and E. Stott (Dawson directors) and W. H. Lockett and A. W. Lockett (Lockett directors). In case at any time prior to August 1st, 1935, any of the "Dawson" and "Lockett" directors cease to hold office, the holders of shares No. 1-17,500 may appoint a successor to the "Dawson" directors, and holders of shares Nos. 17,501-35,000 may appoint a successor to the "Lockett" directors.

JAMES M. HAY AND SONS, LTD.—Capital £10,000; papermakers, manufacturing stationers, wholesale, retail, and export stationers, printers, lithographers, etc. Subscribers: James M. Hay and James M. Hay, jun. Private company. First directors: J. M. Hay and J. M. Hay, jun. Registered office: 38, Sauchiehall-street, Glasgow.

SHEDDEN BROTHERS, LTD.—Capital £10,000; wholesale paper merchants, bookbinders, furnishers, stationers, printers, lithographers, boxmakers, etc. Private company. First directors: Thomas W. Shedden, Thomas L. Shedden, E. R. Shedden, and W. St. J. Shedden. Registered office: 176, Ingram-street, Glasgow.

F. HILL SELLAR, LTD.—Capital £500; to adopt an agreement with F. H. Sellar and H. J. Dormer and to carry on the business of printers, stationers and general office suppliers, etc. Private company. First directors: F. H. Sellar and H. J. Dormer.

CINEMA ART, LTD.—Capital £750; makers of and dealers in artistic photographs for the use of or re-sale by kinemas, printers, publishers, stationers, booksellers, lithographers, stereotypers, photographers, engravers, die-sinkers, etc., and to adopt an agreement with Ralph Aaron Solomon. Private company. Subscribers: Ralph Aaron Solomon and Stanley A. Jarrett. First directors: Ralph Aaron Solomon, David Albert Abrahams and Alfred Edward Bundy. Registered office: 25, Shaftesbury-avenue, W.1.

EXPORT SAMPLING SERVICE, LTD.—Capital £1,000; exporters and dispatchers of samples

of British goods to buyers and others in all parts of the world, also advertising agents and contractors, printers, engravers, publishers, book and print sellers, art journalists, etc. Private company. First directors: G. F. Storey and P. F. Jackson. Registered office: 15, Piccadilly, Manchester.

**BOOKBINDERS' MUTUAL ASSURANCE CO., LTD.**—Registered September 13th as a company limited by guarantee. Objects: to indemnify employers of labour against the payment of any claims in respect of accident or disease causing or alleged to have caused personal injury or death to any person in their employ. First directors: A. S. Colley, E. B. Judd, D. Leighton, P. H. Whiting and E. J. W. Zaehnsdorf. Registered office: 24, Basinghall-street, E.C.

**H. J. B. CRAVEN, LTD.**—Capital £1,000; to acquire the business of publicity specialists, general advertising, printing and stationery contractors, commission agents, etc., carried on at 43, Great Portland-street, Marylebone, W. Private company. First directors: H. J. B. Craven and Capt. A. Illingworth. Registered office: 43, Great Portland-street, W.

**MOTOR TECHNICAL RECORDS, LTD.**—Capital £3,150; to carry on and publish a card index of technical records of pleasure and commercial motor and motor cycles, and to carry on the business of motor and general printers, publishers, advertising agents, etc. Private company. First directors: J. Brown and M. Bergl. Registered office: Sheffield House, 158-162, Oxford-street, W.

## COMPANY MORTGAGES AND CHARGES.

Fresh Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 1918, and Satisfactions registered pursuant to Section 97 of the same Act. (The registration of Satisfactions is not compulsory).

**NATIONAL PAPER AND PULP CO. (1920), LTD.**—Satisfaction to the extent of £4,250 on March 7th, 1921, of debentures, dated January 10th, 1921, securing £200,000.

**CORNWALL PRESS, LTD.**—Land registry charge on 27-31, Stamford-street, S.E., dated August 30th, 1921, to secure £8,500. Holder: Rt. Hon. Lord Riddell, 8, Bouverie-street, E.C.

**ELLAMS DUPLICATOR CO., LTD.**—Satisfaction to the extent of £5,775 on August 31st, 1921, of debentures, dated October 16th, 1919, securing £15,750.

**NORTH-WESTERN NEWSPAPER CO., LTD.**—Satisfaction in full on August 22nd, 1921, of mortgage or charge and supplementary deed, dated October 28th, 1910, and November 21st, 1917, respectively, securing £10,000.

**GROSVENOR PRESS, LTD.**—Particulars of £1,000 3rd debentures, authorised September 6th, 1921; whole amount issued; charged on the company's undertaking and property, present and future, including uncalled capital (subject to prior 1st and 2nd debentures).

**WILLIAM BRENDON AND SON, LTD.** (news-paper proprietors, etc., Plymouth).—Mortgage dated August 20th, 1921, to secure £700

charged on 6, Hillsborough, Plymouth. Holders: W. F. Harvey, 10, Oxford Terrace, Edinburgh; and others.

**LONDON AND CONTINENTAL MUSIC PUBLISHING CO., LTD.**—Particulars of £1,000 debentures authorised August 26th, 1921, whole amount issued; charged on company's property, present and future, including uncalled capital.

**LAWRENCE BROS. (WESTON-SUPER-MARE), LTD.** (printers).—Mortgage dated August 17th, 1921, to secure £1,200, charged on 67, Orchard-street, Weston-super-Mare. Holder: W. H. Tucker, "Normanton Villa," 18, Stackpool-road, Southville, Bristol.

**JACKSON, HARTLEY AND JACKSON, LTD.** (paper manufacturers, etc., London).—Issue on August 16th, 1921, of £2,000 debentures, part of a series.

## Boxmaker's Affairs.

**Re John Bannister and Co. (George Newton Osborne.)**

A sitting for the public examination of this debtor (boxmakers and printers, 96, Laburnham-road, Kingsland-road, N.), was appointed to be held on Sept. 13, at the London Bankruptcy Court. The receiving order was made on the petition of Barclay's Bank, Ltd. At the first meeting of creditors held in July last the debtor's liabilities were estimated at £20,000, and the assets at £12,900, apart from a claim of £14,000 against an insurance company in respect of a fire which occurred at his business premises.

When the case was called Mr. W. P. Bowyer, Senior Official Receiver, said that the debtor had not yet lodged a statement of his affairs, and a letter had been received from his solicitors giving as a reason for the delay the debtor's serious indisposition. "No doctor's certificate is forthcoming," added the Official Receiver, "and I cannot regard this as a satisfactory explanation."

The debtor, who was in court, went into the witness-box and, in answer to the Registrar, said that he was suffering from diabetes and heart trouble and was under the care of a specialist. The statement of affairs was being prepared by a firm of accountants and would shortly be completed.

Mr. Tindale Davis, for the trustee in the bankruptcy, suggested that the reason for the delay was that the debtor had been attending to another printing business which he had purchased for his son.

The debtor denied this allegation. He said that the business in question was bought by his wife for his son. He had only been to the business two or three times in the last month.

The Registrar: Your first business is to attend to this bankruptcy and to help your creditors, and you must give your attention to this statement of affairs at once.

The examination was adjourned to October 20th with an order for the statement of affairs within 14 days.

## The Salon Exhibition.

The exhibition of the London Salon of Photography, which is now open at the galleries of the Royal Society of Painters in Water Colours, 5a, Pall-mall East, S.W., contains a remarkably fine collection of pictorial work produced by the aid of the camera. British workers are, naturally, well represented, and pictures have also been contributed from many overseas countries, including Italy, Egypt, Australia, Sweden, Holland, Belgium, France, and the United States. From the last-named country there are a considerable number of exhibits, a good proportion emanating from workers in San Francisco and Los Angeles. Some of the American work, while it may be called original in selection of subject, does not appeal to the average pictorial sense; a bit of a lattice bridge girder, or the columns of a gasometer possess but little artistic value to the ordinary individual. "The Boulogne Boat," by F. J. Mortimer, is a fine piece of work, and shows what can be done by judicious selection, while "Tarring the Boat," by Mrs. Ambrose Ralli, a gum print, is an excellent example of what can be done in the way of picture making by the camera. Many fine portraits have been contributed, and the landscape work shown is above the average. As a fair representative collection of modern photographs, the exhibition is worth inspecting, as all schools, from the fuzzytype to the critically sharp, are represented. Those interested in illustrative work should certainly visit the show, as many original ideas may be gained from an inspection of the pictures. The exhibition will remain open till October 8th.

A RECENT article in a New York contemporary is evidence of the fact that a very simple "printer's error" can turn the effect of a whole page upside down. The copy made the page-heading say that a certain firm would "now" adopt a certain policy. As the comp set it, however, the heading read that the said firm would *not* adopt this course!

CUSTOMERS might perhaps be a little more patient with printers' errors if they stopped to calculate the number of mistakes the comp *might* have made in his setting. An American writer has pointed out that in the short sentence, "To be or not to be," by transposition alone it is possible to make 2,759,022 errors.

"WELFARE" AND TAXATION.—The cost of structural alterations or additions to factories and other expenditure in connection with the welfare requirements of operatives, ought to be a charge on revenue, not on capital account, as at present, declared the Association of Joint Industrial Councils at its meeting on Tuesday. A resolution incorporating this decision was sent to the Income Tax Commissioners, and the meeting also decided to continue to press for legislation making compulsory the acceptance of Joint Industrial Council awards.

## Caxton Home, Limsfield.

In memory of the late Mr. Robert W. Minter, at one time chairman of the L.S.C., the South London Caxton Musical Society have endowed a bed in the above institution, and the unveiling of the tablet placed over it took place on Saturday last. Mr. Minter was one of the pioneers of the movement some 30 years ago for the establishment of a Convalescent Home for the Printing Industries, and was first chairman of the committee of the Caxton Home, Limsfield. Mrs. Minter, who is over 80 years of age, in the presence of 24 members of the family and many friends, unveiled the memorial tablet. Mr. C. W. Bowerman, M.P., was present, and bore testimony to the earnest work of the late Mr. Minter for the Home and the printing trades generally, and conveyed the thanks of the committee of the Home to the Caxton Musical Society for thus honouring the memory of one of its early workers.

The "B.S.C." Fund also dedicated their bed on the same afternoon, the unveiling ceremony being gracefully performed by Mrs. Punnett, wife of the chairman of the Auxiliary. Votes of thanks were passed to the society for their effort, and acknowledged by the secretary, Mr. Clow. Visitors to the Home on the occasion numbered nearly a hundred, and opportunity was taken to visit the memorial room and screen, which aroused much admiration.

## The Ideal Working Seat.

Those who have followed with any interest recent researches in motion-study and fatigue in industry will realise how important in their bearings upon industrial economy are even small details of the workers' equipment and conditions. The seat upon which the worker sits is something more than a detail, as any unnecessary strain, discomfort or inconvenience it may cause is liable to have a big detrimental effect on output. Thus it is important to know what are the desirable qualities of workers' seats. On this subject the New York Industrial Commission has just published an illustrated report in which the general requirements are given as follows:—"The seat should be broad and not too deep, slightly saddle-shaped, and with the front edge rounded; the feet resting comfortably on the floor or on a broad foot-rest attached to the floor or bench; the bench at a height to allow plenty of room for the knees between the top of the seat and the underside of the bench; no brace or other obstruction interfering with a comfortable position of the feet and legs; a back-rest supporting the small of the back, and not extending far enough up to interfere with free movement of the arms; supplies so arranged that no excessive reach is involved in the work."

## Printed Matter for New Zealand.

### British Producers Gaining Ground.

Although the recently increased rates of postage for printed matter are of importance in hampering this country in its efforts to maintain its trade and its moral influence in respect of its oversea dominions, yet there are welcome indications that British publishers are gaining ground on those American producers who managed to slip into their places during the War.

After recalling that, eighteen months ago, the market for periodical literature in New Zealand was almost entirely in American hands, a correspondent of *The Times* states that there has since been a quiet, almost imperceptible, but yet thorough, reversion to British literature. The head of a big publishing agency—dealing in both British and American publications—explained, he says, that while the war was in progress, while America had paper to burn, and while British publishers were husbanding their paper supplies and British writers were mostly propagandists—then it was that America came into this market with a showy basket of the latest in literature. This was supplied to the booksellers "on sale or return." British publishers offered no such terms, so the shelves were loaded and the windows dressed with the pink product of the American Press.

Statistics give the rest of the story. In 1914 Britain supplied four-fifths of the books, papers, and music imported by New Zealand. Australia came second, and America a poor third, with 6 per cent. In the war years the British supplies fell away, and the American trade increased to over 20 per cent. of the whole. With the end of the war the American trade slackened, and the British recovered, and in 1920 the import of British goods was doubled. Probably 1921 will show Great Britain with a lead even greater than before the war.

In advertising and printed matter, other than books and papers, there was the same movement, even more sharply marked, and the same British recovery. It was the war which created the conditions favourable to America in this and in other branches of trade, and the advantage has not proved enduring.

### Trade Journals and Postage.

British magazines are now rivalling the American for the colour and attractiveness of their garb, and they are ousting the Americans from the front places in the bookstalls. In about a year the British supremacy has been re-established here in all departments, except the technical and trade Press. This is where the Post Office comes in. Magazines come to New Zealand mostly in bulk, as the mails offer only an uncertain advantage of early delivery which is not of great importance in this class of literature. But trade

publications come by mail, direct to subscribers. America has several advantages in the circulation of these journals, apart from any mail charge. The American product is, speaking generally, more attractive in make-up, sometimes it is bulkier, sometimes cheaper—and the whole method of doing business seems to have the underlying idea that the publisher wants readers (either with profit or loss), and the advertisers will pay.

Anyhow, the American trade and technical journals seem to be better established here than any other class of publication. The ascendancy thus gained is important, for, with markets at this distance from the source of supply, trade journals are vehicles for trade propaganda of a most effective sort—continuous, cumulative in its effects, and one might almost say insidious. Even without heavier postal charges British publishers have some ground to catch up.

### Mr. J. D. Appleby.

A leather trade representative well-known and respected by many printers and bookbinders passes from us by the death, on Saturday, at Newcastle-on-Tyne, of Mr. Jos. Drew Appleby, in his 72nd year. The deceased gentleman entered the service of Messrs. Edward and James Richardson, Elswick Leather Works, as an apprentice, and gained a sound practical knowledge of tanning and all branches in the leather trade. He continued in their service up to the time of his death, and was the chief representative of the firm in London and the Midlands, spending nearly the whole of his time in the metropolis. Mr. Appleby was well known in the leather world, and was a regular attendee at the Librarians' Conference, and frequently read papers, particularly with reference to leather suitable for bookbinding. He edited a complete and unique glossary of terms used in the leather trade and bookbinding, as an appendix to Mr. Philip's book "The Business of Bookbinding." On completion of 50 years' service, in 1913, he was presented by Messrs. Richardson with a handsome silver salver, and below the inscription are engraved the words "Fidelity, Perseverance and Urbanity," which sum up the characteristics of the deceased.

MESSRS. JAMES SPICER AND SONS, LTD., 50, Upper Thames-street, London, E.C.4, send us a comprehensive range of papers and cards, which are included in their special stock-taking sample set. The paper user should experience no difficulty in finding in this varied selection the special class of goods to suit his requirements, both as regards quality and prices.

## The Printing Trade's Opportunity.

### Alleged Waste in Printing Offices.

Mr. E. J. P. Benn, C.B.E., of Messrs. Benn Bros., Ltd., can wield a trenchant pen, and some of the little ways both of masters and men in the printing industry come in for interesting criticism in an article he contributes to the current issue of the *London Typographical Journal*. Surveying the present chaotic state of trade in general he points out the comparatively favourable circumstances that surround the printer, and suggests that the present juncture provides the printing craft with a heaven sent opportunity to give to mankind an illustration in practical economics which would add enormously to the great debt which the world owes to Caxton and all his followers. He continues as follows:—

Printing is suffering from unemployment, machinery is idle, works are on short time, and orders are difficult to get. The simple fact is that the buyers, all the way from the girl who used to revel in the penny novelette, right up to the managing director of the big store who used to issue his two-thousand-page catalogue broadcast, are not prepared to pay the prices which the printing craft now put upon their products. No legislation, no Minister of the Crown, no new economic system, no direct action, no strikes, no lock-out, can force the girl to buy the novelette or the managing director to put his catalogue in hand. The only way to bring these things about is for the printing craft as a whole to put them on the market at a price which will induce the girl and the man, of their own free will, to buy.

This looks like an argument for the reduction of wages, but it is nothing of the kind. I believe that in some departments of the printing trade wages have been pushed to a totally uneconomic level, but on the whole, I am one of those who think that the printers are underpaid. I have a very wide experience of industrial matters, and I have yet to find a class of work that requires a higher grade of skill or a higher type of intelligence than printing, and I know of no worker who is entitled to a higher rate of pay than the printer.

It may perhaps be necessary, for the time being, to accept a lower wage in order to get things going again, but that is a matter of which I am no judge. I merely want to register my opinion—and I am entitled to have one in printing—that the printer is at the top of the list of skilled workers and is undoubtedly entitled to the top wage on the list. How, then, can prices be reduced?

I spoke of the skill required by the printer. I have grave doubts, however, after recent experiences, as to the intelligence with which that skill is directed. As an outsider, with many opportunities for observing, I venture the opinion that the printing trade to-day is crammed full of waste, that that waste is

largely responsible for high prices, and that the high prices are entirely responsible for lack of orders and consequent unemployment. There is waste, padding, inflation, water, call it what you like, all through the printing trade.

To begin with, the master printers have a costing system which is the most perfect example of a blessing turned into a curse—that I know. Costing systems were designed to enable manufacturers to know their costs, and thus discover where economies could be effected. But, thanks largely to the bad example of the Ministry of Munitions, costing systems have in later days been used to kill competition and stereotype prices. A costing system which has the effect of forcing a standard price upon an industry is slowly murdering that trade. If the costing system were used by the master printers in order that each of them might discover the true cost per hour in each establishment of every job, then there would not be an hour's unemployment in any printing shop in England.

The next trouble, and an even bigger one, is the costing system of the employees which is demoralising the men, ruining the trade, and driving custom away. Every one of my readers will be acquainted with a hundred illustrations in support of my point. There is no, or very little, "ca' canny" in printing in the true sense of the word. Every printer does his best within the rules; but the rules are the trouble. The time wasted, the money spent, the cost incurred by a hundred different rules which prescribe exactly what every man is to do, and exactly what every man may not do, add enormously to costs, keep wages down, and are more responsible than anything else for the present troubles of the printing trade. The other night I found a labourer asleep under a machine while a minder was putting in four hours' work preparing for a run. I found, a little further on, a skilled stereotyper, whose wages were £6 a week, sweeping up the shop. I know a machine which is regularly run considerably below its capacity because trade union rules so decide. I am aware that many people hold that all this is making work, and that is why I venture to write on the subject. I want to ask those people how much trouble, how much unemployment, how much loss, and how much starvation, they will consider necessary before they will admit the utter folly of that line of argument.

If the printing craft as a whole, masters and men, would put their heads together and determine that from henceforth every bit of waste, every bit of deflation, every bit of demoralising slackness should be driven out of their honourable craft, my belief is that prices could come down at least 30 per cent. and work go up 100 per cent. to-morrow.

I venture to put forward these thoughts, first, because of my deep interest in the printer's craft; secondly, because of my interest and your interest in the welfare of British industry as a whole. It seems to me that printers now have a unique opportunity to take their place at the head of British indus-

try and give to the whole world an object-lesson in sound economics. I have just come back from America, where the workers and everybody else believe and know that every piece of work done makes more work. That is a doctrine which it is a little hard to see when warehouses are stocked with unsaleable goods, but it is none the less true, and it can be seen in printing. Will the printers rise to the great opportunity which is now theirs?

Full particulars as to fees, etc., may be obtained on application at the various institutions.

Evening Classes open 15th September, 1921

JAMES BIRD,

Clerk of the London County Council.

## Printing Trade Waste.

### Striking Evidence from America.

We have given space of late to expressions of opinion from several different points of view to the effect that there are big possibilities of betterment ahead of us in the way of eliminating existing waste in the printing industry. Strong support is given to these contentions—while also the importance of standardisation of paper and other materials receives additional emphasis—by the recently published report of a United States Governmental Committee which has been investigating the general question of the elimination of waste in industries. The report states that in six typical printing plants in the book, jobbing and periodical fields there is an average waste of effort and time of 57·8 per cent., i.e., that printing equipment as judged from this sample study is about 42 per cent. productive. This study of the printing industry has been made by John H. Williams, consulting engineer in New York and a member of the committee appointed by Secretary Hoover to conduct a nation-wide assay of waste in industry. It will be realised in giving percentages of this kind that much of the waste is unavoidable, but the statistics indicate that printing plants are much less efficient than many other industries studied, and the report may indicate some of the directions in which the improvement should be sought.

"The crux of waste," says the report, "within the individual printing establishment is the lack of accurate production standards constituting a fair basis of appraisal for the individual worker.

"Labour unions and the socially-minded public have been critical of all efforts to establish production standards. A little of what can be done by standardisation of equipment can be indicated by the results accomplished when type bodies were standardised. It is said to have involved an expense of three million dollars to the type foundry to change from the old system to the point system, yet it is universally conceded that this expenditure has been saved many times over. Impressive results have also been achieved in the standardisation of colours for printing. In the field of paper perhaps the most practical immediate step seems to be the limiting of plants and watermarks by the mills themselves." It is cited that the American Writing Paper Co. has reduced its grades from 237 to 41 since 1917. The report criticises some of the methods resorted to in the printing industry by both employer and employee, deploring "the profiteering which has existed during the last few years and the extortion of the law of supply and demand as well as the curtailment to which labour has undoubtedly resorted."

"Labour's responsibility for waste," says the report, "is noticeably less in non-union

plants because of the lack of restriction emphasised by the unions, and the resulting flexibility in maintaining a balance between labour and production." The responsibility for the heavy sagging below complete efficiency has been laid, in almost equal parts, to causes inherent in the industry, to causes related to the management of the particular plant and to causes connected with the inefficiency of labour.

## Censorship by Printers.

### The Liberty of the Press.

The thorny subject of the liberty of the Press and interference therewith by printing trade unions has been under discussion at Vienna at the eighth International Congress of Printers.

The Congress addressed to the organisations of all countries an urgent appeal to collaborate in the interests of the proletariat against capitalism. The British colleagues especially were requested to join the professional International in view of the distinguished position of the English trade unions.

In important discussions on the liberty of the Press, the printers asserted that they were in favour of absolute liberty. For ideal reasons, it was pointed out, no cultural progress is possible without liberty of the Press. In particular, compositors and printing men must not be fined or imprisoned for reprinting forbidden matter. But though they were for perfect liberty of the Press, there are, it was explained, times when they must apparently be against it; for instance, when by the order of their organisation they refuse to print slanderous articles which attack their comrades on strike, or to print articles directed against the interests of the workmen or of humanity. A resolution to this effect was carried.

During the course of the discussions many expressed the desire to fight the present reactionary Press, and it was asserted that if all the papers were obliged to write the truth and nothing but the truth for one single fortnight only, genuine "industrial democracy" could be established at once.

## New French Paper Companies.

Under the style "Fabrique de Pâtes à Papier de la Somme," a limited liability company has been formed for purchase and sale of rags and manufacture of pulp. Capital 1,500,000 francs.

Veuve Henri Noirot et Cie.—Manufacture of boards. Capital 500,000 francs.

Sargès-Durif et Naudin. All transactions relating to the paper industry and sale of paper. Capital 1,200,000 francs.

# New Inventions.

## A Suction Separator.

A suction separator for feeding labels, etc., from a pile of the kind in which one face of the separator is bevelled or set back so as to prevent the feeding of two labels at a time, is formed as shown with two or more radiating arms *c, c'*, some or each of which are provided with a suction orifice as *d'* communicating by internal passages *d* with a central suction

passage *b* which leads down to a central suction orifice *b'*. As shown, one of the arms *c* has a bevelled suction face *e*. Two arms may be provided at right angles to the arms *c, c'*, one of these may be bevelled and suction orifices similar to those in the arms *c, c'* may be formed in these arms. Messrs. R. Powley and Sons, Ltd., and Mr. M. Powley are the patentees.

## Cardboard Making.

A British patent has been applied for by Soc. E. Veuve Baron et Cie. by which in the manufacture of impermeable and rigid cardboard, ordinary cardboard is immersed in a boiling bath containing paraffin, ceresene, stearine and resin, pressed and "dried." The product may be used for roofing, packing-boxes, partitions, "protecting floors," electric switchboards, and the like.

## Reply Envelopes.

As patented by J. Wareing, a reply envelope of the kind formed from a blank with four parts *C, A, F, G*, the two outer parts *C, G*, of which receive the initial and return addresses and act as initial and return closure flaps respectively, is provided with side flaps *BB, DD* on the upper two *C, A* of four rectangular parts and with perforations along the lines 1,

2, 3, 4 as shown, the remaining free edge *E* of the upper part *C* being reinforced. The parts *A, F* and flaps *B* form the pocket, and initially the flap *G* is folded within the pocket, the flaps *D* being folded around the edges of the envelope and sealed down. The envelope is opened by tearing away the part *C* along the perforations and is reclosed by the gummed flap *G*.

## Delivering Sheets.

In an invention by the American Bank Note Co. there is a sheet delivery apparatus for rotary intaglio plate printing machines in which the sheets are stripped from the printing plate by a set of pivoted grippers on a rotating delivery member; the grippers are so constructed that when opened they yieldingly engage the plate so that each gripper adapts

itself to any inequality in the surface of the plate, and means are provided to retard, stop,

or reverse momentarily the movement of the delivery member while the sheets are being

taken and to accelerate it after the sheet is delivered. As shown, the delivery member comprises a series of discs  $c$  with gripping surfaces  $c'$  for the gripping fingers  $f$ . Tapes  $c'$  passing round the discs  $c$  co-operate with tapes  $c^2$  to deliver the sheets. The gripper fingers  $f$  are loosed upon a rock shaft  $d$  operated by a fixed grooved cam  $d'$ , and have stops  $f'$  normally held in contact with stops  $e'$  on members  $e$  fixed to the shaft  $d$ , by springs  $g$  arranged between the fingers  $f$  and members  $e$ . As the fingers approach the sheet taking position shown they are opened by the cam  $d'$ , and owing to the springs  $g$  bear resiliently on the printing plate  $a'$ . Spring metal tongues  $k$  secured to the fingers also ensure close contact with the plate  $a'$  and serve to guide the sheets on to the fingers. The delivery member is retarded, stopped or reversed momentarily while the sheet is being taken, and to effect this the shaft  $b$  of the discs  $c$  is driven from the gear  $i$  by a pin  $i'$  on which is a bell crank  $j$ , one arm of which is connected by a link  $k$  to an arm  $b'$  fixed to the shaft  $b$  and the other arm of which has a roller  $j'$  bearing in a cam groove in a fixed member  $m$ . The cam groove has two concentric parts of different diameters connected by a rise  $m'$  and fall  $m''$ . While the roller  $j'$  is moving in the concentric parts the speed of the shaft  $b$  is the same as that of the pin  $i'$  but as the roller  $j'$  moves along the rise  $m'$ , which occurs when the grippers  $f$  are opened to take a sheet, the link  $k$  receives a backward thrust to retard, stop or reverse the movement of the shaft  $b$ . When the roller  $j'$  moves down the fall  $m''$ , the shaft is correspondingly accelerated and this occurs after the delivery of the sheet to the tapes  $c'$ ,  $c^2$ .

#### A New Pulp Board.

A pulp board suitable for lathing for plaster, stucco and like material has been invented by Mr. Carl G. Muench. The material preferably used is waste material of a fibrous nature such as wood pulp tailings, screenings, waste paper, bark straw and the like. The finished board has prominent ribs, with deep channels between which receive the plaster, etc., after the board has been nailed in position.

**PAPER CINEMA FILMS.**—Mr. Martin Harper, the London inventor, is developing his idea for using opaque paper in the manufacture of cinema films. By thus removing the risk of fire, it is urged that moving pictures should be used in educational establishments and the home. Mr. Harper claims that he has overcome existing obstacles to the domestic use of cinemas by the invention of a non-inflammable process, in which opaque paper, similar to ordinary photographic print, becomes a substitute for the celluloid film and the picture is reflected instead of being directly transmitted on to a screen.

THE autumn session of the School of Photo-Engraving and Lithography, Bolt-court, Fleet-street, E.C.4, commences on Monday, September 26th.

## Perishing of Paper in India.

The Journal of the Indian Institute of Science contains a report on "The Perishing of Paper in Indian Libraries." In their main conclusions the investigators (Mr. J. J. Sudborough and Miss M. M. Mehta), do not differ greatly from the report of the committee on the Deterioration of Paper in Europe, published by the Royal Society of Arts in 1898. The type of paper found to be most resistant

to "perishing" in India is a rag paper, the fibres of which have not been weakened in the process of manufacture. Treatment injurious to the fibre is prolonged digestion with alkali, over-bleaching, non-removal of the last trace of bleach by antichlor, and imperfect washing that leaves traces of acid in the paper, while rosin and filling material should not exceed a small fixed percentage. It is recommended that all books and documents of permanent value should be removed to libraries in hill stations with temperate climates, or placed in special buildings in which complete air control can be maintained.

## Blocking v. Printing of Book Covers.

**An Important Principle in Dispute Respecting Bookbinders' Costs of Production.**

In the impressing of gilded or inked titles, ornamentation, etc., on book covers, the old-established practice of the bindery is, of course, to effect this by the process of "blocking" in special blocking presses. Lately, however, owing to the urgent need for reducing binding costs, coupled with the advent of heavy platen presses capable of doing satisfactorily much of the work which had previously required the aid of the blocking press, the platen machine has been increasingly used in this class of work, with a very considerable consequent saving in costs. This development has been eyed askance by some of the trade unionists particularly concerned with the work of blocking, and the matter has recently been brought to a head by definite action on the part of the National Union of Bookbinders and Machine Rulers (now incorporated in the National Union of Printing, Bookbinding, Machine Ruling and Paper Workers). This union addressed to its members a specific warning on the subject of the growing practice of printing on cloth. The union's executive expressed the opinion that the practice deprived the blocker of his legitimate work, and members were accordingly instructed to inform the union whenever a case occurred in which any material other than paper was introduced into a shop ready printed (or was sent out to be printed), in order that such action could be taken by the union as was deemed necessary for the purpose of preserving the status of the trade and assisting in the elimination of unemployment. This instruction has now been acted upon, and an issue is thereby raised which is of serious concern to the whole of the printing and bookbinding industry. Not only is the

vital matter of cost of production involved, but at the root of the dispute is a question of principle which is of first-rate importance.

### **Specific Cases of Stopped Work.**

The council of the Federation of Master Printers were recently confronted with a case in point. The Master Bookbinders' Association communicated with them in respect of a dispute in which a firm's bindery workers had refused to handle a job because covers had been sent to a printer to be printed—as was specified in the publisher's order, and as the firm in question had been doing for 20 years in respect of the same job. The master bookbinders naturally argued that the work should be executed on whatever machine would do it most economically. Eventually, we understand, this particular case has been submitted to the Printing and Kindred Trades Federation as being a matter that should be fought out between the unions concerned.

An illuminating instance of the same kind has been brought to our notice by Mr. G. J. Mathieson, the principal of the firm of Messrs. Burrup, Mathieson and Sprague, Ltd. It appears Mr. Mathieson's firm accepted an order for the printing and binding of 12,000 books in regard to which certain plate-marking of the cover was specified. The firm's bindery workers took up the matter of the plate-marking and insisted that it should be done on a blocking machine, a course which would have added very considerably to the cost of production. The aid of the Master Printers' Association was sought by way of arbitration, but without a satisfactory solution being found. The matter is now, we believe, being rather vigorously debated between the repre-

representatives of the bookbinder's union and the Platen Machine Minders' Society, and the dispute will probably be carried to the Printing and Kindred Trades Federation. A particularly interesting feature of this case is that when the customer was told of the added cost for having his job done by blocking, he decided to cut out the intended plate-marking altogether; thus not only did the blocking workers fail to get the work they aimed at, but they also deprived the platen workers of a job that was due to them, and many hours' employment were lost to the trade.

### The Principle in Dispute.

We wish to treat this matter impartially; with a single eye to the ultimate good of the trade as a whole; therefore fair publicity will be given in these pages to any appropriate statements of fact or opinion in the matter which may be submitted to us, setting forth the different points of view existing. Such discussion must tend to facilitate a satisfactory settlement of the point in dispute. For our own part, however, we regard the union's action in the matter as being ill-advised. We do so because we believe it represents a short-sighted policy which will not in the end serve the good purpose to which it is directed; moreover, the principle on which it is based is one which has already been discredited in practice.

It must be admitted as very generally true that the adoption of more economical methods in industry—though it may temporarily, or in individual cases involve some hardship—must in the end benefit the whole body of workers concerned. To refuse to produce bindings requiring to be printed or plate-marked in a platen machine is likely to result, on the whole, not in the giving of more work to the blockers, but in the withholding or curtailment of binding orders, thus being detrimental to the whole trade. Only last week we reported a very plain statement by the secretary of the London Society of Compositors, which set forth the sound economical principle which applies to this and similar situations. Mr. Naylor said, at the recent educational gathering at Stationers' Hall, that every means for economising production and reducing the quantity of labour necessary was a gain not only to the firm, and to the trade, but actually to the men engaged in the work of production. If economised production is to be resisted by the blockers because they do not want work to be given to the platen minders, we see no logical stopping place in the application of this dangerous principle. Shall the compositors refuse to allow the stereotypers to deprive them of resetting work, or refuse to allow the litho men to take a transfer of letterpress matter? Or shall the boxmaker refuse to allow the printer to employ in his work anything in the nature of the production of boxes or cartons? And shall heavy platen presses be declared illegitimate?

The principle underlying this reactionary attitude in matters of cheapened methods of production is one which has been repeatedly proved to be unsound. It was the acceptance

of this principle that led to the attacks on the first linotype machines, which had to be specially protected from wanton destruction by hand compositors. Yet to-day one of the proud claims of the linotype firm is that their machine has been instrumental in largely increasing the number of men employed in the printing craft and raising wages in the industry. The only sound principle in all matters of changing methods or improved machinery is the principle of the survival of the fittest. The fittest methods of production will survive, and the economy resulting from that survival will benefit the whole of the industry concerned.

## The State of Employment.

Employment in the printing, paper and bookbinding trades during August continued bad generally, and in some districts was worse than in the previous month. Short time was again largely worked in all three trades, but was not quite so prevalent as in July.

The percentage of workpeople unemployed in the printing, publishing and bookbinding trades, as indicated by the unemployment books lodged at Employment Exchanges, is stated by the *Labour Gazette* to have been 7.7 at August 26th as compared with 8.5 at July 29th. In addition, 1.5 per cent. of the workpeople were claiming benefit in respect of systematic short time working at August 26th, as compared with 1.7 per cent. at July 29th. With letterpress printers employment was generally very slack in London, and worse than in July, and although some overtime was worked by a considerable number of compositors, others were on short time or totally unemployed; in the provinces, also, employment was very slack, and a good deal of short time was worked. In the lithographic printing trade employment continued bad, and short time was worked in most districts. Returns received by the Ministry of Labour relating to nearly 7,400 workpeople in the letterpress and lithographic printing trades showed that slightly over one-third of these workpeople worked, on an average, nearly nine hours per week short of full time.

Employment in the bookbinding trade was bad, and worse than in the previous month. Of over 3,900 workpeople covered by returns received, over 40 per cent. were working, on an average, nearly 15 hours per week short time.

Of a total membership of 77,693 in printing trade unions reporting to the Ministry of Labour, 7.5 per cent. were unemployed at the end of July, this being an increase of 0.5 per cent. on the previous month and of 6.0 on a year before. Of 14,850 bookbinders, 9.3 per cent. were unemployed at the end of August, this being an increase of 2.2 on the previous month and of 8.7 on a year before.

An Advertisement is always working.

# Government Contracts.

Contracts were placed with the following firms during August:—

## Stationery Office.

PRINTING, RULING, BINDING, ETC.—Binding 12,000 copies Abridged Nautical Almanac 1,250 Pilot Books.—J. Adams, London, E.C.

10,350 Diaries, 4,000 Army Book 122, 2,000 Books, P. 1,086.—John Rissen, Ltd., London, E.C.

1,400 Diaries, 458,500 Litho Plates, 6,156,000 Health Insurance Cards.—J. Truscott and Son, Ltd., Tonbridge and London, E.C.

9,500 Diaries.—J. Dickinson and Co., Ltd., Hemel Hempstead.

2,000 Cash Books, 2,000 Savings Bank Ledgers.—Willmott and Sons, Ltd., London, E.C.

6,000 Diaries, 473 Pads, Receivable Order Cheques, 78,800 File Covers, 6,000,000 Forms, P. 430, 2,000,000 Forms, P. 436, 750,000 National Savings Card, 75, 2,000,000 Unemployment Insurance Forms, 10,000 Pads, Forms 575 C, Binding 102 Army Record Books, 6,500 Military Engineering, Volume III.—Waterlow and Sons, Ltd., London, E.C.

40,000 Books, Form Med. 40.—A. Bryson and Co., Ltd., Glasgow.

Binding 2,265 Committee Reports.—Fisher Bookbinding Co. (1912), Ltd., London, S.E.

400,000 Unemployment Insurance Forms.—S. Hill and Sons (Liverpool), Ltd., Liverpool.

10,000 Pads Pension Forms.—H. Blacklock and Co., Ltd., Manchester.

75,000 Books, Med. 40a.—S. Harrison, Manchester.

H.M. Stationery Office Press, London, E.

2,500,000 Forms T. 23.—W. P. Griffith and Sons, Ltd., London, S.E.

2,000 Savings Bank Ledgers.—Clements, Newling and Co., Ltd., London, E.C.

6,883,000 Health Insurance Cards.—John Heywood, Ltd., Manchester.

150,000 Books, Med. 40.—Arthurs Press, Ltd., Stroud.

Bookwork Printing for Post Office, Group 89 (1921).—Barclay and Fry, Ltd., London, S.E.

Do., Group (1921).—H.M. Stationery Office Press, Harrow.

Do., Group 91 (1921).—Harrison and Sons, Ltd., London, W.C.

350,000 Forms, Accounts 193/1920.—J. Robertson and Co., Ltd., St. Annes-on-Sea.

Miscellaneous Printing for G.O.C. at Aldershot.—W. May and Co., Aldershot.

Printing Foreign Office Passports, Group 213 (1921).—T. De la Rue and Co., Ltd., London, E.C.

379,200 Ring Papers.—Merser and Co., Ltd., London, S.E.

500,000 King's Letter re Memorial, 1,000 Army Book 482, 1,725 Pads, Form S.D. 2002.—McCorquodale and Co., Ltd., Wolverton, Bucks.

REPAIRING TYPE CASES.—T. J. Weeks and Sons, Ltd., London, N.E.

TRACING LINEN.—Winterbottom Book Cloth Co., Ltd., Manchester.

CARBONS.—Crusader Mfg. Co., London, E.; Pencarbon Co., Leicester.

CARDS.—Ford Paper Works, Hylton, near Sunderland.

LABELS.—Fisher, Clark and Co., Boston, Lincs.

LOOSE-LEAF BINDERS.—W. Gibbons and Sons, Ltd., Wolverhampton; John Rissen, Ltd., London, E.C.; Lamson-Paragon Supply Co., Ltd., London, E.; Webb, Son and Co., Ltd., London, E.C.; Nevett Bookbinding Co., Ltd., London, N.W.

PAPER OF VARIOUS DESCRIPTIONS.—Hollingworth and Co., Maidstone; Caldwell's Paper Mill Co. Ltd., Inverkeithing; R. Fletcher and Son, Ltd., Stoneclough; Roughway Paper Mills, Ltd., Tonbridge; Drayton Paper Works, Ltd., London, S.W.; J. Brown and Co., Ltd., Penicuik; W. Wright and Sons, Marlow Mill, Bucks; Grove Paper Mill Co., Stockport; Ulverston Paper Mill Co., Ltd., Ulverston; R. Craig and Sons, Ltd., Moffat and Caldercruix; St. Neots Paper Mill Co., Ltd., St. Neots, Hunts; S. Jones and Co., Ltd., London, S.E.; Northfleet Paper Mills, Ltd., Northfleet; A. Cowan and Sons, Ltd., Penicuik; Golden Valley Paper Mills, Bitton; W. H. and A. Richardson, Ltd., Jarrow-on-Tyne.

PHOTO PRINTS OF TRACINGS AND DRAWINGS (N. Area).—Allott, Jones and Co., Ltd., Liverpool.

PORTFOLIOS.—Willmott and Sons, Ltd., London, E.C.; McCorquodale and Co., Ltd., Wolverton, Bucks.

STRAWBOARDS.—Waterlow and Sons, Ltd., London, E.C.

## Crown Colonies.

PRINTING MACHINE, ETC.—Messrs. Harrild and Sons, London, E.C.

STATIONERY.—Waterlow and Sons, Ltd., London, E.C.

## India.

MACHINE, WHARFEDALE.—Harrild and Sons, London, E.C.

MOULDS, ETC.—Lanston Monotype Corporation, Ltd., London, E.C.

PAPER, CARBON.—Caribonum Co., Ltd., London, E.; Swallow Manufacturing Co., Ltd., London, E.C.

PAPER, LANCASHIRE LEDGER.—Wiggins, Teape and Co. (1919), Ltd., London, E.

TAPE, PAPER.—H. Erhardt and Co., Ltd., London, E.C.

AMONG the many bequests made by Mrs Laura Elizabeth Stuart, is the following:— "One hundred pounds to the editor for the time being of the *Eastern Daily Press*, Norwich, and £200, as her executors may decide, amongst other members of the editorial staff, as a small mark of her appreciation of the way in which they have conducted the paper." The deceased was the widow of Professor James Stuart, and daughter of the late Mr. Jeremiah James Colman, of Norwich. She left £84,835.

MR. WILLIAM J. DODGSON, Mayor of Workington, and editor of the *Workington Star*, died suddenly at Workington, on Friday, aged 58. He started life as a railway signalman.

## College of Technology, Manchester.

### Presentations to Mr. R. B. Fishenden, M.Sc. Tech.

Nineteen years' strenuous work in one institution is bound to show the failure or success of the efforts of an individual, and when such person wishes to change his sphere of usefulness it is then the time for those amongst whom he has been the guiding light to show in some form or another their appreciation. In the present instance there is not only appreciation but admiration for Mr. Fishenden in the splendid work he has accomplished in connection not only with the printing crafts but also the photographic arts in the College of Technology. Amongst the many expressions of regret at losing so genial a friend there has not been any more sincere than the gathering of the day staff and part time instructors in the afternoon of Saturday last, and the six hundred supporters of the Printing Crafts Guild who held a concert in the College of Technology in the evening of the same day. Mr. Fishenden was the guest for the afternoon and evening, and after an excellent tea, Mr. A. Trickey, a senior instructor, was deputed to make a presentation of a five-tier bookcase to the retiring director of the photographic and printing departments. In his remarks he stated there was a certain amount of sadness in having to part with the friendship of Mr. Fishenden who had accepted an appointment in London. Of those present at that gathering there were only three who were appointed when first the School of Technology was opened, and they were Mr. Fishenden, Mr. Jas. Begg, and the speaker. In those early days no one was able to prophesy what the outcome of the venture would be, but Mr. Fishenden had himself during the whole period been the life and soul of the departments which were controlled by Mr. Chas. W. Gamble. Their guest that afternoon had always been deeply interested in research and progressive work. When the Great War commenced Mr. Gamble deemed it his duty to offer his services to the country and, they being accepted, he passed on to Mr. Fishenden the reins of office. During those trying years the photographic and printing section not only maintained the standard of efficiency, but increased in usefulness, so that when Mr. Gamble was able to again take up his appointment he found that the fabric in which he has so much interest had been extended and improved during his absence. On behalf of his colleagues he (Mr. Trickey) presented to Mr. Fishenden the bookcase, also a portfolio produced by Mr. W. Mellor, junr. (artiste and embellisher) and Mr. W. M. Menzies (art bookbinder), and to them he added wishes of success and God-speed.

Mr. Jas. Begg, the senior instructor in the printing departments of the College was reminiscent in his remarks, and, although after

nineteen years close friendship with Mr. Fishenden, he would miss the kindly greeting on each class evening, yet he hoped that success would follow success in the new duties which Mr. Fishenden was going to undertake.

When Mr. Fishenden rose to return thanks the acclamation was so sincere that for a short time words failed him. Then he said that the gathering that afternoon would be one of the kindest reflections which he would treasure. He thanked Mr. Trickey for the very sincere manner in which he had spoken. It was a very happy thing to know that friends appreciated the efforts he had put forth and had pledged themselves to such sacrifice on his behalf. His aim had been quality, quantity and right presentation. With the assistance of the instructors the aim had gone high, and in all the work that had been carried on he did not forget that there was one lady—Miss Ada Lodge—who had steadfastly devoted her energies in the forward path and had been his most efficient help in every possible way. (Applause.)

### Printing Crafts Guild's Tribute.

In the evening, under the auspices of the Printing Crafts Guild, a concert was held in the large hall, the artistes being Mdme. Hetta Cowpe (soprano), Miss E. Pollit-Crowley (contralto), Mr. W. A. Stark (tenor), Mr. Urquhart Hough (baritone), Miss Mollie Hough (pianist) and Mr. Horace Dobson (violinist). Just before the interval there was a classical display of dancing by the pupils of Miss Winifred Pasley.

Between the first and second part of the programme Mr. John Taylor, the popular president of the Guild, said he had a duty to perform which combined sadness with pleasure. It was with regret that the Guild was losing the valuable help of their chairman, Mr. R. B. Fishenden, who was taking up in London a new appointment. During the fourteen years the Guild had been in existence the membership had advanced from 104 to 444 at the present time, a great share of its success being due to the constant assistance and guidance which Mr. Fishenden had bestowed upon it. The pleasure to him that evening was the fact that the humblest members of the Guild had been subscribers to the beautiful silver tea and coffee service which would be handed to Mr. Fishenden in recognition of the work he had done for the Printing Crafts Guild in the Manchester and district areas. On the platform that evening he had the support of Mr. W. R. Cannell, the first Guild secretary, and Mr. F. J. Hughes, the present secretary. The Guild had been well served by its chairman and the members desired to show their appreciation by a memento of their sincere regard for Mr. Fishenden. A pleasant interpellation was the gift to Mrs. Fishenden of a bouquet of rich bronze-coloured chrysanthemums by one of Miss Pasley's tiny tots.

Mr. W. R. Cannell historically reviewed the period from student to instructor and gave great credit to Mr. Fishenden for such constant help.

In returning thanks Mr. Fishenden expressed

delight with the appreciation accorded him for his efforts during the nineteen years of his residence in the city of his adoption, to bring the printing crafts to the highest ideal. His severance after so long a period would be a great trial, but when he would reflect upon their good wishes that evening, he would take heart again, and carry on in London the work assigned to him.

Mr. Marsh (president of the Manchester T.A.) was the mover of a vote of thanks to the artistes.

The concert party was arranged by Mr. Edgar Ashton who voluntarily carried out the programme with success. What a labour of love!

The souvenir programme was printed and presented free by Mr. John Taylor, president, the inside cover having impressed upon it the latest portrait of the popularly known director of printing and photography "R. B. F."

WEE MAC.

## Appeal for More "Welfare."

In view of the very critical state of the industrial world to-day, an earnest appeal for the extension of the "welfare" movement is made by the Council of the Industrial Welfare Society. The appeal takes the form of a manifesto which has been issued to the Press over the signatures of the members of this very influential council, including Sir William A. Waterlow and Mr. G. A. Isaacs. After indicating the need for, the nature of, and the possibilities that lie ahead in "welfare" activities, the appeal concludes as follows:—"Although the promotion of mutual co-operation along the lines we have indicated is the concern of those actively engaged in production, yet we believe that a heavy obligation rests upon shareholders, bankers, professional men, to take a part in extending this movement. The Industrial Welfare Society, which during the last three years has made a deep impression upon the minds of men, not only in this country but throughout the world, exists for the purpose of fostering the work to which we have referred. We, as members of the council, feel that the time has come when the burden of maintaining the organisation should be shared by all who have at heart the future well-being of industry. The Society propounds no pedantic theory of economic control, but attempts to deal in a practical way with industrial problems as it finds them; bringing to bear upon their solution a new spirit, or rather, the remembrance of an old-world spirit of comradeship and humanity, which, in an age of material progress, had almost been forgotten."

THE death took place on Saturday, at his residence in Hampstead, of Mr. Edward Ledger, formerly well known in theatrical circles as the proprietor and editor of the *Era*, who retired in 1905.

## Electrotypers and Stereotypers MANAGERS & OVERSEERS' ASSOCIATION

### The Wages Position Considered.

A good attendance of members marked the September meeting of this Association, which took place at the St. Bride Institute on the 20th inst. The chief interest of the occasion lay in the presence of Mr. W. C. Warren, the very live secretary of the National Society of Electrotypers and Stereotypers, and Mr. G. Maidment, London chairman of the same, who attended, together with other of the Society's officials, to offer an explanation and answer questions with regard to the wages dispute as it affected the trade of electrotyping and stereotyping. The Association's president, Mr. A. Chadwell, was in the chair.

The proceedings opened with the usual reading of the minutes by the secretary, Mr. W. Bullett, and after these had been approved the chairman recalled that at the last meeting it had been decided to invite the officials of their trade union to attend and explain certain points with regard to the wages dispute. He then lost no time in calling upon Mr. Warren to address the meeting.

### Trade Union Officials Speak.

Mr. Warren thereupon presented a most clear and able summary of the whole history of the dispute so far as his own section of the trade was concerned, and his success in satisfactorily meeting members' doubts or difficulties—chiefly relating to the phenomenally heavy levy called by the Society—was shown by the very hearty approval which his remarks evoked.

A few questions followed Mr. Warren's statement, these and later discussion giving evidence of a markedly outspoken though generous attitude on the part of the speakers.

The London chairman of the Society being called upon to speak, Mr. Maidment quickly warmed to his subject, and in eloquent fashion set forth his own view of the position. He chiefly emphasised matters of principle which in his opinion underlay the dispute and which justified the course taken by the union. His words called forth cries of "bravo" and tumultuous applause as he resumed his seat.

A very cordial vote of thanks to Mr. Warren, Mr. Maidment and the other union officials present was proposed by Mr. A. Latimer, seconded by Mr. J. Black and carried unanimously.

The next business was an addition to honorary membership, Mr. C. E. Goddard, of Messrs. Monnery and Co., London, being duly elected.

With regard to the forthcoming dinner of the Association, the chairman announced that it would be held on November 26th at the Holborn Restaurant. He expressed the hope that it would be a bumper affair, and urged members to give in their names as early as possible and to arrange to bring their friends.

## Fleet Street War Heroes.

**Tribute at the Offices of the "Daily Chronicle" and "Lloyd's News."**

For service in the Great War 500 men from various departments of the *Daily Chronicle* and *Lloyd's News* joined up and 50 of them died in the service of their King and Country. The memory of their great sacrifice has not been allowed to fade away by their colleagues, and on the anniversary of the death of each of the heroes wreaths and flowers are placed in the vestibule of the offices in Salisbury-square. It may be remembered that just three years ago when the late Mr. Niel Turner passed out of the offices for the last time he remarked upon the appropriate display of flowers. Mr. Turner was to live only another hour, for after a hurried journey to King's Cross he collapsed on the platform and died suddenly.

The anniversary of Mr. Turner's death and that of Mr. S. W. Cartwright, also for many years connected with Edward Lloyd, Ltd., and who met his death by his ship being torpedoed in the Bay of Biscay, and of three of the employees who were killed on the same day, was observed on Tuesday last. As in previous years there was a magnificent display of flowers and wreaths in honour of their memory. The three comrades who died at the front were W. J. Beckwith, F. J. Hose and G. A. Mascord, the latter being the son of Mr. George W. Mascord, general works superintendent, Salisbury-square.

The display of flowers on Tuesday was, as we have said, of a very attractive and appropriate character. Every department of the firm sent a floral tribute, and the widows of those who were being honoured also made contributions. Mrs. Turner, for instance, sent a beautiful bowl of flowers from her own garden. There were also wreaths from the Board of Directors, Mr. Frank Lloyd, Mr. W. S. Robinson (editor of *Lloyd's News*), and other friends. Photographs of the fifty men who made the supreme sacrifice were hung up in the vestibule and appropriately surrounded with flowers and patriotic emblems. Among the many visitors who called during the day were Mrs. Turner and widows or friends of the three heroes who had died on the same day.

The flowers are usually made to serve a double purpose, being afterwards sent to various London hospitals, where they are much appreciated.

Designs have been prepared for a permanent brass memorial in the vestibule of the *Chronicle* buildings, which, it is anticipated, will be set up in the near future.

THE Bulgarian Minister for Education has decreed by means of a Bill that every Bulgarian boy or girl must undergo a week of manual and agricultural labour every year. Among the things the children will learn during the week is the binding of books.

## Trade Union Matters.

THE members of the Scottish Typographical Association have unanimously elected Mr. Robert Watson as general secretary, in place of the late Mr. John Watt. Mr. Watson has, during Mr. Watt's secretaryship, occupied the position of financial secretary, discharging the duties with great satisfaction to the Association. Thus it was natural that, on the death of Mr. Watt, Mr. Watson should put forward his claims for the post of general secretary, and the membership has without opposition approved his application. Mr. Watson is a very logical speaker, with a firm grip of trade union matters. He is an ardent co-operator and a member of the town council of Kilmarnock.

In appreciation of the work of their secretary, Mr. Daniel Pointing, the News Department of the London Society of Compositors have named a bed in the Caxton Home, Limsfield. The chairman of the Branch (Mr. Sid Long), prior to unveiling the tablet, spoke very highly of the work of Mr. Pointing as secretary, and Mr. C. W. Bowerman, M.P., added a tribute of praise, with reminiscences of the period when he held the secretaryship of the News Department. Mr. Pointing was presented with a framed certificate, entitling him to nominate a patient annually for life to occupy the News Department Bed.

REPRESENTATIVES of printing trade unions were among those taking part in the latest week-end conference of the Industrial League and Council (of which Viscount Burnham and Mr. G. H. Roberts are presidents). This society has been seeking to advance its object of improving the relations between employers and employed by holding a series of informal week-end conferences. One of these was held last week-end, the entertainers of the league being Mr. H. V. Roe, the pioneer in aviation, and his wife, Dr. Marie Stopes, the well-known scientist, who, at their beautiful home, Givons Grove, near Leatherhead, received on Saturday, the following, who were invited to take part in the conference:—Messrs. C. E. Hodgkin (the Pulsometer Engineering Co., Ltd.), H. W. Howes (secretary, the Printing Machine Managers' Trade Society), J. Kelly (general secretary, National Union Bookbinders and Machine Rulers), F. W. Kimmins (chairman, Leatherhead Council), A. J. King (head postman, Leatherhead), T. H. Middleton (assistant secretary, National Society Electro and Stereotypers), A. S. Powell (National Foremen's Association), S. Ratcliffe (chairman, works committee, Metropolitan Vickers Electrical Co., Ltd.), A. Wilkinson (Messrs. Barker and England), C. Young (Messrs. Barclay, Perkins, and Co., Ltd.), and J. Ames (general secretary, Industrial League and Council). Discussion centred chiefly upon the utility, functions and scope of works committees.

## Trade Notes.

TWO CASES of lead poisoning occurred in the printing industry during the month of August.

THE death has occurred of Mr. R. Dick, retired printer and stationer, at his residence, Belmont Park-road, Hamilton.

MR. WILLIAM TAYLOR FIELD, of Bournemouth, late of Baildon, Yorks, and of Bradford, printer, late of Messrs. Field, Sons, and Co., Ltd., of Bradford, left £5,566.

MR. JAMES MOORE, J.P., head of a leading printing and stationery establishment, died at Belfast last week, aged 77. He was ex-president of the Ulster Reform Club, a member of the Belfast Chamber of Commerce, and was actively associated with the Royal Ulster Yacht Club.

READERS' PENSIONS DINNER.—The twenty-seventh annual dinner in aid of pensions for printers' readers and their widows will be held in the Throne Room, Holborn Restaurant, on Saturday, October 8th, 1921, when the chair will be taken by Sir William E. Berry, Bart. There is already an imposing list of acceptances.

FIRE IN STATIONERY PREMISES. — An outbreak of fire occurred in the premises of Messrs. G. Duncan and Son, Ltd., manufacturing stationers, 190, High-street, Edinburgh, shortly after half-past nine on Friday night. Although the outbreak was not of a very serious nature, a considerable quantity of stationery in the ground floor of the premises was damaged by fire.

PRINTED MATTER POSTAGE.—The Incorporated Society of British Advertisers, Ltd., has passed a resolution against the increased postal rates on inland printed matter, and urging a reconsideration of the facts upon which the increase was made. The resolution suggests as an alternative to the restoration of former rates the granting of rebates to traders who facilitate the work of the Post Office staff by pre-sorting postal matter before delivery to the Post Office.

LOWESTOFT PRINTERS' STRIKE.—Owing to a dispute regarding the dismissal of two men at a Lowestoft printing office, officials of the trade union branch on Wednesday of last week called out all their members in the town. This appears to have been a distinct breach of national agreements. The attention of the executive of the Typographical Association being called to the matter, it was arranged to refer the dispute to the Conciliation Committee of the Joint Industrial Council convened for to day (Thursday). A dispute at Exeter is also being referred to the Conciliation Committee.

THE inaugural meeting of the new society called the "International Association of Journalists accredited to the League of Nations" took place at Geneva on Saturday. The object of the society is to protect and

uphold the interests of members in their relations with the League and with the States, members of the League. The society will have its headquarters at the seat of the League of Nations.

**Mr. William Bradley.**

We regret to record the death, at the age of 69 years, of Mr. William Bradley, who for so many years represented Messrs. Lepard and Smiths, Ltd., the well known paper merchants of Great Earl-street and Upper Thames-street. Mr. Bradley, who enjoyed unbroken health for fully 60 years, was suddenly seized with illness a few weeks ago, and although an operation was successfully performed, he gradually sank, and finally passed away peacefully in his sleep on Friday, the 9th inst. A memorial service, conducted by the Rev. G. Oswald Bainton, A.T.S. (Streatham Hill Congregational Church), was held at the private residence at Streatham-hill on the 13th, prior to the interment at Norwood Cemetery. Messrs. Lepard and Smiths, Ltd., were represented by Mr. J. H. Gurney Smith (director), Mr. T. Harris Christian (secretary), and Mr. H. H. Mellon (manager). Mr. Frank Briant, M.P. for Lambeth (North Division), with whom Mr. Bradley had been associated for 34 years in connection with "Alford House," Mr. Briant's club in Lambeth walk for working men and boys, was also present. By a strange coincidence, the grave in which Mr. Bradley was interred was next to the family vault of the Gurney Smith family. Educated at a school in the neighbourhood of Oxford, Mr. Bradley left there to enter the firm of Messrs. Lepard and Smiths, with whom he remained to the day of his death—a period of over 54 years. In the early days of his career he was obliged to walk four miles each morning to his work, there being no other mode of transport available. Perhaps to this cause may be traced his fondness for walking, which in later years became his chief form of recreation. A keen lover of nature, he was often to be found walking or cycling during the week-ends in most unlikely byways, enjoying to the full the delights of the countryside, and this continued right up to the time of his illness. Another characteristic, emphasised by Mr. Frank Briant, M.P., was his unfailing performance of any duty undertaken. His invariable good temper and straightforward character, kindly disposition, and the genuine pleasure evinced in the success of others, gained for him during his 54 years of business experience, the respect and esteem of many who will miss an old friend. In a world of unrest he was able to

"Lay aside life-harming heaviness,  
And entertain a cheerful disposition,"  
and his passing leaves us the poorer.

## FORTY-THIRD YEAR.

Printed and Published EVERY THURSDAY  
by STONHILL & GILLIS.

at 58, Shoe Lane, London, E.C. 4.

Tel.: Stonhill, Fleet, London. Phone: 8407 City.

SUBSCRIPTION: Per Annum, 8s. 8d. (POSTAGE EXTRA).

### Charges for Trade Advertisements:

(Full page 8 by 5 1/4 ins.)

Whole Page ...	£4 10 0	s. d.
Half Page ...	2 10 0	
Third Page ...	1 17 6

One inch in Column	9 0	

An Extra Charge for Cover and Special Positions.  
Discounts according to Number of Insertions.

Representatives throughout the United Kingdom and  
also in Australia, India, South Africa, United States  
Canada, etc.

All communications for the "BRITISH AND COLONIAL  
PRINTER AND STATIONER" should be addressed and  
Cheques and Post Office Orders made payable to—  
STONHILL & GILLIS, 58, SHOE-LANE, LONDON, E.C. 4.

Copies may be purchased at the Offices, as above  
or from Messrs. W. H. Everett and Son, Ltd., news-  
agents, 11, St. Bride-street, E.C. 4.

THURSDAY, SEPTEMBER 29, 1921.

## Current Topics.

### Wages Dispute Ending.

THOUGH the returns of the trade union ballots are not completed as we go to press, we learn that almost all the principal unions have reported acceptance of the terms offered, and there has not as yet been a single rejection. Among the unions reporting acceptance are the Typographical Association, Scottish Typographical Association, London Society of Compositors, Printing Machine Managers' Trade Society, Platen Printing Machine Minders' Society, Amalgamated Association of Pressmen and the Amalgamated Typefounders' Trade Society. Details as to the voting are not available save in the case of the London Society of Compositors, whose figures were:—For the agreement, 8,212; against the agreement, 2,879; majority in favour, 5,333.

### The New Wages Rates.

IT will be remembered that, with the exception of two unions, the terms on which

the latest ballots have been taken provide for a reduction in wages of 5s. per week on the pay day in the week ending October 1st, and a further reduction of 2s. 6d. per week on the pay day in the week ending January 7th, 1922, with corresponding reductions in the wages of learners and piece-workers. The two exceptions are the London Society of Compositors and the National Union of Electrotypers and Stereotypers, in whose case the agreement provides for the same reduction as the other unions on the pay day in the week ending October 1st (viz., 5s. per week), subject to further conferences on several outstanding matters. A special meeting of the council of the Federation of Master Printers was called for yesterday afternoon (Wednesday), when the ballot returns were to be considered. The council also agreed to receive a deputation from the Amalgamated Society of Lithographic Artists and Designers and the National Union of Printing, Bookbinding, Machine Ruling, and Paper Workers, who, we understand, are asking for some reconsideration of the terms they accepted a month ago which terms provided for a reduction of 7s. 6d. per week in the wages of men, 5s. to take effect on the pay day in the week ending August 27th and 2s. 6d. on the pay day in the week ending September 24th, and a reduction of 3s. per week in the wages of qualified women, 2s. on the pay day in the week ending August 27th and 1s. on the pay day in the week ending September 24th.

### National or Sectional Wage Negotiations?

SOME special interest attaches to the current application of the bindery workers and others to have their wages agreements revised. Members feel it to be unfair that the unions which were the first to accept the wage-reduction proposals have had to suffer cuts in wages before those unions that were able to resist the proposals more strenuously. This throws a curious light upon the question of whether wage agreements should be national or sectional. It will be remembered that until a few years ago all the trade unions used to negotiate individually with the employers' organisation. The abnormal war-time conditions were responsible for the adoption of the national plan of negotiations, whereby the unions massed their wage-demands and these were negotiated *en bloc*. We have now become accustomed to this national method, and it is because of this that there seems some justice in the present allegation of unfairness in the application of wage-reductions to some unions earlier than to others. Before the war, no such objection

would have been made, for then it was understood that each union made its own agreement with the employers and then had to adhere to it irrespective of what terms other unions were able to obtain. And does not the same position hold to-day? That negotiations should be national rather than sectional is maintained not only by the employers but also by a growing body of trade union opinion, the advantages of central control and joint action being increasingly recognised. Had the present negotiations been conducted on the national plan, no such situation would have arisen as that in which the bindery workers and others find themselves to-day. But if the unions elect to act on the principle of each for itself, then we think it must be on an appeal to generosity rather than on a demand for justice that any claim must be based for a re-consideration of terms that have been definitely settled by agreement.

## Personal.

PRESIDENT HARDING has accepted the honorary presidency of the Press Congress of the World to be held in Honolulu next month.

M. BRIAND was visited last week by Mr. John Bell, president of the Anglo-American Press Association, and accepted an invitation to preside at a luncheon to be given by the Association on October 19th, which the British and American Ambassadors will attend.

MR. H. SKINNER, Typographical Association, has been elected a member of the new General Council, which is to take the place of the Parliamentary Committee of the Trade Union Congress.

MR. F. L. ARMSTRONG, the new general secretary of the Newspaper Society, is to commence his official duties on October 1st. It is not very clear when the offices at 10, Salisbury square will be ready, but it is understood the Society will remove into them early next month.

MR. ARMSTRONG, we are glad to know, is making satisfactory progress after his recent accident.

MR. T. E. NAYLOR presided at the sixth Municipal Conference of the London Labour party, held at Shoreditch Town Hall, on Saturday. An important transaction of the meeting was the approving of a proposal to take steps towards the formation of municipal banks for London.

MR. FREDERIC W. GOUDY, art director of the Lanston Monotype Machine Co., of Philadelphia, U.S.A., is the subject of a biographical article in the latest issue of the *Monotype Recorder*.

LIEUT.-COLONEL A. H. MOODY, who has been invited to be mayor of Stourbridge next year, is editor of the *Worcestershire County Express*, and took a leading part in obtaining the town's charter of incorporation.

## Printers' "Rally" at Reading.

Following the successful inauguration of a propagandist campaign at the Isle of Wight the previous week, the Home Counties Master Printers' Alliance, on Saturday last, foregathered at Reading.

The ladies of the party, during the holding of a business session in one of the ante-rooms of the well-equipped Town Hall, were conducted over the Municipal Museum and Art Gallery by the Curator, Mr. T. W. M. Collier, and under the able direction of Dr. Hurry, M.A., J.P., were conducted over the ruins of Reading Abbey. Both visits were greatly enjoyed.

Mr. David Greenhill, president of the Alliance, took the chair at the Town Hall meeting. Explaining the objects the Alliance had in view in undertaking the campaign in four different areas on four successive Saturdays, the chairman emphasised the need for closer federation in the Home Counties.

Mr. Potts (Hastings), who had represented the Alliance on the Wage Basis Committee in the recent wage-reduction negotiation with the various trade unions, gave an enlightening digest of the difficulties inseparable from such work. Mr. Albert Bennett supplemented Mr. Potts' statement.

Mr. A. E. Goodwin, secretary of the Federation, in a frank answer to the critical member, was convincing to the most sceptical re the vast obstacles that had to be overcome before common ground could be found in a wage-reduction movement. Realising these many difficulties, he still felt that as an organisation they had just reason to be proud of the substantial support they had received throughout the length and breadth of the country in their efforts to convince the unions that the wages of the workman in an industry were dependent on the amount of prosperity in the industry.

Mr. Goodwin dealt efficiently with several questions arising out of his remarks, and a reception by the Mayor and Mayoress (Mr. and Mrs. Denys Egginton) preceded the disposal of a daintily served and tasteful luncheon.

Adjournment was then made to Caversham Lock, where the party embarked on a trip to Henley between the banks of the beautiful Thames. Tea was daintily served on board, and the return at 6.30 brought to a close a day usefully spent with a worthy end in view and most enjoyable withal.

## DIVIDENDS AND REPORTS.

**ODHAMS PRESS.**—In a circular to the shareholders, the chairman of Odhams Press states that the profit for the six months ended June 30th is about £85,000. This, he points out, is at the rate of £170,000 per annum, which is £20,000 more than the profit for last year, despite the coal strike. Fresh capital, the chairman adds, can profitably be employed in connection with the increasing business. It is proposed to convert £225,000 of the unissued preference shares into ten per cent. cumulative "A" preference shares. "As far as possible," the chairman's circular states, "it is our intention to give the existing shareholders priority of allotment to any of the new ten per cent. preference shares."

**WINTERBOTTOM BOOK CLOTH.**—Interim at rate of 4 per cent. on ordinary; same as a year ago.

## NEW COMPANIES.

**BLADES, EAST AND BLADES, LTD. (London).**—Capital £300,000 in £1 shares (200,000 8 per cent. cumulative preference and 100,000 ordi-

nary); stationers, printers, publishers, bank note and cheque engravers, etc., and to acquire any businesses carried on (1) by Sir George R. Blades, Kt., A. F. Blades and L. H. Blades as "Blades, East and Blades," and (2) by A. J. B. Hubbard and E. S. Oram as "W. W. Sprague and Co." Private company. Subscribers: G. R. Blades, and A. F. Blades. Directors: Sir George Rowland Blades, Kt. (chairman), A. F. Blades (joint deputy chairman) and L. H. Blades (Blades directors) and A. J. B. Hubbard (joint deputy chairman) and E. S. Oram (Sprague directors).

**W. W. SPRAGUE AND CO., LTD. (London).**—Capital £20,000 in £1 shares; printers, stationers, photographers, die sinkers, bank note and cheque engravers, manufacturers of and dealers in fancy goods, artists' materials, leather and leather goods, etc. Private company. Subscribers: A. J. B. Hubbard and E. Sprague Oram. First directors: Sir George R. Blades, Kt. (chairman), A. F. Blades and A. J. B. Hubbard (joint deputy chairmen), L. H. Blades and E. Sprague Oram (all permanent).

**BOXFOLDIA, LTD.**—Capital £10,000 in £1 shares (5,000 7 $\frac{1}{2}$  per cent. cumulative preference); manufacturers of and dealers in and vendors of paper, cardboard wood or paper boxes, bags, envelopes or boxes and bags of other materials, wholesale or retail and fancy stationers, paste board and surface coloured papermakers, papier maché manufacturers, dealers in timber, cardboard and paper, etc. Private company. First directors: C. H. Foyle, S. H. Phillips and J. H. Cook. Registered office: 137A, Suffolk street, Birmingham.

**E. CROSSINGHAM, LTD.**—Capital £1,500, in £1 shares (750 participating pref. "A" and 750 ordinary "B"); manufacturers of and dealers in paper, paper and general merchants, agents, brokers, shippers, etc. Private company. Subscribers: C. Crossingham and S. Leader. Registered office: 15, Harp-alley, E.C.

**MARTIN, WEAVER AND NURSE, LTD.**—Capital £1,000, in £1 shares; paper agents and merchants, etc. Private company. First directors: A. E. Weaver, F. Martin and G. A. Nurse. Registered office: Faxfield House, 28, Watling-street, E.C.4.

**CYMPLEX CARTON Co., LTD.**—Capital £10,000, in 5,000 10 per cent. preference shares of £1 each and 10,000 ordinary shares of 10s. each; to acquire the business of a cardboard box manufacturer carried on by A. Richmond and to carry on the same and the business of

carton box manufacturers and dealers in cardboard, paper and other materials and tools and machinery used in connection therewith, printers, etc. Private company. Directors: A. Richmond and Major W. B. Ruddock. Registered office: 1, Gresham-buildings, E.C.

**JAMES WALKER (BOTTLES), LTD. (London).**—Capital £5,000, in £1 shares; manufacturers of and dealers in glass ware, all kinds of containers and receptacles, packing case and carton makers, dealers in labels, wrappers, etc. Private company. Subscribers: W. Bennett and W. K. Hollely. First directors: W. Bennett, W. K. Hollely and G. Rawlins.

### **COMPANY MORTGAGES AND CHARGES.**

Fresh Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 1908, and Satisfaction registered pursuant to Section 97 of the same Act. (The registration of Satisfaction is not compulsory).

**SWANSEA PRESS, LTD.**—Particulars of £30,000 6 per cent. debentures created and all issued September 6th, 1921, charged on the company's undertaking and property, present and future, including uncalled capital.

**HUGH STEVENSON AND SONS, LTD. (Plain and Fancy Box Manufacturers, London, Birmingham, and elsewhere).**—Satisfaction (a) to the extent of £30,100 on October 25th, 1920, of £60,000 debentures secured by trust deed dated August 13th, 1913, and a supplemental deed, and (b) in full on November 12th, 1920, of debentures dated November 18th, 1913, securing £10,000.

**NORTH-WESTERN NEWSPAPER CO., LTD. (Blackburn).**—Particulars of £20,000 debentures, authorised September 7th, 1921; whole amount issued; charged on the company's undertaking and property, present and future, including uncalled capital.

**ED. J. BURROW AND CO., LTD. (Printers, Cheltenham).**—Particulars of £5,000 debentures, authorised September 10th, 1921; whole amount issued; charged on the company's undertaking and property, present and future, including uncalled capital, subject to prior mortgage.

**JOHN S. DOWNING AND SONS, LTD. (Stationers' Sundries Manufacturers, Birmingham).**—Fourth debenture, dated September 8th, 1921, to secure all moneys in excess of £7,000 secured by a prior debenture, but not exceeding a further £1,500, making a total of £8,500 due or to become due from company to Barclay's Bank; charged on the company's undertaking and property, present and future, including uncalled capital.

**DOUGLASS AND GIBSON (1919), LTD. (Stationers, etc., Wimbledon).**—Debenture dated September 5th, 1921, to secure £500, charged on the company's undertaking and property, present and future, including uncalled capital. Holder: S. Miles, 52, Enmore-road, South Norwood.

**BRIXTON "FREE PRESS" PRINTING AND ADVERTISING CO., LTD.**—Land Registry

charge on certain land, etc., in Brixton, dated August 29th, 1921, to secure £1,300. Holders: The Misses E. M. and H. L. Raycroft, Bank-side, Leigham Court road, Streatham.

### **BANKRUPTCIES, etc.**

**RE IVOR HAMILTON MARTIN**, printer and stationer, 80, Upper Thames-street, E.C., and 94-96, Palmerston-road, Brondesbury, N.W. This debtor, who failed in June last, attended at the London Bankruptcy Court on September 20th for public examination on a statement of affairs showing unsecured liabilities £409, and net assets valued at £283. In answer to Mr. Vyvyan, assistant official receiver, the debtor said that in 1910 he and another began business in partnership as printers and stationers at Talbot House, Arundel street, Strand, under the style of the Office Supplies Company. After six months' trading the partnership was dissolved by mutual consent and he (the bankrupt) went into employment. He served in the Navy during the war, and in March, 1919, began business on his own account as a printer and stationer at 80, Upper Thames-street, under the style of Hamilton, Martin and Co. Later on he was joined by three partners and in December, 1920, they acquired additional premises at 94-96, Palmerston-road, Brondesbury, and fitted them up with printing machinery at a cost of £200. In April last the partnership was dissolved and he (the bankrupt) continued the business and assumed the whole of the liabilities. In May he closed the Brondesbury premises and sold the machinery for £80. He traded at Upper Thames-street until June 22nd when execution was levied and he filed his petition. He attributed his insolvency to labour unrest and to lack of capital. The examination was concluded.

## **Gazette.**

### **A WORD OF CAUTION.**

In giving the official Gazette information, it must be distinctly understood that we take official records as we find them, and accept no responsibility for inaccuracies, while, as an almost invariable rule, the facts will be found correct. We advise our readers, before forming hasty judgment, to consider that there may be in each case satisfactory explanation which does not appear on the records.—Ed.]

### **ENGLAND AND WALES.**

#### **PARTNERSHIP DISSOLVED.**

William Miller and James Williams, fashion publishers, 26, King-street, Manchester.

#### **THE BANKRUPTCY ACT, 1914.**

#### **RECEIVING ORDER.**

Roberts, Richard, The Book Corner, 18, Mostyn-street, Llandudno, stationer, September 22nd.

# The Bookbinder.

## The Position re Dockets.

Having temporarily run its length, our discussion on the Time Docket can now rest awhile until we ascertain its value in permanent result. Very little evidence is to hand concerning the progress of the six a side debate. Doubtless other questions of paramount importance have diverted the attention of most members of the committee from their docket deliberations. The trade looks to this committee to solve the docket problem once for all so far as its free introduction and acceptance is concerned. The approved manner in which to shelve a problem is to hand it over to committee. Usually everyone is satisfied at the decision, and in due course all the parties lost their interest and enthusiasm. Following a given time for complete evaporation of these attributes, the committee dissolves into thin air and a small chapter of industrial agitation is closed. This has not got to happen with the time docket, and all we need say at the moment is that there is scant reference to progress in either the official journals or the trade press.

## Trade Slightly Better.

Unemployment in the bookbinding industry is not so acute as it was in August. There are signs of slight improvement in trade, but very few large orders are moving, and competition for what business there is, is desperately keen. The recent wage reduction cannot be said to have yet lowered the selling price of bookbinding, which is not surprising in face of the fact that even at the existing selling prices most houses are making a heavy loss. Under normal working conditions, i.e., a full 48-hour week, the wage reduction would correspond to about  $7\frac{1}{2}$  per cent. difference in the labour cost of production. It will no doubt become the accepted policy of the trade (indeed it is already in practice) to base the charges on the lower rates, thus passing on the entire advantage to the customer. That is, of course, the sole purpose of wage-reduction, although it means continued loss without mitigation to the employer. In the end the employer will reap the benefit of an improved demand and consequently lowered cost of production. Reduced wages is but a means to an end, and that end is the resumption of normal trade and conditions.

## Prices of Binding Materials.

Bookbinding materials have in some respects resumed the downward tendency, although leathers, which are the main factor, seem to have reached a level at which they may re-

main for some little time. The list of market prices which we gave last month may be revised to read as follows: Paste grain skivers, per square foot 7d. to 10d., glazed skivers 4½d. to 7d., grained skivers 6d. to 10d., coloured basils 7d. to 11d., roller basils 7d. and 9d., fair basils 9d. to 1s., rough sheep 8d., fleshes 7d., rough moroccos 10d., rough calf 1s. 2d. to 1s. 6d., fair calf 1s. 6d. to 1s. 9d., pigskins 1s. 9d., anglos 1s. 7d. to 2s., hard grained goat 2s.

## Glues: Prices and Quality.

Bone glue has been offered at 38s. per cwt., though the better qualities for bookbinding range between 45s. and 52s. Hide glues of very fine quality are to be secured at 62s. to 65s. per cwt. When it is considered that the price of glue was at one time more than four times that of pre-war, the drop to just under twice that figure shows a remarkable reduction. Not enough care is paid by binders in the selection of their glues. Price counts for little if it does not represent efficiency. Glues are not dear simply because they cost more, inasmuch as a higher-priced glue may produce a much greater quantity of liquid glue of greater strength and vastly greater purity than a cheaper grade. A thoroughly reliable brand should be decided upon after exhaustive test, and then adhered to.

## Strawboards.

Strawboards are in the same plight that they have been in since the slump began. It is still possible to buy at any price between £6 and £10 per ton, basis, although the market price is nearer the latter figure. It will pay the bookbinder to use discretion in searching for low prices. The better grade strawboards have a smoother and more even finish and much thicker bulk than the common variety. A six-ounce fine board has often the bulk of an eight-ounce common board. Much of the stuff that is being offered at extremely low figures is unreliable, especially as to lime excess, and those users who have had experience of the effect of lime reaction on marble paper and end-leaves will appreciate the superiority of a carefully made board.

## Millboards and Leatherboards.

Millboards of vastly differing quality and character are on the market at all manner of prices. Imitation leatherboard is quoted £14 per ton, common millboard £25 to £30 per ton, English greyboards £36 to £42 per ton, and black hand-made boards £50 per ton.

## Gold Leaf and Blocking Powders.

Gold leaf is easier again, and to day's quotations for 22 ct. best deep foreign are based on 3½ in. square at 52s. 6d. per 1,000

leaves. The amalgamation of Maxwell Winter and Thorelle's, the Belgian house, appears to have been short-lived, as the business is now apparently being transacted by the Brussels firm. There are good stocks of gold leaf in London, and quotations are equally as favourable as those obtained directly from abroad. German blocking powders, foils, and schlag metals are on offer in pre-war grades, and the prices are very favourable. In the production of this class of material the German manufacturer is hard to equal.

#### Covering Materials.

Calicoes and fabrics generally have kept fairly steady for a month or so, with the exception of buckram, American cloths and patent leathers, in which cases reductions have recently been effected. Union buckrams in particular have made a rapid descent. Marble papers are not in demand, and are not likely to be until prices become reasonable. Book cloths are apparently firm, though the time should not be far distant when the 100 per cent. over pre-war line is reached. At present the margin of difference is nearer 200 per cent. Tapes and threads are still too high in price, and the policy of binders should be to buy strictly against minimum requirements.

### Improved Book-Cover Lettering.

Even apart from the question of the layout of lettering on book covers, great importance attaches to the particular face of type chosen for use in this connection. That general taste in book covering lettering has improved in recent times is the opinion of Mr. Chas. T. Jacobi. The subject of lettering on book covers and jackets having been touched on in the *Publisher's Circular*, Mr. Jacobi writes to our contemporary to express agreement with the view that "as a rule good honest type of correct form is more readable than some of the fanciful and frequently grotesque characters, specially designed, occasionally adopted for the principal lines of the jacket covers of volumes now issued by some publishers. It reminds me," he adds, "that there has been an improvement during the last twenty years or so in the choice of lettering employed on the actual binding covers of books for which I, to some extent, venture to think I am responsible. To combat the bad forms of the alphabet often used for that purpose I issued in 1899, and reprinted it in 1908, my little book, 'A Few Suggestions of Plain Letterings, etc.,' a copy of which I sent to each of the leading publishers and bookbinders, with a printed note suggesting that a reference to a given number in that pamphlet might be made when a particular style of lettering was desired, or words to that effect. In some instances I have noticed that my suggestion has been helpful."

**An Advertisement is always working.**

### Master Bookbinders' Assurance.

An interesting step in co-operative action in respect of assurance has just been taken by the Master Bookbinders' Association. Many master bookbinders have been feeling that the premiums demanded by commercial companies in respect of indemnifying them as employers of labour against the payment of claims on account of injury or death to employees, were excessive. Knowing that book-binding cannot be regarded as a dangerous trade, the work not being specially unhealthy and accidents being few and far between, the Master Bookbinders' Association reckoned that the requisite assurance could be effected at much less cost if they arranged it co-operately amongst themselves. They accordingly worked out a detailed scheme, and arrangements are now complete for this to come into operation on October 1st. It was found that, in order to meet the legal requirements of the position, the formation of a limited company was necessary, and a company has accordingly been formed under the title of the Bookbinders' Mutual Assurance Co., Ltd. (brief official mention of which was included in our Commercial Intelligence section last week). The first directors are master binders well known in the trade, namely, Mr. A. S. Colley (of A. W. Bain and Co.), Mr. E. B. Judd (Newett Bookbinding Co.), Mr. D. Leighton (Leighton, Son and Hodge), Mr. P. H. Whiting (Key and Whiting), and Mr. E. J. W. Zaehnsdorf (Zaehnsdorf, Ltd.). Mr. Hedley Miller, secretary of the Master Bookbinders' Association, is acting as secretary of the new company. Only workmen's compensation risks are covered, but in respect of these it is intended to give the same advantages as are offered by the commercial companies, though at what, it is expected, will prove to be a much lower cost. A specified premium will be payable, and at the end of each year balance in hand after payment of claims will be distributed amongst the policyholders.

THE Master Bookbinders' Association has a committee to which has been entrusted the task of preparing a system of scientific cost-finding specially applicable to the business of the wholesale bookbinder. This committee has met a number of times, and now has some tangible results to show for its labours, though we cannot say how far from completion the system still is.

We hear that warehousemen and cutters at the Armoury Works of Messrs. McCorquodale have struck work on the coming into force of the second wage-reduction made in accordance with the agreement sanctioned by their union. It seems particularly ill advised that such sectional and unauthorised action should be taken when official attention is being given to the case of those who made early acceptance of the reduction proposals.

## British Imports of Millboards.

During August the following consignments of millboards were received at British ports:—

Port of Importation.	Country whence Consigned.	Quantity. Cwts.	Value £
London	Germany	1,809	1,432
"	Finland	1,357	1,486
"	Sweden	4,430	5,652
"	Norway	951	1,193
"	Canada	1,901	8,407
"	United States	468	1,415
Liverpool	Sweden	80	117
"	Norway	85	120
"	Spain	570	825
"	Canada	2,248	5,160
"	United States	15	25

"	Germany	14	86
Glasgow	Sweden	22	82
Grangemouth	Norway	84	110
Leith	Germany	9	71
"	Sweden	126	268
Total		18,687	89,536

## Leatherboards.

The imports of leatherboards into the United Kingdom during August were as under:—

Port of Importation.	Country whence Consigned.	Quantity. Cwts.	Value. £
Manchester	Finland	380	572
"	Sweden	580	1,077
Belfast	"	101	132
Hull	Czecho-Slovakia	240	175
Total		1,301	1,856

## L.S.C. Jobbing Guild.

The opening meeting of the session was held at the Society House on Tuesday, September 20th, when Mr. E. Pheby gave an address on "Charging up Jobbing Work." This lecture was in continuation of one given earlier in the year, when the wish was expressed that the subject should be dealt with from the point of view of the compositor.

The subject was divided into several sections: the premises, the suitability of the plant, the sufficiency of the material, the lighting arrangements, physical fatigue, the human factor (skill), and the temperament of the "O." The factor of machine display composition on the Ludlow Typograph (a recent innovation in England) was discussed, and a visit has been arranged to see the machine in operation.

Several exhibits were put up and explained, and questions and an interesting discussion followed in which several members participated.

After the necessary notices had been given out by the secretary, a vote of thanks was given to the lecturer, and the proceedings terminated.

THE Spanish Printing Trade Workers have decided by 5,523 votes to 396 to continue affiliation to the Amsterdam Trades Union International.

# New Inventions.

## Applying Adhesives in Bookbinding.

In an invention patented by Mr. J. Murray, bookbinding machines are fitted with a device which ensures that the back projecting edges shall receive an adequate amount of adhesive. The gumming-roller B is formed with a longitudinal groove B<sup>1</sup>, and is supplied with gum by rollers C, D, the former of which has a projection C<sup>1</sup> adapted to enter the

groove B<sup>1</sup>. The book A is reciprocated vertically and a bar B<sup>2</sup> carrying the roller B<sup>1</sup> oscillates about a shaft B<sup>3</sup> in unison, so that the shoulders A<sup>2</sup> receive an extra supply of gum from the trough B<sup>1</sup>. The bar B<sup>2</sup> is operated by means of links B<sup>4</sup>, B<sup>5</sup>, a toothed sector B<sup>7</sup> and a reciprocating rack B<sup>6</sup>. The rollers B, C, D are actuated by helical gearing driven by wheels on the shaft B<sup>3</sup>.

## Straightening Book Covers.

In an invention, patented by Mr. J. Murray, book covers, cases, etc., which are curled owing to the drying of the glue in them are straightened prior to use in bookbinding by a roller bending machine which imparts to the covers a curvature in the opposite direction which is sufficient to neutralise the curl due to the drying effect. As shown, a pile of curved covers is placed in a hopper formed of

base bars A<sup>3</sup>, side bars A<sup>1</sup>, and vertically adjustable front bars A<sup>2</sup>, beneath which the bottom cover is fed by pusher blocks G on a slide G<sup>1</sup> which is reciprocated over longitudinal guides by means of an oscillating toothed quadrant H which engages a rack G<sup>2</sup> on the slide G<sup>1</sup>. The bottom sheet passes directly to the bending rolls D, E, F. Figs. 1 and 4, of which the rolls D, F are geared together and are positively driven, and the roll E is mounted in bearings E<sup>2</sup> drawn towards the rolls D, F by springs E<sup>1</sup> which are adjustable for the purpose of varying the extent of the bending action, so that this may

be made to conform to covers, etc., of different curvature. The roll F is also mounted in spring bearings in the form of bell crank levers F<sup>1</sup> fulcrumed in bushes on the driving shaft D<sup>1</sup> and acted on by adjustable springs F<sup>4</sup>. The rolls D, F are formed with intermeshing collars, or square screw threads of the same hand, so as to make the distance of the line of contact of the rolls D, E as near as possible to the line of contact of the rolls F, E, thereby diminishing the extent of the marginal portion of each cover which is not effected by the bending action. The finished covers are stacked automatically in a hopper which slopes towards the front K<sup>1</sup>, and towards one side K<sup>2</sup>.

## Feeding Book Signatures.

In a machine for feeding book signatures, covers, etc., as patented by Mr. J. Murray, to machines of the kind in which they are piled

on edge on a conveyor which advances them to a separating and forwarding device, the conveyor is driven normally at a speed less than the thickness of a signature for each signature fed, and a finger acting on the pile controls ratchet, clutch, or like mechanism which brings into action a quicker drive and maintains the pile in correct position. As shown, pile A is advanced over a table H by a conveyor, not shown, which is driven from a shaft C geared to the spocket wheels of the conveyor by a reducing epicyclic gear. The shaft C is driven normally from a constantly driven wheel B by means of a pivoted pawl B<sup>2</sup> geared to an operating sector B<sup>7</sup> fitted with a roller B<sup>4</sup> which engages a ramp F<sup>1</sup> to throw the pawl B<sup>2</sup> into driving connection with a ratchet E on shaft C. Normally the pawl B<sup>2</sup> after a partial rotation is tripped out of driving position by a lever G acting on a projection B<sup>6</sup> of the pawl. A spring B<sup>7</sup> maintains pawl B<sup>2</sup> stable in either position. When the pile A gets low, the lever G is moved to the position shown by dotted lines so that the pawl B<sup>2</sup> remains in driving contact and the increased rate of feed corrects the position of the pile. The lever G is controlled by a rod J<sup>4</sup> acted on by a spring J<sup>5</sup> which tends to move it to raise the lever G to the position shown in dotted lines. The rod J<sup>4</sup> is connected to a bell crank J<sup>1</sup> oscillated by a cam-reciprocated rod J<sup>2</sup> connected to it by pin-and-slot connection. The lever J<sup>1</sup> is fitted with a finger J which is normally pressed on the pile by the rod J<sup>3</sup> once for each recipro-

cation of the rod J<sup>2</sup>, and pressure of the pile on the finger J is normally sufficient to prevent the spring J<sup>5</sup> from moving the rod J<sup>4</sup> to cause the lever G to assume the position shown in

dotted lines. When, however, the pile is not advanced sufficiently, the finger J sinks into the pile and the spring J<sup>5</sup> causes the rod J<sup>4</sup> to actuate the lever G to prevent the tripping of the pawl B<sup>2</sup>, and so to increase the rate of feed to the conveyor.

## Bettering British Printing.

**The Design and Industries Association Offers  
Criticisms and Suggestions to the British Printer.**

That British printers and typefounders must in some respects mend their ways if they are to hold their ground against American and German rivals was brought out rather forcibly at a conference on the subject of printing on Monday. The conference followed the opening of the new galleries of the Design and Industries Association at 6, Queen-square, London, and there were present several of those whose names stand high among the apostles of the gospel of beauty in craftsmanship.

The walls of the rooms were tastefully decorated for the occasion so as to provide a small exhibition of the printer's work. The exhibits were grouped mainly under the heading "From the Cradle to the Grave," and consisted of examples of printing as it enters into one's daily life, the different stages and interests of life from birth to death being appropriately represented by printed matter, ranging from a birth certificate, through educational literature and school reports, wedding cards, business stationery, etc., right up to the printing required in connection with a funeral. The examples chosen served to show that, in all branches of printing, admirable results can be obtained by the application of those principles of simplicity and serviceableness for which the Design and Industries Association stands.

### **The Printer as Artist.**

The new galleries were declared open by Sir Herbert Morgan, well known for his successful efforts over about twenty years in the production of printing better than ordinary. Sir Herbert remarked that twenty years ago

printers merely had to do as they were told. He had determined to be connected with at least one printing business that was master in its own house, and told the client the type of printing that was suitable for his purpose. He thought the printer should have the dignity and status of a dressmaker. (Laughter.) We had achieved that now, and printers were called into artistic conference with their clients, and helped to shape the artistic taste of the consumer of printing and to improve the taste of the public.

The conference followed immediately upon the opening, the principal speakers being Mr. H. H. Peach and Mr. C. H. Collins Baker.

Mr. Peach prefaced his remarks by a brief résumé of the activities of the Design and Industries Association—colloquially known as the "D.I.A." Under the auspices of the Association important exhibitions have taken place in London—at Whitechapel and Camberwell—and a very successful furnished model house exhibition was arranged at Manchester. In addition, loan collections of printing and textiles have toured the leading provincial cities, and a printing exhibition has recently returned from a tour of South Africa. More than 175,000 persons have visited the exhibitions of printing, household things, textiles, etc., arranged by the Association during the current year. It should be noted, by the way, that there are no trade interests in these exhibitions, the entire services of the Association being rendered voluntarily for a definite educative purpose. It is open to printers all over the country to send in examples of their work to the D.I.A., and the best of these are impartially selected by a

committee of assessors, and passed for inclusion in the exhibitions. Nor is membership of the Association a condition. What the D.I.A. has, in fact, established on successful lines is an ever-open academy for the printing craft, constantly on tour, constantly welcoming better examples of British workmanship, and helping the public to form a sound opinion on printing.

After referring to some of the above-mentioned facts, and also citing concrete examples of the effectiveness of the D.I.A. propaganda for better printing, Mr. Peach proceeded with some interesting remarks upon British printing and the possibilities of its improvement. Workmanship alone, he said, would not save us; we must have intelligent straightforward design as well. Then mere copying of good work was not enough; it was essential to understand the principles underlying it. The education of the public in this matter was a thing of vital importance. In this respect it was regrettable that our trade press did not set a better example. Mr. Peach drew attention to the American printing trade press as showing what was possible, particularly in regard to advertisement display. We had, he said, a lot of leeway to make up. One reason for American superiority in type display was that American printers had given less attention to drawn design, limiting themselves more closely to types, and this limitation led to more sincere and cleaner work. Americans, too, had done more in adapting and improving type faces. Although this country had done fine pioneer work in typefounding, America and Germany were devoting more energy to the development of the art, with the result that we were now using American types right and left, as well as German watered-down versions of types originated here. The Americans were also showing themselves in advance of us by encouraging the installation of small printing plants in schools.

Mr. Peach concluded by appealing to printers to give their aid in the work which the D.I.A. was attempting to do. There was a trade of most illustrious traditions, and they should act in the spirit of the motto, "Share your knowledge."

---

**MANCHESTER AND TECHNICAL EDUCATION.**—Manchester will be well supplied in respect of technical education during the coming winter. In addition to the well-equipped School of Technology, advantages are offered by the various Guilds, who opened their programmes last week. On Saturday the Printing Crafts Guild paid their first visit of the season which was to Messrs. Hans Renold, Ltd., Burnage Works, Didsbury. On November 5th Mr. E. Fisher, of London, will lecture on "Automatic Devices in the Printing and Allied Crafts." "Colour and Colour Printing" will be Mr. D. Greenhill's subject on March 4th. The syllabus of the Manchester Jobbing Printers' Guild is also near completion. In addition, Manchester is actively interested in the National News Chapels Guild which has its headquarters in Liverpool.

## A Printer Lord Mayor.

Sir John Baddeley, who has been elected Lord Mayor of London for the coming year, is the senior partner of the well known firm of Baddeley Brothers, Moor-lane, E.C., die sinkers and wholesale manufacturing stationers, which he founded in 1868.

He was first elected to the Corporation of London in 1886, served the office of Sheriff of London in 1909—during which year he received the honour of knighthood from the King—and was elected Alderman of the Ward of Farringdon Within in 1912.

Sir John is a Liveryman of the Stationers, Loriners and Framework Knitters Companies. He is the author of several volumes dealing with the past history of the City, and also compiled the "Guide to the Guildhall" for which he received a vote of thanks from the Corporation of London.

## A Pension Concert.

The opening concert of the season in connection with the Camden Town Auxiliary of the Printers' Pension Corporation was held at the "Royal Arms," Gaisford-street, Kentish Town, on Saturday evening. In the absence of Mr. H. C. Bolton (the president) the chair was taken by Mr. W. A. Perkins (one of the vice-presidents), who is a member of the Council of the Printers' Pension Corporation and who had brought with him a fairly large subscription list. There was a good attendance, and a programme which gave evident delight. Replying to a vote of thanks for presiding and for his efforts on behalf of the fund, Mr. Perkins said the Council of the Corporation looked upon the work performed by Auxiliaries such as theirs as being very important, not alone on account of the money they raised but also because of the way they kept the claims of the Institution before the trade and the public generally. For that reason it was the duty of members of the Council to respond willingly when asked to assist the Auxiliaries in any way. The £32,000 per annum which the Institution was now expending in the way of benefits to the orphans, the widows, and the aged in the trade made the work of the Council an anxious one, and he appealed to them and to their friends outside to do their utmost to lessen that burden of anxiety. In conclusion, Mr. Perkins expressed regret that indisposition had kept away Mr. Joseph Mortimer, whose work on behalf of the Institution as secretary had produced such good results.

---

Mr. W. F. DE BOIS MACLAREN, director of Maclaren and Sons, Ltd., publishers, Shoe-lane, E.C., left £129,374 (personalty. £114,754).

## The Otley Printing Machine Firms.

### A Further Development.

It will be remembered that the three printing machine manufacturing firms at Otley recently amalgamated (as was fully explained in our pages), forming the new firm of Messrs. Dawson, Payne and Elliott, Ltd. It has since been considered advisable to combine their London selling agencies so as to facilitate business and to give their friends full advantage of the amalgamation. With this object in view an amalgamation of W. H. Lockett and Co., and the London Branch of Payne and Sons (Otley) Ltd., has been concluded, and the title of the new company is Dawson, Payne and Lockett, Ltd., for whom communications on general matters may be addressed either to Dean-street, Fetter-lane, E.C.4 (Telephone: Holborn 1285), or to Albion Works, 103, Farringdon-road, E.C.1 (Telephone: Holborn 607).

From this date all the accounts in connection with the two amalgamated firms will be dealt with under the title of the new company at Dean-street, Fetter-lane, E.C.4, which now becomes the address of the London agency and depot for Dawson, Payne and Elliott, Ltd., Waite and Saville's manufactures, David Carlaw and Sons, Ltd. envelope machinery, and Waite and Sheard's ruling machines.

## New L.S.C. Agreement.

An agreement has been signed between the London Master Printers' Association and the London Society of Compositors in the following terms:—

1. That there shall be a reduction in wages or bonus of 5s. per week, from and including the pay-day in the week ending Saturday, October 1st.
2. That the Case and Linotype Piece Scales be adopted, to take effect on the pay-day in the week ending October 15th.
3. That the Overtime limit be reduced from 32 hours to 24 hours in each four weeks, with a maximum of nine hours in any one week, to take effect from and including the bill written in the week ending October 15th.
4. That the rate for Regular Night Ships (fortnight or more) be time and a third, all other conditions being as in the Joint Agreement of January, 1920, to take effect on the pay-day in the week ending October 15th.
5. That conferences be held in October to consider the Monotype Piece Scale and the Apprenticeship question.

A new publishing firm is being formed under the title of Chapman and Dodd, Ltd., with offices at 25, Denmark-street, London, W.C.2.

## Printers Visit Tunbridge Wells.

### Home Counties Alliance Outing.

The third of the enjoyable outings arranged by the Home Counties Alliance of the Federation of Master Printers took place on Saturday, when some 75 printers and their ladies visited Tunbridge Wells. Gathering at the Pump Room at 11 a.m., the master printers held a conference at 11.15, representatives of the Alliance on the Wage Basis Committee and Mr. A. E. Goodwin, secretary of the Federation giving some account of the recent negotiations, and answering questions and solving difficulties.

After a reception by the Mayor and Mayoress of the Borough (Mr. Councillor Willmot, J.P., and Mrs. Willmot), the visitors enjoyed a tastefully served luncheon, at which Mr. David Greenhill, chairman of the Alliance, presided. Following the loyal toast, the president gave the toast of "The Mayor and Mayoress," graceful response being made by the Mayor. Mr. R. A. Austen-Leigh gave "The Home Counties Alliance," and Mr. Albert Bennett, president of the Alliance, responded.

The party then proceeded by char-a-banc to Crowborough Beacon and other places of interest in the neighbourhood, a very pleasant drive ending in a return to the Pump Room for tea, when hearty thanks were expressed to the Tunbridge Wells Master Printers' Association for their share in the hospitality of the occasion.

The visitors brought away with them a choicely printed illustrated souvenir programme, the work of Mr. Arthur Dee, of the Reliance Press, Southborough.

## Low German Quotations.

The Acting High Commissioner for Australia has received cable advice intimating that commercial houses report that German traders, irrespective of existing Australian barriers, are making a keen effort to secure business. Their offers are temptingly low, some quotations being one-fourth of the prices at which British and Australian-made goods are now being retailed in Sydney and Melbourne. One effect of the German circulars is the hardening of the demand for drastic anti-dumping legislation.

MR. EDWIN TRUEMAN, editor of the Ilkeston *Pioneer*, at Ilkeston County Court last Thursday, obtained a verdict for £12 odd against Joseph Webster, a member of the Nottinghamshire Miners' Association, who, at a miners' meeting on May 23rd, was stated to have pushed plaintiff along the ground for forty yards because he would not leave the meeting when requested.

**Some of Messrs. Waterlow and Sons' Employees in Fancy Dress.**

An interesting Group taken in connection with the Watford Hospital Saturday Effort reported on the opposite page.

## Printers in Fancy Dress.

### A Successful Hospital Effort.

The funds of the Hospital Saturday Fund will benefit, we understand, by about £100 as the result of a fancy dress procession and burlesque football match carried out last week by the Watford employees of the well-known printing works of Waterlow and Sons. The accompanying photograph of some of the participants bears evidence of the enthusiasm and skill which the amateur comedians brought to their charitable task.

The proceedings started early on Monday evening with a procession from the works in Milton-street to the West Herts football ground, which had been kindly lent for the occasion. Notable in the procession, besides many irresistibly comic items, were the car which carried Britannia seated upon her throne, bearing a trident, and surrounded by a band of faithful stalwarts, and the hospital car, showing a youthful figure on a bed receiving attention at the hands of white-clad nurses. With the aid of a band, the procession succeeded in drawing a big concourse of spectators to the burlesque football match, for which Sir William Waterlow kicked off. The match, with a mock bull fight at half time, prove hilariously funny, and at the close of the match a torch-light procession was formed upon the ground, and marched back triumphant to headquarters. The employees' band of Messrs. Waterlow and Sons, Ltd., rendered selections during the evening.

## The Need for Reduced Postage.

### Postcard Publishers' Action.

Public attention is being effectively drawn to the large amount of unemployment in the picture post card industry consequent upon the increases in the postal rates. The matter is of vital urgency especially in view of the likelihood of still further additions to the number of unemployed unless some assurance is given immediately that the three-halfpenny postal rate for post cards is to be reduced. A striking appeal to the Government was made by an influential gathering of picture post card publishers held at Raphael House last Thursday, under the presidency of Sir Adolph Tuck. The following resolution was unanimously passed:—

"This representative meeting of publishers of picture post cards respectfully urges upon the Government an immediate reduction of the prohibitive 1½d. postage rate on picture post cards, which from the day it took effect—viz., June 13th—has led to a loss of sale throughout the United Kingdom of upwards of 50 per cent., causing serious losses to the publishers, wholesalers, and the many

thousands of retailers throughout the country, and unemployment to thousands of workpeople in the printing, papermaking, and process block-making trades, as well as to many artists and photographers connected with this promising British picture post card industry.

"This meeting unanimously agrees that such unemployment can only become further intensified during the coming winter seeing that picture post card publication is at a standstill, and publishers must be assured of such reduction in the postage as will warrant them in again incurring the very considerable expense of preparing and producing the necessary editions of new designs for the coming year at marketable prices. By this action the industry would recover, labour would immediately benefit, and the considerable export trade in picture post cards would be maintained and developed."

It was decided that the resolution should be telegraphed to the Prime Minister at Gairloch and circulated among all the members of the Government.

Sir Adolph Tuck told of his many communications with the Postmaster-General, and said that the last reply he had received had indicated that there was no prospect of an announcement on the subject of reduction of postal rates being made in the immediate future. The post card publishers have now made public their demand that in the interests of the unemployed as well as of British export trade something should be done in this matter without delay. We are glad to see that the Press in general is giving needed publicity to this question of the postage muddle. Besides *The Times*, to whose statements on the subject we refer in our "Current Topics" page, the *Manchester Guardian* has given considerable space to the subject, throwing its great influence into the scales against the dear postage which is having such a detrimental effect on industry in general and the printing trade in particular. Drawing attention to the "immense falling-off" in the use of postal advertising and other business uses of the post, the *Manchester Guardian* well states that this move of the picture post card publishers "is the beginning of a movement which may easily spread to a larger demand for reduced postal rates."

AFTER being in circulation since August 15th, 1918, the *Wages Board Gazette*, issued from the offices of the Agricultural Wages Board, made its last appearance on Saturday. The *Gazette* was primarily designed to provide a chronicle of information for the use of those engaged in the administration of Part II. of the Corn Production Act, and replaced a large number of separate documents. When it was placed on sale later it obtained a large number of regular subscribers, and the balance of unexpired subscriptions will be refunded by the Ministry of Agriculture forthwith.

"FAMOUS Amateurs in Art," are discussed in a very well illustrated article by Mr. A. B. Cooper in the October *Pearson's Magazine*.

## Printing Notes from 'Australia.

**Municipal Printing — Printing Trade Wages — Newspaper Development — Stationery Imports — "Books" and Import Duty — Edwards-Dunlop Progress — State Bookselling.**

(From Our Sydney Correspondent.)

A SCHEME for the purchase of additional machinery to enable the Sydney City Council to do all its own printing and bookbinding has been deferred.

THE question of wages in the Australian printing industry was in a very unsettled state in August. Westralian printing workers demanded advances of about 25 per cent. upon the existing wages ranging round about £5. Workers in the New South Wales process engraving industry demanded in August advances of about 30 per cent.

THE Melbourne *Herald* newspaper is anticipating development by a big forward movement in respect of its mechanical equipment.

AN interesting ceremony, marking an important stage in the development of the *Herald* and *Weekly Times*, Ltd., took place in the machine-room on August 5th when Mr. Theodore Fink, chairman of directors, pressed the electric button, and started the Goss printing press which has just been installed. This increases to six the number of presses in use in the *Herald* office—five Goss and one Hoe, the last-named being employed in the production of the *Weekly Times*. The running speed of the five Goss machines is 5,000 copies of the *Herald* per minute.

IMPORTS of paper, stationery, etc., for the eleven months to May last show a great increase in the value of the goods received. The total of £8,405,380 compares with £3,637,685 in the corresponding period of the previous year, an increase of £4,767,695.

CRITICISM of the Postal authorities continues over their varied definitions of a book in relation to an import duty. It is urged that numerous publications which cannot be regarded by any sane person as anything but books have been classed as "printed matter," and on these the department is charging 8d. per lb., instead of 4d. The amazing part of the business is that, whilst Buffalo Bill stories can be sent at the lower rate, valuable educational works are charged twice as much. Even a novel produced under the joint authorship of two or more persons is classed as a compilation, and has to pay 8d. per lb. The undoubted effect of these restrictions is to place a premium on Australian publications, which, with a much narrower

circulation, are not so well able to bear the heavy imposts as overseas productions with a wider circulation.

A DUTY on books would be indefensible, says the *Sydney Daily Telegraph*. The proposal is a preposterous example of the argument that at all hazards the "money should be kept in the country." Books have increased in price since the war, and are already beyond the ordinary purse. The proposed duty would be a tax on knowledge, which is of no use unless it be well spread, and it would be paid, for the most part, by parents who have to pay for school books, and are already confronted by an increase in school fees.

INCREASED net earnings are disclosed by the financial statement of Edwards, Dunlop and Co., Ltd., for the year ended April 30th last, when its figures are compared with those of the balance sheet bearing even date in 1920. In the latter period the amount cleared was £61,329, and in the earlier £54,767. The directors report that during the first half of 1920 the cost of paper rose very greatly in the producing centres. There had since been a fall, but "latterly the market seems to have steadied somewhat."

THE proposal in New Zealand to supply school books and requisities at cost price to parents through education boards is meeting with strong opposition by booksellers. Replying to a deputation, the Minister for Education at Wellington (the Hon. C. J. Par) said he did not approve in a general way of the intervention of the State in any business that could be conducted better by private enterprise, but there could be no hard and fast rule on the point. The proposal that was being opposed by the deputation was that books and stationery required in the schools should be supplied to the children at cost price instead of at the manufacturers' price, plus the wholesalers and the retailers' profits. The idea was not a new one. It had been discussed very fully for several years, and it had the support of education boards and school committees throughout the Dominion.

THE Minister pointed out that in Canterbury the Education Board was already supplying book and stationery to the children through the school committees. The board bought its supplies from a wholesale house, not from the manufacturers as now proposed, and it was able to effect a substantial saving for the parents as compared with the prices formerly charged by retailers.

IN reply to a suggestion from the deputation that in the event of the Government entering the business it should take over the retailers' stocks of school books and stationery, the Minister said he would not make any definite promises, but he could give an assurance that the interests of the booksellers would receive fair attention. He did not anticipate any change would be made as far as next year was concerned.

# Trade Notes.

ONE fatal accident in the paper, printing, etc. group of trades is reported in August.

A NEW paper, the *Boys' Pictorial*, will be issued on October 11th by the Odham's Press.

A NEW monthly magazine, the *Beacon* (2s. 6d., imp. 8vo., 64 pages), is published by Mr. Basil Blackwell, of Oxford.

DUE to appear this month is a new review, *Looking Forward* (2s.), devoted mainly to the discussion and explanation of world affairs. Mr. Hamilton Fyfe is the editor.

AT the well-attended monthly meeting of the Printers' Managers and Overseers Association, on Tuesday, a short but important business agenda was followed by a much-appreciated concert.

MONDAY next, October 12th, is the date of the festival dinner of the Newsvendors' Benevolent Institution. Mr. C. H. St. J. Hornby, who is this year's chairman, is appealing for donations to be sent to him at Strand House, W.C.2.

THE October meeting of the South-West London Master Printers' Association is to be held on Tuesday, the 11th inst., at Stanley's Restaurant, 237, Lavender-hill, S.W., at 7 p.m. Mr. W. H. Burchell is to discuss further the subject of "Office Management."

IN the Vacation Court last week, Mr. Justice Swift heard an application by the proprietors of the *Hull Daily Mail* to restrain the proprietors of the *Hull Daily News* from using the words "Late City" in connection with the last edition of their paper. His Lordship gave defendants a week in which to answer the evidence, but meanwhile disallowed their use of the words "Late City."

**DISTRIBUTORS' STRIKE.**—A "lightning" strike affecting several thousand men in the newspaper distributing trade in London, was declared last Thursday, and at one time it seemed possible that it might spread to the printing trade in London and the provinces. Leading firms of distributors were affected, but before many hours had elapsed the dispute was temporarily settled, and the men returned to work. Negotiations in the matter are continuing this week between the newsagent employers and the Printing and Paper Workers' Union.

**BOOK-PRINTING IN GERMANY.**—In view of the high costs of printing, Mr. Oscar Brown-ing wrote to the *Manchester Guardian* last week suggesting the advisability of giving to German printers and binders the work English printers apparently did not want. Messrs. George Allen and Unwin, Ltd., replied that they had arranged for certain books which they could not otherwise re-issue to be printed in Germany, but they went on to draw attention to the great difficulties interposed by the reparations duty and British Custom-house methods.

MR. JAMES DUFF MILLER, editor and proprietor of the *Forres Gazette*, has died, aged 77.

MR. CHAS. E. THOMAS, bookseller and stationer, of Worthing, has retired from business.

THE October *Royal* contains the usual good measure of profusely illustrated and interesting light reading.

MR. WILLIAM RODGER, formerly a well-known newspaper proprietor, of Wigan, has died at Dunedin, New Zealand.

THE printing and allied trades occupy the seventh place among the principal industries of South Africa, employing as they do 6,092 workpeople.

MR. GEORGE FREDERICK KIRKMAN, of the Bungalow, New Ferry, for nearly fifty years proprietor and editor of the *Protestant Standard*, who died on July 19th last, aged 96 years, in comparative poverty, left only £39.

MR. ROBERT CUMMING ANNAND, J.P. (68), of Woodville-road, Ealing, W., formerly managing director of the Northern Press and Engineering Co., South Shields, and inventor of numerous improvements in newspaper printing machines, left £7,096.

**RARE BIBLES.**—Mrs. C. M. Yellowlees, of Larbert, has presented a "Breeches Bible" to Stirling Public Library, a "Bishops' Bible," the *Manx Bible*, 18.9, and the English Hexapla, exhibiting the six important English translations of the New Testament, with the original Greek text after Scholz.

THE *Off-License Journal*, official organ of off-license holders, is now published. The editorial and advertisement offices are at 3, Pemberton-row, Fleet-street, E.C. The journal is printed for the proprietors by Goodall and Suddick (1916) Ltd., of 180, Fleet-street, and Victoria Works, Otley.

FOR some thirty years a valued member of the staff of the *Daily Telegraph*, Mr. Edward John Goodman has died at the age of 84 years. He gained some fame as novelist and dramatist, was one of the oldest surviving members of the *Savage Club*, to which he was elected in 1874, and of which he acted as honorary secretary from 18.9 till 1886.

MR. JAMES O'DONOVAN, one of the best-known journalists in Fleet street, and for 13 years a member of the editorial staff of the *Daily News*, died at his home, 84, West-side, Clapham Common, last Friday night, after a few days' illness. He was 56 years of age. He was an indefatigable member of the National Union of Journalists, and was in turn chairman and secretary of the Central London branch, and was the London area's representative on the executive council.

THE funeral of Mr. James O'Donovan took place at Golders Green. Representatives of the *Daily News* and the *Irish Independent* attended, and Mr. T. Foster was present on behalf of the National Union of Journalists.

## FORTY-THIRD YEAR.

*Printed and Published EVERY THURSDAY*  
by **STONHILL & GILLIS,**  
at 58, Shoe Lane, London, E.C. 4.  
**Tel.: Stonhill, Fleet, London. Phone: 3407 City.**

**SUBSCRIPTION: Per Annum, 8s. 8d. (POSTAGE EXTRA).**

### Charges for Trade Advertisements:

(Full page 8 by 5½, ins.)

Whole Page ...	£4 10 0	s. d.
Half Page ...	2 10 0	
Third Page ...	1 17 6	
Quarter Page...	1 10 0

An Extra Charge for Cover and Special Positions.  
Discounts according to Number of Insertions.

Representatives throughout the United Kingdom and  
also in Australia, India, South Africa, United States  
Canada, etc.

All communications for the "BRITISH AND COLONIAL  
PRINTER AND STATIONER" should be addressed and  
Cheques and Post Office Orders made payable to—  
**STONHILL & GILLIS, 58, SHOE-LANE, LONDON, E.C. 4**

Copies may be purchased at the Offices, as above  
or from Messrs. W. H. Everett and Son, Ltd., news-  
agents, 11, St. Bride-street, E.C. 4.

THURSDAY, OCTOBER 6, 1921.

# Current Topics.

## Wages Dispute Ended.

LAST week it was possible to report that the long-drawn-out wages struggle had been brought almost to complete settlement. The most important trade union that had still to complete its ballot was the National Society of Electrotypers and Stereotypers. Intimation has now been received that this ballot also has resulted in the acceptance of the terms offered. Definite decisions having at last been reached in respect of all points in dispute, it may be hoped that there will now be less of that spirit of unsettlement abroad which is so inimical to the most efficient conduct of the industry. As regards the proposal of the National Union of Printing, Bookbinding, Machine Ruling and Paper Workers, also of the Amalgamated Society of Lithographic Artists and Designers, that the second reduction of 2s. 6d., which is now operative, should be deferred until January, 1922, we are informed that very careful consideration was given to this re-

quest and the question was fully discussed in all its bearings upon the present situation and on future negotiations. When the matter was before the Council of the Federation of Master Printers a very able statement of the trade union case was, we hear, put forward by Mr. G. Harraway, Mr. T. G. Newland and Mr. R. Kneale. It was pointed out, however, that the employers had not desired a separate settlement, being in favour of national agreements. They had in their ranks, moreover, employers in some districts who were dissatisfied with the small reduction secured, and were intimating their intention of making local arrangements in the matter of wages. It was finally decided that it was in the best interests of all concerned to adhere to the settlement which has been made, and that the dates as originally agreed could not be departed from. It is to be hoped that the whole industry will now settle down in earnest to the task of bringing in a more prosperous era in the printing trade, the employers doing their utmost to ensure an increased volume of work, and the workers seeking to give that betterment of output which can do so much to reduce costs, and so contribute to more satisfaction for all concerned.

## Post Office "Economy."

PICTURE post card publishers, as reported on another page, are making a determined effort to secure immediate consideration for the urgent question of postal rates, in regard to which some definite promise of decrease would do much to save the printing industry from further detriment—detriment which is bound to result if potential customers must calculate on a continuation of the present high rates for post cards and printed matter. The recent experiments in economy on the part of the Post Office—by means of increasing postal rates and curtailing week-end postal facilities—have already called forth some very destructive criticism from the business community, as we have indicated in these columns. Protests against the policy of trying to increase Post Office profits at the cost of untold detriment to the country's trade continue to multiply, and concerted efforts are being made to ensure the hoped-for early return to more healthy postal arrangements. Among public bodies active in this matter of exposing the uneconomical nature of this "economy" may be mentioned the London Chamber of Commerce, the Association of Chambers of Commerce, the Incorporated Society of Retail Distributors, the Incorporated Society of British Advertisers, Ltd., as well as organisations we

have previously mentioned, including the Federation of Master Printers. The allied industries have, of course, been specially hit by this costly experimentation, a big blow having been dealt at the practice of direct advertising, as also at other uses of the printer's products.

• • •

### Immediate Action Demanded.

THE advantage which present postal rates give to our foreign competitors is emphasised in a letter by Sir Adolph Tuck in *The Times*, in the course of which he says that next year's overseas trade in picture post cards is entirely dependent on an almost immediate announcement that postage is to be reduced, for unless new designs are now prepared ready for shipment early next year, this trade will go to France and Germany, where picture post card publishers, owing to their favourable postage rates, are in a position to print full editions, which enable them to offer their post cards at prices acceptable to the public. Sir Adolph adds that the increased rate on picture post cards (now three times what it was before the war) has not only lessened trade, but caused widespread unemployment. Since the postage was raised from 1d. to 1½d. the industry has fallen off by 50 per cent. As a natural result half the stocks prepared for the season have been locked up in the hands of the publishers, and thousands of artists, process block-makers, paper workers, and printers have been thrown out of work for whom work could readily be found if a definite decision on the reduction of the postage on picture post cards to 1d., or, better still, to ½d., were taken. *The Times*, we are glad to note, takes the matter up in an editorial article, in which the statement is made that "the Estimates for next year's Post Office Budget will probably announce certain concessions with regard to postal facilities." The article concludes with the following paragraph which deserves to be underlined: "If the change is to be made in the next Post Office Budget, the fact should be published without delay. By that means the harmful effects of a policy which has been shown to be halfpenny wise and pound foolish may be to a certain extent nullified, and business men will be able to make arrangements for the future which they dare not undertake till they are sure of their ground."

MR. HERBERT SIDEBOTHAM is shortly to sever his connection with *The Times*, and to join the editorial staff of the *Daily Chronicle*.

## Personal.

TWENTY-FIVE years ago on Monday, died William Morris, to whose idealism the printer's craft owes a great debt of gratitude.

MR. R. A. AUSTEN LEIGH, president of the London Master Printers' Association, and vice-president of the Federation of Master Printers, was welcomed as the British representative to the first annual congress of the Belgian Federation of Employers in the Book Industry and the Printers' Union of Antwerp, which opened on Monday at Antwerp.

MR. A. E. GOODWIN, secretary Federation of Master Printers, and Councillor W. B. Wykes, of Leicester, paid a special visit to the Bristol Master Printers' Association on Monday, the wages situation being the principal matter of discussion.

MR. F. O. ROBERTS, the T.A. Parliamentary representative, is on a visit to Jersey assisting in the inauguration of the Jersey Labour Party.

MR. CHAS. T. JACOBI is to deliver a lecture entitled "The Charles Whittingham Press at Chiswick, 1810-1852: Its history and Influence," in the Hogarth Hall, Chiswick Town Hall, on Tuesday, October 11th, 1921, at 8 p.m. Mr. Jacobi, whose long association with the Chiswick Press is well known, will illustrate his lecture by lantern slides; it is sure to be of great interest to all concerned in the art of book production.

MR. A. E. JARVIS, president of the Printers' Managers and Overseers Association, and Mr. W. I. Burch (Lanston Monotype Corporation, Ltd.), will occupy the chair at the bohemian concert on Monday, October 10th, at Cannon-street Hotel, in an effort toward the completion of the Association's third pension, of which £400 is still required.

MR. GALLOWAY FRASER retired on Saturday from the editorship of *Tit-Bits* after thirty years in that capacity.

MR. W. A. PERKINS presided on Saturday afternoon at St. Bride Institute at the annual meeting of the Society of Somerset Folk in London, of which he was elected chairman for the fourth year in succession.

MR. ST. JOHN HORNBY, who is to take the chair at the News-vendors' Benevolent banquet on the 12th, is not only a partner of W. H. Smith and Son, but is a master printer. He was the founder of the Ashdene Press, which is associated with some magnificent printing, which gives it a secure place in the story of the development of the printing art.

# Commercial Intelligence.

## CURRENT SHARE PRICES.

**Amalgamated Press**, 5½; **Associated Newspapers, Ord.** (7 p.c. Cum Pref.), 17s., Pref., 14s.; **Jos. Byrom**, 12s. 6d.; **Daily Mirror Newspapers**, 8 p.c. Cum. Pref., 18s. 3d.; **John Dickinson**, 1st Pref., 52; **Financial News**, 6 p.c. 2nd Pref., 10s. 9d., Pref., 11s. 6d.; **Ilford**, Pref., 15s.; **Illustrated London News**, Pref., 6s., 1st Deb., 45. 45½; **Lamson Paragon**, 16s., 10 p.c. Cum. Pref. (paid up by instalments), 21s. 1½d.; **Linotype A Deb.**, 55½; **George Newnes**, Pref., 11s. 6d.; **Odham's Press**, (s., 9s. 4½d., 8 p.c. Cum. Pref., 16s.; **Sunday Pictorial Newspapers**, Pref., 16s. 6d.; **Raphael Tuck**, 16s. 3d.; **Wall-Paper Manufacturers**, 11s. 3d., Def., 5s. 0½d., 5s. 6d., Pref., 10s. 9d.; **Wiggins, Teape and Co.** (1919), 14s. 6d.; **Wyman and Sons**, Pref., 12s. 6d.

## DIVIDENDS AND REPORTS.

**INTERNATIONAL LINOTYPE**.—Interim dividend of 2½ per cent. to September 30th, 1921. Dividend warrants will be posted on October 31st next to the stockholders standing on the registers on October 1st, 1921.

**JOHN DICKINSON AND CO., LTD.**—John Dickinson and Co. announce an interim dividend of 2½ per cent., less tax, on ordinary shares, payable October 1st.

**BURNLEY PAPER WORKS**.—Dividend of 9d. per £1 shares. For 1919-20 dividend of 35 per cent., free of tax. In October last bonus of 100 per cent. in shares was distributed.

**C. DAVIDSON AND SONS (LTD.)**.—The disposal balance of profit for the year ending July 31st, 1921, after making allowance for repayment of Excess Profits Duty, is £4,823 6s. 6d., of which £2,209 8s. 6d. was distributed per interim dividend in April last, and the directors recommended that the remainder be disposed of as follows:—(1) By writing off depreciation the sum of £1,000; (2) by leaving the remainder, £1,613 18s., at the credit of profit and loss account.

## NEW ISSUE.

**RONEO, LTD.**.—The Imperial and Foreign Corporation, Ltd., having purchased 160,000 10 per cent. cumulative preference shares of £1 each of the above undertaking, now offers the

same for sale at par. **Roneo, Ltd.**, which was formed in 1908, manufactures Roneo machines, office furniture and equipment. Since June, 1919, upwards of £180,000 has been spent on the creation and equipment of new works, and it is in consequence of this expenditure which is now completed, and of the larger stock now carried, that the creation of the shares now offered is necessitated. The company's balance sheet at June 30th last showed a surplus of assets amounting to £638,688, which sum, after deducting the total amount of the 6 per cent. preference shares, is sufficient to cover the 10 per cent. preference shares over three times.

## NEW COMPANIES.

**MASTERS AND FRANCIS, LTD.**—Capital, £1,000 in £1 shares; stationers, printers, paper bag, account book and box-makers, etc. Private company. Subscribers: C. P. Masters and F. S. Francis.

**A. AND F. DENNY, LTD.**—Capital, £15,000, in £1 shares, to take over the business of a bookseller and newsagent carried on by F. A. Denny, at 147, Strand, W.C., as "A. and F. Denny." Private company. Subscribers: J. C. Gardner and W. E. Burnley. First directors: J. C. Gardner (chairman), H. E. Alden, F. A. Denny (managing director), and A. J. Slatter.

**HARVEY COOKE AND CO., LTD.**—Capital, £500, in £1 shares, to acquire the business carried on at 61, Cheapside, E.C., as Harvey Cooke and Co., and to carry on the business of manufacturers of and dealers in duplicating machines, etc. Private company. Subscribers: A. E. Cooke and D. M. Lyons. Registered office, 61, Cheapside, E.C.

## COMPANY MORTGAGES AND CHARGES.

Fresh Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 1908, and Satisfaction registered pursuant to Section 97 of the same Act. (The registration of Satisfaction is not compulsory).

**WALLASEY PRINTERS, LTD.**—Issue of September 21st, 1921, of £400 debentures, part of a series already registered.

**R. ACKRILL, LTD.** (Printers).—Memorandum of Deposit on September 16th, 1921, charged on various properties in Harrogate, Pateley Bridge and Ripon (subject as to part thereof to prior mortgages) to secure all

moneys due or to become due from company to prior mortgages to secure all moneys due or to become due from company to London Joint City and Midland Bank.

J. WEINER, LTD. (Printing, etc., London).—Satisfaction in full on September 21st, 1921, of debentures dated April 20th and May 2nd, 1910, securing £2,500.

NATIONAL PAPER AND PULP Co. (1920) LTD. (London).—Satisfaction to the extent of £4,250 on August 9th, 1921, of debentures dated January 10th, 1921, securing £200,000.

"DAIRYMAN," LTD. (newspaper proprietors, London).—Particulars of £600 debentures, created September 2nd and all issued September 23rd, 1921, charged on the company's undertaking and property, present and future, including uncalled capital.

## Gazette.

### A WORD OF CAUTION.

In giving the official Gazette information, it must be distinctly understood that we take official records as we find them, and accept no responsibility for inaccuracies, while, as an almost invariable rule, the facts will be found correct. We advise our readers, before forming hasty judgment, to consider that there may be in each case satisfactory explanation which does not appear on the records.—Ed.]

### ENGLAND AND WALES.

#### THE BANKRUPTCY ACT, 1914.

#### RECEIVING ORDER.

Frederick John William Leaney, 9 and 10, St. Bride's-avenue, Ludgate-circus, E.C., wholesale newsagent. September 28th. Public examination, January 13th, at Bankruptcy-buildings, Carey-street, W.C.

Abraham Barker, 33, Water-street, Black-burn, paper bag merchant. September 29th.

THE Baker Sales Co. of 200, Fifth-avenue, New York City, have added yet another branch to their list. Their new branch is to be found at 23, Farringdon-avenue, London, E.C.4, and is in charge of Mr. F. M. Bashelier, who is the inventor of printers' furniture made of steel. They are specialists in the manufacture of printers' furniture composed of all steel, type cases and composing tables that are the very latest in design, fitted throughout with electric lighting installation, so that on any drawer being pulled out the light is thrown directly on the article required. The above company have also on the market all-steel metal trucks which are invaluable for users of monotype and linotype slugs and metal. Every composing-room should be fitted with these trucks which are made to withstand severe usage, and which can be turned in their own space. Besides manufacturing steel equipment, the Baker Sales Co. also turn their attention to wood furniture and fittings. Printers would do well to send for illustrated catalogue for the most up-to-date equipment which is claimed to take up a very small percentage of floor space.

## Up-to-date Numbering Machines.

Before the war the manufacture of numbering machines was largely in the hands of the Germans. What our former enemies are doing now in the way of supplying these necessary and useful adjuncts to industry may not be generally known. At all events, several British firms are stepping into the breach with some clever and up-to-date contrivances. Among these may be mentioned the firm of Messrs. E. W. H. Stanleigh, of 23, Bartlett's-buildings, Holborn-circus, E.C.4. Mr. Stanleigh claims that his productions are of British manufacture throughout, and since the war he has been aiming to place on the

market an article which for simplicity, accuracy and durability embraces all the best principles known in numbering machine construction. The automatic numbering machine (illustrated herewith) is of special make and has five actions, being capable of doing work in consecutive, duplicate, triplicate, quadruplicate and repeat numbering. Other productions of the firm are rotary tram ticket numbering machines, also an appliance for printing off the roll for cinema tickets, type-high numbering machines, etc. Another feature of the firm's enterprise is that special machines can be made to order to meet any requirement, whether they be operated by hand, rotary or cylinder.

UNEMPLOYMENT IN NORWAY.—Official returns up to the end of June last show that in that month 90 per cent. of 2,589 workers in the Norwegian printing trade were unemployed. This shows a slight improvement on the May percentage of 97, but compares badly with the figure of 0.4 for June, 1920. Of 845 bookbinders, no fewer than 26.4 per cent. were unemployed at the end of June as compared with 27.6 per cent. in May and 0.7 in June, 1920.

## Printing, Bookbinding & Kindred

### TRADES OVERSEERS' ASSOCIATION.

#### Members' Reunion Smoker.

In accordance with the custom extending over many years the Association inaugurated its winter's activities by a members' reunion "smoker" on Tuesday evening. The function this year was held at the newly-appointed Manchester Hotel, Aldersgate-street, E.C. The choice of venue gave evident satisfaction, for there was a large gathering of members and friends, and the extempore musical items, enjoyable in every way, were contributed by members and friends. The pauses occurring between the various turns were taken full advantage of to engage in social intercourse together with the genuine display of that spirit of fellowship which is one of the strong features throughout the membership. The president (Mr. A. W. Hunt) occupied the chair, and the vice-president (Mr. H. Milton) ably supported.

Before the concert commenced the following new members, on the proposition of Mr. A. E. Walters, seconded by Mr. W. Venum, were elected to membership: Mr. E. J. Stockwell (warehouse), Chas. Pearson and Son; Mr. J. W. Papworth (binding), Burrup, Mathieson and Son; Mr. F. W. Welch (binding and ruling), Clements Newling; Mr. G. W. Sutliff (packing and despatching), John Rissen; Mr. H. E. Phipps (cloth forwarding), Webb, Son and Co., and Mr. J. A. Esler (binding and ruling), Brendon's, Plymouth.

The new members received from the president warm words of welcome.

#### The Concert.

The concert artistes included the following: Mr. Archer, jun. ("Sincerity," "Big Ben," "Because"); Mrs. Mordente, Mr. Miles and Mr. Cox, piano, violin and 'cello trio ("Selection from the Bohemian Girl," "Danse de Forest"); Mr. Jarvis (Galloping Dick, "Old Barty," "Thank God for a Garden"); Mr. Fox ("A Clean Sweep," "The Ideal Home"); Mr. Walker ("My Mary," "It's Nice to Get Up in the Morning"); Mrs. Mordente, piano-forte solos ("Sans Souci," "Petite Rhapsodie"); Mr. A. W. Hunt ("Peter Henry"); Mr. Gilbert Chester, who capably undertook the duties of accompanist, was also successful in two monologues ("Posters," "You Don't Take a Sandwich to a Picnic").

After the singing of Auld Lang Syne and the National Anthem a very successful evening's entertainment was brought to a close.

At the usual October meeting of the Association of Master Printers of South-East London, at the Bridge House Hotel, London Bridge, S.E., on Tuesday next, at 4 p.m., Mr. Edward A. Dawe, of H.M. Stationery Office, will deliver a short lecture on "Pertinent Points on Paper."

## The Model 4 Linotype.

All printers will be interested in the new booklet descriptive of the Model 4 Linotype. Following an illustrated description of the machine are a number of pages showing specimens of work set on the Model 4 Linotype, including bookwork, catalogue work, magazine advertisements, price lists, and representative jobs of a similar nature. These specimens are so arranged that they not only demonstrate the excellency of the product of the modern Linotype, but also indicate the wide capacity of the machine and the number of founts made available to the operator without magazine change. We understand there is practically no limit to the number of combinations of type faces which can be obtained in this way, and certainly the few examples shown serve to demonstrate the capacity of the machine. Suggestions are also made for display, general jobbing, and headline equipments, the examples given providing some indication of the remarkable flexibility of the machine in producing a wide range of type matter.

The booklet also contains examples of display more particularly interesting to newspaper proprietors. An interesting feature in this connection are the examples showing how two advertisement displays are obtained from single magazine equipments of matrices, an arrangement which enables an office producing a morning and evening newspaper, or a daily and weekly newspaper, to give a distinctive type dressing to each.

The booklet is, of course, entirely Linotype set, and thus has the additional interest of giving to the printing trade another example of Linotype Typography.

## "Alco" Plates for Lithography.

A matter of interest to all lithographers is the introduction on the market of "Alco" plates, by Messrs. Algraphy, Ltd., of Philip-road, Peckham-rye, S.E.15. We mention below a few of the special properties introduced which will appeal to both buyer and operator instantly. The plates in question are quite flat, being free from scales and blisters and containing 99.5 per cent. pure zinc.

They are specially suited for printing purposes, and the graining is scientifically carried out, every portion of the metal being granulated by machinery, thus ensuring even dampening and freedom from scumming. The colour of the plates is of a silver grey and therefore most suitable for the artist in this respect, comparing favourably with aluminium. Moreover, alterations can be quickly and simply made as on litho stone, and work can be removed by caustic potassium or caustic sodium without injuring the metal. The

"Alco" plates may be also coated and developed for photo-lithography, their flatness and purity making them specially suitable. Those who are interested are invited to communicate with Messrs. Algraphy, who state that customers who become regular users of the plates, will be supplied with the formulæ of solutions gratis.

The rubber offset blankets manufactured by this firm are also being very widely used both in this country and abroad. Great difficulty was found in obtaining a blanket that, whilst being sufficiently strong to prevent stretching, yet had sufficient rubber on the surface to prevent the canvas showing through; further, the rubber top layer had to be of a very fine degree of vulcanisation, not too hard to prevent the ink picking up at each impression, and not too soft which would cause embossing. These ideal results seem to have been obtained and on fast-running presses it is possible to produce letterpress work better and cheaper by the litho offset press.

PAPER and stationery companies increased their nominal capital during August by £109,000 and printing and publishing companies by £54,000.

WIGGINS, TEAPE AND CO., LTD. — The exhibition of the film taken on the occasion of the visit of the Prince of Wales to the Devon Valley Paper Mill, Hele, took place on Wednesday at the Midland Hotel Cinema, Manchester. There was a fair attendance of printers and others connected with the paper trade. Mr. Cozens-Hardy described the various processes as they were shown on the screen, and at the conclusion of the show extended a cordial invitation to those present to visit and inspect any of their mills should they be in the vicinity of one.

A MEETING on behalf of the Great Northern Central Hospital, Holloway, is to be held at the Mansion House on October 17th, at 3 p.m., in order to provide an opportunity of making known more widely the immense value to the Metropolis particularly, and the nation generally, of the Institution's work, and in the hope that it may be a means of securing for the Hospital the help which it needs so desperately at this critical time.

## Paper and Print at Leipzig Fair.

Business in the paper section of the Leipzig Fair is described as only moderate. The two principal buildings devoted to the paper industry were fully occupied. At numerous places worked-up paper of the most varied shapes could be seen. In the cardboard and packing material sections a large choice of cardboard articles, ranging from the plain hard paper roll to sweet-boxes lined with velvet and silk, were exhibited. There is a general tendency to manufacture folding boxes for articles allowing of easy transport. Several types were displayed, among others the "Dowa Box" and the "Patent K Box."

In letter paper cassettes a brisk business was done, preference being given to articles of first-class quality paper. Among accountants' books, the so-called American daybooks were in particular demand, but lower-priced books also met with a ready sale.

Among decorations for tables, walls, lamps, etc., there were lamp-shades of crepe-paper, flower-pot covers of plaited crepe bands, sweet bags, travelling bags and all kinds of imitation stuffs, such as tablecovers, napkins, etc., in coloured crepe-paper; it is true that the large transactions expected were not effected, but the business done was satisfactory.

## Football.

The following are the results of the matches played last Saturday: —

PRINTERS' CHARITY CUP.—Waterlow Ath. 4, Britannia 0.

PRINTING AND ALLIED TRADES' LEAGUE.—Falcon Ath. 2, St. Clement's Press 0. Wightman's Ath. 5, Fleetway Press 0.

Mr. Herbert J. Parker, the hon. secretary of the Football Section of the Printing and Allied Trades Sports Association, who met with a cycle accident, which resulted in the fracture of an arm, is, we are glad to state, making satisfactory progress towards recovery.

## Freemasonry.

St. Bride Lodge, No. 2,817, celebrated its 21st anniversary at the Café Monico, Piccadilly-circus, when Mr. G. L. Reveirs was installed Master by Mr. Sydney H. Caslon. The following were appointed officers:—Messrs. G. F. Wilbraham and W. J. Starkie, Wardens; Alderman Sir G. R. Blades, M.P., Treasurer; C. J. Drummond, M.B.E., Secretary; Geo. W. Jones, Director of Ceremonies; L. W. Oxley, Almoner; F. H. Stollard and E. J. Day, Deacons; E. S. Lendrum, Inner Guard; O. Lehmann and A. Beech, Stewards; W. Wright, Organist.

A handsome banner was presented to the Lodge by Mr. Sydney H. Caslon, in commemoration of the 21st anniversary. The Rev. O. C. Cockrem, in dedicating the banner, gave a discourse on St. Bride or St. Bridget. Among those present were:—Sir J. Somers Vine, I. A. Symmons, P. G. Mallory, Maurice Beachcroft, Algernon L. Collins, Walter H. Glazier, W. H. Pocklington, Sir Robert Baird and Mr. W. Bel-Burrowes.

## U.S. Government & Hand Numbering

The Post Office Department of the United States Government are beyond question the largest single buyers of hand numbering machines in the world. In every post office throughout the country one finds anywhere from one to fifty hand numbering machines in daily use. These machines have to stand up under very severe handling, and number with absolute accuracy at all times the money orders, registered letters, parcel post packages and other records used by the post office.

The "American Visible Model "41" made by the American Numbering Machine Co., of Brooklyn, N.Y., was chosen by the United States Government as the machine that met with all the tests, and in awarding the contract specified "American Model 41's." The contract calls for over one thousand machines, and although Uncle Sam pays from 50 per cent. to 100 per cent. more for the "American Visible Model "41's" than other machines submitted, he is purchasing years of accurate numbering. "Model 41's" as well as other models are carried in stock by the sole European agents, Messrs. Victory-Kidder Printing Machine Co., Ltd., Victory Works, Birkenhead, England. This firm also undertake repairs, fulfilling the guarantee given with each machine.

It is of interest to know that several new forms of envelopes, and the appliances for their production, have been thought out from the works of A. B. Swain, 69-73, Mansell-street, Aldgate, E.1., which will help the printer to succeed in satisfying the widest difference in taste and requirement.

## Printing Machine Drive.

In a rotary intaglio printing-machine, an electric motor is provided for continuing the drive of the intaglio cylinder when the machine is otherwise stopped and the impression cylinder is tripped. A member *b*, keyed to the shaft *a'* of the intaglio cylinder *a* is formed with two cylindrical surfaces *b'*, *b''* of different diameters on which are loosely mounted a gear-wheel *c* and a sprocket-wheel *d*, which are formed on their inner peripheries with

wedge-shaped recesses *c'*, *d'* in which are arranged rollers *e* adapted to clutch the wheels *c*, *d* to the member *b*. The wheel *c* normally gears with a driving-wheel on the shaft of the impression cylinder *h* and the wheel *d* is connected by a chain *g* to the electric motor *f*, the starting switch of which is adapted to be operated automatically when the main drive of the machine is arrested and the gear *c* disconnected by the tripping of the impression cylinder. The device is patented by G. W. Mascord.

## Making Paper Bags.

According to a patent granted to H. Drysdale, paper bags of tubular or polygonal shape are made by winding a blank on a revolving mandrel and simultaneously carrying the mandrel and the blank past stationary

folders which form the bottom of the bag. As shown in Figs. 1 and 1<sup>a</sup>, the mandrel *h* is journaled in a carriage *c* which slides on a guide *b* secured to the bed-plate *a* of the machine. The mandrel also carries a pinion *i* which engages a rack *j* secured to the bed-plate, so that the mandrel is revolved as the carriage is moved along the guide *b*. A folder *l*, consisting of a plate with a number of teeth

or fingers *l'*, is secured to the bed-plate parallel with the guide *b*. Thus a blank fed to the mandrel and secured to it, when in the position shown in Fig. 1, will be wound on the mandrel as the carriage moves along the bed, and the fingers will engage and fold down the end projecting out of the blank

and form the bottom of the bag. A roller *f*, journaled on the carriage parallel with the mandrel, holds the blank in contact with the mandrel during its travel. A presser foot *f*<sup>1</sup>, pivoted at one end to the carriage, closes on the joint of the bag at the end of the operation and holds it secure until it is removed from the mandrel. In the construction shown, the carriage is reciprocated along the bed by treadle gear, but it may be actuated by any other mechanism. The machine may be made also with two bed-plates, carriages, etc., arranged one above the other, so that two containers of different sizes can be produced at the same time. Fig. 5 shows in front elevation a rotary machine in which two sets of mandrels 19, journaled on spiders 18 which rotate on horizontal shafts 13, are carried in a circular path past stationary folders 31 and are rotated by a gear wheel fixed behind the spiders 18. The blanks, previously gummed, are fed by a reciprocating feed table 55<sup>a</sup> to the mandrel at position C where they are gripped and held against the mandrel by a pressure block 21 mounted on rods which slide in guides on the spider. The paper is pressed against the mandrel as it rotates by a roller 62 carried by an arm 33 which oscillates about the shaft 13. After the bottom is formed, the folds are pressed against the end of the mandrel by a pressure-lever 23 mounted alongside the mandrel and actuated by a rack connected with the pressure-block 21. The finished bags are removed from the mandrels at position F. Lined bags may be made by feeding a lining-paper with the blank, and creasing mechanism may be applied to the machine for forming side creases in the bag.

### Moulds for Printing Surfaces.

In making composite sheet material which can be moulded and used for printing surfaces, etc., consisting of a fibrous body impregnated with a liquid cementitious material capable of setting or hardening in two stages under the action of heat, such as those obtained from phenols by condensation processes, and coatings of cement, the body is heated to such an extent before moulding that instead of remaining soft it becomes dry and crisp. For this purpose the body, which may be made of blotting paper, long-fibred chip-board, etc., is soaked in a solution of the cement, passed between rollers to press out excess liquid, and freed from the solvent by heating. Several layers of this sort may be joined together by glue, etc., or a single layer may be used. The sheet thus formed is coated on both sides with a layer of cement containing a high proportion of a filler such as lamp-black and heated until the cement is nearly hard. Coatings of cement containing a lower proportion of filler are then applied and the sheet heated until the latter coatings are of such consistency as to be moulded readily by pressure. The sheet is then moulded as desired in a heated press, until the cement is completely set. The lampblack may be replaced by other fillers, such as wood, flour, aluminium oxide, barium sulphate, and silica. Mr. J. S. Stokes is the patentee of the method.

"THE DUTIES OF A COMPANY SECRETARY," by W. H. Fox, F.S.A. London: Messrs. Gee and Co. (Publishers), Ltd., 14, Queen Victoria-street. Price 5s. net.

We are in receipt of a copy of the above-named work which will be found invaluable to those engaged in accountancy. Embryo company secretaries should certainly lose no time in adding it to their select number of reference works. Mr. Fox is an authority on secretarial practice, whilst his works are of recognised standing and importance. In 88 pages of legible type he has contrived to deal with his subject in such a manner as to leave the reader with an absolutely clear impression of the ground covered. The book is illustrated throughout with many useful forms, and although the author regrets that lack of space has compelled him to limit their number, he is confident of having included the most important. From the first chapter, dealing with the formation of a company, to the last which deals with voluntary winding-up, the reader will recognise the book to contain a fund of valuable and helpful information.

"SONOSCRIPIT OR SOUNDHAND." London: The Sonoscript Society, Ltd., 55-56, Chancery-lane, W.C.2. Price 2s. 6d. net.

This little booklet sets forth clearly a new method of speedy writing which is claimed to be simpler than shorthand and as legible as longhand. Its sponsors emphasise the scientific simplicity with which any language can be written by sonoscript, while they say the system is so easy to learn that anyone of ordinary capacities who is willing to devote one hour a day to its study can learn how to write 80 words a minute in 30 days, and those who have the time and the necessary power of concentration to work six hours per day can master the course in five days. A little book that will be of great interest to those seeking a short cut to shorthand efficiency.

PRINT RIVALS NATURE. — The charming posters in the subterranean stations illustrating the delights of "Metroland" attract a great deal of attention. A father and his daughter, says the *Morning Post*, were looking at a particularly alluring scene, which they recognised as a spot where they had formerly resided. "It never looked as pretty as that, Daddie," said the girl. "No, dear," was the reply, "They've had a spring-cleaning and the painters in—from Chelsea—since we were there."

AN Indian Government report shows that there are 8 paper mills in the country, employing 5,407 persons, the average number of employees in each establishment being 676.

## Paper for Offset Printing.

(Specially Translated for the BRITISH AND COLONIAL PRINTER AND STATIONER.

The ever-growing popularity of the offset printing process has caused lively interest throughout the book-printing industry. Some folks fear that it may even invade the province of newspaper production.

According to W. Grunewald, in a contribution to the *Papier Zeitung*, one of the chief advantages of the offset process consists in the ability to use rough papers and still produce such fine pictures as are impossible by other printing processes, as rough paper is much cheaper than equally good calendered or super-calendered paper. From the printer's point of view, the paper question is the deciding factor of the more extensive adoption of the process. In offset printing a fairly rough paper is preferred because smooth paper is sucked so tightly on to the rubber cylinder that either the paper or the picture may easily be damaged in separation. Even with comparatively rough paper, the difficulty of taking off demands a fairly strong paper, with long fibre. A well closed sheet with not more than 15 to 18 per cent. loading, which must be well bound and sufficiently well sized, will best please the offset printer. Offset paper, like litho paper, must be at least three-fourth sized, so as to render it not only immune to water damage, but to prevent dusting during printing. The offset printer fears dust and a knotty surface above everything, for in a very short time the loading material is deposited by the rubber cylinder on the plate, which gets scoured down and is rendered useless, or the rubber cover may be damaged, otherwise paper of any fibre composition may be utilised; for example, the writer has before him an offset process picture of pre-war date printed on a fairly soft rag paper, and beside this a number of papers containing no rags, and of composition varying between pure wood cellulose and 80 per cent. mechanical and 20 per cent. chemical pulp. The printer will prescribe the paper quality according to the price he obtains for the work.

To recapitulate: All papers of any composition which are sufficiently sized, have a close enough make to prevent dusting or lifting, and possess sufficient strength to withstand the strain of running through the press, are suitable for offset printing. In addition, and not least, a certain roughness is required, which may vary between lightly calendered to fairly rough machine finish. It will be readily understood, in view of the delicate character of the rubber cover and plates, that this desirable roughness does not give one a free hand to produce all sorts of unevennesses, uncleanness, or the characteristics of sand-paper.

A practical offset printer expresses himself as follows: "The papermaker does not yet devote the necessary intelligence to this process. Truly paper may be rough and also poor in quality, but it must be free from loose particles on the surface; such particles cling to the rubber cover, and injure both the plate and the rubber; these are further injured by the repeated washing which becomes necessary. It is to be hoped that the manufacturers will give these points the necessary attention." He further says that almost any paper can be used. From rough and hard papers every printing plate will give a good picture, but thin, super-calendered, mechanical wood papers are most difficult to print.

It is easy to get trouble from cheap papers with poor loading material and a big percentage of ground wood made on fast-running machines. One sees, therefore, that any sort of paper, even well-sized paper, is not necessarily suitable for offset printing, although in general the papermaker can produce suitable paper without difficulty.

THE death is announced from Buenos Aires of Señor Caprile, a former director of the newspaper *La Nacion*.

GERMAN UNEMPLOYMENT.—Of 67,813 German printing trade workers covered by official returns at the end of July, 1.5 per cent. were unemployed, as compared with 1.7 in the previous month, and 4.8 in July, 1920. Of 78,627 bookbinders, 3.2 per cent. were unemployed at the end of July as compared with 3.4 in the previous month and 5.2 in July, 1920.

## Pensions for Printers' Readers.

**Saturday's Dinner, under the Presidency of Sir William E. Berry, Bt., called forth Subscriptions totalling £750.**

To Sir William E. Berry and all who co-operated with him are due the hearty congratulations of the trade in view of the conspicuous success attending the twenty-seventh annual dinner in aid of the Pension Fund of the Readers' Pensions Committee held at the Holborn Restaurant on Saturday evening. In all the thirty years since its inauguration, this charitable function has never called forth so heavy a subscription list as on this occasion. The large gathering included, of course, many whose names are well known in the realms of printing, journalism and general literature, among those present being: Lady Berry, Sir William Waterlow, K.B.E., Sir Herbert Morgan, Sir Frank and Lady Newnes, Sir Arthur Spurgeon, Mr. and Mrs. J. Gomer Berry, Mrs. Carruthers, Mr. R. Desmond Carruthers, Mr. and Mrs. George Eaton Hart, Mr. and Mrs. F. J. Hart, Mr. and Mrs. Sydney Hart, Mr. J. Randall, Mr. H. A. Randall, Mr. C. Edenborough, Mr. P. N. McFarlane, Dr. W. L. Courtney, Mrs. Philip Champion de Crispigny, M. Emile Cammaerts, Mr. J. C. Squire, Mr. C. Irving, Prof. and Mrs. H. J. Spooner, Mr. Wm. Will, Mr. Geo. Sparkes, Mr. and Mrs. W. H. Eyre, Mr. J. Mortimer, Mr. C. H. Chomley, Mr. Henry Ling, Mr. Filson Young, Mr. Edward Valpy, Mr. T. E. and Miss Naylor, Mr. and Mrs. H. F. Parker (Lloyd Memorial Home), Mr. and Mrs. H. F. Parker (Cassell's), Mr. and Mrs. E. W. Whittle, Mr. and Mrs. G. F. Wilbraham, Mr. and Mrs. W. A. Perkins, Mr. J. Chandler, Mr. and Mrs. Chris Atherton, Mr. and Mrs. H. M. Gurr, Mr. and Mrs. J. H. Bedford, Mr. Edgar Fifoot, Miss Alice M. Head, Mr. J. Y. McPeake, Mr. C. E. A. Bedwell, Mr. and Mrs. H. Hamel-Smith, Mr. Eric Hudson, Mr. Horace Cole, Mr. and Mrs. Levett, Mr. and

Mrs. Arthur O'Connor, Mr. W. Clifford Poulton, Mr. G. F. Shortell and Mr. W. H. Shortell.

The quality of the menu and of the concert items which were interspersed among the toasts, did credit to all those responsible. In this connection special mention is due to the officials of the Readers' Pensions Committee, namely: Chairman of committee, Mr. J. Feldwick; hon. treasurer, Mr. W. A. Perkins; trustees, Mr. J. Chandler and Mr. J. Randall; hon. secretaries, Mr. Chris Atherton and Mr. H. M. Gurr; hon. collector, Mr. J. H. Bedford.

### **The Imperial Press.**

Following the honouring of the loyal toast, Sir Herbert Morgan, K.B.E., proposed "Literature and the Press." Literature he defined as the expression of the thoughts and ideals of the moment written gracefully in perfect English so as to go down to posterity. From what he knew of the average man who called himself "literary" he was certain that if it were not for the proof-reader very little of his work would go down to posterity as literature. In Great Britain, and indeed throughout the Empire, we had the finest Press in civilisation. He thought that, with the assistance of the printer's reader it achieved extraordinary veracity. On the whole it was moderate in tone, and was a great force and inspiration for good (Cheers.)

Triple response was made to this toast, the speakers being Mrs. Carruthers, Sir Arthur Spurgeon, J. P., and M. Emile Cammaerts.

Mrs. Carruthers, responding for journalism, suggested that a modern version of an old saying would be that "the hand that wields the pen of journalism is the hand that guides

the world." At no time in history had the Press so fully realised its responsibilities as in the difficult situations—political, labour and so forth—which had darkened the horizon since the Great War. No branch of literature was more indebted to the printers' reader than the Press. In a newspaper office there was no time for correction; everything was hurried, and if it were not for the services rendered by the reader, journalists would come off very badly indeed.

#### **Publishers and Book Prices.**

Speaking as both journalist and publisher, Sir Arthur Spurgeon said he could never understand the need of the double toast of literature and the Press—the two were inseparably combined. So far from joining in the wails regarding the position of literature in this country, he believed the outlook was particularly cheerful. Everyone of the 45,000,000 people in this country was a potential book reader, and if with the spread of education there was a great desire for books which did not rank in the highest class, his experience as a publisher also justified the statement that there never was such a demand in this country as to-day for books of an informative and educational character. There had been talk about the price of books being too high, and about "exploitation" by the trade unions, but after what had occurred recently, they found the trade unions not so unreasonable after all. There was no "ring" in publishing; there was keen competition, and because of that fact the public were going to get their books at the lowest possible price. He believed that in the course of time the price of books would approximate to pre-war figures.

M. Emile Cammaerts, the Belgian poet, also responded. In the last few years the Press, he said, had played an important part in bringing and keeping the nations of the world together. Never before had foreign policy been so much directed by public opinion. There were still some papers in most countries that he would like to see moderate their language, but, on the whole, when we came to think of what national prejudices were, say, ten or twenty years ago, it could not be denied that the Press had, by its moderating influence, set a remarkable example to the peoples, especially since the signing of peace. The attitude of the Press was the more remarkable and gratifying because it certainly went against its business interests, which were generally best served by being more or less sensational. On the whole, it was only fair to say that the influences of the Press had been thrown on the right side of keeping us together internationally. (Cheers.)

#### **A Most Deserving Charity.**

Sir William Berry, in proposing the toast of the evening, "The Readers' Pensions Committee," read the following extract from a letter from Lord Riddell, who was unavoidably absent: "The readers are old and valued friends of mine. As a study of the Press shows, they are wonderful people; their errors are

few and far between, and when we consider the hurry and stress under which they work, it is marvellous they can achieve such accuracy." (Cheers.) Referring to the public men, writers and others, who contribute to the Readers' Pensions fund, Sir William jocularly remarked that he doubted whether they were entitled to gratitude for their subscriptions; he would be inclined to regard these subscriptions as conscience money. He suggested that if at any future time the readers felt it incumbent upon themselves to ask for increased remuneration, they should insist upon the writers and others sharing with them their bloated royalties (Laughter.) There are people, Sir William proceeded, who say to-day that having regard to the militant attitude of trade unions and the great strength which these bodies have attained, the time is coming when trade charities, supported by the employer and the employed, are going to be unnecessary, and that, having regard to the big levies made upon members of trade unions and the large funds these unions accumulate, it may be that it will be their responsibility to look after the trade charities. Be that as it may, I cannot help feeling a great admiration for the number of men in the printing trade who, despite the very large levies—and they are uncommonly large in the trade to-day—are subscribing so handsomely to the trade charities. I also feel that, if and when the trade charities as we know them to-day disappears, the readers' charity will be one of the last to go. (Hear, hear.)

The Readers' Pension Committee, the chairman went on to say, was one of the little societies connected with the Printers' Pension Corporation, which was to hold its annual festival next month under the presidency of Sir William Waterlow. (Cheers.) In the thirty years of its existence the committee had collected a sum of nearly £6,000, and, under the arrangement with the Printers' Pension Corporation, they had purchased thirteen pensions. Each of the pensioners had to subscribe for ten years before he was eligible for a pension, so that it was a self-help institution, and one worthy of support. (Hear, hear.) Up to the present time the committee had been successful in getting one pension per annum, but they were within sight of two pensions this year, and each of those pensions cost £375. (Cheers.)

#### **Pioneers of the Movement.**

Mr. W. A. Perkins (the hon. treasurer), in responding, referred to the death during the year of one of their vice-presidents (Mr. J. S. Wood) and of Mr. Thos. Catling (who was always one of the first to respond to the annual appeal on behalf of the Fund), and passed on to speak of the pioneers of the movement, among them Wilbraham, whose son, though a master printer, was sitting near him (the speaker) and maintained the interest bequeathed him by his father in the welfare of their organisation. Mr. Perkins referred also to the absence through illness of the chairman of the committee (Mr. James Fieldwick) to whose efforts in the past he paid a

sincere tribute. The committee intended to name the thirteenth pension which they were closing that night after Mr. W. H. Shortell, who as hon. secretary and then as hon. treasurer, worked so hard for the Fund over a large number of years. The measure of the respect in which Mr. Shortell was held could be gauged by the record of the large amount contributed by his colleagues of the *Daily Telegraph* reading department. Having shown by comparison the strides which the Fund had made of late, Mr. Perkins remarked that nobody could touch the movement in the right spirit without being infected by it, so that the enthusiasm engendered became greater and greater the more one knew of the work. Sir William Berry had been badly smitten, and he had managed to pass on the infection to all with whom he was associated in his many undertakings. The claims on the Fund showed a tendency to increase this year to an alarming extent, and he appealed to all present to see that their friends and neighbours should have conveyed to them the germ of generosity and the microbe of munificence in order that the response to the annual appeal on behalf of the committee should meet with increasing success from year to year.

Mr. J. Randall proposed the toast of "The Guests," recalling the first Readers' Pensions Dinner held 30 years previously. For their golden age, however, they looked not into the past but into the future. Never had they had such a subscription list as the present.

Sir Frank Newnes responded on behalf of the guests, referring appreciatively to the lavish style of the hospitality provided. He drew attention to the presence of a prominent trade union leader, "our old friend Mr. Naylor." (Applause.) All sections of the trade were united to help a deserving cause. The technical production of papers, periodicals, and books in this country was higher than in any other country in the world, and this was due in a large measure to the efforts of the readers, and to the fact that printers as a class took a great interest in the technical side of their calling. (Cheers.)

Sir William Waterlow proposed the health of the chairman, and made the suggestion that one of the pensions which were to be the outcome of that dinner should be named after Sir William Berry. (Applause.)

At the call of Sir William Waterlow three hearty cheers were given for Sir William Berry and an extra one for Lady Berry.

Sir William Berry, in reply, announced that the subscription list had amounted to £727 odd, but by the further generosity of a few subscribers it had been brought up to £750. (Cheers.)

The excellent musical programme was arranged by Mr. Edward Beaumont, who also contributed several much-applauded solos. Hearty appreciation was expressed also of songs by Miss Winifred Allar, and of "humorous interludes" by Mr. Fred Curtis. The able pianoforte accompanist was Mr. Emile Phillipe.

## Belgian Master Printers' Congress.

### Mr. R. A. Austen-Leigh's Visit.

Mr. R. A. Austen-Leigh, who has returned from a visit to Antwerp, where as representative of the Federation of Master Printers of Great Britain he was most hospitably received, reports that the Congress of Belgian Master Printers held from October 3rd to October 5th was of very considerable interest. In the first place it was the twenty-fifth annual meeting of the Antwerp master printers, and the first Congress of the Belgian Federation, which was only formed about two years ago. Well over a hundred master printers were present, and the "orders of the day" included topics of such perennial and universal interest as apprenticeship, costing and the limitation of undue competition.

The Belgian master printers have a collective contract with their trade unions by which all matters are regulated, and which remains in force till the end of next year. Wages go up and down automatically according to the cost of living. Two decreases have already taken place, and the Antwerp compositor now takes about 130 francs a week, the equivalent in our money of some £2 10s. There seems to be work for all.

Mr. Austen-Leigh says that the conference was by no means all work and no play, as a pleasant trip up the Scheldt with a visit to a fine steamer still in the hands of the builders, and destined for the Congo Line, was included in the list of events. The proceedings terminated with a magnificent banquet which was attended by a representative of the Ministry of Labour, the President of the Chamber of Commerce, the Curator of the Plantin Museum and others. An added interest was the fact that some of the speeches were in Flemish.

**COSTING AT ST. BRIDE.**—The subject of printers' costing is again a popular one at St. Bride Printing School this year, over 100 students being in the present classes whilst a waiting list is being compiled for a course to start after Christmas. Mr. Bergin, who has been very successful for some years in the teaching of costing at the School, has regrettably found it necessary to resign from this work owing to other demands on his time, but an able successor has been found in the person of Mr. R. H. Watkins, of Spottiswoode, Ballantyne and Co., Ltd. Miss Etherington, the popular lady teacher of costing, is continuing her connection with the School.

According to the *Anglo-Italian Review*, Italy imported during the first four months of this year printing and lithographic machines to the extent of 456 metric tons in weight from all countries, five tons only coming from the British Empire.

# Printers' Managers and Overseers ASSOCIATION.

## Business Combined with Pleasure.

At the October meeting of the Printers' Managers and Overseers Association on Tuesday of last week, the business and social sides of the Association's activities were both represented, a short but important business session being followed by an enjoyable "smoker." Mr. A. E. Jarvis was in the chair.

The confirmation of the minutes of the previous meeting was followed, as usual, by the admission of new members. On the Council's recommendation the following gentlemen were elected:—Mr. W. F. Buckingham (Premier Linotyping and Printing Co., Ltd., 5, Hosier-lane, E.C.1—general manager); Mr. C. G. Godden (Putney Press, Ltd., 33, John-street, Battersea—overseer, letterpress machine); Mr. E. Radmall (Jas. Truscott and Son, Ltd., Dowgate Works, Tonbridge—overseer, lithographic).

The next business being the election of an auditor, two nominations were forthcoming—Mr. F. W. Hume (lately transferred from Edinburgh) and Mr. H. W. Jackson. A show of hands was taken, and showed a large majority vote in favour of Mr. Jackson, who was declared elected.

Under the heading of "other business" Mr. J. Lloyd referred to a recent paragraph in a monthly contemporary journal in which the Printers' Managers and Overseers Association was spoken of in a disparaging manner which was much resented by members. He put forward a strong resolution of protest and this was carried by a large majority. Mr. E. W. Whittle intimated that he had already, on behalf of the Association, communicated with those responsible for the journal in question.

Mr. Jarvis next drew attention to the Association's big pensions concert on the 10th inst. (reported on another page). He referred to it as "the effort of the Association's life," and urged members to lose no opportunity of assisting in making the effort an assured success.

## Restricting the Association's Membership.

The president then declared the meeting to be a special general meeting for the purpose of considering an important recommendation by the Council respecting a proposed alteration to Rule 4. This rule as it stands reads, in part, as follows:—"4, Membership: Candidates for membership must hold the positions of general managers, managers or overseers of letterpress or lithographic printing departments, or be a full-time instructor in foregoing trades under a recognised educational authority, and must satisfy the Council as to their status and practical knowledge of the trade. No candidate shall be eligible unless he has held the position of manager or overseer in one establishment for at least two

years; and it shall be a condition of his membership that he undertakes to give and to require from his employer not less than one month's notice if an overseer or an instructor, and not less than three months' notice if holding the position of general manager." The Council's proposed alteration was: To insert after the word "departments," the words ("working managers and overseers excepted").

The president said the alteration was designed to keep the Association clear of conflict. At present a working overseer, though he could give a month's notice, could not *work* the month. In his opinion the definition of an overseer should indicate one who is not only entitled to a month's notice, but is also able to perform his duties throughout that period.

Mr. Whittle, on behalf of the Council, formally moved the adoption of the proposed alteration. He explained that disputes between employers and the Typographical Association always involved disputes between the T.A. and their own association in respect of provincial members, because the T.A. objected to overseers doing productive work after the journeymen had left. Their provincial members had always been loyal, but the Council's intention was to make loyalty easier for them than hitherto.

Mr. E. H. Berryman seconded the motion.

This matter gave rise to much earnest discussion, in which many members took part.

To the suggestion that the position of the overseer would be sufficiently defined by specifying a minimum number of journeymen to be controlled, the president replied that no matter how many men an overseer had under his charge, if he was responsible for regularly performing work himself at case, press or machine, the difficulty remained.

Remarks of several speakers showed a desire to give every consideration to provincial members and the effect of the proposed alteration upon them. Some also asked whether there was danger of their own exclusion. Mr. Jarvis, in reply, made it clear that they were legislating for the present and the future; those already members would be in no way affected.

It was queried what would be the position of a candidate for membership who was the printer of a weekly newspaper, and actually made up a portion of his pages. Reply was made that such a candidate would not be admitted.

The matter having been fully discussed, a vote was taken, and the proposition was carried by an overwhelming majority, the figures being: For, 55; against, 5.

## The Bohemian Concert.

The remainder of the evening was occupied by a smoking concert provided by Mr. Eric Clifford's Bohemians. These proved themselves to be a jolly party of talented artistes, whose efforts gave general satisfaction. The Misses Ethel Golding and Madge Clinton, and Messrs. Roy Spurin, Sydney Bridger and Ernée Durnall contributed both individually and collectively to an extensive programme of song and humour, whilst Mr. Eric Clifford

acted as accompanist throughout and also contributed songs at the piano.

The Association expressed its satisfaction in exceptionally hearty fashion, the president calling for a specially cordial vote of thanks, which was proposed by Mr. E. H. Berryman, and seconded by Mr. R. H. Berry. Mr. W. H. Gill also, at the president's suggestion, added a few words of appreciation. The meeting having shown its approval in unmistakable fashion, Mr. Eric Clifford returned thanks for the "Bohemians."

The meeting ended right sociably, with the joining of hands and the singing of "Auld Lang Syne."

## Successful Pensions Concert.

Members of the Printers' Managers and Overseers Association made a splendid effort on Monday evening to complete their third pension in connection with the Printers' Pension Corporation. The total sum of £700 was required for the purpose, and £400 still remained to be raised to complete the sum, and with this object in view a concert was arranged in the Large Hall of the Cannon-street Hotel on Monday night. Functions of this kind are always well managed by the P.M. and O.A., and the gathering this week was no exception. In order to accommodate all who wished to attend, the largest hall in the building had been secured, so that there was ample space for those who turned up to enjoy the excellent musical programme which was presented under the direction of Mr. Philip Ashbrooke.

The joint chairmen were Mr. A. E. Jarvis (president of the Association) and Mr. W. I. Burch (Lanston Monotype Corporation, Ltd.). Among those supporting these gentlemen were Mr. and Mrs. Laurence Blades, Mrs. Jarvis, Mr. Sidney Cumbers, and Mr. Joseph Mortimer (secretary of the Printers' Pension Corporation). The members of the Pension Committee who had organised the concert were Messrs. H. Blackwell, G. Phillips, J. C. Pugh, C. Durston (hon. treasurer), W. H. Gill (financial secretary), E. W. Whittle (general secretary), and G. H. T. Freeman (hon. pension secretary).

An excellent evening's entertainment was submitted, as is usual on these occasions. There were two interesting departures from the programme. In the first half, for instance, Miss Billie Dorée (otherwise Miss Connie Whittle, daughter of the general secretary) made an excellent impression with her songs, "Little Brown Owl" and "I Want a Boy." She is a clever comedienne, and deserved the applause which greeted her. Then later in the evening Mrs. Laurence Blades was prevailed upon to appear on the platform, receiving a great ovation for her admirable rendering of "Annie Laurie."

Others who entertained the company so well were Misses Raymonde, Amy, and Katie Goldsmith, and Messrs. Vivian Langrish, Fred Curtis, and Albert Kirkman. The pro-

grammes, by the way, were kindly presented by the Ferrestone Press, Ltd., West Norwood.

### Effective Appeals.

During an interval in the concert the joint chairmen explained the object of the concert, and made effective appeals on behalf of the Printers' Pension Corporation.

Mr. Jarvis mentioned that the Corporation was doing excellent work for members of the craft, and indicated the self-help character of the organisation. He observed that the principle upon which the work was based was one which would never wear out. Those who benefited by the work did not feel they were taking charity, because they had themselves contributed to the funds when they were able to do so.

Mr. Burch, with excellent good humour, supported the appeal, pointing out that the recipients of the benefits conferred by the Corporation must themselves have been subscribers. Therefore it was not a question of charity, but a provision made by workers in the trade, and accumulated for the benefit of those who, unfortunately fell upon evil times, and who, by reason of illness or some other cause, were unable to follow their occupation.

Mr. Jarvis subsequently announced that the collection made during the evening represented a total of £166 gs. 6d., which Mr. Laurence Blades increased to £170.

Among the subscriptions were £25 from the Lanston Monotype Corporation, Ltd., with a personal £10 10s. from Mr. Burch himself; £25 from Messrs. Ault and Wiborg; £10 from Messrs. Mann; and £5 5s. each from Messrs. Fry and Messrs. Conolly. A further £2 was added to the list, thanks to the efforts of Mr. Burch in the capacity of an amateur auctioneer, whose "stock-in-trade" consisted of an empty bottle.

Mr. Joseph Mortimer gave the audience some interesting facts concerning the Corporation, which is now nearly 100 years old. There was no institution in the world like it, he remarked, and no trade the members of which put their hands in their pockets so frequently and so generously as did the printing craft. Because of this spirit they never heard of a printer, in London at all events, going into the workhouse. While there was some anxiety in providing for a family which had grown to over 2,000, when that anxiety was passed there was the enormous satisfaction of having assisted one's fellow creatures during one's lifetime. Work of this kind made one feel that life was really worth living. Mr. Mortimer referred feelingly to the 1,300 orphans who were looked after by the Corporation, to the 800 elderly printers who came every quarter for their allowance, and to the female dependents who, but for the Corporation and the thrift of its members, would be left to the mercy of the world. Mr. Mortimer concluded by saying that the story of the work was always interesting, and he had had the honour of telling it to the King and Queen and to the Prince of Wales.

The concert then proceeded to a happy termination.

## More About "Manul" Printing.

### The New Process now in London.

It will be remembered that in an article in our issue of June 30th Mr. William Gamble, F.R.P.S., F.O.S., dealt at some length with the subject of "Reproduction Without a Camera." His remarks were occasioned by the announcement, by a Swiss firm, of a process of reproducing printed matter without a camera, the process being given the name of "Manul" by inversion of the syllables of the name of its inventor, a Mr. Ullmann. The main principle of the process is to take the printed original to be reproduced and apply it directly to the sensitised surface of a glass plate, thus obtaining a negative by simple exposure to light, the resulting film being ready for immediate printing-down. Mr. Gamble, in the article mentioned, emphasised the similarity between this process and the earlier one of Mr. J. H. Player, and raised the question of the validity of the "Manul" patent rights. He said, however, that if only a moderate fee were asked for the use of the German inventor's process it might be worth while to acquire it and thereby obtain working details which would save experimenting. He regarded the process as one that should be of great value to the offset lithographer and the direct photo-lithographer.

### Operation in England.

Hitherto, we understand, the "Manul" process has not been operated in this country, any British work obtained being taken to Switzerland for execution. This, of course, was not a state of affairs that could be looked upon favourably by British printers. Now, however, a new development has taken place whereby the actual preparation of the plates and the printing of the reproductions is being effected in England. We understand that the Polygraphic Co., of Laupen-Berne, Switzerland, who first announced this method of reproduction, have appointed the Muston Co., of 4, Bell-yard, London, W.C., as British agents, and the latter firm is now receiving many inquiries about the process. They affirm, by the way, that as far as they are aware there is no similarity between the Player method mentioned above and the "Manul" process. Into the latter process no photography enters, and, furthermore, the actual work is done from a film and not from a glass negative. After the impression has been taken on to the sensitised glass negative the latter is submerged in liquid, and the film leaves the glass. It is this film which forms the basis of operation, and it will at once be seen it can be used either as a negative or a positive, a development hitherto impossible. The films have the advantage of being unbreakable, taking up little space, and also freeing the glass immediately for further work. The films are a permanent record, and can be used repeatedly if desired.

The applicability of the process is not limited to the reproduction of illustrations or letterpress for which the type and blocks are no longer available. It is stated that the new process can in many cases be profitably used to displace stereotyping of newly-printed work. The claim is made that the cost of reproducing any average printed book, including the making of the films, the transference to plates, and the machining, shows an average saving of 15 per cent. on the cost of making moulds and stereos, and re-printing from stereos. If this claim can be substantiated, the new method will have strong attractions in these days when the question of costs is of paramount importance. Moreover, when it is claimed that by this process an increased amount of capital, otherwise tied up in moulds and stereos, is made available for new work, the position becomes even more interesting.

On inquiry of the Muston Co., we learn that it is hoped shortly to issue licences to various British printers for the use of the "Manul" process. The secret of the process, we understand, lies in the composition of the emulsion used in the sensitising of the plates for negative-making. This would not be disclosed, but so much emulsion per year would be supplied to licencees.

## Betting in Printing Works.

An alarming allegation as to the prevalence of betting among printing trade workers, and a consequent enhancement of costs, is made by an anonymous contributor to the L.M.P.A. *Monthly Record*, who writes:—

"Betting has assumed such gigantic proportions that in large houses it is a grave problem. Practically all large houses are involved; at least half the employees are gambling. With truth it may be said a great many men are not working more than six hours per day, the other hours being spent in 'spotting the winners' and sporting gossip. This betting produces a kind of enervating fever, sapping the energies of the men even while they do work. Work is scamped when men have their minds on 'What shall I back?' or when excited or depressed after the result is known. Output is reduced as a natural result, and thus capital is made to pay a heavy toll to the 'bookmaker.' Some houses have as many as three or four bookmakers—principally in the composing department—some of these bookmakers holding responsible positions, so that it is difficult for the management to detect the evil. Labourers are chiefly used to take the bets and transact the business between the parties because their work takes them into all rooms; they are paid commission. Much of the extra wages reaches the bookmakers. . . . At the lowest estimate it [betting] is a 10 per cent. waste in large houses. When football commences it is 15 per cent. waste, and still larger where the 'bookie' is in a responsible position."

# Trade Notes.

THE proprietors of the *Bury Times* have reduced the price of the paper from 3d. to 2d. per copy.

FLEET WOOD, the addition of 65 acres to Burnham Beeches, given by Viscount Burnham as a memorial to his father, was formally accepted by the Lord Mayor on behalf of the City of London on Monday at a brief ceremony on the ground.

THE MONOTYPE USERS' ASSOCIATION has been busy with meetings in various parts of the country, important subjects of discussion being organisation, increased railway rates on monotype paper, and the possibilities of a new piece scale. The Association holds a London meeting on the 20th inst.

MEETINGS OF FEDERATION COUNCIL AND J.I.C.—A meeting of the Council of the Federation of Master Printers will be held on Tuesday, the 25th inst., and on the following day the Joint Industrial Council will meet, when interesting discussion will probably arise on the subjects of unemployment, apprenticeship and matters relating to the Special Costing Committee.

THE South-Western Alliance of the Federation of Master Printers held its quarterly meeting at Bristol on Monday. Mr. F. Steel was in the chair and Mr. A. E. Goodwin, secretary of the Federation, attended. Encouraging results of a costing campaign in the district were reported, and it was decided to arrange for further meetings at Barnstaple, Oxford and Hereford in the near future.

LITHOGRAPHER'S WILL.—Mr. Frederick Vincent Brooks, of 27, Hornsey Rise-gardens, N., the leading lithographer of his day, managing director of Messrs. Vincent Brooks, Day and Son, Ltd., lithographers, and chairman of Messrs. G. W. Bacon and Co., Ltd., map publishers, who produced most of the *Vanity Fair* cartoons, included an unusual statement in his will. He stated that he desired to thank Almighty God for His great mercy and goodness to him at all times, for the wife He had given to him, and for the love, health and, above all, character of the five children she had borne to him. He left £4,490.

NEW MORNING PAPER.—That London will soon have a new morning newspaper is now announced as a certainty. W. R. N. (Sir William Robertson Nicoll), in a note in the *British Weekly*, says: "The transformation of the *Westminster Gazette*, to which I referred some time ago, is now being arranged in detail. The *Gazette* will become a morning paper. The size and appearance will be somewhat like those of *The Times*, and the price will be 2d. Mr. J. A. Spender will be the political director of the morning paper, and special arrangements are made for strengthening the news department. The experiment will be watched with great interest and goodwill. It has behind it very influential support."

THE late Alexander Johnstone Wilson, of Clapham, proprietor of *Investors' Review*, aged 70, left £4,812.

TO TWELVE British journalists who are visiting Warsaw the Polish Press in leading articles extends a most cordial welcome.

SIR JOHN SIMON will appear for the defence in the claim for damages against *Truth* for alleged libel made by Mr. Horatio Bottomley, M.P., in respect of articles referring to the Victory Bond Club.

COINCIDENT with the opening of the new Royal Exchange, Manchester, on Saturday, the *Manchester Guardian* published a supplement of 28 pp. fully illustrative and descriptive of the new building.

FRENCH NEWSPAPER PRICES.—In view of the continued high price of paper, a plenary meeting of representatives of the French Press unanimously decided last week to maintain the present newspaper prices.

"LA FRANCE," a weekly journal published in French for the use of colleges and schools in this country has just made its first appearance. It is published by Evans Brothers, Ltd., Montague House, Russell-square.

THE "D.I.A."—Glasgow and Edinburgh will be among the places to be visited in the coming winter by exhibitions being organised by the Design and Industries Association. A series of exhibitions will exemplify all that is best in British printing.

THE staffs of the circulation, publishing, works and motor departments of the *Daily Telegraph* met at dinner on Saturday evening at the Cabin Restaurant, Strand, when, under the chairmanship of Capt. C. W. Cole, a most enjoyable evening was spent.

THE petition for the winding-up of the Pelman Institute Co. is to be heard in the Courts next week. It has been presented by Messrs. Frederick E. Potter, Ltd., advertising contractors, of Imperial House, Kingsway, and Messrs. Wilkes and Co., Ltd., printers, of Southwark.

PICTURE postcards of the King printed in Berlin were sold at 2d. each by street hawkers in Manchester on the occasion of his Majesty's visit. An attempt had been made to delete the imprint with an ornamental border, but the words "Printed at their works in Berlin" were quite legible.

LIVERPOOL P.M. AND O.A.—The winter session of the Liverpool Centre of the Printers' Managers and Overseers' Association was opened with the October meeting which took place at the Angel Hotel, Dale-street, the new headquarters of the Centre. Mr. H. R. Caldwell presided. The business matters discussed disclosed a lively interest in affairs affecting the association generally, and practical suggestions were made for the benefit of the craft. The Rev. A. E. Wykes, chaplain to the Centre, read a most illuminating and eloquent paper on "As Others See Us; Our Virtues and Our Vices," which called forth the warm encomiums of a very appreciative audience.

**FORTY-THIRD YEAR.**

## Current Topics.

### The Cost of Printing.

NOW THAT reduction of wages has taken place in the printing industry the public looks for some decrease in the price of printing. Blackpool Town Council, for instance, having obtained tenders before the wages dispute was settled, have now asked for a revision of the prices quoted. It will be well, however, if customers who make such demands will bear in mind, first, that many printers have already—expecting perhaps a larger wage-reduction than has come into effect—made anticipatory cuts in their estimated charges, and, second, that the wage reductions made cannot mean more than a small decrease in the sum total of the printer's costs. The Federation Cost and Charges Committee has been investigating this matter, and the costing figures from a large number of printing offices of all sizes have been examined. As the outcome of this investigation the committee finds that the wage reduction lowers

the manufacturing costs of general printing on the average 2½ per cent. There are minor variations in different processes, which will be dealt with in the revised hourly rates to be issued shortly, which rates are meant to be used as a basis for all charges. In making this announcement the committee states it must be clearly understood that this reduction applies only to the manufacturing costs of printing. All chargeable materials, such as paper, ink, leather, strawboards, etc., must be dealt with separately according to their cost. The percentage of 16½, or one-sixth will certainly need to be continued to cover the cost of handling, selling, etc., as the value of material is in many cases lower. A further percentage for profit should, of course, be added to the cost of materials and to labour costs.

\* \* \*

### Past and Present Prices.

IN comparing printers' prices, past and present, there are certain points that should not be overlooked. When the wages were increased in June and November, 1920, the committee issued statements showing the percentage that had to be added to cover the increase in cost. On each occasion the committee took into consideration the growth of wages and general expenses up to the time the statement was made. The costs will not decrease now in the same proportion, as although the wages have been reduced, many general expenses have increased since November, 1920. Rates, gas, electric light, postage and railway rates, unemployment insurance, and many other items have grown since last year. The price list for small jobbing work which the committee issued can be used by taking the material at its market price, plus the correct percentages for handling, selling, etc., and reducing the labour charges by about 2½ per cent. In periodical, newspaper, and similar work produced in London, the percentage reduction is 3½ per cent., but owing to the increase in the piece scale for hand and lino composition, this reduction may not operate in every case. The standard hourly rates are being revised, and will be issued as speedily as possible.

### Movements in Price of Paper.

THERE has been an upward movement in kraft wrapping within the last week. The selling price is now in the region of £35, as against £30 and even less a short time back. It is rumoured that the Swedish Convention are determined to approximate quotations more closely to cost of production. Compared

with any other grade of paper, kraft at £35 is quite a reasonable comparison with pre-war figures. The downward movement in E.S. papers has also been arrested, and prices are now stable at a figure which roughly corresponds to little over 100 per cent. on pre-war. This low level is not justified by actual costs, which are certainly in the region of 125 per cent. on pre-war. However, it is all part and parcel of the effort to accelerate business and force down the price. Naturally paper users generally cannot claim to have done quite so much as this as their contribution to the same end.

## Personal.

SIR WILLIAM WATERLOW will doubtless receive generous support from the printing and allied trades, when he presides at the ninety-fourth anniversary festival of the Printers' Pension Corporation at the Connaught Rooms on Wednesday, November 2nd.

In connection with this festival, Mr. R. A. Austen-Leigh is circulating an appeal to all members of the London Master Printers' Association, and a hearty response should be assured, particularly in view of Sir William's outstanding services to the L.M.P.A. and the great respect in which he is held in the trade.

ALDERMAN SIR VANSITTART BOWATER has been unanimously elected Governor of the Irish Society, which administers the City estates in the North of Ireland, in succession to the late Sir Alfred Newton, who had held the position for 15 years.

SIR WILLIAM ROBERTSON NICOLL, C.H., editor of the *British Weekly*, which he founded 35 years ago, celebrated his 70th birthday on Monday.

MR. E. B. SMITH, the president, was in the chair at a meeting of the Association of Master Printers of South-East London at the Bridge House Hotel, London Bridge, on Tuesday, when Mr. Edward A. Dawe, of the Stationery Office, spoke on "Pertinent Points on Paper," a report of which will appear in our next issue.

MR. W. A. CLOWES made an appeal on behalf of the Printers' Pension Corporation in connection with the festival dinner at which Sir Wm. Waterlow is to preside.

MR. PERCIVAL JONES, head of the printing firm of Percival Jones and Co., has been adopted as the Unionist Municipal candidate for the Northfield Ward, Birmingham.

MR. W. H. BURCHELL (hon. sec. of the Central Districts Association) delivered an

interesting lecture on "Office Management" at the monthly meeting, on Tuesday evening, of the S.W. London Master Printers' Association. The meeting was held at Stanley's Restaurant, Lavender-hill, S.W., and a report will appear next week.

MR. HAROLD S. CURWEN, of the Curwen Press, was the lecturer at Monday's meeting in the galleries of the Design and Industries Association. With the aid of interesting lantern slides he made an effective plea for improved design in the printer's work.

MR. GEORGE MORRIS, managing director of Messrs. W. and R. Chambers, was entertained last week at dinner in the Caledonian Station Hotel, Edinburgh, in celebration of 50 years' service with the well-known publishing house. He was presented with a canteen of cutlery and a smoking cabinet, and was also the recipient of a cheque from the firm.

MR. T. E. NAYLOR, secretary of the London Society of Compositors, has volunteered as a steward at the pensions festival. He is appealing on behalf of the Pension Corporation to L.S.C. chapels.

MR. BASIL K. LONG, who until recently was foreign editor of *The Times*, is leaving on October 14th for South Africa to edit the *Cape Times*. The Empire Press Union organised a farewell luncheon at the Savoy Hotel, yesterday under the presidency of Viscount Burnham.

A BANQUET in honour of Mr. Wareham Smith, who is retiring from active newspaper life, will be given on Thursday, October 27th, at the Connaught Rooms.

MR. THOMAS NELSON, an old and valued member of *The Times* staff, died at his home in London on Sunday night after a long illness. Mr. Nelson, who was born in 1864, gained his earlier experience in journalism at Cupar, Fife. He joined the Parliamentary reporting corps of *The Times* in 1895. For the last six years he held the position of chief sub-editor.

MR. E. PORRITT, an American journalist, a passenger on the White Star liner "Baltic," outward bound to New York, whilst passing New Brighton, dived into the Mersey. Despite a search lasting over two hours, no trace of him was found.

CONGRATULATIONS to Mr. and Mrs. Henry Featherstone, who last week celebrated their silver wedding.

MR. FEATHERSTONE has for long been identified with the paper trade, and some of his old friends joined him at his Hove residence to commemorate 25 years of domestic happiness.

### DIVIDENDS AND REPORTS.

**BRITISH GLUES AND CHEMICALS.**—The first report of British Glues and Chemicals, Ltd., for the period from January 10th, 1920, to the end of May, 1921, shows that the net profit, after writing stocks down to market values, amounted to £241,722. The whole of the preliminary expenses amounting to £57,879 has been written off. The dividend on the 8 per cent. cumulative preference shares to April 1st last has been paid, leaving £149,873, subject to taxation and capitalisation of profits earned prior to the company's incorporation. The amalgamation of the eight companies has raised complex questions in connection with taxation liabilities, and although the directors are able to recommend payment of the preference dividend for the half-year to September 30th they are not in a position to declare a dividend on the ordinary shares, the general state of trade necessitating a preservation of resources.

**LAMSON PARAGON SUPPLY Co.**—It is announced that although the directors are of opinion that the net profits for the half-year ended July 31st last would permit the pay-

ment of the usual interim dividend on the ordinary shares, they have decided, having regard to the uncertainty of the outlook for trade generally, to postpone the declaration of the ordinary dividend until the close of the company's financial year. The interim payment last year was 2½ per cent. The interim dividends on the 5½ per cent. preference and 10 per cent. preference shares for the past half-year have been paid.

### NEW COMPANIES.

**MILLS AND SONS (PRINTERS), LTD.**—Capital £6,000; to take over the business of a printer, etc., carried on at 36, Castle-street, Guildford, by J. Mills as "Mills and Sons." Private company. First directors: J. Mills, H. Mills, E. Mills and J. Mills, jun. Registered office: 36, Castle-street, Guildford.

**CHAPMAN AND DODD, LTD.**—Capital £3,000; printers, publishers, booksellers, bookbinders, papermakers, stationers, etc. Private company. First directors: G. P. Chapman and R. H. Dodd. Registered office: 25, Denmark-street, W.C.2.

**GALT, JONES, LTD.**—Capital £10,000; book-sellers, stationers, printers, bookbinders, paper manufacturers, etc. Private company. Directors: R. B. Galt and W. H. Jones. Registered office: 45, Glasshouse-street, W.1.

**JAMES BROWN AND SON (GLASGOW), LTD.**—Capital £15,000, in £1 shares; proprietors, printers and publishers of newspapers, journals, magazines, charts, maps, books and other publications. Private company. First directors: J. R. Brown and A. H. Ferguson. Registered office: 52, Darnley-street, Glasgow.

**STAGE PICTORIAL PUBLISHING Co., LTD.**—Capital £5,000, in £1 shares; to take over the business of the Stage Pictorial Publishing Co., Ltd. (incorporated in 1904), and to carry on the business of proprietors of any newspaper, journal or other publication, photographers, printers, booksellers, stationers, newsagents, advertising agents and contractors, etc. Private company. Subscribers: A. J. White and B. W. Findon.

**LEIGH AND WILLIAMS, LTD.**—Capital £3,500; to take over the business of printers, publishers, bookbinders and stationers carried on by Leigh and Williams at Prestatyn. Private company. Subscribers: A. P. Leigh and J. L. Williams. First directors: A. P. Leigh, J. L.

Williams, H. E. Ashton, A. J. Parsonage, C. W. Haslam, J. P. Clews, H. Smith and G. Perkins.

**S. P. B. ADS, LTD.**—Capital £2,000 in £1 shares; advertising contractors by means of the mechanical machine known as the Stereomatorgraph, exhibitors of advertisements, motion or other pictures, billposters, printers, publishers, etc. Private company. First directors: A. F. Sly and G. M. Hamilton. Registered office: 17A, Commercial-road, Portsmouth.

**COLLEGE OF COMMERCE, LTD.**—Capital £200; to take over the business of a teacher of commercial subjects, booksellers and stationers carried on by W. J. A. Knight-Rawlings at 174 and 176, Canterbury-street, Gillingham, as "The Gillingham Commercial School." Private company. First directors: W. J. A. Knight-Rawlings and Eugenie Omelia Knight-Rawlings. Registered office: 174-176, Canterbury-street, Gillingham, Kent.

**ADVANCE PUBLICITY, LTD.**—Capital £1; advertisers, publishers, printers, business organisers, etc. Private company. Subscribers: Elsa Heat and Mabel Egford. Registered office: 54, George-street, Portman-square, W.1.

**SCOTTISH ADVERTISING, LTD.**—Capital £7,000; advertising contractors and agents in all its branches. Private company. Subscribers: D. S. Brown and H. Welsh. First directors: H. Welsh, G. M. Borland, E. L. Reid, G. MacDuff, G. Kilpatrick and W. Jack. Registered office: 38, Bath-street, Glasgow.

### COMPANY MORTGAGES AND CHARGES.

Fresh Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 1908, and Satisfaction registered pursuant to Section 97 of the same Act. (The registration of Satisfaction is not compulsory).

**VICTORIA HOUSE PRINTING CO., LTD.**—Satisfaction in full on September 20th, 1921, of debentures dated November 20th, 1911, and October 14th, 1914, securing £3,000 and £10,000 respectively.

**FIELD PRESS, LTD.**—Trust deed dated September 9th, 1921 (supplemental to trust deed dated July, 31st, 1919), securing £210,000 debenture stock. (This stock is issued in exchange for debentures for a similar amount). Property charged—certain freehold and leasehold premises in Cursitor-street and Breame-buildings, E.C., and company's undertaking and property, including uncalled capital. Trustees, Lloyd's Bank

**BRADFORD AND COUNTY CONSTITUTIONAL PRESS CO., LTD.**—Further charge on certain land and premises in Leeds-road and Hall Ings, Bradford, dated July 5th, 1921, to secure £6,000. Holders: A. F. H. Render, Heaton Grove, Frizinghall, Bradford; and Sir Francis Watson, Rawdon Cragg, near Leeds.

**HALLAWS, LTD.** (printers, stationers, etc., London).—Particulars of £1,300 debentures, authorised September 28th, 1921; whole amount issued; charged on company's property, present and future, including uncalled capital.

**PERRIS BOX CO., LTD.**—Debenture dated September 21st, 1921, to secure £1,000, charged on the company's undertaking and property, present and future, including uncalled capital, subject to prior mortgage for £1,000. Holder, P. Todd, Kibble Bank Farm, Kibble Bank, Burnley.

**OLIVES PAPER MILL CO., LTD.**—Particulars of £50,000 debentures, authorised August 31st, 1921; whole amount issued; charged on the company's undertaking and property, present and future, including uncalled capital.

**PHOTEX PAPERS, LTD.**—Particulars of £13,000 debentures, authorised August 10th, and covered by trust deed dated August 15th, 1921; whole amount issued; charged on King's Hall, The Broadway, Leigh, Essex, certain land and the company's undertaking and property, present and future, including uncalled capital. Trustees, Copley's Bank, Ltd., 1, Queen Victoria-street, E.C.

**ANGLO-INDIAN TRADING CO., LTD.**—Particulars of £100, authorised September 21st, 1921, whole amount issued; charged on the company's undertaking and property, present and future, including uncalled capital.

**BARLOCK TYPEWRITER CO., LTD.**—Issue on September 19th, 1921, of £10,000 debentures, part of a series already registered.

**PIRIE'S PHOTOGRAPHIC PAPER CO., LTD.**—Particulars of £150,000 debentures, authorised August 29th, and covered by trust deed, dated September 21st, 1921; whole amount issued; charged on certain land and buildings, etc., in Newhills, Aberdeenshire and the company's undertaking and property, present and future, including uncalled capital. Trustees, Union Bank of Scotland.

## Gazette.

### A WORD OF CAUTION.

In giving the official Gazette information, it must be distinctly understood that we take official records as we find them, and accept no responsibility for inaccuracies, while, as an almost invariable rule, the facts will be found correct. We advise our readers, before forming hasty judgment, to consider that there may be in each case satisfactory explanation which does not appear on the records.—Ed.]

### ENGLAND AND WALES.

#### PARTNERSHIPS DISSOLVED.

N. T. Riddle, Norman William Smith, and James Edward Duffus, Victoria Works, Stanstead-road, Forest-hill, printers, so far as regards Nicholas Thomas Riddle. William Beardmore Ainsbury and Herbert Barton Brindle, paper agents, 61, Hanging-ditch, Manchester.

#### THE BANKRUPTCY ACT, 1914.

##### RECEIVING ORDER.

Sidney Burgess, 7, Imperial-chambers, New-street, Huddersfield, paper merchant. October 3rd.

## Printers Visit Bunyan's Town.

Another Home Counties Alliance Outing.

The very successful series of outings arranged by the Home Counties Master Printers' Alliance was brought to a close on Saturday by a memorable visit to Bedford. The party assembled just before 11, and while the master printers attended a meeting in the council chamber of the Town Hall, the ladies of the company were taken to see St. Paul's Church and the Bedford School, their able guides being Mr. H. Poynter and Canon Speck.

Mr. David Greenhill presided over the master printers' meeting, at which some important matters were discussed. Mr. H. H. Potts, of St. Leonards, gave an account of the recent wages negotiations and explained the difficulties of the situation which had led to the reduction being modified from 15s. to 7s. 6d. Mr. Albert Bennett also addressed the meeting on the same subject. Mr. A. Williamson, secretary to the Federation Cost and Charges Committee, followed with a speech that brought home to his hearers the advantages of federated effort. He showed the need that members should individually throw their weight into the Federation's work, and pointed out that the sinking of individuality in co-ordinated activity led to the utilisation of that individuality to the greatest advantage. Mr. David Greenhill also delivered a rousing address and Mr. Valentine Knapp, the president of the Newspaper Society, spoke on the relation of the master printer to the newspapers. There were several other speeches and some interesting discussion, the value of the Federation to the small printer being one of the points thrown into relief during this useful interchange of thought.

A reception by the Mayor and Mayoress of Bedford (Alderman and Mrs. W. E. Sowter) preceded an excellent luncheon in St. Peter's Hall, and in the course of the subsequent speech-making the Mayor cordially welcomed the visitors to the town.

In the afternoon the party proceeded by char-a-banc to Elston, John Bunyan's birth-place, where, under the expert leadership ("inspired" was the word someone used) of Mr. Poynter, they visited the Moot House, Elston Church, and other Bunyan landmarks. Then came a quick ride back to Bedford, where a most interesting and instructive half-hour was spent in the Bunyan Library, after which a visit was paid to Bunyan Meeting.

The day's proceedings ended with tea in St. Peter's Hall, where a number of two-minute speeches, of very varied character but all interesting and stimulating, put a fitting finish to a day which all had found to be both enjoyable and profitable.

FORMERLY editor of the *Captain*, and a well-known writer, Mr. R. S. Warren Bell, died last week, aged 50.

## A Progressive Printing House.

Methods That Brought Success.

The firm of Ed. J. Burrow and Co., Ltd., of Cheltenham and London, provides a striking example of a printing business started in the humblest manner possible but successfully achieving big developments. Under the title of "Broad Human Policies Have Brought Me Success," Mr. Ed. J. Burrow tells the interesting story of his business life in *System*, that excellent "Magazine of Business."

Starting as a chemist's assistant, Mr. Burrow's first essay in connection with the printing craft was to produce for a firm of publishers a series of etchings on copper, and these proved remunerative to the firm. Thus encouraged, he applied his ability as etcher and writer to the compilation of an album of Cheltenham—in those days a rather novel venture. Having to borrow the money for this speculation, he may be said to have started in business with a liability of £50. The Cheltenham album, however, was a success, and soon albums of other towns were on the market. But in 1900 came a sudden break in the demand; the public taste had dropped albums, and was keen on picture post cards. Production was quickly switched over to these, and ingenuity and judicious choice of designs brought remunerative business. The same quick responsiveness to changing times led later to concentration on guide books of modern type, which have been immensely successful.

The utilisation of "by-products" is another matter that Mr. Burrow regards as an important factor of success—for example, the printing of advertisers' announcements in a guide book being utilised as an opening leading to orders for reprinting the matter as leaflets, also to orders for other printing work. Since the early days when printing had to be given out there has been a gradual growth of the firm's resources for the execution of their own printing. The first step was the acquirement of an interest in a local printing works; then came the purchase of a small printing plant, and since then big extensions.

As regards organisation of personnel, Mr. Burrow holds that a most important element of success is to provide as far as possible for "payment by results," i.e., extra reward being linked with extra effort. Arrangements for profit-sharing, bonuses, etc., have done much to develop enthusiasm for business, as has also the plan of "group talks" between the controlling heads of the business and representatives of the different departments who thus obtain better mutual understanding and closer co-operation.

THE autumn dinner of the Stationers' Social Society will be held on November 4th in the King's Hall of the Holborn Restaurant, 6 for 6.30.

## Books on Printing.

### Guide for Craftsmen and Students.

A step in the furtherance of technical education in the printing trade has just been taken by master printers in the Norwich district, who thus set an example worthy of wide emulation. For several years an important feature of the work of the Norwich Public Library has been the publication, for the guidance and help of its readers, of special annotated catalogue or reading lists on current or local topics. The latest guide is entitled "Books on Printing and some Related Subjects in the Norwich Public Library" (post free 1s. 2d.), and it is issued by the Norwich and District Master Printers' Association, who have co-operated with the Library Committee with the view of inducing the employees of the Alliance to study the history and technology of printing, thus encouraging progress in that art and development in technical education.

This comprehensive annotated catalogue of 35 pages includes particulars of over 250 standard or important works, which are classified under the following main headings: The Book and Bookmaking; Manuscripts, Printing; Materials; Book Illustration; Bookbinding; Publishing and Book-selling; Newspapers and Journalism; and Local Libraries. Several of these main headings are sub-divided, particularly that of Printing, which has no less than 24 subdivisions, the entries being logically and conveniently arranged under such headings as History of Printing, Education and Study, Economic and Social, Administration, Book-keeping, Estimating and Prices, and Practical Printing, the latter being further sub-divided under such headings as Type, Composition (including Design and Typesetting Machines), Imposition, Proof-reading, Punctuation and English, Printing Presses, Presswork, Stereotyping and Electrotyping, Embossing, etc., Paper Ruling, and Paper Cutting. Under all these headings will be found useful books for the student and craftsman, and as an indication of the up-to-dateness and importance of the catalogue it may be mentioned that all the volumes in the valuable "Typographic Library" now being issued by the United Typothetae of America are included, those not yet published being noted as "In preparation." "Book Illustration" is another comprehensive section embracing authoritative works on book illustration in general, colour printing, and the various kinds of engraving—wood, copper, lithography, aquatint, mezzotint, etching and photographic processes. In the Book-binding Section are several of the important works on historical bookbinding and many of the best practical works.

Being the result of co-operation between the Norwich Public Library Committee and the Norwich and District Master Printers' Association, this important catalogue of technical books must, we think, be almost a unique

feature of public library work. The Library has provided the books (with some financial assistance from the Association), the catalogue has been compiled by the City Librarian (Mr. Geo. A. Stephen, F.L.A.), the Association printing and issuing the catalogue at its own expense. The printers of Norwich and the surrounding districts are fortunate in having provided for them such a fine collection of books relating to their craft, together with a catalogue which not only gives the full titles of the books, but describes in succinct notes their chief features.

## Colours in Process Work.

### Standardisation Urged in U.S.A.

The question of the standardisation of the colours used in multiple-colour printing processes is coming increasingly to the fore in America, where photo-engravers have recently been pushing in the matter. The movement is now re-inforced by the advertising fraternity, the Association of National Advertisers having adopted a resolution urging publishers of advertising mediums, printers and others interested to take steps to work out a process of colour standardisation, to which effort the Association will lend such help as is possible. The resolution was worded as follows:—"Whereas, there is much confusion and divergence in results obtained in the use of advertisers' colour plates in three and four-colour process printing by reason of the lack of any standardisation in the tone and strength of the process colours, and whereas the photo-engravers have started a movement to remedy this evil, therefore be it resolved, that the Association of National Advertisers expresses its recognition of the need of such standardisation of process colours, and will lend such help as is possible to the establishment of a feasible standardisation plan; and be it further resolved, that we urge publishers of advertising mediums, printers and others interested, to take steps to accomplish the desired standardisation."

AN unusual libel suit has been filed by the City of Chicago against the *Chicago Tribune*, from which the municipality seeks to recover £2,500,000 damages, on the ground that its published criticisms of the financial policy pursued by the administration of the Mayor, Mr. William Hale Thompson, have gravely impaired the city's credit. A second suit for a similar amount has been filed against the *Chicago Daily News*, so that the Courts, which will begin the trial next week, will have to decide whether the municipality can validate claims, which, if proved, will virtually put out of business the two leading newspapers of Chicago.

**An Advertisement is always working.**

## Trade Union Matters.

**NEW PRICE SCALE.**—The new agreed Scale of Prices for compositors' work—book, jobbing, Parliamentary and news, case and machine—has been issued by the London Society of Compositors, price 1s. A well-produced booklet of 96 pages, it is printed by the Athenæum Press. It will be remembered that a revised scale was approved by the Joint Technical Committee some eighteen months ago, but was rejected by the L.S.C. The further revision of details developed into a thorough overhauling of the whole, and now after upwards of two years' deliberation it may be hoped the new scale will be found generally satisfactory.

**REPRESENTATIVES** of the National Union of Printing and Paper Workers, and of the wholesale publishing and distributing firms, met last week to consider proposals put forward by both sides with a view to settling the dispute which has arisen between the employers and employees. Each side submitted suggestions which are being further discussed.

A SPECIAL "chapel" (compositors, letterpress, litho, bookbinders and rulers) was recently held in the composing department of Messrs. W. S. Cowell, Ltd., Ipswich, the occasion being a presentation to one of its members, Mr. W. E. Godbold, who was about to retire and take up the superannuation benefits of the Typographical Association.

THE excellent life-motto of "making two blades of grass grow where one grew before" seems to have been adopted in rather literal fashion by our "Natsopa" friends. The National Society of Operative Printers and Assistants announces that, through the medium of the gardens of the Natsopa Memorial Home, it is in a position to supply its members with tested seeds and bulbs at advantageous prices—an arrangement which should be welcomed by members who have gardens or allotments.

**MR. JAMES LIVINGSTONE**, who is retiring from the composing-room staff of the *Leeds Mercury* after service extending to half a century, has been presented with a travelling case by his colleagues as a mark of their appreciation.

THE "CAPE TIMES," LTD., proprietors of the *Cape Times* and *South African Lady's Pictorial*, printers, process engravers and stationers, have opened a London office at Buchanan-buildings, 24, Holborn. Their business connection with Messrs. Ledger, Sons and Co., has ceased, but Mr. Henry Ledger has been appointed their London manager.

# Advertising Matter for Australia. Lancashire and Cheshire Alliance.

## The Duties Payable.

The Acting High Commissioner for Australia has been requested by the Commonwealth Department of Trade and Customs to invite attention to the duties on advertising matter payable under Item 338 (A) of the Commonwealth Tariff, viz.:—British Preferential: 8d. per lb. or 35 per cent. *ad valorem*, whichever rate returns the higher duty; General Tariff: 10d. per lb. or 45 per cent. *ad valorem*, whichever rate returns the higher duty.

Short payments of duty have occurred through senders of advertising matter prepaying duty (either by means of the special stamps issued by the High Commissioner's Office or by direct remittance to the Commonwealth Postal Authorities) at the specific rate in cases where the *ad valorem* rate properly applied. It is requested, therefore, that traders will take care, when posting advertising matter to the Commonwealth, to ascertain whether the *ad valorem* rate returns a higher amount of duty than the specific rate, and, if so, to prepay the duty at the *ad valorem* rate.

## Re Stephen Fordham,

**Cardboard Box Manufacturer, 1, Reeves-place, Hoxton.**

This debtor attended before Mr. Registrar Stiebel on October 4th at the London Bankruptcy Court for public examination upon accounts showing total liabilities £2,792 (unsecured £2,407) and assets valued at £1,072. Replying to the Official Receiver, debtor stated that for about 16 years prior to the end of 1919 he was in the employment of his grandmother, who was carrying on the above business under the style of "S. Fordham." At the latter date his grandmother assigned the business to him, a condition of the assignment being that she should receive from the business £100 payable by instalments and £3 a week for life. Witness had no cash capital, but took over stock, machinery and trade fixtures worth about £170, and the outstanding liabilities, amounting roughly to £600, which he subsequently paid off. Up to the beginning of this year the business just about paid its way, but subsequently, owing to a fall in prices and the general depression, there had been a loss on the trading. Witness attributed his insolvency to interest on borrowed money, to the fall in prices which compelled him to sell goods under cost, to depreciation in value of his stock on hand, and to the general depression in trade. The examination was concluded.

A very successful rally of master printers took place at Blackpool last week-end under the auspices of the Lancashire and Cheshire Alliance of the Federation of Master Printers. The happy commingling of business and recreation that was provided originated with Mr. Bethell, the hard-working president of the Alliance. A very successful dinner (with dance and whist drive), a golf competition and bowling competition, were some of the lighter functions of the week-end, but serious affairs of business were given suitable consideration, among those taking part being Mr. James MacLehose, M.A., LL.D.; Mr. J. C. Coppock, Mr. W. M. Schofield, Mr. A. E. Goodwin, Mr. W. H. Andrew, Mr. H. C. Brunton, Mr. W. Johnson, Mr. Percy Grime and Mr. W. Maxwell. Notable features of the discussions were the expressions of confidence in the president and Labour Committee of the Federation, also the pleasure expressed that Mr. Bethell, in spite of temporary indisposition, had been able to be present.

## Silver Wedding Presentations.

In celebration of the silver weddings of Mr. J. Clifton Town and Mr. J. Ernest Town, directors of Joseph Town and Sons, Ltd., wholesale stationers, Leeds, the members of the staff were entertained at a whist drive and dance at Collinson's Café. A large company was present, and occasion was taken during the proceedings to present each of these directors with a handsome silver centre-piece as a token of the sincere esteem in which both of them are held.

The presentations were made by Mr. John Harper, the oldest member of the staff, who referred to the cordial relationship which has existed for so many years between masters and employees. The recipients of the gifts suitably responded.

**THE PRINT SOCIETY.**—Those interested in etchings should obtain a copy of an illustrated brochure entitled "The Print Society and Some Advantages it Offers to Print Collectors." This society of etchers and print collectors—founded by Mr. E. Hesketh Hubbard, the landscape painter and etcher, directly after the war—has its headquarters at Ringwood, Hampshire, and aims at being of very practical assistance both to collectors of prints and to promising artists.

ACCORDING to the Berlin newspapers, the Bavarian Government has sanctioned the reappearance of the Independent Socialist *Munchener Morgenpost*, which was suppressed by the late Government under Dr. von Kahr.

# New Inventions.

## Feeding Sheets.

With the aid of a device patented by E. Stott and Dawson and Sons (Otley), Ltd., sheets are fed to printing and like machines from a pile by separating the top sheet by its front edge, raising said edge vertically or inclining it to the top of the pile, projecting a roller or the like beneath the raised sheet and the pile and bringing a further roller into contact with the projected roller and feeding off the sheet by the revolving of these rollers. To assist in the feeding and separation of the top sheet, a stripping rod or tube may be moved over the top of the pile between this and the separated sheet. As shown in Fig. 3, the top sheet of a pile is separated by nozzles 12 on a suction tube 11 which is oscillated by

rocking arms 13 operated by levers 14 from 19 on a shaft 20. The arms 13 are moved to and from the pile by means of lever and link mechanism 21, 23, 24, 25 operated by cams 26 on the shaft 20. As shown in Fig. 3, the suction separator has raised the top sheet of a pile, and a stripper bar 28 carried by an endless chain 27 has moved under the top sheet, and it is carried by the chain across the pile to complete the separation of the sheet. The sheet is further separated and forwarded by means of sectional rollers 41, 49 which are mounted in oscillating levers 35, which are moved in a clockwise direction to bring the roller 41 under the separated sheet, the levers 48 of the top roller 49 being held by pawls 50, 51 away from the roller 41. When, however, the position shown in Fig. 3 is reached, a trip lever 52 trips the levers 48, and the rollers grip the separated sheet, and as the levers 35 move in an anti-clockwise direction, the rollers 41,

49 are rotated by a fixed rack 46 and gears 45, 44, 43 to move the sheet between guides 53, 54 to forwarding rollers 55, 56. In place of a bar 28 carried by endless chains, a reciprocating stripping plate or tubes may be employed.

## Box Making Machines.

An invention by the Kingsbury and Davis Machine Company refers to a box-making machine, which may be of the kind described in Specification 10729/03. A blank *a* is bent into box form by pressing it between uprights 3, 4, and adhesive corner-staying strips are then applied to the box, after which operation the box-forming plunger 2 rises out of the box and crimpers, 8, 9 move inwards to bend the sides of the box sharply at right-angles to

its base. The lower ends of the uprights 4 are provided with spring strips 10, which always maintain a stack of three successively-formed boxes. Upward movement of a box with the plunger 2 is prevented by spring catches 6. Springs 11 press inwards the sides of the box, thus causing their upper edges to be engaged squarely by the succeeding box.

## Cardboard Boxes.

A cardboard box is made from two blanks, each with four rectangular projecting pieces which are turned up into open-box formation,

and a rectangular strip of paper. A matrix or supporting block is placed within one, and covered by the other blank. The rectangular

strip of paper C is then gummed round the whole, and the edges C<sup>2</sup> and C are turned down and secured to the flat portions A and B of the box so formed. The strip C and the overlapping portion of the outer blank are now cut through, and the matrix withdrawn leaving a shouldered box as shown in Fig. 8. A trade label may be used. The invention is patented by M. A. Wood (J. J. Tyler, Helsingfors).

### Advertising Transparencies.

Mr. C. S. Priestley has patented a method whereby to produce ornamental transparencies of articles and subjects which combine additional matter such as advertisements. A negative of the original is first produced from which a print is made. The print is embellished with the matter to be added and a second negative taken from which the transparencies are made. These transparencies are then coloured on the back. The advertising or other matter added to the first print may be laid out on paper or other suitable material and outlined in black or opaque colouring matter so as to form a margin and hide the junction of any colouring matter applied to the back of the transparency. The paper bearing the added matter is applied to the print which is then suitably worked up by hand and the edges of the added matter worked over to conceal the junction with the picture. The transparencies may be coloured by hand, the darker parts being treated first. The colouring may be applied by means of stencils or the colouring matter may be applied to paper which is subsequently attached to the back of the transparency. Metallic leaf or foils may be used for colouring the transparencies.

# Rotary Photogravure.

By HENRY T. G. MEREDITH.

All the various methods that are in use at the present day for producing a printed impression upon paper, or other material, may be divided into three distinct classes: planographic, relief and intaglio. Planographic, or smooth printing surfaces, are those processes in which there is no appreciable difference in the elevation, or depression of the printing surface, such for example as in work done by the lithographic method either upon stone, zinc or aluminium. Relief, or typographic, processes are those in which the printing surface is either etched or cast in relief. Intaglio printing processes are those in which the illustration is either etched or engraved upon a smooth surface. The impression is produced by the engraved or etched portion being filled in by various means with ink, which is then picked out upon paper by applied pressure.

The word intaglio really means sculpturing, or carving out, as a design upon a cameo, or seal, such that when an impression is taken in wax, the image will be in bas-relief. An engraved monogram upon a ring or cigarette case may also be taken as a simple illustration of the meaning of intaglio engraving. We all know that it would be easily possible to fill in such an engraving with any viscous substance, such as printing ink, and so clean the surface that ink would still remain in the engraved portion. An impression of the monogram might easily be taken by placing a piece of thin paper over the engraving, and rubbing the back.

Steel engraving, dry point, mezzotint and aquatint are all examples of intaglio engraving.

Paper read before the Publicity Club of London.

ing. They were produced almost entirely by hand by various methods of etching and engraving, and printed on the hand press. With the adoption of photo-mechanical means, however, and the substitution of the machine for the hand press, a new branch of industry has developed, which is now known as rotary photogravure.

Rotary photogravure is regarded by most people as a comparatively modern process, but, like many other inventions, the principle was known long before it was possible to make use of it successfully. As long ago as 1852 Fox Talbot produced an intaglio plate by almost exactly the same photo-mechanical means as used for the rotary photogravure cylinder to-day, the vital difference being that instead of using a perfectly ruled screen, he adopted a screen made of coarse muslin. Neither did he possess the advantage that we have to-day of a perfected modern printing press. In the calico and wall-paper printing industry the use of engraved and etched cylinders have been usual for the past 40 or 50 years, and it seems strange indeed that these methods coupled with the discovery of Fox Talbot, were not long ago adapted to the requirements of illustrated reproduction. But even so, rotary photogravure as practised at the present day was discovered by Karl Klic and worked by the Rembrandt Intaglio Printing Co., as long ago as 1895. It was never patented, but was worked in secret for a number of years, it being subsequently left to a Mr. Saalberg in America, and Dr. Mertens in Germany and Great Britain to reveal the secret, and it was to the latter especially that the secret of the printing machine itself was revealed.

### The "Copy" and its Preparation.

Before describing the process it may be helpful to consider the type of original most suitable, and also those that are unsuitable for reproduction by rotary photogravure.

The process is remarkable for the faithfulness with which an original can be reproduced. Anything that is capable of giving a good photographic print wherein all the subtle gradations of tone are produced, will also give a good reproduction by rotary gravure. Drawings of all kinds are suitable, particularly in monochrome wash, and in chalk or charcoal. Paintings in water colour and oil may be suitable, but they would have to be photographed specially, to obtain in black and white the correct colour rendering. Of photographic prints those upon glossy bromide paper give the best results.

Rotary photogravure does not differ from any other process in that it is exceedingly difficult to secure a good reproduction from a bad original. In this category may be placed faded photographic prints, photographic prints upon rough paper, and photographic carbon prints. Prints from other processes may be reproduced with less chance of showing a screen pattern than by the half-tone process. Half-tone proofs used as an original, however, should be avoided if possible. Special methods have to be adopted to avoid this screen pattern, which in the case of periodical work may mean serious delay.

It may be necessary to retouch a photographic print by means of the aerograph, but unless the required retouching is extensive, it is far better to leave that to the photo-engraver, who in many instances would prefer to retouch the negative and positive instead.

Instructions should not be written on the back of unmounted photos. If this cannot be avoided, great care should be used to prevent pressure whilst writing, which frequently is a means of damaging the face of the photo.

Type matter should be kept distinct from pictorial matter and copy should be pasted in position either beneath the photo, or on a dummy make-up. With composite pages, the position and shape required for each photo should be clearly defined. If it is desired to leave the make-up to the photo-engraver, instructions should be given clearly, for it frequently happens that a photo may have to be ruthlessly cut down to fit a specified space. In such cases it may of course happen that the photo-engraver will in his ignorance cut away the very part that should have been left. In all supplement or booklet work a dummy make-up should be sent with the pages numbered, and the desired margins also clearly marked.

Too much care cannot be given to the selection of type matter to be used as an original. There are two ways of supplying this: either a first-class proof upon art paper, or a proof upon a transparent paper, known as onion skin paper. If the latter is used, it must be dusted while the ink is still wet, with very fine black lead powder, or very fine bronze.

### Making Negatives and Positives.

From every original submitted for repro-

duction, a negative must be made by the usual means of the camera, the original being illuminated, as in the half-tone process, by two powerful arc lights. The difference between negative-making for rotary photogravure and for the half-tone process is that no mechanical cross-lined screen is interposed between the lens and the sensitive plate. A cross-lined screen is, indeed, used at a later stage of the process, but in such a manner that it does not destroy the gradations of tone as it does in the half-tone process.

The greater portion of copy sent in for reproduction consists of photographic prints, which have been taken from negatives already in existence. Now with every subsequent photographic operation there must be a tendency to lose a portion of the quality of the original, the tendency being to degrade the lighter tones, or to flatten out the whole picture. Therefore it is preferable whenever possible, and where quality is essential, that one of these original negatives be sent as copy instead of a print. These negatives, whether sent by the customer direct or of the engraver's own making, are then passed on to the retoucher to make any required alteration, revision, or spotting.

From these completed and retouched negatives a positive upon glass is next made—by the usual dry-plate method by contact or by enlarging or reducing in the camera, or a positive print upon glass may be made by what is known as carbon tissue. (Carbon tissue of a similar kind is used at a later stage of the process, and will be explained when dealing with the method of transferring the image to the copper cylinder.) These positives are also spotted and retouched, so that on leaving the retoucher's hands they should be capable of giving a facsimile result, without further retouching in the subsequent processes.

### Lay-out and Planning.

The retouched positives are then passed to the lay-out and planning department, which deals with the planning or lay-out of a booklet or supplement whereby the positives are fitted up into position on their respective pages so that when printed they may be folded, cut and bound up into complete book form.

A dummy sheet is first drawn out in plan, representing for instance, 8, 16, or 32 pages, with the positions correctly indicated for all pictorial and type matter. All particulars regarding the margins, and style of borders, etc., are also clearly indicated. This lay-out is placed on a semi-transparent table top which is illuminated from below by artificial light. Upon the lay-out is placed a piece of glass of substantial thickness, and on this glass all the pictorial positives, or other matter, which it is desired to etch at one operation, are fixed into their respective positions corresponding to the lay-out beneath, the whole thus forming one complete page or sheet of composite positives. The result is very similar to that obtained by the compositor when locking up the various pages into forms representing one whole sheet.

### Print Upon Carbon Tissue.

The negatives and positives are both made without the interposition of a ruled cross-lined screen. But at this stage of the process a print is taken upon a sheet of sensitised carbon tissue from a negative of a line screen by placing one in contact with the other in a pressure frame, and exposing to the electric arc light. The screen consists of a thinner line than that which is used for the half-tone process, but the mesh used is similar to that used for fine work, and has 150 lines or more to the inch. Before developing the print a second exposure is made upon the same tissue from the positive or sheet of positives which have been made up in the lay-out room, and may, of course, consist of a single subject or 8, 16, or 32 pages.

This carbon tissue, which varies in a minor degree only from that used in making the positive, consists of a stout paper coated with a specially prepared film of gelatine, with which is incorporated a colouring pigment. It is sensitised by being immersed in a solution of potassium bichromate, and dried in a non-actinic light. Exposure to light renders the gelatine insoluble in water to a greater or less depth in proportion to the amount of light which the negative or positive has allowed to pass through it. The tissue, after exposure, is immersed in cold water for a few minutes, then brought into contact film down, and squeezed in position on the copper sheet or cylinder from which the image is to be finally printed.

The development of the image is carried out by placing the cylinder in a bath of water, which is raised to a temperature of 100 degs. F. After a few minutes the paper backing may be removed, leaving a gelatine film adhering firmly to the copper cylinder. The development being continued by laving the cylinder with warm water, the whole of the soluble gelatine will in the course of a few minutes be removed, leaving an image of pigmented gelatine in varying thickness, which has been rendered insoluble in proportion to the amount of light which the positive has allowed to pass through.

This negative image, or film of gelatine, now forms the acid resist, and it is this varying thickness of gelatine which determines and regulates the depth of etching. It may appear strange that the development of the carbon tissue should take place from the back of the film, but there is sound reason for that. It must be quite obvious that with the light falling upon the face of the tissue, as it does after passing through the positive, there will be a thin insoluble film over the whole surface, which, if development took place from the front, must be broken up and destroyed, through the soluble gelatine beneath washing up and carrying away with it a portion of the insoluble image. Therefore, by attacking the film from the back we are able to dissolve away the whole of the soluble portion of the film, without in any way interfering with the insoluble image beneath.

*(To be concluded).*

## Design & Industries Association.

Address by Mr. R. B. Fishenden.

There took place on Monday evening the last of a short series of conferences arranged by the Design and Industries Association in connection with the exhibition of printing at the Association's new galleries, 6, Queen's-square, W.C.1. The principal speaker was Mr. R. B. Fishenden, M.Sc.Tech., and the chair was occupied by Mr. F. V. Burridge, R.E., principal of the L.C.C. Central School of Arts and Crafts.

Mr. Burridge, in introducing Mr. Fishenden, referred to the latter's recent return to London, and wished him every possible success in the work he has now undertaken.

Mr. Fishenden, speaking in informal fashion, dealt fairly broadly with the subject of improved printing, laying special stress on the scope for the further application of the ideas of the D.I.A. to illustrative methods, i.e., to the use, the preparation and the actual production of illustrations by present-day processes.

In dealing first with typographic printing, he emphasised the sound general principle that both in the design of type faces and in typographic lay-out one must aim at good visual effect rather than at mathematical accuracy, for work which is mathematically accurate in its proportions does not always look correct.

Commending a direct and pure style in typography, Mr. Fishenden pointed out the economy gained by adhering to a few good type faces. It was possible, he said, to dispense with an immense variety of little-used founts commonly stocked, by substituting an extension of the range of a few of the more useful faces. Then the use of a second colour in typographic work was often a sheer waste of money, as it frequently happened that the weight of the different constituents was such that a better effect was obtained by printing in one colour than by using two. The use of art paper, too, could often be avoided by careful press-work, on suitable paper. Uncoated paper was obtainable, especially in America, on which very fine grained blocks could be used satisfactorily, with an effect much more pleasing than that obtained with coated paper.

In drawing attention to some of the modern illustration processes—lithography, rotary offset, photogravure, etc.—Mr. Fishenden exhibited examples of printed work to show the special qualities of the different methods. He urged that the judicious use of these processes would often lead to more harmonious results than were obtained by the use of half-tone blocks.

The address was followed by an interesting discussion, and the proceedings closed with a cordial vote of thanks to Mr. Fishenden.

## SOUTH-WEST London Master Printers' Association

### Monthly Meeting.

The monthly meetings of the Association, adjourned during the summer season, were resumed on the 11th inst. at Stanley's Restaurant, Lavender-hill, S.W., and there was a good attendance. Mr. J. D. Wise (president) occupied the chair, and among those present were Messrs. W. H. Burchell (hon. sec. of the Central Districts Branch), E. G. Cole (vice-president), A. Spring (past president), Simnett, Chivers, R. Kent (treasurer), W. J. Mizen (sec., North London Association), J. Johnson, Ward Cox (Linotype and Machinery Limited), and F. H. Cole (hon. secretary).

After the secretary had read the minutes of the July meeting and the special meeting in September, which were approved, the president read a letter from Mr. R. A. Austen-Leigh (president of the L.M.P.A.) on behalf of the Printers' Pension Corporation, in which mention was made of the festival dinner at which Sir William Waterlow, K.B.E., is to preside, and made a strong appeal for their support, adding that from their 90 members he hoped to have 90 subscriptions.

Previous to calling on Mr. Burchell for his lecture Mr. Wise welcomed Mr. Mizen to the meeting, and at the same time appealed for greater unity between the different Associations. He also expressed great pleasure in seeing present Mr. Ward-Cox, a representative of so famous a company, and also Mr. Johnson.

After the disposal of some brief routine business Mr. Burchell delivered, in his usual breezy fashion, a talk on "Printing Office Management," and the discussion following revealed the fact that many differences of opinion existed among those present on several points that had been raised.

#### The Lecture.

Mr. Burchell, whose discourse was based on a previous talk on the same subject at a meeting of the South-Eastern Master Printers' Association, drew attention first to the provision he maintained should exist for procuring references regarding employees when they commenced their duties. If such a practice as he had suggested were officially adopted in the trade he was sure it would prevent a lot of waste of time, and be of advantage in the long run to the worker and to the employer. Mr. Burchell then passed round the room a specimen of the agreement he himself had adopted with success, and explained the nature of the information required from an employee before he was engaged.

Efficient time recording was the next *sine qua non* to the successful running of the printing office, be it large or small. The method of working of the one he used himself was for the employee to hand his card to the clerk who stamped it in the employee's presence on

his entering and leaving the premises. This method stopped the possibility of one man ringing off for another.

Mr. Burchell next explained in detail the docket he had in use for the traveller, whom he described as a necessary evil, and strongly advocated a standardised agreement that would cover his work in all their offices, both as regards salary and commission.

The compositor, the reader and the machine minder each had his printed set of rules to guide him in the exercise of his work and in the niceties as to the particular style required by the firm. Before commencing his duties the compositor was informed of all the specimens of type, borders and ornaments available in the room. The reader—by a system which he had inaugurated of closer understanding between the various departments—was able to prevent mistakes occurring. Rules regarding the workers in the warehouse were given and explained, and specimen sheets passed round for inspection showing the method of classifying all paper in the stock book.

An envelope, especially in use for Stationery Office work, with printed information on the outside, showing how to obviate complicated clerical work, was dealt with.

A periodical charge-out sheet, which was described as a history of all the jobs handled, was explained, the use of which enabled one to see at a glance the cost of each item in a job.

The counting-house routine of entering in the daily order book all orders, in which all the time occupied by the various departments was entered from the daily work sheets, and his method of arriving at the cost of the work was lucidly explained with the aid of numerous interesting documents.

Mr. Burchell concluded by strongly advocating a standardised apprentice indenture.

#### Discussion.

Mr. Wise, in opening the discussion, paid a tribute to the care and preparation which Mr. Burchell had gone to in his interesting lecture. He thought he was one of the most loyal printers whom he had ever met, because the many documents he had shown them bore evidence that he was a firm believer in his own craft. Though they might not go the whole way with Mr. Burchell in his method of cost finding, they recognised him as a man who worked from standardised and systematised documents, and was able to arrive at the cost and time taken on a job from the moment it entered until it left the premises. In answer to criticism, Mr. Wise paid a high tribute to the work of the Federation in its cost-finding campaign, and especially to Mr. R. A. Austen-Leigh, than whom it would be impossible to find a man more desirous of helping the smaller printer as much as the larger one to arrive at efficient cost-finding. In him they had a model president, who placed his whole soul in his work.

Mr. Spring said he would like to emphasise the fact mentioned by Mr. Wise that the Federation system of cost-finding was just as applicable to the smaller printer as to the

larger one. He too could not follow all Mr. Burchell's methods of costing, but from him he was sure they would all gather some information that would prove to be of use, more perhaps than he was aware of.

Mr. Mizen, after speaking sympathetically of the difficulties and problems up against the committees at 24, Holborn, and their patience in dealing with them, said Mr. Burchell had produced a large number of valuable sheets, although the costing committee also had a set of sheets which embodied all that is necessary to arrive at correct results.

Mr. Johnson drew attention to the fact that at 24, Holborn, they had a set of dockets which were just as suitable for the small printer as for the large one. True, they were not such large sheets as Mr. Burchell had produced. A set of these could be obtained for 9d. He could tell them that one of their members in the city knew before the end of the month what his profits were up to the end of the preceding month.

Mr. Simnett, speaking as an accountant and an employer, said for 30 years he had made the question of cost-finding a close study, with the result that he had perfected a very successful system. Costing was just as necessary for an employer with two compositors as it was for one with 500. In his own case he could turn up at a moment's notice the cost of all jobs passing through their establishment during the last thirty years. His method enabled him on a repeat order to know why the same amount of composition in the past took 24 hours and to day perhaps took 30. The cost book should be the Union Jack in their business, and he was quite willing to explain his methods of cost-finding to any of the members.

A proposition by the president that the Association should send to Alderman Sir John Baddeley congratulations on his appointment as Lord Mayor of London met with hearty approval.

Mr. Chivers drew attention to the postal authorities surcharging letters containing only patterns sent to wholesale houses under the printed matter rate, and suggested the Association should endeavour to get redress from the Postmaster-General. Other members spoke of having experienced similar treatment, and it was agreed to bring the matter to the notice of the post office authorities.

A hearty vote of thanks to Mr. Burchell for his lecture, for which he briefly returned thanks, brought the meeting to a close.

IN the Chicago Circuit Court Judge Fisher dismissed the action brought by Mayor W. L. H. Thompson demanding £2,000,000 damages for the city from the *Chicago Tribune*. The *Tribune* had severely criticised the civic authorities, drawn attention to extravagances, and declared that the city was bankrupt. Mayor Thompson's suit demanding £2,000,000 was the largest libel action ever tried in the United States.

## Trade Union Matters.

At the quarterly meeting of the National Union of Printing and Paper Workers, Oxford Branch (Bookbinding Section), held on Friday, deep regret was expressed at the resignation of Mr. L. Levett as branch secretary, he having gone into partnership with a city firm. Mr. Levett had been branch secretary for 14 years and had proved a most energetic and earnest worker.

THE monotype section of the piece scale is, as we have already indicated, still awaiting settlement. A conference on the subject between the London Society of Compositors and the L.M.P.A. is to take place on the 31st inst., when another matter to be discussed will be certain new conditions of apprenticeship proposed by the L.S.C.

THE Executive Council of the Typographical Association intimate that there will be a levy of 6d. per member for the half-year ending December, 1921, in aid of the Superannuation Fund which is still below the sum fixed to put the fund on a sound basis.

A DEPUTATION from the Typographical Society and the Printing and Kindred Trades Federation attended a meeting of the Swansea Parks Committee on Wednesday to ask that all the committee's printing should be confined to the town on account of unemployment. Mr. Date said they were sorry it was necessary for them to be there at all. They were embarking on a campaign to keep the town's printing work in Swansea and they asked the Corporation to set an example to the others. The chairman said there would be little or no printing for the next six months, but the deputation could rest assured that their appeal would receive sympathetic consideration.

REFERRING to Sir Charles Oman's much quoted paper at the annual meeting of the Library Association on the high cost of printing, the *Librarian* remarks: "The paper was exceedingly provocative, and advocated, with regret, a lock-out of printers to reduce the cost of scientific books and papers. It is unfortunate that there was no discussion on this, because librarians as a body have experienced the evils of poor pay for more than half a century, and we are sure that they would not wish it to be generally thought that they favoured a lock-out of printers without having all the facts on both sides of the subject before them. We suggest that the journeymen printers should have an opportunity at an early monthly meeting of putting their side before the members."

SOME persons "fall into a fortune," but nobody ever yet fell into success. Success entails climbing.

# “SLOGGER”

## AUTOMATIC SHEET FEEDER

### Latest Improvements on the “SLOGGER.”

1. Aluminium Stroker Arms avoiding all bending.
2. More accessible Pile Raising Adjuster. Absolutely self-locking. No lock nuts to work loose.
3. Automatic side lay giving perfect register.
4. Fine thread Caliper Adjustment which immediately stops machine and feeder if two or more sheets are stuck
- 5, 6 & 7. Stopping, Starting and Trip Handles. All controls in one place.
8. Bevel Drive instead of Chain.
9. Fan for air draft mounted in one unit on Base of Feeder.
10. Leather collapsible joint to allow air-box movement without the use of perishable rubber.
11. Air throttle control adjusted in a few seconds for any thickness of paper or board
12. Pile Raising Handle for raising pile to starting height at the commencement of each loading.

### BRITISH THROUGHOUT.

**Perfect Automatic Register. No continual re-loading.**  
**Can be attached to any make of sheet-fed press or folding machine.**

## Trade Notes.

THE death occurred at Liverpool last week of Mr. Charles Williams, over 30 years with the *Liverpool Courier*.

THE weekly journal, *Plain English*, is appealing to its readers for voluntary financial assistance in order to continue publication.

THE funeral of Mr. Arthur Edwin Gould, editor of the *Hoylake and West Kirby News*, took place at the West Kirby Parish Church on Saturday in the presence of a numerous assembly.

THE case against the *Daily Mirror* Newspapers, Ltd., which concerns the printing of posters during the Hertford by-election, was on Saturday at Hertford adjourned till November 5th.

A NOVELTY introduced by the *Daily Mirror* consists of an entirely new paper for children, to be given free with the *Daily Mirror* every Saturday in the form of a supplement, called "Pip and Squeak."

"THE MAKING OF A NEWSPAPER" was the subject of a lecture delivered on Monday evening at South Kensington by Mr. Wickham Steed, editor of *The Times*, to a gathering of students who are studying for the University of London diploma in journalism. At the conclusion of the lecture a cinematograph film was shown depicting the production of *The Times*.

**DISTRIBUTION OF GOVERNMENT PRINTING CONTRACTS.**—Mr. W. Graham, M.P., addressing a meeting of unemployed members of the printing trade in Edinburgh, said it would be worth while finding out if Edinburgh and Leith were getting their fair share of Government printing contracts, and he would make it his business to communicate with the proper authorities, and let them know the result.

IN the Chancery Division, on Friday, Mr. Justice Astbury granted an injunction restraining the *Eastern Morning and Hull News* Co., Ltd., from offering for sale or otherwise circulating between 4.30 and 6.25, in Hull, any print or copy of their paper containing words "Late City," or a get-up in such style as to represent or induce the belief in an intending purchaser that such a paper was the *Hull Daily Mail*, the owners of which were plaintiffs in the action. Defendants were ordered to pay costs.

**WILLS.**—Mr. Charles B. A. Ravenscroft, Turnham-green, and Sicilian-avenue, W.C., newspaper proprietor, £2,854; Mr. Cornwallis F. H. Smith, of Islington, for 50 years a member of the staff of *The Times*, £2,812; Mrs. Elizabeth Little, Heckington Hall, Lincoln, widow of the late Mr. W. Little, who, in conjunction with his brother-in-law, founded the *Illustrated London News*, £56,752; Mr. James Frederick Smith, of Ealing-common, W., stationer, £17,384; Mr. William Henry Clough, of Bradford, newsagent and book-seller, aged 75, £47,191.

IN connection with the World Service Exhibition at Liverpool last week, Mr. Basil Mathews, editor of *Outward Bound*, spoke on "Journalism as World Service."

THE annual gala of the Odhams Press Swimming Club was held at the Holborn Baths on Saturday night in the presence of the president, Mr. J. S. Elias, and a large and enthusiastic gathering.

THE October number of the *Print-Collector's Quarterly* has the usual profusion of excellent illustrations and several special articles, first place among which is given to one on "Hendrik, Count Goudt," by H. S. Reitlinger.

AMONG new members of the Swedish Chamber of Commerce are: Messrs. F. W. Potter and Co., Ltd., 131-133, Middlesex-street, London, E.1 (printers and publishers); and Messrs. Ramson and Co., Ltd., 16, Laurence Pountney-lane, E.C.4 (printers and stationers).

THE Printing and Allied Trades Sports Association will hold amateur boxing competitions at three weights, 8st., 10st. 4lb. (open), and 9st. 9lb. novices, at the Northampton Polytechnic Institute, Clerkenwell, on Friday, November 18th. Particulars can be obtained from the hon. sec., C. Anderson, 3, Ongar-road, London, S.W.6.

MESSRS. E. AND S. LIVINGSTONE, publishers, Edinburgh, have in preparation a useful educational series of works dealing with art, education, commerce and industry, forestry and agriculture. The first volume of the series deals with "The Principles of the Law and the Sale of Goods," by Mr. Henry Aitken, K.C., who sets forth the law on the subject with great clearness, and provides a full citation of authorities. Thus the work is not only useful to business men and students, but to lawyers as well. A carefully prepared index is a valuable adjunct.

THE anniversary dinner of the Newsvendors' Benevolent and Provident Institution, which was held last week under the presidency of Mr. C. H. St. John Hornby, claimed the double record of the largest subscription list and the largest attendance of guests—numbering over 300—since the inauguration of this festival. It was announced by the secretary (Mr. W. Wilkie Jones) that the amount subscribed to the funds of the institution was £10,450 13s. 6d. The list of name pensions of £600 each was headed by the wholesale branch of W. H. Smith and Son, who contributed £1,542 16s. to name two pensions, and other donors of £600 were Viscount Hambleden, W. H. Smith and Son, Sir William Berry and Mr. Gomer Berry, the Amalgamated Press, and "Nash's Magazine." Mr. C. H. St. John Hornby gave £250, Sir John Ellerman £200, Lord Marshall £200, the proprietors of the *Daily Telegraph* 100 guineas, Associated Newspapers Ltd. 100 guineas, Chas. Goodall and Sons 100 guineas, Lloyds Bank Ltd. 100 guineas, London County Westminster and Parr's Bank Ltd. 100 guineas, the *Observer* 100 guineas, proprietors of *Punch* 100 guineas, Col. A. D. Acland £100, George Newnes Ltd. £100 and C. Arthur Pearson Ltd. £100.

# Current Topics.

## Reduce Postal Rates!

NOW THAT Parliament is sitting once more, it is to be hoped that a definite statement may be obtained from the Government promising some reduction—if not immediate, at least definite in regard to date—of the high postal rates which are hampering British trade in general, and putting a special handicap upon the printing industry. The views of business men throughout the country have been made unmistakably plain. The latest voice to be heard from the industrial community is that of the Edinburgh Chamber of Commerce which has sent a representation to the Postmaster-General stating that in the experience of members the curtailment of postal facilities and the increased cost of postal communication are affecting adversely the trade of the country. Trade, they state, has been seriously impeded and expected revenue has not been realised. The directors urge that in the interests of a revival of trade cheap and

rapid postal communication should now be restored. They point out, as has been often done already, that the increased rates afford an opportunity to printers on the Continent to print and post circulars there, on behalf of advertisers, at a cost considerably less than the work and postage would amount to in this country. The facts of the position must now be clear to everyone; moreover, every member of Parliament has, we believe, had the matter brought individually to his attention. It now remains for Parliament to make it clear to the Government that something must be done in this matter, and it is vitally important that what is going to be done should be known now.

\* \* \*

## A Decline in Paper Imports.

THE upward movement in the imports into the United Kingdom of paper and boards which marked the August returns, as compared with June and July, had a set back last month. The total arrivals were 590,755 cwts., a decrease of 419,968 cwts. (41·5 per cent.) as compared with September of last year, and a drop of 495,379 cwts. (45·6 per cent.) as compared with September, 1913. The total value of last month's imports was £289,535, a drop of no less than £1,916,747, or 68·3 per cent. as compared with September of last year. The comparison, however, with September, 1913, shows an increase in last month's total value of £246,428, or 38 per cent. Last month, as compared with September of last year, there was a drop of 99,370 cwts. in the receipts of printings and writing paper. The arrivals from Norway, Sweden, and Germany (particularly Norway) show a heavy decline, the only country that substantially increased its trade with the United Kingdom being Belgium. Packings and wrappings received at British ports last month were 146,350 cwts. under the quantity received in September of last year; the receipts from Sweden were about 50 per cent. less, and those from Norway 70 per cent. less. The import of strawboards and other boards last month show a decrease of over 43 per cent. as compared with September of last year. The total imports of paper and boards for the nine months ended September last were 4,536,078 cwts., a decrease of 47·8 per cent. as compared with the corresponding period of last year, and a decrease of 52·8 per cent. as compared with January-September, 1913. The total value of the imports during the last nine months stands at £8,703,194, a decrease of 63·7 per cent. as compared with the corresponding period of last year, and an increase of 52·5 per cent. as compared with January-September of 1913.

### Increased Exports of British Paper.

A NOTEWORTHY increase took place in the exports of British paper during September as compared with the three previous months. The returns show the following shipments:— June, 104,557 cwts.; July, 94,616 cwts.; August, 84,957 cwts.; and September, 137,260 cwts. As compared with the exports during September, 1920, last month's figures show a decrease of 35·4 per cent., and as compared with September, 1913, a decrease of 52·7 per cent. The total value of the exports last month amounts to £524,782, a decrease of 58 per cent. compared with September of last year, and an increase of 77·7 per cent. as compared with September 1913. Of last month's exports, printings comprised 57 per cent. of the total. The quantity amounted to 77,913 cwts., of which 50,376 cwts. went to British Possessions and 27,537 cwts. to Foreign Countries. As compared with the September of last year, very little change took place last month in the supply of printings to Australia and South Africa; New Zealand, however, improved her purchases, but quite a slump was experienced in exports to India, the quantity dropping from 35,864 cwts. to 6,853 cwts. The shipments of writings last month were 14,534 cwts, the bulk going to British Possessions, namely, 11,917 cwts., whilst 2,617 cwts. went to Foreign Countries. India is the principal market for British writings, but a shrinkage is shown in the supplies last month of 2,235 cwts. as compared with September of last year. The shipments to South Africa were 1,429 cwts. as against 705 cwts. a year ago, whilst the Australian demand dropped from 6,199 cwts. to 3,406 cwts. Taking the exports for the nine months ended September last, the total quantity amounts to 1,069,440 cwts. as against 1,590,281 cwts. for the corresponding period of last year, and 2,679,583 cwts. in 1913, showing decreases of 520,841 cwts. (32·7 per cent.) and 1,610,143 cwts. (60·1 per cent.) respectively. The total value of the exports for the nine months of this year amounts to £6,124,444, a decrease of £2,019,810 (24·8 per cent.) compared with the corresponding period of last year, and an increase of £3,325,996 (118·8 per cent.) contrasted with January–September, 1913.

THE American Writing Paper Co. has made elaborate arrangements for the distribution of its fine papers through Eagle A service houses located in every city in the United States and in some of the principal centres of the world. The announcement is made on a deckle-edge broadsheet sent out in an envelope of the same quality paper. Included among the "service" houses is that of the Lindenmeyr and Johnson Paper Co., Upper Thames-street.

### Personal.

ALDERMAN SIR ROWLAND BLADES, M.P., was the chairman on Tuesday evening at the annual festival dinner of the Provident Surgical Appliance Society at the Hotel Cecil.

MR. B. K. LONG, Imperial and foreign editor of *The Times*, who has just left this country to take up the editorship of the *Cape Times*, South Africa, in succession to the late Sir Maitland Parke, was entertained at luncheon at the Savoy Hotel on Wednesday of last week by the Empire Press Union.

VISCOUNT BURNHAM, president of the union, was in the chair, and the gathering included a large number of Mr. Long's friends and colleagues in the Press of this country and of the Dominions.

MR. R. A. AUSTEN-LEIGH (president of the London Master Printers' Association) has joined Mrs. Austen-Leigh in Italy, where she is staying for her health.

DURING the president's absence, Mr. A. Langley is discharging the duties of acting president.

MR. S. J. SANDLE has been appointed the chairman of the committee nominated by the Lord Mayor elect and the Sheriffs to organise the civic pageant and the Guildhall banquet on November 9th.

MR. W. R. CUMMINS, founder and proprietor of the successful printing, news agency and stationery business known as W. R. Cummins, Ltd., of Muswell-hill, has just completed a quarter of a century of business life.

MR. CUMMINS is proprietor of the *Muswell Hill Record*, and in that journal he has published an illustrated account of the growth of his successful business since the time when—on October 5th, 1896—he started as a wayside newspaper vendor, his first day's takings being 7½d.

MR. RAYMOND M. LANCASTER, the ex-secretary of the Leeds Typographical Association, and a Justice of the Peace for the City of Leeds, has been elected president of the Yorkshire Centre of the Industrial League.

MR. E. A. LEACH, newspaper editor, is one of the new candidates in the municipal election at Tenby.

MR. W. DENHAM FULTON, managing director of the Premier Paper Mills, Ltd., Klip River, Transvaal, is at present on a business visit to this country.

## DIVIDENDS AND REPORTS.

**ODHAMS PRESS**—At the meeting of shareholders of Odhams Press, Ltd., last week, the chairman announced that as a result of very satisfactory trading for the first six months of the current year the board felt justified in declaring an interim dividend of 5 per cent. on the ordinary shares, payable November 11th. Hitherto it has not been the practice of the company to pay an interim dividend. Last year the distribution for the whole year was 8 per cent.

**EYRE AND SPOTTISWOODE**.—After providing £4,793 for interest on debenture stock, £1,200 for debenture stock sinking fund, £862 for leaseholds sinking fund, £9,097 for depreciation of plant, type, fittings, etc., and writing off £1,000 from cost of issue of mortgage debenture stock, accounts of this London firm of printers for year ending March last show profit of £7,377; add £9,533 brought forward, making a total credit balance of £16,910 to be carried forward. No dividend on ordinary previous year.

**CHARLES MORGAN AND CO., LTD.**—The directors have decided not to pay an interim on the ordinary.

## NEW ISSUE.

**ODHAMS PRESS, LTD.**—Subscriptions are invited for an issue of 225,000 10 per cent. Cumulative "A" preference shares of £1 each at par. The shares will rank after the 8 per cent. £1 preference shares, of which 525,000 have been authorised, and 513,007 issued or under contract to be issued. The company has no debenture debt. Odhams Press, Ltd., was incorporated in April, 1920, for the purpose of acquiring and amalgamating the businesses of Odhams, Ltd., and John Bull, Ltd. Net profits for the last eight and a half years appear in the prospectus, and were returned at £160,499 for 1919 and £150,265 for 1920, while for the six months ended June 30th last the figures were £85,788, being at the rate of £171,576 per annum. It is stated that the company has purchased the daily newspaper, the *Sporting Life*, and in October last an agreement was entered into for acquiring the businesses of the Borough Billposting Co., Ltd., and A. E. Abrahams, Ltd. In addition, an agreement has just been concluded for the purchase of the whole of the share capital, with the exception of twenty shares, of the publishing business of Dean and Son. The objects of the issue are to provide further capital in respect of these additional undertakings, for general purposes, and extension of the company's business. Surplus assets, including the proceeds of the present issue, but not including the expenses in this connection, are given at £1,231,000.

## NEW COMPANIES.

**HAYES LITHOGRAPHIC PRINTING CO., LTD.**—Capital £7,000 in £1 shares; calico printers, printers on paper, textile fabrics, floor coverings and metal sheets, bleachers, dyers, paper-makers and stainers, etc. Private company. First directors: W. E. Shaw, G. Telfer and B. Handley.

**SOUTHWARK PRESS, LTD.**—Capital £1,000 in £1 shares; printers, publishers, etc. Private company. First directors: F. J. Hubbard, E. E. Frowde and H. W. Frowde. Registered office, 242, Old Kent-road, S.E.1.

**THURSTON PRESS, LTD.**—Capital £300 in 5,940 ordinary and 60 deferred shares of 1s. each; publishers, printers, engravers, die-sinkers, stationers and booksellers, etc. Pri-

vate company. Directors: J. T. Thrower and C. E. Lee. Registered office, 38, Poland-street, Oxford-street, W.1.

**W. S. MUIR AND CO., LTD.**—Capital £10,000 in £1 shares, to acquire the business carried on at 83, Upper Thames-street, E.C., as "W. S. Muir and Co." and to adopt two agreements with W. S. Muir, J. M. Hannah and E. Stepan, and to carry on the business of paper merchants and makers, agents, shippers, and contractors, paper mill representatives, envelope, paper bag and box-makers, dealers in fine art and general fancy goods, etc. Private company. Subscribers: H. F. Hellings and E. T. Remfry. Registered office, 83, Upper Thames-street, E.C.

**THROSTLE CO., LTD.**—Capital £2,000 in £1 shares; paper bag manufacturers, manufacturing stationers and dealers in paper and stationery, etc., and to adopt an agreement with C. H. Irons. Private company. First directors: C. H. Irons and Mrs. C. Irons. Registered office, 213, Hoe-street, Walthamstow.

**WOOD-NORTH CO., LTD.** (Birmingham).—Capital £500 in £1 shares; manufacturers of or dealers in pin tickets and all other devices for marking goods, stationers and stationers' sundriesmen, printers and metal workers, etc. Private company. First directors: F. S. Read and S. J. Shaw.

**JAMES LANGLEY AND CO., LTD.**—Capital £5,000, in £1 shares (2,000 pref.); buyers, sellers, manufacturers, importers and exporters of or dealers in toys, games, requisites for games, sweets, confectionery, tins, canisters, cardboard and other boxes, toilet requisites, stationery, books, newspapers, periodicals, magazines, playing, visiting, festive, complimentary and fancy cards, pictures and picture frames, picture post cards, fancy goods, etc., and to adopt an agreement with J. Langley. Private company. First directors: J. Langley, Mrs. Beryl M. E. Edwards, Miss E. P. E. Langley, Miss E. M. Langley and F. Moore. Registered office: 14, Prince of Wales-road, Norwich.

**HOLMES TYPEWRITER AND STATIONERY CO., LTD.**—Capital £1,000, in £1 shares; to take over the business carried on by A. A. Holmes at 45, Prince of Wales-road, Norwich, as the "Holmes Typewriter Co.," and to carry on the business of dealers in typewriters, duplicators, multigraphs, typewriter supplies and accessories, etc. Private company. Subscribers: A. A. Holmes and F. T. Latten.

**STEREOS, LTD.**—Capital £2,000, in £1 shares; advertisers, advertising agents, dealers in advertising machines, etc., and to adopt an agreement with R. Balmer. Private company. First directors: R. Balmer and H. F. Charles. Registered office: 5-7, Moor-lane, E.C.2.

### COMPANY MORTGAGES AND CHARGES.

Fresh Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 1908, and Satisfaction registered pursuant to Section 97 of the same Act. (The registration of Satisfaction is not compulsory).

**MACRAU, LTD.** (Printers).—Mortgage dated October 3rd, 1921, to secure £250, charged on part of 17, Alfred-place, London. Holders: C. R. Steele and J. B. Baker, 6, Finsbury-square, E.C.

**STANDARD CATALOGUE CO., LTD.**—Issue on September 22nd, 1920, of £5,000 "B.S.E." and £2,000 "E.S.I." debentures, parts of a series already registered.

**VICTORIA HOUSE PRINTING CO., LTD.**—Debenture dated September 20th, 1921, to secure £13,000, charged on freehold and leasehold property, plant, machinery, etc., at Tudor House, Tudor-street, E.C., and elsewhere, and the company's undertaking and property, present and future, including uncalled capital. Holders: Co-operative Wholesale Society.

**J. WHITAKER AND SONS, LTD.** (Printers' etc.).—Mortgage and supplemental charge under Land Transfer Acts, and debenture, dated September 23rd, 1921, to secure £7,000 charged on 12, Warwick-lane, E.C., and the company's undertaking and property, present and future, including uncalled capital. Holders: Spicer Brothers, Ltd.

**CAXTON PUBLISHING CO., LTD.** (London).—Satisfaction to the extent of £800 on August 2nd and £900 on September 22nd, 1921, of debentures dated May 3rd, 1910, securing £40,000.

**GLOSSOP PRINTERS, LTD.**—Issue on September 14th, 1921, of £1,250 debentures, part of a series already registered.

**HOGG AND KNIGHT, LTD.** (Printers, London).—Satisfaction to the extent of £100 on September 24th, of debentures dated January 28th, 1921.

**F. HILL SELLAR, LTD.** (Printers, stationers, etc.).—Mortgage debenture dated September 29th, 1921, to secure £136. Charged on company's undertaking and property, present and future. Holder: J. Kirkby, 11, Westmoreland-street, Pimlico, S.W.

**CHARLES ODELL, LTD.** (Newspaper proprietors, etc., London).—Particulars of £3,000 debentures authorised September 19th, 1921; whole amount issued; charged on the company's undertaking and property, present and future, including uncalled capital.

**A. W. ELLIS AND CO., LTD.** (Stationers, manufacturers of pencil boxes, leather, and leather and fancy goods, etc., London).—Issue on September 28th, 1921, of £50 debentures, part of a series already registered.

**JOHNSON'S SIGNS, LTD.**—Mortgage on 233, Edgware-road, W., dated September 30th, 1921, to secure all moneys due or to become due from company to Barclay's Bank.

## BANKRUPTCIES, etc.

*Re* J. W. MILWARD (trading as J. W. Milward and Co.), printing contractor, 368, Strand, W.C.—Mr. Registrar Francke, at the London Bankruptcy Court on October 14th, approved a scheme submitted by this debtor providing for the release of claim amounting to £668 and the payment of a composition of 5s. in the £ on the remaining debts. Mr. F. T. Garton, official receiver, reported that the debtor failed in July, 1920, with ranking liabilities £1,556, and that a sum of £270 had been paid into Court, sufficient to provide for the composition on the balance of £880, and the costs of the proceedings. The assets were returned at £89, consequently the scheme was to the benefit of the creditors to participate thereunder. The debtor commenced business as above in October, 1914, and he attributed his failure to liability on accommodation bills, of which he was the drawer, and in respect of which he received no consideration, but had paid about £300 to the holders; to his having to pay cash for paper, and to heavy household and personal expenses in consequence of his son's illness. His Honour approved the scheme and rescinded the receiving order.

## Gazette.

### A WORD OF CAUTION.

In giving the official Gazette information, it must be distinctly understood that we take official records as we find them, and accept no responsibility for inaccuracies, while, as an almost invariable rule, the facts will be found correct. We advise our readers, before forming hasty judgment, to consider that there may be in each case satisfactory explanation which does not appear on the records.—Ed.]

### ENGLAND AND WALES.

#### PARTNERSHIPS DISSOLVED.

Robert Luke Rutter and Frederick Robert King, 145, High-street, West, Sunderland, printers.

Frederick Thomas Treverton, Annette Clementina Brearley, and Ethel Rosina Luxton, fancy box manufacturers, 32, Spital-square, Bishopsgate.

#### THE BANKRUPTCY ACT, 1914.

##### RECEIVING ORDER.

Richard Sillett, 5, Paul-street, Finsbury, general stationer, October 11th. Public examination, December 20th, at Bankruptcy-buildings, Carey-street.

MESSRS. GEE AND CO. (PUBLISHERS), LTD., of 14, Victoria-street, send us a useful catalogue of accountancy publications, in which are listed, with prices and details of contents, a comprehensive selection of books of interest to accountants.

## "Printing Office Management."

### North London Meeting.

At Finsbury Park on Monday evening Mr. W. H. Burchell gave an address upon the above subject to a large and representative gathering of North London printers under the auspices of the North London Branch of the London Master Printers' Association.

Commencing with the broom in his advocacy of cleanliness, Mr. Burchell went through the many methods which could be adopted to attain this end, and enumerated the rules and devices necessary to maintain conditions satisfactorily from the health point of view.

Punctuality was another point stressed, and from this to the works manager, whose lack of tact at times created a feeling of hatred and contempt, leading to much misunderstanding, which did not make for efficiency, and certainly retarded production. It should, in Mr. Burchell's idea, be for the manager to get thoroughly in touch with each of his men, to understand his ability and select the work most suitable. Personal help would be beneficial to each, and the output would be increased.

In the counting house all orders should be entered and dockets issued to the works, which when completed are returned for entering into charging-out book.

Many instances of under-estimating by both London and country firms were given by Mr. Burchell, who made a strong appeal to members to act fairly by other printers. Other points touched upon in this comprehensive address were full and up-to-date valuations, also the important item of debt recovery.

Mr. D. A. Whitehead, who occupied the chair, opened the discussion upon many of the points raised, and several other members also joined in, making a most interesting evening for this branch.

Mr. J. Mortimer, of the Printers' Pension Corporation, was present and spoke, by request, on the work of that body, and this was supplemented by an appeal from the chair for support for Mr. R. A. Austen-Leigh's effort. It is hoped that as a result North London will do its share in the forthcoming big rally on behalf of printers' pensions.

**LITHOGRAPHY FOR ADVERTISING.**—Great advancement is being made in this country in the use of lithography for advertising purposes. Printers who have recently visited the United States testify that there many lithographers are busy, while many of the type printers are idle. Coloured advertising, with good striking designs, is known to have more attractive power than ordinary black and white. America is the leader in coloured advertisements, and although the method of lithography is yet like a foreign language to many British advertisers, it may be hoped we are on the eve of the far wider use of lithographed work.

## South-East London Master Printers.

### A Number of Interesting Subjects Engage the Attention of Members.

Mr. E. B. Smith (president) occupied the chair at the monthly meeting of the Association of Master Printers of South-East London at the Bridge House Hotel, London Bridge, on the 11th instant, when a number of important matters came up for consideration.

In answer to a question, Mr. W. Whyte, secretary of the London Master Printers' Association, stated the position with regard to the adjustment of Rulers' wages.

The president referred to the events arising out of the recent negotiations and argued for greater cohesion in respect of the members of the South-East Association. He urged that there should be a local office and an organiser, who would keep in touch with the members from time to time. They were not able to do that on the allowance which they now received from the L.M.P.A.

Mr. J. J. Keliher mentioned that the allowance was originally arranged when the subscription was on the old basis, and in view of the higher scale which had since been introduced he thought the whole matter should be reconsidered, because in his opinion 24, Holborn, would be justified in making a much more liberal allocation.

The president thought the local Association would be of greater assistance to 24, Holborn, if they were allowed to organise the district themselves. As matters stood now, they were not organised in any sense of the word, although, perhaps, it was their own fault to some extent.

It was agreed that the president, the hon. secretary and the treasurer should wait upon the Council as a deputation and express their views on the subject.

### Printers' Pension Corporation.

Mr. W. A. Clowes, as treasurer of the Printers' Pension Corporation, made an appeal to master printers in the South-East district to give financial support to the Corporation. He said it came as a shock to some of them when they found that only between 200 and 300 master printers were in the list of subscribers. There were over 1,000 master printers belonging to their Association, so that two-thirds of them did not subscribe at all. On the other hand, the men assisted by subscribing 5s. and collecting small sums, thus raising over £4,000 a year. But the Corporation was mainly dependent for its resources upon the Annual Festival Dinner, which last year, under the presidency of the Prince of Wales, realised £52,000. The Corporation now spent roughly £32,000 a year, and it was going to be a matter of difficulty to raise the sum required. The organisation had 735 pensioners who received sums ranging from £16 to £52. In addition, they had taken on the

children and widows of printers who had fallen in the war, and this alone cost them £13,000 per annum. Mr. Clowes, in urging master printers of the district to support the Association, asked them to make a personal matter of it and to use their influence with their fellow printers. He went on to refer to the particularly difficult task which Sir William Waterlow would have in presiding over the Annual Festival Dinner on November 2nd, not only because of the splendid effort which the Prince of Wales made last year, but also owing to the condition of industry at the present time. Mr. Clowes therefore hoped all master printers would come to Sir William's assistance.

Mr. Brigenshaw read a letter appealing on behalf of the Corporation, which, it was pointed out, had an income of only £6,000, and the balance of the money expended had to be raised by subscriptions.

It was agreed to issue a letter to the master printers in the district supporting the L.M.P.A. president's appeal in the name of the district president, and the hon. secretary (Mr. F. Mason).

Mr. Griffiths, secretary of the Coventry Association, who was present at the meeting, undertook to make the appeal known in his own district.

Mr. E. A. Dawe then addressed the members on "Pertinent Points on Paper," a summary of which appears in another column.

## North-East London Auxiliary.

On behalf of the A. Chris Fowler Memorial Pension, Mr. Arthur O'Connor, secretary of the Printers' Medical Aid Association, took the chair at a concert held at the "Mail Coach," Camomile-street, E.C., on Monday, when he was supported by the Right Hon. C. W. Bowerman, M.P., Mr. F. T. Cox, the hon. sec., Mr. and Mrs. F. T. Cross (*Daily Sketch*), Mr. and Mrs. Hallet (H.M.S.O., Hare-street), Mr. A. Stannard, Mr. J. S. Hodgkinson, Mr. L. Le Bosse, and other friends. There was an excellent entertainment, Mr. Edward Farrington's concert party being the entertainers. Much approval was shown of songs by Mr. Farrington (an excellent baritone), Mr. Arthur Terriss (tenor), and Miss May Hadley (a sweet soprano), while the humorous essays of Mr. Archie Venta, and the light comedy items of Miss Violet Strivens all added to the enjoyment of the occasion. Mention should be made of the excellent and careful accompaniments of Miss Lily Marsh and the monologue of Mr. Watts. The plate realised £10.

**UNFOUNDED RUMOUR.**—A report has been freely circulated that a well-known Lancashire mill, which changed hands during the last few years, had been re-sold, the purchasers being alleged to be interested in the co-operative movement. The mill in question has not been sold, in fact negotiations have not even been carried on.

# The Printing Crafts Guild.

## Annual Meeting in Manchester.

The fourteenth annual general meeting was held in the Municipal College of Technology, Manchester, on Saturday, when Mr. Charles W. Gamble, O.B.E., M.Sc.Tech., occupied the chair.

After the disposal of the minutes, the hon. secretary read the report of the executive for session 1920-21, which was as follows:—"In presenting the fourteenth annual report and balance-sheet, your committee regret that owing to the very unsettled state of the industrial world during the past twelve months, several important visits had to be postponed. It was with deep regret we were informed that your esteemed chairman, Mr. R. B. Fishenden, M.Sc.Tech., has found it necessary to tender his resignation owing to his acceptance of an important commercial position in London. Mr. Fishenden has been at the centre of the Guild's progress, and it has been through his untiring energy that the prestige of the Guild stands so high, educationally and numerically, to-day, being widely considered to be the premier Guild in the country. It has an unbroken record for the past fourteen years, and under Mr. Fishenden's careful guidance its course has been one of continuous progress. At the annual concert on September 24th last, your president had the pleasant duty of handing to the retiring chairman a beautiful silver tea and coffee service in appreciation of services rendered to the Guild. The concert was attended by about 600 members and friends, and a delightful programme had been organised for the occasion by Mr. Edgar Ashton. The membership at the close of the present session is: Honorary members, 14; ordinary members, 307; junior members, 123; making a total of 444, this being one more than the previous session. The balance sheet shows an income of £75 17s. 11½d., and an expenditure of £31 3s. 7d., leaving in the hands of the treasurer a favourable balance of £44 14s. 4½d.

(Here follows the syllabus for the past session.)

"An event of importance last March was a concert which enabled us to hand over the sum of £100 to the Printers' Pension, Almshouse, and Orphan Asylum Corporation, an institution which has done so much to assist local war widows and orphans of fallen craftsmen. Your committee asks you to join with them in thanking the following for their valuable assistance to the guild: Captain Moir and the House Committee for the use of rooms, Messrs F. G. Curson, J. Huebner, Geo. W. Jones, A. H. Munday, A.T.C.E., F.C.S., A. Williamson, Messrs. Pickup and Knowles (Pendleton), the Proprietors P. P. Press (Liverpool), Messrs. Norbury, Natzio and Co., Ltd., and all who have contributed to the success of the year's work.—JOHN TAYLOR, President; F. J. HUGHES, Hon. Secretary."

The statement of accounts and the auditor's report being approved, the election of officers was as follows:—President, John Taylor; chairman of committee, Charles W. Gamble, O.B.E., M.Sc.Tech.; hon. treasurer, C. Doughty; hon. auditor, J. Begg; assistant hon. secretary, H. Holme; hon. secretary, F. J. Hughes, 424, Molston-lane, Manchester; committee—Messrs. E. Dust, J. E. Cass, J. Crook, A. Edwards, G. H. Lodge, J. I. Menzies, W. M. Menzies, A. Piggott, H. J. Phillips, —Shelmerdine, Ed. McVay, Jas. Worthington; district representatives—E. Ashton, 5, Lynton-road, Chorlton-cum-Hardy; H. Holme, 37, Welbeck-street, Ashton-under-Lyne; J. R. Linton, 44, Hilden-street, Bolton; F. Roscow, 15, Malvern-avenue, Walmersley-road, Bury; H. W. Wallace, 10, Newtonhurst, Victoria-street, Newton, Hyde; G. Rider, 36, Trinity-street, Oldham; Wm. Ingham, 31, Mackinnon-street, Rochdale; R. F. Singleton, 113, Turncroft-lane, Stockport.

Other business included the fixing of the subscriptions: Honorary members (minimum) 10s.; adult members, 2s.; junior members, 1s. The committee were empowered to make a grant of £5 to a charitable institution; to consider a scheme whereby a portion of the committee should retire annually, and to add to rules, "That on all visits two officers shall hold themselves responsible for each party, the one to act as leader and the other to bring up wanderers." The business being over, the chairman called upon the lecturer for the evening to give "The Romance of an old Canal." Mr. J. J. Phelps, M.A., gave a very interesting account of the origin of the Old Bridgewater Canal and how Manchester owes its prosperity to the energy of the Third Duke of Bridgewater, and his engineer, whereby capital and labour so worked hand in hand that what looked like a veritable failure was brought to a successful issue. This journal being for matters printerian, I refrain from reporting more fully, although the full story as told by Mr. Phelps would make many local printers point with pride to the familiar quotation: "What Manchester does to-day the rest of the Kingdom does to-morrow."

The following arrangements have been made for the new session:—

November 5th, 7.15: Lecture, "Automatic Devices in the Printing and Allied Crafts," by Mr. E. Fisher, Ex-Instructor in Typography, City and Guilds of London Institute.

December 9th: Visit, *Daily Mail*, Deansgate (Associated Newspapers, Ltd.)

January 21st, 7.15: Lecture, "Printing in America," by Mr. Fred W. Seeley. A large collection of specimens will be on view.

January 27th: Visit, *Daily Mail*, Deansgate (Associated Newspapers, Ltd.)

February 4th, 7.15: Lecture, "Printing Metals," by Mr. John Cantland (Messrs. Fry's Metal Foundry).

February 17th, 7.0: Visit: Messrs. E. Hulton and Co., Ltd. (Friday).

February 24th, 7.0: Visit, Messrs. E. Hulton and Co., Ltd. (Friday).

March 3rd, 7.15: Lecture, "Colour and

Colour Printing," by Mr. David Greenhill (Sun Engraving Co., Watford).

March 18th, 3.0: Visit, Linotype and Machinery Limited, Broadheath.

WEE MAC.

### Mr. Richard Bolton.

The death occurred last week, at Anfield, of Mr. Richard Bolton, one of the oldest master printers in Liverpool. Mr. Bolton, who was in his 74th year, commenced business in 1878, establishing the firm now known as Bolton Brothers, at 24, Cable-street, where he built up an extensive connection as printer for the trade. Some two years ago his premises were destroyed by fire, and although they have now been rebuilt, and the business is being carried on by his sons, the calamity preyed on Mr. Bolton's mind to the extent that his health rapidly failed. Five months ago he had a seizure, from which he never rallied. Early this year Mr. Bolton celebrated the golden jubilee of his marriage. His widow survives him. He was of a generous and genial disposition, and was held in high esteem in printing trade circles.

### Mr. Thomas R. Lewin.

Mr. Thomas Reynolds Lewin, one of the oldest printers in Coventry, passed away at his residence, 7, London-road, last week. He was 72 years of age, and had carried on an old-established business. He was a prominent member of the Manchester Unity of Oddfellows, and had represented his district on many occasions at the Annual Conference.

## Football.

The following are some of the results of the matches played last Saturday:—

### Printers' Charity Cup.

Armoury, 3; Haycock-Cadle, 1. Jayswood, 6; Wightman's A, 0. Blades, East and Blades, 16; St. Clement's Press, 0. Waterlow's A, 2; "Oyez," 2. Fryotype, 7; Clifton House, 3. Sun Engraving Co., 6; Falcon, 0.

### Printers' Football League.

Drake's, 2; Wightman's A, 2. St. Clement's Press, 3; Fleetway Press, 2.

THE names of forty-eight publishers in New York, Boston, Philadelphia and Chicago were attached to a protest recently sent by George Haven Putnam to the Ways and Means Committee of the U.S. Senate. The protest aroused much vigorous comment in the American Press.

Replies to Box Nos. to be addressed to the Offices, "BRITISH AND COLONIAL PRINTER AND STATIONER," 58, SHOE LANE, LONDON, E.C.4.

## SPECIAL PREPAID ADVERTISEMENTS

**SITUATIONS VACANT, REPRESENTATIVES or MANAGERS REQUIRING POSITIONS, AGENCIES, BUSINESSES WANTED or FOR DISPOSAL, MACHINERY and MISCELLANEOUS.**—Charges for Advertisements of the above class are Three Shillings for 21 Words or under; One Shilling extra for every line or portion after. Seven words to be reckoned for each line.

MESSRS. MARTIN, WEAVER AND NURSE, LTD., paper agents and merchants, have taken offices at Faxheld House, 28, Watling-street, E.C.4. Mr. Martin was for some time with Edwin Thomas and Co., paper agents and merchants, Mr. Weaver was for 16 years with Grosvenor, Chater and Co., and afterwards with L. S. Dixon and Co., Ltd., and Mr. Nurse was lately representative for the latter firm.

MESSRS. C. D'OYLEY MEARS AND CO'S offices, owing to re-numbering, are 26, Wardrobe-chambers, Queen Victoria-street, E.C.4. The firm are well known as agents for the *Daily Telegraph* Paper Mills, Dartford, whose manufactures have achieved a good reputation on the market. The samples issued of tinted banks show a wide range of excellent quality.

# The Principles of Good Printing.

**Mr. H. S. Curwen Emphasises  
"Straightforwardness."**

The Design and Industries Association which is out to further all efforts toward good design in every branch of British industry, devotes much attention to the printer's art, and the new galleries of the Association at 6, Queen-square are at present devoted, as we have previously reported, to an instructive exhibition of good printing. In connection with this exhibition Mr. Harold S. Curwen last week delivered a lantern lecture in which he explained and illustrated some of the principles advocated as leading to better style in printers' work. The following summarises some of the main points Mr. Curwen put forward.

Straightforwardness, the absence of "stunt," and the simple attacking of each problem by the most direct means—these are the points which go to make satisfactory printing. Machinery has been brought to so high a pitch of accuracy that fineness of finish has come to take precedence of fundamental rightness of design. The handicraft of printing, both present and past, may be a great source of inspiration to the machine producer of to-day. It should teach us to use our machines honestly.

Printing designers must observe the natural results of machine production, and plan their work to take the utmost help from it. A design hand-painted in such a way that it can only be reproduced by twelve printings and with myriads of hand-stippled dots is wasteful, because a better result at a much lower cost would come from a well-composed design in two or three printings. The best effect will come from working with, not fighting against, the natural tendencies of the machine.

## Typesetting and Display Work.

The commonest, most insignificant thing may be arranged and printed well at little or no greater cost than if it is badly done. It is fundamentally a matter of grasping the sense of the copy and arranging it in logical, orderly sequence, so that the message is picked up with the minimum of mental effort. Emphasis is best got by order, and by letting the wording suggest its own form and grouping. In this way it is possible to get the balance of tone throughout setting, initials, decorations, etc., which is so essential to a satisfactory appearance.

Much of the difficulty experienced, which leads to the use of cramped and distorted letterings, is due to setting on too large a scale either for the paper adopted or for the convenience of the reader. Distance at which the piece of printing will be read, and the sizes of type convenient to the average reader at that distance, must control the scale of setting.

Legibility should be the aim in choosing any types, and it is best to limit the selection to one series of design. Four good types available to every printer are Caslon Old Face, Plantin, Original Kennerly and Cloister.

And just as setting should be simple and restful, so should colour be discriminately used. Well-balanced massing is more restful and strong than spreading, and a little is better than much.

There are reasons, too, for book margins. Those at the side isolate the page from distracting surroundings and prevent muscular eye-strain, and the margin at the bottom makes handling easy.

## Printing Other than from Type.

This falls into two groups: 1. To illustrate; 2. To arrest attention or help expression. In the first case, to illustrate solid objects in as real a way as possible the camera is logical and often saves immensely tedious labour. An unretouched photograph cannot lie, therefore it cannot be disbelieved. On the other hand, there are cases where frankly illustrative drawings, made by one who understands and appreciates the character of materials and method of construction, give a more quickly intelligible effect than the camera, which necessarily shows much irrelevant detail. There are many cases, however, where absolute representation is trivial and definitely negative. In covers of books and catalogues, or in labels or packings for goods, for instance, nothing should demand close inspection. Only interest and expression are useful. Good design in this case is the art of leaving out, coupled with the ability to see and set down the essentials boldly, clearly, and quickly.

Clear, not confused drawing, and pure, not muddy colour—these are to be the aim. Vigorous composition and drawing—feeling for the subject—lively intelligence, not vulgarity—these, and the imaginative power of the artist, go to the making of successful printing design.

When lettering is incorporated with drawing the two should be done by the same hand and tool, and built into one another as a whole, to form a complete and unified design. Regard should be given to the balancing of type and design if both are used.

Papers of honest unobliterated texture are pleasant to read and to print upon. They have a restful look and are the least costly. Coated, or even calendered, papers should be avoided as far as possible.

So it is simply straightforwardness and truth of method that are to be the aim. They lead to good work and to work that will be appreciated at first (and last) glance.

---

HIRST AND ADAMSON, Market Cross-chambers, Huddersfield, have issued a useful chart dealing with the proposed railway classification of goods by merchant trains and showing the approximate percentage relationships between the twenty new classes proposed and also between the existing eight classes.

## Pertinent Points on Paper.

### Mr. E. A. Dawe Addresses Master Printers.

Mr. Edward A. Dawe, of H.M. Stationery Office, delivered an interesting if informal address to members of the Association of Master Printers of South-East London on Tuesday at the Bridge House Hotel, London Bridge. Mr. E. B. Smith, presiding over a meeting attended by Mr. W. A. Clowes, Mr. J. J. Keliher, and other leading master printers.

Looking through various notes on paper in order to bring the address up to date, Mr. Dawe said he marvelled how it was that consumers could buy paper at to-day's price when papermakers were actually taking in chemical wood pulp at 6d. lb. and mechanical pulp at 1½d. lb.; yet they could get British made papers of excellent value at 6d. lb. He concluded, therefore, that there had been a good deal of levelling up on the part of the papermaker and master printers must not be misled if the papermaker charged 4½d. for a paper which the consumer thought he should get for 4d.

The speaker went on to say that there was one "old man of the sea" whom Mr. Howard Hazell was prepared to allow the printer to carry, and that was the paper trade customs. These were supposed to be agreed, but they had been agreed by the Papermakers' Association only, he thought, to be a governing factor in the supplies of paper. Consequently, printers were always paying for their wrappers at the price per lb. of the enclosed paper. Mr. Dawe advocated the Continental system, by which paper of a definite substance was supplied and the wrapper was on the outside.

### Price Factors.

In recent years there had been considerable changes in regard to prices of papers. At one time esparto papers—not necessarily pure esparto papers—would cost ½d. lb. more than chemical wood printing papers. Now, with the topsy-turveydom that had taken place esparto papers, and sometimes pure esparto papers, cost considerably less than wood pulp papers owing to the different ways of the mills and the fact that there was not so much competition for esparto. The material influenced the price and the treatment also. Banks would always be more costly than printings, not because they contained different material or received different treatment, but because they received much longer treatment. This applied to many papers. Special sizes and special colours would always influence the price against the printer.

Mr. Dawe proceeded to refer to changing colours, odours, behaviour of inks and electricity in paper. With regard to the colour of paper changing, printers should be advised not merely to purchase wisely and to employ intelligently the paper they stocked, but also to preserve it carefully. As to ink not taking

on the paper, it was not safe always to doctor the ink; the defect could usually be traced to faulty coating. In dealing with electricity, Mr. Dawe suggested Chapman's neutraliser, which, although it looked an elaborate affair, was simple in principle. The electricity in the paper might be negative or positive; it would not be definitely one or the other; it might be one or the other or it might be both. To neutralise it, the ordinary lighting circuit was used where they had an alternating current. A bar ran across the printing machine and little points discharged electricity on to the paper and neutralised the electricity.

Replying to Mr. Whyte, who asked how electricity came into the paper after it reached the printing office, Mr. Dawe said the friction on the machine during the first printing probably induced it.

Specimens of lemon-coloured paper made by only two firms in this country were produced to show three-colour effect with two printings. It was described as extremely useful for magazine and other work.

### The Wholesale Stationer.

Mr. Dawe mentioned a tendency of the Federation of Master Printers to cut out the wholesale stationer, and he uttered a warning word in this connection. Had they ever realised what a stock of papers one house had to carry? he asked. Thereupon he named the various grades of writings, remarking that there was something like 3,000 papers. If they went to one firm they could get 40 styles of E.S. writings, each based in six substances. Then there were all the varieties of printings. In the matter of the prices charged by the wholesale stationer, the master printer had the matter well in hand by reason of competition. Mr. Dawe, therefore, did not see that by adding one more wholesale stationer to the present crowd was going to help the master printer at all. There were all those enormous stocks, which were bewildering in their variety. Apart from the writings and printings there was a great variety of papers for colour work, and for chocolate boxes there were 300 or 400 different sorts of fancy papers. Some were foreign papers British embossed; others were drawn from all over the globe. These were all stocked by one house, and the printer was not worried as the individual wholesale firm would be. The consumer could go and draw a quire if he wanted it and the extra cost would be less than he would pay for stocking it.

In the discussion on this point, several master printers complained of customers buying paper direct and in some cases of supplies going direct to the customer.

Mr. Dawe observed that the whole fabric of commercial integrity had been shaken in recent years. It was not confined to printing or paper. People were not content to be wholesalers or retailers; they wanted to be both.

### Trend of Prices.

A note as to the trend of prices in the future was brought forth in answer to a question. The paper trade had been in a curious con-

dition since 1915, said Mr. Dawe. There was a slump then, and again in 1916 and 1917. It seemed to have an annual slump, and the curious thing was that it came at the wrong time, because when the trade expected to be busy the slump came. Papermakers filled up their order books at high prices, and when they had worked off those orders everybody was eager to take paper; then came the slump and they could get paper for the asking. Mr. Dawe's view was that prices would rise a bit. He advised printers not to leave themselves with an empty stock-room, because they would be scrambling for what the papermaker could spare them. The hand-to-mouth existence brought trouble, and if they paid 2d. a lb. more for paper they saved three times that amount in the easy running of their machines.

Answering a question with regard to the possibility of paper coming under the provisions of the Safeguarding of Industries Act, the speaker thought things would right themselves without a schedule that would cost a large amount of money to print and another mint of money to understand.

On the question of the lowering price of coal and the costs of production, Mr. Dawe mentioned that some mills had been converted for oil fuel and some were going back to coal. Oil was said to make a much cleaner paper.

Mr. H. N. Prentice, who moved a vote of thanks to Mr. Dawe, and who has a long association with the printing trade, said art papers, S.C. printings, and other styles were unknown when he entered the trade. There was then only one kind of printing paper of various qualities. As to writings, two or three sorts served all purposes. He had witnessed the whole of the development which had since taken place in papers.

## GERMANY'S Paper Imports and Exports IN 1920.

The following returns show Germany's imports and exports of paper in 1920, the figures representing hundreds of kilograms (220.46 lb.):—

**PRINTING PAPER** (uncoloured or dyed in the pulp).—Imports: 12,109, of which Finland sent 10,177 and other countries 1,932. Exports: 454,692 (323,381,000M.), of which 15,510 went to Danzig, 15,059 to Saar district, 82,844 to Netherlands, 10,148 to East Poland, 5,278 to West Poland, 48,957 to South America, 102,923 to U.S.A. and 173,973 to other countries.

**CARDBOARDS** (not drawing cardboard).—Imports: 635, of which Finland sent 404 and other countries 231.

**BLOTTINGS** (except coarse grey filters).—Imports: 565. Exports: 6,587 (8,242,000M.), of which 160 were sent to the Saar district,

1,879 to Holland, 135 to East Poland, 132 to Sweden, 363 to Spain, 511 to South America, and 3,407 to other countries.

**PACKING PAPER** (dyed in the pulp).—Imports: 14,075, of which Memel sent 3,857, Czecho-Slovakia 2,150, Scandinavia 4,612, other countries 3,456.

**PACKING PAPER** (all sorts, except tissues over 30 grm. per sq.M. and parchment substitutes).—Imports: 14,686, of which Czecho-Slovakia sent 3,734, Scandinavia 8,083 other countries 2,869.

**PACKING PAPER** (including tissue over 30 grm. per sq.M. and the yellow straw papers).—Exports:—617,689 (£59,789,000M.), of which 52,422 were sent to Belgium, 18,969 to Denmark, 30,915 to France, 72,950 to Great Britain, 209,530 to the Netherlands, 5,996 to Norway, 8,511 to East Poland, 5,181 to Jugoslavia, 75,841 to Switzerland, 22,856 to U.S.A. and 114,518 to other countries.

**PARCHMENT**.—Imports: 172. Exports: 11,723 (24,019,000M.), of which 2,760 were sent to Denmark, 3,788 to Holland, 1,029 to Switzerland, 212 to U.S.A., other countries 3,934.

**WRITINGS** (hand-mades and music papers).—Imports: 12,135, of which Finland sent 9,325 and other countries 2,810.

**DRAWINGS AND DRAWING CARDBOARDS**.—Imports: 79.

**TISSUES** (not over 30 grm. per sq.M.).—Imports: 6,177, of which Czecho-Slovakia sent 4,790, and other countries 1,387. Exports: 36,921 (76,829,000M.), of which 954 were sent to Belgium, 1,315 to Denmark, 1,693 to France, 5,091 to Great Britain, 10,577 to Holland, 1,263 to Czecho-Slovakia, 1,105 to East Poland, 1,266 to Sweden, 4,315 to Switzerland, and other countries 9,282.

**RAW PHOTOGRAPHIC PAPERS** (felt, wall and other papers).—Imports: 307.

**WRITINGS, HAND-MADES, MUSIC, DRAWING CARDBOARDS, RAW PHOTOGRAPHIC, FELT, WALL AND OTHER UNSPECIFIED PAPERS**.—Exports: 278,662 (393,615,000M.), of which 8,966 were sent to Belgium, 20,989 to Great Britain, 86,587 to Holland, 11,437 to Austria, 5,544 to East Poland, 26,958 to Switzerland, and 100,454 to other countries.

**VARIOUSLY COLOURED PAPERS** (varnished, enamelled, chalk-coated, and metallic papers).—Imports: 156. Exports: 114,224 (187,240,000M.), of which 14,553 were sent to Great Britain, 24,762 to Holland, 4,189 to Czecho-Slovakia, 3,429 to Sweden, 12,021 to Switzerland, 4,877 to East Asia, 17,103 to South America and 33,290 to other countries.

**MR. A. J. W. GILES**, formerly with Messrs. Charles Briscoe and Co., Ltd., has started on his own account as a paper specialiser and mill agent, his temporary address being 4, Great St. Thomas Apostle, London, E.C.4.

To do their part to emphasise the truism that lower prices produce greater demand, Messrs. James Spicer and Sons, Ltd., offer a selection of "all British-made" lines of paper, etc., suitable for the everyday requirements of the printing trade.

## DIRECTORY.

Rates: £3 per annum (52 insertions)  
for each card of 2 lines or under; each  
additional line £1 6s. per annum extra.

### BOOKBINDING MACHINES.

T. W. and C. B. SHERIDAN CO., LTD., 63, Hatton-garden, E.C.1. Sole Vendors of the Sheridan Bookbinding and Leather Embossing Machines, including Perfect Binders, Wrapping Machines, Case Makers, Paper Cutters, Embossing Presses, Bundling Presses, Gathering Machines, Die Cutting Presses, and all styles of Bookbinding Machines. Also the Burton Peerless Rotary Perforator, the Dexter Folding Machines and Automatic Feeders for all classes of work, the Dexter Combination Wire Stitcher and Feeder, the Jacques Shears and Paper-Box Machinery, the Kast Insetting, Covering and Wire Stitching Machine, etc.

### BOOK-SEWING, STITCHING, Etc., MACHINES.

SMYTH-HORNE, LTD., 1-3, Baldwin's-place, Baldwin's-gardens, Gray's-inn-road, E.C.1. "Smyth" Book-Sewing Machines, built in 6 styles, 8 sizes, for Letterpress and Stationery Books. Over 3,000 sold; Chambers' line of Book-Folding Machines, with King Continuous Feeders; Seybold's New "Dayton" Paper Cutting Machines; New Three-Knife Book and Pamphlet Trimming Machines, Embossers, etc.; Anderson's Rapid Folding Machines.

### "DURABLE" PRINTING ROLLERS.

"THE DURABLE" PRINTERS' ROLLER CO., LTD., Charles-street, Hatton-garden, London, E.C. Manager, E. T. Marler.

### PAPERMAKERS' ENGINEERS.

BENTLEY & JACKSON, LTD., Lodge Bank Works Bury, Lancashire.

### PAPER MOUNTERS AND LINERS.

W. MORGAN & SON, Thorparch Place, Wandsworth Road, S.W.8.

### PRESERVED PASTE FOR PRINTERS and STATIONERS.

LONDON PASTE CO., Arlington-street Works, New North-road, London, N.

### PRINTERS IN FOREIGN LANGUAGES.

WILLIAMS, LEA & CO., LTD., Clifton House, Worship-street, E.C. French, Russian, Italian, Hebrew, and all foreign languages

### SIDEROGRAPHIC ENGRAVERS and PRINTERS to the TRADE.

PERKINS, BACON & CO., LTD., Southwark-bridge-buildings, S.E.1. Plate Engraving and Printing, Die Press, Rotary Offset Machining, and all Company documents.

### TYPEFOUNDERS' ENGINEERS.

W. MILES & CO., 44, Houndsgate, Nottingham Manufacturers of Typecasting Machines (latest improved models), Moulds and Matrices for un-rubbed work, all Tools and Gauges used in Type-founding, Engravers and Cutters of Oriental Matrices, etc. Manager Charles A. Wood.

# Story of the Printers' Almshouses.

**Urgent Need to Back Up Sir Wm. Waterlow  
at Next Wednesday's Festival Dinner.**

By **FRANK COLEBROOK.**

Goodly to look upon they are, and goodly to inhabit. And they are ours. Ours—they do not belong to London; they belong to all of us; to the craft of the United Kingdom. That is one thing Sir William Waterlow, this year's president of the Printers' Pension Festival, has particularly impressed. For the provinces, which in so many things give London the lead, have, in this particular, somewhat failed to realise what they do possess. Here they stand, in a pleasant London suburb certainly, but not a London institution. No, they are the country printers' and the London printers' Almshouses. Yes; and in these topsy-turvy days, let me edge in the reminder that they are not the wage-workers' almshouses only; they are for any printer who may come to be in need of such a haven of rest, whether his responsibilities have been those of the wage-earner or the wage-payer.

Although I am not, in this, forgetting probability as the guide of life, though I am not forgetting that master printers do not commonly fail to obtain some security for old age, let me just mention a little incident. A printing trade union in America set up a very delightful convalescent home in what, I believe, is pleasant open country. It heard that one employer in the craft, who had shown himself one of the best friends of trade unionism in his more successful days, had come to grief, and was in straits. Accordingly the hospi-

talities of this home was tendered to him in all heartiness, and he was invited to stay in it for as long a time as he might care to stay. I believe he accordingly became its welcome guest.

I leave the incident without comment, for I have to-day a definite purpose in these few notes. I want to quicken interest in the Almshouses—our Almshouses, which exist for the good of the whole craft in the whole Kingdom. I want to quicken interest in them; and I will do this simply by telling a few things about them as best I can.

## **What "Printers' Pensions" Means.**

The Almshouses are administered by the Printers' Pension, Almshouse and Orphan Asylum Corporation, which has its office at 20, High Holborn, London, W.C.1. The title perhaps is too much of a mouthful, and colloquially we say "Printers' Pensions" for short. As with some other things done "for short" this involves a danger. We are apt to forget all that is not directly named.

The forgetting is forgivable enough, since a pension is a thing quite delightful to contemplate. What other craft, I wonder, has a list of about 750 old servants, or the widows of old servants, drawing pensions from a fund like this? What other craft working upon the same scale, is sending £10 a year in each case to the mothers of 1,400 children who have become bereaved through their fathers having fallen in the war—this being in addition to orphan's allowance made to other

Reproduced by courtesy of Messrs. Spicer Bros., from advance proof of article in the forthcoming issue of their house journal, "Notes for Buyers."

children whose fathers fell in the ordinary hap of life? These things are good to contemplate and the word "pensions" may serve to bring them to remembrance.

But "Almshouse" is a good word too; and the Almshouses are very apt to be right out of remembrance or to be chiefly present to the mind of builders, builders' ironmongers, plumbers, painters, and suppliers various, who are continually sending in to the Council of the Almshouses bills for construction and repairs and maintenance, and the many things

ventor of the first iron press. In the three blocks there are forty-five separate homes and at the moment they are all occupied. I have been in some of them and have chatted with one or two of the occupants. It was quite a jolly experience. Mr. William Vandy was my cicerone. One time compositor at Taylor and Henderson's, off Fleet-street, he is now, and long has been, a member of the Pensions Council, which he is the better able to assist because of his understanding sympathy with every interest involved. And as he lives close

THE PRINTERS' ALMSHOUSES AT WOOD GREEN.

which three blocks of buildings require after they have been inhabited for long years.

#### The Almshouses.

They are situate in Wood Green, in North London. They consist of three blocks. The old block is that which lies furthest back from the road. The other two project from either end of this block at right angles to it, so that the three form, with the highway, an open square.

The oldest block was designed to house twelve inmates. It was opened 72 years ago by Viscount Mahon, who afterwards became Lord Stanhope—a name famous in printing annals, a Lord Stanhope having been the in-

ventor of the first iron press. In the three blocks there are forty-five separate homes and at the moment they are all occupied. I have been in some of them and have chatted with one or two of the occupants. It was quite a jolly experience. Mr. William Vandy was my cicerone. One time compositor at Taylor and Henderson's, off Fleet-street, he is now, and long has been, a member of the Pensions Council, which he is the better able to assist because of his understanding sympathy with every interest involved. And as he lives close

no rent to pay. And ten times nothing is still nothing.

I called on another home where there was a definite occasion for a call. Casual calls without introduction or occasion would, I think, be bad form. These are the homes of the occupants just as much as my home is mine; and I should not want people to call on me for the mere sake of calling.

Let it indeed be quite understood that there is the utmost freedom in these Almshouses. If, indeed, an occupant chooses to go away for a few weeks to stay with relatives or friends, so be it, and what money may fall due, is sent after him. The second and the warranted call which I made, simply confirmed the first happy impression. Incidentally I noted that there is no mounting stairs in these homes. Half of them are on the ground floor—the whole home on that floor—and half are on the floor above. They are all two-storey buildings. I noted that each is connected by telephone with the Warden's house, which is nearest the road on the right as you face the Almshouses. Each is connected too with the Nurse's cottage. May I own to a cup of tea with the Nurse and Mr. Vandy in that pleasant cottage of hers, and to the conviction that all the patients were in very capable hands, so far as the Nurse is concerned?

### The Almshouse Gardens.

The outlook from the Nurse's cottage, by the way, is upon the various little gardens at the rear of the Almshouses. An arbour, the gift of the late Hugh Spottiswoode, suggests and invites rest in this garden. The inmates are allowed a plot in this garden, and any plots which are not so allocated are called Vandy plots, for our good old friend Mr. Vandy is the council for most intents and purposes; and to give the plots that name sounds better than to call them by a name of a council. What may be raised on the Vandy plots is distributed between the dwellers as occasion requires.

Perhaps the family feeling of the Almshouses is most evident on Sunday afternoons. The dwellers may, of course, have repaired to a church or chapel of their preference in the neighbourhood or simply have rested. If, however, they care to attend a simple little service on Sunday afternoons, there it is, provided for them in the board-room. Visitors come to give a short address. This board-room is in the centre of the old block. It is not large, but homely and comfortable, having as its one outstanding feature a very elaborately adorned fire-place.

Faces of old friends are all round, looking down upon the company, in various portraits, painted or printed. Indeed that is one marked feature of the Almshouses. I do not remember visiting any place in which one was so agreeably reminded of old friends. You get this impression, to be sure, before entering the board-room; for there are tablets upon the various walls which record how the particular extension came to be made, by whose exertion or in whose time of service. In the board-room, there are, if I remember rightly, no tablets, but portraits

galore. Some very small, but just enough for happy remembrance.

"Abou Ben Adhem—may his tribe increase"—you remember the story. He dreamt that an angel refused to enter his name in an angelic "book of gold" in company with the names of those who "loved their Lord." "I pray thee then, write me as one that loved his fellow men." In our great craft his tribe has been largely increasing through the late great years. And it was always a goodly tribe. Crespins and Hardings and Vandys among compositors. Pardoes and Killingbacks among the managers of our machine-rooms. Here we find the simple record of their devotion and long service to their kind, graven on wall tablet or attested by portraiture or engraving. Becks or Youngs, among managers, or Drummonds, or Lownds, or Usher-Walkers, or Frys, or stalwarts variously connected with the craft—their names here meet us; simply, unobtrusively, friendlily.

Or to think of the great employing houses—Spottiswoode, Truscott, Wyman, Clowes, Whittingham, Stephens, these are some names which look out upon one, as one wanders round or studies the Board Room walls; or as one converses upon other days. And in particular I would remember the name of William H. Collingridge, for the head of this important city press, gave not simply of his means but his mind and his manly cheer. He was perhaps in his day the most frequent visitor of the Almshouse dwellers. To this day a member of his family, Mr. G. R. Collingridge, makes large personal contributions to the Christmas festivities of every Almshouse home. He is a sort of Father Christmas incarnate in this establishment.

I have before me the programme of the music at a garden party which Mr. W. H. Collingridge and his wife gave in the grounds of the Almshouses, and this reminds me how, time and again, concerts are provided for the inmates.

Mr. Fred Cox and members of the North-East London Auxiliary—(this is one of the various district or personal Associations, which are formed to do some independent collecting for the Pensions Corporation)—have more than once given such a concert. So has Mr. Lewington. So the Misses Collett; so Mr. E. J. Appleby. Recently Mrs. Laurence Blades has been happy in the pleasure which she and her friends have thus afforded the inmates.

I have not written this short article merely to beget interest in the Almshouses but to beget help. These pleasant places are yet not without a feature which is unpleasant. I mean the feature of the constant difficulty in managing their finance. They are always in debt.

### Sources of Income.

Perhaps I should just say a word as to how they are financed. Wage-earners in the craft have the opportunity, by paying a penny a week, or more precisely 5s. a year for ten years, or by paying two guineas at one time, to become eligible for election to a pension; and a somewhat similar procedure enables them to become eligible for an Almshouse

In the larger printing offices someone acts as firm's collector, freely giving his time to the "looking up" and the "booking up." His name is printed in the Corporation's annual report, and that is his credential.

Perhaps the 5s. annual subscription should be increased, but that is certainly not my concern at the moment. The point is that there is primarily some contribution by the worker. A personal contribution is stipulated for as a mark of eligibility. To be sure the forward-looking man may subscribe not simply for a pension but for Almshouse occupancy. He may subscribe early in life and he will find that the pension he receives is proportionate to the number of years of his subscription; at any rate at the pension's first granting. He may also subscribe to one or to more than one of the various Auxiliaries, which means that if he has need to make an application for a pension or election to an Almshouse, he will receive voting strength from the Auxiliary, in addition to any other voting strength.

Broadly speaking, it may be said that a pensioner is generally elected at the second application. Probably the Provinces do not at all realise this. (I am for the moment speaking of both things, Pensions and Almshouses, which naturally, are very inter-related.) A sum of about £700 is divided among the 45 occupiers of the Almshouses, in addition to their being rent free; and they may receive other money, by the way of trade union superannuation, or old age pension or any other annuity.

The pence which the worker subscribes are very important. They determine the character of the institution. They mark the element of self-help. None the less the bulk of the money represents gifts of employers or of those who recognise their great debt to the printer.

Now it is unfortunate that in many cases a friend of the craft giving money by legacy or by donation during lifetime, prescribes conditions or uses to which the money is put, so that the Pension Corporation Council has not as free a hand as it might desire. It might happen that the income was quite large in a certain year, and that still there was hardly any money which could be used for the Almshouses. The laws covering these matters are very stringent and rightly so. What, in effect, it means is that the Council are at their wits' end, time and again, for the carrying on of these Almshouses.

#### **The Craft's Good Deeds.**

It is good to review what our fine old craft has done for some of the more needy members of its family. These "actions of the just smell sweet, and blossom in the dust." Or if, in the dust and boisterousness of the times, their fragrance tends to be diffused too thinly for notice, what then? Old Cato had found out centuries ago that the best way to keep good deeds in memory is to refresh them with new.

Help the Almshouses, then. They do greatly need your help. Help by whatever

may be in your power to lift the constant Almshouse burden from the Council.

I, for one, am very glad the Almshouses exist. It may be that the amounts spent upon the pensioners who receive the money in their own homes, and the amounts spent upon the children are so large, that the Almshouse sums in comparison seem small. But I am thinking for the moment of the lead which the craft is giving in this matter, of the aspect in which the craft is presented to the whole community.

The man in the street knows practically nothing of all the rest that the Pension Corporation effects through the combination of prudence and beneficence.

The man in the street does, however, see the Almshouses. Perhaps the comparison may seem whimsical, but somehow to my mind, the two things seem to compare very much as a volume of unbound printing compares with a book. Sixty thousand newspapers are produced throughout the world. Lord Morley once said of newspapers "To-day they are, and tomorrow they are cast into the oven." These journals and miscellaneous commercial issues, being evanescent, differ in one respect from a book. For a book, dignified with its binding, stands upon its shelf; plain to be seen, day after day.

So do the Almshouses stand before the passer, plain to be seen; attesting and typifying the spirit of hearty good-fellowship which is instinct in the craft of printing.

The book upon the shelf is to be read as well as seen. The Almshouses, which meet the eye, challenge more than a passing notice if they are to be understood, for all that they embody and illustrate, all that they suggest of happy family relationship.

To-day I have tried a little to help towards that understanding. This I have done very imperfectly. Will you do your part better than I have been able to do mine? Send to Sir William Waterlow at his works in London, or at the Pension Office (at 20, High Holborn, W.C.1), whatever you can afford, to assist in the perpetuation of a work of so fine a tradition.

Wednesday next, November 2nd, is the day of the Almshouse and Pensions Festival Dinner. Will you not forward your contribution—or your further contribution—heartily, and at once?

**PRINTERS' PENSION FESTIVAL.**—At the 49th Anniversary Festival of the Printers' Pension Corporation, to be held on November 2nd at the Connaught Rooms, under the presidency of Sir William Waterlow, the guests will include: The Lord Chancellor, Lord Riddell, Mr. Cecil Harmsworth, M.P., Sir G. Lewis, Sir E. Hodder-Williams, Mr. E. L. Waterlow, Sir C. Schuster, Sir W. E. Berry, Sir C. C. Wakefield, Sir Rowland Blades, M.P., Sir F. W. Bowater, Sir G. Touche, Sir R. Blair, M.P., Sir H. E. Morgan, Sir S. J. Waring, Sir F. Newnes, Sir R. Baird, Sir P. H. Waterlow, Mr. John Walter, Mr. T. G. Blackwell, Sir E. Harvey, Col. Wyndham Portal, Sir P. Thompson and Sir Arthur Spurgeon.

## The Charles Whittingham Press.

Interesting Account by Mr. Jacobi.

Although Mr. Charles T. Jacobi cannot claim to have personal recollections of the original Chiswick Press—it having been closed down before he was apprenticed to the second Charles Whittingham some time prior to the latter's death in 1876—he is nevertheless the person best entitled, by his long and unique connection with subsequent Chiswick Press history, to speak with authority on the subject. This special interest attached to the lecture which Mr. Jacobi delivered on the 11th inst at the Chiswick Town Hall on "The Charles Whittingham Press at Chiswick, 1810-1852: Its History and Influence on the Art of Printing." Some forty or fifty lantern slides served to illustrate persons and places mentioned, also to show examples of printing, printing presses and types, etc., adding greatly to the value of the lecture. Announcement was made also that arrangements were in hand for the holding in the Chiswick Public Library of an exhibition of the productions of the Chiswick Press; this exhibition, to open early in November, should prove of great interest to all concerned with the art and craft of book production.

Mr. Jacobi's story covered the period 1810-1852 and included the work of Charles Whittingham I. (the uncle) and Charles Whittingham II. (the nephew). He had interesting personal details to give of both the Whittinghams as also of some of the other personalities entering into his story. Referring to the benefactions of the two Whittinghams, Mr. Jacobi mentioned that it is an open secret that, the last member of the family having died in 1917, the residue of the various estates—a very large amount—will go to the benefit of the Printers' Pension, Almshouse and Orphan Asylum Corporation.

The words "Chiswick Press," said Mr. Jacobi, were first used in the Whittingham imprint in 1811, when the press was at the now demolished High House, Chiswick. The work there was done entirely by hand. It is a tradition of the press that Whittingham was the first, or one of the first, to use overlays in the preparation of wood engravings on the press. The Report of the Jury on printed books at the Great Exhibition in 1851, referring to Chiswick Press work said: "At the commencement of the present century the late Charles Whittingham brought out the elegant editions which have rendered the Chiswick Press so celebrated. Until that time no one had printed wood-engravings so perfectly, by the application of overlays necessary for obtaining gradations in the tints." The "Annual Register" of 1840 wrote: "Mr. Whittingham ranked foremost among the printers of his day; his success in the working of wood-engravings may indeed be said to have raised printing to an artistic character which it had never before attained."

An interesting detail told regarding Charles Whittingham I. was that in 1810 he began to manufacture paper stock. From Thomas Potts, who acted as his works manager, he bought the secret for this particular method of treating the special materials employed, which consisted of extracting the tar from old junk. Potts died in 1811 and Whittingham carried on the business until about 1823 when he sold it to a Mr. Nicholls.

Charles Whittingham II. was apprenticed to his uncle in 1810, and admitted to the Livery of the Stationers' Company and freedom of the City of London in 1817. Later he was granted a partnership with his uncle and books with the dual imprint of C. and C. Whittingham appeared from about 1824 until 1828 when the partnership was dissolved and the nephew started at Took's-court on his own account. It was soon after this that the fruitful friendship began between William Pickering and the younger Whittingham.

An important 'early product of the Took's-court Press was the "Diary of Lady Willoughby," printed in 1844, which led to the revival of the "old style" character of types and methods of printing which had practically gone out of fashion during the preceding half-century. The Whittingham origin of this revival is testified to by Talbot B. Reed in his "History of Old English Letter-Founders," 1887.

The 21 years' lease of No. 21, Took's-court expired in 1849 and the whole of the work was executed at Chiswick until 1852, when Charles Whittingham II. acquired the freehold of Took's-court premises, and the press at Chiswick shut down finally.

---

## Mr. Edgar L. Waterlow's Pensions EFFORT.

---

A concert on behalf of the "Edgar L. Waterlow Contribution" to the funds of the Printers' Pension, Almshouse and Orphan Asylum Corporation was given at Shoreditch Town Hall on Wednesday last. Mr. Edgar L. Waterlow occupied the chair. The chairman said the work of the Corporation was one particularly deserving of support from them as being connected with the printing trade. After the collection Mr. Waterlow announced that a sum of £40 had been realised by it. The departments of Waterlow's had subscribed £185, and this, with the addition of private contributions, brought the total up to £339. A former concert had produced nearly £400, so that the "Edgar L. Waterlow Contribution" was in all nearly £740. Sir William A. Waterlow, K.B.E., president of the Corporation, thanked the givers.

---

SEPTEMBER next is the date of the expected opening of the central technical college for printers.

## Mr. R. B. Fishenden's Return to LONDON.

### Some Notes of an Interesting Career.

As already mentioned in these pages, Mr. R. B. Fishenden, M.Sc.Tech., F.R.P.S., has resigned his position as director of the printing department of the Manchester College of Technology. After 19 years' association with that institution, he leaves Manchester to accept a position at the London office of Messrs. Stephenson and Blake, the well-known firm of typefounders.

Mr. Fishenden studied at the East London College and Bolt-court Technical Schools, subsequently gaining practical experience in London in engraving, where he was closely in touch with the printing trade as a whole, particularly with certain aspects of newspaper work. In 1902 he went to Manchester as senior assistant in the department of photography and the printing crafts, and in 1909 was appointed director of the printing department. He held also the position of lecturer in the technology of engraving and printing in the University of Manchester, and for a time was secretary to the Board of the Faculty of Technology. For several years he acted as local adviser to Indian students in the University for the India Office.

Mr. Fishenden took part in the formation of the Manchester branch of the Design and Industries Association, and through that organisation he did much to stimulate in Manchester an interest in printing and the improvement of commercial typography.

By his work in Manchester, both as a teacher and as an organiser, Mr. Fishenden has made for himself a wide circle of friends in all sections of the trade. His aim was always to frame his courses of instruction in such a way that the students should not only become proficient in the most recent developments of their own branch of the trade, but should, in addition, acquire a sound knowledge of the wider principles which form the basis of the industry as a whole. In this way, the students' interests were stimulated, and they were enabled to view the ramifications of the whole trade in a true perspective, realising the importance of new technical developments. Mr. Fishenden initiated day courses for the sons of master printers, which combined general instruction in the technique of each section of the trade with a training in management and costing. Since the war the printing department has had in training a number of disabled men who were trained under the Ministry of Labour scheme, and these have achieved success when they have gone into industry.

To the readers of the technical Press Mr. Fishenden is well known by his writings in connection with technical developments in the industry. He made the College of Technology a centre for technical research, and gathered round him a number of enthusiastic

workers. The development of intaglio printing received much attention; also more recently the problems of offset printing were seriously attacked. In the early days of machine gravure Mr. Fishenden devoted a great deal of time to the technical details of the process, and was the first to publish a paper on the subject, which is still recognised as the standard work. In connection with photo offset processes, new methods have been developed during the last few years which have been adopted by several large printing houses with conspicuous success. Mr. Fishenden is essentially a practical man, and in the technical developments to which he has devoted attention he has constantly kept in mind their commercial value rather than their more theoretical interest.

Always taking a keen interest in typography, Mr. Fishenden has encouraged a simple and direct style of display, such as has now been widely recognised to suit modern commercial requirements. The examples executed under his direction in the printing department of the Manchester College of Technology have frequently been selected for exhibition purposes. By special invitation recently the department exhibited at the British Institute of Industrial Art, the British Industries Fair, and the Kunstindustrie Museum, Kristiania.

Although much regret is felt at the severance of Mr. Fishenden's association with the technical education of the printer, we are hopeful that in his new position the application of his wide experience will enable him to become even more directly of value to the printing industry.

## Paper and Stationery for Egypt.

### Call for Tenders.

The Egyptian Ministry of Finance has invited tenders for the supply of paper, stationery, and general office material required by the Central Stores, Ministry of Finance, for the year 1922-1923. Tenders will be received by the Central Stationery Stores Department, Ministry of Finance, Cairo, up till noon on December 15th.

Local representation is essential. The Department of Overseas Trade is prepared to furnish to United Kingdom firms not represented names of British houses having agents or branches in Egypt, through whom their tenders could be submitted.

A copy of the specification, conditions of tender, and tender form relating to this contract may be inspected by United Kingdom manufacturers and exporters on application to the Inquiry Room, Department of Overseas Trade, 35, Old Queen-street, London, S.W.1.

A limited number of copies is also available for loan in order of application to firms in the provinces who are unable to inspect the documents in London.

## Electrotypers and Stereotypers MANAGERS & OVERSEERS' ASSOCIATION

### Monthly Meeting.

There was a fair attendance of members at the monthly meeting of this Association, held on the 18th inst., at St. Bride Institute, Bride-lane, E.C.4, Mr. A. Chadwell (president) occupying the chair.

The minutes of the last meeting were confirmed and the president then read an appeal on behalf of the widows' and orphans' fund of the Printers' Pension Corporation, to which the hearty support of the Association was solicited. He said that Mr. Bullett had volunteered to take the chair at a concert at Anderton's Hotel, on December 20th, and he was sure that his fellow-overseers would support him in his endeavours to raise the money needed.

Mr. A. Wood said that as Mr. Bullett was to take the chair he thought that the Association should be prepared to support him loyally, and he proposed that the sum of twenty guineas be given from their funds towards his plate.

Mr. W. Longley, in supporting the motion, said at any rate the sum voted would form a nucleus for them to start off with.

The proposition was seconded and carried *nem. con.*

Mr. Bullett said he realised the responsibility he was undertaking in occupying the chair at such a function, although he was already assured of the ready backing he would receive from the Association.

An amusing interlude then occurred. The president had been appealing for the individual support of the members and Mr. J. Parker, in his customary jocular manner, inquired of the president what amount he himself was going to place on the list. Mr. Chadwell retorted that he would double any sum Mr. Parker was prepared to give, whatever it was. This little piece of by-play resulted in three guineas being secured in the space of two minutes, in addition to a promise of three guineas from Mr. Pat Turner.

The secretary was instructed to convey to Mr. J. Beck the condolences of the members on the death of Mrs. Beck.

Mr. Parker asked if satisfactory arrangements were going forward for the annual dinner on November 26th, and Mr. Wood assured the meeting that the stewards beside having the matter well in hand, were looking forward to its being a very successful function.

In regard to subscriptions to the Printers' Pension Corporation a discussion took place on the present method of allocating funds, several members expressing the opinion that a chairman by reason of the money he had collected at a concert should be credited with the votes, instead of these being credited to the auxiliary. Opinions were also strongly expressed in favour of the electrotypers and

stereotypers branch of the trade having a representative on the Council of the Printers' Pension Corporation.

In order that these points may be further discussed Mr. Wood moved that the committee of the Electrotypers and Stereotypers' Auxiliary should be invited to be present at the next monthly meeting of the Association, and that the terms of reference should be the representation of the Auxiliary on the Council, the method of dealing with private funds, and also the advisability of a collector having his name entered on the books as a subscriber.

This was seconded by Mr. Longley and carried.

Messrs. Bishop and Wood, at the invitation of the president, informed the meeting of the progress being made by Mr. Reavely, a highly respected member of the Association, now in hospital at Cobham, who had the misfortune to lose both his hands while overlooking some machinery.

A vote of thanks to these two gentlemen for the interest they had taken in Mr. Reavely and for their reports brought the meeting to a close.

## West & North-West Master Printers' ASSOCIATION.

This association resumed its meetings on October 18th, at the Westbourne Park Institute, Mr. E. W. Wormald (the president) occupying the chair, supported by a fair attendance of the members.

Routine business being disposed of, Mr. A. Langley elucidated the work of the Printers' Pension Corporation, and appealed earnestly for the support of every master printer to this most worthy fund. It was decided to issue an appeal to every printer in the West and North-West District, and it was hoped that the response would be prompt and generous to enable a substantial sum to be added to the lists at the forthcoming Festival Dinner of the Corporation.

There followed a very interesting discussion on the "Present Condition of the Trade," many members taking part, and contributing much useful information. Mr. Wise, a welcome visitor from the South-West Association, added materially to the interest of the meeting; a free exchange of ideas and methods of working, and a knowledge of the difficulties of each district, being a source of real enlightenment to printers present.

It is to be hoped that the members will support in increasing numbers the meetings of the Association during the winter. An interesting programme is being arranged, many men of prominence in the craft having been secured to give addresses. A.T.P.

THE Newspaper Society and the Employers' Federation of Envelope Makers and Manufacturing Stationers have removed into their new offices at 10, Salisbury-square,

## Government Contracts.

Contracts were placed with the following firms during September:—

### Stationery Office.

**PRINTERS' SUNDRIES.**—J. Haddon and Co., Market Harborough; Joyce and Co., London, W.C.; Fry's Metal Foundry, London, S.E.; Hewitt Bros., London, N.; Wm. Notting and Co., Ltd., London, E.C.; H. W. Caslon and Co., Ltd., London, E.C.

**PRINTING, RULING, BINDING, ETC.**—Jobwork Printing Contracts: Scotland (1921)—Groups 21, 26, 27, 28, 29, 30, and 34: Morrison and Gibb, Ltd., Edinburgh. Groups 22 and 24: John Pellow, Dundee. Group 23: D. Winter and Son, Dundee. Group 25 and Group 33 (Sec. D): Arbroath Herald, Ltd., Arbroath. Group 31: Jamieson and Munro, Ltd., Stirling. Group 32: Bishop and Sons, Ltd., Edinburgh. Group 33 (Secs. A, B, and C): Mackenzie and Storrie, Ltd., Leith. Group 35 (Sec. A): Glasgow Numerical Ticket and Check Book Printing Co., Ltd., Glasgow. Group 35 (Secs. B, C, and D): A. B. Duncan and Co., Dundee. Group 36: Wm. Kidd and Sons, Dundee. Manilla and Linen Labels. Group 101 (1921)—Secs. A and D: Millington and Sons, Ltd., London, N. Secs. B and C: J. Dickinson and Co., Ltd., Hemel Hempstead.

Overprinting 1,000,280 Envelopes.—S. Harrison, Manchester.

1,200 Books—D. 180—Admiralty Stores, 7,500 Books—D. 193—Admiralty Stores, 8,000 Portfolios, 40,000 Pads, Form U.I.A. 75, 2,500 Skeleton Guard Books.—Waterlow and Sons, Ltd., London, E.C.

140,000 File Covers.—J. Robertson and Co., Ltd., St. Anne's-on-Sea.

Binding 4,000 Notes on Dominion Income Tax, 10,000 cps. Musketry Regulations, Part I.—G. and J. Kitcat, Ltd., London, E.C.

Binding 1,513 Vols. London Telephone Directories.—Fisher Bookbinding Co., Ltd., London, S.E.

Binding 14,000 Vols. London Telephone Directories.—Dow and Lester, London, E.C.

2,000 Books "D. 264," 50,000 sets A.F.N 1,504 A., Group 200 (1921), Inland Revenue—Q Forms, 6,500 Books, Form 600.—McCorquodale and Co., Ltd., Wolverton, Bucks.

Binding 3,000 Pilot Books, 350 Monthly Meteorological Charts.—J. Adams, London, E.C.

## Trade Union Matters.

A strike of bindery workers started last week at the works of the Co-operative Printing Society, Manchester, and at the time of writing is still in progress. The dispute arose on a question of the demarcation of labour as between the men and the women workers. After some fruitless conferences, the men tendered notices as a final demand that the work should be handed over to them. We understand that on behalf of the Printing and Kindred Trades Federation Mr. A. E. Holmes went to Manchester last week, and conferences were held between the book-binder's section of the men's society, the Society of Women Employed in the Book-binding and Kindred Trades, and the manager of the firm affected. No immediate result was attained, but all parties have retired to reconsider the matter and will meet at an early date when it is hoped that an arrangement will be come to so that work may be resumed.

MR. C. W. BOWERMAN, M.P., and Mr. T. E. Naylor were among the speakers selected to deal with the subject of "Trades Unionism versus Wages Reductions" at the North Camberwell Radical Club and Institute on Monday.

MR. G. A. ISAACS, the general secretary of the National Society of Printers' Assistants, who has been invited to act as steward at next week's Pension Festival, has issued a special appeal to the members of his union for the financial support of the Corporation.

# Trade Notes.

MR. JUSTICE ASTBURY last week ordered the *Sunday Sportsman* Co. to be wound up. There were two petitions before the court; one by Erik Fernstrom and the other by Spalding and Hodge, Ltd., creditors for £544 and £2,500 respectively. Counsel for other creditors supported the petitions.

THE process engraving departments hitherto carried on by Burleigh, Ltd., also by the Grosvenor Engraving Co., have been amalgamated, and will continue as "The Graphic Engravers," of Rupert-street, Bristol. They send us excellent examples of half-tone and other block work executed from their blocks.

FLEET STREET AND "BART.'S."—This week an effort is being made by representatives of the newspaper world on behalf of St. Bartholomew's Hospital. Every day whist drives are being held in various suburbs, and many other means used to raise funds. All printing and stationery has been presented by members of the trade.

THE *Evening News* of the 22nd inst. contained an explanation of the inadvertent printing by that paper, in the previous day's earlier editions, of a reproduction of the Queen's Christmas Card as produced by Messrs. Raphael Tuck and Sons. The Royal Cards will not be released for illustration in the Press until November 26th.

L.M.P.A. MEETINGS.—Officials of the various district associations in London having met to confer as to the dates of their respective monthly meetings, the following arrangements have been agreed, beginning next month: North London, 2nd Monday of the month; West and North-West, 3rd Tuesday; South-East, 2nd Tuesday; South-West, 1st Tuesday; East and North-East, 3rd Wednesday; Central Districts, 1st Wednesday; Thames Valley, 4th Monday.

TO HER SON, Mr. Henry Kenyon Stephenson, typefounder, of Hassop Hall, Bakewell, and her son-in-law, Mr. George Ernest Branson, solicitor, of Sheffield, has been granted probate of the will of Lady Stephenson, who died on August 5th last, widow of Sir Henry Stephenson, a former Mayor of Sheffield. She left estate of the gross value of £16,687, with net personality £15,869. Among her bequests were her Elizabethan Bible and her George II. Bible, dated 1759.

A SPECIAL appeal on behalf of the Printers' Pension Corporation is being made by the London Central Districts Association of Master Printers. In order to create more interest in the charity, a meeting is to be held on Monday next at Stationers' Hall, at which Sir Wm. A. Waterlow, K.B.E., Mr. R. A. Austen-Leigh and Mr. Joseph Mortimer are to give addresses on the needs of the Printers' Pension Corporation. Mr. W. H. Burchell is afterwards to open a discussion on "Unemployment in the Printing Trade."

THE *Daily Herald* is conducting a vigorous campaign to enable it to reduce its price from 2d. to 1d.

A MOVEMENT is on foot to commemorate the life and work of the late Mr. Thomas Catling, who for 53 years was editor of *Lloyd's Sunday News*.

BERLIN newspapers appeared again on Sunday after five days' interruption owing to a strike of employees. The employees asserted that at present prices they could not live on the tariff wages and demanded another 20 per cent.

A VAUDEVILLE Entertainment, in which "The Chocolates" party and other well-known entertainers will take part, is to be given at the St. Bride Printing School on Friday, November 4th, on behalf of the St. Bride Students' Pension Fund.

"PENROSE'S ANNUAL" is to be published on November 1st and will contain, as usual, contributions from a number of prominent writers and artists, making a volume of very special interest to those associated with the graphic arts. The price is to be 8s. net. instead of 10s. 6d.

COUNSEL were heard on Saturday in Edinburgh in an application for a new trial in respect of an action for libel by James Cook against the publisher of the *Western News*, 21, Byars-road, Partick, Glasgow, a jury having returned a unanimous verdict for the plaintiff, and assessed the damages at £250. The application was refused by the Court, which also found the defendant entitled to expenses.

MR. ALFRED H. WATSON, general manager of the *Westminster Gazette*, on whose staff he has been since 1902, has been appointed managing director of the new London morning Liberal paper which will shortly make its appearance, and which is being started in connection with the *Westminster Gazette*. Mr. J. A. Spender, the well-known editor of the *Westminster Gazette*, is the political editor of the new venture. The evening *Westminster* will cease with the appearance of the morning paper.

PRESS CLUB DINNER.—The London Press Club on Saturday opened its season of house dinners with a Journalists' Night. There was a large attendance of members and their friends. Mr. F. Whelan Boyle, chairman of the club, presided, and the guest of the evening was Sir W. E. Berry, the company also including Sir John Martin Harvey—who made his first public appearance in England since returning from Canada—Mr. J. Leng Sturrock, M.P., Mr. Thomas Moles, M.P., Mr. Thomas E. McConnell, M.P., Mr. George Springfield (president of the National Union of Journalists), and Mr. S. G. Smeed (secretary of the Newspaper Press Fund). The chairman expressed a hope that the presence of the representatives of the Institute and of the National Union foreshadowed the joining of these two bodies. He presented Mr. Arthur Last, his predecessor, with the chairman's jewel in recognition of his year of office.

## FORTY-THIRD YEAR.

or from Messrs. W. H. Everett and Son, Ltd., news-  
agents, 11, St. Bride-street, E.C.4.**

THURSDAY, OCTOBER 27, 1921.

# Current Topics.

## Hopes of Better Business.

THERE are evidences that a little more life is being manifested in the printing and book-binding trades, and there is ground for hope that things are now on the mend. A promising symptom is the awakening in the printing ink section of the industry, it being the pretty general experience, we believe, that the last month or so has brought a marked revival of printing ink business at home, whilst export orders also are beginning to show signs of improvement. This is as it should be, and there is every reason to think that the revival will become more perceptible in the industry generally. The new standard hourly rates show a slight reduction of printers' costs; block-makers have cut their prices a little, and electrotypers and stereotypers have followed suit. Though these movements are only slight, they are in the right direction, and tend towards those lower

costs of production which alone can enable cheaper printing and more printing to become the order of the day. The revival of trade cannot, however, be a rapid process, as there are serious obstacles in the way. Besides the general difficulties of high costs and tight money, two outstanding hindrances to a speedy rehabilitation of this country's printing trade are found in the high postal rates for printed matter, and the growing competition from German and other Continental printing houses.

## Demand for Cheaper Postage.

THE protests of the printing trade and of the whole business community are not being dropped, despite Government inaction in the matter of removing the shackles which the increased postal rates have imposed. Several questions on the subject have been asked in the House during the past week, drawing attention to the advantages which present printed matter rates give to our Continental printing trade competitors and pointing out the need for reconsideration of the rates for printed matter and picture post cards. No satisfaction, however, was obtainable from the authorities. Master printers are alive to the seriousness of the position and at an important meeting of the Council of the Federation of Master Printers held on Tuesday a resolution was passed stating that the Council views with great concern the serious decrease in the volume of printing occasioned by the increased postal rates and expressing the Council's deep regret that the Postmaster-General has not yet seen his way to revise the rates for printed matter and picture post cards. An instance was quoted of a firm in this country being able to save £11,000 a year by posting its direct advertising matter from the Continent, and the danger this represents of the loss of orders to British printers was pointed out. In dealing with this problem of Continental competition strenuous efforts are to be made to secure amendment of the Merchandise Marks Act and to provide such other safeguards as may be deemed advisable.

**STANDARDISATION OF PAPER.**—Conferences are to be held shortly between the Federation of Master Printers and the Wholesale Stationers' and Papermakers' Associations to deal with the question of the standardisation of paper.

MANY subjects of interest to printers are dealt with from time to time by the Publicity Club of London (51, New Oxford-street), which sends us a neatly produced brochure about the Club's constitution and activities.

## Personal.

MR. J. S. CROWTHER, J.P., has retired from active participation in the firm of Messrs. Crowther and Goodman, Ltd., a business with which he was closely identified. He was elected an hon. member of the Central Districts Branch (L.M.P.A.) at a meeting of that body on the 21st inst.

MR. F. A. B. LORD has been elected Master of the Makers of Playing Cards.

MR. W. H. BURCHELL has consented to repeat his address given at the last monthly meeting of the North London Master Printers' Association on "Printing Office Management" at the next monthly meeting of the P. M. and O. A.

MR. H. B. CAHUSAC, managing director of the Solicitors' Law Stationery Society, Ltd., is to address the South-West London Master Printers' Association on Tuesday next on "Profit-Sharing and the Advantages of a Works Committee."

THE officers and council of the Newspaper Press Fund have opened a subscription list for providing a suitable testimonial in recognition of Mr. W. Thornton Sharp's many years' service as secretary of the Fund.

AN interesting presentation took place on Friday at the offices of the *Irish News*, Ltd., Belfast, when Mr. John M'Ilvenny, a member of the printing staff, who has retired on superannuation, was presented with a gold-mounted umbrella, tobacco jar and pouch, a case of pipes, and a framed photograph of those in attendance.

MR. F. W. POOLE, foreman printer, has been nominated as a candidate for the Brecon Town Council.

MR. WILLIAM CADOGAN, compositor, has been nominated for a seat on the Newport Town Council.

**FEDERATION COUNCIL MEETING.**—At a meeting of the Council of the Federation of Master Printers on Tuesday, Mr. James MacLehose, M.A., LL.D., expressed his thanks to the Federation members for the response made to his appeal for subscriptions to the Printers' Pension Corporation. Encouraging reports were made of the work of the Costing Committee, Mr. E. W. Humphries emphasising the importance of this branch of the Federation's work at the present juncture. Mr. E. G. Arnold made an important statement regarding the proposals of the railway companies to transfer printed matter to a higher classification.

## The State of Employment.

In the paper, printing and bookbinding trades employment during September continued bad. It was rather worse than a month ago in the paper trade, but in the printing and bookbinding trades there was a slight improvement in some provincial districts.

The percentage of workpeople unemployed in the printing, publishing and bookbinding trades, as indicated by the unemployment books lodged at Employment Exchanges, is stated by the *Labour Gazette* to have been 7.0 at September 30th, as compared with 7.7 at August 26th. In addition, 1.1 per cent. of the workpeople were claiming benefit in respect of systematic short time working at September 30th, as compared with 1.5 per cent. at August 26th.

With letterpress printers in London employment was generally bad, and rather worse than during the previous month. Short time was stated to be not quite so general as in August, but on the other hand, there were more unemployed in September. In the provinces employment remained slack on the whole, and a good deal of short time was reported; at some centres there was a slight improvement as compared with a month ago. In the lithographic printing trade employment continued bad, and the majority of workpeople employed were on short time. With lithographic artists in London and at Manchester there was a decline on the previous month. Returns received by the Department from employers affecting about 7,350 workpeople in the letterpress and lithographic printing trades showed that nearly 28 per cent. of these workpeople worked, on an average, eleven hours per week short of full time.

Employment in the bookbinding trade continued bad. Short time was prevalent, but there was a slight improvement in this respect compared with a month ago. Of 3,800 workpeople covered by returns received 40 per cent. were working, on an average, 12 hours per week short of full time.

Of a total membership of 79,281 in printing trade unions reporting to the Ministry of Labour, 7.8 per cent. were unemployed at the end of Sept., this being an increase of 0.3 per cent. on the previous month and of 0.2 on a year before. Of 15,479 bookbinders, 9.4 per cent. were unemployed at the end of Sept., this being an increase of 0.1 on the previous month and of 0.6 on a year before.

THE Joint Industrial Council of the printing and allied trades met yesterday (Wednesday), interesting items on the agenda being: the Apprenticeship Committee's report; unemployment and the Government proposals; the adoption of the Standard Costing System; and a motion that all decisions of the Joint Industrial Council should be obligatory on the trade.

Also debenture dated October 3rd, 1921, to secure £1,000, charged on the same property. Holders: Blackett Press, Ltd.

### BANKRUPTCIES, etc.

Re RICHARD SILLETT, general stationer, printer and sundriesman, 5, Paul-street, Finsbury, E.C., and Livingstone-road, Leyton, and trading as "H. Paxman and Co."—This debtor filed his petition on October 11th at the London Bankruptcy Court and the first meeting of the creditors was held on October 24th, when the liabilities were stated to amount to £200. The Official Receiver reported that the debtor acted as a traveller in the trade for nine years prior to starting business as above. He had a free capital of £50, and borrowed a further £95. The trading was successful for six months, but the debtor was then away with a five months' illness, during which the business suffered and it had never recovered, the subsequent trading having been carried on at a loss. An execution was levied on October 6th when the Sheriff took away stock to the value of £60. The only assets that were left were the remaining stock, estimated to realise £30, and a few fixtures. Slackness of trade and the debtor's ill-health were the reasons given for the failure. The case was left with the Official Receiver to be wound up in bankruptcy.

BOOKS FOR RUSSIA.—The Department of Overseas Trade is informed by the Official Agent of the British Mission in Moscow that he has been approached by an association of Russian artists, musicians and authors who desire to obtain from the United Kingdom certain literature required for the use of a co-operative organisation which they have formed for the sale of books, music, etc. The association is anxious to receive catalogues of books recently published in the United Kingdom, more especially those giving the names of books on music, art, etc. In the past Germany had a paramount position in Russia in the matter of art; instruments, ideas, training, literature on artistic matters were essentially German. In order to avoid the return of this state of affairs—the group mentioned is already in touch with German firms—British firms would do well to take an interest in this market now, even though present conditions do not warrant the hope that these efforts will be financially rewarded in the immediate future. Catalogues should be addressed to the Official Agent, British Mission, Moscow.

### Mr. Leopold Ridout.

We much regret to learn of the death of Mr. Leopold Ridout, a director of Messrs. John Kidd and Co., Ltd., who, after only two days' illness, passed away on the 13th inst., from pneumonia. Aged only 41, he had proved his ability, and a brilliant career was predicted for him. His co-directors, the staff, and workpeople, with whom he had been associated for 24 years, regarded him with respect and esteem, and their regret will be widely shared throughout the newspaper and printing trade, both at home and abroad, in which he was widely known and appreciated for his ability, sound judgment and high character.

### Mr. Kennedy Jones.

THE death occurred on Thursday of Mr. Kennedy Jones, Coalition Unionist M.P. for Hornsey, and a prominent figure in the newspaper world. Mr. Kennedy Jones, who was 56 years of age, had been ailing for some time past. Born in Glasgow, he became a well-known journalist in an organising capacity, and was prominently associated with Lord Northcliffe in the latter's early newspaper enterprises. From 1894 to 1900 he was director and news editor of the *Evening News* and helped to organise the news services of the *Daily Mail*. He was also associated with the starting of the *Daily Mirror*. A long illness after this caused him to withdraw about the year 1912 from his journalistic enterprises, and his health was probably never quite re-established. His book of reminiscences, "Fleet-street and Downing-street," was published last year. A memorial service was held at St. Margaret's, Westminster, on Monday.

### Mr. William Jennings.

THE death occurred at Darwen last week of Mr. William Jennings, a well-known local printer, aged 71. Mr. Jennings was a native of Nottingham and moved from there to Darwen 50 years ago to become manager of the printing business of Mr. J. J. Riley. He continued faithfully to discharge the duties of this position for 43 years, going into retirement between six and seven years ago. He witnessed the development of the firm from a small beginning and took an important share in the attainment of the success achieved.

AMONG the week's dissolutions of partnership is that between William James Howard, Reginald Henry Swadling, and John Parkinson, lithographic printers, 7, Crawford-passage, Farringdon-road, E.C.

THE Danish paper industry has decreased its output to one-third of normal, while imports are now 16 per cent. higher than in 1913.

### TENDERS WANTED.

SAINT PANCRAS BOROUGH COUNCIL.

### To Printers, Bookbinders and Stationers.

**T**HE Council invite tenders for the supply of Printing, Bookbinding and Stationery, for a period of one year, commencing 1st January, 1922. Forms of tender, which contain all the necessary information, can be obtained on application to the undersigned. Samples may be inspected at the Town Hall on any week day from the 31st October to 9th November, 1921.

Tenders are to be delivered to me, not later than 12 o'clock noon, on Wednesday, 16th November, 1921, in envelopes endorsed "Tender for Printing, etc."

C. H. F. BARRETT,  
 Town Clerk.

Town Hall,  
 Pancras Road, N.W.1.

# The Bookbinder.

## THE ZAEHNSDORF BINDERY: A Link with Old-Time Craftsmanship.

"Fast bound, fast found," is the motto of the house of Zaehnsdorf, a motto inherited from the past and indicating the confidence with which the old-time craftsman-binder entrusted his workmanship to the tests of time. In the present-day Zaehnsdorf bindery all work is done with tools, methods and materials very similar to those used in the days of the beginnings of the business associated with the name of Zaehnsdorf (*i.e.*, in the early decades of last century)—tools, methods and materials, indeed, which are in many respects the same as used in the earliest years of the binder's art. Thus the house of Zaehnsdorf, as we were pleasantly reminded on making a casual call the other day at the well-known bindery in Shaftesbury-avenue, provides an intimate link with the age of patient, thorough craftsmanship which gave us some of the greatest masterpieces ever achieved in connection with the art of the book; and from what we saw of the operation of the various processes that go to the binding of books by hand, we concluded that Zaehnsdorf workers of to-day inherit the same craft-confidence that led old Joseph Zaehnsdorf, several generations earlier, to mark his books with the words "*Fest gebunden, fest gefunden.*"

### The Zaehnsdorf Tradition.

Born in 1814 of Austro-Hungarian descent, Joseph Zaehnsdorf came as a young man to London about 1837, became a naturalised British subject, and after a long working life in the course of which he made a name for himself as the best bookbinder in London, he died in York-street, Covent Garden, in 1886, aged nearly 73. The Zaehnsdorf name has remained in the directorship of the firm, and although Mr. J. W. Zaehnsdorf, son of the founder of the business, retired from active management about a year ago, Mr. E. J. Watts Zaehnsdorf and Mr. K. Zaehnsdorf are at present co-directors with Mr. R. H. Shaw. Concrete evidence of the fact that the standard of Zaehnsdorf workmanship has been handed down together with the name, is to be found in the fact that the many awards gained by Joseph Zaehnsdorf at international exhibitions have been added to in recent times—Zaehnsdorf bindings having been awarded Grand Prizes at the Chicago Exhibition of

1893, the Paris Exhibition of 1900, the St. Louis Exhibition of 1904 and the Milan Exhibition of 1906—whilst the firm also holds a warrant of appointment to King George V., as it did also to King Edward VII.

### Interesting Repair Work.

At the Zaehnsdorf bindery one can always find a number of rare and interesting volumes in the craftsmen's hands. Specialising in high quality work, the firm is called upon to do many special bindings for valuable books belonging to private collectors and public libraries, both in this country and America, whilst many other treasures of the bibliophile are entrusted to them for repair. A specially interesting feature of this repair work, by the way, is the doctoring of leaves which have become torn or discoloured with age, a branch of the binder's work which is here carried to the status of a fine art. One has to see in order to believe the way in which a page badly spotted or otherwise stained, can be restored to normal colouring. After due consideration of the nature and cause of the discolouration, appropriate chemical baths are prepared and the page immersed, when the stains fade away as you watch, leaving not a trace behind. This work, of course, demands special knowledge, experience, and judgment, as the use of the wrong bath might well result in more harm than good, fixing instead of removing the unsightly stains, and perhaps otherwise damaging a possibly irreplaceable leaf. Pages holed or torn are made whole again with equal skill, whilst similarly successful repairing operations are performed upon bindings of all kinds.

A Zaehnsdorf speciality, allied to, though distinguished from, bookbinding proper, is the making of fireproof cases or containers for the protection of important volumes. Specially constructed of compressed paper, these cases have proved themselves able to withstand very severe assaults of fire, water, etc., preserving their precious contents—costly first editions and other valuable books—intact. The cases are neatly covered in leather or other materials, and finished to approximate so closely to the appearance of bound volumes that when placed among the books on a shelf they can easily be mistaken for the genuine article.

Messrs. Zaehnsdorf, Ltd., are of course, closely in touch with trade movements of various kinds. Mr. E. J. Watts Zaehnsdorf, it will be remembered, was mentioned in our columns last month as being one of the direc-

tors of the recently-formed Bookbinders' Mutual Assurance Co., Ltd., which, as previously explained, represents an interesting experiment in co-operative action among master bookbinders.

## Binding Notes and News.

### The State of Trade.

It cannot be claimed that trade has improved to any considerable extent so far as the bookbinding industry is concerned. Unemployment is not quite so acute according to Board of Trade returns, but conditions do not justify any great amount of optimism. There is a better tone in the printing section, which improvement, in course of time, will no doubt work round to the binding side, but we cannot overlook the fact that the largest users of stationery and account books were well stocked when the slump set in. The depression has dealt a severe blow to those banks, corporations and societies, etc., which, in anticipation of a prolonged boom in trade, ventured to set about branch extensions and developments in organisation generally. Had better conditions prevailed, the stationery bookbinders of this country would have experienced a demand almost beyond their power of execution. As it is, much of the work already done represents idle stock.

### Book Sales and Prices.

The publishers are taking things very quietly and, despite wage reductions and low paper prices, it is still considered that costs of production do not warrant the resumption of publication work on any scale. The lack of demand for books is not due so much to their high price as to the economy wave which seems to be touching everyone. As we gradually emerge from the trade depression the old habit of book-buying will come back and publishers will once again find a public for their wares. Meantime it is grossly unfair to lay the blame for the high price of books entirely at the door of the manual worker. Next to the author he is probably the lowest paid in the chain of participants in book production.

### The Bookbinder's Docket.

We are still waiting to hear something of the deliberations on the bookbinder's docket. It is more than two months ago that the committee was first mooted. Even the official publications are quiet on the subject. We do not even know if the committee or commission has had its first meeting. What we do know is that very few bookbinders know their costs, and that competition of a most unhealthy sort is being indulged in. Some of the prices quoted for trade binding are simply ruinous and reveal an absolute lack of appreciation of the cost and value of production. So long as it is impossible to use the time docket system, the binding department is being conducted on guess work, not merely as regards estimating but in regard to every

other feature. It is not enough that Sheffield, Liverpool and Oldham are allowed to fill dockets; the very fact that certain towns are privileged condemns the attitude of those minor officials of the same organisation who bar the way to progress.

### Book-Sewing.

Loose-leaf books are well to the fore in modern business, though a systems expert very recently expressed his conviction that nothing could beat the sewn book. We agree with this and would merely add that the only thing to beat the sewn book is the hand-sewn book. With the exception of the very high-class or very small account book orders, practically all book-sewing is nowadays done by machine and in every case the machine is either American, German or Swiss. It is a reflection on British engineers that for the most necessary part of the modern bookbinder's equipment we have to rely upon foreign-made machinery.

### Sewn v. Loose-Leaf Books.

Reverting to loose-leaf books, the tendency with all progressive offices is toward their adoption. Within recent months manufacturers and specialists have produced their new catalogues and have carried out extensive publicity campaigns. One never sees the hand-sewn account book utter a word in its own defence. Even at the Exhibitions, and wherever there is one with any business interest, the loose-leaf stand is there, the account book maker fails to take the opportunity of displaying his productions and demonstrating their insuperable advantages for certain purposes. There will always be the need for the hand-sewn book, and if as much energy and expense was put into publicity work on its behalf as has been done in the case of loose-leaf, the latter would not have made such headway. However, any binder who can bind books can make loose-leaf ledgers if he sets out to do it. There is no necessity to let the business get altogether into other hands. Metal parts and fittings of every description are available, and there is nothing to prevent any enterprising house from introducing its own proprietary goods.

### The Market for Materials.

The materials market has not altered much since we last wrote. Leathers are stabilised for the present, and fabrics are also firm. There is a prospect of lowered prices in threads and tapes, and gold leaf has also eased slightly. Glue stands at double pre-war prices, while concessions in wet and dry

paste have recently been announced. Marble papers and fancy papers generally are in poor demand, but there is no sign of any immediate fall in price. Strawboards are showing signs of movement, doubtless due to a slight revival in the box-making and bag-making trades. Dutch quotations are firmer, and at home the market price has risen to the extent of about £1 per ton. Millboards, best English quality, have recently fallen by about £4 per ton and the demand is fair.

## Rotary Photogravure.

By HENRY T. G. MEREDITH.

(Continued from page 399.)

After drying the image all those portions which it is desired to protect from the etching solution are covered with an acid-resisting varnish.

### Etching the Cylinder.

The most suitable mordant for etching is found to be ferric perchloride, and the image is etched in a number of baths varying in strength from a strong to a weak solution. A peculiar feature of the etching process is that a strong solution of ferric perchloride has less corrosive action upon copper when covered with a gelatine film, than a weak one, because it has less penetration power on the gelatine film. A saturated solution will not penetrate even the thinnest film. The result of this peculiarity is that it becomes necessary after etching the shadows, represented by the thin portion of the gelatine film, to transfer the cylinder to a bath of weaker solution for the purpose of etching the next lighter tones, this process being continued so as to etch the image in, perhaps, four or more baths of varying strength.

The result of this etching is that those parts of the copper cylinder that lie directly beneath the thinner portion of the gelatine film, representing the shadows of the picture, are etched much more deeply than those parts that lie directly beneath the thickest portions of the gelatine film and which represent the high lights of the picture.

Now, as the etching may not exceed one millimeter in depth, the impossibility of filling in a space of, say, half an inch square with a thin film of printing ink, whilst retaining the margins clean, will be readily understood, because as fast as you could fill up the cavity or depression with ink, so you would wipe it out. It is here that we have resource to the ruled cross-lined screen, a negative of which, it will be remembered, was used for printing upon the carbon tissue, resulting in a positive image in ruled cross-line in thick gelatine over the whole of the picture. During the process of etching, therefore, the ferric perchloride is unable to percolate through this network of lines, so that the picture alone is etched into little square cavities or pits, which vary in depth according to the time taken in etching, which in turn is in propor-

tion to the thickness of the gelatine film which happens to cover them. And it is the multitude of these square pits, numbering something like 25,000 to the square inch, that retains the ink, the deeper cells containing most ink representing the shadows, whilst the shallow cells containing the smallest amount of ink represent the high lights.

### Deposition of Copper.

Copper has always been found to be the most suitable metal upon which the illustration can be etched. The core of the cylinders used for rotary photogravure are of iron, and upon the base is deposited a covering of copper by electrolytic methods. The equipment of a polishing and depositing shop is a new necessity for the up-to-date photo engraver, for after every job has been finished with, the cylinder is returned for the image to be ground off, and the surface repolished. This is done by the cylinder being firmly fixed in a lathe, and ground down by stone of varying degrees of hardness and cutting quality, then polished with charcoal, and finally buffed and highly polished with what is known as a "mop" revolving at a high rate of speed. The cylinders will not, of course, wear indefinitely; with constant polishing and grinding the thickness of copper must, of course, become exhausted, so that it becomes necessary for a new deposit to be laid on. This is slow and exacting work, and is done by the usual methods of copper plating by placing the cylinder in a large vat containing an acid copper sulphate solution, the cylinder itself forming the cathode and two large pure cast copper plates the anodes. The quality of the deposited copper is determined by many factors, such as the rate of deposit, which depends in turn upon the electric current.

(To be concluded).

## Football.

The following matches were played last Saturday and resulted as indicated:—

### Printers' Charity Cup.

Waterlow's, 1; Oyez, 0.

### Printers' Football League.

Wightman's, 3; Fleetway Press, 2.

PRINTING AT COVENTRY.—The typographical students at the Coventry School of Art were warmly congratulated by the Mayor (Councillor W. H. Grant), when distributing the prizes, upon the excellence of their work. He called special attention to their colour schemes and display specimens which were included in the exhibition of the past years' studies and spoke of the value of their training would have upon their career in the printing trade. Besides prizes given by the Coventry Master Printers' Association, special prizes were supplemented by Messrs. Iliffe and Sons, Ltd., Messrs. W. W. Curtis, Ltd., Messrs. Caldicott and Feltham, and Mr. J. W. Parbury.

### Strawboard Supplies.

The countries supplying the British market with strawboards during September were as under:—

Port of Importation.	Country whence Consigned.	Quantity. Cwts.	Value. £
London	Germany	20	10
"	Netherlands	85,011	89,149

"	Austria	280	503
<b>*Including Faroe Islands.</b>			
<b>Total</b>		<b>7,366</b>	<b>8,240</b>

CZECHO PAPER EXPORTS FREE.—By a recent decision of the Czecho-Slovak Ministry of Trade, paper and paper goods, but not pulp, will from October 1st be released from the payment of export duties and from the hitherto existing export formalities (license, etc.) with the sole proviso that exporters must report to the Ministry the value of the merchandise exported.

## Water Marks.

### Some Notes and Suggestions.

Interesting comments on the subject of the water mark appear in an article which Mr. Waldon Fawcett contributes to the *Paper Industry* (N.Y.).

Rich in its achievements as one of the oldest and most extensively employed forms of trade mark, it is surprising that new work should be found, at this late day, for the water mark, or, as it is more correctly designated, the paper mark. No innovation in this quarter should, however, come as a complete surprise to the papermaker who remembers the force quickly attained by the movement of years ago which sought to perpetuate, by water mark, the date of manufacture of every sheet of paper designed for legal documents, for the printing of limited editions of books, etc.

The newest utilisation of the paper mark is that which drafts this ingenious medium of identification not merely to point to the producer or distributor of paper but to the paper user. Paper manufacturers have long been familiar with the demand for the water marking of private brands, but the latest departure goes even beyond that in demand of concession from the producer of paper. The one no less than the other may appear at first glance to be menacing to the traditions of the paper trade and to the conservative ideals of paper manufacturers who hold that no mark but that of the manufacturer should appear in paper.

In one respect, however, the new recourse to the paper mark may not be as disquieting to the owner of valuable, established brand names as has been the call for private branding. The private brander usually demands that his name or trade mark and his alone shall be water marked in the paper. This insistence may not disturb the paper manufacturer who is putting out a number of grades or classes of paper, some of them so commonplace in character or quality that no harm is done by anonymity. But it is decidedly disquieting to the manufacturer who produces a speciality that is so distinctive that it is recognised as unique by the consuming public. Goodwill in such a product is deliberately whittled away by private branding, and it is scant wonder that many papermakers refuse to thus share their prestige.

Unlike the private brander, the paper user who has lately shown a disposition to make the paper mark serve his own ends, offers no objection to the presence of a mill brand along with his business badge. The outsiders who are borrowing the paper trade's medium of identification are of two classes. In one class are the faddists and the fashionable folk who, ever in quest of something new, consider it smart to have the user's private water mark in his personal stationery, even as they deem it up-to-date to have cigarettes marked with the owner's monogram. This

demand for individually marked paper will always, however, be limited in extent, if for no other reason than the element of expense involved.

Susceptible of considerable development, however, is the very latest adaptation of the paper mark, that which, in effect, employs it as an advertising medium. A number of paper manufacturers, while not unmindful of the volume of new business created by the penchant of the general public for water marks, have become a bit uneasy lest this promiscuous marking of paper jeopardise the goodwill of producers. There is, however, scant danger that the new flock of water markers, by proxy, can make complications for paper manufacturers. Indeed, there is no likelihood that this form of paper marking to order will precipitate such disputes over ownership in brand designs as have occasionally grown out of transactions in private branding. The best guaranty of immunity from trouble is found in the fact that new fangled use of the water mark by the large consumer of paper is purely an advertising use.

Water marks have steadily gained in favour with the majority of papermakers during a span of seven centuries because of the manifest advantage of the device traced in translucent lines in the substance of a sheet of paper and not because, as has sometimes been stated, it is necessary to employ a medium that will permit the marking of every individual sheet of paper. As a matter of fact, unwater-marked paper is not disqualified for trade mark protection if the brand be imprinted upon or attached by labour or otherwise to the box or wrapper containing the paper. To put it differently, all the requirements of trade mark "use," upon which trade mark registration is based, are fulfilled if, in view of application directly to the goods, the mark be attached to the container which holds the goods. To water mark the individual sheets in addition to placarding the package is, however, to make assurance of identification doubly sure. Even more persuasive to paper marking, though, is the consideration that by this means and this means alone may identity of the product be translated to the ultimate consumer and capital made of the favourable impression gained by the general public.

### The Object of Marks.

Because it is the custom of librarians, collectors, antiquarians, etc., to study paper marks for clues to intimate information regarding old books, that is, books published before the year 1800, some persons have gained the impression that the early water marks performed a function as grade marks in the paper industry. This was not the case. The 594 types and varieties of water marks that became current between the year 1300 and 1650, when this form of paper marking flowered in Genoa and other early seats of the industry, served in as great a degree as does any paper mark in use to-day to distinguish the product. As a matter of fact, early water marks are studied by book sharps, librarians, etc., not because they give indica-

tion of grades of paper, but because they serve as the only true test of the size of old books.

Paper manufacturers who are cognisant of the fact that it was the private paper marks used by the earlier papermakers that gave the trade the names commonly applied to standard sizes of paper, such as foolscap, crown, elephant, etc., need no warning against the paper mark which, actually or in equivalent, may be adopted into the language of the trade, become generic, and thereafter be used so indiscriminately in the trade as to imperil the proprietary rights of its originator. It is perhaps with the idea of checkmating this form of complimentary but embarrassing appropriation that some of the shrewdest of modern paper manufacturers have adopted water marks that present in combination names or initials and emblems or insignia. Even if a portion of such a mark be robbed of its individuality by trade usage, sufficient features will remain to distinguish the product of the mill.

### Complete Records.

Fortunately for paper tradesmen who are taken with the idea of perpetuating the traditions of the industry by putting the old water marks to new work, there are available fairly complete records of the old paper marks. This is due in part no doubt to the fact that the ancient Arabs who made paper out of old ropes did not attempt paper marking. Watermarks were unknown to the East. Instead they constitute distinctly a European improvement upon the transplanted art and are adequately chronicled in the records of Genoa, etc. Unluckily, there are fewer available examples of the early Spanish water marks, which is to be regretted since the Spaniards are usually given credit for the invention of this most ingenious process, whereby the sign or seal of the papermaker is made an integral part of his product. The fact that the water marks of the 14th century were crudely executed makes it necessary in most instances that the designs be redrawn for modern use, which alteration serves to satisfy any qualms of conscience over the re-possession of the long-abandoned water marks.

Although date of manufacture has been watermarked since 1545, coming into practice in the same century that saw the amplification of symbols by the use of names in water marks, some paper manufacturers hold that date marking is objectionable on the ground that the presence of dates tends to becloud or complicate manufacturers' marks. This argument applies with all the more force now that papermakers are being urged in some instances to supplement their usual mill marks by community or collective marks of one kind or another. For example, we have the school of thought in the trade which holds that American-made paper marketed *via* the newly authorised joint agency should carry not solely the private paper mark of the individual producer but also a composite water mark that will identify the commodity as of the group of brands that have made alliance for the sake of better distribution abroad.

## Trade in Printing Type.

**IMPORTS.**—Imports of printing type, though still small in quantity, and greatly below pre-war figures, are on the increase again. During the first nine months of this year 24 tons were imported as against 21 for the corresponding part of the previous year—though these quantities look small when compared with the 46 tons we imported for the same period in 1913. For the month of September alone, 2 tons were imported this year as against 1 ton in September, 1920, and 7 tons in September, 1913.

**EXPORTS.**—It is satisfactory to notice there was an increase in the exports of printing type for the period covering the first nine months of this year as compared with the same period last year. During this period 233 tons were exported, as against 195 tons in the corresponding period of 1920, although a decrease is shown compared with the 420 tons exported in 1913. Regarding the month's showing of the exports of printing type only 19 tons were exported, as against 27 tons for the same month of 1920, and 43 tons for the corresponding month of 1913.

## Vellum Paper.

A very simple and inexpensive device, employed in an important French works with good results is described as follows in *La Papeterie*:—

A bristly brush 10 centimetres (3·94 in.) wide is placed inside the wire, between the first and second suction boxes, starting from the head roll and just under the vellum or laid paper drip roll.

The extremities of this brush are held by two sliding supports with an adjusting screw, so that it can be moved near to or away from the wire. The bristles of this brush should be eight centimetres long. For good work it is well to have at least three suction boxes.

The first box must be well regulated so that the proper quantity of water will reach the drip roll. Care must also be taken to regulate vibration so that the fibres will cross over each other uniformly, an essential point. The brush extracts the water retained by the drip roll and drives it through the meshes of the wire, thus preventing crushing in the wet press.

**MESSRS. COSTA AND CUTHILL** have acquired York House, 14, York-place, Edinburgh, which is now their office address. The new premises are self-contained, well-appointed and everything arranged to enable the firm not only to attend to their own customers' requirements in an adequate manner, but to meet the convenience of business callers.

## Australian Notes.

**Papermaking in Australia—Investigations with Local Trees—Encouraging Results—Four States Interested—Consumers Present Experimental Machine—Grant for Forest Products Laboratory—Paper Contract Appeal Dismissed—Cheaper School Books.**

*(From Our Sydney Correspondent.)*

PAPER and its manufacture from Australian timber continues to absorb a considerable amount of attention, and interesting reports are arriving from Western Australia concerning the manufacture of paper pulp from local trees.

THE investigations carried out in West Australia by the Institute of Science and Industry have so far given very encouraging results, it is stated, and they indicate that good yields of satisfactory pulp can be obtained from several of the common eucalypts.

THE director of the Institute states that the forestry departments of four of the States, New South Wales, Victoria, West Australia, and Tasmania, have agreed to contribute £250 to the cost of the work during the current financial year. The paper trade interests are also co-operating in the work and contributing to its cost. The Australian Paper Mills Co., Ltd., Melbourne, has made a grant of £100, while the newspaper proprietors in West Australia have purchased and presented to the Institute an experimental papermaking machine at a cost of over £600.

THE West Australian Government has offered the Institute a site of a 20 acres of land at Crawley, on the Swan River, value about £20,000, as a site for a forest products laboratory and has also promised £5,000 towards the cost of the laboratory if the Commonwealth will establish and maintain it.

AN interesting case concerning a paper contract has been engaging the attention of the Courts at Sydney. An appeal was made by the defendants in the case of David John Wildey against Alexander Moir and Co. and Percy Moreton Loutit, trading as Alexander Moir and Co., to set aside the verdict found for the plaintiff and for a new trial. The action, which was heard before Mr. Justice Pring, was one in which the plaintiff sued to recover £650 for the non-delivery of certain reams of paper on two contracts, one made in October, 1919, and the other in January, 1920. The jury gave a verdict for the plaintiff for £475.

THE appellants now contended that the plaintiff was not entitled to more than a far-

thing damages. It was stated on their behalf that the breach charged in the declaration was the non-delivery of the usual documents to entitle plaintiff to get possession of the goods on arrival. The defendants stated they were unable to deliver the usual documents, as the paper in question was part of a larger consignment imported by them, and that there were no separate documents for the plaintiff's goods. They offered, however, to deliver bond warrants which would entitle the plaintiff to immediate delivery, but these were refused. The appeal was dismissed with costs.

CONSIDERABLE controversy is proceeding over the scheme put forward by the Minister of Education in New Zealand with a view to cheapening the cost of books and stationery required by the school children. Eight labour unions have written approving of the steps taken; but opposition is forthcoming from Chambers of Commerce.

THE question came before the council of the Wellington Chamber of Commerce in the form of a letter from the Auckland Chamber which did not favour Government intervention in such supplies. The chairman (Mr. M. A. Carr) saw no reason why, in the interests of economy and uniformity, the department should not supply school books and stationery. Mr. C. M. Banks dissented from that view, on the broad principle that Government trading was not favoured by the chamber. He assumed that there would not be a great deal saved, as he supposed the Government would call for tenders for supplies. On the other hand, the action of the Government in supplying books and stationery direct would, he felt sure, be the ruin of many of those small businesses generally found in the vicinity of big schools. On his motion, the Auckland protest was supported.

IT is interesting to note how members of Parliament are sometimes committed to dubious courses by hasty acceptance of a formula. Thus, in December, 1919, every candidate for Parliament was asked the question: "Will you support the proposal to supply all school requisites free?" The result was that 45 members of the present Parliament agreed to support the proposal.

WHEN this matter of school books and stationery was being discussed by the booksellers a statement was made that the average annual cost of books and stationery in the primary schools is about 10s. per child. The Minister of Education stated at the time that the estimate was too low. A departmental estimate as to the cost per child in the primary schools is about 20s.

ANOTHER aspect of the bookselling business is indicated by the following note sent by an aggrieved person to a local paper: "Can't there be some control over booksellers' prices? I was asked 8s. 6d. for a book at one shop, but went a little further and got it for 6s. 6d."

## The Australian Market.

### Imports.

The imports into Australia of paper, printed matter, etc., during June last were as follows, the values for the corresponding month of last year being given in parenthesis:—

Cardboard and paper boards, £29,459 (£21,209); wrapping paper of all colours, £31,953 (£55,571); writing and typewriting paper, £37,037 (£48,846); other paper, £58,769 (£53,128); directories, £51,510 (£73,266), and all other, £51,925 (£52,165).

The figures for the past two years ending June were as follows:—

Paper—	1919-20.	1920-21.
Cardboard and boards...	£157,436	£389,265
Printing ... ..	1,442,463	3,876,348
Wrapping ... ..	299,102	688,007
Writing and typewriting	435,497	995,109
Other paper ... ..	535,699	1,126,800
Books, printed—		
Directories, etc. ... ..	773,976	1,032,912
All other ... ..	532,453	847,766
Totals ... ..	4,154,626	8,956,147

Wood pulp imports amounted in June, 1920, to £25,208 and in June, 1921, to £7,675. For the year to June 30 (1920) they amounted to £57,253 and for the corresponding period ending June, 1921, £226,876.

### Exports.

Paper exported during June, 1920, amounted to £15,030 and in June this year to £7,206. For the twelve months ended June, 1920, the exports of paper reached £83,147 and for the fiscal year ended June, 1921, £83,101. Stationery exported for the month of June, 1920, reached £20,082 and for the corresponding month of this year £23,825. For the twelve-months' period (1919-20) the exports amounted to £160,970 and for 1920-21 to £226,168.

FROM Fry's Metal Foundry, 25-42, Holland-street, Blackfriars, S.E.1, we have received a copy of an attractive brochure "The 'Fryotype' Printing Metals." Handsomely produced, its 36 pages give a brief history of the firm's progress, and particulars of the "Fryotype" service. A simple account is given of the metallurgy of printing metals, accompanied by illustrations, micro-photographically produced, showing the structure of type metals. The whole booklet is profusely illustrated, views of the "Fryotype" foundries being included, also of some of the first-rank printing offices supplied by Fry's, and of other interesting subjects. The publication is a most creditable one, and printers will find it both instructive and interesting.

"PLAYING cards, manufactures from paper yarn and tissues" is one item in the list of goods the import of which into Poland is prohibited.

## Strength in Fibre Boxes.

The direction in which the fibres run in fibre-board boxes has been found to have a considerable effect upon the serviceability of the boxes. Fibre board does not tear as easily across the grain as with the grain; it may have two or three times as much strength in one direction as in the other, the difference varying with manufacturing conditions. This excess strength may be advantageously used to reinforce the weakest points of the box and so produce a better balanced construction.

The weakest parts of fibre boxes are the scores, or folds, forming the edges of the box. It is impossible to have the fibres running perpendicular to every score, but usually they might be made to run perpendicular to the scores which receive the hardest punishment, or which tend to break open first.

In tests at the United States Forest Products Laboratory on fibre boxes, some packed with two dozen No. 2 food cans, and some with four dozen tall-sized milk cans, it was found that the first break nearly always occurred in the horizontal end scores. By making up the boxes so that the fibres ran vertically instead of horizontally in the sides and ends, the first break throughout the length of a horizontal end score was retarded about 85 per cent. Through the same change, the horizontal side scores, which received the next hardest punishment, were strengthened so that the first break never occurred in them.

The gain in strength of the horizontal scores was, of course, accompanied by a weakening of the vertical scores. But since the upright scores do not ordinarily receive as great stress as the horizontal scores, and in these particular tests were not as likely to come in contact with the sharp edges of the cans, they were able to stand a reduction in strength and yet not become the point of first failure.

## Wrappings and Boards Active.

Increased demand and an upward trend in prices have marked the wrapping paper and board market during the last week in September in Canada, according to reports reaching the Canadian Pulp and Paper Association. The market for these commodities, which has been more or less stationary for some months, has become suddenly active. Paper stock from which boards are made, and which was recently selling at so low a price that collectors refused to make their customary collections, is now quoted at from \$16 to \$18 a ton, and in brisk demand, both locally and for export. Canadian collectors are shipping part of their accumulations to the States, and profiting by the increased price and the exchange premium. This is making a shortage of paper waste in Canada, and indicates a higher price for boards.

# New Inventions.

## Feeding Sheets.

Sheet feeding mechanism of the kind in which the sheets are separated by a pneumatic separator and are fed by tapes or bands carried by oscillating arms which cause the sheets to be gripped between the tapes and fixed bowls or pulleys, is the subject of a patent by Mr. F. Waite and Messrs. Waite and Saville, and is constructed so that the tapes 3 pass over pulleys 2 which are supported by adjustable brackets 12 carried by a cross bar 10 mounted on a pair of oscillating arms 9 on a shaft 6. To ensure accurate feeding of the

sheets, the pulleys 2 are constructed so that the tapes 3 pass over portions *a* of the pulleys which are separate from the portions *b* which engage the fixed bowls or rollers 5 frictionally when the arms 3 are raised after the separation of a sheet by a suction separator. To mount the pulleys 2, they are formed with recesses *c, d* which receive a projection *g* on a pin 14, and a boss 12 on the bracket 12 respectively. In a modification, the pulleys 2 are formed with end flanges which co-act with the roller 5 and with central depressed parts over which the tapes 3 pass. The space between the arms 9 is covered by a board or sheet of metal fixed upon the arms.

## Toy Books.

In an invention patented by Mr. J. N. Dean the illustrations for children's picture books illustrative of the objects, animals, etc., referred to in the text of nursery rhymes, etc., are printed or mounted on stiff cardboard, cut to the contour of the objects or animals, etc., and provided with struts by means of which

they may be stood upright. The cover or pages, or both cover and pages, are formed with recesses of corresponding contour, and are provided with turn-buttons, etc., for securing the pictures in the recesses.

## Perforating Paper Strips.

For perforating paper strips such as are used in type-casting or composing machines, the Lanston Monotype Corporation, Limited, has patented a device in which punches move with the strip which is fed at uniform speed by a feed-roller, the teeth of which enter the perforations made. After passing the feed-roller, the strip travels over a detector surface which brings into action stopping-mechanism, if holes are present in the strip. From the detector the strip passes to a winding-roll, which automatically stops the machine when it reaches a predetermined diameter. The

punches are carried by a frame 1 which rocks on the shaft 96 under the action of cams 98 on the shaft 15. This shaft also carries a cam which reciprocates the punches at the time when the punch frame has its maximum lateral movement in the direction of the paper strip, which passes from the guide-roller 42 to the feed-roller 43. The shaft 15 is driven by a belt 23 which is kept taut by a pulley 24 on a curved arm 25 centred at 26 and having a nose 27 acted upon by the lever 28 weighted at 30, so as to deflect the belt as

shown. Fig. 5 shows the punching-mechanism in detail. The punches 100 rest on the ends of levers 101 which are centred at 102 and have heads 101<sup>1</sup> which ride in cam grooves 105. The dies 108 are carried by holders 109 and the waste fragments are drawn off by the suction of hoods 87 connected to a suction pipe 86. The paper passes over the feed-wheel 43 and thence over the surface 44, shown separately in Fig. 9. This has a groove 62 along its width, which is ordinarily covered by the paper strip, and a partial vacuum is maintained behind it. Should the strip have a defect in passing over the groove, air passes through and destroys the vacuum. The diaphragm valve 72 then opens, admitting a rush of air through the part 74 to prevent premature re-adjustment of the parts. At the same time a motor is started which acts to shift the driving belt of the machine on to its loose pulley. During the latter operation, through a bell-crank lever 84 the diaphragm valve is once more raised into its closed position and a partial vacuum once more formed in the detector. The winding on roller 46 is driven by rollers 45 and is pressed upon by the roller 47, the axle of which is connected to a frame adapted, when the roller has reached a pre-determined diameter, to press against a projection carrying upward a spring rod which ordinarily locks a bell-crank lever by a latch. This lever is then freed and under the influence of a spring shifts the driving-belt lever and stops the machine. The roller 46 is then removed and a new core put into position. The strip is wound round it and the winding-up started by pressing against the strip by the spring blade 59.

### Printing Inks.

According to an invention by the Rutgerswerke Akt.-Ges. black printing-inks contain as an ingredient one or other or mixtures of the tar-oil solutions of coal, wood, straw, peat, cotton, or other material of organic structure obtained as described in Specifications 131,588 and 160,467, or of the resinous bituminous products remaining on distillation of these solutions, or mixtures of the solutions and the solid products. For example, 58 parts of coal-extract oil, 30 parts of straw-extract oil, and 12 parts of lamp-black are ground

together. Other usual ingredients may be added such as additional colouring-matter, boiled linseed oil, resin oil, pitch, asphalt, and cumaron resin.

### Trimming Printing Plates.

In an invention patented by Messrs. R. Hoe and Co. a machine for trimming the edges of printing plates, etc., in which a work-supporting table is moved past the trimming tool, the table is supported at one side only so that the operator can follow the table as it is moved. As shown, the table 8 having an abutment 9 for one edge of the plate is provided with arms or brackets 22, 18, 17 carrying pairs of rollers 14, 15, 16 mounted on ball bearings and engaging tracks 12, 13, 11 on a vertical part 10<sup>a</sup> of a frame 10. The tracks

12, 13 are on opposite sides of the frame part 10<sup>a</sup> and are at an angle to each other to prevent tilting and lifting of the table. The table may be further guided and prevented from lifting by means of V-shaped engaging members 24, 25 carried by the frame 10 and bracket 22 respectively. The rotary cutter 1 is carried by a shaft 2 driven by a motor 4 through a clutch 5 and is protected by a casing 6 having gaps 7 for the passage of the work. A pivoted side gauge may be provided and a scale may be provided along the abutment 9.

### Intaglio Printing.

Mr. E. Sauer has patented a process whereby intaglio printing surfaces are produced by taking a transparent plate such as cellon or celluloid, forming by stamping, moulding, or other process a deep screen pattern leaving raised grid lines, filling in hollows with bichromated gelatine, printing the plate through the back from a diapositive of the picture to be reproduced, and developing with warm water.

## Printers and the Postal Charges.

### Joint Industrial Council's Action. How High Postal Rates Aid Continental Competition.

The harm that is accruing to the printing trade through the increased postal rates for printed matter and picture post cards is a matter of vital urgency, and this subject rightly received very serious consideration at the meeting of the Joint Industrial Council held on Wednesday of last week. The following letter, signed on behalf of the Joint Industrial Council by Mr. James MacLehose, M.A., LL.D., Mr. A. E. Goodwin and Mr. A. E. Holmes, had been sent on October 10th to the Postmaster-General stating the printers' case for immediate consideration of the revision of the present postal rates :—

"May we remind you that when a deputation from this Joint Industrial Council waited upon you in August last, to lay before you their views as to the effect on the printing industry of the increase in postal rates for printed matter and post cards, you very kindly intimated that an investigation would be made immediately after the holiday season was over, and an early intimation sent to us of any proposal to revise the rates.

"We now have more definite evidence that what we anticipated and represented to you is taking place.

"Enclosed you will find a copy of a circular (Bramess 1920), Ltd.), which has been printed in Germany and widely circulated by post in this country, posted from Cologne; and a post card issued by a London firm posted in Belgium.

"We also enclose you a circular which is being distributed broadcast by a Belgian advertising agency, pointing out that the saving in postage makes the cost of printing a negligible quantity. It states that they will print, fold and address and post 1,000 copies

of a circular for £4 5s., whereas the postage alone in England would amount to £4 3s. 4d.

"We have definite information that one firm who sent out at regular monthly intervals 150,000 copies of a price list are inquiring as to the cost of printing their next edition on the Continent, and that unless our inland postal rates are revised, arrangements will be made to post abroad.

"We need not do more than point out to you, knowing your interest in the development of overseas trade, the danger to British trading interests of sending selected lists of addresses to foreign advertising agents.

"With regard to the picture post card industry, our members specially interested in the production side inform us that no new series are being put in hand.

"The importance of reaching an early decision on this matter cannot be over-estimated. We know you appreciate the value of announcing any revision at the earliest possible date.

"The next meeting of this Council is to be held during the next fortnight and we hope we may be favoured with your reply in time to submit to this meeting."

#### Deputation to Postmaster-General.

The only reply received had been a reference to the reply on the subject given the previous week in the House of Commons. This the meeting considered most unsatisfactory, and it was decided to send a telegram to the Postmaster-General in the following terms :—

"The Joint Industrial Council of the Printing and Allied Trades, meeting at Montagu House, to-day, received your reply with great disappointment, and views with deep concern

your attitude towards postal charges for printed matter and post cards. The advantages allowed Continental producers are causing immense losses to many British firms, and threaten their existence as employers of labour. The Council trusts you can receive a representative deputation on Tuesday forenoon or Wednesday next, to enable additional facts to be submitted, and emphasise the urgency of the matter."

In response to this telegram the Postmaster-General agreed to receive the deputation on Wednesday and it was accordingly arranged that a very influential deputation thoroughly representative of the printing industry should wait upon the Postmaster-General. We go to press before the outcome is known, but it is certain that due expression will be given to the strong arguments available on behalf of an immediate revision of the increased postal rates.

## A "Fryotype" Cot.

On Saturday, at the Lloyd Memorial Home, Deal, a "Fryotype" cot, subscribed for by the staff of Fry's Metal Foundry, was unveiled by Mrs. John Fry in the presence of subscribers and friends, who included Mr. Bateman (general manager of H.M. Printing Works), Mr. Cowell (manager of H.M. Harrow Printing Works), Mr. Roud (manager of the Bank of England Printing Works), and Mr. A. Wills (manager of the Whitefriars Press, Tonbridge).

The chairman of the institution, in welcoming Mrs. John Fry and the staff of Fry's Metal Foundry, spoke of the ideal relations which exist between employer and staff as being worthy of imitation by all who aspire to social happiness and industrial success.

Mr. John Fry eulogised the work of the Home, which he said was being hampered by lack of funds to carry out the proposed extension. He understood that a well-known London paper, with the help of its readers, was going to provide £3,000 for the purchase and furnishing of an annexe to accommodate 40 patients, pending the building of the planned extension.

THE Federation of Master Process Engravers having received a letter from the Council of the proposed National School of Printing asking that the Federation should become interested in the scheme and take part in its working and become responsible for an annual grant toward the expense thereof, the matter was fully discussed. The feeling of the engravers was that their Federation ought to be represented, even though its funds could not be used for such a purpose. It was therefore decided to make an appeal to their London members to raise the required amount.

**AN Advertisement is always working.**

## A Big Amalgamation.

**De La Rue, Goodall and J. A. Weir.**

An important business development is indicated by the announcement that underwriting is proceeding in connection with an offer of £800,000 8 per cent. convertible mortgage debenture stock in Thomas De La Rue and Co., Ltd., which will be offered to the public at 98 per cent. The issue is made to provide the purchase price for acquiring the whole of the share capital in the business of Chas. Goodall and Sons, Ltd., the well-known playing-card manufacturers, and all the ordinary shares of J. A. Weir, Ltd., proprietors of well-known paper mills in Scotland. In this way a powerful combination is formed which will control to a large extent the manufacture of playing-cards in this country, while there are also other important businesses such as engraving and printing of bank notes, postage and revenue stamps, which extend to the Indian Government and practically the whole of the British Empire. The excess of assets over the liabilities of the combination amounts to £1,926,026, whilst the average net revenue of the past five years covers the interest more than three times. Great economies are expected to arise from the combination, as the business allows of these being carried out.

The debenture stock will be repayable in December 1946, at 105 per cent., or earlier, by means of a cumulative sinking fund commencing 1922, and which will be applied by purchase in the market or by drawings at 105 per cent. The debenture stock, however, carries the right to convert into ordinary shares of the company on the following basis: Up to and including December 31st, 1925, £112 10s. of stock for 100 shares of £1 each, and from then until December 31st, 1927, at £125 of stock for 100 shares.

## Messrs. Lowe and Brydone, Ltd.

It will be remembered that in 1916, Messrs. Lowe and Brydone, Ltd., the well-known music printers, purchased the business of Messrs. C. G. Roder, Ltd. They have now consolidated the assets of the two companies in one company. The business will in future be carried on in the name of Lowe and Brydone (Printers), Ltd. The original company, Lowe and Brydone, Ltd., is therefore being dissolved, in accordance with the requirements of the Board of Trade.

The directors of Lowe and Brydone, Ltd., wish to point out that no alteration whatever is taking place in the ownership of the business, as the shareholders of Lowe and Brydone (Printers), Ltd., will be the original shareholders of Lowe and Brydone, Ltd.

## Central Districts Master Printers.

### Meeting at Stationers' Hall.

Some important matters were discussed at a meeting of the Central Districts Association of the L.M.P.A., held on Monday evening at Stationers' Hall, although the intended agenda was much curtailed in view of the disappointingly small attendance. Mr. J. D. McCara, F.C.I.S., was in the chair, and the audience included prominent London master printers.

Sir William A. Waterlow, K.B.E., spoke on the needs of the Printers' Pension Corporation, and his interesting story of the Corporation's work showed that he had made himself intimately acquainted with the details of the beneficent activities of this institution. He stressed particularly the necessitous case of printers' widows and orphans throughout the country. The institution, he said, was well and economically managed, and contributors could rest assured that their money was well spent.

Mr. R. A. Austen-Leigh followed, telling of his appeal to London master printers on behalf of the Corporation, and intimating that the appeal had elicited a cordial response.

In a short discussion that followed stress was laid on the need for more publicity, in order that printers generally should know more about the Corporation, and Mr. W. Whyte, secretary L.M.P.A., mentioned that the L.M.P.A. was prepared to grant special facilities for the regular transmission to its members of information relating to the Pensions Corporation.

It was agreed that the subject of the Pensions Corporation should be brought up at the December concert of the Central Districts Association, when Sir William Waterlow would be able to make a further appeal.

### The High Postal Rates.

Mr. W. H. Burchell, hon. secretary of the Central Districts Association, was to have opened a discussion on "Unemployment in the Printing Trade," but it was eventually decided to postpone this until a later occasion, when a larger attendance would give an opportunity for more adequate discussion. Mr. Burchell, however, raised the urgent question of a revision of the increased postal rates, and indicated the energetic manner in which he has been ventilating the subject in letters to the Press and the authorities. The only responses obtained from the latter were a reference to the reply given in the House of Commons last week, and a notification that the sending of letters in bulk to an agent abroad is an offence under the Post Office Act of 1908.

Mr. A. E. Goodwin, at the chairman's request, supplemented Mr. Burchell's remarks on this subject. He referred to the activities of the Federation in bringing to the notice of the authorities the harm done to the printing

industry by the increased postal rates, and he told of the question having been dealt with last week by the Joint Industrial Council (as reported on another page). With reference to the damaging effect of the increased rate on post cards, Mr. Goodwin mentioned a firm of picture post card printers who had just finished booking orders for the season, and found their sales were only 50 thousand, as compared with last year's sales of a million and a half. He also cited cases indicating the danger that the increased rates on printed matter would drive the printing as well as the posting of the printed matter from this country to the Continent. He urged the need that early intimation should be made of any proposed modification of the present postal rates.

## Italian Rotary - Offset Lithography.

Some weeks ago a rotary-offset lithographic machine was inaugurated at the Milan works of Messrs. Moretti e Croce. This machine, an invention of Sig. Ottavio Moretti, marks a considerable step forward in the Italian lithographic machine industry.

The characteristic features of the machine are: a device to introduce set-off sheets between heavily inked sheets; a device to reduce velocity to a quarter of the normal during preparation and starting of the machine; a device to lift the printing cylinder and all the rolls by pressing a pedal; a device for lateral register of the printing cylinders and inking rollers.

The production is 1,500 to 2,000 copies per hour; the power 3 h.p.; length 3.50 metres; dimensions of paper 90 by 120 centimetres, and those of net impression 85 by 115 centimetres.

The advantages claimed for this new machine compared with the flat-bed machine are greater production and smaller space occupied.—*L'Industria*.

**PRINTING AND THE PRICE OF BOOKS.**—"In spite of isolated announcements of reductions, we regret to say there is no hope for any general reduction in the price of books," says the *Publishers' Circular*. "Up to the present there has only been a small decrease in cost of paper, and if Lord Burnham is a true prophet the price of paper will go up. But the cost of paper in any case is small as compared with the other costs of production—illustrations, printing, binding, advertising, etc. Booksellers and book buyers read short paragraphs in the papers headed 'Reduction in printers' wages' and naturally conclude that this will mean a reduction in the price of books. But what does the reduction which the London printers propose to allow their customers amount to? As far as we can ascertain it varies from 2½ per cent. to 4 per cent., or in a few cases 5 per cent. to come off printing charges which average 200 per cent. to 250 per cent. and more above pre-war costs."

## Printing, Bookbinding & Kindred TRADES OVERSEERS' ASSOCIATION.

The usual monthly meeting of the Association was held on Tuesday evening at the headquarters, St. Bride Institute, Bride-lane, E.C.4. The president (Mr. A. W. Hunt) occupied the chair, and was supported by a large gathering of the members, who, by the way, continue to show increasing evidence of loyalty to the executive and enthusiasm towards the aims and objects of the Association. During the evening a discussion on "Technical Education" was opened by Mr. J. R. Riddell, Principal of St. Bride Technical School, which elicited an appreciative reception.

The minutes of the previous meeting were read and confirmed.

The correspondence was then dealt with. From Mr. J. R. Riddell saying that he had made up his mind to eliminate from this season's work any kind of addresses, but felt bound to waive that decision, and speak to them that night; from Mr. W. Bullett, hon. secretary of the Electrotypers and Stereotypers Managers and Overseers' Association, inviting Mr. and Mrs. Eden to his Association's annual dinner at the Holborn Restaurant on November 26th; from two members informing the secretary of unemployment, and upon whose behalf the secretary appealed for the interest of the members.

### New Members.

The following gentlemen were elected to membership, and received the president's welcome:—Mr. F. W. Russell (binding), Knapp Drewett, Kingston; Mr. E. Allgood (ruling), Peal, Ashdown and Hart; Mr. D. J. Wilson (warehouse), Cornwall Press; and Mr. E. J. Cattell (warehouse), Eden, Fisher and Co.

### Votes for the Printers' Pension Corporation.

Mr. J. E. Dixon said he thought the Association should take up the question of purchasing life votes from the Printers' Pension Corporation. They, as an association, had made periodical donations to the Corporation, but that method did not give them a power in being able to possess the votes to be used on behalf of their members if the occasion should arise.

Mr. J. Fleming proposed, and Mr. H. Milton seconded, that the sum of 10 guineas be taken from the funds in order to purchase six life votes from the Printers' Pension Corporation.

This was agreed to.

Mr. Riddell's address and the discussion which followed will appear in next week's issue.

THE usual monthly meeting of the Association of Master Printers of South-East London will be held at the Bridge House Hotel, London Bridge, S.E., on Tuesday the 8th November, at 4 p.m.

### Fictitious Wages Reduction.

SIR,—May I trespass on your space to point out a striking anomaly which arises out of the new piece scale which has just come into operation. Although the establishment hands have acceded to the employers' request for a 5s. reduction of wages, yet the piece hands are actually receiving an advance.

The piece rates recently fixed for hand composition cannot be regarded as otherwise than anomalous by small newspaper publishers. Instead of any reduction in cost of setting, the rates in force to-day mean that the employer is mulcted in having to pay on a proportionately higher scale than formerly.

I fail to understand the basis of fixture of the rates now ruling, and I should be glad to receive any information that would convince me that the rates for piece-work to-day are equivalent to a reduction of 5s. per week on compositors' wages.

As an illustration, take a piece work compositor setting 60,000 ens of brevier per week. Before the revision he would be credited with—

60,000 ens at 9d. ....	...	£2	5	0
5% on production .....	...		2	3
Bonus .....	...		2	18
			5	5
			3	

Under the new arrangement the charge is—

60,000 ens at 1s. 9½d. ....	...	£5	7	6
-----------------------------	-----	----	---	---

Instead, therefore, of a reduction in wages equal to 5s. per week, I am paying to the man setting 60,000 ens 2s. 3d. more than formerly.

With the publicity given to the fact that printers' wages have been reduced, customers are out to get an allowance in all possible directions where printing is concerned. The above illustration shows that instead of making a reduction to customers, an increase is warranted. Measures are wanted to stimulate business, not to throttle it further.

Yours, etc.,

MASTER PRINTER.

London, November 1st.

TO THE forms inviting tenders for paper, the Stationery Office affix the following notice: "Owing to difficulties and delays in transit of goods during the war and for some time afterwards, a certain amount of latitude in regard to late deliveries of supplies under contract has hitherto been allowed. Now that transport conditions are again normal, the attention of tenderers is called to the condition of contract relating to time fines for late deliveries of supplies, the terms of which will in future be rigidly enforced."

## Paper Samples by Post.

### A Crop of Surcharges.

Correspondence has passed between Messrs. Spicer Bros., Ltd., the well-known paper merchants of London, and the Post Office authorities on the subject of the postage rate for printed paper and orders accompanied by samples of paper required.

Messrs. Spicer wrote that they had been paying considerably more than usual in respect of surcharge communications delivered to them. In many cases the surcharges appeared to be because customers had attached to the orders or enclosed with the orders a specimen of the paper they required, "as under the regulations we see that a packet prepaid at the Printed Paper Rate which contains any enclosure not transmissible at that rate will be surecharged at the Letter or Parcels Rate. The list in the Postal Guide under the heading 'description of document' is a pretty full one, but though it includes orders for goods it does not apparently include patterns in respect of the orders, which seems an anomaly. In the paper trade it is such a common occurrence to send a pattern with an order or enquiry that the non-inclusion in the list of articles that may be sent, is probably an unintentional omission, which could be easily rectified in accordance with the spirit of the regulations relating to commercial or business papers of a formal character.

"Unnecessary expenses in commercial transactions add to cost, and the urgent call to-day is to keep down costs, so we trust that you will see your way to include in the description of documents on page 10 of the Guide, some such phrase as 'patterns accompanying and relating to an order, enquiry or quotation.'"

To this the Secretary of the General Post Office replied:—"I am directed by the Postmaster-General to inform you that samples cannot be sent by inland post at any rates other than the letter and parcel rates, and no exception can, it is regretted, be made when the sample is a piece of paper, inasmuch as this would give dealers in paper an advantage over other traders which could not be justified."

Mr. J. T. Steele, on behalf of Spicer Bros., then wrote as follows:—"We think the answer we have received has been sent without full consideration of the facts. The suggestion we made as to adding to the description of documents on page 10 of the Postal Guide the words, 'patterns accompanying and relating to an order enquiry or quotation,' was not meant to, and would not apply solely to, dealers in paper as your answer implies. It is true that, as the use of paper is universal, it would largely affect dealers in paper, but the paper trade is not the only trade where it is common practice to receive through the post in an ordinary envelope patterns accompanying orders or enquiries.

By your refusal to allow patterns of paper to accompany an order or enquiry, you also, in fact, affect everyone whatever his trade is, who sends orders or enquiries to a printer or stationer, as the sender is primarily the one upon whom the cost of postage falls. At present, unfortunately, the paper dealer as the recipient, is being penalised in the shape of surcharges. May we ask you to reconsider the matter?"

## Dutch Strawboards.

### Production Said to be Unprofitable.

The Dutch strawboard industry is reported to be in a serious condition. Production is unprofitable to the manufacturers because the price obtainable for the product is considerably less than the cost of production, which high cost is attributed chiefly to the purchase of large supplies of straw when its price was several times greater than that for which it can now be bought.

These are the opening sentences in a report which the U.S. Consul at Amsterdam (Mr. F. W. Mahin) forwards, and he proceeds: The factories now have large stocks of strawboard on hand and have practically filled all orders for their products. On the whole, it is considered more profitable to close the factories than to operate them at the present cost charges and selling prices, and a general shut-down is expected soon.

The importance of the industry is shown by the fact that there are about twenty strawboard factories in this district which employ about 2,000 workers, with a daily output of approximately 700 tons. These factories are in the Province of Groningen, where they were established about fifty years ago because of the abundant supply of straw to be had in that agricultural district.

The total quantity of strawboard, including cartons, exported to all countries in 1920 was about 200,000 tons. The total quantity during the first seven months of 1921 has been about 45,000 tons. More than three-fourths of the export goes to Great Britain, the rest being distributed among countries in various parts of the world.

**FLORENCE INTERNATIONAL FAIR.**—An International Fair will be opened in Florence in the spring of next year, with the purpose of promoting a reciprocal and direct knowledge of the publishing trade of the various countries, facilitating international trade in books and of exhibiting specimens of the work of all branches of the printing and allied trades. Publishers from all countries will be able to exhibit their latest or outstanding features including, in addition to books, music, maps, school stationery, etc.

IMPORTS of stationery, etc., into Russia during May are given as 111,137 poods.

### Tin Printing.

"The Lithographic Process of Printing Direct on Sheet Metal" was the title of a lecture delivered by Mr. Frank Scouler at the Mitre Hotel, Manchester, before a large audience of Printers' Managers and Overseers. Mr. Scouler has made a special study of this business from its infancy. Having been asked some months ago to give an explanation as to the method of turning out this class of work from the original drawing to the finished article, he selected the design of a round boot polish box in five printings.

In his remarks the lecturer recommended particular care being given when issuing instructions to the lithographic artist, because drawing for tin differed greatly from that required for paper, either the direct or offset process. When drawing the white or background, it should be so constructed as to easily fit the key or outline. An artist not used to tin-work would probably not think that a pale gold lacquer on white would make a yellow and so save an extra printing; also, he should bear in mind that the lacquer should be drawn under any suitable colour such as red, green, brown, etc., in order to give them body and a better lifting surface. For the key or outline a stout sheet of manilla paper is best; it should be accurately squared off, and great care taken in marking out the divisions of each cut. The transfer should be pulled in the ordinary way with a good stiff ink on French transparent paper, a sheet of thin zinc selected, and given a coating of good strong gum, this being mounted with a sheet of glazed manilla. The plate should be rolled up in black ink and an impression taken on the mounted zinc.

When handling the patched up sheet of transfers some operators are very careless, thereby causing the work of the patcher-up to become slightly misplaced. When laying down the transfer sheet it should be kept as rigid as possible. The usual routine of printing is white, lacquer, red, green and black. In order to produce good work the machine room should be kept at a temperature of 60 deg. Fahr., and semi-nap rollers used. Rubber rollers are supposed to be the best, but being very expensive they are seldom used. The first white ink should be mixed in such a manner as to carry as much body as possible without the use of driers. Sometimes oxydisation or frost appeared, and some of the causes may be damp atmosphere, excessive cold, stoving at too great a heat, or using cheap inks which contain a preponderance of lead. There are several remedies for oxydisation according to the cause. The stoving of the printed matter varies from 80 degs. Fahr. to 120 degs. Fahr. Lacquer being the next print and also a slow drier, great care should be taken with its use. In the choice of reds, it is best not to buy cheap inks as they are usually fugitive when tested under heat. A good bodied red will probably save a double printing. Tints of blue and

flesh should be printed full, and the green which follows be void of driers. Black being the last printing, it should be used as stiff as the job will allow.

Mr. Scouler gave many hints as to what to avoid in the mixing of colours, reviving of the rubber blanket, varnishing, stamping out, manufacture of tin plates, and a description of machines built by Geo. Mann and Co. and others, also there was a display of combination and other stamping-out tools and dies in use in the trade.

As tin printing is limited to a few firms in the country the company were fortunate in having the presence of Mr. Archer E. Leggatt, the manager of a successful metropolitan house which is scientifically organised. For half-an-hour he was able to debate with Mr. Scouler on the points raised by the lecturer, all of which proved valuable to the audience.

Mr. J. H. Nuttall moved a vote of thanks to Messrs. Scouler and Leggatt for their able exposition of some modern methods of bringing tin printing to a high standard of output.

WEB MAC.

### U.S. Printing Paper Exports.

During August the exports of American printings were as under to the countries mentioned:—

## Trade Notes.

THE death has occurred of Mr. Henry Lowe, a well-known Southport printer, father of Mr. Albert Lowe, printer, of Wigan. He was in his 80th year.

**ODHAMS PRESS LTD.**—The recent issue of Ten per Cent. Cumulative "A" Preference shares has been over-subscribed. Letters of allotment will be posted in due course.

**AMONG** the week's Receiving Orders under the Bankruptcy Act is one concerning Mr. Edwin George Green, 12, New-street, Woodbridge, Sutton, stationer, October 25th.

THE *Morning Post* yesterday entered upon its 150th year, the first number having been issued on November 2, 1772. George III was then King, and had been 12 years on the throne. Lord North was Prime Minister.

ON the petition of Frederick G. Potter (Ltd.), advertising contractors, of Kingsway, and Wilkes and Co. (Ltd.), printers, of Southwark, an order has been made for the compulsory winding up of the Pelman Institute (Ltd.).

A JOINT meeting of the members of the Portsmouth and Southampton Master Printers' Associations will be held on Tuesday next, when Mr. A. E. Goodwin and Mr. A. Williamson are both expected to be present to deal with topics of current interest.

We regret to announce the death of Councillor F. J. Winkley (Messrs. J. Winkley and Sons), 4, Southwark-street, London, S.E. Mr. Winkley was one of the vice-presidents of the South-East London Master Printers' Association, and was one of the last printers to live over his premises in the Borough.

**KINGSTON AND PRINTING.**—There was a recommendation by the Finance Committee of the Kingston Town Council to instal a Multi-graph printing machine, at a cost of £400, and working expenses estimated at £400 a year, by which it was believed 50 per cent. of the present cost would be saved. The matter gave rise to a very long discussion, in which much divergence of opinion was expressed. An amendment to refer the matter back for further consideration was defeated by 14 votes to 11, and by the same majority the recommendation was adopted by the Council.

**ST. BRIDE STUDENT'S PENSION.**—Not the least interesting contribution on the President's list at the Printer's Pension Almshouse Corporation Festival is the contribution of £360 made by the students of St. Bride Printing School. For over twelve months special efforts have been made at this well-known training centre to raise the sum of £600 to found a pension to commemorate St. Bride students who fell in the war. It says a great deal for the interest and enthusiasm put into this effort that £400 has already been raised and it is hoped that friends in the craft will help the printer students at St. Bride to complete their pension at an early date.

LITHOGRAPHIC machinery is one of the lines of German export trade which shows a decline.

THE German printing trade is reported to be enjoying an astounding boom, naturally sharing its good time with the papermaking industry.

TO-MORROW (Friday) at 7 p.m. the St. Bride Printing School holds an attractive vaudeville entertainment on behalf of the St. Bride Students' Pension Fund.

FROM the firm of John Grant, booksellers, Edinburgh, we have received a well-printed catalogue for the new season offering the usual varied selection of new books at greatly reduced prices.

MR. WALTER BARGERY, a member of the Executive Committee of the South-East London Master Printers' Association, passed away very suddenly at the breakfast table one morning last week.

IN the nine months ending March 31st, 1921, Australia imported from the United Kingdom printing machinery to the value of £37,822, which, however, was little more than half the similar imports from the United States, which totalled £72,420.

MR. OSCAR BERRY, F.C.A., C.C., was on Friday unanimously elected deputy-chairman of the Commercial Education Committee of the London Chamber of Commerce. He was also unanimously elected to serve on the Governing Body of the City of London College, as a representative of the London Chamber of Commerce.

WITH its October issue, the monthly journal *Form* begins Vol. I of a new series. In format a large quarto, excellently printed by the Morland Press, Ltd., of Ebury-street, the new series promises to have much that is striking and interesting in the way of woodcuts, lithographs, calligraphic decorations and initials, etc., as well as poetry and articles of literary and critical interest.

**WILLS.**—Mr. Peter Begg, of Hermitage-drive, Edinburgh, a director of R. R. Clark, Limited, printers Brandon-street, Edinburgh, and of the Equitable Loan Company of Scotland Limited, for some years president of the Edinburgh Master Printers' Association (died July 28th), £6,788; Mr. William Henry Frankham, of Frome, a director of the Frome Newspaper Co., also of a firm of woollen manufacturers, who died on June 10th, aged 53 years, £29,815; Mr. John Arthur Warwick, of Reigate, and of Messrs. Stevens and Sons, Ltd., 119-120, Chancery-lane, law publishers, who died on August 1st, aged 32 years, £31,450; Mr. Henry Rayment, of Sidcup, connected with Messrs. Bell's publishing business for 59 years (died September 30th last, aged 73), £3,510; Mr. James O'Donovan, of Clapham common, S.W., editor of the *Irish Independent*, 1898-1902, and later for some years on the staff of the *Daily News*, a former chairman and secretary of the Central London branch of the National Union of Journalists (died on September 30, aged 56), left £541 gross and £501 net.

THURSDAY, NOVEMBER 3, 1921.

## Current Topics.

### Printing and the Post.

THE British Post Office authorities are responsible for the forging of what proves to be one of the heaviest shackles upon the activities of the British printing industry. All those engaged in the printing and allied trades have now had time to realise how genuine a menace to their well-being was contained in the recent raising of the postal rates on printed matter and post cards. We think the feeling of the whole industry is solidly behind its official spokesmen in making very strong representations to the Postmaster-General in respect of the effect the present high postal rates have had in seriously curtailing the use of printing in this country and in further decreasing the available employment for British workpeople by driving printing orders to the Continent. Some modification of the rates is now imperative, and the extensive withholding of work that

would, with cheaper postal facilities, have been already put in hand for the coming Christmas season shows the vital importance of an immediate announcement of any reduction of postal rates that may be intended.

\*\*\*

### Postal Charges on Samples.

PAPERMAKERS, wholesale stationers and master printers are alike interested in the attitude which the postal authorities have been taking up with regard to the specimens of paper sent with orders under the printed paperrate. Surcharges have been falling pretty heavy of late upon these "specimens," which have been adjudged by the Postal Department to be "samples." Mr. Steele, of Spicer Bros., has been chiefly instrumental in bringing the authorities to book on the question, and he is now receiving the assistance of master printers in an effort to put matters right. It is claimed that a specimen of paper which is enclosed as a pattern to an order should not be regarded as a sample. The South-West London Master Printers' Association had the matter before them on Tuesday night, when it was stated that these specimens of paper had been sent through the post at the lower rate "from time immemorial." It is claimed that the transmission of the pattern under the penny postage rate is provided for in paragraph F of the regulations, which reads:—"Anything necessary or convenient for the safe transmission of any of the before-mentioned articles by post when transmitted in the same packet with the article in respect of which it is so used." Mr. F. H. Cole, secretary of the South-West Association, maintains that this paragraph covers the pattern or specimen of paper attached to an order and the members of the Association on Tuesday approved of the action which he is taking with a view to pressing his contention upon the Postmaster-General.

\*\*\*

### Railway Rates for Print.

A MATTER of great concern to printers is the proposal recently made by the railway companies that all unbound printed matter—including printed quires, booklets, catalogues, magazines and advertising matter of every description—should be raised to a higher classification. The Federation of Master Printers is alive to the position and a meeting of a special committee set up to deal with the matter was held last week. At this meeting Mr. E. G. Arnold reported as to the action taken to co-ordinate the opinions of various trade associations interested, and stated that arrangements were being made to discuss certain questions with representatives of the

railway companies. It is not known what rates would apply to the new classification proposed, but it is thought certain that the change would mean the considerable enhancement of freights for all classes of printed matter. Vigorous steps are being taken to combat this, and the Federation of Master Printers has in its efforts the support of various other trade associations.

### **The Joint Industrial Council.**

THE action of the Joint Industrial Council in vigorously tackling the problem of the increased postal rates is one little indication of the necessity for having an official and thoroughly representative body able to speak authoritatively on behalf of the printing and allied trades as a whole. That the J.I.C. fills a very obvious need grows increasingly plain as its capabilities become more evident. Indeed, it is a pity, we feel, that there is not more rapid progress in the development of its activities and in the perfecting of its national organisation. It was evident at last week's meeting that the frequent conferences, committee meetings, and the like which, during the wages dispute, occupied so much time of the representatives of both employers and employed, had militated against the use which might otherwise have been made of the J.I.C. machinery in recent months for the good of all sections of the industry. But for this pre-occupation, there would doubtless be more substantial results from last week's meeting. By its action on the postage question, however, the Council has performed a valuable service. Another important outcome of the meeting was a decision on the subject of cost-finding. The Council considered the adoption of a standard system of cost-finding for the industry, and eventually decided unanimously to adopt the Federation Costing System as the standard. It was decided to set up a joint committee of employers and trade unionists (under the chairmanship of Mr. J. C. Coppock) to investigate further the details of the system, giving special attention to the method of arriving at the hourly rates. This step is a most important one as it means that the Joint Industrial Council is setting in motion machinery for dealing with problems affecting the vital matter of printers' prices. It should result in some lessening of the suicidal policy of selling below cost, a practice which is deprecable from the point of view of all concerned, for it leads to unsatisfactory work, inadequate wages and a lowering of the status of the craft.

## **Personal.**

MR. J. D. WISE presided at the monthly meeting of the South-West London Master Printers' Association on Tuesday night at the Public Library, Buckingham Palace-road, Westminster, when a considerable amount of interesting business was transacted.

THE president had many complimentary things to say about Mr. W. Whyte, secretary of the London Master Printers' Association, who was present, especially in relation to suggestions he had put forward for improving the organisation of the Association.

MR. ALFRED LANGLEY made a strong appeal on behalf of the Printers' Pension Corporation.

MR. BASIL CAHUSAC (Law Stationers' Society) gave an interesting address on the subject of Profit Sharing, and a useful discussion ensued.

MR. W. H. BURCHELL, member No. 1 (i.e. the founder) of the Printers' Managers and Overseers Association had a great reception when on Tuesday he attended the Parent Association's November meeting and delivered a much-appreciated lecture on "Printing Office Management." A report will appear next week.

WE are glad to hear of a considerable improvement in the health of Mr. H. A. Bethell, president of the Lancashire and Cheshire Alliance of the Federation of Master Printers. Mr. Bethell is now taking part again in trade affairs with his customary vigour.

MR. W. C. BAYNES, of the Victoria House Printing Co., was in the chair on Saturday at a successful concert at Upton Park in aid of the Printers' Pension Corporation. About £40 was raised by the effort.

MR. A. MUNRO SUTHERLAND, who for 18 months has been actively identified with the *Newcastle Chronicle*, was on Friday the recipient of a wedding present from the whole of the members of the staff of the paper, the gift taking the form of a massive solid silver tea tray of oval shape.

MISS LILIAN WHITEHEAD the second daughter of Mr. T. L. Whitehead, managing director of the *Bury Times*, has been awarded the Rome Scholarship in Engraving by the Faculty of Engraving of the British School at Rome.

MISS WHITEHEAD is the first woman to gain this openscholarship. The Rome Scholarship in Engraving, which was established after the war by an anonymous supporter of the British School at Rome, is open to British students under 30, is tenable for three years, and is of the value of £250 per annum.

### DIVIDENDS AND REPORTS.

EYRE AND SPOTTISWOODE.—After providing £4,793 for interest on Debenture stock, £1,200 for Debenture stock sinking fund, £862 for leaseholds sinking fund, £9,097 for depreciation of plant, type, fittings, etc., and writing off £1,000 from the cost of issue on Mortgage Debenture stock, accounts for year ended 31st March, 1921, show profit of £7,377; to this must be added £9,533 brought forward, making £16,910 to be carried forward.

LONDON EXPRESS NEWSPAPER.—Accounts for London Express Newspaper for year ended 30th June, 1921, after deducting £5,800 for depreciation of plant, machinery, etc., show a loss of £59,087, from which must be deducted the profit of £7,233 brought forward, leaving a balance of £51,854 at debit of profit and loss.

### NEW COMPANIES.

JOHNSTONE AND CUMBERS, LTD.—Capital £10,000 in 3,000 7 per cent. cumulative preference and 6,000 ordinary shares of £1 each and 4,000 "B" shares of 5s. each; to adopt an agreement with F. Cumbers, E. Cumbers and S. Cumbers, and to carry on the business of manufacturers of printing inks, oil, spirit,

gum and other varnishes, photographic inks and mediums, oil paints and dry colours, dyes, chemicals, chemical mixtures, rollers, roller compositions and sundries of all kinds used by colour and other printers, art etchers, etc. Private company. Subscribers: F. Cumbers, E. Cumbers and S. Cumbers. First directors: F. Cumbers, E. Cumbers, S. Cumbers (chairman and managing director), J. J. Sampson and H. Fuller. Registered office: 38, Farringdon-street, E.C.

WORKINGTON STAR, LTD.—Capital £10,000 in £1 shares; to take over the business of a newspaper proprietor, printer and stationer, carried on by A. E. Middleton, at 20 and 22, John-street, Workington, Cumberland. Private company. First directors: D. Lorraine, D. Richardson and J. B. Hamilton. Registered office: 20, John-street, Workington.

HERBERT TOMKINSON, LTD.—Capital £9,000; to take over the business of printers and stationers carried on by H. Tomkinson and F. M. Tomkinson at the "Indispensable" Printing Works, Penrhyn-roak Colwyn Bay, as "Herbert Tomkinson." Private company. Permanent directors: E. Manico and H. H. Jauncey. Registered office: "Indispensable" Printing works, Penrhyn-road, Colwyn Bay.

GEO. BAXTER, LTD.—Capital £7,500; publishers, stationers, printers, photograph, electrotype, intaglio and cameo printers, lithographers, etc. Private company. Subscribers: G. Baxter and D. N. Browning.

FLEET-HAMMOND Co., LTD.—Capital £1,000 in £1 shares; to adopt an agreement with H. S. Macintosh and José Casanova and to carry on the business of printers in all languages, designers, bookbinders, publishers, stationers, advertising agents, etc. Private company. First directors: H. S. Macintosh and José Casanova. Registered office: 45, Chancery-lane, W.C.1.

RIDDINGTON AND Co., LTD.—Capital £500; printers, lithographers, stationers, paper, paper bag and box makers, etc. Private company. First directors: J. W. Watts, E. T. Watts, E. E. Newton, W. Vaughan and W. H. Sharman. Registered office: 34½, Highcross-street, Leicester.

JOHN ARMSTRONG AND Co., LTD.—Capital £500; piano and other musical instrument makers and dealers, printers, publishers and dealers in musical compositions and other works, etc. Private company. First direc-

tors: Harry Cohen and Mrs. Leah Cohen. Registered office: Parker's Buildings, Front-street, Stanley, co. Durham.

**EDWARD HUNTER AND Co., LTD.**—Capital £1,000; to adopt an agreement with T. H. McArthur, trading as "Edward Hunter and Co.," and to carry on the business of advertising, printers' and art agents, publicity agents and specialists, printers, etc. Private company. Joint managing directors: T. H. McArthur and J. H. Lindsay. Registered office: 3, Featherstone-buildings, High Holborn, W.C.

**ATLAS SUPPLY STORES, LTD.**—Capital £500; to promote and carry on by means of advertisements, price lists and circulars, the sale of manufacturers' and warehousemen's surplus stocks for delivery through the post or by rail or other recognised delivery agency, etc. Private company. Subscribers: W. Emery and J. J. Richardson. Registered office: 5, Saville-row, Newcastle-on-Tyne.

**EX-OFFICERS' SOLDIERS' AND SAILORS' PUBLISHING Co., LTD.**—Capital £2,000; to take over the business carried on at Red Lion House, Red Lion-court, Fleet-street, E.C., by H. C. Ketcheson, and to carry on the business of proprietors and publishers of newspapers, journals, magazines, books and other literary works, etc. Private company. First directors: H. C. Ketcheson, A. A. Scanlan, B. D. Peverell, R. V. Walker and F. Johnson.

**KENDALL PRODUCTS Co., LTD.**—Capital £5,000; soap manufacturers, etc., manufacturing and general chemists and druggists, manufacturers of card, wood, metal and other boxes and cases, colour and other printers, stationers, etc. Private company. First directors: R. H. Isham, O. P. L. Hoskyns and Sir Basil H. Thomson. Registered office: 6, Surrey-street, Strand, W.C.2.

**CHEMICAL AND PULP Co., LTD.**—Capital £5,000 in £1 shares; dealers in heavy and fine chemicals, manures and dyes, chemical manufacturers and merchants, importers and exporters of and dealers in chemicals, fertilisers and feeding stuffs, paper and pulp and all kinds of materials used by manufacturers of paper; ship, tug, lighter and barge owners, etc. Private company. First directors: W. S. Hopkins and F. H. Johnson. Registered office: 595-6, Salisbury House, London-wall, E.C.2.

## COMPANY MORTGAGES AND CHARGES.

Fresh Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 1908, and Satisfactions registered pursuant to Section 97 of the same Act. (The registration of Satisfactions is not compulsory).

**ELLIOTT AND Co. (OTLEY), LTD.** (IN LIQUIDATION) (printers' engineers, etc.).—Satisfaction in full on September 20th, 1921, of debenture dated July 16th, 1919, securing £15,000.

**C. G. RÖDER, LTD.** (music and general printers, etc., London).—Satisfaction to the

extent of £2,000 on June 10th, 1921, of debentures dated August 25th, 1920, securing £24,000.

**HAYCOCK CADLE AND GRAHAM, LTD.** (lithographers and printers, Camberwell, S.E.).—Satisfaction in full on October 6th, 1921, of Land Registry Charge dated June 1st, 1920, securing £3,333.

**WEST OF ENGLAND BILLPOSTING Co., LTD.**—Memorandum of Deposit dated October 10th, 1921, charged on 149, Union-street, Plymouth, to secure all moneys due or to become due from company to Lloyd's Bank not exceeding £400.

**MAYHEW BROTHERS, LTD.** (trade manufacturing stationers, London).—Issue on October 15th, 1921, of £100 debentures, part of a series already registered.

**PHILIPSON AND SON, LTD.** (process engravers, art photographers, etc.).—Further charge on 18 and 20, Oxford-street, Newcastle-on-Tyne, dated October 14th, 1921, to secure £200 and further advances not exceeding in all £500. Holder: W. Vincent, 15, Moorfields, High West Jesmond, Newcastle-on-Tyne.

**SAXONS, LTD.** (publishers, etc., London).—Debentures dated October 19th, 1921, to secure £500. Charged on company's property, present and future, including uncalled capital. Holders: Athletic Publications, Ltd.

**LAURIE AND MCCONNALL, LTD.** (stationers, etc.).—Mortgages on certain properties in Cambridge, dated October 20th, 1921, to secure all moneys due or to become due from company to Lloyd's Bank not exceeding £20,000.

**PERCY JONES (TWINLOCK), LTD.** (manufacturers of and dealers in ledgers, loose-leaf books, etc., London).—Debenture charged on the company's undertaking and property, present and future, including uncalled capital dated October 11th, 1921, to secure all moneys due or to become due from company to Barclay's Bank.

**GENERAL PRESS CUTTING ASSOCIATION, LTD.**—Satisfaction in full on August 23rd, 1921, of debentures remaining unpaid on July 1st, 1908, securing £2,551 16s. 8d.

# Re George Wm. Macey.

## The Printers' Exchange.

An application for an order of discharge was made on November 1st to Mr. Registrar Mellor at the London Bankruptcy Court on behalf of this bankrupt, who traded as a paper merchant at 40, Fleet-street, London, E.C., and in partnership with Donald Mackenzie and Frank Peter Reavey, as the Printers' Exchange. The Official Receiver (Mr. Walter Boyle) reported that separate receiving orders were made in January last against the applicant and the Printers' Exchange, and by an

order of the Court the proceedings were consolidated. The joint liabilities of the firm amounted to £110,443, and the joint assets were expected to realise £380, sufficient to pay a dividend of a fraction of one penny in the £. The separate liabilities of the applicant amounted to £146; the assets had realised £190, and after payment of a preferential claim of £47 14s. a dividend of from 12s. 6d. to 13s. 6d. in the £ would be paid to those creditors. The applicant was apprenticed to a firm of printers upon his leaving school, and in 1919 he became a director of the "Blighty" Publishing Co., Ltd., which was ordered to be wound up in April, 1920. In the previous February, in association with Mackenzie and Reavey, he formed the Printers' Exchange, Ltd., for the purpose of publishing "The Printers' Exchange," an advertising medium in connection with printers' appliances and materials, and machinery generally. Monthly issues were published from February to October, 1920, but the November issue was stopped at the printers' hands owing to financial difficulties. In September, 1919, the applicant and his partners bought from Nordskog and Co., of Christiania, 500 tons of news-print paper on reels at £28 a ton and resold the lot at a profit of £9 a ton. Shortly afterwards the petitioning creditors (Frank Crossley and Son, Ltd.), offered them 5,000 tons of paper, which they sold at a profit of about £6 a ton to a customer upon a letter which they were afterwards advised was not a binding contract and the consignment remained with their bankers who had advanced money upon the documents. About January, 1920, they paid £10,000 on account of a contract to purchase £26,000 worth of ochre glazed paper from Nordskog and Co.; the paper as delivered in the docks at Hull was not up to specification, and was not packed according to the usage of English printers; they were unable to dispose of it, and their bankers (the National Bank), who financed all their contracts, held the documents relating to the paper, which at the date of the receiving order was practically unsaleable. The last mentioned contract crippled them for a long time, but they continued to buy paper from Nordskog and Co., cash against documents, and up to September 20th they made profits on these transactions. In September, 1920, there was a break in the price of paper which had fallen continuously; paper which they had bought at £69 per ton was at the date of the receiving order only worth £32, and at the date of the public examination (June 21st, 1921), had further fallen to £20 a ton; they made no fresh contracts after September, 1920, but the National Bank had advanced to them, or on their behalf, £120,140 against stocks which the Bank, after the receiving order, valued at £71,220 only, thus leaving an estimated unsecured deficiency of £52,920. Nordskog and Co., to whom they had paid £300,000 altogether, were creditors on balance for £22,569. On December 2nd, 1920, the petitioning creditors obtained judgment for £11,080 against them and filed the petition herein a fortnight later. The applicant attributed his failure and in-

solveny entirely to the exceptional and continuous fall in the price of paper since September, 1920. In the opinion of the official receiver, the failure of the firm had been brought about by rash and hazardous speculation in paper and their insolvency had been aggravated by the withdrawal for their personal use of £3,000 at a time when they must have known that their position was precarious. As offences the official receiver reported (1) insufficiency of assets to equal 10s. in the £ on the amount of the unsecured liabilities; and (2) bringing on the bankruptcy by rash and hazardous speculations. Mr. Oscar Keen, who appeared for the applicant, asked the Court to hold that the charge of rash and hazardous speculation was not a serious matter. His Honour said he did not regard the rash and hazardous speculation in a very serious light and would grant the applicant a discharge subject to the minimum suspension of two years. Order entered accordingly.

# R. Robinson and Co., Ltd.

## Centenary of a Newcastle Printing Business.

Much interesting information regarding the growth of an important business is contained in "Robinson's Centenary Souvenir, 1818-1918" which is issued by the firm of R. Robinson and Co., Ltd., wholesale and manufacturing stationers, printers, bookbinders, boxmakers, etc., of Newcastle-on-Tyne, to commemorate 100 years of progress and development. The delay in publishing the souvenir is due to the fact that the celebration fell during the war years. The booklet is copiously illustrated, showing the past and present activities of the firm, and the personnel of directors and staff. The record is a complete one and traces the history of the business from its inauguration by Mr. Robert Robinson, whose portrait serves as an appropriate introduction to the letterpress, while that of Mr. A. C. Wilkie, the present managing director and chairman, leads the fine series of illustrations which fill more than half the 52 quarto pages, and which indicate better than anything else the size and extent of the business represented by Robinson's.

The founder of the firm first launched out as a wholesale grocer, and it was only by a fortuitous accident that he entered the paper trade. A chance deal in paper showed such big possibilities that he gave less attention to the grocery trade and more to the new line of business, which at first took the form of supplying paper for the grocery trade and ultimately extended in other directions.

In these early days and even quite late in the last century it was the custom for grocers themselves to make such paper bags as they required, but in 1830 Mr. Robinson commenced the manufacture of paper bags for all trades and at the same time provided a plant which enabled him to undertake paper ruling and account book manufacture.

Mr. Robert Robinson died in 1853 and was succeeded by his nephew, Mr. James Errington, under whose able management the business rapidly developed, rendering it necessary to take additional premises for the manufacturing section. Progress was so continuous, in fact, that the manufacturing portion of the business was removed to a new factory in 1874, and development occurred which brought important incursions into the printing field. Lithographic printing was commenced in 1877, letterpress in 1880, engraving and drawing in 1882, cardboard box making in 1898, and photo-process work in 1904. In 1887 Messrs. Robinson were appointed official printers to the Newcastle-on-Tyne Industrial Exhibition, at which also they were awarded a silver medal for excellence in bookbinding.

The new factory being destroyed by fire in June, 1887, new premises were erected on this site, and the whole story of the firm is one of expansion under succeeding directors. The extension which was completed in 1889 doubled the floor space of the works build-

ings. In December, 1893, in order to provide for its further extension and to secure the permanency of the business, Robinson and Co., Ltd., was registered as a private company, the first directors being Mr. G. W. McLean, Alderman W. Sutton, J.P., and Mr. J. Thorburn, while the managers, foremen, and a number of leading members of the staff were assisted to become shareholders.

Then once again the firm was called upon to meet the inconvenience and devastation of fire, as, on March 7th, 1900, the premises in the Side were totally destroyed, the buildings and the stock being completely wiped out. Temporary accommodation was quickly secured, and within a week large consignments of paper and other goods had been procured, and practically all orders were executed with but little inconvenience to customers.

To replace the Side premises, a handsome and commodious pile of buildings was erected alongside the works in Clavering-place. The latest improvements for carrying on the work economically were introduced into this new warehouse, and the ample room provided for the expansion of departments has been fully taken advantage of.

The business established by Mr. Robinson is described in the souvenir as perhaps the largest of its kind in the North of England, the warehouses being stocked with a comprehensive variety of papers, stationery and all kinds of fancy goods; while the factories are replete with the latest machinery and equipment.

---

**THE NEW MORNING DAILY.**—Monday next is the day arranged for the first issue of the *Westminster Gazette* as a morning paper, price 2d. Mr. A. H. Watson, who is to be the managing editor of the new paper, has given to a representative of the *Observer* a statement of the intentions and hopes of the promoters. "We shall be a morning paper about the size of *The Times*," he said. "We had thoughts of printing it on the old *Standard* machinery, which has been our property for some time, but finally we came to the decision to scrap that machinery and to put in an entirely new plant notwithstanding the heavy cost involved by that course at the present time. The number of pages will vary from time to time if, as we hope, it is a commercial enterprise. With very great regret we are deserting the green tint of the paper. It gives distinctiveness to the paper on the bookstalls, but we have always found that it militated against the production of good illustrations. As we hope to give illustrations in the new paper we have reluctantly had to come to the decision to desert green for what is now the almost universal white."

**CAMBRIDGE UNIVERSITY PRESS** celebrates this year the 400th anniversary of Cambridge printing. To commemorate this, Mr. S. C. Roberts, of Pembroke College, has prepared a "History of the Cambridge University Press, 1521-1921," and the centenary will be further celebrated on November 10th by a dinner to be given in the hall of Corpus Christi College

## Diaries for 1922.

### Charles Letts's Fine Series.

We have received from Messrs. Charles Letts and Co., of Southwark-bridge-buildings, London, S.E.1, a selection of 1922 diaries serving to bring home in impressive fashion the extensive range and high quality of the products of this well-known firm. First published in 1816, these diaries have firmly established themselves in the front rank, and from an inspection of those submitted to us we judge that at the prices marked they would be very difficult to rival.

To mention first the office and scribbling diaries, these are produced in a variety of styles to please the business man and at prices to suit all pockets. Ranging in size from foolscap folio to crown 12mo., they can be had in several different qualities and arranged to allow of entries being made as may be desired—a day to a page, two days to a page, a week to an opening, or seven days to a page. Besides writing space and blotting paper, room is found for a surprising amount of useful reference information.

Another very attractive series is known as the "Specialised Diaries," which are of design and contents to suit the most diverse requirements. The series includes, among other items: the "School Boy's" diary, containing such information as Latin, French and German irregular verbs and historical events, mathematical tables, pages in which a boy can keep a record of books lent and borrowed, pocket money, etc.; the "School Girl's" diary, in similar style; the "Boy Scouts" diary being the Official Handbook of Boy Scouts, and containing a mass of information which makes it invaluable to every scout; the "Girl Guide's" diary; the "Business Man's" diary; the "R.H.S. Gardener's" diary, containing a mass of useful information for gardeners; the "Ladies' Year Book," appealing to all housekeepers; the "Nature Lover's" diary; the "Poultry Keeper's" diary; and the "House Wife's Diary and Shopping Companion."

The "Self-Opening" pocket diaries, fitted with a new and very handy "monthly index," make an excellent line, in which are comprised the "Peerless Diaries," a superfine series eminently suitable for gift purposes.

Among other Charles Letts specialties must be mentioned the very practical "Business Desk Calendar" comprising a year's sheets mounted on metal base so designed that while each day's date-leaf turns back upon a support which holds it in full view of the user, the blank reverse-side of the next day's leaf is available in pad form for memoranda, future leaves being easily get-at-able for marking with reminders of forthcoming engagements. Messrs. Charles Letts have also a series of office and desk Date Blocks embodying novel features, and claimed to be unique in convenience, speed of date-chang-

ing and neatness of appearance. Even the foregoing list of items does not exhaust the variety offered, and stationers and others interested would do well to bear Messrs. Charles Letts in mind when on the lookout for anything in the way of diaries for the coming year.

## Government Contracts.

In addition to those mentioned last week, contracts were placed with the following firms during September:—

### Stationery Office.

BAGS.—Millington and Sons, Ltd., London, N.

BOARDS.—J. Spicer and Sons, Ltd., London, S.E.

CARDS.—Thomas and Green, Ltd, Wooburn Green, Bucks.

CASES (FIBERITE).—Thames Paper Co., Ltd., Purfleet.

ENVELOPES.—McCorquodale and Co., Ltd., Wolverton, Bucks; Millington and Sons, Ltd., London, N.; Chapman and Co. (Batham), Ltd., London, S.W.

LABELS.—J. Dickinson and Co., Ltd., Hemel Hempstead; Fisher, Clark and Co., Boston, Lincs.

MOCK VELLUMS.—A. and J. Shaw, Ltd., Grantham; H. Gibbs and Son, London, S.W.

## Varnishable Chromo Paper.

A chromo paper, having been rejected because it became yellow when varnished, was submitted to the *Papier Zeitung* by the maker, who was very confident that the fault was not in the paper, with a request to learn the reason for the discoloration. He received the following interesting reply:—

The yellowing is not due to the varnish being faulty, but to the coating being too soft so that the varnish soaks through and allows the yellow tone of the raw paper stuff to show up. Even if the casein size has made the surface seem hard, the paper is not fast to ink, which soon sinks in. Five per cent. of talc and an equal quantity of wax solution must be added to the coating material; machine samples must then be tested by taking a little varnish on the finger and passing the same lightly over the surface. If this spot still appears yellowish, size and wax must be added to the coating material till the varnished sample remains white.

To make the finished paper usable, treat it with a weak solution of waterglass on the varnishing machine and then varnish when dry; the surface will then remain quite white. A weak boiled starch solution may also be used, but waterglass works better and quicker, only it is necessary to see that the rubber rollers do not become hard, and they must be washed with hot water from time to time. Hard and fast rules cannot be given, but these things must be tried out in practice. —M.A.

## Football.

## Paper Standardisation.

### Official Conference in U.S.A.

The standardisation of paper formed the subject of a conference of allied interests in Washington, and the proposals submitted indicate the scope and importance of the subject.

Those attending at the conference represented the American Paper and Pulp Association, the Technical Association of the Pulp and Paper Industry, the United Typothetae of America, the American Engineering Standards Committee, several paper manufacturing companies and merchants and several representatives of the Bureau of Standards. Several committees were formed to take up the following phases of standardisation and report back to the Bureau: Classification, Definitions, Simplification and Specification.

A memorandum submitted to the conference defined the purpose of standardisation in the following paragraphs:—

1. Simplification by standardisation tends to produce economy and to eliminate waste in the manufacturing process. Such standardisation is not intended to reduce all the products to any pre-determined level, but to eliminate unnecessary and wasteful sizes, weights and qualities.

2. The development of reasonable specifications for various grades of paper will tend to eliminate those specifications which work a hardship on the manufacturer, but will permit of the use of specifications which will assist and protect the consumer.

#### Factors in Standardisation.

Under the heading of "Classification," it is proposed to group the various grades of paper as much as possible according to the use to which the paper is to be put. This is not possible in all cases, but seems desirable, since the qualities desired in a paper can only be determined by the purpose for which the paper is purchased.

The following table shows the approximate relative importance in tonnage of various groups:—

A.—War Industries Board, 1918: Boards, 30.4; news and hanging, 23.3; wrapping, 16.8; book and cover, 15.3; fine (writing, bond, etc., 5.8; building, 5.3; tissue, 2.0; specialties, 0.9; blotting, 0.2.

B.—American Paper and Pulp Association, 1920: News, 20.6; board, 31.8; book, 15.1; wrapping, 14.3; fine, 5.3; tissue, 2.4; hanging, 1.5; felts and buildings, 8.7; all others, 4.3.

The following is an outline of a suggested classification: (a) ground wood paper containing more than 60 per G-wood; (b) printing paper; (c) fine paper; (d) wrapping; (e) boards; (f) miscellaneous; (g) specialties; (h) paper and pulp products.

Coming to definitions and nomenclature, the memorandum says: The use of terms and names of grades of paper is very indefinite and in many cases the words used have little value.

It is suggested that this phase of standardisation be studied by a small group and suggestions made. This phase has special significance in connection with export trade.

As to simplification of sizes and qualities, a large economy may be obtained by the reduction in the number of issues and also in the number of qualities of paper in any one class. This will affect the manufacturers almost immediately and permit of longer runs on the machine and greater use of the full width of the machine. Two other factors must be given attention in reference to the simplification of sizes, viz.: (a) the reduction in the number of sizes of printed matter and (b) the better design of paper machines to permit of full use of the width of the machine. The regulations of the War Industries Board and the manufacturers' trade customs will assist in this.

#### Specifications of Quality.

All the qualities desired in a specific sheet of paper cannot be defined numerically, but it is the purpose of research to develop methods for this purpose in order to determine quality and uniformity. Some of the qualities which it is difficult to measure at this time are: permanency, feel, texture, finish, rattle, formation, fastness of colour, softness, printing quality, erasure quality, etc. Those that may be measured are as follows: Weight, thickness, bursting, tensile, folding and tearing strength, ash, sizing, fibre composition, glaze, opacity, dirt, absorption, elongation.

The actual specifications for a given sheet of paper must be determined by the use to which it is to be put. It is thought that requirements for various purposes may very easily be determined. It is necessary to determine what qualities of paper are of importance for a specific use, the relative importance of these qualities, which of these qualities may be determined numerically, and, finally, what numerical value is to be given to the quality for the purpose in mind. It is of greatest importance to consider that in many cases, the qualities that are measurable are of minor importance to such qualities as, for instance, printing quality, feel, texture. The lack of consideration of this factor has caused considerable hardship at times. Such specifications when developed will be available for those who wish to use them.

#### Test Methods and Sampling.

As in all testing, two things are necessary, viz.: (a) proper sampling and (b) standard methods of testing. The former is not considered as much as it should be, for it is almost as of much importance as the testing itself.

The methods of testing paper are already more or less standardised and depend in large measure on the instruments and apparatus used. Improvement can be and should be obtained, however, and new methods and instruments will assist more in the determination of the quality and uniformity of paper. Standard methods of testing will be submitted in detail in the near future, with suggestions as to experimental tolerances.

## Rotary Photogravure.

By HENRY T. G. MEREDITH.

(Concluded from page 440.)

The cylinder, after etching, is passed on to the engraver, who will spot and make good any other little defect that may have occurred. It is then passed to the machine room, and after fitting with steel mandrels, it is placed in the machine.

### Machine Printing.

The paper used is fed from the reel over stretching rollers, and then passed directly in contact with the upper cylinder, having upon its surface the photogravure picture and all the lettering. This cylinder rides in a trough of ink, with a secondary roller along the whole length to force the ink into the cavities or cells formed by the etching process. In so doing, the whole surface of the cylinder is covered with ink, and as it revolves it comes in contact with a thin highly-tempered steel blade, which oscillates from side to side, and scrapes off all the surplus ink, leaving the cylinder quite clean, though the ink remains in the engraving. Here it is that we again find the practical use of the ruled screen, which enables the steel blade to ride over the network of cross lines, leaving a portion of black or coloured ink in each one of the 25,000 cells, which, as we have noticed, go to make up each square inch of the image.

As the paper passes between the etched cylinder and the impression roller the print is taken. The ink used dries with a matt surface, and to facilitate the drying, the paper continues to travel over the heated plates or drums, from thence to the folder and cutting machines, which are frequently attached to the printing machines. It is a matter of everyday occurrence for rotary gravure printing to be done on both sides of the paper. This is done by a machine which is practically a combination of two machines coupled up accurately, so that after printing on one side the paper travels to the second portion of the machine, and is printed on the reverse side, so that the sheets may be cut and folded whilst retaining accurate register.

### Advantages of the Process.

So far the process of rotary photogravure has been briefly described. It may now be asked: What are its advantages over other processes? It may be stated at once, without fear of contradiction, that there is no other process in existence that is capable of giving such beautiful results in monochrome as rotary photogravure. The results equal in every respect those made by the flat plate process, and which are proofed on the hand press. Indeed, given a suitable original, it can rival the hand proof for richness and beauty. It is remarkable for the faithfulness with which an original can be reproduced.

There is no other process by which, at one operation in printing, such depth of colour

can be obtained side by side with delicate gradation of tone, and yet with no loss of detail. There is no other process which at a high rate of speed is capable of producing such uniformity of results, the proof at the end of a 10,000 run being practically as good as at the beginning. There is no other process that can produce at a high rate of speed a fine art result such as rotary gravure, side by side with a full page of fine type matter. When it is possible to arrange the design by duplicating round the cylinder, so that the job can be printed with no waste of paper, the process offers a very real advantage. It is almost true to say that rotary photogravure can be printed on almost any paper. Of course some papers give infinitely better results than others, but no other process can produce on paper bag paper a result any way approaching the results obtainable by rotary gravure.

There is no other process that so quickly attracts the attention of the casual observer. This fact should appeal with great force to the advertiser from his particular point of view. The public is always attracted by a simple colour scheme, which frequently can be most effectively arranged by a pictorial poster printed in gravure, with one or two of the head lines printed by letterpress in a harmonising colour. From such a simple scheme much might be done with two-colour illustrations for magazine or small poster work, and it is a field which is at present left entirely alone.

### Rotary Gravure in Colour.

Nothing has been said regarding the production by rotary gravure of colour work. This is generally thought to be impossible, so a great deal of labour and attention has been given to combining other processes, such as lithography and offset lithography, with gravure. Good as these results undoubtedly are, the photogravure worker regards them more as a factor which indicates the direction of the future demand. That demand will be for colour work, such as in our opinion can only be supplied by rotary-colour-gravure. We are not at a standstill in this direction. Day by day we are getting the process under greater control, and it may be accepted that colour gravure is now an accomplished fact. An advantage which is already claimed is that the so-called "art paper" with its highly polished surface can at last be dispensed with.

It may never be safe to foretell the future, but we believe it to be bright with possibilities for rotary photogravure. In every direction efforts are being made to improve the methods of production. The engineer is improving his machines, and the colour makers their printing inks. Nine or ten years ago, double-sided machines were printing from the reel on both sides of the paper at the rate of 3,000 to 4,000 impressions per hour. Rotary gravure machines were being coupled up to letterpress. This arrangement is now being adopted by provincial printers to illustrate by gravure their weekly newspapers.

The facility with which type matter can be printed by rotary gravure has induced thinkers and inventors to produce some means whereby

the necessity for setting up type may be overcome, and there are already at least two patents taken out for doing this work by a combination of key-board and camera. Engraving machines for cutting lettering in intaglio have been greatly improved in America of late years, and most beautiful results have been obtained. It only means the continued improvement of such methods and machines, when the future daily newspaper may be printed by rotary photogravure.

There is every reason to believe that before many years are past most colour printing will be done from the reel by rotary gravure, and with the three or four colours almost simultaneously.

## British Empire Exhibition.

The objects of the British Empire Exhibition, 1923, are to find fresh sources of national wealth in the development and utilisation of the raw materials of the Empire; to foster inter-imperial trade, and find fresh world-markets for Dominion and Home products; to make the different parts and peoples of the British Empire better known to each other, and to focus public attention in this country on the illimitable possibilities of India and the great Dominions overseas, as well as of the Crown Colonies and Dependencies—"our vast undeveloped estate."

The King is patron of the Exhibition, and the Prince of Wales president of the general committee.

THE DUX Chemical Solutions Co., Ltd., send us examples of attractive additions to the already extensive and varied selection of colours and designs in which "Duxeen" is obtainable.

## Envelope Tenders for Egypt.

New Zealand General Post Office has invited tenders for the supply of 100,000 cream-laid envelopes (note) addressed "The Chief Postmaster," 100,000 manilla envelopes (note) addressed "The Chief Postmaster," 750,000 foolscap manilla envelopes unaddressed, 25,000 foolscap manilla envelopes addressed "The Controller of Stores, Post and Telegraph Department, Wellington."

Tenders, which should be addressed to the Controller of Stores, Post and Telegraph Department, Wellington, will be received up to 5 p.m. on December 6th. This information will accordingly only be of use to United Kingdom firms represented in New Zealand who can instruct their agents by cable.

A copy of the specification may be inspected by United Kingdom manufacturers and exporters on application to The Inquiry Room, Department of Overseas Trade, 35, Old Queenstreet, London, S.W.1.

AN interesting story of a varied career of a leader of industry and one prominent in movements for industrial harmony is told in "The Recollections of Sir Charles W. Macara, Bt." (Cassell, 7s. 6d.). In a substantial volume of some 280 pages, this "son of a Scotch manse" recounts his early days in the Lancashire cotton trade, his rise to the position of one of the magnates of the industry as president of the International Cotton Conference, and his many activities as peacemaker between Capital and Labour. He tells, too, of many prominent people he has met in this country and abroad, and has some pertinent remarks to make on various industrial and political subjects.

# A Printing-Trade Lord Mayor.

## A Brief Account of the Career of Sir John Baddeley, the New Lord Mayor of London.

"Baddeley wanted : The new Lord Mayor" —that was the *Star's* little joke on the name of the illustrious gentleman who yesterday entered upon his duties as London's chief magistrate. It reflects what we believe is the general public satisfaction felt at Sir John Baddeley's elevation to the Mayoralty, a satisfaction shared in special manner by the printing and allied trades with which Sir John is closely connected.

A native of Hackney, Sir John James Baddeley was born in 1842. His father was a die-sinker and he was brought up to the same business, working himself at a bench for 25 years. He is the senior partner of the firm of Messrs. Baddeley Brothers, die-sinkers, press makers, engravers, relief stampers, wholesale manufacturing stationers, lithographers, etc., of Chapel Works, Moor-lane, E.C., which he founded in 1865. He now leaves to his sons the active conduct of the business, as public affairs occupy so much of his time.

Sir John's municipal career began in 1886, when he was elected a Common Councilman for Cripplegate Ward. He filled in succession the chairs of all the important committees, and was "Chief Commoner" when the Corporation and City Commission of Sewers were united into one body. He was elected Sheriff in 1908, the poll which resulted in his election being the highest for any Commoner during the last 200 years. He was knighted on the visit of the late Tsar and Tsaritsa to this country. Sir John was elected Alderman of the Ward of Farringdon Within in 1912. Since then he has sat almost continuously as a magistrate at the City Courts. He is a liveryman of the Stationers', Framework Knitters' and Loriners'

Companies. He is a Commander of the Swedish Order of Wasa, of the Russian Order of St. Anne, and Crown of Belgium.

Lady Baddeley, Sir John's second wife, whom he married in 1912, is a daughter of Mr. J. Douglass Mathews, F.R.I.B.A., who has been a member of the Corporation for thirty years. She was recently appointed a magistrate for the County of London.

Sir John has done a good deal of literary work of importance. He wrote "The Guildhall of the City of London," a book which has passed through several editions and has recently been brought up-to-date. He is the author also of "The Aldermen of the City of London," a work of great historical value. He is a Milton enthusiast, and gave to the ward of St. Giles, Cripplegate, its fine statue of the poet.

As we go to press the time-honoured pageant of the Lord Mayor's Show is proceeding. In this year's procession there are several novelties in addition to the familiar feature of State coaches, bands and men in uniform. St. Bartholomew's Hospital is represented by a decorated car displaying two tableaux, the one showing the presentation of the Charter of Hospital by Henry VIII. to the Lord Mayor of London in 1546, and the other depicting a nurse opening the door of a hospital ward with the appeal, "Help to keep this door open." Another special feature is provided by some of the blinded soldiers of St. Dunstan's driving in the procession on two cars, one of the cars containing men engaged in basket-making and the other men who specialise in mat-making. Thus is symbolised the great need for generosity and for united

*Photo. Miles & Kaye, 54, Cheapside, London, E.C.*

**The Rt Hon. The Lord Mayor: Sir JOHN JAMES BADDELEY.**

effort for the general good which is so strongly a feature of the difficult times in which the Great War has left us.

Sir John Baddeley has big tasks before him in his period of office. In wishing him God-speed as he assumes the responsibilities of the Mayoralty we think we are expressing the united cordial good wishes of the whole of the printing and allied trades.

## Cheaper Postage Urged.

### Printers' Deputation to P.M.G.

A deputation from the Joint Industrial Council of the Printing and Allied Trades waited upon the Postmaster-General on Wednesday of last week and urged the desirability of re-establishing the half-penny post on printed matter.

Mr. James MacLehose, LL.D., who introduced the deputation, pointed out that serious unemployment existed in the printing industry, and attributed a large proportion of this to the increase in the postal rates. These increased rates were having a deterrent effect upon advertisers, who were curtailing their orders for printing, both in size and quantity. He submitted evidence of circulars and advertising matter being posted from abroad, and also of some of these being printed on the Continent.

He further stated that the picture post card industry was practically stagnant, and that artists, process workers, and all engaged in this class of trade were suffering greatly from the falling off in orders.

Mr. H. Dennis and Mr. Valentine submitted figures dealing with the post card industry, and Mr. A. E. Holmes, Mr. T. E. Naylor, and Mr. H. Chalk (representing the workers' side of the Joint Industrial Council) emphasised the importance of an early decision being notified as to any revision of the rates.

Mr. A. E. Goodwin (joint secretary of the Joint Industrial Council) produced a number of letters received from important firms showing how they had curtailed their orders for printing, and how this had affected the volume of matter sent through the post.

Colonel H. R. Fletcher mentioned a case where a firm considered they would save £14,000 by posting advertising matter from the Continent.

The Postmaster-General, in replying, assured the deputation of his earnest desire to help British trade and to do anything in his power to relieve the prevailing unemployment. The dominating consideration, however, of the postal authorities must be to make the service self-supporting. He promised to give full consideration to the evidence that had been placed before him.

### Mr. Kellaway's Hopes.

Speaking at Rushden on Friday, the Postmaster-General told of his efforts at Post Office economy and said: "I hope when I

bring in my Estimates for next year that, instead of having a subsidy of nearly seven millions out of the Exchequer, we may see our way not only to make both ends meet, but to get rid of the increased charges which I was responsible for putting on." He added, however, that it would not be practicable to go back to the penny post and the halfpenny post card.

## St. Bride Students' Pension Fund.

The students of this well-known printing centre are very determined to have their pension completed at an early date. To do this a series of lectures and concerts have been arranged to take place during the season. The first of these was held at the Institute on Friday, November 4th, when Mr. Eugene Francis provided an entertainment of a very high order, comprising the vaudeville party, "The Chocolates," and Miss Grace Behenna's "Juvenile Jollities." The latter were composed of children ranging from three to ten years of age, and the tiny tots proved an excellent feature of the programme. "The Chocolates" were well up to their reputation and many of the items brought repeated encores; Miss Cecily Maxwell, from the Lyceum Theatre, appealed to many by her clever artistry.

Mr. T. W. McAra, J.P., admirably expressed the feelings of those present when he proposed a vote of thanks to Mr. Eugene Francis and Miss Grace Behenna and their friends for the fine entertainment they had provided, throwing out a hint that at some future time the programme might be repeated.

Besides Mr. McAra there were also present Messrs. T. E. Naylor, F. Gray, S. G. Yapp, L. Smith and the whole of the school staff.

Of the £600 the students have undertaken to raise a sum of £400 has already been subscribed, and Friday's concert was the means of adding a substantial contribution towards the balance.

## German Paper in Egypt.

News reaches the Federation of British Industries from Egypt that German competition has lately become very severe in the paper trade in that country. As a result of this competition importers who lately bought from the United Kingdom or Sweden are involved in a considerable loss.

Manilla papers of the finest quality can now be obtained from Germany at £23 per ton c.i.f. Alexandria. This is £10 per ton cheaper than the United Kingdom price. German manufacturers are also extending their credit facilities and consider no order too small to execute.

## Printers and Profit-Sharing.

### Interesting Discussion at the S.-W. London Master Printers' Association.

Members of the South-West London Master Printers' Association had a full night on Tuesday, last week, when they spent some three hours in discussing various topics relating to the printing industry. The principal item on the agenda was an address by Mr. H. Basil Cahusac, managing director of the Solicitors' Law Stationery Society, who described the scheme of profit-sharing he has adopted in connection with his business.

Mr. Cahusac attributed much of the success of his Society to the scheme, on the ground that profits were promoted by self-interest. If the working men were given a share in the profits, he claimed, these profits might be greater than would otherwise be the case. He mentioned the practice of giving a manager in charge of a branch or a traveller commission on sales, and his suggestion was that if they would only take the whole of their staff into a profit-sharing scheme they would encourage all of them to do their best. Profit-sharing eased the management of a business considerably, and it humanised the authority they could exercise over their staff. Dealing with the question of trade unions and inefficient labour, Mr. Cahusac argued that it would be better if the unions pensioned off the indifferent workers, in which case there would be no incentive to the best workmen not to do their best. The speaker went on to describe how they were led to become an "open" shop after the strike of 1911 on account of the overtime restrictions enforced by the unions. In 1912 they adopted their profit-sharing scheme. The effect of this was that the staff got on their remuneration for the year, out of the profits of the concern, a return of 6 per cent. less than the ordinary shareholders. For instance, after the ordinary shareholders got 10 per cent., the staff got 4 per cent. on their wages, and every 2 per cent. was approximately one week's money at the end of the year. In 1911 the dividend of the Law Stationery Society had been 9 per cent., but when the profits were shared with the staff their dividend went up to 10 per cent. in the first year. During the war they paid 8 per cent., but they had done rather better since then. In 18 they paid 12 per cent. and in the following two years 20 per cent., so that in the latter two years the men had 14 per cent. on their wages, which meant seven weeks' money. Accordingly a compositor who earned £5 a week got a cheque for £35 at the end of the year. Mr. Cahusac went on to speak of the general improving effect which the scheme had upon his staff, which numbered 500, pointing out that the accumulative effect of 500 men all doing a little better added to their profit very considerably. It was easier, of course, to have a profit-sharing scheme where they had set

dividends and capital. With a limited company it was a very simple matter, and with partnership firms he thought some form of profit-sharing could be easily arranged.

Answering a point raised by the Chairman (Mr. J. D. Wise) Mr. Cahusac said the dividend in 1919 and 1920, which was 20 per cent., was not reduced by the allowance of 14 per cent. to the staff, an observation which caused the chairman to observe that the result was most satisfactory.

### A Big Distribution.

In answer to Mr. Mason, from the South-East Association, Mr. Cahusac said some schemes arranged that over 6 per cent. half the profits went to the staff and half to the shareholders. He did not like that arrangement so well, because it meant a lump sum to be divided among the staff. It followed in that case that if the dividend remained stationary and the staff increased, the money would have to be spread over a bigger wages bill, so that each individual would get less; that was why he thought that it was a better plan to base the scheme on wages. Last year the staff of the Law Stationery Society received £11,000 and the shareholders £7,500, but the latter was 20 per cent. on capital.

Mr. Young, who has taken considerable interest in the question of profit-sharing and labour co-partnership, thought such schemes were more easily applicable to firms of a considerable size, especially limited companies, where they had a balance sheet. In a small business they had considerable initial difficulty in getting the staff to believe they were really getting their share of the dividends. Again, while it might be a matter of indifference to a large concern whether they published the amount of their profits, to a small printer, if it was known that he was doing remarkably well, such procedure would invite more competition. Considering the list of firms who had adopted schemes of the character under consideration during the last 35 years, it was surprising that the movement had not made more headway. Profit-sharing would help to solve the trouble between the capitalist and the workman.

Mr. Cahusac remarked that he was not in favour of co-partnership schemes which forced the staff to re-invest their money. He regarded that as interfering with the liberty of the subject, and he claimed the staff were just as much entitled to their dividends as were the shareholders. In his company's scheme each member of the staff was a capitalist to the extent of his wages; he could not sell his capital, but he received dividends on it. He was a sort of holder of deferred stock which could not be transferred.

Answering Mr. Maynard, Mr. Cahusac said the quality of the work did not give place to quantity of output. The staff who were benefiting were anxious to satisfy the customers, and, therefore, put their best into their work. The effect of this scheme also was that the employees themselves gingered up the sluggards.

Mr. W. Whyte, secretary of the London Master Printers' Association, pointed out that

in spite of the traditional trade union hostility to schemes of this kind the name of the Solicitors' Law Stationery Society appeared on the "fair" list of one of the unions. He paid a tribute to the highly efficient management of the Society, which did not allow its sympathetic feelings towards the staff to interfere with the discipline necessary to the success of any business.

Mr. Johnson, organiser of the L. M. P. A., mentioned a small printer in the south-east district who had introduced profit-sharing and who was perfectly satisfied with the result. He asked whether the bonuses could not be paid out during the course of the year, such as at holiday times.

Mr. Simnett, after remarking upon the handsome profits made by the Law Stationery Society, said he was afraid the day was a long way off when the general printer could get so handsome a profit unless there was some secret which Mr. Cahusac could not divulge. There was no doubt such a scheme was the thing of the future, and they had all got to come to it.

After remarks by Mr. Cole, the secretary, the chairman attributed the success of the Law Stationery Society to the capabilities of Mr. Cahusac. The more they put into a business or an association, he said, the more they could draw out of it, and they had to study all the things that tended to elevate the craft, both from the master's and the employees point of view. They often talked about the inefficiency of the man, but he thought there was too often equal inefficiency of the master.

## Master Printers' Organisation.

The chairman in asking Mr. Whyte to address the meeting, said he introduced into their constitution some special features which he thought would make the Alliance much more powerful for good and more helpful to the craft.

Mr. Whyte, who was very cordially received, said they had come through what was considered a very trying time for the L. M. P. A. and there had been some doubt as to what the outcome would be. His own impression from the inside was that the Association had stood the test of the last few months very well indeed. They had seen their weakness, and they had also noted their strength, a fact which had also been observed by the unions. The whole staff were extremely anxious to do anything they could to help the work of the Association and to strengthen its interests. One of the things which had been made painfully obvious during the recent trying period was the lack of touch between what they might call the "head centre" and the rank and file. It seemed to him it was very necessary that the paid officials should get into closer relations with the unpaid and honorary officers. They had arranged therefore to have quarterly meetings of the district officials with the permanent staff, and he thought they would all benefit from hearing each other's views. Another thing to be aimed at was to get closer touch with the rank and file of members, and they were arranging more frequent meetings of the Association as a

whole. They desired free criticism and an open platform, so that the officials could tell the members what they were doing and provide an opportunity for the members to tell the officials what they ought to have done and what more they could do. After mentioning the gratifying manner in which the subscriptions were forthcoming, Mr. Whyte remarked that the Association was never in a more flourishing condition than it is to-day.

Mr. Young advocated evening meetings in place of the monthly lunch, which took up so much time.

The chairman thought the quarterly meetings of the officers and of the associations would be very useful, and he thanked Mr. Whyte for suggesting them.

Mr. Mason (South-East) endorsed the observations of the chairman with regard to Mr. Whyte.

## Trade Union Matters.

**NEWSPAPER WORKERS' WAGES.** — Three months' notice [to terminate existing agreements has been given by the Newspaper Proprietors' Association to all printing trade unions engaged on daily newspaper work. An announcement appeared in the Press at the end of last week that the proposed new terms had been placed before the unions. On inquiring of the Newspaper Proprietors' Association, however, we are informed that this is incorrect, no new terms having yet been proposed.

**THE** unfortunate dispute in the bindery of the Co-operative Printing Society, Manchester, continues, but efforts are being made to arrive at a settlement this week.

The quarterly report of the Leeds Typographical Society states that there is evidence of an improvement in the printing trade in the Leeds district. The amount paid out on account of unemployment benefit shows a decrease of £440 as compared with the June quarter, while on the income side of the balance-sheet the same improvement is indicated by an increase of £155 in members' contributions. On the whole, however, trade is still very depressed, and a speedy revival of full employment is hoped for. The report draws attention to the fact that some members of the Leeds branch have been working a portion of the annual holiday week, and that such a practice is in contravention of a ruling given by the Executive Council of the Typographical Association. Chapel officials are requested to note that by the terms of the House and Holidays Agreement the annual holiday must be taken within the period March-September.

**FOOTBALL.**—On Saturday, under the auspices of the Printers' Football League, Drake, Driver and Leaver beat the Fleetway Press by 5 goals to 0.

## Printers' Managers and Overseers ASSOCIATION.

**Mr. W. H. Burchell on "Printing Office Management."**

The announcement that Mr. W. H. Burchell, founder and first honorary secretary of the Association, was to lecture at the meeting of the P. M. and O. A. on November 1st drew an excellent attendance of members, and the meeting proved a most interesting and stimulating one. Mr. A. E. Jarvis presided.

Following a sympathetic reference by the general secretary to the health of the vice-president, and a response by Mr. Bateman, the minutes of the previous monthly meeting, also of the special general meeting were read and confirmed.

Mr. Whittle mentioned that the question of the proposed alteration of the membership qualification had to be carried forward to the next council meeting, as not all the Centres had yet reported on the matter.

Despite the more stringent conditions that now have to be fulfilled by candidates for membership, the Association continues its vigorous growth. The following applicants for membership were duly elected, the president giving each a personal welcome into the Association:—Mr. J. W. Birchley (Lloyd's Register of Shipping, 64, Southwark street, S.E.1.; overseer, composing department). Mr. F. H. Newton (H.M.S.O. Press, Harrow; overseer, monotype department). Mr. A. H. Taylor (Martin Hood and Larkin, 8-9, Great Newport-street, Charing Cross-road, W.C.2; overseer, lithographic department).

### Council and Officers Nominated.

The next business was the nomination of council and officers for election at the forthcoming annual meeting. The president and vice-president retire according to rule, but the other officers are eligible for re-election. The retiring members of the council are: Messrs. E. H. Berryman, H. Blackwell, E. H. Campbell, G. H. T. Freeman, E. Hutchins, T. B. Lapworth, C. Northam, J. R. Riddell. Mr. A. W. Hart resigned earlier in the year, thus making nine vacancies.

Mr. S. M. Bateman (present vice-president) was nominated as the new president of the Association, Mr. E. H. Berryman remarking upon his long connection with the Association as a very popular and active member. Mr. R. H. Berry was nominated as vice-president, and Messrs. J. C. Pugh and G. Phillips for re-election as trustees, whilst Mr. C. Durston was nominated to serve again as treasurer. In the case of the general secretaryship also, there was no alternative nomination, Mr. E. W. Whittle's name going forward for re-election. Messrs. W. H. Gill and H. Blackwell, financial secretary and technical secretary respectively, were also nominated to continue in office. Ten names

were required in respect of the council—Mr. Berry, nominated for the vice-presidency being added to the retiring members—and fifteen names were forthcoming, the following gentlemen being nominated: Messrs. A. E. Jarvis, W. H. Mann, R. Simpson, A. W. Paul, J. Wigglesworth, H. J. Gallon, F. W. Hume, G. E. Parker, S. J. Holt, R. B. Hardie, A. T. Walters, J. A. B. Reed, R. Condliff, E. G. Bausor and H. Roberts.

### Mr. Burchell's Lecture.

Mr. W. H. Burchell, introduced as No. 1 member of the Association, received a cordial welcome on rising to speak on "Printing Office Management." Hung on the wall for members' inspection were a photograph of the first P. M. and O. A. Council, also an illuminated address which, together with a gold watch, was presented to Mr. Burchell 25 years ago, in acknowledgment of his services to the Association. Mr. Burchell remarked that it was exactly 28 years ago that evening that the first members of the P. M. and O. A. were enrolled. He passed round a list of the forty still living, who were among the first hundred members. He made appreciative reference to those who had passed away, and at his request all present rose for a moment in silence as a tribute to their memory.

Proceeding to his lecture, Mr. Burchell dealt in very practical fashion with many of the most important points that demand the attention of the manager of a printing works.

In dealing, first, with the subject of cleanliness, he drew attention to the danger of fire from the spontaneous combustion of oily rags if improperly looked after, also from the burning out of motor armatures not regularly cleaned by an engineer. He stressed the hygienic importance of having offices frequently swept and sprayed with disinfectant, and read Dr. Ellis's useful leaflet, regarding health in printing works, as circulated by the Joint Industrial Council.

He laid great stress on the harm done both directly and indirectly by unpunctuality, and commented severely upon the loose way in which some printing offices are conducted. House dockets as well as departmental dockets should be used in every office, he said, and each department should give both weekly and quarterly returns showing the balance between wages paid and the value produced.

In speaking of the works manager's duties, Mr. Burchell emphasised the need for some human personal contact between the manager and the workpeople. A man could take a pride in a so-called commonplace job if the manager showed an interest in the work. As to the salaries of managers and overseers, he was a believer, he said, in payment by results. He threw out a suggestion that managers and overseers of composing departments might reckon their salaries at a shilling per employee over and above the 'stab rate, whilst a machine room overseer might get 2s. above 'stab rate for each machine and 1s. for each platen.

Reverting to the subject of the need for detailed control of all work done, Mr. Burchell proceeded to sketch the passage of a job through the various departments, and suggested methods of keeping the requisite records of all operations performed. Touching on the question "Does the composing-room pay?" he advocated the charging of composition at 5s. 5d. an hour, and overtime in proportion, so as to cover non-productive work.

The thorny subject of printers' estimating was next dealt with, and striking examples given of ruinous price-cutting. The suggestion was made that estimating should be charged for, as firms sometimes ask for quotations without any intention of giving the job, but merely with a view to forcing down prices.

Other points touched on were the subject of fire risks—the advice being given that a valuation should be carried out every year by a firm of repute—and the question of debt-recovery, in regard to which the advantages provided by the London Master Printers' Association were pointed out.

After referring to the necessity for a reduction of the postal rates on printed matter and expressing his determination to continue the fight until the halfpenny post was re-established, Mr. Burchell concluded by asking the Council to give consideration to the possibility of effecting life assurances in respect of their members. He thought, personally, that every employer should take out a life policy for each manager or overseer in his employ, and pay half of the premiums as long as the employment continued.

### **A Lively Discussion.**

Many members took part in the discussion following the lecture, which had been followed throughout with lively interest.

Messrs. A. E. Jarvis and C. Barnes took up the question of insurance, and indicated that the course Mr. Burchell suggested is already being followed by some employers.

Mr. Bateman referred critically to the remarks made on the payment of machine overseers according to the machines controlled, and wanted to know how rotary machines would be reckoned.

Mr. Jarvis contended that it was impossible to have a stated basis for the payment of overseers, as the difference between a "live wire" and a dead one could not be worked out arithmetically.

Mr. Whittle was able to confirm from experience what the lecturer had said as to the good effects of providing clean, healthy and comfortable work rooms, and he told of the excellent provision made in this respect by the firm with which he is connected. He remarked that Mr. Burchell had in his lecture come very close to the subject of the Costing System. He would like to know how far London master printers were honest to one another in respect of the Costing System. Mr. Whittle proceeded to give an example of amazing discrepancies between the estimates of firms claiming to work to the system. He

concluded by expressing the Association's indebtedness to Mr. Burchell, and said he hoped part two of Mr. Burchell's lecture would follow shortly.

Mr. Whittle mentioned later that he was proud to recall that a P.M. and O.A. member, Mr. W. W. Fox, was the first man in London to talk about "hourly costs." He had opened the eyes of master printers to the importance of the subject.

Mr. Field, referring to the getting of closer contact between the workpeople and those in authority, spoke to the value of monthly meetings at which overseers of departments, representatives of the workpeople, and members of the firm confer in informal discussion.

Mr. Burchell briefly replied to the points raised in the discussion, and the meeting closed with a cordial vote of thanks. The vote of thanks to Mr. Burchell—proposed by Mr. Bateman, seconded by Mr. Whittle, and supported by Mr. Gill—was carried with acclamation.

## **Unemployed Printers in Edinburgh.**

### **M.P.'s Efforts to Assist.**

At a recent meeting with members of the printing and paper trades in Edinburgh who are out of employment, Mr. William Graham, M.P. for Central Edinburgh, undertook to communicate with the local authorities of the district to ascertain whether they would be able to expedite orders for printing and stationery in order to assist unemployed printers and others in the present emergency.

From the Parish Council Mr. Graham has received a letter explaining that its printing work is done by contract, the biggest part of which consists of the printing of the minutes of the council, which are sent out to members previous to each monthly meeting. The requirements of books and stationery are not extensive at any time.

The Education Authority writes that while under the economy campaign instructions have been received to reduce printing and advertising to the lowest possible limit, the authority has been able within recent days to send to the printers the scheme of education which is required by the Education Act of 1918. That is a fairly extensive document. All other absolutely essential matter is being hurried, and the Authority, within the limits of its restricted power, will do all it possibly can to place orders in hand.

Mr. Graham has had a reply from the Town Council to the effect that the matter is under consideration, and he has also communicated with the Government authorities directing their attention to the depression in a large printing centre like Edinburgh, and asking whether anything can be done in the better allocation of Government and other contracts in printing and stationery at the present time.

### FORTY-THIRD YEAR.

*Printed and Published EVERY THURSDAY  
by STONHILL & GILLIS,*

*at 58, Shoe Lane, London, E.C. 4.*

**Tel.: Stonhill, Fleet, London. Phone: 8407 City.**

**SUBSCRIPTION: Per Annum, 8s. 8d. (POSTAGE EXTRA).**

or from Messrs. W. H. Everett and Son, Ltd., news-  
agents, 11, St. Bride-street, E.C.4.**

THURSDAY, NOVEMBER 10, 1921.

## Current Topics.

### The State of Trade.

DESPITE the hardness of the times we gather that trade generally is not quite so bad as it was, reports from various sources indicating that the approach of the winter season and the recent movement towards price-stabilisation have been followed by some vivification of business. It is high time that some improvement should be manifesting itself, for many printers have this year been passing through the severest struggle in their trade experience. The struggle is not yet over, however, for there exists severe competition—often unconscionable competition—for most of the work available, and this competition is to-day showing itself in directions in which it has not been noticeable hitherto. A good many printers, for instance, are feeling rather sore on account of the way in which dealers in paper get in touch with printers' customers, and when the paper man adds offers of printing to his offers of paper the printer feels

that he is not being fairly treated. The efficiency of printers' organisation, individual and collective is being severely tested, and the achievement of greater efficiency in every direction is an urgent demand of the moment.

\* \* \*

### Cheaper Postage—When?

THE Postmaster-General's statement at Rushden (as reported in another column) that he hopes next year to take off the additional postal charges for which he has been responsible is not what printers have been hoping to hear from him. Faced with drastically curtailed orders because of the increased postage, some sections of the trade—picture postcard printers in particular—had hoped to have a definite promise of reduced postage to be effective at a definite and not far distant date. Even so small a concession as a promise of a return to the 1d. postcard rate before Christmas would have had immediate results in counteracting some of the printing trade paralysis caused by Post Office policy. Of course it is better that relief should come in April next than not at all, but why wait six months to relieve the unemployment that is crying for immediate alleviation? The integrity of the financial year cannot be pleaded, for Mr. Kellaway did not wait until the close of a financial period to impose this tax on trade; the 1½d. postcard rate was introduced last June. Why then must the financial year expire before the removal of this impost?

\* \* \*

### Health and Work.

IN order that men and women might give that increased production which is necessary, it is essential that they should work under healthy conditions, and this is one of the directions in which the employers can help. Attention is being concentrated upon this aspect of labour. Poor health on the part of the worker naturally means reduced efficiency and loss. The opportunity for the manufacturer to assist in promoting the welfare of his employees is widened at present because, unfortunately, owing to the pressing need for national economy, the activities of the Industrial Fatigue Research Board had been temporarily curtailed. The work already done, however has shown conclusively that many of our manufacturing methods are wasteful of human energy, and therefore of efficiency, and that some are even harmful to the human machine. It would, therefore, be in their own and the nation's interests if the different industries would take up for themselves research work similar to that already done by the Board.

## Personal.

LORD RIDDELL has left Southampton for the United States.

Mr. H. G. WELLS was on Saturday elected a member of the Central London branch of the National Union of Journalists.

THE Lord Chancellor will preside at the dinner to be given at the Savoy Hotel on November 21st to Sir Leslie Ward ("Spy") on his 70th birthday, and among those who are acting on the dinner committee are the Prime Minister, Viscount Burnham and Viscount Northcliffe.

THE printer-Mayor of Southwark, Mr. Geo. A. Isaacs, closed his term of office yesterday by cleaning one of a hundred windows in Southwark Cathedral. He has been instrumental in raising most of the money for the cleaning of the windows, which had not been touched for twenty-five years.

MR. H. A. BETHELL presided at a well-attended meeting of the executive of the Lancashire and Cheshire Alliance of the Federation of Master Printers held on Monday in the new offices in Manchester.

MR. ROGER GIBB has resigned his position as assistant-secretary to the Federation of Master Printers. He has accepted an important position in the railway world.

THE staff of the *North Mail* and the *Sunday Sun*, which are associate newspapers with the *Newcastle Chronicle*, have presented a case of dessert knives and forks, with mother-of-pearl handles, to Mr. A. Munro Sutherland, on the occasion of his forthcoming marriage.

DURING the last two months the principal of St. Bride Printing School, Mr. J. R. Riddell, seems to have been more than usually energetic in going about the country giving inspiring addresses to printer craftsmen. We have heard of enthusiastic meetings at Birmingham, Derby and Cheltenham. We believe other towns have also been visited by this educational enthusiast who seems ever ready to spend his time and energy in helping along craft instruction for the printer.

MR. J. F. GREEN, an ex-president of the Coventry Typographical Society, stood as Labour candidate for Hearsall Ward in the recent municipal elections at Coventry, but was unsuccessful.

THE engagement is announced of Captain Maurice H. Garrard, M.C., late 1st K.O.Y.L.I., to Jean, younger daughter of the late Augustin Spicer and Mrs. Spicer.

## SOUTH-EAST

### London Master Printers' Association

The usual monthly meeting was held on Tuesday afternoon at the Bridge House Hotel, London-bridge, S.E., the president (Mr. E. B. Smith) occupying the chair. There was a fair attendance of members and the business before the meeting was mostly of a private character concerning questions of organisation.

The minutes of the previous meeting having been read and confirmed, Mr. Clowes drew attention to the fact that subscriptions from the South-East Association to the Printers' Pension Corporation had not been grouped so that an estimate could be given showing what they had subscribed as an Association. This he regretted, as a comparison could not be made with the sums given by the other district Associations.

The task of finding out how much the Association has subscribed was left in the hands of Mr. Prentice.

A letter from 24, Holborn, was read asking for a representative from the Association to meet representatives from the other district Associations to discuss the question of unfair competition of wholesalers and printing agents.

Several members expressed the opinion that the subject, though it bristled with difficulties, could be dealt with, and thought that the Association would be well advised in appointing a representative. References were made to the frequent custom of the paper-maker going behind the back of the printer, and also to the printer sometimes going straight to the papermaker and not consulting the mill agent regarding his paper. As instancing the difficulties of the subject, a member mentioned the fact that a well-known engraving firm had been able to secure a printing order.

Finally Mr. Hedger was appointed to represent the Association.

Mr. Smith and Mr. Prentice agreed to represent the Association at the Conference on District Organisation and Finances at 24, Holborn, on the 11th inst.

It was agreed on the proposition of Mr. Brigenshaw that Mr. A. H. Munday, of Fry's Metal Foundry, be invited to address the members on the subject of metallurgy on a future date.

Mr. Mason briefly drew attention to the sincere regret the members would feel in the death of Mr. Winkley and Mr. W. Bargery, and also spoke of the valuable services rendered to the Association in days gone by by these two gentlemen.

Mr. Mason's words were endorsed by the president, and the secretary was instructed to convey to the relatives of the deceased gentlemen their sincere condolence.

After the election of three firms to membership and a short discussion as to the best way of securing further members, the meeting terminated.

## DIVIDENDS AND REPORTS.

**HAZEL, WATSON AND VINEY.**—Dividend of 2 per cent., free of tax, on ordinary shares, payable December 1st.

**ODHAMS PRESS.**—Half-yearly interim on ordinary at rate of 10 per cent.

**GEORGE NEWNES** has declared interim dividend of 5 per cent. on ordinary shares for current year.

**WARRILLOWS.**—Warrillows announces dividend of 1s. per share, free of tax, on ordinary, making 1. 6d. per share for period ended June 30th, 1921, carrying £19,189 forward, subject to corporation profits tax.

**YATES AND THOM, LTD.**—Dividend of 5 per cent., less tax, on ordinary shares, placing £10,000 to reserve, carrying forward £15,084.

## NEW COMPANIES.

**CONTRACTORS RECORD, LTD.**—Capital £3,500 in £1 shares; to adopt an agreement with F. Mitchell and to carry on the business of newspaper and magazine proprietors, news-agents, journalists, printers, publishers, etc. Private company. First directors: C. H. Biggs, Mrs. R. Biggs, F. S. Mitchell and Mrs. M. A.

Mitchell. Registered office: 27, Chancery-lane, W.C.1.

**B. SCULTHORP AND SON, LTD.**—Capital £3,000 in £1 shares; to acquire the business carried on by G. H. Sculthorp as "B. Sculthorp and Son," and to carry on the business of office suppliers, stationers, printers, manufacturers of and dealers in fancy goods, boxes, cartons, cases and goods of all kinds made from wood, cardboard, papier mache, paper, leather and textile substances, etc. Private company. Subscribers: W. H. Baker and J. E. Larkham. First directors: G. H. Sculthorp and others by the subscribers. Registered office: Fulwood House, High Holborn, W.C.

**ROSCOW AND CO., LTD.**—Capital £15,000 in £1 shares; to take over the businesses of paper bag manufacturing and paper dealing carried on by W. H. Roscow at Bury Street Mills, Bury-street, Radcliffe, Lancs, as the "Radcliffe Paper Bag Co.," and "William Roscow and Co." Private company. First directors: W. H. Roscow and J. W. S. Ashworth. Regd. office: Bury Street Mill, Bury-street, Radcliffe, Lancs.

**KETTERING CARTONS, LTD.**—Capital £5,000 in £1 shares; manufacturers of and dealers in card, leather and other similar manufactured boards, and all kinds of papers, woods, iron, sheet and other metals, manufacturers, of and dealers in boxes and cartons made therefrom, show-card manufacturers, mount cutters and makers, paper and other bag makers, etc. Private company. First directors: H. W. Caswell, T. A. Mursell and J. H. Whitney. Registered office: Chelsea Works, St. Michael's-road, Kettering.

**HORNCASTLE'S ADVERTISING AGENCY, LTD.**—Capital £3,000 in 2,500 preference shares of £1 each and 10,000 ordinary shares of 1s. each; to adopt an agreement with C. R. Horncastle and C. A. R. Tytherleigh; and to acquire the business of advertising agents and contractors carried on by them. Private company. First directors: C. R. Horncastle, T. H. Hardy, C. A. R. Tytherleigh and W. Cornell.

**ACCO MANUFACTURERS, LTD.**—Capital £1,000 in £1 shares; manufacturers of and dealers in stationers' and office goods, etc. Private company. Subscribers: L. F. Parsons and Emily M. Stevens. Registered office: 130, Queen Victoria-street, E.C.

**BLACKPOOL PROGRAMME, LTD.**—Capital £1,000 in £1 shares; advertising contractors

and agents, etc. Private company. First directors: H. Clegg and E. H. Whetstone. Registered office: Talbot Chambers, Talbot-square, Blackpool.

MARTIN RUDIN, LTD.—Capital £100 in £1 shares; general advertising agents and contractors, publicity specialists, etc. Private company. Subscribers: M. R. Rudin and H. J. Brown. First director: M. Rudin. Registered office: 25, Wellington-street, W.C.2.

J. K. FARNELL AND CO., LTD.—Capital £10,000 in £1 shares; manufacturers, importers and exporters of and dealers in fancy goods of all kinds in celluloid, wood, cardboard, paper and other materials, etc. Private company. First directors: H. K. Farnell, Agnes F. Farnell, A. E. B. Rose and F. H. Sully. Registered office: Alpha Works, Acton-hill, Acton, Middlesex.

### COMPANY MORTGAGES AND CHARGES.

Fresh Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 1908, and Satisfactions registered pursuant to Section 97 of the same Act. (The registration of Satisfactions is not compulsory).

W. H. AND A. RICHARDSON, LTD. (manufacturing paper and stationery and makers of fancy goods, cardboard, box makers, etc., Jarrow).—Particulars of £20,000 debentures authorised October 24th, 1921; whole amount issued, and ranking *pari passu* with £30,000 prior debentures. Charged on the company's undertaking and property, present and future, including uncalled capital.

ASSOCIATED PAPER MILLS, LTD.—Disposition dated May 10th, securing £150,000 debentures issued on July 29th, 1921, charged on Kelvindale Paper Mills, Maryhill, Glasgow. Holders: E. J. Borberbank, 35, Higher Drive, Purley; and W. Ogden, Lyndhurst, Arthog-road, Hale, Ches.

SWAIN AND CO., LTD. (printers).—Mortgage dated October 26th, 1921, to secure £5,000, charged on certain land and premises in Stockport. Holders: Dean and Co. (Stockport), Ltd., Cheadle Heath Works, Cheadle Heath, Stockport.

WILLIAM NICHOLSON AND SONS, LTD. (publishers and booksellers, etc., Wakefield).—Satisfaction in full on September 1st, 1921, of mortgage dated December 10th, 1913, securing an indefinite amount.

D. MUNRO AND SON, LTD. (bookbinders, Newcastle-on-Tyne).—Particulars of £1,000 debentures authorised October 25th, 1921; whole amount issued; charged on the company's undertaking and property, present and future, including uncalled capital.

JOHN DICKINSON AND CO., LTD. (paper manufacturers and wholesale stationers, etc., London).—Satisfaction to the extent of £300 on October 18th, 1921, of debenture stock covered by trust deeds dated July 1st, 1921, and January 15th, 1919, securing £565,000.

UNIVERSAL BUSINESS AGENCIES, LTD (general merchants, publishers, printers, etc., London).—Issue on October 24th, 1921, of £250 debentures, part of a series already registered.

THOBURN AND HATCHETT, LTD. (printers, stationers, etc., London).—Debentures dated October 21st, 1921, to secure £200. Charged on company's property, present and future, including uncalled capital. Holder: F. G. Bowen, 62a, Aldersgate-street, E.C.2.

W. N. SHARPE, LTD. (fancy stationers, etc., Bradford).—Satisfaction in full on October 19th, 1921, of debenture dated December 3rd, 1919, securing all moneys due or to become due from company to bankers, not exceeding £10,000, notified. Debenture dated October 20th, 1921, to secure £14,000, charged on the company's undertaking and property, present and future, including uncalled and unpaid capital, also registered. Holders: London County Westminster and Parr's Bank.

### BANKRUPTCIES, etc.

*Re* LANGHALL AND WADE, printers' designers and manufacturers' stationers, 10, South-street, Finsbury, E.C.—The members of this firm, Ernest Langrish, Stewart Edward Wade, Cuthbert Collingwood and H. M. Langridge, trading as above, failed last March with liabilities £3,975, and on November 4th, the debtors Langridge and Wade applied to Mr. Registrar Francke at the London Bankruptcy Court for a discharge from the bankruptcy. Mr. Vyvyan, official receiver, reported that the assets valued by the bankrupts at £3,353 had realised £1,791 and a dividend of about 6s. 6d. in the £ would be paid. The business was commenced in August, 1919, by Langridge, Wade and Langrish, with a capital of £100, and in the following May Collingwood became a partner and introduced £1,000. They then purchased the existing business of a printer at 147-9, Haydon's-lane, Wimbledon, at the price of £2,100, but only £1,500 had been paid. In February last three executions were levied at the Finsbury premises, and in March, the stock having been removed by the sheriff, these proceedings followed. The failure was attributed to heavy interest on borrowed money, and loss on stock of paper owing to the slump. The offences alleged were (1) insufficiency of assets to equal 10s. in the £ on the amount of the liabilities; and (2) omission to keep proper books of account. The discharges were suspended for two years.

MR. E. A. DAWE has consented to address the South-West London Master Printers' Association at the December meeting on the subject of "The Printer and His Paper."

FROM the old-established publishing firm of E. and S. Livingstone, Edinburgh, we have received a catalogue and leaflets giving particulars of a large number of publications on scientific subjects, chiefly medical and surgical

## Trade Notes.

SUNDAY last was the 150th anniversary of the birth of Alois Senefelder, the father of lithography, and the occasion was celebrated at Prague, his birthplace, and elsewhere.

THE *Westminster Gazette* on Monday duly made its first appearance as a morning paper, and the excellence of its production shows it to be an important addition to London's morning dailies.

In a special article in the *Daily Chronicle* on Monday the suggestion was made that the Churches should combine to institute a great national advertising campaign to attract the people to places of worship.

THE Railway Rates Tribunal, appointed under the Railways Bill, will consist of Sir F. Gore Browne (chairman), Mr. W. A. Jefson, London and North-Western Railway, and Mr. G. C. Lockett, commercial member.

In recognition of his bravery in saving a woman from drowning in the Thames, Frederick Sherratt, a Blackfriars billposter, has been awarded the certificate and bronze medal of the Royal Humane Society and the sum of £10 and a certificate by the Carnegie Hero Trust Fund.

ST. BRIDE MEMORIAL SERVICE.—On Armistice Day, November 11th, a short memorial service in commemoration of St. Bride students who fell in the war is to be held at St. Bride's Church, Fleet-street, at 10.45 a.m. Past and present students are invited to make every effort to attend.

WILLS.—Mr. Hermann Schmidt, of Ampt-hill-square, N.W., financial writer for the Press (died June 8th, intestate and a bachelor), £1,793; Mr. R. S. Warren Bell, of Southend, editor of the *Captain*, 1899-1910, author of several popular books for boys (died September 26th), £331.

RAILWAY RATES.—The committee set up by the Federation of Master Printers to deal with the question of the classification of railway rates for printed matter are arranging a conference with the railway companies, which will probably take place during the third week in November.

ELECTION POSTERS.—The Hertford County Magistrates on Saturday committed for trial before the King's Bench the case in which the *Daily Mirror Newspaper Co., Ltd.*, is accused of a corrupt practice other than personation within the meaning of the Corrupt and Illegal Practices Prevention Act, in connection with the issuing of newspaper posters during the East Herts by-election. Sir R. Muir, for the defence, said that the Court had no jurisdiction to send the company for trial. It was obvious that the procedure could not be applied to a company. He further said posters concerned were not issued for the purpose of advertising the paper in the ordinary course of business.

THE death has occurred in Bombay of Mr. John Wallace, C.E., joint editor of the *Indian Textile Journal*.

GERMANY has re-entered the foreign trade of Malta, among the most important articles supplied being cigarette paper.

MESSRS. SOTHEBY will be occupied for six days next month in disposing of the famous library of Lord Amherst of Hackney.

DURING last year paper and stationery showed important increases in the value imported from the United Kingdom and the United States into the Straits Settlements.

IN a High Court Special Jury List, to be dealt with next week, containing nearly 50 cases, seventeen are libel suits. These include that of Mr. J. H. Thomas v. the National Labour Press and others.

AN outstanding feature of the November number of *Pearson's Magazine* is an interview with the great German newspaper owner and industrial magnate, Hugo Stinnes, by Isaac Marcossen, America's super-interviewer.

ILLUSTRATED post cards are among the "luxury" goods which, under new regulations, may now be imported into Roumania without special licence on payment of the "luxury" tax in addition to the Customs duties.

MR. J. C. SERQUE, writing in the *Daily News*, says that the difficulties which beset the professional writer in present-day Russia have no parallel elsewhere. Regarding writing paper he says that the great scarcity of the material limits the number of manuscripts.

PRINTING and bookbinding machinery was imported into Canada during the four months ended July, 1921, to the value of 575,000 dols. This is less than the value imported last year over the same period, when it stood at 1,247,000 dols., and also less than the amount for the same period of 1919, when the total reached 604,000 dols.

THE LATE MR. W. BALDWIN, Rectory Farm, Taplow, Bucks, and Upper Thames-street, E.C., paper manufacturer, who died on June 20th, in his 60th year, left estate of the gross value of £33,708, the net personalty being £32,741. The testator gives £200, the household and personal effects, and during widowhood £2,000 a year, to his wife, £3,000 in trust for his daughter Daphne Monica, £50 each to the executors, £500 to Alice Osborn, for long and devoted service.

In the latest issue of that admirably-printed house organ, the *Falcon*, "produced quarterly by the printing craftsmen of Messrs. Spottiswoode, Ballantyne and Co., Ltd.," are to be found as usual many articles of general interest to the trade as well as of special interest to the workers for whom primarily the magazine is issued. An outstanding item in the new issue is the French text (followed by the English translation) of the speech which Mr. R. A. Austen-Leigh delivered on the occasion of his recent visit to Lille to take part in the French Master Printers' Congress.

## Printers' Pension Festival.

Over £27,000 Subscribed.

Great success attended the 94th anniversary festival of the Printers' Pension, Almshouse and Orphan Asylum Corporation held on Wednesday of last week at the Connaught Rooms, when, under the chairmanship of Sir William A. Waterlow, a large and representative company, numbering over 600, sat down to dinner.

The chairman read a letter he had received from the Prince of Wales, who wrote expressing his best wishes and remarking: "The generous support which was given me when I presided last year shows that the needs of the aged printer and of the children of those who gave their lives in the war are claims worthy of recognition by the public, and, although the present condition of trade must make your task more difficult, I believe you can go forward with confidence, having a good cause to plead on behalf of an economically administered charity."

A telegram from the Duke of York to the chairman ran: "I trust you will have a very successful dinner and that the funds of the Printers' Pension Corporation will greatly benefit. I hope to be in your position this time next year."

Viscount Birkenhead, Lord Chancellor, who was to have responded to the toast, "His Majesty's Government," sent a message stating regretfully that urgent pressure of Government business in connection with the Irish Conference prevented his being present. The American Ambassador wrote expressing a hope that on some future occasion he might be able to attend the festival.

Lord Riddell proposed the toast of "His Majesty's Government," and Mr. Cecil Harmsworth, M.P., responded.

Sir William Waterlow, in proposing "The Printers' Pension Corporation," said the Corporation was started in a small way, but its growth had been steady and continuous. It provided almshouses and pensions, and one of the features of its benevolence was the War Orphans' Fund, out of which £10 per year was paid to the orphans of printers killed in the war, whether subscribers or not. Some 1,300 children were receiving benefit from that grant, thus absorbing £13,000 per annum, and the sum required yearly to cover all the benevolent grants and benefits was £32,000. The institution was controlled energetically and economically by men directly concerned in the printing trade. It was not only benevolent, but provident, in that those who became recipients of benefactions must have contributed in the past to the funds subscribed. It had been suggested that private benevolence had been killed by high taxation, old-age pensions, unemployment, etc. He did not think that was so, and he trusted it would not be so in our time. It would not be beneficial to the community in general if

benevolence were discontinued, and he trusted that trade charities like this would never be allowed to lapse. (Cheers.)

Mr. J. Thompson, chairman of the council, replied. It was announced late in the evening that the financial result of the festival was £27,094, which was a "record," excepting last year.

The health of the chairman was proposed by Mr. R. A. Austen-Leigh (president of the London Master Printers' Association) and Mr. T. E. Naylor (secretary London Society of Compositors).

Others present included: Mr. E. C. Austen-Leigh, Sir Robert Baird, K.B.E., Mr. Albert Bennett, Mr. J. Gomer Berry, Sir W. E. Berry, Bart., Mr. Alfred F. Blades, Alderman Sir G. Rowland Blades, M.P., Mr. H. C. Bolton, Sir Fredk. W. Bowater, K.B.E., Mr. W. M. Bower, Rt. Hon. C. W. Bowerman, M.P., Mr. H. Budd, Mr. W. Bullett, Mr. W. I. Burch, Mr. W. H. Burchell, Mr. H. B. Cahusac, Mr. A. H. Caslon, Mr. Chris. A. Caslon, Mr. Harold A. Caslon, Mr. M. A. Caslon, Mr. Ralph S. Caslon, Mr. S. H. Caslon, Col. J. Causton, O.B.E., J.P., Mr. Hildred L. Causton, Mr. A. Chadwell, Mr. Cecil Clay, Major Maurice Clowes, M.C., Mr. W. A. Clowes, Mr. F. H. Cole, Mr. F. T. Corkett, Mr. Ward Cox, Mr. Fred Cumbers, Mr. Sydney Cumbers, Mr. A. Dargavel, Mr. J. E. Dixon, Mr. C. J. Drummond, M.B.E., J.P., Mr. W. H. Eyre, Mr. R. B. Fishenden, Mr. A. E. Goodwin, Mr. David Greenhill, Mr. Oscar G. Griffith, Mr. A. G. Gronow, C.B.E., Mr. N. T. Hammond, Sir Cecil R. Harrison, K.B.E., Mr. G. Eaton Hart, Mr. W. E. Hebditch, Mr. A. Hewitt, Mr. F. Heywood, Mr. H. W. Howes, Mr. Edward Iliffe, Mr. C. W. Iveson, Mr. A. E. Jarvis, Mr. Hudson Kearns, Mr. J. J. Keliher, Mr. Alfred Langley, Mr. F. P. Lewingdon, Mr. G. Limbery, Mr. W. H. Lock, Mr. Jas. MacLehose, M.A., LL.D., Lieut.-Col. E. L. Marler, Mr. T. W. McAra, J.P., Mr. J. D. McAra, F.I.C.S., Sir Herbert E. Morgan, K.B.E., Mr. Joseph Mortimer, O.B.E., Mr. A. H. Munday, Mr. J. Mynott, Mr. T. G. Newland, Sir Frank Newnes, Bart., Mr. A. O'Connor, Mr. A. Oddy, Mr. P. M. Parrish, Mr. H. F. Parker, Mr. W. A. Perkins, Mr. W. J. Perkins, Mr. A. E. Reveirs, Mr. G. L. Reveirs, Mr. G. P. Reveirs, Mr. H. A. Reveirs, Mr. J. Miller Richard, Mr. J. R. Riddell, Mr. C. H. Roud, Lieut.-Col. N. G. Scorgie, O.B.E., LL.D., Mr. Geo. Sharvell, Mr. C. W. Shortt, Mr. Andrew Spottiswoode, Sir Arthur Spurgeon, Mr. Glen Steel, Mr. John Swain, Lieut.-Col. J. R. Truscott, D.S.O., Mr. John Walter, Mr. W. Warren, Mr. A. J. Waterlow, Mr. Edgar L. Waterlow, Colonel J. F. Waterlow, D.S.O., V.D., Sir Philip Waterlow, Mr. Philip Waterlow, Bart., Mr. E. W. Whittle, Mr. W. Whyte, and Mr. C. S. Yeates.

Mr. A. W. FOSTER, secretary of the Paper-makers' Association delivered an interesting address on the "Ideal Manufacturers' Association," before the trade association secretaries last week at the Trocadero. His discourse raised so many important points that, although the discussion continued to a late hour, it was decided to continue consideration of the paper at the next meeting.

## Some Aspects of Technical Education

The above was the topic chosen by Mr. J. R. Riddell, principal of St. Bride Printing School, in an address delivered before the members of the Printing, Bookbinding and Kindred Trades Overseers' Association at its monthly meeting, held at St. Bride Institute on the 1st inst.

Mr. Riddell, at the outset, said it had always given him great pleasure to get into contact with practical men, and to have a chat with them on questions relating to the printing trades, and also for the discussion which followed. It had often been said that technical education was the happy hunting ground of the theorist, and that remark applied to the printing industry was no exception to the rule.

### Necessity of Training.

His views were pretty well known, and even perhaps savoured of repetition, but he was convinced that efficient training in the printing industry was worthy of their earnest consideration. Without training you could not obtain efficiency, and without it you can never eliminate that waste in time and energy and materials which is so rampant in our workshops to-day.

The craft they represented was just as capable of development as any other vocation. Printing was one of the oldest of the arts of civilisation, and by consistent perseverance and patience it was their duty to emulate the principles of the early printers who by personal effort overcame seemingly insurmountable difficulties.

If the principles of a cost-finding system were applied to the training of apprentices very few of them would be found a paying proposition to a firm, in view of the spoilages and reduced output that necessarily arise in the course of the boy's training. The apprentice was the life blood of our industry, and he suggested that any who unnecessarily limited the infusion of new blood were taking the readiest means to make that industry a C3 industry.

Mr. Riddell submitted that the interest and enthusiasm for technical education had not taken place before they were due. Nothing can be so advantageous to the boy as systematic training, enabling him to understand the principles of his craft and what is expected from him. How many apprentices are instructed in such a manner as to eliminate the appalling waste seen in many of our workshops? He contended that beside a workshop training it was necessary to have a supplementary training, and he emphasised the fact that that can better be obtained through a technical school, when its work is arranged to meet the needs of the craft, than anywhere else.

### Needs of the Technical School.

A technical institute must be equipped and controlled by those who have a knowledge of present day requirements. In the past tech-

nical institutes had been catering for particular sections of the trade; further, there was no bookbinding school to-day in London that met their special needs. It was up to them to see that their branch of the trade was represented when the new technical school was got going. There was a time when there was a large amount of indifference to technical schools and their work. He admitted that at one time they got into the hands of what is generally known as faddists, and they were reaping the effects of those times to-day.

Mr. Riddell said such associations as theirs could help forward the apprentice. The training of the boy at the age of 14 to 16 was a different proposition from that of the youth of 17 to 20. The incompetent journeyman was the outcome of the insufficiently instructed apprentice. For this the employer threw the blame on to the union, and the union threw it back on the employer. At St. Bride they believed in not only giving the boy a good technical training but in helping him to build up a character for himself. They tried to get him to recognise his responsibilities, not only to his firm but to himself. They also believed that unless he was a good citizen he could never make a really good craftsman. The preliminary courses of training before lads entered the workshop were a paying proposition to any firm to adopt; he admitted it was not utopian, although he would say that the results obtained from the training given to the students to-day was a very potent force.

### Technical Training in Germany and U.S.A.

Speaking of technical training in Germany, Mr. Riddell said whether we liked it or not we had to confess that our late enemies were in such a position before the war that they had very few rivals in the world. No German firm can take an apprentice unless the employer or his manager holds a master's certificate qualifying him to train a boy. Their comprehensive technical system of training was patent to all who visited Germany. It was a striking fact to consider the words of a well known German education minister, who, questioned by an Englishman as to who paid for all their fine technical buildings, said that England mainly paid for them by buying the products of the men who had been trained there. Then in the United States technical education was going ahead.

Speaking of the equipment of the technical school, Mr. Riddell said it did not always follow that the schools with the largest equipment and most extensive curriculum did the best work. It was the atmosphere of the place which was the chief factor of success.

### Adverse Criticism.

Mr. Riddell, in concluding, pleaded that before any adverse criticism against technical institutes was indulged in, a personal inspection—of which he invited them all to avail themselves—should be made so that first-hand information could be obtained regarding the nature of the work that was carried on.

**Discussion.**

Mr. Chris. Atkins, in opening the discussion, after paying a warm tribute to the lecturer, spoke of the dangers attaching to the limitation of apprentices. In regard to technical education it was a very desirable thing, he thought, and especially was it required in the binding section of the trade. Speaking of the premium system, Mr. Atkins thought it was not altogether satisfactory, especially when a boy was apprenticed to a "cock-robbin" shop, and where the training was secondary to the premium.

Mr. Rutherford gave personal testimony as to the value of technical education, and as one who had control of a large platen machine department thought that that department had not in the past had sufficient representation in the curriculum at technical schools. If the best results were to be obtained from the instruction given in composing, cylinder machine, electro and stereo, etc., departments, the last processes in the operations of the work, namely, the platen machine, should also receive more attention.

**Income Tax Assessments for 1921-22.**

SIR,—Assessments have now been made and served in practically every part of the country, and any who consider their assessments too high must give notice of appeal within 21 days of the date thereon, failing which the assessment becomes binding.

We find that a **great number** have this year been made without allowing the very substantial abatements to which the taxpayer is entitled. This omission arises, in most cases, through the taxpayer not having made his claim in proper form.

Claims and abatements may now be made in respect of earned incomes, personal allowance, house keepers, children, dependent relatives, life assurance premiums, and with regard to the reduced rate of duty on the first £225 of taxable income.

May we also point out that where the income is derived entirely from investments very substantial repayment claims can be made. In some cases the amount so claimed will be over £70 for each year. This is increased where there are children under 16 years of age, and where life assurance premiums are paid.

We shall be glad to advise any of your readers (free of charge in the first instance) as to whether or not, and to what extent they are entitled to make these claims, providing they give us particulars of their income.

Yours, etc.,

D. THOMLINSON,

Secretary, Lancors Limited.

Swan Chambers,

Cophthall-avenue, London, E.C.2.

**Gazette.**

**A WORD OF CAUTION.**

In giving the official Gazette information, it must be distinctly understood that we take official records as we find them, and accept no responsibility for inaccuracies, while, as an almost invariable rule, the facts will be found correct. We advise our readers, before forming hasty judgment, to consider that there may be in each case satisfactory explanation which does not appear on the records.—Ed.]

**ENGLAND AND WALES.**

**PARTNERSHIP DISSOLVED.**

Henry Arthur Tebble and Hamilton Cleland, printers, tin box manufacturers, Chrispin's Wharf, Marshgate-lane, Stratford.

**THE BANKRUPTCY ACT, 1914.**

**RECEIVING ORDERS.**

Wilfred Webster, 25, Nelson-street, South Bank, Middlesbrough, Yorks, stationer. November 3rd. Newport (Mon.).

Gordon Good (trading as G. Good and Co., and as the Fac-Sim Letter and Advertising Service), The Arcade, 85, Lord-street, Liverpool, contractor. October 31st. Middlesbrough.

Replies to Box Nos. to be addressed to the Offices, "BRITISH AND COLONIAL PRINTER AND STATIONER," 58, SHOE LANE, LONDON, E.C.4.

**SPECIAL PREPAID ADVERTISEMENTS**

Telegrams: STONHILL, FLEET, LONDON.  
Telephone: No. 8407 CITY.

**Miscellaneous.**

**EXCEPTIONAL OPPORTUNITY.**—SMALL PRINTING BUSINESS in Sussex town, £1,800, going concern; freehold premises including house could be purchased cheaply; mortgage arranged.—Particulars from F. Colebrook, 146, Fleet-street, E.C.4. 13866

**PRESS CUTTING AGENCIES** in South Africa, India, New Zealand, and other important Colonies are requested to communicate with Advertiser.—Box 13864.

**Machinery Wanted.**

**WANTED, ONE GUILLOTINE** (New or Second-Hand), Power-driven, similar to a Paper Cutter with a blade about 55-in. long; complete specification and illustration required, and state where machine can be inspected.—Apply, Box 13867.

**TENDERS.**

H.M. STATIONERY OFFICE.

**TENDERS**, to be delivered before noon on Monday, 21st November, 1921, are invited for a contract for the supply of Boxes (millboard, strawboard and wood, covered with cloth, etc.).

For particulars apply to the Controller, H.M. Stationery Office, Princes Street, S.W.1.

## Machine Making Dust-Proof Cartons.

### Important New Model Demonstrated.

To a select gathering of representatives of the printing and allied trades a demonstration was made on Friday last of a machine that has features which point to startling speeding up and cheapening of the production of printed cartons or bags, these being so designed that they are not only dust-proof, but can be made waterproof as well. The demonstration was made on the premises of Messrs. Henry Drysdale and Co., of Goswell-road, Mr. Henry Drysdale being the inventor of the machine.

The new carton-making machine which was seen in operation, has two feed reels, one for the heavy paper or card of the carton, and the other for the lining paper. The heavier paper, on a reel at the extreme end of the machine, is fed through suitable rollers, and subjected to the first operation of slitting for the folding ends of the carton and creasing for the folds. The second operation is the gumming of the paper on its under side, the gum being applied with very careful registration, so as to be placed only on small selected areas. The heavier paper, after cutting and gumming, next passes over the lining paper, which is fed from beneath the machine, and the latter is pressed upon the gummed surface of the upper paper, whilst at the same time the operation of creasing the lining is performed. Then the double carton paper, cut and creased, passes through printing units whereby the necessary printing, in one or in several colours, is effected, and finally the separate lengths for the cartons are cut off and delivered.

Very careful arrangements are made for keeping the papers properly tense during their passage through the machine, and the provision for exact registration in all the processes is claimed to be remarkably accurate.

Thus the one machine performs all the operations required from the delivery of the raw material on the reel up to the production of the finished cartons or bags in a condition such that they require only to be folded and stuck before filling.

The output per machine is stated to be about 70,000 per eight-hour day. Three attendants per machine are required.

An important feature to notice is the cutting of the outer paper before the lining is applied, thereby avoiding any slits in the lining, with the result that the ends close in so as to give a remarkably secure closure, which, if special lining paper is used, renders the finished bags or cartons waterproof as well as dust-proof.

The sponsors of the invention assert that the users of these cartons can save anything from 10 per cent. to 25 per cent. in packing, in addition to saving about 10 per cent. in the purchase of the cartons. In the manufacture of the cartons a 50 per cent. saving is claimed,

as the carton or bag and its lining are made at one operation, not separately as hitherto. Much work is obviated as compared with the usual method of production from sheet, involving separate operations for guillotining, cutting and creasing, stripping off waste, gluing, and printing in different colours.

A further notable feature of the new process is that the cartons are produced all of one size to perfect register—male and female dies being embodied in the machine—and so are well adapted for automatic packing, as is not the case with the products of the ordinary processes.

The Drysdale machinery, by the way, is admittedly suitable only for long runs—not less than about a million. But for firms able to undertake such runs immense advantages are promised.

We understand that a company has been formed to take over from Mr. Drysdale the rights in the invention, in respect of which patents have been applied for in the principal countries of the world. The company's primary intention is to manufacture bags and cartons, not to sell the machines to manufacturers. A London factory is already in course of equipment, and is expected to be in operation about the end of the present year.

## Reorganisation of Weldons, Ltd.

Notices have been issued calling meetings of shareholders to consider and if thought fit approve certain arrangements with regard to the directors of Weldons, Ltd., and the retirement from active management of Mrs. Weldon Fox and Mr. E. M. Weldon. In a circular it is stated that the other parties to the agreement are Sir William Berry and Mr. J. Gomer Berry. The agreement indicates among other things that the capital of the company is to be increased by 100,000 deferred shares of 1s. each, to be subscribed and paid for by Messrs. Berry at par, and to carry one vote per share. The rate of dividend on preference shares is to be increased from 5 to 6 per cent. and ordinary shareholders will receive a cash bonus of 5s. per share. Further, each ordinary share is to be converted into a preferred ordinary share carrying a fixed cumulative dividend at the rate of 14 per cent. per annum guaranteed for seven years by Messrs. Berry. The present board is to retire. The managing directors to receive retiring allowance equal to two-thirds of their average remuneration for the past four years and the chairman a retiring bonus of £1,000.

THE fourth annual concert in aid of the War Memorial Fund for the Roll of Honour associated with the Caxton Convalescent Home, Limpsfield, will be held at the Central Hall, Westminster, S.W., on Saturday, November 12th. A fine programme has been arranged under the direction of Mr. Percy Newport.

# New Inventions.

## Folders for Web Printing Machines.

According to an invention, patented by Mr. E. W. Smith, a web printing machine is provided with two longitudinal folders arranged in the same or parallel planes to permit the web to receive two longitudinal folds in succession, and a transverse folding and cutting apparatus to which the web may be led from either longitudinal folder. As

shown, the web *d* passes over a folder *a*, round guide-rollers *e*, *f* and over a turning bar *g* to a second folder *c* in the same plane as the folder *a* and thence passes between guide rollers *j*, *h* to transverse cutting and folding apparatus *b*. The apparatus *b* is mounted immediately beneath the folder *a* so that if desired, the once folded web may pass directly thereto.

## Feeding Sheets.

According to a patent in the names of Payne and Sons (Orley), Ltd., E. Stott and Dawson and Sons (Orley), Ltd., sheets are separated and fed from a pile by means of a suction or like separator which bends the edge of the top sheet and raises it to allow a flexible tray or platform carried by bars on a pair of endless chains to pass between the top sheet and the pile, the sheet being deposited on the tray when the suction is cut off. As shown in Fig. 1, the trays are formed of steel or other flexible tapes *28* attached to bars *27* carried by chains *26*, which pass over sprocket-wheels *24*. The top sheet of a pile is acted on by a set of suction nozzles *3* on a shaft *2* carried by arms *4* fitted with studs *6* mounted

in levers *5* which are formed with rollers *9* acted on by cams *10* to depress the suction nozzles on to the pile and lift them with the top sheet adhering to permit a tray *28* to move under the top sheet. The shaft *2* is rotated to bend up the edge of the sheet by means of a connecting-rod *12* and a lever *13* with a roller *15* acted on by a cam *16* on the shaft *11*. A gripper *17* may co-act with the nozzles *3* to lift the top sheet, this gripper being actuated by a cam *23* on the shaft *11*. As shown, the separated sheet is carried by the tray *28* until

it reaches stops *29* which stop the sheet so that it falls through an open space between the cross bars *27* on to feed-table *30*. Instead of lifting the separator from the pile, the pile-table may be dropped after the sheet is held by the separator. The chains *26* are driven by a continuous or intermittent drive. In a modification the chains *26* are caused to travel downwards and around the pile, the separated sheet passing from the trays *28* into guides which direct it into forwarding rollers, or on to forwarding bands or tapes.

## Inking Apparatus.

In an invention patented by Messrs. J. H. Butler, T. E. Phythian, and J. Shaw the pressure of the ductor blade upon the fountain

roll of an inking apparatus is adjusted at various positions along its length by devices operated from a distant point through Bowden or other wire connections. As shown, the

inner member *a* of a Bowden wire is connected at one end to a member *b* operated in either direction by a screw *d*, and at the other end to a pivoted member *f* bearing upon the inclined end of a plunger *g* engaging the

ductor blade *i*. When the screw *d* is turned to release the pull on the wire *a*, the parts are returned to normal position by the spring of the blade *i* or a separate spring may be provided for this purpose.

# Waste in the Printing Trade.

**Mr. W. Howard Hazell and Mr. George A. Isaacs Tackle  
the Urgent Problem of Improving Printing Office Efficiency.**

A good deal of interest has been aroused in the trade by Mr. E. J. P. Benn's article on "The Printing Trade's Opportunity," published in our issue of September 22nd. In that article, it will be remembered, Mr. Benn represented that the printing industry, as compared with other trades, was the least affected by the general breakdown of business and the economic chaos which have followed the war. He stated that "the printing trade to-day is crammed full of waste," and suggested that this waste is largely responsible for the high prices for printing and for the consequent slump. As alleged specific instances of waste, Mr. Benn pointed on the one hand to misuse of the employers' Costing System, and, on the other hand, to restriction of output due to trade union rules prescribing exactly what every man may and may not do—of which restrictive rules, he said, every reader would be acquainted with a hundred illustrations.

## **The Costing System and Waste.**

From Mr. W. Howard Hazell, the well-known chairman of the Cost and Charges Committee of the Federation of Master Printers, we have received a communication by way of reply to Mr. Benn's article, the principal point dealt with being the relation of the Costing System to waste in printing offices. After controverting the idea that the printing trade is little affected by the general depression and dislocation of trade following the war, Mr. Hazell expresses the opinion that our trade cannot recover its prosperity until industrial conditions generally become normal, but he goes on to indicate that much can be done to stimulate demand for printing by reducing its cost. To this end an increase of efficiency is essential.

"Efficiency," writes Mr. Hazell, "in its broadest sense, means producing in the best way, in the shortest time, and at the lowest cost, the article that the consumer is most anxious to buy. In the printing trade much can be done by all connected with the industry, whether they be the inventors of new machines, directors, managers, overseers, or craftsmen. Each has his own responsibility for increasing the efficiency and the output of the printing trade. One of the most potent influences of recent times in this direction is the Costing System which has been adopted by the Master Printers' Federation, and which, when rightly used, is invaluable to the master printer. When the real cost of every process in printing is found, the master printer will have many opportunities of reducing the cost by abandoning worn out and obsolete machines, improving his methods, and checking waste of various kinds. Unless careful records be kept, it is impossible to find out which machine or department is in an unsatisfactory condition; but with the Costing System it is possible to know exactly when it is best to discard an old machine and put in a new and expensive one, where the waste of material or time occurs, and how much unnecessary expense is incurred by picking for sorts or waiting for material, etc. It is to be regretted that all the master printers in the country have not already installed the Costing System in their works. If they had, it would have been of inestimable benefit to them individually, and collectively to the whole trade. Printers, whatever their political beliefs may be, are apparently most conservative when dealing with the organisation in their factory, and are not as willing to adopt new methods and ideas as American printers

are, and in order to help those printers who have not yet adopted the standard methods, the Costing Committee have published figures showing the average cost of production in the various processes in different districts. When master printers are paying the same wages, the same local rates and prices for paper, machinery, etc., the difference in the cost of production cannot be very great, and any variation is largely due to better plant and organisation, and to a steady flow of suitable work; but with these average hourly rates before him, a master printer has an indication as to whether his factory is above or below the average efficiency. If his own hourly costs are above the average of the district, he needs to examine his methods to find out where he is at fault. If, on the other hand, his rates are slightly less than the average, he may be thankful that his methods and organisation are so good. It must be obvious that the best methods of cost-finding would appeal to the firm who believe in having the best equipment in machinery and plant, and as the Federation Costing System is being used by firms who are up-to-date in other directions, the average costs ascertained from the figures supplied by these firms will be actually lower than in works ill-equipped and badly managed. Every printer who has installed the System has found these great benefits are the outcome of its adoption.

"The cost of printing is one of the items that affects the cost of living. Any reduction in the cost of printing has two effects. It stimulates the demand for printing, and will help to lessen unemployment, and at the same time have some effect on the cost of living. Unemployment and the high cost of living are the two great problems with which we have to deal at the present time, and anything that can be done to improve these conditions deserves the most careful attention and hearty support of everyone. We have suffered from seven years of war with all its far-reaching and damaging effects upon our industry. We need to improve the efficiency of the trade by better methods, higher outputs, by reducing the waste of human effort, time or material, and by improving the training of the younger craftsmen. This cannot be accomplished by the stroke of a pen, or by the efforts of a few individuals. It is work for the multitude, and if each one does his part—master printer, craftsman, salesman or learner—here a little and there a little, they will have the satisfaction of knowing that they have helped to resuscitate the printing industry."

#### **T. U. Rules: Mr. Isaacs' Challenge.**

Mr. Benn's strictures upon the effect of trade union rules in cutting down output are dealt with by the vigorous pen of Mr. G. A. Isaacs, general secretary of the National Society of Operative Printers and Assistants, who writes, in the current issue of his society's monthly journal, as follows:—

"After stating that there is very little *canny* in the true sense of the word, Mr. Benn says: 'Every printer does his best within the rules; but the rules are the trouble.' Now this is mere generalisation, and I am sure that

the argument would be strengthened if Mr. Benn quoted any of the rules of any of the societies that tend to lowering of production. I now offer to give a copy of our rules and our working agreements to Mr. Benn in the hope that he may point out any such tendency in any of our working conditions. He refers to 'a hundred different rules which prescribe exactly what every man is to do and exactly what every man may not do.' I am afraid that at this point Mr. Benn's enthusiasm overran his discretion, and with my general knowledge of the printing trade, I would suggest that he could not find 25 rules in all the union rule books combined, much less 100 of this nature. If they are there I agree that there is need for investigation, but I ask that particulars be given before we condemn or criticise.

#### **A Suggestion re the Machine-Room.**

"Mr. Benn then goes on to make some reference to the machine department, with which we are especially associated. He says: 'The other night I found a labourer asleep under a machine whilst a minder was putting in four hours' work preparing for a run.' Mr. Benn, you are here committing offences which, in the opinion of every self-respecting printer, would warrant your being taken out and 'shot at dawn'! Out of kindness to you, I presume by 'labourers' you mean 'machine feeder,' who is, of course, a highly skilled workman, and by 'minder' you mean one of our friends, the 'printing machine managers.' May I state here that there is no doubt as to the skill required by the machine feeder, for all the art of the make-ready would be wasted should the feeder feed his sheets the merest fraction of an inch out of register. I would like to know the firm where they permit a feeder to go to sleep whilst the machine manager is making ready. As a rule, the machine manager finds plenty of odd jobs—and not pleasant jobs at that—for the feeder to do during this period. At the same time, I agree with Mr. Benn that the time of the feeder could be better occupied than it is at present during the making ready process.

"Mr. Benn's remarks are prompted by a visit he paid to America. My reply is prompted also by a visit to that country. There are many reasons why output should be improved and the cost of production reduced. I now venture again to emphasise the view I have previously advanced that the time occupied in 'making-ready' can and should be considerably reduced by abolishing our obsolete and senseless system of apprenticeship. Personally, I do not advocate the abolition of apprenticeship as such, but merely our present method and system. The American method of training in press-rooms is that the feeder is assistant minder. He learns the trade as machine manager by actual assistance in the making-ready. By this method the wicked system of letting a boy pick up things for himself is avoided, and the making-ready time is reduced by nearly one half. I venture to assert, further, that the American method turns out more efficient craftsmen.

"If Mr. Benn's article has the result of in-

ducing the master printers and the Trade Unions concerned—the T.A., L.P.M.M., S.T.A., and Natsopa—to seriously consider this question, much good may arise. By common agreement a change such as this could be brought about without damage to anybody now engaged in the trade, and without detriment to those to be brought into the trade in the future, but with a certainty of better opportunities for all. Without injury to the wage scales it would improve production, lessen the cost of the finished article, make it possible to obtain greater efficiency and, in my opinion, eventually result in higher wages."

---

### CAMBRIDGE

## Printing Quadricentennial.

### A Notable Celebration.

The 400th anniversary of the Cambridge University Press was celebrated on Thursday the 10th inst., by a dinner given in the hall of Corpus Christi College by the Vice-Chancellor of the University and the Syndics of the Press and attended by a distinguished gathering of printers, publishers and literary men. Notable among the visitors were representatives of the Clarendon Press, headed by Dr. Farnell, Vice-Chancellor of the University of Oxford.

The Vice-Chancellor of Cambridge presided, and the company included: Sir Frederick Macmillan, Mr. C. R. Rivington (Master of the Stationers' Company), Dr. James MacLehose (Glasgow University Press and president of the Master Printers' Federation), Mr. Geoffrey Williams (president of the Publishers' Association), Mr. H. W. Keay (president of the Booksellers' Association), Mr. W. R. Codling (Controllor of H.M. Stationery Office), and Mr. S. C. Roberts (author of the history of the Cambridge University Press reviewed on another page).

The menu card was designed in the style of a 17th century title-page, and contained reproductions of title-pages of the second Cambridge book, the title-page of the "The Temple," 1633, and the ornament used by Joseph Bentham, 1748, as well as a chronological table of the principal work of the Press from 1521 to 1921. The menu itself comprised some apt titles to the dishes, such as "consommé Richard Bentley, kedgerie St. Benet, cochon de lait Bob Collier, sorbet julep Mat Prior, canard sauvage à la Pitt Press (e), gâteau John Siberch."

The toast of the Cambridge University Press was given by the Vice-Chancellor of Oxford, who delivered a message of fellowship and congratulation from the Sister University.

In reply, the Vice-Chancellor of Cambridge thanked Dr. Farnell for the wishes he had brought from the splendid Clarendon Press, and for the assurance that there was no real rivalry between the two Universities. He mentioned that it was to a former master of

Corpus and Vice-Chancellor to whom over a hundred years ago the important letter of the Marquis Camden was sent saying that the subscribers to the Pitt Memorial had some spare cash in hand which they would be glad to hand over to provide a home for the University Press.

Professor W. R. Sorley, Litt.D., Vice-Chairman of the Syndics of the Press, proposed "The Visitors," and it was responded to by Sir W. Ellison-Macartney (Master of the Drapers' Company).

Sir Frederick Macmillan, who also responded, mentioned that he first learned the art of type-setting at the Cambridge University Press, and at length achieved the glory of being able to set up an examination paper in Greek with all the accents complete. (Laughter and cheers.) His experience at Cambridge gave him a taste for beautiful printing, and he acknowledged the service the Cambridge University Press had rendered to the art of printing. (Cheers.)

---

## Allied Trades and Sport.

Under the auspices of the Printing and Allied Trades' Charity Sports Association, Miniature Rifle Section, a highly successful concert was held on Saturday evening at the Hotel Cecil. Mr. E. H. Raynham (Edward Lloyd, Ltd.), presided over an excellent gathering.

The concert had a two-fold purpose—to present the cups and prizes won during the past season, and to help the Printers' Pension Corporation. For the benefit of the latter institution over £700 was raised, Mr. Frank Lloyd heading the list with a handsome donation of 500 guineas.

During the evening Mr. Raynham presented the awards. The winter (1920-21) competition for the *Telegraph* Cup and the Dewar Shield was won by the John Dickinson Rifle Club team, with Messrs. W. H. Smith and Sons' team as runners up. In the summer competition for the Paper Workers' Cup, first place was taken by *The Times* Rifle Club Team, with John Dickinson second. The Printers' Bisley, 1921, was held in the Wimbledon Park Range in September, *The Times* men carrying off the *Field* Challenge Shield, and Messrs. W. H. Smith and Sons' team the Walter Haddon Challenge Cup. The Championship of the printing trade for the *Sportsman* medals was won by Mr. A. D. Neville (gold medal), with the score of 299 out of a possible 300. The runners up were Mr. J. G. Phillips (silver medal), 295, and Mr. W. Beck (bronze medal), 295.

During the evening a full and entertaining concert programme was presented, and at the close a cordial vote of thanks was passed to the chairman on the motion of Mr. Chas. Rudd, seconded by Major Acland, M.C.

---

AN Advertisement is always working.

## Printers' Roll of Honour.

The fourth annual appeal of the Committee of the Caxton Convalescent Home, Limpsfield, on behalf of the Roll of Honour Fund in memory of the men and officers connected with the printing and allied trades who fell in the war is meeting with success. The Memorial Screen, containing 2,559 names, has been placed in the War Memorial Wing at the Home and is constructed of English oak,

S.W. Among those present were Mr. C. J. Drummond, M.B.E., J.P. (president), the Rt. Hon. C. W. Bowerman, M.P. (treasurer) and Mr. S. J. White (secretary of the Home).

### The Artistes.

A lengthy programme was submitted under the able direction of Mr. Percy Newport. The excellent array of talented artistes included: Miss Mollie Convery (soprano), Miss Cissie Simmons (contralto), Miss Rene Kirby (soprano), the Etruscan Quartet, Miss Madge Macklin and Mr. Hal Garnham, Mr. Bewhay (cornet solo), Messrs. Stockvis, Rex Harold,

**Memorial Room, Showing Roll of Honour.**

being 18 ft. 9 in. long and 9 ft. 6 in. in height. In order to defray the cost entailed in the work the committee are confident that the sum of £500 still required will be forthcoming by December 17th, the closing date of the appeal. With regard to the Memorial Wing itself, £6,700 has already been subscribed, and we understand that a further £2,000 has still to be raised. After making another appeal for this latter figure the committee are hoping at the end of the current year to hand the Memorial Wing over to the Caxton Home Committee free of debt.

Apart from the generous donations already made by many well-known gentlemen the fourth annual concert appeal was well responded to on Saturday afternoon when members of the printing and allied trades gathered in large numbers at a very successful concert at the Central Hall, Westminster,

George Gudgeon, Fred Masters (humorists) and Maurice Charles (humorous cartoonist).

The programme was preceded by an organ recital given by Mr. Wm. Rayment Kirby, Mus. B.F.R.C.O.

THE Federation of British Industries has issued an instructive booklet describing the British Samples Room which they are inaugurating in Brussels. The primary object is to support and assist all existing means of promoting the sale of British goods, and to carry it out a company has been formed under the title of British Samples, Ltd., for which the Federation has consented to Act as British agents.

WHEN you're "on the road" don't get side-tracked.

## Presentation to Sir J. J. Baddeley.

The connection of the new Lord Mayor of London with the printing industry—to which attention was drawn in last week's issue—lends special interest to the illuminated address and album presented to Sir John James Baddeley at the Peel Statue at the junction of Cheapside and St. Paul's Churchyard on his progress through the city on Lord Mayor's Day.

The album was beautifully illuminated by Mr. C. W. Norris (of 34, King street, Cheap-side), the well-known illuminator, who has executed many civic addresses of this kind. On the title page were the arms of the City; those of the recipient encircled by his chain of office; and also the arms of the three guilds of which he is a member. The address itself, occupying three pages, followed by two pages signed by members of the Ward, was comprised in a rich binding of Indian red Cape Levant morocco, with purple silk ends.

The address first expressed to Sir John Baddeley "heartly congratulations on the attainment of the highest civic honour as Chief Magistrate of the First City of the Empire." It then continued: "You have represented this Ward as its Alderman for nine years and during that period by your efforts for the good of the Ward, and by your unfailing geniality and courtesy to its individual members, you have secured a lasting place for yourself in the hearts of its inhabitants." The address proceeded to express great appreciation of, and confidence in, the new Lord Mayor and concluded with the assurance that during his trying and strenuous year of office he would have with him the heartfelt good wishes of the inhabitants of his Ward. The address bore sixteen signatures on behalf of the inhabitants and ratepayers of the Ward of Farringdon Within.

## Trade in Printing Type.

**EXPORTS.**—During October, 21 tons were imported of printing type of the value of £7,164, compared with 19 tons (£7,405) in October, 1920, and 42 tons (£7,584) in October, 1913. For the ten months ended October, 1921, the amount exported was 254 tons (£94,028) as against 214 tons (£64,004) in the corresponding period of 1920 and 462 tons (£78,243) for the ten months of 1913.

**IMPORTS.**—Only one ton of printing type was imported during October, of the value of £717, as against the same figure for October, 1920, of the value of £732. In October, 1913, 11 tons were imported, of the value of £1,639. The imports during the ten months (January-October, 1921), amounted to 25 tons (£12,509), as against 22 tons (£8,381) for the corresponding period of 1920. In the ten months of 1913 there were imported 57 tons, of the value of £9,758.

## Visit to Leeds University.

Some 350 persons engaged in the printing industry spent an enjoyable afternoon on Saturday, November 5th, at the University of Leeds. Both employers and employed were represented, and, but for the necessity of imposing a limit on the numbers, the party of visitors would have been twice as large. The Department of Textile Industries, which was built, equipped and endowed by the Cloth-workers' Company of London, and which is unrivalled in its own branch of study, was thrown open for the occasion and Professor Barker and his staff demonstrated some of the processes comprised in the scheme of instruction and displayed a variety of models and patterns. The visitors also had an opportunity of inspecting a unique collection of exhibits which had been brought together for the purpose of illustrating the study of Yorkshire, and which were explained by Mr. C. B. Fawcett, Reader in Geography, and Dr. A. Gilligan, Reader in Petrology.

The party was received in the Great Hall by the Pro-Chancellor of the University (Mr. E. George Arnold) and the Vice-Chancellor (Sir Michael Sadler), who were accompanied by Principal R. E. Barnett, of the Leeds Central Technical School. In the course of an address, the Vice-Chancellor gave a general description of the history, the aims and the many-sided activities of the University, which, in spite of its rapid growth, was still in its infancy. He explained that the University contained forty separate departments of study, with over 1,600 full-time students on its books, and that it was therefore impossible in one afternoon to see more than a small part of it. He went on to speak of the possibilities of a well-articulated system of education—such a system as we were now beginning to build up in the great industrial district of the West Riding, and the importance of maintaining the Universities—the crown of this educational system—in the highest state of efficiency. It would be better, he said, to close the Universities than to allow them to fall below their present high level.

A vote of thanks to the University, and to the Vice-Chancellor for his address, was passed on the motion of Mr. G. F. Storey, vice-president of the Master Printers' Association, seconded by Mr. J. J. Brailey, president of the Leeds Branch of the Printing and Kindred Trades' Federation.

At the conclusion of the visit, the party was entertained at tea by the University in its Refectory.

FROM Dean's Rag Book Co., Ltd., Elephant and Castle, S.E.1, we have received a well-produced catalogue giving particulars and prices of the wide range of rag books produced by this firm, whilst information is also included regarding toys and other novelties.

# “SLOGGER”

## AUTOMATIC SHEET FEEDER

### Latest Improvements on the “SLOGGER.”

1. Aluminium Stroker Arms avoiding all bending.
2. More accessible Pile Raising Adjuster. Absolutely self-locking. No lock nuts to work loose.
3. Automatic side lay giving perfect register.
4. Fine thread Caliper Adjustment which immediately stops machine and feeder if two or more sheets are stuck
- 5, 6 & 7. Stopping, Starting and Trip Handles. All controls in one place.
8. Bevel Drive instead of Chain.
9. Fan for air draft mounted in one unit on Base of Feeder.
10. Leather collapsible joint to allow air-box movement without the use of perishable rubber.
11. Air throttle control adjusted in a few seconds for any thickness of paper or board
12. Pile Raising Handle for raising pile to starting height at the commencement of each loading.

### BRITISH THROUGHOUT.

**Perfect Automatic Register. No continual re-loading.**  
**Can be attached to any make of sheet-fed press or folding machine.**

# Trade Notes.

IN the offices of Messrs. Clare's Printing Works, Ltd., Wells, the installation of a new Lanston Monotype was marked on Saturday morning by an interesting ceremony, at which the Mayor of Wells officiated.

THE next series of monthly lectures commences at St. Bride on December 2nd, when Mr. George Eaton Hart will give an address entitled "A Printer's Rambles in the United States." The Right Hon. Lord Riddell will take the chair.

A FAILURE of the electric current occurred in a part of London on Sunday afternoon, and newspaper workers, both on editorial and mechanical sides, in the Fleet-street area had to be content with candle light for nearly three hours. The seat of the trouble was a cable inspection box on Blackfriars Bridge.

A MEETING of the East Anglian Alliance was held at Cambridge last week and matters of policy discussed which will be put before the next meetings of the Federation Council and of the Joint Industrial Council. Dr. J. MacLehose, Lieut. Col. H. Rivers-Fletcher, Mr. R. A. Austen-Leigh and Mr. A. E. Goodwin were among the speakers.

WILLS.—Mr. Robert Stirling, Pollokshields, Glasgow, who spent the whole of his professional life in the service of Messrs. Thomas Murray and Sons, printers and publishers (died on August 6th, aged 83 years), £15,603; Mr. H. J. Jennings, of Chingford, Essex, for 18 years editor of the *Birmingham Mail*, afterwards editor of the *Financial News* (died in October, aged 78 years), £454.

WITH due simplicity and reverence, a memorial tablet to the employees of Messrs. Iliffe and Sons, Ltd., of London and Coventry, who sacrificed their lives in the Great War, 1914-1918, was unveiled on Saturday at the Vicar Lane Works, Coventry. The ceremony, which was of a very impressive character, was largely attended, the whole of the departments of the firm being fully represented. Relatives of those whom the memorial commemorates were also present.

MONOTYPE USERS' ASSOCIATION.—A meeting of the national committee of this association was held last week, when a lengthy discussion took place on the present cost of monotype composition. Detailed figures for all grades of towns in the country had been prepared and thoroughly examined by Mr. A. E. Goodwin and Mr. A. Williamson, also by Mr. S. A. Penny who was thanked by the committee for the trouble he had taken in the matter. It was decided to publish the result of this inquiry at an early date to all the members of the association. Arrangements were also made for a conference with the Typographical Association with regard to caster attendants. The secretary, Mr. Goodwin, reported that steps were being taken to bring before the railway companies the objections to the new classification for monotype paper.

THE London Press Golfing Society met the Engineering Golfing Society at Denham (Bucks), yesterday.

THE death occurred last week at Conway of Mr. Arthur Jones (of the firm of R. E. Jones and Brothers, publishers).

THE *Bolton Journal* has this month celebrated its jubilee, the first number having been issued on November 4th, 1871.

THE Rome strike ended on Monday, work being generally resumed throughout the city. All the newspapers, even the evening editions, are appearing as usual.

THE type and other articles seized when the Sinn Fein journal, the *Irishman*, was suppressed in August, 1919, were on Monday returned by the police to the printers.

A NEW daily political paper, to be published in Paris, to voice the views of M. Clemenceau. The paper is to be called *Le National*, and the first number will appear on December 10th.

GATESHEAD Council, at a meeting on Wednesday of last week, rejected a suggestion that they should have reports of their proceedings printed. The cost of printing was the ground for rejection.

MANY resolutions directed towards the more full and inexpensive interchange of news throughout the world were passed at the World's Press Congress at Honolulu, which ended on the 20th ultimo.

IN reviewing a contract for printing and stationery with Messrs. J. W. Todd, Ltd., the Sunderland Board of Guardians have stipulated for an all-round reduction of 10 per cent. off prices as charged at June 30th, 1921.

WITH regard to the report, in our November 3rd issue, of the opening of the "Fryotype" Cot at the Lloyd Memorial Home, our attention is called to the fact that Mr. A. Wills is assistant works manager (not manager) of the Whitefriars Press.

AN interesting step toward the closer linking of his school with the printing industry is being made by Mr. H. H. Holden, headmaster of the Cheltenham School of Arts and Crafts, who is meeting local master printers and printing workers to discuss the matter.

THE *Birmingham Mail* last year raised over £20,000 for the Christmas Tree Fund for charitable causes. This year it hopes to raise a much larger sum in order to provide free canteens for breakfast and dinner for distressed ex-service men, 10,000 pairs of boots for poor children, and 6,000 family dinners on the Eve of Christmas Day.

EARLY on Monday morning the barking of the house-dog aroused the family of Mr. H. Law, stationer and bookseller, Hill rise, Richmond, and it was found that the premises were on fire. The alarm was given, and the fire brigade were quickly on the spot, but the inmates had to escape in their night attire. It is reported that the fire caused damage estimated at about £1,000, mostly to stock-in-trade.

### FORTY-THIRD YEAR.

*Printed and Published EVERY THURSDAY*  
by **STONHILL & GILLIS,**  
at 58, Shoe Lane, London, E.C. 4.  
**Tel.: Stonhill, Fleet, London. Phone: 3407 City.**

#### Charges for Trade Advertisements:

(Full page 8 by 5 1/4 ins.)

Whole Page ...	£4 10 0			s. d.
Half Page ...	2 10 0	One-eighth Page	17	6
Third Page ...	1 17 6	One-third Column	22	6
Quarter Page...	1 10 0	One inch in Column	9	0

An Extra Charge for Cover and Special Positions.  
Discounts according to Number of Insertions.

Representatives throughout the United Kingdom and also in Australia, India, South Africa, United States Canada, etc.

All communications for the "BRITISH AND COLONIAL PRINTER AND STATIONER" should be addressed and Cheques and Post Office Orders made payable to—**STONHILL & GILLIS, 58, SHOE-LANE, LONDON, E.C. 4.**

Copies may be purchased at the Offices, as above or from Messrs. W. H. Everett and Son, Ltd., news-agents, 11, St. Bride-street, E.C. 4.

THURSDAY, NOVEMBER 17, 1921.

## Current Topics.

### No Postage Concessions.

It was a pleasing indication of Sir John Baddeley's grasp of the requirements of industry that at the new Lord Mayor of London's first official appearance as president of a public gathering—at the annual meeting of the Rowland Hill Benevolent Fund—he raised the subject of the increased postal charges. Lord Southwark followed with the remark that the twopenny postage had cast a shadow over the meeting, for it was a great disaster and set-back to the trade and commerce of the country, and was an unwise and unnecessary policy. He appealed to the Postmaster-General to use his own sound judgment and put himself in the place of the business men, who want prosperity and to see trade move in the same way that Rowland Hill made it move. The Postmaster-General was present and replied, but had nothing to offer but a re-statement of indefinite hopes. He said he longed for, and had more cause than other

men to desire, a reduction in charges which would enable him to re-establish the penny post in this country; it might be some long time before that wish was realised. Although the Post Office authorities have ignored valuable opportunities of decreasing unemployment by removing the new shackles on industry, printers have not lost heart and are continuing, by letters in the Press and by other suitable means, to urge that before it is too late to be of benefit this winter some modification should be made in what is generally agreed to be a mistaken postal policy.

\* \* \*

### Postage on Paper Samples.

REPRESENTATIONS to the Postmaster-General have been made by the Federation of Master Printers, at the instance of the South-Eastern Association of the L. M. P. A. regarding the Post Office making surcharges on communications sent to paper agents—a matter previously mentioned in these columns. It has been customary for orders to be sent, accompanied with a specimen of the paper required, under the printed matter rate. The postal authorities, however, state that, as the sample post has been abolished, such orders must be sent as letters. Mr. F. H. Cole, accompanied by the Federation secretary, waited upon the officials at the Post Office last week, but were unable to obtain satisfaction on the matter.

\* \* \*

### The Railway Rates.

THE important matter of making plain the printers' case against higher rates for the carriage of printed matter on the railways is being actively dealt with by the Federation of Master Printers. Dr. MacLehose and Mr. E. G. Arnold in particular have given much attention to the subject. It is hoped that the representations which are being made to the railway companies will result in there being no raising of the classification for printed matter. The committee which has been appointed by the Federation to deal with railway rates will meet on Tuesday next, prior to the presenting of their case to the railway companies on the following day.

### Increased Paper Imports.

DURING the months of June, July, August and September of this year, the imports of paper into the United Kingdom were 572,541 cwts., 522,724 cwts., 696,303 cwts. and 590,755 cwts., respectively. Last month the imports amounted to 798,016 cwts., a decrease, compared with October of last year, of 41,236

cwts., or 4.9 per cent., and a decrease of 394,639 cwts., or 33 per cent. compared with October, 1913. Of the total imports, printings represent 41.3 per cent.; strawboards, 29.6 per cent.; wrappings, 19.8 per cent.; millboards, 5.5 per cent.; other sorts, 2 per cent.; coated papers, 1.4 per cent.; stationery, .4 per cent. The various classes which show increases compared with October, 1920, are strawboards (69,166 cwts.); printings (37,565 cwts.); coated papers (233 cwts.) and stationery (157 cwts.). The value of the imports of paper during October amounted to £977,418, which, compared with the corresponding month of last year, registers a decrease of £1,402,887, or 58 per cent., and contrasted with October, 1913, an increase of £255,268, or 35.3 per cent. During the ten months ended October last, 5,334,094 cwts. were imported, compared with 11,448,764 cwts., in the corresponding period of 1920, and 10,816,756 cwts. for the ten months of 1913. With regard to the values covering the ten months' period (Jan.-Oct.) they amounted to £9,680,612 this year compared with £26,395,383 in 1920, or a decrease of £16,714,771 (63.3 per cent.); contrasted with 1913, when the amount was £6,425,848, an increase of £3,254,764, or 50.6 per cent. is shown.

## Personal.

PERSONALITIES of prominence in the printing world are likely to figure in the bye-election in the S.E. Southwark (Walworth) Division occasioned by the death, which occurred on Monday, of the sitting member, Mr. J. A. Dawes.

MR. T. E. NAYLOR, secretary of the London Society of Compositors, is the Parliamentary Labour candidate for this division, and is expected to stand in the forthcoming contest. Mr. Naylor stood as a Labour candidate for this constituency in 1918, but lost to Mr. Dawes. His supporters, we hear, are on this occasion very hopeful of his success.

CURIOUSLY enough, Mr. Naylor will be opposed by another prominent representative of the printing industry, as Mr. T. O. Jacobsen, the well-known chairman and joint managing director of Messrs. Jacobsen, Welch and Co., Ltd., of London, Hyde, etc., is also a candidate at this bye election. Mr. Jacobsen was one of the founders of the Employers' Federation of Envelope Makers and Manufacturing Stationers, and is a member of the Joint Interim Industrial Council for this industry. He was Liberal M.P. for the Hyde Division from 1916 to 1918.

MR. PERCY BARRINGER, president, and Mr. Clifton Tollit, vice-president of the Stationers' Association of the United Kingdom, were treated most cordially during their recent visit to the United States, and given every assistance in surveying the American stationery trade.

THE *American Stationer* remarks: "Boston stationers agreed to a man that the noted Englishmen were 'regular fellows.' Mr. Barringer left Boston tired but happy—tired because Mr. W. J. Chaplin, head of the L. E. Waterman Co., kept his guest busy visiting historic spots at Plymouth, South Shore and Greater Boston, and the various stationery stores in town—and happy because (as he expressed it) 'I've met a splendid body of men.'"

PRIOR to Messrs. Barringer and Tollit's return a luncheon was given in their honour by several prominent New York stationers at India House, Manhattan.

COUNCILLOR J. B. BURMAN (Burman and Cooper, printers, Birmingham), has been elected an alderman of the Birmingham City Council; Mr. Percival Jones, head of the Birmingham printing firm of Percival Jones and Co., has been elected a city councillor; and Mr. W. J. Lancaster, printer's traveller, has been reappointed chairman of the Salvage and Stables Committee.

MR. C. H. CUMMINS, printer and stationer, of Stroud Green-road, has been elected chairman of the Hornsey Central Unemployment Distress Committee.

MUCH pleasure was expressed at the presence of Mr C. S. Yeates at the monthly meeting of the Electrotypers and Stereotypers' Association on Tuesday evening, and thanks for his talk on the aims and objects of the Printers' Pension Corporation. A report of the proceedings will appear in next week's issue.

MR. CHARLES WILLIAM BROOK, who since 1877 has been a member of the composing-room staff of the *Yorkshire Post*, and is still in active work, has just celebrated his golden wedding, having been married at Huddersfield on November 11th, 1871.

THE claim is tentatively made that the title of the oldest Father of the Chapel in the trade belongs to Mr. W. F. Edgerton, of Wyman's composing room, who has a record of twenty-eight years' service in that capacity. Is there any other claimant to this distinction?

WE regret to hear that Mr. Herbert J. Parker, hon. secretary of the football section of the Printing and Allied Trades' Charity Sports Association, has had to be admitted to King's College Hospital, following an injury to an arm sustained seven weeks ago. Many of his friends in the trade will wish him a speedy recovery.

## DIVIDENDS AND REPORTS.

THE directors of Messrs. Thomas Owen and Co., Ely Paper Works, Cardiff, announce that the half-year's dividend on the preference shares is being paid, but they much regret being unable to declare an interim dividend on the ordinary shares. The adverse conditions in trade and fall in values were especially marked in the papermaking industry, and the directors say that so far there have only been slight signs of improvement.

## NEW COMPANIES.

CHARLES P. LANG, LTD. (Glasgow).—Capital £5,000, in £1 shares (3,000 8 per cent. cumulative preference and 2,000 ordinary); general printers, stationers, lithographers, paper bag makers, booksellers, etc. Private company. First directors: C. P. Lang, J. Lang, and C. P. Lang, jun.

ST. GILES PRINTING CO., LTD. (London).—Capital £2,000, in £1 shares; to adopt an agreement with Wilmot Aloysius Mason, and to carry on the business of proprietors and publishers of music and newspapers, periodicals, journals, magazines, book and other literary works, etc. Private company. Subscribers: C. W. Rourke and A. Hindley. First directors: W. A. Mason and others by subscribers.

PRINTERS' SUPPLY SERVICE, LTD.—Capital £2,000, in £1 shares (1,000 "A" and 1,000 "B"); to take over the business of printers' engineers and sole manufacturers of the "Service" hand and power machines carried on by A. B. Harvey, D. J. Le Warne and T. E. Parker at 55, Great Guildford-street, S.E., as the "Printers' Supply Service." Private company. Permanent directors: A. B. Harvey, D. J. Le Warne, and T. E. Parker. Registered office: 55, Great Guildford-street, S.E.

HOWARD, DEACON AND CO., LTD.—Capital £1,000, in £1 shares; lithographers and general printers, publishers, booksellers and stationers, general insurance, advertising and publicity agents, etc. Private company. Directors: W. J. Howard and F. R. W. Deacon. Registered office, 7, Crawford-passage, Ferringford-road, E.C.1.

ORAL TOPICS, LTD.—Capital £200, in £1 shares; proprietors, publishers and distributors of the newspaper *Oral Topics*. Private company. First directors: W. J. R. Sheppard, J. Davis, and F. J. Sheen. Registered office, Grafton House, Golden-square, W.1.

PATENT ACQUISITIONS CO., LTD.—Capital £1,000, in £1 shares; general merchants, advertising agents, printers, agents for patents, etc. Private company. Provisional directors: R. W. Featherstone and H. J. Simpson. Registered office: 63, Ludgate-hill, E.C.

WESTERN CHEMICAL CO., LTD. (London).—Capital £3,000 in 2,000 ordinary shares of £1 each and 4,000 deferred shares of 5s. each; manufacturers of and dealers in chemicals, glues, gums, etc. Private company. Subscribers: J. S. Mason and W. J. Knight.

TRAYLEN AND PHILLIPS, LTD. (London).—Capital £500 in £1 shares; agents for and dealers in musical instruments of all kinds, music publishers, printers, etc. Private company. Subscribers: P. Twilley and A. A. W. Kirby.

WRIGHTS (BIRMINGHAM), LTD. — Capital £500 in £1 shares; gold and silversmiths, dealers in leather goods, stationery, fancy goods, etc. Private company. First directors: W. E. Wright and Mrs. E. E. Wright.

AUTOPOSTERS, LTD.—Capital £2,000 in £1 shares; advertising contractors and agents, exhibitors of advertisements, and particularly by means of the mechanical machine known as the "Stereometograph," exhibitors of motion or other pictures, billposters, photo-

graphers, etc. Private company. First directors: J. H. G. Marriott, A. Vardon and W. H. H. Leslie. Registered office: 62, St. Martin's-lane, W.C.

**WEST LONDON PAPER STAINERS, LTD.**—Capital £1,000 in £1 shares; to acquire the business of wall-paper manufacturers carried on at 56, Stafford-road, Acton, as "J. Mannock and Sons." Private company. Subscribers: J. Mannock and A. Woodward. Subscribers appoint directors. Registered office: 11, Bal-four-road, Acton, W.

### COMPANY MORTGAGES AND CHARGES.

Fresh Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 1908, and Satisfaction registered pursuant to Section 97 of the same Act. (The registration of Satisfaction is not compulsory).

**HERBERT TOMKINSON, LTD.** (printers and stationers, etc.).—Mortgage dated November 4th, 1921, to secure £2,500, charged on land and messuages, etc., thereon in Penrhyn-road, Colwyn Bay. Holder: H. Tomkinson and F. M. Tomkinson, Penrhyn-road, Colwyn Bay, Denbigh. Particulars of £3,000 debentures authorised November 3rd, 1921, also filed; whole amount issued. Charged on company's property, present and future, including uncalled capital.

**HAYCOCK CADLE AND GRAHAM, LTD.** (printers, etc.).—Land Registry Charge on certain lands and premises to Neate-street, Camberwell, dated October 25th, 1921, to secure all moneys due or to become due from company to London Joint City and Midland Bank.

**PEMBERTON (GATESHEAD), LTD.** (paper manufacturers, waste paper dealers, manufacturers of and dealers in paper bags and wrappings, Gateshead and London).—Particulars of £15,000 debentures authorised October 28th, 1921, whole amount issued; charged on the company's undertaking and property, present and future, including uncalled capital.

**G. AJELLI AND Co., LTD.** (fine art publishers, printers, etc.).—Particulars of £3,500 debentures authorised October 18th, 1921; whole amount issued. Charged on the company's undertaking and property, present and future, including uncalled capital.

**TEAM VALLEY PAPER MILLS, LTD.** (Gateshead-on-Tyne).—Particulars of £40,000 debentures authorised November 1st, 1921; whole amount issued. Charged on the company's undertaking and property, present and future, including uncalled capital.

**WALTER HILL'S BILLPOSTING DEPARTMENT, LTD.**—Mortgage dated November 1st, 1921, to secure £1,500. Charged on 26-28, Doughty-mews, Holborn, W.C. Holders: O. H. P. T. Petre, Bosworth Hall, Leicester, and B. E. J. Petre, Beckford Grange, Tewkesbury.

**NATIONAL TRADE PRESS, LTD.** (printers of *Footwear Organiser*, *Grocery Trade*

*Organiser*, and *Furnishing Trade Organiser* London).—Particulars of £10,000 debentures authorised October 17th, 1921; whole amount issued. Charged on the company's undertaking and property, present and future, including uncalled capital.

**JOHN ALLEN AND SONS (IYBRIDGE), LTD.** (millers, manufacturers of paper, wood pulp, rags, etc.).—Debenture dated October 20th, 1921, to secure £25,000, charged on the company's undertaking and property, present and future, including uncalled capital but excluding freehold and leasehold premises, machinery, tools, etc., for which this debenture constitutes a second charge, subject to prior deeds. Holders: G. E. Gay and H. R. Peake, Lloyd's Bank, Oxford. Also trust deed dated October 19th, 1921 (supplemental to trust deed dated March 22nd, 1910, securing £20,000 debenture stock, of which £16,456 is now outstanding), charged on various properties, etc., in Ivybridge, Devon. Trustees: W. Howard, Croxley, Weybridge, and P. C. Simmons, 18, Finch-lane, E.C.

## Gazette.

### A WORD OF CAUTION.

In giving the official Gazette information, it must be distinctly understood that we take official records as we find them, and accept no responsibility for inaccuracies, while, as an almost invariable rule, the facts will be found correct. We advise our readers, before forming hasty judgment, to consider that there may be in each case satisfactory explanation which does not appear on the records.—Ed.]

### ENGLAND AND WALES.

#### PARTNERSHIPS DISSOLVED.

David Samuel Childs and Herbert Rowe, photo process engravers, 20 and 21, Bride-lane, E.C.4.

Arthur Priestley Boocock and Frank New-some, photographic publishers, 178, Garnett-street, Bradford.

James Howarth Beresford and Arthur Go-thard, wholesale paper merchants, 39, Market-street, Huddersfield.

#### THE BANKRUPTCY ACT, 1914.

#### RECEIVING ORDER.

Frederick Thomas Jeffcott, The Manse, Dordon, Warwickshire, paper manufacturer's clerk, November 7th.

THE death is announced, at the age of 76, of Mr. Herbert Jameson Waterlow, who was Sheriff of London and Middlesex in 1880, and Alderman of Dowgate Ward in the City from 1882 to 1887, when he retired. He was a past Master of the Stationers' Company, and one of the founders of the Printers' Provident Association. Before giving up printing for other work, he was connected with Messrs. Waterlow Bros. and Layton.

## The Printing Crafts Guild.

Mr. Ernest Fisher, ex-instructor in typography, City and Guilds of London Institute, lectured in the College of Technology, Manchester, recently, on the subject of "Automatic Devices in the Printing and Allied Crafts." His lantern illustrations and explanations covered the composing, letterpress printing, ruling, bookbinding, lithography and mechanical composition. In the discussion which followed, some of the labour-saving devices came specially into prominence. The slug machine was admitted a useful adjunct to the mechanical typesetting machine if only the cleaning of the slugs could be specially attended to so as to avoid substances being dropped into the metal pot, which afterwards choked up the holes where metal was ejected; also, if same could be so attached as to be easily swung out of the way when the operator required to attend to the metal-pot. The Foster pyrometer was praised for its accuracy in recording the varying heats of the metal, thereby doing away with the rule-of-thumb test by dipping a piece of white paper into the molten metal. "The Miehle," a machine that appears to have no enemies, was as usual commended as a money-maker, and particularly so wherever a reliable self-feeder was attached to it. Some of the members questioned the utility of self-feeders, but when the lecturer pointed out that presses running from 2,000 to 5,000 impressions per hour were beyond human endurance, the critics agreed that such presses would be robbed of their earning capacities if they had to be fed by hand. The self-feeders most prominently discussed were the Dexter, the Cross, the Mann, the Slogger and the Camco. One of the points touched upon was the step-climbing that had to be done in order to keep the machines supplied with paper. It was agreed that self-feeders were not economical on slow-running machines and comparatively short runs. For platen presses the Miller and the Waite and Saville types appeared to be most in favour, there being a recommendation that they should be attached to platens which gave more rolling power and better distribution; also, the delivery should be at a height convenient for the operator to see how the work was progressing. No doubt some arrangement will, in the near future, be devised on the chain or roller-carrying motion. For carton work the five colour press which was running at the last printing exhibition was admitted to be a revolutioniser compared with the dangerous cork and rule principle. Five-colour jobs at 3,000 per hour complete, printed from a reel was a big advance.

The Linotype, the Monotype and the Lino-graph were each commended for their labour-saving. Some members wished to know what kind of a machine the Ludlow-Elrod type-caster was, as the little information that had been obtained gave them the impression that it would revolutionise the jobbing printers'

section. The hon. secretary said he had been making some preliminary arrangements, and, in the near future, the Guild members may have an opportunity of seeing the class of work it produced.

WEE MAC.

## Trade Union Matters.

MEMBERS of the London Society of Compositors are being asked by their Executive to review their resources as a union. At the end of the current month a special delegate meeting is to be held, when certain recommendations designed to strengthen the Society's financial position will be placed before the members.

**THE NEW PRICE SCALE.**—It will be remembered that there appeared in our issue of November 3rd, under the heading "Fictitious Wages Reductions" a letter in which a master printer correspondent complained that in his case the new rates for piece composition worked out in such a manner that he found his piece compositors, instead of being subject to the 5s. reduction of wages, as ostensibly agreed, taking upwards of 2s. more than formerly. Asked to express an opinion on this matter, an official of the London Society of Compositors remarked the other day that the system of working with a bonus, under the old scale, was disadvantageous to L.S.C. members who were on piece. The proper comparison to make was not to set off present wages against the wages earned under the bonus system, but to compare to-day's wages with those earned prior to the introduction of the bonus.

**JOURNALISTS TO AMALGAMATE?**—The executives of the Institute of Journalists and the National Union of Journalists met at the Memorial Hall, Farringdon-street, during the week-end to discuss the possibility of forming one organisation for journalists. A resolution to the effect that it was desirable that there should be one organisation was carried unanimously, and a joint drafting committee was appointed to prepare a scheme for submission to a further joint conference, preliminary to referring the whole question to the members of the respective organisations.

JUDGMENT was reserved by the Hull magistrate in the case in which Mr. Thomas Bell, editor and manager of the *Hull Daily News*, was summoned last week for publishing a prize scheme which the prosecution submitted was a lottery. There were four summonses. The prize scheme consisted of the free issue of a copy of the newspaper to every person on the voters' list in Hull and district, that newspaper bearing a distinctive number. Afterwards the numbers were drawn and the winning numbers published in the succeeding day's issue of the newspaper.

**A HISTORY OF THE CAMBRIDGE UNIVERSITY PRESS, 1521-1921.** By S. C. Roberts, M.A. Cambridge: The University Press. Demy 8vo. Pp. xv. 190. Price, 17s. 6d. net.

In these days when there is so much cutting down of publishing enterprise in respect of books appealing to only a small section of the public, it is a pleasure to find the Cambridge University Press bringing forth this valuable volume, which, while not perhaps likely to evoke much response from the general reader, will be welcomed by those printers and other bibliophiles who prize any authoritative contribution to our knowledge of the past history of the printer's art. Written to mark the four hundredth anniversary of Cambridge printing (the celebration of which is reported on another page), the volume appears most opportunely, and its design and production are evidences of the excellent craftsmanship of the Cambridge University Press of to-day.

The first book was printed at Cambridge by John Siberch in 1521, thirteen years before the Charter was granted by King Henry VIII., but it was not until 1582 that the appointment of Thomas Thomas as "University printer" was recorded. In those days the Stationers' Company of London claimed a prior monopoly for the printing and sale of books, and Mr. Roberts' story tells of the friction between the rival institutions. The Stationers' Company even went so far, in 1583, as to seize the Press as constituting an infringement of their rights.

A point of special interest to printers is the fact that the Cambridge University Press was closely associated with the invention of stereotyping. William Ged brought his invention from Edinburgh to London in 1730 and soon afterwards was working on his process at Cambridge under the auspices of the University. Later the University was concerned also with Earl Stanhope's stereotyping process, the process being acquired by the University at the beginning of the nineteenth century.

Another honourable name in the University's annals is that of John Baskerville, the famous typefounder being in 1758 appointed "one of the Stationers and Printers" of the University. Despite his technical skill, however, he did not continue long in this office, dissatisfaction with the conditions of his work leading to his retirement about 1763.

The Pitt Press building, established from memorial funds relating to William Pitt—from whom the Press takes its name—was completed in 1833, while in 1872 the University Press opened its first publishing office in London.

Mr. Roberts' book contains, of course, the names of numerous famous authors whose works were printed at Cambridge, as well as

of the various printers who took part in the work. The author has had exceptional facilities for obtaining the fullest information on his subject, and a good deal of information not previously made public will be found in his interesting pages.

A general index is, alas, lacking; a list of names takes its place. Thus one cannot look up "stereotyping," for instance, but must either look under the names of those associated with the process, or search the book without guidance. A list of University printers from 1521-1921 is included, and of Cambridge books printed between 1521 and 1750, as is also a useful bibliography of the author's subject. Many will regret that only the briefest sketch is given of the growth of Cambridge publishing in the last 50 years, the author opining that "to do more would be to cross the border-line between history and advertisement."

**PITMAN'S SHORTHAND AND TYPEWRITING YEAR BOOK AND DIARY.** London: Sir Isaac Pitman and Sons, Ltd. Price, 2s. net.

The 1922 issue of this well-known year book contains the usual plentiful supply of information with regard to the study and practice of shorthand, typewriting, etc., the whole constituting a concise and reliable pocket annual of interest and value to all shorthand students and practitioners, shorthand-typists and office workers generally. Sir Charles W. Macara, Bart., contributes a preface; other contributions prove conclusively the supremacy of Pitman's Shorthand (in journalism, 99 per cent writers; in commerce, 96 per cent.; in schools, 97 per cent.); whilst a specially interesting feature is a series of four articles, "How I Gained My '200' Certificate," contributed by the four youngest high speed writers, one of whom, Miss D. K. Smith, gained her success at 18 years of age.

## Price of Government Publications.

The price of the Board of Trade returns has been considerably increased. Copies similar to those issued last week have for some time been priced at 3s. and in the "good old days" were even as low as 1s. 3d.; but for this month's publication the sum of 10s. is demanded.

The Director of Publications, discussing the decision to increase the cost of Government publications, said: "From time immemorial Parliamentary Papers have been priced at very much under cost of production. Apparently the idea was that, as the papers had to be printed for Parliament, the Stationery Office might as well strike off a number of extra copies and get something back by selling them. For reasons of economy and common sense, we have now decided that all Parliamentary Papers must pay their way. Roughly speaking, all prices will be trebled."

## North London Master Printers.

The second of a series of monthly meetings was held on Monday, November 14th, at Finsbury Park, with a good attendance of members from all parts of the large area covered by this district association.

Mr. D. A. Whitehead, of Muswell-hill, presided.

At the outset Mr. L. F. Hunt, who, with Mr. Mizen, attended at the district officials' council meeting at No. 24, gave a resumé of the proceedings. Mr. F. J. Collins, of North Finchley, was elected a member.

### Election Printing.

As a part of this area has just experienced a Parliamentary election, many matters with regard to election printing were discussed. Handbills had been printed as low as 10s. per thousand. It was eventually decided that in view of the probability of a General Election taking place, a sub committee consisting of Messrs. Mizen, Whitehead, Hunt, Cummins, Cole, Dooley, Orchard and Williams, with power to add to its number, be founded for the purpose of fixing a general price for election work.

The busy secretary, Mr. W. J. Mizen, has circulated to every printer in the North London area the first of a monthly circular entitled "North London Master Printer." There were many congratulatory letters read from other associations, and the action of the secretary was commended, and a resolution passed for its continued publication.

### Dearer Postage Condemned.

Mr. W. H. Burchell, of the Central London Association, who was present to give an address on "Rules and Regulations for Printing Offices," prefaced his remarks by allusion to his efforts to get the postal charges reduced, and urged all members to write their M.P. to personally interview the Postmaster-General to re-establish the halfpenny post on printed matter. Mr. Burchell said he had not only written to the Postmaster-General but to the Prime Minister and many members of Parliament.

Mr. D. A. Whitehead referred to one of the Hornsey candidates' (Mr. Burgin) splendid speech at his campaigns on increased postage and the damage it was doing to industry, to the advertising and the printing and allied trades. Mr. Whitehead suggested that candidates for Parliamentary honours should be approached by letter to get their views on the subject of postal charges.

Mr. Burchell, in giving his address on "Rules and Regulations," said there were few offices with a set of rules, consequently the new employee had nothing to guide him. What was badly wanted in the printing industry was a standardised set of rules, and the issuing of these could only tend to economy and profit to those who used them.

At a late hour Mr. Whitehead and Mr. Mizen thanked Mr. Burchell for his able, and at times amusing, address.

## Warrillows, Ltd.

Presiding at the first ordinary general meeting of the shareholders of Warrillows, Ltd., in Birmingham, on Thursday last week, Mr. W. S. Hooper, the chairman, referred to the new buildings which had just been completed and which were described as the finest of their kind in the country. They were now fully equipped with the latest and most up-to-date machinery it has been possible to procure. After remarking that the turnover had been extremely satisfactory, Mr. Hooper mentioned that the recent issue of 50,000 shares was very largely over-subscribed. Referring to the Thomas de la Rue and Co issue, the chairman remarked that the over-subscription of this issue was a wonderful performance in three days, and demonstrated the strength of the combination with which the shareholders of Warrillows were now connected. He added that the profit of £51,917 was in itself no mean achievement.

A dividend at the rate of 1s. per share, free of income tax, for the six months ended June 30th was declared, making, with the interim dividend declared January 1st, the sum of 1s. 6d. per share, free of income tax.

## Football.

The following matches have been played and resulted as indicated:—

### Printers' Charity Cup—Division II.

#### SECOND ROUND.

On November 5th: Cornwall Press, 5; Co-operative Printing Society, 1. On November 12th: Blades, East and Blades, 2; Dolphin, 1. Jayswood, 4; Fryotype, 3.

### Printers' Football League.

The two following matches were played on Saturday: Cornwall Press, 3; Wightman's, 2. Amalgamated Press, 1; Drakes, 1.

**NEW LINOTYPE PUBLICATION.**—There has just been issued No. 1 of Vol. I. of "The Linotype Record," a quarterly publication (2s. per annum) produced by Messrs. Linotype and Machinery Limited, 9, Kingsway, London, W.C.2. It will be remembered that on the outbreak of war in August, 1914, the firm suspended publication of their house journal, "Linotype Notes and Printing Machinery Record," to which the new journal is a successor. The 20 pages and cover of "The Linotype Record" form an admirable example of good typography and design, and are of special interest in that the whole of the text matter, display lines and ornamentation is the product of the modern Linotype. The type used is the Bodoni series throughout.

## St. Bride Students' Memorial Service

### Armistice Day.

Those responsible for the service held at St. Bride's Church on Armistice Day in remembrance of St. Bride Printing School students who fell in the Great War, must have been highly gratified by the response to the suggestion that a service should be held in commemoration of those who made the supreme sacrifice. Amongst the congregation of some 400, there were many well-known people associated with the printing industry.

The Vicar, the Rev. A. Taylor, M.A., gave an inspiring and helpful address. His remarks, which were based on the three following points, were followed with close attention: The memorial of the fallen, the fellowship of the living, the call to service.

The singing was led by a choir composed of St. Bride students and pupils from the Guildhall School of Music. The latter sang in splendid voice an unaccompanied anthem, "Lift Thine Eyes," by Mendelssohn.

This dignified and helpful service must long remain in the memories of those who were privileged to be present, and demonstrates once again that St. Bride has a much wider field than the mere teaching of the principles of the printer's art.

Replies to Box Nos. to be addressed to the Offices, "BRITISH AND COLONIAL PRINTER AND STATIONER," 58, SHOE LANE, LONDON, E.C.4.

## SPECIAL PREPAID ADVERTISEMENTS

**SITUATIONS VACANT, REPRESENTATIVES or MANAGERS REQUIRING POSITIONS, AGENCIES, BUSINESSES WANTED or FOR DISPOSAL, MACHINERY and MISCELLANEOUS.**—Charges for Advertisements of the above class are Three Shillings for 21 Words or under; One Shilling extra for every line or portion after. Seven words to be reckoned for each line.

**SITUATIONS WANTED.**—Special Rate for Operatives only: One Shilling and Sixpence for Twenty-One Words and One Penny per Word after. Minimum charge One Shilling and Sixpence. Cash to be sent with order.

Telegrams: STONHILL, FLEET, LONDON.  
Telephone: No. 8407 CITY.

### Miscellaneous.

**EXCEPTIONAL OPPORTUNITY.**—SMALL PRINTING BUSINESS in Sussex town, £1,800, going concern; freehold premises including house could be purchased cheaply; mortgage arranged.—Particulars from F. Colebrook, 146, Fleet-street, E.C.4. 13866

**PRESS CUTTING AGENCIES** in South Africa, India, New Zealand, and other important Colonies are requested to communicate with Advertiser.—Box 13864.

**TECHNICAL WRITERS** on Subjects of Interest to the Printing and Allied Trades are invited to communicate with Box 13870.

### Machinery for Sale.

**DAWSON'S** Quad Demy REVERSUS, with rotary slitter and Klimsch counter, fitted with Slogger feeder, £700, or offer.

**FURNIVAL'S** Quad Demy 2-REVOLUTION, with rotary slitter and Klimsch counter, fitted with Slogger feeder, £700, or offer.

**DAWSON'S** Quad Crown WHARFE, balanced flyers, rotary slitter, geared inkers and Klimsch counter, £250, or offer.

**DAWSON'S** Double Royal WHARFE, balanced flyers, rotary slitter, Klimsch counter and geared inkers, £220, or offer.

**DAWSON'S** Double Demy REVERSUS, balanced flyers, geared inkers, distributors, rotary slitters and Klimsch counter, £240, or offer.

**DAWSON'S** Double Crown WHARFE, geared inkers and Klimsch counter, £90, or offer.

**Quad Crown WHARFE "PERCELLER"** (Dawson), with rotary slitter and Klimsch counter, £300, or offer.

**Quad Demy WHARFE "FINE ART"** (Dawson), with rotary slitter and Klimsch counter, £325, or offer.

**DISC RULER** (Brissard), take sheet 24-in. by 26½-in., two-side, two-colour, £180, or offer.

**DITTO**, £180, or offer.

**DISC RULER** (Brissard), take sheet 26½-in. by 33-in., two-sider, two-colour, £200, or offer.

**DITTO**, £200, or offer.

**DITTO**, with perforator, £220, or offer.

**FIVE WIRE STITCHERS** (Brehmer 4A Trough Saddle), at £30 each, or offer.

**BOOK-FOLDING MACHINE "PREUSSE,"** take sheet 30-in. by 49-in. (running at 2,000 per hour, hand-fed), £200, or offer.

**DITTO**, £220, or offer.

All the foregoing machines are in full working order, and may be seen running by appointment with the Factory Manager, Messrs. E. J. Arnold and Son, Butterley-street, Leeds.

All offered subject to sale meanwhile, and any reasonable offers will be considered. 13868

**PRESS** (Kidder Double Quarto 2-Colour) for sale; 12 sets of cutters and 12 runners, counter, etc.—S. J. Moreland and Sons, Ltd., England's Glory Match Works, Gloucester. 13869

### Patents, etc.

**THE** Owners of British Patent 8,688, 1914, relating to "IMPROVEMENTS IN OR RELATING TO TYPEWRITING MACHINES," and British Patent 18,225, 1914, relating to "IMPROVEMENTS IN TYPEWRITING MACHINES," are desirous of entering into negotiations with one or more firms in Great Britain, for the purpose of exploiting the above inventions either by sale of the Patent Rights or by granting licences to manufacture under royalty.—Inquiries should be addressed to Messrs. Abel and Imray, Chartered Patent Agents, 30, Southampton-buildings, W.C.2. 13871

### FREDK. HEYWOOD, Jr.

PRINTERS' ROLLER CASTER  
— BY MODERN GATLING PLANT. —

23, HONEY STREET, MANCHESTER,  
And  
26a, CLAYPIT LANE, LEEDS.

## Printing Notes from Australia.

### **Municipal Printing—Process Engravers' Apprenticeship—Term and Wages—New Company.**

*(From Our Sydney Correspondent.)*

It seems likely that municipal printing will soon be fully established in Sydney. After getting expert opinion as to the machinery required for enlarging the existing printing plant at the Town Hall so as to enable it to handle all the printing and bookbinding for the City Council, the Finance Committee has decided to recommend to the Council that a printing plant, including a linotype machine and various other machines for a composing room, a letterpress room and a bookbinding plant, be purchased. The estimated cost is £3,430. Provision is made for a staff of nine persons to work the plant, the cost being run out at £31 14s. 6d. a week.

At Brisbane Arbitration Court, on August 18th, some important points were settled relating to apprenticeship in process engraving. A group apprenticeship committee for process engraving, which had come to an agreement on a number of points regarding the apprenticeship of process engravers, submitted to the court a few points upon which agreement had not been reached. The Judge announced that he kept to his former decision that process engraving was an industry separate from that of printing.

STATEMENT was made on behalf of the apprenticeship committee that in consequence of the course of instruction which it was hoped boys would receive in the future, it was thought that apprentices would be able to accomplish in five years what it took them six years to do in the past. The Court then decided that the period of apprenticeship should be five years.

FOR the Process Engravers' Employees Union it was stated that as regards wages there should be additional inducement for bright boys to enter the industry. Request was made that the rates should be made as follows: First year, £1 per week; second year, 30s.; third year, 40s.; fourth year, 50s.; fifth year, 80s. An employers' representative said that employers considered that the rates of pay to apprentices in the industry were much too high.

TO TAKE over from the vendors the protection of the patent rights to the "Improvements in Roll Ticket Printing Machines," machinery, etc., there has been registered as a new company Bermingham and Fowler, Ltd., capital £20,000, in £1 shares, of which 10,000 shall be deemed to be fully paid up, and issued to Thomas J. Bermingham (4,000),

Francis Fowler (4,000), and Eric B. O. Cowlshaw, in consideration for the assets acquired by the company. Subscribers: T. J. Bermingham, E. B. O. Cowlshaw, F. Fowler, R. W. Dowling, N. V. Stewart, D. A. M'Nab, and G. S. Wilson. Registered office, 262, Stanley-street, South Brisbane.

## Raphael Tuck & Sons' Productions.

The receipt of a selection of the excellent productions of Messrs. Raphael Tuck and Sons, Ltd., reminds us that the pre-eminent position occupied by this well-known firm is still maintained in this its fifty-fifth year of existence. The range of Messrs. Tuck's latest collection of Christmas and New Year cards, post cards, calendars, gift and toy books, painting books, pictures and art novelties which has been prepared for the approaching season reveals the thorough and efficient manner in which they are carrying on what they justifiably designate the "World's Art Service." The Christmas cards alone number over 3,000 different designs. First place must be given, as for many years past, to the Royal Christmas cards. These are delightful reproductions for the use of the public, by gracious permission, of the latest Royal cards which the firm have had the honour of preparing for the King and Queen, Queen Alexandra, the Prince of Wales, and, for the first time, for Princess Mary. His Majesty has gone back to the War of the Crusaders of 1191 for an appropriate subject, and his card, of bold design and rich colouring, depicts the Kings of England and France riding at the head of their armies into Palestine. Her Majesty has selected a card representing Queen Elizabeth bestowing a knighthood upon Drake on a man-of-war, while Queen Alexandra has chosen a garden of flowers radiant in all its summer glory. Among the many novel series in the general collection are the "Silhouette Art," the "Silhouette Mascot," the "Good Luck Art Pottery," and the original and delightful "When East Meets West." The "Pot Pourri" series, with its beautiful hand-painted designs in entirely new arrangements will increase, if that were possible, the popularity of this choice perfumed series, which is claimed to be the ladies' favourite card. There are many other charming series, including the "colour gravure," the art "Oilette," and the "Hand-Printed Facsimile." The greetings, quotations, and verses have been selected with special care, and great attention has been given to artistic design. The Christmas post cards embrace practically every variety of subject for young and old, whilst the "Oil-facsim" series is a veritable art gem. There are also among the Christmas novelties beautifully designed calendars of 400 varieties, painting books, simple flat designs to be coloured by the little ones, and full coloured drawings for the more advanced, as well as entertaining and educational untearable and modelling books.

## New Inventions.

### Electricity in Printed Paper.

In an invention by Mr. W. H. Chapman, printed paper is dried and the static electricity thereon is neutralised by passing the paper in the vicinity of gas flames charged with alternating electricity of high voltage. The controls of the press, gas supply, and electricity supply may be operated simultaneously. A sheet 2 passes over a perforated gas pipe 3 supported in insulating bushes 8 by clamps 7 fixed to brackets 5 of the carrier delivery arm of a printing press. The pipe 3 is connected through a mixing chamber 10 to a pipe 12 supplied through a valve 13. One terminal of a sparking plug 15 screwed into a sleeve 14 surrounding one end of the pipe 3

is connected to one end of the secondary coil 17 of a transformer, the other end being earthed. The primary coil 19 of the transformer is supplied from a source of alternating current, a switch 21 controlling the circuit. The press may be driven by a motor controlled by a switch 23. Rods 25, 27 may connect the three controlling levers whereby the press is stopped, the gas shut off, and the primary circuit 19 broken simultaneously. The sparking plug serves also to relight the gas. The paper may pass beneath the pipe 3, the flames then being directed downwards, and the pipe 3 may itself be charged in place of using the sparking device.

### Intaglio Rotary Printing.

In a rotary printing machine, particularly of the kind printing from intaglio cylinders, patented by Mr. G. W. Mascord, the spindle or mandrel of the printing cylinder or engraved shell is mounted in a spherical swivelling bearing at one end so that the cylinder may be swung clear of the impression roller and the cylinder or shell readily removed from

its spindle or mandrel. The spindle or mandrel is preferably driven through a magnetic clutch and when such clutch is employed, the spindle or mandrel may be mounted on an ordinary non-spherical pivoted bearing. As shown in Fig. 1, the engraved shell *a* is carried by a mandrel *a'* the spindle *b* of which is mounted in a swivelling spherical bearing *c* at one end and is readily removable from its bearing *d* at the other end so that it may be swung into the position shown in dotted lines to permit removal of the shell *a*. The spindle *b* carries one part *f* of a magnetic clutch the other part *f'* of which is carried by a shaft driven by gearing *g*. The engaging faces of the clutch parts may be circular and

concentric with the axis of the bearing *c* or may be flat, the shaft carrying the part *f'* being movable axially to allow of the swing of the spindle *b*. The fuses of the clutch parts may also have interengaging ribs and grooves to afford a positive drive. When the magnetic clutch is employed the bearing may be constructed as shown in Fig. 6 and consisting of a cylindrical projection *c* engaging a cylindrical recess *c'* in the frame. In other forms of machine, the clutch is omitted and the cylinders are driven by spur gearing arranged to permit ready disconnection to allow of the swinging movement of the spindle *b* upon its spherical bearing.

### Stereotype Flong.

In an invention by Associated Newspapers, Ltd., and Mr. A. G. Hawkins a stereotype flong has incorporated with it, either throughout its mass or throughout one or more outer layers, a quantity of casein. The flong is preferably prepared by immersing the basic material of the flong for 12 to 15 hours in a water solution of 82 parts of casein and 18 parts of borax with carbolic acid or other preservative, pressing out the excess moisture and finally drying. The face of the flong may be coated with a composition consisting of 24 parts of china clay, 6 parts of rice starch, 3 parts of casein, 1 part of borax, and 66 parts

of water with a quantity of preservative and dried. According to the Provisional Specification, yellow dextrine is used instead of casein in the coating composition.

### Cardboard Box Blanks.

An invention by Mr. G. W. Swift relates to machines for creasing and slitting cardboard or like blanks in the manner shown in Fig. 39 for making boxes, etc. The sheets may be fed to the machine by the mechanism described in Specification 166,091, and are delivered to feed-rolls 15, Fig. 2, the forward edge of each sheet being raised by arms 95 mounted on a shaft 96 which is rocked by a crank on one of the machine shafts. The crank comprises an arm 101, Fig. 25, provided with a crank-pin opening 100 and fixed to a ring 102, which is adapted to fit on the end

knives for cutting the blank to the desired length. The sheets then pass between shafts 50, 50, carrying two sets of slitting dies 60, 61, and 62, 63, Fig. 4, which form the slits 170, Fig. 39, in the edges of the blank. The two sets of slitting-dies are relatively adjustable by means of two sets of intermeshing gears, as in the case of the creasing-members. The blanks are then removed by rolls 67 and delivered to a platform, etc. Feed-roll segments 114, Fig. 2, are arranged adjacent to the creasing-members on the shafts 25, 25'. These segments comprise a plate 110, Fig. 20, having a curved outer surface 114. A modified form of segment is constructed in one piece. In the case of narrow sheets, positive feed of the material through the machine is ensured by pairs of segmental feed members mounted on the shafts 25, 25', 50, 50', one member of each pair having a spring-pressed portion. The

of a shaft and be secured thereto by means of an integral spring tongue 105 and a screw 106. The sheets pass from the rolls 15 to two pairs of creasing-members 31, 32, and 34, 35 which form the longitudinal creases 190, Fig. 39, in the blank, and are mounted with capacity for relative adjustment upon shafts 25, 25'. The shafts are connected by two sets of gear-wheels 27, 28, and 37, 38, Fig. 6, the inner set being adjustable upon the shafts. The creasing-members 31, 32 are secured to collars 29, 33 on the shafts, and the creasing-members 34, 35 are secured to the gears 37, 38 so that they can be adjusted relatively to the members 31, 32. Gear-locking members are provided to hold the inner gears when released from the shafts. The sheets next pass between shafts 40, 40' provided with feed-rolls and with rotary

slitting dies each comprise a segmental member 158, Fig. 9, having a shouldered recess to receive an adjustable die-supporting member 150 carrying a die-plate 153, which may have parallel cutting-edges or converging edges for cutting wedge-shaped slits as shown in Fig. 39. Co-operating with the dies are punches 145, Fig. 11, adjustably mounted in members 140. Portions are cut out of the blank to form a tongue 171, Fig. 39, by L-shaped cutters, 64, 65, Fig. 18, which are mounted on the shafts 50, 50'. The circumferential cutting-edges 175, 183 of the cutters are arranged to give a shearing cut, and the angular part 177 of one cutter bears upon a flat surface 185 on the other. The creases 172 in the blank are preferably rolled in by ribbed rolls on the shafts of the rolls 15.

## A Quaint Appeal.

Quaint communications frequently reach Mr. A. W. Foster, the secretary of the Paper-makers' Association, and one which will be hard to beat has just come into his hands. It is in the following terms, which explain themselves:—

"Your Highnesses, Sirs,—Would your respective Highnesses pardon and forgive a poor orphan that has been left destitute, parentless and friendless almost since my birth, to the mercys of the world. I am a machine assistant, could labour, assist or help, in any part of the mill. Would make myself general usefull."

Enclosed with this letter was another which set out in greater detail and redundancy the same pathetic fact—a sort of elaboration of the original theme which left nothing more to be said on the subject.

## A Further "Manul" Development.

The Inventor of the "Manul" Process Demonstrates his  
Invention and Announces an Important New Application.

The "Manul" process, whereby printed or other originals—either text or line illustrations—can be reproduced without the use of photography, has already been explained in our pages\* and it has aroused a good deal of interest among printers, especially since the introduction of the process into this country by the Muston Co., a London firm interested in the patent rights for the British Isles. Although the exponents of the process already claim to effect certain economies as compared with ordinary methods, a great setback to its possibilities has been the admitted fact that the nature of the "Manul" printing surfaces employed has necessitated the use of lithographic printing in their application. Now, however, the striking announcement is made from Switzerland that the inventor of the process has carried his invention a step further, and believes that in a few months he will be using "Manul" relief printing surfaces on ordinary letterpress machines.

A Swiss association of printers' overseers had an opportunity recently to visit the works of the Polygraph Co., of Laupen, Switzerland, the sole licence holder of the "Manul" process for Switzerland, and the visitors were favoured with what has apparently not before been granted—a detailed demonstration of the production of the "Manul" plates. A report of this demonstration appeared in a Swiss newspaper, and has found its way into the German technical press, from which we glean the account which follows. The process, as described, tallies pretty closely with the particulars we have already published, though helping perhaps to a clearer under-

standing of details. Mr. Ullmann's remarks, however, with regard to the application of his method to relief printing open up important fields of speculation. Although the "Manul" films could obviously be used as negatives for the making of process blocks in the ordinary way, no very great economies seem possible in that direction. We fancy the inventor's intention will be to print down direct on to zinc plates of considerable size, and thus obtain, as it were, ready-made forms containing, say, a large number of pages of a book, the zinc plates being accommodated perhaps on a special bed on the machine.

### The Process Described.

The inventor of the "Manul" process, Mr. Ullmann, of Zwickau, accompanied the visitors, who were first conducted into the "exposure-room," where they were given all the explanations they desired. The exposure-room contains, says the Swiss reporter, several exposure cabinets, somewhat of the form and size of a billiard table. Each cabinet is divided in the middle by a strong glass plate. The lower, open, section holds the source of light, viz., a large number of electric lamps; the upper, closed, section carries cloths for covering up the cabinet, and a simple plate-gripping device. The direct transference of the original to be reproduced takes place upon prepared but quite transparent sheets of glass; these are insensitive to natural light, and can be exposed to direct sunlight, as at an open window, without effect. These plates are prepared in the firm's laboratory, the emulsion, however, being provided by the inventor, for in this emulsion lies the secret of the process. A sensitive plate so prepared

\* See article by Mr. Wm. Gamble in June 30th issue, also another article, October 18th.

was laid, in the presence of the visitors, on the glass side of the exposure cabinet, and upon it was placed the original to be copied—in this instance a leaf of a book, printed on both sides. After the covering up and gripping of the plate, it was given a twelve seconds' exposure of about 5,000 candle power. Remark was made that after this operation there was no perceptible impression on the plate; it appeared afterwards, as before, to be perfectly transparent, and was now carried, without any covering, into the "developing-room."

This contained in one corner a water-tap with a tank, and a table on which were placed a number of bowls. But anyone who now jumped to the conclusion that the bringing-out of the picture was to be done by means of complicated baths found himself mistaken. "Water, nothing but pure water," Mr. Ullmann explained jokingly, "because it's cheap and wholesome." A dipping of the exposed plate in the water-tank, quite a short manipulation under the running tap—and the picture came into sight in a greenish tone. A further short treatment in ammonium chloride, another rinsing in one of the bowls of water, another one in a violet colour bath (evidently for the obscuring of the parts of the plate not affected by the light, and therefore not intended to print) and the development was finished. Drying occurred on the spot. There followed a short rubbing-away of the dry film with damp blotting paper, a few cuts with a knife around the plate, and the film was readily removed.

#### The "Manul" Matrix.

"Here, gentlemen," explained the demonstrator, "we have the 'matrix' of the 'Manul' process." This presented itself now as a quite thin paper-like film, in which all the parts to be printed—in this case the typographic characters—appeared perfectly transparent, thus being translucent for the later operations, whilst all the non-printing surfaces were dark violet so as to be absorbent of light.

All the manipulations described (carried out by female labour) were amazingly simple, and from the exposure to the removal of the film were performed in a few minutes.

The transference of the image from the "Manul" plate on to the printing plate was not carried out before the visitors, but in this connection they were surprised by a remark of Mr. Ullmann's that he is on the point of adapting his process to *relief* printing on the ordinary printing machines. As doubts on this matter were expressed by those present, Mr. Ullmann added that he is tackling the problem at its roots and he has definite hopes that he will be able in a few months to remove from his improved process the faults it still possesses which lie in the "unevenness of the heights of the printing characters."

"Should Mr. Ullmann," the reporter added "actually succeed in this, we should be on the eve of a new revolution in printing, the importance of which cannot be foreseen."

**An Advertisement is always working.**

## Electrotypers and Stereotypers MANAGERS & OVERSEERS' ASSOCIATION

### Auxiliaries and the Printers' Pension Corporation.

There was a well-attended meeting of the Association at the headquarters, St. Bride Institute, Bride-lane, E.C.4, on the 15th inst., the president (Mr. A. Chadwell) occupying the chair. At the last meeting several members had expressed disapproval of the present method of paying subscriptions to the Printers' Pension Corporation through the Auxiliary, and at that meeting it was decided to invite the committee of the Electrotypers and Stereotypers Auxiliary to be present at the next meeting to discuss the matter with them, and also to raise the question of the advisability of their branch of the trade having a representative on the Council of the Printers' Pension Corporation. Mr. C. Yeates, a member of the Council of the Corporation and several members of the Auxiliary committee were accordingly present and spoke in a convincing manner of the utility of the present auxiliary system of raising the money necessary to secure the best possible good for prospective candidates.

The president explained that the Association would not like to do anything over the heads of the Auxiliary, hence the invitation to them to be present.

Mr. Parkerspoke of the difficulty he thought existed with the Auxiliary system of getting chairmen at concerts because of the large plates expected of them. He thought that individual subscriptions of one or two guineas, or whatever it was, the amount should be credited to the persons who subscribed. That, he was informed, could not be done at the present time.

Mr. G. W. Sharvell, treasurer and one of the founders of their Auxiliary, asked if he Auxiliary was going to support the chairman or the chairman going to support the Auxiliary? Concerts cost money, and the auxiliaries provided that money. If they were going to split the votes between the chairman and the Auxiliary, he wanted to know what would become of the usefulness of the Auxiliary.

Mr. Yeates, who was cordially welcomed by the president, said the question of whether an individual subscription should receive the same recognition from the Corporation as sums of money secured by a chairman through the Auxiliary was a difficulty which had caused the Council no end of trouble. The only thing for a man to do if he wanted to obtain recognition was for him to ask the Auxiliary to put his name up when his time came and for him to pay in direct in his own name to the Electrotypers' Pension Auxiliary. By that means the pension was created sooner than it would have been otherwise. As regards chairmen, since 1914 the Council had been very much concerned about getting

funds to carry on its enormous undertakings, and as an inducement they came to the conclusion that a chairman or any Auxiliary should have one vote for every five guineas subscribed. He failed to see how it was possible to give a sum of money and expect double voting power for it.

With regard to the Association expressing a wish to have a representative on the Council, he humbly maintained that nobody had taken a deeper interest in its welfare than he had tried to do. When he was elected on the Council a very small proportion of their trade was eligible to the benefits of the Corporation, but before two years had elapsed he was fortunate in being able to secure a by-law which enabled every member of their trade to go up for the benefits.

Mr. Black asked if it was possible for the Association to nominate a member whose name would carry with it the necessary amount of money to the Corporation, instead of through the Auxiliary, in order to bring votes direct into the Association so that they would be able to award them as they wished.

Mr. Sharvell said that though their branch of the industry was a very small one, they could put in at once two or three candidates. No compositor or machine minder could command the same power. That was because of the money that had been paid in through the Auxiliary.

Mr. Black spoke of the small chances of securing a pension of the man in a small shop as against the man in a large one.

Mr. Yeates, in reply, said that if a man showed willingness to work hard for his own election he was bound to succeed; it did not matter whether he worked in a small shop or a large one.

#### **The Orphan Fund.**

In appealing for their support to the Orphan Fund, Mr. Yeates explained how the children were being educated at secondary schools and cared for by the Corporation until they reached the age of 14 years.

Asked by Mr. Shillam how that fund stood, Mr. Yeates said they had promised to look after these children, although they were afraid the general public would not think as much of our fallen men in another 12 years as they did to-day.

A vote of thanks was moved by Mr. Longley to Mr. Yeates and to the Auxiliary Committee for their presence and helpful talk.

Mr. Yeates, in responding, said with their permission he would like to couple with the vote of thanks the Printers' Pension Corporation.

#### **Continental Competition.**

Before the meeting closed the president said he had received a letter from Amsterdam asking him to forward to that country prices and conditions of labour in their branch of the trade as it obtained in London. He had sent the letter to Mr. Holloway, who advised him not to answer it, and he hoped that if any of the members received any such letters

they also would not answer them. Mr. Chadwell said that by protecting the employers they were protecting themselves.

Mr. Yeates said he had lost an order to Holland. As regards the employers they have a very strong union in Holland amongst themselves. Their own union rate for time work is 1s. an inch, but for work for export they can charge anything they like. The job he had lost was done at considerably under the cost of the wages in London, even without reckoning the cost of the metal and overhead charges.

Mr. Forsyth said they should not wait for the Board of Trade to rectify the matter. It was a question for the trade as a whole to take up, both masters and men, for they held it in their hands to stop anything in the nature of unfair competition from abroad.

Mr. Titchener stated that the letter from Holland had been before the Trade Shop Employers' Federation on the previous day and the Joint Board in due course would report on the matter.

The meeting then terminated.

## **Printing and Allied Trades Charity SPORTS ASSOCIATION.**

The annual boxing competition under the auspices of the Printing and Allied Trades Charity Sports Association was held on Friday evening at the Northampton Institute, Clerkenwell. This was practically the last function of the season, and so popular was the programme that over 3,000 people were present. In order that the programme should not be unduly prolonged it was found necessary to refuse over twenty entries. The Association has had a most successful year, and much of the credit due must be ascribed to the activities of Mr. Chas. Roud, the popular president.

During the year over £2,000 has been raised from the different tournaments that have been promoted in various branches of sport. Friday's event realised a profit of over £100. Up to the present date the Association has distributed funds to the following institutions: £1,846 18s. 9d. in the creation of five (possibly six) pensions to this year's Printers' Pension Festival, viz., Messrs Edgar L. Waterlow, Frank Lloyd, E. H. Raynham, H. F. Parker, R. H. Ruddock and possibly A. G. Gronow; £130 to the Vellum Binders and Machine Rulers' Pension Society, £23 each to the Lloyd Memorial, Natsopa, Alf. Evans and Limsfield Convalescent Homes.

#### **The Finals.**

The final bout in each competition resulted as follows:—

8st. Open Competition.—W. Insley beat F. Hayes. 9st. 9lbs. Novices.—J. D. Gleeson beat S. Moss. 10st. 4lbs. Open.—B. Asquith beat Victor Guy.

## Photo-Lithography and "Lithotex."

Lecture by Mr. F. T. Corkett.

An interesting lecture was given by Mr. F. T. Corkett, F.R.P.S., at Nottingham, under the auspices of the North Midlands Printers' Managers and Overseers' Association, on Saturday, the 12th inst., when he took as his subject, "Photo-lithography and the Lithotex Process."

Mr. Corkett pointed out that photography was the great scientific assistant in the printing trade, and this was daily becoming more apparent, particularly in connection with photo-lithography. The lithographic trade, he said, had stood aloof for some time from photography, in fact, had rather regarded it with suspicion; latterly, however, there had been a great revival of interest, and now it was an admitted fact—though it had been previously denied—that the photo-litho zinc or aluminium printing plate could be made to give the finest possible quality. Not only was this so, but a much more permanent plate could be made than by the usual method of transferring, the process now naturally being received by printers with greater interest. The delay in the acceptance of this improved process was just one more example of the prejudice under which new things always suffer, both from employers and employees—employees mainly thinking they are going to lose their jobs, and employers being naturally reluctant in scrapping machinery.

Mr. Corkett, as our readers may know, has long been associated with many things of interest to printers, and he recalled some interesting experiences of the past, revealing incidentally that he has had a good deal to do with pushing forward new methods, and remembers the opposition put up to three-colour half-tone blocks, certain very important men in the trade maintaining that this process was of no use.

Already well known in connection with photogravure printing, Mr. Corkett stated that his latest child of adoption was photo-litho, particularly in conjunction with offset printing. He described the use of the Step-and-Repeat machine, the principal appliance of the "Lithotex" process, and explained how it makes duplicated photographic negatives, all spaced out correctly; he explained also how the various colour negatives can be made, and how exact register can be assured—in fact, such register as would be impossible by the usual methods of transferring.

The lecturer explained the simple way in which the printing plate is made from the multi-negative, and gave references to its sterling quality. He also pointed out that by the "Lithotex" method all impressions are original impressions, and not secondary ones, as are transfers.

Mr. G. Low, president of the local Association, was in the chair, and stated that all the lecturer had claimed had certainly been verified in the use of the "Lithotex" plant in the

establishment he was attached to, namely, Messrs. Thos. Forman and Sons, of Nottingham.

Mr. Ernest Garrett, who had come from Stockport to listen to the lecture, replied in a very satisfactory manner to inquiries relating to the actual printing of the plates.

The audience was a large one, and the lecture was listened to with great attention. The interest aroused was indicated by the putting of many questions, all of which were clearly answered.

## Printers' Musical Society.

A concert was held on Monday evening at Anderton's Hotel, Fleet street, under the auspices of the City of London Auxiliary and City of London Printers' Musical Society in aid of the funds of the Printers' Pension Corporation. The chair was occupied jointly by Mr. W. Watts, J.P., and the whole of the members of the executive. Last year this Auxiliary was fourth on the list in providing funds to the Corporation, raising the sum of £400.

The concert on Monday evening was well sustained by an excellent programme and a full attendance. The plate realised £85.

## Gazette.

### A WORD OF CAUTION.

In giving the official Gazette information, it must be distinctly understood that we take official records as we find them, and accept no responsibility for inaccuracies, while, as an almost invariable rule, the facts will be found correct. We advise our readers, before forming hasty judgment, to consider that there may be in each case satisfactory explanation which does not appear on the records.—Ed.]

### ENGLAND AND WALES.

#### PARTNERSHIPS DISSOLVED.

John Sclater Lamerton and Augustus William Haring, 21, Waterloo street, Birmingham, law stationers.

Joseph Clasper and George Gordon Jefferson, advertising agents, 9, Budle-street, Westmorland-road, Newcastle-upon-Tyne.

#### THE BANKRUPTCY ACT, 1914.

##### RECEIVING ORDERS.

Albert Henry Preston, Lynesack House, Chilton - buildings, Ferryhill, stationer, November 16th.

William Henry Wilkins, Post Office, Oak-hill, Somerset, stationer, November 19th.

THE Society of Wood Engravers, formed last year in order that English artists could revive an interest in an ancient and honourable craft, is holding its second exhibition at the Chenil Gallery, Chelsea.

## In the Newspaper Realm.

SIR JOHN LEIGH, BART., of 6, Carlton House-terrace, and Lilleshall, Shropshire, has purchased from the Hon. Morton Weir, son of Lord Inverforth, the *Pall Mall Gazette* and *Globe* newspaper. He takes over control on December 1st.

THE cases in which the *Daily Mirror* Newspapers, Ltd., are charged with corrupt practice in connection with the printing, publishing and posting of posters at the bye-election at Hertford, came before Mr. Justice Bailhache at the Herts Assizes on Monday. Mr. Leary applied for a postponement till the next Assizes, as application was to be made for a writ of *certiorari* to transfer the case to the King's Bench. This was allowed, and the charge against C. W. Glover for aiding and abetting was also postponed.

SETTLEMENT by consent was reached on Friday in the King's Bench Division in the libel action brought by Miss Ethel Irving, the actress, against the *Sunday Times* and its dramatic critic, Mr. Sydney Carroll. Miss Irving complained of a dramatic criticism of her performance in "The Three Daughters of M. Dupont," at the Garrick Theatre.

PRESS CLUB AND SPORT.—For the second of this season's house dinners the London Press Club had a sporting night on Saturday, when many leaders in the world of sport were entertained. The first lawn tennis match ever played by the Press Club will take place at Sotheby-road, Highbury, on December 4th, when the North London Hard Courts Club will be met.

SIR HENRY E. DUKE, President of the Admiralty, Probate and Divorce Division of the High Court, will be the guest of the London District of the Institute of Journalists at their annual dinner at the Connaught Rooms on December 17th.

THE Mile End Guardians last week presented Mrs. Browning, who before her marriage was a local journalist, with a silver cruet and set of serviette rings. The chairman said she had attended their meetings throughout the war, defying air raids, and sitting unconcerned when there was real danger.

THE funeral took place on Monday afternoon, at Elswick Cemetery, of the late Mr. James Jamieson, who died last Thursday at his residence, 12, Hawthorn street, Newcastle. Mr. Jamieson was in his 58th year and was a well-known local journalist. There were a number of floral tributes, including wreaths from the editorial, commercial and typographical staffs of the *Newcastle Daily Journal* from deceased's colleagues on the *Newcastle Chronicle*, and the local branch of the National Union of Journalists.

MR. WILLIAM REEVES, well known in journalistic circles throughout Ireland, died on Monday in a Dublin hospital.

AN interesting position has arisen in Paris as the result of newspaper rivalry. The French

Press is up in arms against the *Petit Parisien* owing to that paper's publishing simultaneous provincial editions, which, it is thought, will supplant local newspapers. A committee appointed at a general meeting of managers of daily newspapers announces that the French Press, in the interests of the public, newspapers and journalists, will be obliged to take joint measures against the *Petit Parisien*. The committee also charges the *Petit Parisien* with conceiving journalism solely as a commercial enterprise, and aiming through its superior resources to create a monopoly—that of opinion.

A NEW daily, the *Peking Express*, has made its appearance this month in the Chinese capital. It is the first paper in the English language to be owned and edited by Chinese, and is intended primarily for Chinese students.

## Trade Union Matters.

THE Liverpool Branch of the Typographical Association are levying themselves 6d. per week per member on all members earning not less than 75s. a week for the purpose of assisting their unemployed members who have run out of benefit.

THE Executive Council of the T.A. have censured the officials of the North-Western Group for their action in obtaining the result of the recent wages ballot before its official announcement.

WAGES REDUCTION AND NOTICE.—A curious position has arisen through several firms abstaining from posting notices of the T.A. wages reduction which recently came into effect. The Executive Council have issued the following ruling on the matter: "That where notices of reduction of wages had not been issued or posted the members employed in such offices were entitled to two weeks' notice of the firms' intention to make the reduction."

SCOTTISH TYPOGRAPHICAL ASSOCIATION.—The weekly contributions of the Scottish T.A. have now come into operation and are 3s. 9d. a week, divided as follows: Administrative, 2d.; protective, 6d.; out-of-work, 2s.; sick, 6d.; superannuation, 7d. Unemployed members do not contribute to the out-of-work portion when receiving benefit from it.

THE Printing Machine Managers new scale of contributions and benefits are: Earning less than 15s. a week, 6d., up to 45s. 6d. a week for those earning over £4 15s. The benefits range from 5s. a week to £1 17s. 6d.

THE Manchester Jobbing Printers' Guild give a yearly re-union to the superannuated members of the Manchester branch of the Typographical Association. This year a special effort is being made to make it a great success. A prize draw of over twenty prizes is being organised in aid of the funds. The first three prizes are valued at £15.

## Government Contracts.

Contracts were placed with the following firms during October:—

### Stationery Office.

PRINTING, RULING, BINDING, ETC.

1,000,000 Licence Forms.—Mersey and Sons, Ltd., London, S.E.

3,000 File Covers, Bdg. 42,500 Manual of Map Reading, etc. J. Adams, London, E.C.

2,900,000 Unemployment Insurance Forms, 20,000 Books, P. 1022.—John Worrall, Ltd., Oldham.

4,000 Books, P. 1038, 10,400 Books, Form R. 33.—McCorquodale and Co., Ltd., Wolverton, Bucks.

Bdg. 4,000 Books, General Index to Circulars.—Eyre and Spottiswoode, Ltd., London, E.C.

5,000 Books, P. 1037.—Warrillows, Ltd., Birmingham.

Bdg. 22,500 Manual of Map Reading, etc.—Dow and Lester, London, E.C.

2,000 Sketch Books, Form 27.—Drake, Driver and Leaver, Ltd., London, E.C.

5,000,000 Forms, A/c. 455, Bookwork Ptg., Parliamentary, Group 13 (1921).—H.M. Stationery Office Press, Harrow.

1,000 Telegraph Message Books.—J. Rissen, Ltd., London, E.C.

### Mr. J. E. Bennett.

We regret to record the death of Mr. James Edward Bennett (managing director of Cockayne and Co., Ltd., 185, Walworth-road), who passed away, aged 67, on Monday last week at Sutton, after a long and painful illness. He leaves a widow and a family of six sons and one daughter. His two sons, Edward James and Norman Charles, will continue the business in Walworth-road on the same basis as their father carefully maintained. Nearly half a century ago Mr. Bennett first entered the firm of Cockayne as an apprentice. On the death of Mr. Cockayne, senior, he obtained control of the business which, at that time, was only a small printing and stationer's shop. He took a live and personal interest in the concern, which was developed almost entirely on the strength of his own personality, until about a year ago, when failing health compelled him to relinquish control to his sons. Personally, he was extremely popular with all who knew him, including his work-people, for he had a happy faculty of becoming interested in people themselves as well as in their work. He ceased to reside in Walworth about 17 years ago, and had latterly been living at Sutton. He was a Freemason and a Junior Warden of the Basket Makers' Company. But for his illness he would this year have succeeded to the office of Prime Warden. The funeral took place on Thursday at Brookwood Cemetery. Besides the private mourners, a large number of the staff of Cockayne and Co., and representatives of other concerns in which Mr. Bennett was interested, were present.

### Mr. Harry Wilson.

THE death is announced of Mr. Harry Wilson, for fifteen years the overseer of the composing department of the *Manchester Guardian*. Mr. Wilson spent altogether 30 years in the service of the paper, having been appointed overseer in 1898 and having retired in the autumn of 1913. He died at Rishton last Thursday, at the age of 69. In the course of his long reign over the printing department the outward appearance of the *Manchester Guardian* underwent many changes. The methods of displaying both news and advertisements were greatly improved, the size of the paper and the number of editions were increased, and the issuing of special supplements became frequent. In all these developments Mr. Wilson necessarily played an important part. His employers testify that he undertook the new duties they imposed upon him with energy and understanding, and bore his part in the labour involved with credit to himself and advantage to the paper.

AN Advertisement is always working.

# Trade Notes.

THE London Master Printers' Association require an organiser, with a practical knowledge of the trade.

WILLIAM CRABTREE, a printer, was fined £10 and £3 3s. costs at Nelson for printing a football coupon contrary to the Ready Money Football Betting Act.

A MEETING of the creditors of Edwin George Green, of 12, New-street, Woodbridge, who has carried on a business as a stationer, news-agent and hardwareman, was convened last week at the office of the official receiver (Mr. T. W. J. Britton), at Ipswich.

A NEW magazine for travellers by sea, entitled the *Blue Peter*, has made its appearance. It is to be published every two months, and is intended to serve as the official magazine of the group of shipping companies with which Lord Inchcape is associated. It is published from 12, St. Mary-axe, E.C.

THE annual dinner of the Electrotypers and Stereotypers Managers and Overseers' Association will be held on Saturday at the Holborn Restaurant. Among those who have accepted invitations to be present are Messrs. W. Warren, H. Williams, S. W. Sinier, A. E. Holmes, G. Eden, E. W. Whittle, G. Naylor, John Fry and Glen Steel.

AT Hull Police Court, on Tuesday, Thomas Bell, editor and manager of the *Hull Daily News*, was fined £10 and costs on each of four summonses under the Lottery Act. It was stated that copies of the *Hull Daily News* of one date, and bearing separate numbers, were distributed gratuitously, and the recipients were told to watch subsequent issues for winning numbers, for which many prizes were offered.

LONDON "WELFARE" COMMITTEE.—In connection with the Welfare Committee recently appointed, consisting of representatives of the London Master Printers' Association and the London Printing Trades Federation, Mr. W. Whyte (secretary, L.M.P.A.) is appealing to master printers for any information they can give as to whether a house or works committee has been established in connection with their businesses, as the committee are anxious to get into touch at the earliest opportunity with all L.M.P.A. members interested in welfare work.

THE Hertfordshire Master Printers' Association held their annual dinner on Monday at the Holborn Restaurant, Mr. F. Dangerfield presiding. About 50 members and their wives sat down to an excellent repast. Among the guests were Mr. D. G. Little (representing the Federation), Mr. Albert Bennett (ex-president, Home Counties Alliance), Mr. T. J. S. Guilford (treasurer), and Mr. Percy D. Michael (secretary). (Mr. David Greenhill, president of the Alliance, is a member of the Herts Association). A capital musical programme was provided, and a most enjoyable evening was spent.

A NEW paper for women, the *Home Journal*, was published on Monday.

THE Northern Monotype Users' Association is meeting at Manchester to-day (Thursday), when representatives of the National Committee are expected to be present.

MR. HENRY WILSON Fox, M.P. for the Taunworth Division of Warwickshire, and formerly editor of the *South African Mining Journal*, died in London on Tuesday after a short illness.

UNDER the auspices of the *Daily Express* a special matinée of "Sybil" is to be given at Daly's Theatre on Saturday next, when the whole of the proceeds are to be given to the Lloyd Memorial (Caxton) Seaside Home.

WILLS.—Mr. W. H. Frankham, a director of the Frome Newspaper Co. (died June 10th), £29,815; Mr. Herbert L. L. Reiaich, King-street, Covent-garden, W.C., of Messrs. H. Reiaich, Ltd., printers, and of the *Yachting Monthly* (died on July 16th, at Queenborough), £3,224.

"THE TIMES" war memorial was unveiled on Tuesday afternoon by Field-Marshal Earl Haig, in the presence of a large number of relatives, friends, and members of the various staffs of that newspaper. The memorial takes the form of a tablet, inset in the wall of Printing House-square, on which are inscribed the names of the members of *The Times* staffs who died during the war.

THE Vicar of Leeds, on Friday afternoon, in the offices of the *Yorkshire Post*, unveiled a handsome memorial tablet erected by the directors to the memory of 34 men of the staffs of that paper and its associated journals who lost their lives in the war. The Hon. Rupert Beckett, chairman of the company, presided, and was supported by other directors and the heads of the various departments.

HERR HUGO STINNES, the German industrial magnate, arrived in London on Saturday from Berlin, accompanied by his son. They have been staying at Claridge's. The visit has aroused much speculation. Just prior to his arrival, news reached here from Austria to the effect that Herr Stinnes had added to his enormous newspaper interests by buying the majority of the shares of the *Athenæum* publishing house, thus acquiring the possession of three Hungarian papers which have Monarchist leanings.

THE VICTORY-KIDDER PRINTING MACHINE CO., LTD., of Birkenhead, who are the sole agents for the American Numbering Machine Co., inform us that there is no difficulty for customers to obtain ample supplies of the "American Visible," and that speedy delivery can be given. The firm are also in a position to carry out any repairs that may be needed—an extremely remote contingency. Descriptive literature will be sent to all who are interested, and meanwhile we would direct the attention of buyers to the firm's advertisement which appears on the second page of the cover of this issue.

### FORTY-THIRD YEAR.

Printed and Published **EVERY THURSDAY**  
by **STONHILL & GILLIS**,  
at 58, Shoe Lane, London, E.C. 4.

Tel.: Stonhill, Fleet, London. Phone: 8407 City.

Copies may be purchased at the Offices, as above  
or from Messrs. W. H. Everett and Son, Ltd., news-  
agents, 11, St. Bride-street, E.C. 4.

THURSDAY, NOVEMBER 24, 1921.

## Current Topics.

### Print and Postage.

THE Postmaster-General's recent expressions of "hopes" of some diminution of postal charges in the rather distant future have by no means sufficed to still the agitation for the removal of the increases in the rates for printed matter and post cards. The handicap upon the printing trade remains, and until some adequate rectification of the business-killing imposts is forthcoming the agitation is likely to continue. There is no cessation in the ever-growing stream of evidence as to the harm that the Post Office is inflicting upon the printing trade, and the officials responsible are certainly unable to plead that this evidence has not been brought to their notice. To previous evidence adduced by the Federation of Master Printers Mr. Goodwin has lately furnished the Postmaster General with further facts as to the effects of increased postage as manifested in the still growing unemployment in the picture

post card branch of the industry and also in the curtailment of printing orders for publicity and other matter affected by the printed matter rate. The solidarity of the trade in believing that printing is hereby receiving a severe set-back is evidenced by a letter which has been sent to the Postmaster-General by the Joint Industrial Council of the Printing and Allied Trades, pointing to the serious growth of unemployment in the industry and urging the need for an early announcement of reduced postal charges.

### Railway Rates.

PRINTERS have a strong case against the proposed alteration of the classification of printed matter in respect of its carriage by rail. The alteration if carried out would mean an increase in the rates for all printed matter, and would strike an especially heavy blow at the producers of certain classes of print, particularly magazines and booklets. The Federation of Master Printers having carefully considered the matter, presented their case to the railway companies on Tuesday when an influential deputation was received at the Railway Clearing House. The deputation having argued for the retention of the present classification, the railway representatives pointed out the difficulties which, they stated, led the companies to maintain that it was necessary to put stationery and printed matter in the same classification. Representations were also made by the Monotype Users' Association and the Ink Manufacturers' Federation regarding rates on their products. The deputation undertook to submit definite proposals in the matter, and these were promised the careful consideration of the railway companies.

### Lower Paper Prices.

AS AN illustration of the decline in paper prices since the Armistice, it is pointed out that two years ago a London firm of stationers and booksellers ordered 50,000 printed postal wrappers. The paper used was a fair quality, M.G.—the customary stock for this item. The price quoted and accepted was £25. A few weeks ago the same firm, finding its stock running short, ordered another 50,000 wrappers of the same quality. In this instance the price was a trifle under £12! In view of the fact that printing costs have declined by the merest trifle, it must be assumed, says the *Export Mail*, which presents the illustration, that the reduced price was made possible only because of the decline in the cost of paper.

## Personal.

MR. E. D. NUTTALL, secretary of the National Trade Advisory Committee of the Printing and Kindred Trades, addressed the members of the London Master Printers' Association at their monthly lunch on Tuesday on the question of disabled sailors and soldiers.

MR. R. A. AUSTEN-LEIGH presided, and he and other speakers asked for the sympathetic attention of master printers to the plea which Mr. Nuttall had made on behalf of the disabled men allocated to the printing trade.

MR. JAMES MACLEHOSE, LL.D., president of the Federation of Master Printers, gave an outline of the pressing problems now engaging the attention of his organisation, remarking incidentally that the Postmaster-General was considering whether it was practicable to make any concessions with regard to printed post cards and printed matter.

MR. GEORGE EATON HART, Mr. J. R. Riddell and Mr. H. B. Cahusac took part in the discussion, and a vote of thanks was passed to Mr. Nuttall on the motion of Sir Wm. Waterlow, seconded by Mr. A. Langley.

MR. T. OWEN JACOBSEN (chairman, Jacobsen, Welch and Co., Ltd.), and Mr. T. E. Naylor (secretary, London Society of Compositors), will, as we anticipated last week, contest South-East Southwark in the forthcoming bye-election, the writ for which will probably be issued under the Speaker's warrant at the end of this week.

ALDERMAN W. C. BUSTIN, J.P., the compositor-mayor of Bermondsey, has entered upon his third successive year of mayoralty.

MR. HEDLEY MILLER, secretary of the Master Bookbinders' Association, returned last week from a short stay in Switzerland, where he attended the International Labour Conference.

MESSRS. W. M. BOWER and C. L. STERN, of Linotype and Machinery Limited, were the lecturers at a recent meeting of the Printers' Managers and Overseers' Association at Leicester, when, with the aid of lantern slides, a very interesting and instructive account was given of the Linotype Company's typesetting and printing machines.

MR. A. H. MUNDEY, London manager of Fry's Metal Foundry, who was for many years chief metallurgist to the Royal Arsenal, Woolwich, and lecturer on metallurgy to the Northampton Institute for over 20 years, gave a lecture on November 8th,

1921, at the headquarters of the 19th Batt London Regiment (The Queen's) at St. Pancras. The lecture was entitled "The Story of the Big Gun," and was illustrated by lantern slides, descriptive of the growth of ordnance from the earliest stone-thrower to the modern weapons of to-day. Lieut.-Col. McClure, D.S.O., presided, the audience numbering over 350.

MR. S. MOSS, runner-up in the final of the 9 st. 9lb. boxing competition held under the auspices of the Printing and Allied Trades Charity Sports Association at the Northampton Institute on Friday last, is one of the staff in the London works of Fry's Metal Foundry

MR. J. FLEMING (Hudson and Kearns) is to take the chair on Saturday at a concert at "The Horns" Assembly Rooms, Kennington Park, in aid of the funds of the Printers' Pension Corporation.

MR. J. PARKHAM, manager of the *Daily Chronicle*, presided at the second annual dinner and concert of the London and Provincial Newspaper and Periodical Travellers' Fellowship, held at the Connaught Rooms.

THE claim made tentatively in last week's issue as to the oldest father of the chapel in the trade has brought us a letter from Messrs. Edward Mortimer, Ltd., Halifax, who tell us that they have in their employ a father of the chapel, Mr. Walter Highley, who has occupied that position continuously for 37 years. Mr. Highley is 71 years of age, and still hale and hearty, and his employers are hoping he will be with them for a great many years yet.

## Kent Education Stores.

At a meeting of the Kent County Council on Wednesday, the Joint Sub-Committee formed to consider a recommendation that the Education Stores Department should be taken over by the Council and made available for every Department reported that they had come to the conclusion that direct supply was effecting a great saving as compared with the contract system, and that for educational supply it should be continued on the present lines, but they considered the time was not opportune for the department to be taken over by the Council so that it might supply every branch of the Council's requirements. An amendment was moved "That the Committee obtain the prices of the majority of the articles usually purchased from wholesale houses, including the cost of direct delivery to schools, and compare the cost of such system with the method now adopted." Ald. Hussey said they bought direct from the cotton mills, paper mills and so on, and in that way saved the trade profits. He added that the Committee were unanimous with regard to their report. The amendment was lost and the report passed.

## DIVIDENDS AND REPORTS.

ILFORD, LTD.—Dividend 8 per cent. on the ordinary shares for the year, same as for preceding year.

A. B. FLEMING AND Co.—Interim of 5 per cent. (actual) announced by this Edinburgh firm of printing ink and chemical manufacturers; same as a year ago.

A. M. PEEBLES AND SONS.—Directors announce that they cannot submit accounts until amount of pending claim for revision of excess profits duty has been settled. Immediately after settlement report will be issued.

"IRISH TIMES."—Profit of the *Irish Times* for year ended September 30th, 1921, after payment of salaries, wages, management expenses, etc., and providing for bad and doubtful debts, was £29,196, less income and corporation tax £14,962, leaving £16,233 plus £11,550 brought in, making £27,784. Directors have written off depreciation on premises, plant, machinery, etc., £1,015, and propose placing to general reserve £1,000, final dividend on preference shares at rate of  $5\frac{1}{2}$  per cent. per annum, less tax, and final dividend on second preference shares at rate of  $6\frac{1}{2}$  per cent. per annum, less tax, carrying forward £10,404. Owing to prevailing economic conditions directors do not consider it prudent to recommend dividend on ordinary shares.

## NEW COMPANIES.

DORAN HART AND Co., LTD.—Capital £1,000 in £1 shares; printers, lithographers, publishers, stationers, electrotypers, engravers, die sinkers, typefounders, envelope manufacturers, etc. Private company. First directors: A. V. Doran and L. H. Hart. Registered office, 57, Blackfriars-road, S.E.

FORM LETTERS, LTD.—Capital £1,000 in £1 shares, to adopt an agreement with R. B. Barton and E. L. Willmott, and to carry on the business of facsimile letter and general printers and lithographers. Private company. First directors: M. Bartholomew, junr., Miss D. Cowtan. Registered office, 6a, Tudor-street, E.C.4.

ALFRED BOND, LTD.—Capital £16,000 in £1 shares, to take over the business carried on by A. Bond, M.P.S., at 45, Bank-street, and 44, Fore-street, Newquay, and to carry on the business of chemists, dealers in fancy goods, books and stationery, etc. Private company. First directors: A. Bond, C. E. Whitford, M. Gatley and two others nominated by them.

WARBEY'S STORES, LTD.—Capital £1,000 in £1 shares, to acquire the business carried on by G. T. Warbey, at 140, Seven Sisters-road, Holloway, and 675, High-road, Tottenham, and to carry on the business of stationers, booksellers, dealers in bags, fancy leather goods, toys, etc. Private company. Subscribers: G. T. Warbey and Mrs. I. Warbey. Registered office, 140, Seven Sisters-road, Holloway, N.7.

CROOKES, ROBERTS, RITCHIE AND Co., LTD.—Capital £80,000 in £1 shares, to take over the businesses of a manufacturer of guillotine machine knives, rag engine roll bars and bed-plates, doctor blades, high speed and crucible steel, and other articles carried on by W. J. Ritchie, as "Crookes, Roberts and Co.," at the Argus Works, Shoreham-street, and as "W. J. Ritchie and Co.," at the Freedom Works, John street, and Arundel-lane, both in Sheffield, and to carry on the same and business of mechanical, electrical, hydraulic and general engineers' manufacturers, timber merchants, etc. First directors: W. J. Ritchie, W. Ritchie and A. Crooks. Regis-

tered office, Argus Works, Shoreham-street, Sheffield.

**ADAMS PUBLICITY, LTD.**—Capital £3,500 in £1 shares (2,500 8 per cent. cum. pref. and 1,000 ordinary), to adopt an agreement with Adams Brothers and Shardlow, Ltd., for the acquisition of the advertising business carried on by them. Private company. First directors: E. R. Adams, P. G. R. Wright, K. O. Fearon, A. R. Innes and H. R. Markham. Registered office, 72, Chiswell-street, E.C.

### COMPANY MORTGAGES AND CHARGES.

*Frish Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 1908, and Satisfaction registered pursuant to Section 97 of the same Act. (The registration of Satisfaction is not compulsory).*

**GLOSSOP PRINTERS, LTD.**—Issue on November 3rd, 1921, of £850 debentures, part of a series already registered.

**WARRILLOWS, LLD.** (printers, etc., London and Birmingham).—Memorandum of deposit of November 1st, 1921, charged on certain freehold and leasehold lands, hereditaments and premises in Birmingham, to secure all moneys due or to become due from company to L. J. C. and Midland Bank.

**SAMUEL JONES AND CO., LTD.** (gummed papermakers and paper glazers, etc., London).—Mortgage or charges on certain moneys payable under refund of excess profits duty dated October 21st, 1921 (supplemental to land registry charge dated September 23rd, 1920, securing £25,000). Holders: North British and Mercantile Insurance Co., Ltd.

**CONTRACTOR'S RECORD, LTD.**—Debenture dated November 9th, 1921, to secure £300; charged on company's property, present and future, including uncalled capital. Holder: Mrs. R. Bigg, Coombe House, Stanmore-road, Richmond.

**REMBRANDT INTAGLIO PRINTING Co., LTD.**—Mortgage dated November 9th, 1921, to secure £10,000; charged on various properties in Lancaster. Holders: Stovey Brothers and Co., Ltd., White Cross Mills, Lancaster.

**PHILIP AND TACEY, LTD.** (stationers, etc., London).—Satisfaction to the extent of £300 on November 2nd of charge dated June 8th, 1921, securing £7,000.

**BELL PUNCH AND PRINTING Co., LTD.**—Debenture dated November 1st, 1921, to secure £30,000, charged on the company's property, present and future, including uncalled capital. Holders: Barclays Bank.

**HARWELL (BIRMINGHAM), LTD.** (paper merchants, printers, paper bag makers, etc.).—Debenture dated November 9th, 1921, to secure £150, charged on the company's undertaking and property, present and future, including uncalled capital. Holder: W. H. Porter, 44, Church-street, Birmingham.

**FRANK AND MONTAGUE, LTD.** (manufacturers of and dealers in leather and leather goods, paper and cloth goods, etc.).—Memorandum of

deposit, dated November 9th, 1921, charged on 13 and 15, Underwood-street, E.C., to secure all moneys due or to become due from company to Barclay's Bank.

**YATES DUXBURY AND SONS, LTD.** (manufacturers of paper, paper bags, etc.).—Trust deed dated October 27th, 1921, to secure £150,000 debenture stock, charged on certain freehold and leasehold hereditaments, rights, etc., in Heap Bridge and Heywood, Lancs, and company's other assets, including uncalled capital. Trustees: R. Crerar, Spring-gardens, Manchester, and J. W. Shepherd, Manchester.

**PENCILLA Co., LTD.** (London).—Issue on November 2nd, 1921, of £290 debentures, part of a series already registered.

### BANKRUPTCIES, etc.

*Re OLYMPIC PRESS, LTD., 48, Russell-square, W.C.*—A winding-up order having been made against this company, the first meetings of creditors and shareholders were held on Tuesday at the Carey-street offices of the Board of Trade, Lincoln's-inn, W.C. Mr. G. D. Pepys, official receiver, reported that the company was registered in June, 1919, with a nominal capital of £40,000 to take over from Mr. Samuel Atkinson, the literary and artistic material accumulated by him for the production of a magazine entitled *Sports and Sportsmen*, and to carry on business as printers and publishers. Mr. Atkinson was appointed managing director; the first issue of the magazine appeared in November, 1920, and monthly copies were published until April, 1921, when the issue was suspended owing to want of capital. Creditors for £1,603 in respect of loans, interest and rent pressed for payment in April, and in the following month the printers obtained judgment and furnished the bank account with other assets. The company owed £5,199 and valued the assets at £1,949. The liquidation was left in the hands of the official receiver.

*Re WM. AUGUSTUS OAK, stationer, etc., 168, Norwood-road, S.E.*—Under a receiving order made at the London Bankruptcy Court against this debtor in October last, the first meeting of creditors was held on November 14th before Mr. F. T. Garton, official receiver. The debtor was discharged from the army in March, 1917, and then agreed to purchase the above business for £1,500, payable by instalments of £200 per annum. The arrangement was subsequently varied, the price being agreed at £1,400 and the payments to be at the rate of £5 a week, which payments the debtor kept up till September last. The failure was attributed to ill-health in consequence of which the debtor had to employ more labour than the business could afford; to heavy expenses of repairs to the premises, lack of capital, and heavy interest charges on borrowed moneys. The liabilities amounted to £1,849 against assets valued at £167. The case was left in the hands of the official receiver.

# The Bookbinder.

## The Production of Elaborate Bindings.

The bookbinding trade is no exception to others in that the disastrous economic effects of the war have been felt with special severity by those sections concerned with the more elaborate and costly work—i.e., the ornamental or luxurious, as distinct from the necessary or utilitarian. We gather that the few firms specialising in expensive bindings have lately been experiencing a most formidable period of diminished demand for this class of work. The slump is all the more trying because of the long-continued and steady growth of the demand up to the time when the war miasma brought partial paralysis in its train. The development of this branch of binding had been proceeding satisfactorily for some twenty years or so before it was arrested, and it had by that time reached very considerable proportions, a gratifying feature of the situation being the value of our exports to America, whose bibliophiles were purchasing British bindings of which single examples sometimes sold at prices running well into four figures.

### A Handsome Example.

Fortunately, however, the market for elaborate bindings is not altogether dead, as we were reminded last week on coming across a magnificently-bound copy of the "Rubaiyat" of Omar Khayyam, which was being sent over to America to sell at probably £150-£200. This example was from the hands of the binder-craftsmen of the well-known house of Sangorski and Sutcliffe, of Poland-street, London, W., a bindery which has many notable pieces of craftsmanship to its credit, among them the £1,400 "Rubaiyat" which went down with the ill-fated "Titanic." The "Omar" of which we are now speaking was, of course, much less elaborate than its four-figure predecessor, but was an admirable piece of work, well worthy of a brief description here. The volume was bound in crimson levant morocco, with leather joints, green levant doublures and flyleaves, and the whole binding elaborately inlaid, gold tooled and set with precious stones. The dominant feature in the design was a peacock with its tail outspread, decoratively arranged in the centre of the front cover and surrounded by a vine border, green and purple, the whole richly inlaid and tooled upon a gold, closely studded background. The central feature in the design of the back cover was a snake entwined around

a wine-cup, filling a circular centrepiece slightly sunk below the surface of the cover and surrounded by a rose border, the whole design symbolising Life and Death. Both doublures were decorated with a border suggestive of peacock's feathers, together with a light diaper of stars. Four hundred and eight separate pieces of inlay were used in the decoration of this binding, together with 21 topazes, five pearls, three moonstones, three amethysts, one small sapphire, a small ruby and four butterflies cut out of mother-of-pearl. The stones were, of course, not used obtrusively, but were so selected and placed as to give touches of special brilliance where this was desirable, the whole design having thus a harmonious but striking effect.

### "Marking Time" in the Trade.

Naturally it is a matter of regret to the present-day expert craftsman that the mere accident of age should give unearned value to books produced by craftsman long since dead, whose workmanship was in many cases inferior to what can be done to-day. At Messrs. Sangorski and Sutcliffe's, for instance, one can see in progress not only binding work of superlative quality, but also the production of hand-illuminated books (on vellum) of a beauty that makes them worthy of a place beside the old manuscripts that are so highly prized. Modern manuscript books, we fancy, represent a section of book-production destined to experience a big increase of popularity in years to come. But for the present the demand for such work, as for binding in costly style, is very small in volume. Producers of elaborate bindings, however, have an advantage over the ordinary publishers' binder in that there is some export demand for their productions, moreover, they can work for stock, in so far as their confidence and courage allow them to tie up money in this way. Messrs. Sangorski and Sutcliffe, we notice, show a good deal of such enterprise in keeping their expert craftsmen employed. It should not be thought, however, from what has been said, that this firm confines itself wholly to work of the elaborate kind. A good deal of general binding is carried out at Poland-street, whilst there is also expert repair work to be done on many valuable old volumes, as well as other minor applications of the bookbinder's art. Though the trade in elaborate

books is at present slack, the lull must be regarded as merely temporary; the trade is "marking time" preparatory to a forward march when returning national prosperity permits. Things of beauty have a rightful place in the world as well as things of use, and it is only a question of time before the

work of the artist-binder will be as much in demand as ever — indeed more than ever before, for with the growth of education the appreciation of the beautiful in books is being shared by an ever-increasing public. The golden age of book-production lies not in the past but in the future.

## Binding Notes and News.

### The Docket Question.

Nothing further has been heard of the bookbinders' docket since it was referred to the Six-a-Side Committee in August. It is now the close of November, and under normal conditions four months should be ample time in which to get down to work and show results. Doubtless a lot of official time has gone toward solving other labour and wage questions, but there are members enough on either side to permit the selection of a committee independent of matters other than the one it has been constituted to deal with. From what we know of official methods in the Federation, it would appear that the leaders are not content to supervise and administer. They are anxious to perform routine work on a number of committees. The consequence is that work is delayed and often imperfectly performed. Immediately a long and delicate negotiation on wages or conditions sets in it is accepted as inevitable that all other operations must go to the winds. This is where the binder's docket has gone, despite the fact that the whole subject of costing is now to receive judgment at the hands of the J.I.C. The reference to official committee of the binding docket was its burial for the time being. The only way in which to effect a resurrection is for the members of the Federation to press for and demand immediate action from their elected councils.

### The State of Trade.

The bookbinding industry keeps very quiet, and no definite improvement has yet set in. Publishers are doing a little more for the Christmas season, particularly in fancy gift books. Children's annuals and the popular year books have helped to provide extra work for the time being, but this is merely a passing phase. On the stationery bookbinding side things have fallen very flat, and the prospects are anything but bright. The largest users of account books, etc., are waiting for better conditions of trade, and when they come there is a big stock of stationery to be worked off. The scarcity of orders has caused bookbinders' prices to come down to the danger zone. As with the printers, price cutting is in vogue—a senseless procedure, and one that will do incalculable harm to future trade. The firms that do the cutting do it with their eyes shut. If they knew their costs they might cut, but unless they had become hysterical they would not cut below cost. That is another aspect of the binder's docket, and one that ought to have as much interest for workers as for employers.

### New Fancy Leathers.

Some striking new designs in fancy leathers have been produced by James Garner and Sons, of Bermondsey. For the new fashion in ladies' millinery a range of wonderful colours in plain skivers has been put on the market. For the fancy leather goods trade the new issues include Ecrase Calf Grain Skivers, a series of artistically dyed skins beautifully grained, crushed and polished. Then there is the Snake Grain Skiver in which reptile patterns and colourings are faithfully reproduced. This series is admirably adapted for use in the manufacture of purses, wallets, handbags, photo-frames and novelties. For the fancy book trade there is a whole host of designs, colourings and finishes designed to meet the modern taste in daintiness.

### Leather Prices.

Bookbinders' materials have not altered much in price since our October notes appeared. For leathers the prices still average round about: skivers 5d. to 7d. per square foot, plain 6d. to 9d. embossed and special colours; pastegrains, 7d. to 8½d.; glazed basils, 7d. to 10d.; rollers, 7d. and 8d.; fair basils, 9d. to 1s.; rough sheep, 8d.; fleashes, 7d.; rough morocco, 10d.; rough calf, 1s. 2d. to 1s. 6d.; fair calf, 1s. 6d. to 1s. 9d.; pigskins, 1s. 6d. to 2s.; anglos, 1s. 9d.; hard-grained goat and morocco, 2s. to 2s. 6d.

### The Glue Market.

Glues are unaltered and the demand has improved. Bookbinders are making increased use of hide glues, which although dearer than bone glues (62s. to 65s. against 45s. to 50s. per cwt.) are purer and more economical in working.

### Book-Cloths.

Book-cloths still remain about three times their pre-war cost, an unjustifiably high price compared with market prices generally. The same applies to threads and tapes of all kinds despite a recent reduction. Until these materials come down to a more reasonable level bookbinders and other users are well advised to abstain from unnecessary commitments. Buckram is in the same category, though here the comparative scarcity of the raw material may be some justification. Calicoes and fabrics remain unaltered, and again the price is out of relation with natural expectations. Meantime customers on every hand complain of the dearthness of books and attribute the high cost entirely to the labour wage. Wages may have to come down still further, but until there is a more considerable

decline in the cost of materials, customers will have every reason to complain of price.

### Some Price Reductions.

Goldleaf has fallen a little recently—3½ best deep 22-carat being quoted 52s. 6d. per 1,000 leaves—and there has also been a reduction in the price of paste, millboards and marble paper. Other papers used in the process of bookbinding have reached a comparatively low level. Strawboards are selling below the cost of production, the latest quotations being round about £8 10s. per ton (lightweight and basis). Even the Dutch mills cannot improve on that figure by quoting direct. There are still heavy stocks on this side, but they are now being gradually worked off. When the demand sets in for imports prices may harden.

## Bookbinders' Appeal.

An appeal on behalf of the funds of the Bookbinders' Cottage Homes and Pension Society is being made throughout the trade. In a letter accompanying the appeal which Mr. J. Græme Bain, the treasurer of the Society, describes as a veritable "S.O.S." signal, it is stated that during the war years, 1915-16, revenue unhappily fell short of expenditure to the extent of £445, which had to be withdrawn from *capital funds* to meet current expenses, and it is now found that in spite of every possible economy, the Society's revenue this year will practically be exhausted by December 31st. In order to carry on until April next (being the end of the Society's financial year) it will be necessary to break into the capital funds again to the extent of £275 if substantial assistance is not quickly forthcoming. The necessary increases granted to the pensioners, to meet the increased cost of living, increased rates, and additional expenses, over which the committee have no control, mainly account for the prospective deficit.

## Openings for British Trade, etc.

Inquiries have been received by the Department of Overseas Trade (Development and Intelligence), 35, Old Queen-street, London, S.W.1, to whom further inquiries should be addressed with the reference number quoted.

### SOUTH AFRICA.

A Cape Town firm of manufacturers' agents desire to secure the representation of United Kingdom manufacturers of account and note books, and writing pads. (Reference No. 401.)

### ARGENTINA.

A commission agent resident in the Argentine, and having 25 years' experience of the market, desires to obtain the representation of United Kingdom manufacturers of wall-paper. (Reference No. 418.)

## The State of Employment.

Employment during October was bad generally, a considerable amount of short time being worked in all branches. The percentage of workpeople unemployed in the printing, publishing and bookbinding trades, as indicated by the unemployment books lodged at Employment Exchanges, was 7·2 at October 28th, as compared with 7·0 at September 30th. In addition, 1·1 per cent. of the workpeople were claiming benefit in respect of systematic short time working at October 28th, as compared with the same percentage at September 30th.

With letterpress printers employment in London and the provinces remained bad, and showed little or no improvement on the previous month; a considerable number of workpeople were on short time. Employment also continued bad in the lithographic printing trade; a slight improvement was reported at several centres, including Leeds, Halifax and Belfast, but there was a further decline with lithographic artists in London. Returns received by the Ministry of Labour from employers, covering about 6,800 workpeople in the letterpress and lithographic printing trades showed that nearly 25 per cent. of these workpeople worked, on an average, ten hours per week short of full time.

Employment continued bad generally in the bookbinding trade, in which there was again

a large amount of short time. Of 3,250 workpeople covered by returns received from employers about 35 per cent. worked, on an average, nine hours per week short of full time.

Of a total membership of 77,137 in printing trade unions reporting to the Ministry of Labour, 8·2 per cent. were unemployed at the end of October, 1921, compared with 7·8 per cent. in September, and 2·8 as against October, 1920, showing an increase of 0·4 per cent. compared with a month ago and an increase of 5·4 contrasted with a year ago. Of bookbinders, with a trade union membership reporting of 15,028 members, 8·9 per cent. were unemployed at the end of October, 1921, compared with 9·4 per cent. in September, 1921, and with only 1·1 per cent. in October, 1920—thus marking a decline of 0·5 per cent. in the month and an increase of 7·8 in the twelve months' period.

# New Inventions.

## Feeding Sheets to Ruling Machines.

Under a patent by A. Broadmeyer and the Hickok Manufacturing Co., sheets are fed to ruling and like machines by a belt as 8 passing over adjustably mounted rollers 10, 11, 12, and fitted with cords 9 to prevent slipping of the sheets, which are registered by rising and falling gauge fingers 38 carried by a shaft 28 which is mounted and actuated in such a way as to permit of adjustment of the time of operation of the gauges, and of their position. The axis of the cam which operates the gauges is at right angles to the pivotal axis of the gauges. The shaft 28 is fitted with end

socketed portions which revolve on studs 30 fitted with balls 31, Fig. 6, forming part of a ball-and-socket joint connecting the studs to uprights 25, which are longitudinally adjustable in guides 17 fitted to the side frames 7 of the machine. Both ends of the shaft 28 are similarly mounted and by fixing one end and adjusting the other, the gauges may be made to correspond with the transverse cut of the paper to be ruled. The gauges 38 are adjustably held by screws 39 in sockets on sleeves 33, and the sleeves 33 are adjustable longitudinally of the shaft 28 and are held in place by screws 34 engaging a recess in the shaft 28. The shaft 28 is oscillated from a face cam 41, Fig. 3, the shaft 40 of which is parallel to the frames 7, and at right angles to the shaft 28. The cam 41 acts on a roller 44 carried by a bell-crank lever 42 the pivot 56 of which is

adjustable axially by a screw 57, so as to vary the time of action of the gauges. The bell-crank 42 is fitted with a bearing-plate 46 which acts on an adjustable screw 50 carried by an arm 49 on a sleeve 48 fixed to the shaft 28. The cam 41 acts to move the gauges 38 away from the belt through the agency of the lever 43, plate 46, and arm 49, and they are returned by an adjustable spring 53 acting on a second arm 52 on the shaft 28.

## Varnishing or Gumming Paper.

An invention patented by Messrs. E. and H. Bush relates to machines for varnishing or gumming sheets of paper, etc., of the kind wherein the sheets are carried round by

a rotary cylinder 1 against which bears a coating-roller mounted on a shaft 7 and receiving coating material from a feed-roller 5 rotating in a trough 4, a second shaft 7 is provided which is adapted to be interchanged with the first, one shaft being provided with a continuous coating-roller and the other with a series of adjustable coating discs 6, so that the coating may be applied either in a continuous film or in strips. Each disc is provided with a scraper

mounted on an adjacent shaft 12 and comprising adjustable blades, *a, d* bearing on the sides of the disc and a blade *c* projecting from the blade *a* and adapted to bear on the periphery of the disc.

### Mounting and Embossing Prints.

An invention has been patented by Mr. H. P. G. Steedman which relates to machines for continuously affixing sheets of paper, etc., to canvas and like mounts, of the kind in which the sheet of paper to be mounted is carried round a cylinder, coated with adhesive, and then fed in exact register with the mount to which it is to be attached between the said cylinder and an adjacent cylinder, and consists in the provision of means for embossing or graining lithographic and other prints, leather, etc., and simultaneously mounting them on canvas or other backing, such means being particularly adapted for producing mounted reproductions of oil paintings prepared according to the process described in Specification 15108/11, wherein lithographic prints in colours to reproduce the oil painting are mounted on canvas, etc., backing, and then embossed so as to imitate the canvas grain, brush marks, and varying paint levels of the original. Means are also provided for feeding the backing material in the form of a continuous web, for severing therefrom pieces of the required length, and for feeding such pieces to the embossing rollers in registration with the adhesive-coated prints, etc. In the arrangement shown, the prints, etc., to be mounted and embossed are carried into the machine by an endless-carrier 5 provided with cross bars 6 having grips or pins 7 to grip the successive prints, the backs of the prints being coated with adhesive by a roller 18 supplied from a trough 13 by means of distributing-rollers 14, 16, 17. If the print is incorrectly fed, the adhesive roller 18 may be tripped by means of cams 19 operated by links 20, 21 from a shaft 22 provided with a hand-lever. The adhesive-trough and its distributing-rollers are mounted on a carriage 98 adapted to be moved by a pinion 100 along rack bars 99 to give access to the interior of the machine. As the gummed print enters the bite of the embossing rollers, 3, 4, a piece

of backing material is fed in exact registration therewith, severed by means of cutters 52, 53 on rotating cutting-rollers 35, 36 from a continuous web 28 of canvas or other backing, and forwarded to the embossing-rollers by the feed-rollers 37, 38, 39, 40, 41, 42, 43. The web 28 is fed to the cutting rollers by other feed-rollers 31, 32, 33. Of these two sets of feeding-rollers, the roller 33 and the rollers 38, 40, 42 are positively driven by bevel-gearing and change-gear wheels from the shaft of the lower embossing-roller 3, the other feed-rollers rotating frictionally. The cutting-rollers 35, 36, which are geared together and spaced a sufficient distance apart to enable the backing-material to be fed between them at different speeds according to the lengths of

backing-material to be severed, are driven by fixed gearing from the upper embossing-roller 4 so that each severed piece is fed between the embossing-rollers in correct register with each gummed print. By changing the gear wheels between the shaft of the roller 3 and the bevel-gearing that drives the feed-rollers, the rate of feed of the web of backing-material may be varied so as to vary the length of the severed pieces. The feed-rollers below the cutting-rollers are arranged to exert only a light pressure on the several pieces in order to permit the embossing-rollers, which are moving at a higher speed, to withdraw the severed strips without tearing or stretching. When the machine is used for mounting prints of less width than the usual width of the roll of backing-material, a slit 72 is provided to divide the web longitudinally, one part passing into the machine, and the other part 28a being led away and rewound.

## Notes and Comments.

### **Slowness of Trade Revival.**

THERE were hopes in some quarters a few months ago that the printing and allied trades would by December have experienced a very substantial revival of business both in respect of export and home markets. The month opens, however, with but little sign of the much-desired amelioration. True, there are firms who report an awakening of overseas demands, but we fear this is by no means a general experience. Rather must the industry take what comfort it can from the widely accepted view which was given expression last week by Mr. Robert Horne, who, speaking at Glasgow Royal Exchange, said that we had reached the bottom of the slump in trade and were beginning the ascent to future prosperity. May that future prosperity not be long delayed!

### **Hindrances to Export.**

AS YET, however, prosperity seems a long way off. With the exchange chaos still awaiting some really businesslike attempt at rectification, with industrial enterprise crippled by heavy taxation, and our Post Office adding to these burdens by what amounts to a further tax upon the transmission of printed matter, it is not surprising that trade revival is slow in making its appearance—even apart from the fact that our former overseas customers are some of them almost bankrupt and would all find it difficult to do much purchasing even were our prices less unfavourable than they are. As regards

taxation, the Washington Conference certainly introduces a ray of hope, for the large part which armaments play in swelling our taxes is patent and appalling. With income tax appreciably reduced, prices would be able to follow suit and some increase of business result. But such reduction could by no means counteract the immense handicap which our export trade suffers by reason of the depreciated European exchanges. This problem is a baffling one, but its solution seems to lie at the very root of any considerable trade revival that can be hoped for. Something should be forthcoming, we feel, from the suggestion that has just been put forward by the Council of the Federation of British Industries to the effect that a conference with manufacturers in the United States should be arranged to consider whether common action could be taken to stabilise the exchanges. If by this or any other means the exchange situation can be modified so as to offer less insuperable obstacles to fair competition, the chief bar against British export trade will have been broken.

### **German Competition.**

GERMAN producers of printing and of goods of all kinds required by printers are showing great activity. They have settled down with remarkable determination and efficiency to the task of capturing or recapturing the world's markets in respect of the printing and allied trades. In this effort they are assisted on every hand by the continued extraordinary

state of the exchanges, and their propaganda now appearing not only in some of our overseas markets but also in this country and in the United States must provide some searching tests of the trade loyalty and patriotism of the recipients of seductive offers. These offers, made principally by means of a vigorous direct-mail campaign, addressed both to printers and to consumers of print, can often show notable cheapness as compared with British products, but we believe that in many cases the acceptance of the goods proffered would lead to sad disillusionment on the score of quality. British products in the printing and allied trades are, we maintain, unbeaten for quality, and they are in many cases unbeatable. Moreover, it stands to reason that machinery, accessories, printed matter, etc., when produced with severely cut costs for labour, methods of production, materials, overhead expenses, and all else that goes to the determination of selling prices, cannot be expected to compare with products of British factories run under conditions favourable to the workers, and so conducted that the importance of quality of workmanship is continually emphasised. However, the present is no time for British producers to rest on their laurels. German competitors can produce high-class goods when they want to; moreover, their old enterprise and assiduity in the adoption and development of new processes of production are again being evidenced. There are still big possibilities ahead in the improvement of the processes employed in the printing and allied trades, and if German printers, by the utilisation of improved methods—the "Manul" process, for instance, or any other new departure which may be forthcoming—can cut down costs of production without detriment to the product, they will be in a still stronger position for out-quoting the British printer. Not only the maintenance of British quality superiority, but also extended enterprise and technical research are demanded in this present period of strenuous competition.

### British Trade Ship.

ARRANGEMENTS are proceeding apace for the building and equipment of the British Trade Ship, which, it will be remembered, is to set sail from the Thames in the summer of 1923 for an eighteen months' tour of all the principal ports of the world. The directors of the ship, of which Earl Grey is chairman, announce that provisional tenders are being obtained by the builders of the vessel for the various parts and fittings. Exhibitors who

are in a position to supply some part of the fitting as an exhibit actually in use on board, quite apart from their display in the exhibition proper, are naturally anxious to have their products accepted for this purpose. At Wallsend-on-Tyne, where the ship will be built, and at the offices of the British Trade Ship, 12, Grosvenor-gardens, London, the examination of specifications is taking place with a view to determining the market value of each part and its exhibition value to the supplier.

### Canada Wants British Goods.

LATEST reports from Canada indicate that an end has apparently come to the worst phase of trade depression, and the demand for goods is now on the up grade. Restricted hand-to-mouth buying has hitherto been the rule with Canadian buyers, and the United States has reaped the advantage of its ability to give quick supplies in small quantities from stock. British suppliers, however, if they will study the market and offer the right thing supplied in the right way, will find they are well able to enter the Canadian market, as there is a strong feeling in Canada in favour of purchasing British rather than U.S. supplies.

### Lines Canada Can Buy.

PROBABLY the line of goods most promising of development is to be found in the products of our art and colour printers. In art reproductions, colour pictures, calendars, box-tops, labels, advertising novelties and the like, there are big orders going from Canada to the States which could be had by British houses if they would tackle this market more vigorously than they are doing at present. Books, too—in regard to which the British quality and the British taste often appeal more strongly than the American—are a line in which the recent increases of our exports could be greatly improved upon if efforts were made to ascertain and offer just the class of goods desired.

### Advice on Canadian Trade.

THE opportunities offered by the Canadian market are emphasised by Captain Evan J. Edwards, who has just arrived home on resigning his position as Senior Trade Commissioner in Canada and Newfoundland. He points out that the preferential tariff, and the fact that the Customs duties on goods from the United Kingdom are levied on the depreciated exchange as against the appreciated exchange in the case of the imports from the United States, give British exporters

a considerable advantage over their American competitors. Capt. Edwards will make appointments to meet manufacturers at the office of the Department of Overseas Trade, 35, Old Queen-street, Westminster, to discuss matters relating to Canadian trade.

### **South African Trade.**

THE printing and allied trades of South Africa seem to be still in the slough of trade depression, and the prospects of increasing business appear as yet rather remote. The Union tends increasingly to become self-supporting, and to strengthen this tendency is preparing to stiffen the wattle of its protective tariff. British exporters have, and will have, preferential treatment, but it is felt in some quarters that more generous preference is needed. In this connection a circular has been issued to Chambers of Commerce, commercial associations, and commercial houses by the Commercial Relations and Treaties Department of the Board of Trade. The circular refers to the probable revision of the South African tariff, and asks for suggestions as to anomalies and hardship as far as British trade is concerned in the present tariff, in view of a revision. It requests also suggestions as to the desirability of asking for a larger preference from South Africa under any new tariff.

### **The Indian Market.**

INDIAN demand is at a low ebb at present, but the needs and development of the country show that a big growth of imports is bound to come sooner or later. The exchange problem, plus over-buying, and followed by depression all over the world has brought about a state of things the result of which it is difficult to forecast. With regard to the exchange problem, the whole of the Indian community thought that the Government were going to stabilise the rupee at 2s., instead of which the rupee fell and fell until it reached 1s. 3½d. More stability in the exchange would immensely aid in trade revival. Already, however, marked improvement is noticeable in certain classes of goods.

### **British News-Print for Australia.**

BRITISH news-print is, after all, to receive the benefit of £3 per ton preference in the Australian market. It will be remembered that in drafting the new tariff the House of Representatives, after fully discussing the question, placed a tariff of £3 on all news-print except that coming from the United Kingdom. The Senate subsequently reduced the rate to £2, but on the matter being con-

sidered by the two chambers jointly the tariff on all news-print other than British was restored to the original figure of £3. Thus the Australian legislators have acted up to their professions of patriotism. This happy result is also due in no small degree to the efforts of Mr. J. Holland, who went out to Australia in the interests of the British paper industry. Some idea of this gentleman's work was given in our issue of October 21st, though the whole story has yet to be told. Credit is due, however, not alone to the man who carried on the fight, but to those British papermakers at home who had the foresight and the courage to send a representative to the Antipodes to champion the cause of British paper. The point gained is one of great importance and will have an influence probably far beyond the particular case concerned. Certainly the news that Australia at least is ready to encourage British paper is the best that the industry has received for many a long day, and it comes at a time when the least ray of hope is welcome.

### **Australasia Favours British Supplies.**

In his efforts, Mr. Holland had the hearty co-operation of the British Trade Commissioner and of Mr. Gates (James Spicer and Sons), and the concession secured for British paper is described by a high authority as nothing short of a triumph for British trade. The newspaper owners' interest in the matter of the tariff is, of course, very great; but Mr. Holland found them very loyally disposed towards the Mother Country; so much so that they expressed the desire to take at any rate a part of their supplies from mills in this country. Asked how he found the paper market in Australia Mr. Holland observed to a representative of this journal: "The demand for paper was quite good, but, of course, with prices falling almost daily consumers were loth to buy. I predict, however, that very soon business in the Southern hemisphere generally will be very good once consumers can reasonably be convinced that the bottom or near the bottom has been reached. Consumers of paper in the Commonwealth and in New Zealand are glad to get back not only to British-made papers but to British methods. When one realises that Australia takes 50,000 tons of news-print per annum and that consumption is rapidly growing—a consumption which will be stimulated by the promised boom in emigration—then the uses of paper are likely to increase in the future at a greater pace than they have ever done. One day or another, perhaps not in our time, Australasia will be the centre of

things. The natural resources are enormous. Again it is near the Far East, which is destined to become the important part of the world, and on that account Australia must benefit." Mr. Holland informs us that some of the most up-to-date machinery in the world has been installed in Melbourne and Sydney, but this is principally used for the manufacture of boards, manilla and wrapping papers. At the present time no news-print is made in Australia.

#### **Algerian Possibilities.**

THE Algerian market would seem now to be worth cultivating, especially in respect of printers' materials and some stationery lines. British goods are in favour, and the demand promises to be a growing one. In regard to printed matter, a line already being developed covers picture work of various kinds, including picture post cards.

#### **German and Austrian Paper.**

GERMAN and Austrian paper is being offered in abundance at very cheap rates and at long forward delivery. It is strange that the two conditions run hand in hand. There is certainly an amount of German paper coming into this country every week, and as it cannot all be to definite retail clearance immediately on receipt, we should naturally expect these remarkably cheap offers to hold good. In practice they are not met with except for forward delivery and under several sorts of conditions. Considering the speed with which our own mills can now execute orders and the low level of price which they have achieved, it is not to be wondered at that there is a reversion of feeling in favour of home manufactured paper. Even in kraft wrappings the user is beginning to incline in favour of English productions, which, as a matter of fact, are on offer at several pounds sterling a ton less than the Scandinavian make.

#### **Lithographic Press for Argentina.**

A COMMUNICATION has been received from the Commercial Secretary to His Majesty's Legation at Buenos Aires (Mr. H. O. Chalkley) stating that the Argentine Ministry of Public Works is inviting tenders for the supply of a lithographic press to take stones not exceeding in sizes  $0.74 \times 1\text{m.}$ , the surface of the impression being  $0.65 \times 0.96\text{m.}$  more or less. The press must pick up and lay down the sheets automatically. The tenders are to include customs duties and cost of installation, and must be presented in Buenos Aires at the office of the Ministry of Public Works,

before 4 p.m. on December 29th. As the contract would be signed in Buenos Aires and the working of the machine must be guaranteed for three months, it will be seen that negotiations can only be entered into by firms having accredited representatives in Buenos Aires. It is suggested that United Kingdom firms who are interested in this matter and who are not represented locally may care to submit tenders through the London offices of some Buenos Aires firms. Names of suitable firms may be obtained on application to the Department of Overseas Trade, 35, Old Queen-street, London, S.W.1, where also a copy of the specification and conditions of tender, in Spanish, can be seen.

#### **International Book Fair.**

AN opportunity for some publicity overseas, in Italy particularly, will be afforded to the printing and allied trades early in the coming year, as an International Book Fair is to be held at Florence next spring. The Pitti Palace and grounds have been secured for the Exhibition and a committee, composed of leading Italian publishers, authors and collectors, has been formed. The object of the Fair is to stimulate the international trade in books, to exchange translations, and to illustrate the history and development of the Press, of printing and the allied trades. The Fair will include work in the following, amongst other groups: Bookbinders, block-makers, booksellers, designers, illustrators, map makers, music publishers, paper (experimental research), papermakers, photographers connected with graphic arts, poster designers, the Press, printers, printing technical process workers, publishers, etc. Prizes will be offered for book illustration, decoration and poster design. One section of the Fair is being arranged to illustrate the part played by books in popular education. Another section will show in detail the progress made in recent years in technical processes throughout the world. The Fair will be opened at the height of the Italian tourist season, which would seem to be extremely opportune. Enquiries should be addressed to Mr. C. A. Radice, British-Italian Commercial Association, 12, Nicholas-lane, London, E.C.4.

MR. FRANK COLEBROOK, of 146, Fleet-street, E.C.4, sends us an attractively designed booklet explaining the value and nature of the valuation service provided by the Colebrook organisation. An interesting feature is the inclusion of reduced facsimiles of specimen sheets of summary and schedule pages.

# Extending Our Export Trade.

## Points British Exporters Need to Consider.

German success at "peaceful penetration," the ingratiating ways of the Teuton in introducing German goods on even the most unpromising markets, had become proverbial before the war. Trade movements to-day show that we are not finding German efficiency to be slow in reasserting itself.

The British exporter, on the other hand, has a name in too many quarters of being a very independent person, who feels it to be below his dignity to study the little likes and dislikes of overseas buyers, and who does business largely on the principle of "take it or leave it." Despite some improvement in this respect, we are perhaps still too much inclined to assume that what is good enough for us is good enough for the colonial or the foreigner, insufficiently realising that different conditions, habits and tastes overseas may render unattractive what are here recognised as the most appealing classes of goods.

### The Language Difficulty.

In the language used in publicity matter and correspondence we have an outstanding instance of British insularity. We are to-day learning foreign languages as never before, and this is a most satisfactory, if belated, move in the right direction. The need for it cannot be over-emphasised, for competitors have long been ahead of us in this respect. The Continental firms who are bombarding British, American, and other users of printed matter and consumers of supplies of various kinds for the printing and allied trades, rarely make their appeal in any but the prospective customer's own language. One still finds, however, that there are would-be exporters in this country who approach all prospective clients with letters and catalogues in English, even quoting English weights, measures, and prices, which are largely unintelligible to recipients, for instance, in French-speaking Algeria, or in 80-per-cent.-French Quebec. Moreover, this is not only a question of intelligibility; there is also the important matter of national sentiment and prejudice to be considered. This latter point is well emphasised by a writer in the *Board of Trade Journal*, who remarks: "While the use of the English language in correspondence with Latin firms cannot too strongly be deprecated, one error stands out in colours even more glaring. It is to address a Portuguese or Brazilian firm in Spanish. Undesirable as is the use of English, to communicate in Spanish with a Portuguese or Brazilian merchant is a monumental failure in tact. The resentment of the Spaniard at being expected to conduct his business in English is mild in comparison with the wrath of a Portuguese or Brazilian

trader at an implied suggestion that if Spanish is not his language it ought to be."

### Study the Buyer!

Language, however, is by no means the only point in respect of which the tastes or needs of the prospective buyer have to be considered if exporters are to meet with success. Very notable results have followed the policy which had led American exporters in late years to send their own representatives periodically to study on the spot the requirements of numerous overseas markets. The immense increases reported in the importation of United States paper, printed matter, etc., into Siam is attributable to the buyer-study done on the spot by enterprising American commercial travellers; and this is but one example out of many that might be quoted.

Closer examination of buyers' requirements would often reveal to British exporters what it is that has caused their past bids for business to fail. Many orders have been lost by nothing more serious than the way in which articles are packed. Even the good quality of substantiality, which in British machinery and other goods is often the just pride of the makers, may in some cases be a drawback to overseas trade. It has been pointed out, for instance, that Canadian buyers of machinery—who are much more ready than we to scrap their machines of only a few years' standing in order to make room for the most up-to-date models—often buy an American machine in preference to a British one on account merely of the more substantial quality (and corresponding price) of the British product.

The time is for ever past when the British exporter could stay at home and expect overseas orders to find him out. Highly efficient rivals are wooing his erstwhile customers, and if he is not to be worsted he or his representative must be on the spot. The precise present-day requirements of the market must be learned from the buyers themselves, and the closer and more personal this contact can be made, the better will be the business results.

MR. WILLIAM ROSS, who now retires from the service of Messrs. Robert Craig and Sons, Ltd., after 34 years with the firm (three years at Newbattle Mill, Dalkeith; 15 years at Moffat Mill, Airdrie; and 16 years at Caldercruix Mill), was, on Saturday, November 19th, presented by the workers and staff of the Caldercruix Paper Mill with a valuable solid silver rose-bowl and pair of silver candlesticks for himself and Mrs. Ross and a handsome case of pipes and well-filled tobacco pouch for his personal use.

# Paper and Print: Export Figures.

**Demand for British Products Still Low, but Prospects Improving.**

The slump in trade has seriously affected the demand for British paper and cardboard goods, and the latest figures available regarding exports clearly show that the depression has badly influenced the business done by British manufacturers with Colonial markets. Future prospects, however, seem to be brighter, as the demand from Australian and other markets is certainly expanding, so that exporters look with more confidence to an increased volume of business.

## Boards.

During the month of October the quantity of boards exported, comprising millboard, strawboard, cardboard, etc., amounted to 4,977 cwts., as against 10,043 cwts. in October, 1920, and 12,248 cwts. in October, 1913. Reviewing the ten months' period there is also disclosed a falling off this year in the demand as compared with the years 1920 and 1913. For instance, this year (January-October) the quantity dispatched was 67,660 cwts. (of the value of £219,815), in the 1920 period it was 70,588 cwts. (£267,838) and during the corresponding ten months of 1913 amounted to no less than 101,226 cwts. (£95,071).

## Boxes and Cartons.

The opportunities which at present exist for the use of boxes and cartons are for ever widening, and the British manufacturer will not need to be reminded of the requirements of Colonial markets. An instance of this is to be found in the case of South Africa where great progress has recently been made in her export of fruit which had hitherto been packed in expensive wooden trays or boxes. Taking the ten months, January-October of the present year the exports were 16,110 cwts., a shortage, compared with the ten months of last year, of 3,638 cwts. and 23,994 cwts. as compared with the corresponding ten months of 1913. The values during the respective periods were: £116,140 (1921), £140,507 (1920) and £68,681 (1913).

## Coated Papers.

A glance at this year's figures relating to the exports of printed and embossed paper-hangings reveals not only the magnitude of the slump in trade, but also the big leeway necessary to be made up by our manufacturers and agents in order to get anywhere near the level of the output of last year and of 1913. During the ten months of 1913 (January-October) exports were 107,137 cwts. (of the value of £261,292), and were increased during the corresponding period of last year to 124,334 cwts. (£715,577), but fell during the ten months of the present year to 35,226 cwts. (£280,704). Other sorts exported during Janu-

ary-October this year amounted to 20,218 cwts. (£248,721) compared with 29,575 cwts. (£348,698) last year and 24,355 cwts. (£110,738) during the corresponding period of 1913.

## Packings and Wrappings.

The demand for packings and wrappings, including tissue paper, put on a bit of a spurt during October of the present year as compared with October, 1920, although contrasted with the demand as represented by the big figures for October, 1913, the quantity exported is extremely meagre. The shipments for October in the three respective years were: 1921, 21,424 cwts.; 1920, 19,898 cwts.; 1913, 102,650 cwts. During the ten months of the present year there were exported 128,047 cwts. (of the value of £817,995) as against 309,024 cwts. (£408,369) in 1920, and 759,144 cwts. (£317,206) in the ten months of 1913.

## Paper Bags.

Paper bags are among the goods for which a demand is beginning to make itself felt, and in this connection a writer in the *Papier Zeitung* mentions that a good demand is being made for them in Turkey. During the ten months of the present year the export of paper bags from this country was only about half what it was during the ten months of 1920. The figures for the three respective periods (Jan.-Oct.) were: 1921, 12,850 cwts. (of the value of £69,661); 1920, 26,844 cwts. (£116,936); 1913, 42,548 cwts. (£4,907).

## Playing Cards.

Business in playing cards remains small. During the ten months (Jan.-Oct.) of the present year only 31,760 dozen packs (870 cwts.) were exported, as compared with 63,404 dozen packs (1,497 cwts.) in the corresponding period of 1920, and 103,256 dozen packs (3,035 cwts.) during the ten months of 1913, the respective values being £20,771, £34,982 and £23,309.

## Printed Books.

Notwithstanding the heavy slump that has overshadowed the printing industry during the ten months of the year, British printers have well maintained their supply of printed books to foreign and colonial markets. During Jan.-Oct. of the present year 233,554 cwts. (valued at £2,942,068) were exported, compared with 238,216 cwts. (£3,076,045) during the corresponding period of 1920, and 385,908 cwts. (£2,278,193) for the 1913 period.

## Printing Paper.

Printing paper exported during October amounted to 59,298 cwts. (£154,063), British Possessions being good buyers. It is interesting to notice that in the ten months period (Jan.-Oct.) a greater proportion of the exports

of printing paper went to British Possessions than formerly. This year's exports of printing paper amounted to 624,621 cwts., of which 77.6 per cent. went to British Possessions; last year's shipments for the same period amounted to 808,774 cwts., 63.3 per cent. representing the amount destined to the Colonies, and in 1913 1,618,193 cwts., 69.3 going to overseas possessions.

Australia has increased her purchases of printing paper this year to the extent of 241,094 cwts (£814,791) as against 119,759 cwts. (£448,575) last year.

South Africa has also increased her demand taking 64,910 cwts. (£257,162) as against 57,397 cwts. (£257,298) last year.

India during the ten months of the present year only took 84,651 cwts. (£328,725) as against 223,167 cwts. (£895,647) last year.

New Zealand increased her demand upon the home market during the year taking 42,490 cwts. (£150,007) this year and 35,370 cwts. (£150,170) last year.

Canada also bought more largely during the ten months, taking 2,039 cwts. (£10,903) this year and 1,943 cwts. (£10,396) last year.

### Printing Type.

During October last 21 tons of printing type were exported of the value of £7,164 compared with 19 tons (£7,405) in October, 1920, and 42 tons (£7,584) in October, 1913. For the ten months ended October, 1921, the amount exported was 254 tons (£94,028) as against 214 tons (£64,004) in the corresponding period of 1920 and 462 tons (£78,243) for the ten months of 1913.

### Stationery.

Envelopes, not including box stationery, were exported during the ten months of the present year to 21,437 cwts. (£211,233) compared with 46,626 cwts. (£343,413) during the corresponding period of last year and 30,482 cwts. (£73,102) in the year 1913.

Other sorts (including account, note and exercise books) were shipped during January-October of the present year to the extent of 112,184 cwts. (£1,699,407) against 132,808 cwts. (£1,653,556) during the corresponding period of 1920.

### Writing Paper in Large Sheets.

Compared with a year ago the demand for British writings has fallen off. During the ten months of last year the amount exported was 190,574 cwts. compared with only 110,529 cwts. this year. During the ten months India took largely of writing papers, although not in such large quantities as in the previous ten months of 1920. British South Africa increased her purchases during the ten months compared with the corresponding period of last year, viz., 7,387 cwts. (1921), 6,875 cwts. (1920). Canada, too, increased her demand upon the home market, shipments last year amounting to 452 cwts., being increased during this year to 1,011 cwts. The supplies to New Zealand this year were only slightly under what they were during the ten months of 1920, viz., 11,607 cwts. as against 12,416 cwts.

The values for the ten months' periods were: 1921, £679,923; 1920, £1,148,802, and 1913, £392,324.

## The Russian Paper Market.

### Product of German Mills in Government Offices.

A big factor in the world's paper market conditions for many months past has been the abstention of Russia as a paper consumer. In normal times Russia imported large quantities of pulp and paper from Finland, Sweden, Norway and Germany. Her inability or unwillingness since the revolution to buy from these countries has been responsible in a large measure for their turning to the trans-Atlantic market, where they compete with Canadian and American producers.

At the present time the Soviet Government of Russia is making extensive purchases of Finnish, Scandinavian and German paper. According to a report made by U.S. Consul Leslie A. Davis of Helsingfors, Finland, Russian purchases of Finnish paper and other commodities have amounted to 40,000,000 Finnish marks. Russia, according to the report, is practically out of paper. Russian paper mills have ceased to operate. The Government has seized all stocks of paper, leaving but a limited quantity in the free market.

Private individuals get no paper at all. Theatres, opera houses and other places of amusement use old forms for tickets. Newspapers vary their circulation according to the paper supplies allotted to them, sometimes issuing small and sometimes larger editions.

Books for propaganda purposes are given the preference, and when their requirements are satisfied no paper remains for educational works. In Petrograd five daily newspapers maintain an existence in spite of the paper famine. In Moscow there are also five. All are government-owned, there being no private newspapers in existence.

Next to Finland, Germany seems to be forcing the Russian paper market. "Large lots of German rotation and mouth-piece paper and different sorts of sheet paper were stored in the customs houses at Moscow," reports the delegate of the Finnish Paper Mill Association who recently returned from Russia and who is quoted by the American Consul. "Writing paper with German watermarks could be seen everywhere in the government offices. The German business men made satisfactory deliveries and the prices were very favourable. The Soviet representative has been staying in Berlin, where he made large purchases."

Ordinarily, Russia is capable of absorbing practically the entire export output of Finnish and German paper.

An Advertisement is always working.

# Master Printers and Disabled Men.

## An Appeal for the Admission of ex-Sailors and Soldiers into the Printing Industry.

Mr. R. A. Austen-Leigh, president of the London Master Printers' Association, presided at the monthly lunch held at the Connaught Rooms on Tuesday last week, when Mr. E. D. Nuttall, secretary to the National Trade Advisory Committee (printing and kindred trades) addressed the members on "The Training of Disabled Sailors and Soldiers," a matter which the chairman said the Association, in theory at all events, had very much at heart, but he was afraid in practice they were somewhat apathetic. He hoped Mr. Nuttall would remove that apathy.

Mr. Nuttall said: I must first thank you on behalf of the Ministry of Labour for your kind invitation to me for to-day. I am here to plead the cause and put the claims of men who cannot do it for themselves, or help themselves. These men are not heroes. They are ordinary men who came from the bench, the office, or from behind the plough, fought in foreign lands, were so disabled that they cannot return to their pre-war occupation, and now ask that the justice for which they fought shall be meted out to them; for their request is not for sympathy or privilege, but merely for a chance to train for some other occupation from which their disability will not disqualify them, and thus become self-supporting citizens again. This chance and this training it is the business of the Industrial Training Department to supply, but it can only be done with the help of every trade.

I am not sure that the immensity of the problem is fully realised. Some 70,000 men have been, or are being, dealt with by the Department, but I am not concerned with that—what I am concerned with is the grim fact that there are 35,000 for whom provision has still to be made. What has the printing trade done, and what is it asked to do? Up to the present 250 men have been trained in this industry and taken into employers' works, and a further 200 are in training, and we now ask that the printing trade shall accept an additional 400 as their final contribution, making 850 men in all. Compared with the quota which other trades are asked to take, this is an extremely small number, and has purposely been kept low on account of the high educational standard which is required. We do not wish to ask for more than this from the printing trade, but, on the other hand, we dare not ask less.

In every organised trade it has always been the practice of the training department to proceed by way of agreement with the organisations concerned, and accordingly in 1917 a National Trade Advisory Committee, composed equally of representatives of employers' organisations and trade unions was formed

for this trade under the able chairmanship of Mr. George Eaton Hart—and I should like to say here that the disabled men, the Department, and the trade owe a very great debt to Mr. Hart for the invaluable work which he has accomplished in this position on their behalf. (Hear, hear.) This National Trade Advisory Committee prepared a Scheme (Report M.5/XVI.), and all training which is given must be in accordance with this Scheme. It provides the channel through which these men may enter the trade, and the channel is apprenticeship:—"A disabled man undergoing training in any process shall be regarded as an apprentice so far as the computation of the proportion of skilled men to apprentices is concerned."

I am aware that there has been considerable disagreement as to the wisdom of insisting on the apprenticeship regulation, but I do wish to emphasise that before the Scheme was finally drafted, it was discussed for 18 months, and there is no possibility of any modification being effected at this late date. It is this scheme or nothing. The Scheme may be open to objection, but the apprenticeship basis does at least possess this great advantage, that if employers will help, we can train every man with the certainty that he will have a job on the completion of his institutional training, irrespective of trade prosperity or depression. An employer can take on one of these trainees whenever and wherever he has a vacancy for an apprentice.

### A Business Proposition.

Speaking as I am to a business audience, I should like to put it to you, gentlemen, as a business proposition. In the first place, it is a trade scheme, administered and financed, it is true, by a Government Department, but prepared entirely by members of the trade and having their sanction. You will see from pages 8 and 9 of the Report M.5/XVI. which you have before you, that it is comprehensive, as provision is made for practically all the most important processes in the printing trade. Further, the training is practical—in all the processes with the exception of machine ruling, stereotyping and electrotyping, and, in some cases, process work, the preliminary institutional period, of normally one year's duration, is compulsory. Such institutional training is being given at St. Bride's (and here let me pay a tribute in passing to the extremely valuable work which Mr. Riddell has done on behalf of these disabled men) and the Merchant Venturers' Technical College, Bristol, and at the technical colleges at Leicester, Leeds, Manchester and Edinburgh. This institutional training

not only grounds the trainee in the principles of his craft, but serves the even more valuable purpose of introducing him once again to regular habits of life and industry. It must not be forgotten that the problem in dealing with these trainees is by no means entirely a physical one; it is if anything even more a psychological question. These men have in many cases been discharged for a long time. They are getting hopeless and helpless, and it is the work of the institution to build up in them a fresh courage, a greater resolution, and a new interest in life. After the institutional period is completed the trainee has to enter the employer's works to complete his training, and, as I have already stated, must rank as an apprentice. May I ask that when you, gentlemen, take these men into your works, as I hope and believe you will, you will see that they are given a fair chance by the foreman and by their fellow workmen? They cannot be expected to give of their best all at once. However good the institutional training, the transition to the workshop involves a marked step, and a little help and encouragement at this stage goes a very long way.

#### Careful Selection.

I submit it is a business proposition in the second place because the men whom you are asked to take are very carefully chosen. It is an entire misreading of the situation to suppose that the whole of the disabled ex-service men with whom we deal are "crops." It is very far from being true. Their disability and the degree of disablement vary infinitely, and it is quite possible to find a certain number of men of good education whose disabilities are such that they can still be trained for the printing trade. These men are not selected in the final event by any Government official, but, once again, by the trade itself through the local committee which supervises each institution, and which is known as the Local Technical Advisory Committee. The London committee meets frequently under the chairmanship of Mr. G. Eaton Hart. As a final safeguard against the introduction of unsuitable men, there is the fact that the first month in the institution is always a trial period, and if the man does not show aptitude in that month, his training is terminated. I submit that in this manner you have all the reasonable safeguards which could well be devised against the introduction of unsuitable men.

It is a business proposition in the third place because the payments are reasonable. They vary considerably from process to process, but in the main, the employer is asked to pay for the second year of training the small sum of 12s. 6d. a week. I suggest to you, gentlemen, that if the man is not worth that sum, he ought not to be in training at all. It is true that the payments for the later period are very considerably higher; for example, district rate less 20s., but even here if the men are carefully selected and properly trained, and given a fair chance in the workshop, it is our experience that the employer suffers no loss in paying this sum. I do not propose to go fully into the rates of payment

which are now operative, as they are set out in detail in the Schedule which you have before you; this Schedule cancels entirely the rates laid down on pages 8 and 9 of the Report, to which reference should be made for the processes coming under the respective headings shown in the Schedule.

A final reason why this Scheme should appeal to business men is that no troubles with the trade unions need be anticipated. Mr. Eaton Hart will bear me out when I say that the unions stand solidly behind this Scheme, and are prepared to deal with objecting members or branches wherever they may occur, provided that the provisions of the Scheme are maintained in the spirit and in the letter. The claims which I have just put forward are justified by experience. There are members present here to-day who have taken trainees, and are perfectly satisfied. If the men are carefully selected and given proper training and a helping hand when they get into the workshop, it is no exaggeration to say that in 90 per cent. of the cases they make good.

#### Option on Apprenticeship Vacancies.

What, then, do we want from you, gentlemen, to-day? Just this. We want you to give us the option on all apprenticeship vacancies which you will have in your works during the next two and a-half years. I imagine that it is quite possible for you to ascertain the definite dates on which you will have vacancies for apprentices, and we should like you to furnish to Mr. Eaton Hart or to myself at St. Ermin's, Westminster, either direct or through your secretary, particulars of these apprenticeship vacancies, with the dates on which they will occur. We can then budget accordingly, and either offer to you a man who has been trained or is in training, or place a man in training at the proper time to fill the specific opening. The offers will be referred to the London Local Technical Advisory Committee, who will select the men very carefully, and I can assure you that no red tape will be allowed to interfere with the filling of the vacancies.

In London and district alone we have to-day five compositors, five lithographers and two letterpress machine minders whose institutional training has been completed, and who are waiting for apprenticeship openings. These men are deteriorating day by day, and I would ask that you should deal with this question very urgently. We have also waiting in London three linotype and three monotype keyboard operators. These are men who were hand compositors before the war, and, in accordance with the provisions of the scheme, are given a three months' technical school course in either linotype or monotype work, and are then entitled to the normal rate of wage; they do not come under the apprenticeship restrictions.

We must have particulars of these apprenticeship openings—whether occurring in the immediate future or several months ahead—before us now; the men cannot wait; they are steadily deteriorating, and if left much longer, will become untrainable.

Neither can the institutions wait. We cannot carry on with them at half capacity. On the other hand, we cannot proceed at all unless we do get these definite openings; to put men in training in this trade on the chance that at the completion of their institutional period there will be apprenticeship openings for them is to run the risk of ghastly failure, which, in the case of one Committee at any rate, has already occurred. We must create an employers' waiting list with offers of definite and dated openings, and we can then proceed to select the men and place them in training accordingly. Any other policy is futile. Will you let us have these offers now?

Armistice Day has just passed, and the thoughts of many of us turned to those critical days in March, 1918, and to the long procession of ambulances down those white and dusty poplar-lined roads in Flanders. Many of those they bore are with us to-day. Our dead are laid in many lands. They sleep well. Our living are here, and our wreaths and war memorials are a mockery and a sham unless we are prepared to discharge here and now our obligations to those who have crawled back to life, and now stand waiting. Will you help us to help them?

[NOTE.—Full particulars regarding the processes for which provision is made, place and period of training, and the payments which the employer is called upon to make, can be obtained, together with any further particulars which may be desired, from Mr. Nuttall as Secretary of the National Trade Advisory Committee at St. Ermin's, Westminster, by whom also any offers of present or future apprenticeship vacancies will be gladly received.]

### Discussion.

Opening a discussion on Mr. Nuttall's paper, at the request of the chairman, Mr. George Eaton Hart asked all those present to take a generous view of the appeal made to them that day and get the waiting men taken into employment. He pointed out that it would occupy but two or three years, and when they remembered that there were only 300 or 400 men to be absorbed in different departments all over the country they would see what a small matter it was for each one of them. The trade unions had loyally and thoroughly done their work in regard to this obligation. Mr. Hart added that he had several of these men passing through his works and he had not had a single failure. The addition of Mr. Cahusac to the Committee had brought fresh ideas, among them being a useful proposition that every master printer should send in a slip showing when he would have a vacancy. Thus they would have a waiting list of master printers. A further recommendation which was being made was that the matter should be brought before the J.I.C., and Mr. Hart hoped that printers throughout the country would take up the question so that they might dispose of their share of the liability to the disabled men.

Mr. J. R. Riddell suggested that if the master printers would give the Committee one out of every three vacancies that would

meet every requirement. He regretted that it was not now fashionable to regard with sympathy the disabled men. Let them not forget that these men were being disappointed and that a serious state of unrest was arising. The speaker emphasised the psychological aspect of the problem.

Mr. J. B. Cahusac said it was entirely up to the employers to carry out the scheme, and if they would provide the vacancies the Advisory Committee could start work again.

Sir Wm. Waterlow, in proposing the vote of thanks to Mr. Nuttall, said the fact that the trade had not done all that it ought to have done was largely due to the deplorable state of business during the past few months. He thought Mr. Nuttall's address ought to be in the hands of every printer in the country.

Mr. A. Langley, in seconding the resolution, said the best thanks they could give to Mr. Nuttall was to send in notices of vacancies.

Mr. Nuttall, in reply, emphasised the point that he was not asking the trade to take on 450 additional men beyond their normal staff; all he was asking was, if master printers had a vacancy for an apprentice, that they might give the Committee the offer of such a vacancy.

## Cardiff Bowling Club.

The annual meeting of the Caxton Bowling Club, an organisation connected with the printing trade at Cardiff, was held on Saturday, Mr. J. M. Woods presiding. The report of the secretary and treasurer, Mr. A. W. Stevens (deputy overseer, *Western Mail*), showed that the club had won considerable success in the first year of its existence. Among its best achievements was the victory over the Bristol Press by one shot, thereby gaining possession of the silver cup jointly presented by the *South Wales News*, *Western Mail*, and *Journal of Commerce*. Officers for the ensuing season were elected as follows:—President, Mr. Robert J. Webber (general manager, *Western Mail*); chairman, Mr. W. T. Harris; vice-chairman, Mr. T. D. Hogan; captain, Mr. T. E. Powell; vice-captain, Mr. George B. Crombie; committee, Messrs. W. T. Stacey, H. Dimond, J. Ford, E. W. Holder and J. W. F. Finden Browne; secretary and treasurer, Mr. A. W. Stevens.

There is every prospect of a successful season and arrangements have been made for a whist drive and dance on the last Saturday in January.

## Football.

The following matches were played on Saturday and resulted as indicated:—

### Printers' Football League.

Falcon Athletic, 5; Co-operative Printing Society, 0. King's Printers, 1; Blades, 0. Amalgamated Press, 1; Cornwall Press, 0.

## The "Falcon" Preens Its Wings.

### A House Journal Celebration.

At the invitation of Mr. R. A. Austen-Leigh, some sixty or so contributors and readers of the *Falcon*—the well-known house organ of Messrs. Spottiswoode, Ballantyne, and Co., Ltd.—met for dinner at the Café Marguerite, Oxford-street, where a very enjoyable evening was spent. Besides Mr. and Mrs. R. A. Austen-Leigh, the company included Mr. and Mrs. E. C. Austen-Leigh, Mr. W. Whyte (London Master Printers' Association) and Mrs. Whyte, Miss E. Mould and Mr. F. W. Bridges. The evening's proceedings were agreeably enlivened by musical items consisting of violin selections by Mrs. May, and songs by Mr. Sydney Mayhew. The idea of holding such a gathering was a happy one, and it was carried into effect in such delightful fashion that the collaborators in the production of the *Falcon* must all have felt themselves stimulated to still further efforts on behalf of their admirable house journal.

An excellent meal was followed by a short toast list, with speeches which were each and all brimful of wit and good feeling.

After the loyal toast, Mr. R. A. Austen-Leigh, from the chair, gave the toast of "Our Contributors" in a speech delivered with the profoundest gravity, but rich in a dry humour that kept the company in almost continuous laughter. With regard to the firm's emblem, the falcon, as it appears conventionalised in print, he said that ornithologists occasionally remarked that never, even in their wildest dreams, had they seen such a bird; but he thought that might merely be some form of jealousy. (Laughter.) Speaking of the contributors to the *Falcon*, he made appreciative personal reference to the services of each, with many humorous comments upon their contributions.

Mr. L. Sebright replied, and in the course of his remarks introduced numerous sly thrusts of wit at his collaborators. Loud applause greeted his references to the editor of the *Falcon*, Mr. R. A. Austen-Leigh, on whose multifarious activities on behalf of the printing trade he laid special emphasis.

Mr. C. Barnes gave the toast of "Our Readers," specially noteworthy being his recital of humorous (but, we think, unofficial) "testimonials" by *Falcon* readers.

Reply on behalf of the readers was made by Mr. C. W. Bridges, who recalled times long past and spoke of the good treatment received by both customers and employees of the house of Spottiswoode, Ballantyne.

Mr. W. Whyte also responded, and in the name of the L.M.P.A. and the Federation, congratulated Mrs. Austen-Leigh on her return to health. A feature of his witty speech consisted in a series of very funny remarks on the nature and habits of that mysterious bird, the falcon.

Mr. A. Affleck added a toast not on the list—that of "Our Chairman and Editor, Mr. R.

A. Austen-Leigh." He referred to Mr. Austen-Leigh's work for the betterment of the printing industry, also to his prowess in the realm of literature, and thanked him for the hospitality provided. This toast called forth tumultuous applause, and musical honours were heartily given.

Mr. Austen-Leigh having responded, the proceedings ended with the joining of hands and the singing of "Auld Lang Syne."

The function gave evidence of the good fellowship existing among the craftsmen of Spottiswoode, Ballantyne and Co. All present manifestly spent a thoroughly jolly and enjoyable evening, the whole affair being delightfully free from that sense of constraint which one sometimes feels at joint social gatherings of employers and employed.

Those present carried away a uniquely interesting souvenir of the occasion in the form of a most choicely printed menu and programme, each guest receiving one bearing his own name in print, and bearing also the autograph of Mr. R. A. Austen Leigh.

## Lawsuits of the Week.

BEFORE Mr. Justice Darling and a special jury in the King's Bench Division, on Monday, the Hanover Press, Ltd., George-street, Hanover-square, claimed £6,331 10s. from Sir Robert W. Buchanan Jardine, of 24, St. James-place, and Castle Milk, Lockerbie, Dumfriesshire, for work done and material provided. The hearing was adjourned, and at the further hearing on Tuesday counsel for Sir Robert agreed to judgment for £1,000 and the costs of the action, unreservedly withdrawing an allegation that the order had been obtained by fraud.

JUDGMENT was entered for Messrs. Odhams, publishers of *John Bull*, and Mr. Bottomley, on Wednesday of last week, when, without leaving court, a King's Bench Division jury held that there was no libel, but merely fair comment in *John Bull's* severe criticisms of the memory-training system of the George H. Cox Institute, of Wolverhampton.

ONE FARTHING damages were awarded by the jury in the action for libel brought by Mr. T. F. R. Disher, F.R.G.S., against Messrs. Odhams, Ltd., publishers of *John Bull*. No order was made as to costs.

MRS. ANNIE BESANT last week applied to the Court of Session, Edinburgh, for a new trial of her action against the *Daily Graphic*, in which she claimed damages, alleging that the paper had slandered her by charging her with sedition. The jury who tried the action in July held that the paper was justified, and gave a verdict in its favour. The Court refused to interfere with that verdict.

MR. THOMAS M. WHEWELL, of Sharples, Bolton, printer and stationer (died May 26th) left £6,192.

**KELLY'S DIRECTORY OF STATIONERS, PRINTERS, BOOKSELLERS, PUBLISHERS, PAPERMAKERS ETC., 1921.** London: Kelly's Directories Ltd. Super royal 8vo.; about 1,500 pages. Price 35s.

The publication of a new edition—the fourteenth—of this monumental work of reference is an event of importance to all the printing and allied trades. Not only does this directory cover the field of trades named in its title, but it embraces also such minor trades as bookbinding, printers' engineering, photo-engraving, and numerous others more or less closely related to the printing industry. Its geographical scope includes England, Scotland and Wales, and the principal towns in Ireland, the Channel Islands and the Isle of Man. Thus it is a work of reference which deserves a place of very high honour on the office bookshelves. As the last edition was published in 1919 it is obvious that business changes since that date render many alterations necessary in a volume of this kind, so that this carefully-revised edition is sure of a cordial welcome. The customary excellent method of arranging and indexing the contents has been adhered to in the new volume. Firms are entered alphabetically, first under places, and later under trades, London being allotted a separate section conveniently placed in the middle of the book. Thus one can usually find a required entry in a moment without requiring an index—especially as the sections are distinguished by differently coloured edges—though for those who wish for indexes there is provided a full index of towns and places and also an index of trades. We have nothing but commendation for this comprehensive and most convenient guide book to the business houses of the printing and allied trades.

**"PENROSE'S ANNUAL."** Edited by William Gamble, F.R.P.S., F.O.S. London: Percy Lund, Humphries and Co., Ltd. Price 8s. net.

The 1922 volume of this valuable Annual for process engravers and all interested in illustrative processes certainly keeps up the high reputation to which former volumes have attained, and presents to the reader an interesting series of articles on the various methods of reproduction that are now commercially possible. The book opens with a review of process work in its various forms by Mr. William Gamble, the editor, who has a thorough practical knowledge of his subject, and who details the progress that has been made in mechanical processes of reproduction up to the present. Dealing with inventions in advance of the times, Mr. Gamble gives some interesting particulars of the methods patented by the late Mr. Friese Green in the direction of electrical inkless printing and

composing the text matter of books and newspapers by means of photography instead of types, the latter idea being one that to-day is being practically worked out by more than one individual. Process engraving, collotype, three-colour, rotary photogravure, and other methods are also reviewed. Some twenty-five or so practical articles are contained in the volume, all written by men who understand the subjects they handle, among them being contributions from the pens of the editor, F. T. Corkett, A. E. Bawtree, R. B. Fishenden, Joseph Goodman, Chas. T. Jacobi and others. As usual the "Annual" is fully illustrated with examples of various methods of reproduction, including photogravure in colours and in monotone, line and process work, etching, colour collotype, the "Derby" colour process, and many other proprietary methods. Some of these illustrations are a revelation as to what can be done in the reproduction of water-colour drawings and oil paintings, and are well worth the study of all interested in illustrative work. Needless to say the book is got up in the usual high-class style, the printing having been done by Messrs. Percy Lund, Humphries and Co., Ltd., at their Country Press, Bradford. The inks used were specially manufactured by Messrs. Shackell, Edwards and Co., Ltd. The various papers used are supplied by well-known makers, that for the text being the "Blandford Deckle Edge." The machinery used for printing the text, illustrations, etc., was largely supplied by Messrs. Furnival and Co., and the cloth used for the cover was supplied by the Winterbottom Book Cloth Co., Ltd. The volume is a credit to all concerned in its production.

ENTITLED "Why the Linotype Produces Both Quality and Economy," a handsomely-produced folder has been issued by Linotype and Machinery Limited, of 9, Kingsway, W.C.2. Good points of linotype setting are very forcibly made plain by means of well-written text and striking illustrations, while the folder itself—composed entirely of linotype material—is concrete evidence of how excellent linotype printing can be.

"**HOLLY LEAVES**," the Christmas number of the *Illustrated Sporting and Dramatic News*, is this year again up to the high standard of illustrative and literary quality that is associated with this publication. The issue carries as a supplement a fine photogravure plate reproducing the well-known picture "The Empty Chair," by Briton Rivière. Photogravure is used also in the illustrations interspersed throughout the magazine, whilst colour and black and white drawings aid in making it a most attractive and seasonable production. Among the artists contributing are Frank Dadd, Lawson Wood, Will Owen, Thomas Blinks, John E. Sutcliffe, and G. E. Studdy, and the writers include Eden Phillpotts, Barry Pain, Percival Gibbon and May Wynne.

**An Advertisement is always working.**

## Trade Notes.

THE Association of Master Printers of the London Central Districts holds its fourth bohemian concert on Wednesday, December 7th at Stationers' Hall.

THE *Natal Advertiser*, evening newspaper of Durban, has recently bettered its mechanical equipment by the purchase from this country of a three-reel Hoe machine.

It is reported that preparations are being made for the publication in London of a penny morning newspaper and a penny evening newspaper, both devoted to the cause of Ulster.

NEWSPAPERS will not be published on Boxing Day (Monday, December 26th), but Sunday papers will appear on Christmas Day and ordinary publication be resumed on the Tuesday.

THE Printers' Managers and Overseers Association is to hold a bohemian concert next Thursday week, the 15th inst., at the Cannon-street Hotel, the object being to raise funds for the completion of P. M. and O. A. Pension No. 3.

ITALIAN newspapers failed to appear on Monday. It is reported that as the result of the murder of two printers' union officials at Trieste by Fascisti the Council of the Typographical Union called a national strike of the printing trade. The strike, however, has since come to an end.

AT a fire last week in the basement of the premises of the National Labour Press, Blackfriars street, Salford, damage was done to the extent of some thousands of pounds, and it has been found necessary to have the *Labour Leader* and other publications temporarily printed elsewhere.

THE next monthly meeting of the South-West London Master Printers' Association will be held on Tuesday, December 6th, at 7 p.m., at the Public Library, Lavender Hill, S.W.11, when Mr. Edward A. Dawe, of His Majesty's Stationery Office, will give an address on "The Printer and His Paper."

AT Shepton Mallet, Somerset, Petty Sessions, William Henry Wilkins, stationer and sub-postmaster, of Oakhill, was charged with having converted to his own use property value £134 8s. belonging to the Postmaster-General. The bench adjourned the case till December 20th to ascertain the legal position as to an amendment of the charge.

THE funds of the Lloyd Memorial (Caxton) Seaside Home at Deal should benefit substantially by the proceeds of the special matinée of "Sybil," arranged by the *Daily Express*, and given at Daly's Theatre on Saturday. A large audience thoroughly enjoyed the performance. It is announced that every farthing of the money taken will go towards the Home, which is in need of £3,000 with which to buy an annexe.

MR. CHARLES HARGREAVES, for 40 years in the employ of the *Manchester Guardian*, died on Thursday, last week, aged 58.

MR. A. EDLER has removed his offices and show-room from 49A, Milton-street, E.C.2, to 78, Southwark-street, London, S.E.1.

MR. GEORGE W. TAYLOR, managing director of the *Essex Weekly News* series, died at his residence at Chelmsford after a short illness.

PAPER and stationery companies increased their capital during October by £26,400 and printing and publishing companies by £126,000.

BRISTOL Master Printers' Association is arranging a meeting for December 6th, which it is expected the president of the Federation will attend.

MESSRS. JAMES SPICER AND SONS, LTD., of 50, Upper Thames-street, London, E.C.4, propose shortly to place on the market a new loose-leaf book.

THE Northern Monotype Users' Association meeting at Manchester is arranged for to-day, the 1st inst. It was not held last Thursday, as erroneously stated.

MESSRS. R. ROBINSON AND CO., LTD., the Newcastle printers, have erected in their warehouse a roll of honour to their 106 employees (ten of whom were killed) who served in the war.

WILLIAM M. FISHER, account book maker, printer, etc., has removed to 2 and 4, Heaton-street, King-street, Blackburn, where, with more accommodation, he hopes to be better able to cope with increasing business.

PROLONGED delay is anticipated in the enactment of the Bill for the permanent revision of the United States Tariff, the draft of which contains provisions of serious concern to British exporters of printed matter.

MONOTYPE SCALE.—The question of a new scale of monotype prices is still under consideration by the executives of the London Master Printers' Association and the London Society of Compositors, decisions on important points having yet to be reached. Questions relating to apprenticeship are also awaiting settlement.

THE Northampton Polytechnic Institute, St. John-street, Clerkenwell, holds its annual prize distribution and students' conversazione to-morrow, December 2nd, when the right hon. Lord Southwark, P.C., will distribute the prizes and certificates and the proceedings will probably be of interest outside the walls of the Institute.

THE list of luxury goods on which import duties have to be paid in gold on entering Austria includes the following: Fancy paper wares, prints, paper toys and games, paper collars, cuffs, etc., paper flowers; wares of fine paper, and wares of all paper and board combined with fine or very fine materials; playing cards; paper, cardboard, etc., wares with mountings of precious metals.

### FORTY-THIRD YEAR.

*Printed and Published EVERY THURSDAY  
by STONHILL & GILLIS.*

*at 58, Shoe Lane, London, E.C. 4.*

**Tel.: Stenhil, Fleet, London. Phone: 8407 City.**

**SUBSCRIPTION: Per Annum, 8s. 8d. (POSTAGE EXTRA).**

**Charges for Trade Advertisements:**  
(Full page 8 by 5½ ins.)

Whole Page ...	£4 10 0		s. d.
Half Page ...	2 10 0	One-eighth Page	17 6
Third Page ...	1 17 6	One-third Column	22 6
Quarter Page...	1 10 0	One inch in Column	9 0

**An Extra Charge for Cover and Special Positions.**  
Discounts according to Number of insertions.

**Representatives throughout the United Kingdom and also in Australia, India, South Africa, United States (Canada, etc.**

**All communications for the "BRITISH AND COLONIAL PRINTER AND STATIONER" should be addressed and Cheques and Post Office Orders made payable to—STONHILL & GILLIS, 58, SHOE-LANE, LONDON, E.C.4**

**COPIES may be purchased at the Offices, as above or from Messrs. W. H. Everett and Son, Ltd., news-agents, 11, St. Bride-street, E.C.4.**

THURSDAY, DECEMBER 1, 1921.

## Current Topics.

### British Industries Fair.

PREPARATIONS are well advanced for the forthcoming British Industries Fair, which is to be held at the White City, Shepherd's Bush, from February 27th to March 10th next. Although not quite so many exhibitors are taking part, the same amount of space will be occupied as last year, and in spite of the depression which has marked the trade and industry of the country this year, there promises to be an attractive display of goods. In the printing, paper and stationery section, which is the largest in the Fair, a new departure will be made, inasmuch as a certain amount of machinery will be seen in operation. Some activity of this character has been lacking at previous exhibitions. In the section in which our readers are specially interested, stationery has the chief place, the exhibitors numbering 102; of printers there will be 24, and of paper stands, including those showing crepe and fancy paper, 11.

### Developing Exports.

It was the main purpose of the Fair at the beginning to help export trade, and this is still borne in mind, although the amount of home business has grown to a greater extent than was looked for. Indeed, the idea was to compete with the Leipsic Fair. Every effort, therefore, is made to draw buyers from abroad, and on the present occasion publicity of the event is being obtained abroad. As on the last occasion, a definite proportion of the income is spent in advertisements overseas, while the assistance of our trade and consular representatives is secured to the same end. Already a number of replies have been received to the invitation to attend the Fair, so that a good representation of overseas buyers may be expected at the White City, where the latest devices in printing and stationery, will be exhibited.

### Foreign Competition.

GERMAN, Belgian, Dutch and now French printing houses are attempting to take the fullest advantage of their economic condition by canvassing our users of printed matter for their orders. Apart from postal economies and facilities, which have been widely advertised since our own new regulations came in, the Continental countries offer as an inducement their cheaper costs of production and the gain on rate of exchange. Some very fine collections of printed samples have been sent over, and a number of English agents have been appointed to canvass the larger users. Already a large amount of mail order business has gone over the North Sea, and at least half-a-dozen of the biggest manufacturers of foodstuffs and specialties have had large printing contracts executed abroad. Quite recently we had also the example of a publisher going to Germany for books to be produced at a saleable price. It would be interesting to know exactly how many different industries and trades are affected by the loss of this business. Quite definitely we know that wood pulp agents, the chemical trades, papermakers and merchants, printers, bookbinders, artists and process engravers are so much the poorer for every printing order that goes out of the country. That the Post Office should suffer the loss of revenue by reason of the lack of foresight and common business ability of its high officials is a necessary precursor to the return of sanity and the restoration of a popular service. Unfortunately, it is the business community that must pay for the lessons.

**Our Postal Burdens.**

THERE are already definite signs that the Post Office is not going to weather the storm of complaint aroused by the new regulations. Evidence accumulates to show the disastrous effect of the high and anomalous postal charges on trade, and no opportunity of bringing this evidence to the door of the Postmaster-General is being lost. Quite recently the chief of the department claimed that the extra charges were doing so well that he might shortly be able to take them off. In this process of reversion he will have all the help he needs and much more than he desires. What the business world wants from him just now is a definite announcement of policy. There is enough uncertainty in trading under existing conditions without the Government wilfully adding to it.

---

**Personal.**

---

MR. W. HOWARD HAZELL, chairman of St. Bride Printing School Committee, will take the chair at Mr. Geo. Eaton Hart's lecture, "Rambles of an English Printer in U.S.A.," at St. Bride Institute to-morrow, December 2nd, at 7 p.m., in place of Lord Riddell who is in the United States on business of public importance.

MR. T. E. NAYLOR was on Saturday re-elected, without opposition, as chairman of the London Labour Party.

A UNIQUE event in the history of our trade overseers' associations was the presence together of Mr. E. W. Whittle (secretary, P. M. and O. A.), Mr. Geo. Eden (secretary, Bookbinders' Overseers), and Mr. W. Bullett (secretary, Electrotypes and Stereotypers' Overseers), at the annual dinner of Mr. Bullett's association on Saturday.

MR. ALFRED T. DAVIES, C.B.E., Conservative M.P. for Lincoln, has joined the Board of the *Pall Mall Gazette* and *Globe*.

MR. WILLIAM ALLEN, who has just been appointed chairman of Messrs. Ascherberg, Hopwood and Crew, Ltd., the well-known music publishers, whom he joined 11 years ago, is very well known in theatrical circles. He graduated in Fleet-street, where his many activities in book and magazine publishing are remembered.

MR. T. H. CUNANE (Messrs. A. M. Peebles and Son, Ltd.), gave his lecture on "Paper-making" before the Printers' Managers and Overseers Association in Leeds recently, his address proving of great interest.

**The Naylor-Jacobsen Contest.****South-East Southwark By-Election.**

Interest grows in respect of the forthcoming fight for the Parliamentary representation of South-East Southwark, in connection with which Mr. T. E. Naylor, secretary of the L.S.C., stands as a Labour candidate against Mr. T. Owen Jacobsen, of Jacobsen, Welch and Co., who stands apparently as a Coalition-Liberal. Mr. Jacobsen has raised objection to a statement that at this election "a master printer is fighting a journeymen printers' representative." He wishes it to be known that his firm is not a member of the Master Printers' Federation, or of any organisation connected with it. Their printing department is entirely subordinate to their business as manufacturing stationers, and they do, in fact, undertake outside printing contracts.

On Sunday afternoon the two candidates attended the P.S.A. at the Browning Settlement in Walworth-road, on the invitation of Mr. F. Herbert Stead, the warden, and delivered their first public addresses. Mr. Stead presided. Both candidates outlined their views on some of the most important topics of the day.

Mr. Jacobsen, in the course of his remarks, said he knew Mr. Naylor very well, and he was sure Labour could not have a better friend. Industry would be all the better off if the working class had greater control and share of the profits. Unemployment should be a matter for the State.

Mr. Naylor thanked Mr. Jacobsen for his kindly remarks to himself. He said he had found on inquiry that Mr. Jacobsen was a good employer, and he hoped that would be borne in mind by both parties. Mr. Jacobsen held so many of his (Mr. Naylor's) opinions that he could not quite understand why he did not retire from the contest. (Laughter.)

As Returning Officer for the S.E. Southwark by-election, the town clerk of Southwark received the writ on Monday, and has fixed Monday, December 5th, for the nomination, and Wednesday, December 14th, as the date of polling.

THE October number of *System*, which has just reached us, contains the usual good measure of interesting and useful information for the progressive man of business. Those interested in the forthcoming voyage of the British Trade Ship will find detailed information about it in an article entitled "An Exhibition that Lasts for a Year." Printers will be interested to see an informative article on "Paving the Way for a Works Journal." Among well-known house-organs mentioned in the last-named article we note the *Falcon* (Spottiswoode, Ballantyne and Co., Ltd.)

(Report of Annual Dinner appears on Opposite Page.)

## Electrotypers and Stereotypers MANAGERS & OVERSEERS' ASSOCIATION

### Annual Dinner and Ladies' Night.

Complete success marked the annual dinner of the Association held in the Crown Room of the Holborn Restaurant on Saturday evening. The gathering—numbering close upon 200 ladies and gentlemen—was presided over by the president, Mr. A. Chadwell, who, in conjunction with the stewards, succeeded in making this year's festive occasion surpass anything in the same direction previously attempted by the Association. Among those present were Messrs. J. Black, H. Clarke, G. Cox, Geo. Eden (general secretary, P. B. K. T. O. A.), W. M. Forsyth, John Fry, A. E. Holmes, W. J. Light, Geo. K. Naylor, J. Parker, S. W. Sinier, G. W. Sharvell, Glen Steel, J. B. Tichener, W. Warren, E. W. Whittle (general secretary, P. M. and O. A.), and W. Bullett (secretary).

Following the dinner and interspersed with the toasts a very fine musical programme was rendered, in which the following well-known artistes were heard to advantage: The Misses Elsie Beaumont, Linda Brooke, Lily Crosby, Mona Grey, Rita Le Bosse, Jessie Wood, and Messrs. Geo. Bolton, W. Russell Coultart, Chas. Ross, Harry Speller, Fred Temple, Wal Barker, Will Kemp, Frank Dexter (accompanist), and J. Harrison (musical director).

The toast of "The King and the Members of the Royal Family" was submitted by the president who referred to the gracious kindness displayed by His Majesty the King, the Prince of Wales, and the Duke of York towards the printing trade through the Printers' Pension Corporation.

#### "The Association."

Mr. Warren (general secretary, National Society of Electrotypers and Stereotypers) said the toast delegated to him was a very pleasant one and the fact that it had been allotted to him for the third successive year was sufficient indication of the good feeling that existed between their Association and the one he was more personally connected with. Indeed, their trade could boast of the good feeling that existed between the employers, managers, overseers and the men. They had experienced recently a period of trade depression, and for the first time they had put into operation a scheme for the limitation of overtime and a restriction to some extent of "grassing," and he wished to take the opportunity of expressing his thanks to many present for the sympathetic way they had received it. The effect of that scheme had meant the employment of men who would otherwise have been completely unemployed. Referring to the Trade Houses Agreement, Mr. Warren said that, in spite of the opposition it at first met with, no employer, manager or overseer would desire now to see it scrapped. The finest proof of the many

things accomplished by it was to be found in the friendly spirit that had prevailed. By it the hours of labour had been reduced, the wages question settled, unskilled labour abolished, holidays established, decent prices obtained for the employer, all without question of a strike or lock-out. On the apprenticeship question the employers and the trade union were going in future to take the joint responsibility for the boys' training, and he was already assured when the new technical institute was opened in London they would have the co-operation of their members. In regard to trade charities Mr. Warren said the Overseers' Association had rendered noble service to the Auxiliary. There were seventy children of men connected with the electro and stereo branch of the trade who lost their lives in the war drawing an annual amount from that fund. After wishing success to the effort Mr. Bullett is making at Anderton's Hotel on December 20th on behalf of the Corporation, Mr. Warren said he had much pleasure in proposing the toast, with which he would couple the name of Mr. W. H. Longley.

Mr. Longley briefly replying, expressed on behalf of the Association thanks for the hearty way they had responded to the toast.

#### "The Ladies."

Mr. G. W. Sharvell proposed the toast of "The Ladies," which was responded to by Mr. A. E. Holmes, who expressed on their behalf gratitude for the enjoyable evening spent.

#### "The President."

Mr. G. K. Naylor, in proposing this toast said he was not in the happy position of being an overseer, but he would speak from the point of view of a personal friend of the president. He spoke of the good feeling of the employers and the men and also of the valuable medium of the Overseers' Association, an association which he had always regarded as a means for maintaining the equilibrium of the respective interests of the men on the one side and the masters on the other. The name of Alfred Chadwell had become a classic in their trade and their president had always been one of the first to attach his name to every good cause.

The toast was received with musical honours, and in returning thanks, Mr. Chadwell said he did not always get the same kind things said about him, especially at their monthly meetings at St. Bride Institute. His name had been mentioned in connection with the success attained by the Association. He would rather put the credit for it on to other shoulders.

#### "The Visitors."

Mr. Bullett next gave "The Visitors" and thanked them for their presence. The fact that all the visitors who were with them last year were there that night was sufficient evidence that they felt it worth their while to come again. Among the gentlemen specially mentioned were Mr. E. W. Whittle, Mr. Geo. Eden, representatives of two kindred associa-

tions, Mr. Geo. K. Naylor and Mr. Harry Williams.

Mr. Williams, in reply, said he admired the standing the Association had attained to, and which could be summed up in the first letters of each word of its title: E.S.M.O.A.—Energy and Sociability Makes Our Association.

Mr. Eden said he was glad to see that unity of spirit existing between the three overseers' associations. He did not know if the future held anything approaching amalgamation between them; even if it did not he was sure there would always abide a strong feeling of friendship.

Mr. Whittle expressed his thanks for the way his name had been identified with the toast. Referring to the remarks made by Mr. Warren regarding the apprentice question he said the overseer in the future would devote more attention to the boys' training than in the past. He thought it a splendid thing that the secretaries of the three overseers' organisations should be gathered at the same table and spoke hopefully of a time when they might meet more than once a year.

#### "The Officers."

Mr. Forsyth, in a humorous speech, offered the final toast, to which Mr. A. Wood briefly replied.

## Sale of Printing Plant.

The Controller of H.M. Stationery Office is getting rid of the surplus plant of that establishment as quickly as it can be disposed of, and on Thursday last there was another sale of printing, lithographic and other machines, at Old Ford-road, on the premises of the Stationery Department. There was a good attendance of buyers, but on the whole prices were rather low and many excellent bargains were secured. A considerable quantity of type was first disposed of at prices ranging from 2½d. to 2s. 10d. per lb., and the printing machinery, of which there was a good deal was then offered. A quad-crown wharfedale, by W. Dawson and Sons brought £70; a quad-royal "Bremner" wharfedale £144; a double-crown ditto, by Dawson, £126; and a double-crown, by Payne and Sons, £120. A quad-crown "Defiance" Wharfedale, by Elliott, was knocked down for £70; and a double-demy "Reliance" wharfedale, by Fieldhouse, Crossfield and Co., brought £180; a similar machine by the same makers, £175; and a quad-crown, also by Crossfield, £125. A considerable number of guillotines were disposed of, among them a nearly new 42-in. self-clamp, by W. Crossland, brought £172 10s.; and two "New Conqueror" guillotines, by John Greig and Sons, a 42-in. and a 50-in., went respectively for £160 and £170. A 32-in. "Express," by Furnival and Co. was sold for £75; a 42-in. by the same makers, bringing £140. A feature of the sale was the inclusion of a number of 28-in. rotary photogravure machines, by

Messrs. Pickup and Knowles, with power fittings for belt drive, bevel gear simultaneous roller adjustment, h.w. guide rollers on iron overhead structure, two cylinder shafts and seven rubber covered rollers, with rotary cutter driven by shaft and bevel gearing from the printing section of the machine, and a portable take-off table with elevating gear. There were about twenty of these and similar machines; a number of them brought £100 each, one went for £35, and four put up together went for £120 the lot. Two 22-in. photogravure machines, by Bell's Photogravure Machinery Co., were sold at £15 each, and a large quantity of copper-covered photogravure cylinders were disposed of. A Model 4 "Simplex" double-letter linotype was sold for £450; and a Model 2 "Duplex" double-letter linotype for £325. Among the platen machines the following prices were realised: A crown-folio "Arab," with safety guard £62 10s.; a foolscap-folio "Bremner" £45; an Imperial-octavo "Bremner" £40; a demy-folio "Mitre" £22 10s.; a foolscap-folio "Swift" £27 10s.; and a similar machine the same price. An "Albert" platen brought £62 10s., and a Model 4 "Phoenix" £120. A double-demy "Centurette" two-revolution printing press, by Linotype and Machinery Limited, with a Cross patent automatic feeder attached, sold for £525. An immense quantity of chases of all kinds was sold, many of them being put up in lots of 100, and printers in search of bargains ought to have been fully satisfied by the prices at which they were knocked down. Mr. Robert H. Ruddock had charge of the disposal of the plant and Mr. S. J. Baker acted as the auctioneer.

How Do You ADVERTISE?—We recently wanted to make a round hole in our garden drain pipe to take off some surface water; but it was a new job to us, and we always looked on drain pipes as rather brittle things, so we were uncertain how to proceed. We looked around for advice, and fortunately we came across George. Now George has faults, we admit, but he seems to know a wonderful lot of near cuts. George advised us to take a small round headed hammer, start gently tapping the pipe, and keep on doing it. We took his advice and tapped, tapped, tapped for a long time, but didn't seem to be making any headway. At last a little dot appeared, then a few particles of fine dust; and, finally, before we realised it, we had made a round hole in the pipe. It was starting and keeping steadily at it that did the trick. A sledge hammer blow would have been fatal. Now it's just the same in advertising. An ad. now and then may do some good, but the steady tap, tap, tap, week in and week out, yields far better results than spasmodic bursts of publicity. Keep your name steadily under the customer's eye by hook or by crook, and sure results will follow.—*Strain's Monthly Statement.*

A NEW monthly magazine of humour, *Gaiety*, has just made its bow to the public.

 Gillis, Publishers, 58, Shoe-lane, London, E.C.4.

### SALE BY AUCTION.

*By Order of the Receiver for the Debenture Holders.*

**Re HALLAWS, LTD.,**  
 1a, Basterfield Street, Golden Lane, E C 1.

**L**ETTERPRESS PRINTING PLANT AND  
 MACHINERY, including Quad Demy Payne's  
 Wharfedale (Geared Inking), Crown "Phoenix"  
 Platen, Crown "Monopol" Platen, Quad Royal  
 "Cundall" Folder, 40 in. "Conqueror" Guillotine  
 (by Greig), Crown Proof Press (by Wesel Manu-  
 facturing Co.), 10 New D.C. Electric Motors ( $\frac{1}{2}$  to  
 5 h.p. 530 volts), 18 Pairs New Wrought Folder  
 Chases, 30 New Galleys, Composing Frames,  
 Reglet Racks, New Brass Rule and Type, Office  
 Furniture, Partitions, Electric Fittings, Roll-top  
 and Pedestal Desks, etc.

### Mr. FRANK G. BOWEN

will SELL BY AUCTION on the premises, as  
 above, on WEDNESDAY, DECEMBER 7TH, 1921, at  
 Two o'clock precisely.

On View day prior and morning of Sale. Cata-  
 logues may be had of Messrs. Chantrey Button & Co.,  
 Chartered Accountants, 61-62, Lincoln's Inn Fields,  
 W.C.2, and of the Auctioneer, 62a, Aldersgate  
 Street, E.C.1.

NOTE.—The Auctioneer will be pleased to receive  
 offers for the whole of this Plant as a going  
 concern.

## Books on Printing.

### Norwich Public Library and Master Printers.

A new and valuable development of the Norwich Public Library has been inaugurated by the opening of a printing and allied trades section. On Thursday evening, November 24th, Mr. W. T. F. Jarrold (president of the Norwich Master Printers' Association) held a reception at the Public Library in order that employers and employees might have a convenient opportunity of inspecting the special collection of books which has been formed and which is at their service. Each person was presented with a copy of the descriptive and classified catalogue of the books (noticed in our issue of October 13th) which has been printed at the expense of the Association. The Association has issued the catalogue because it realises the great value of having in the city a good collection of books on the printing craft, and because it hopes that the employees will be induced to study the history and technology of their craft, so that progress in the art may be made in Norwich and the vicinity.

To add to the interest of the meeting the City Librarian arranged an exhibition consisting of some rare early English printed books, some facsimiles of other early printed books, and so forth. An additional feature of the exhibition was exhibits of decorative book covers, title-pages and end papers from the private collection of the librarian, Mr. G. A. Stephen, who has made a special study of book production. He has published books and articles on various aspects of the subject, and was awarded the silver medal of the Royal Society of Arts for an illustrated lecture.

Those present at the reception included Mrs. Jarrold, Lieut.-Col. H. Rivers Fletcher (president of the East Anglian Alliance of the Federation of Master Printers), Alderman H. J. Copeman, J.P. (chairman of the Public Library Committee), and other members of the committee.

To add to the interest of the meeting an attractive concert was arranged by Mr. T. H. Barry, the manager of Messrs. A. E. Soman and Co., and during the evening refreshments were served. During the interval Mr. Jarrold said that a year or so ago the Norwich and District Master Printers' Association agreed to co-operate with the Norwich Public Library Committee. The collection of books on printing at the Public Library was augmented considerably, with some financial assistance from the Association, and it was now a very representative collection of the best books on the history and practice of printing and some kindred subjects, the number of volumes being nearly 300. The majority of the books were available for borrowing. Mr. Jarrold paid a warm tribute to Mr. Stephen, his deputy, Mr. C. Nowell, and the other members of the library staff for their valuable

assistance in connection with the exhibition

Extracts were read from letters received by Mr. Stephen, in which congratulations in respect of the new departure were expressed by Mr. James MacLehose, president of the Federation of Master Printers, Mr. E. W. Humphries, ex-president of the Federation of Master Printers, Mr. Chas. T. Jacobi, of the Chiswick Press, and Mr. J. R. Riddell, principal of the St. Bride Foundation Printing School.

The arrangements for the reception given by Mr. Jarrold, on which he is to be congratulated, were carried out under the superintendence of Mr. George H. Yelf, the secretary of the East Anglian Alliance of Master Printers' Associations.

## Numbering Machines.

Of interest to readers in the Colonies will be the information that high-class British-made numbering machines are now being manufactured and placed on the market by Mr. E. W. H. Stanleigh, 23, Bartlett's-buildings, Holborn-circus. The numerators submitted to our inspection—hand-numbering machines, type-high and rotary barrels—certainly substantiate the firm's claim that neither trouble nor expense is shirked in

order to produce goods worthy of their country of origin, for in our opinion workmanship and finish leave nothing to be desired, and as for reliability this can be judged by the large number of repeat orders in hand.

The machine illustrated is a "Stanleigh" Hand Numerator with five actions. The working of this machine is smooth and positive, whilst the type is of extreme clearness. Mr. Stanleigh informs us that he is prepared to construct to order special machines to meet all requirements for hand, type-high or rotary work—a field in which he has had a wide experience. (See advertisement on page 589).

## Australian Notes.

(From Our Sydney Correspondent.)

DETAILS of the imports of paper for the June quarter show that Canada leads the United Kingdom. Out of the total of £1,478,288 received into the Commonwealth the Dominion sent paper to the value of £447,021, the share of the United Kingdom being £413,557. The United States follows with £176,805, and Japan with £17,726.

IN stationery lines, however, the United Kingdom is well ahead. Of the total imports, which amounted to £336,156, the total from the Mother Country was £238,081. Next in order was the United States, with £71,770. Canada's contribution was only £2,805, and Japan's £1,402.

THE report of the Cumberland Paper Board Mills, Ltd., presented at the first ordinary general meeting of shareholders, showed a net profit of £45,500 (after payment of Federal and State income taxes) for the period ended June 30th last. The company, as at present constituted, was incorporated on September 29th, 1920. An interim dividend of 1s. per share was paid in February last. A sum of £4,500 is allotted to reserve for taxation, preliminary expenses to the amount of £478 are written off, leaving £15,519 available, out of which a final dividend at the rate of 10 per cent. per annum was recommended. Fifty thousand second preference shares were offered to shareholders in March last, but only 14,489 were allotted.

THE report states that the company has secured patent rights for a wood-pulping process, which it is stated may revolutionise the manufacture of mechanical wood pulp. The capital amounts to £307,963. Sundry creditors amount to £36,771, and liability to bank £85,523. Plant and machinery are valued at £196,726, freehold property £97,404, stocks £95,454, and sundry debtors are down at £50,170.

THE Australian Paper and Pulp Co., Ltd., which was formed in Melbourne in August last year, made for the ten months (after allowing for taxation and writing off preliminary expenses), a net profit of £72,938. Further dividend of 8d. per share, making 10 per cent. per annum for the full period, will absorb £24,883, leaving £808 to be carried forward, £10,000 having been transferred to reserves. The company operates on a capital of £746,500.

THE Country Press Co-operative Co. of Australia, Ltd., which has a capital of £50,000, announces that it has purchased the whole of the assets and taken over the whole of the advertising contracts of the N.S.W.

Country Press Co-operative Co., Ltd., as from the 1st instant.

THE company directly represents the whole of the provincial newspapers of Australia, and has been established by the newspaper proprietors themselves, in "order to enable advertisers to do their advertising direct through a central office; to afford them first-hand information and expert assistance, and, generally, to protect their interests by direct control." Mr. G. H. Varley, M.L.C., is the chairman of the company, and Mr. T. M. Shakespeare the manager.

FOLLOWING the All-Australian and New Zealand Trade Union Congress, a big propaganda is being set on foot with the object of establishing Labour daily newspapers in all the principal cities of Australia. The Conference called upon each union in the Commonwealth to assess each of its adult members to the amount of 10s., women and juveniles 5s., for the purpose, such amount to be called up and made available as soon as practicable.

IN developing the scheme, it is proposed to merge all the existing Labour papers into one company—Labour Papers, Ltd. Furthermore, it has been decided that "Ted" Grayndler, the managing director of Labour Papers, Ltd., should devote his whole attention until the end of the year to a campaign in the interests of Labour papers. Each State of Australia will be visited by him in furtherance of the scheme to raise £360,000 to establish Labour dailies (as a start) in Sydney, Melbourne and Perth, and to strengthen existing dailies in Brisbane, Adelaide, Hobart, Broken Hill and Ballarat.

PROBATE has been granted of the will of Mr. Watkin Wynne, general manager of the *Daily Telegraph* Company, Sydney. The value of the estate was sworn at £26,542. Mr. Wynne died on July 8th.

## What a Sheet of Paper Contains.

What is a sheet of paper? What goes into its manufacture, and how much of each substance? The accompanying table printed in the *Mill*, organ of the Eastern Manufacturing Company, indicates what a wide diversity of material is required in paper manufacture. The following items represent the ingredients of 100 pounds of paper: Wood, 134 cub. ft.; sulphur, 127 lb.; limestone, 175 lb.; kerosene, 57 oz.; bleach powder, 143 lb.; rosin, 3 lb.; soda, 751 lb.; alum, 42 lb.; colour, 18 oz.; coal, 320 lb.; iron sulphate, 79 oz.; copper sulphate, 19 oz.; lime, 317 oz.; belt, 2 sq. in.; felts, 32 sq. in.; wire, 67 cu. cm.; lubricating oil, 220 cu. cm.; water, chemically purified and filtered, 7,500 gals.

# British Paper Trade Customs.

## THE NEW CODIFICATION.

Of much interest to users of paper and boards, both in this country and overseas, are the codified Paper Trade Customs which have been revised and adopted by the Paper-makers' Association of Great Britain and Ireland (Incorporated), the National Association of Wholesale Stationers and Paper Merchants, the Employers Federation of Envelope Makers and Manufacturing Stationers, and the United Kingdom Paper Bag Manufacturers Association. The task has occupied much time and the result of the labours of the four associations is seen in the following customs which now govern the paper trade bearing the date January 1st, 1922:—

### Group Reference Letters.

(A) Cloth-lined papers, coated art papers and enamels, copyings, tissues, drawing cartridges, drawing papers, blottings, dryings, filterings, duplicator, foils, gum papers, insulating papers, machine writings and printings, pulp boards, tracing papers, envelope papers, manillas for other than wrapping purposes, caps for other than wrapping purposes, and similar papers.

(B) Cards, pasteboards, glazed pressing boards, greaseproof, imitation parchment, news, waterpoo papers, waxed, and similar papers.

(C) Box boards, browns, corrugated straw, leather boards, middles, mill boards, mill wrappers, sugars, casings, krafts, sealings, wrappings, cartridges, and similar papers.

### Conditions of Sale.

Prices may be agreed:—(1) By weight, whether put up in reams, rolls or any other form. (2) Per ream, based upon nominal weight.

### Terms and Delivery.

(1) Quotations are understood to be net and carriage paid to buyer's address. Goods invoiced and despatched up to and including 25th of the month shall be paid for during the following month, provided delivery has been effected by date when payment is due.

(2) Delivery in the British Isles shall include delivery at buyer's warehouse, or that of his consignee.

### Packing and Marking.

Boards, frames, cases, and special (not ordinary cardboard) centres shall be chargeable at reasonable rates, to be refunded in full when returned within a reasonable time, carriage paid and in good condition. The outside of the wrapper of each ream shall be marked with the nominal weight, except in cases where the weight charged is above nominal.

### Machine-Made Writings, Printings, etc.

A ream contains 500 sheets.

Reams are graded as "Good," "Retree" and "Broke."

"Retree" is subject to 10 per cent. reduction.

"Broke" is subject to 20 per cent. reduction.

All fine papers under 15 lbs. Large Post 500's shall be classed as "Bank."

### Wrappings, Caps, etc.

A ream contains 480 sheets.

### Hand-Made Papers.

A "Mill" ream "Good" or "Retree" contains 472 sheets, consisting of 18 "Inside" quires of 24 sheets each and two "Outside" quires of 20 sheets each.

The "Outside" quires are placed, one at the top and one at the bottom of the ream.

An inside ream "Good" or "Retree" contains 480 sheets, made up of 20 "inside" quires of 24 sheets each.

"Retree" is subject to 10 per cent. reduction, and "Broke" to 50 per cent. reduction.

### Wrappers.

The chargeable weight shall include weight of necessary ream or reel wrappers (not bale wrappers), string and centres (excepting those of wood or metal).

### Substance Variations.

Average variation shall not exceed 5 per cent. either way.

Group "A"—Nominal weight of sheets and reels shall be chargeable if actual weight exceeds or is not more than  $2\frac{1}{2}$  per cent. under nominal weight. Actual weights shall be chargeable if more than  $2\frac{1}{2}$  per cent. under nominal weight.

Group "B"—Actual weight of sheets and reels shall be chargeable up to  $2\frac{1}{2}$  per cent. in excess of nominal.

Group "C"—Actual weight of sheets and reels shall be chargeable provided average variation does not exceed 5 per cent. either way.

### Short Yardage.

Claims for short yardage can only be based upon result obtained from yardage measurements.

### Measurement Variations.

(1) Width of reels shall not vary more than  $\frac{1}{2}$  per cent. with a maximum permissible variation of  $\frac{1}{4}$  inch.

(2) The variation in measurement of paper in sheets must not exceed  $\frac{1}{2}$  per cent. either way above or below the ordered measurement, provided always that where  $\frac{1}{2}$  per cent. is greater than  $\frac{1}{4}$  inch the permissible variation shall be a  $\frac{1}{4}$  inch, and that where  $\frac{1}{2}$  per

cent. is less than  $\frac{1}{8}$  inch the permissible variation shall be  $\frac{1}{8}$  inch.

### Special Makings.

For makings of Groups "A," "B" and "C" of special size, substance, tint, watermark, etc., an order shall be deemed to be properly filled if the quantity supplied is within the following limits either way of the quantity ordered:—

1 ton or less ...	12 $\frac{1}{2}$ %	} Not applicable to hand and mould makings.
Above 1 ton and not exceeding 5 tons ...	7 $\frac{1}{2}$ %	
Above 5 tons...	5%	

Any excess beyond such limits shall be cut down to the nearest standard size and taken by the buyer at the proportionate price of such size.

### Materials.

Unless it is otherwise expressly stipulated in the order, the papermaker shall be free to use his discretion in the selection of materials.

### Dandy Rolls and Moulds.

Buyers requiring a special watermark shall provide the roll or mould free of charge to the papermaker.

### Deliveries.

Deliveries may be suspended in the event of:—

(1) Any contingency arising beyond the control of the buyer or seller, such as war, fire, drought, interruption of transport, impediment to navigation through ice, strikes, lock-outs and the like.

(2) Any accident and/or partial damage during such time as may be required to make good such accident and/or damage.

(3) The buyer or seller, as the case may be, shall give prompt notice to the other party of the cause and commencement of such suspension, and in like manner when it ceases.

In such cases deliveries shall be resumed as soon as is practicable, and where they form part of a contract spread over periods of time, they shall be resumed at the same rate as provided for in the contract.

(4) In the event of the works of the buyer or seller being totally destroyed, and not rebuilt or replaced within twelve months, the contract shall be considered null and void.

(5) In the case of contracts for delivery in instalments, each delivery shall be considered a separate contract.

### Delayed Deliveries.

(1) Specification of makings shall be sent to the seller in reasonable time for delivery on due date. If the paper contracted for be ready for delivery on the specified date, and the buyer does not take delivery when requested by the seller to do so, it shall be invoiced forthwith and invoice taken into account. If the whole of the delivery be not ready, the seller shall not be entitled to invoice any portion.

(2) Paper stored at mill shall be subject to a rent charge of 6d. per ton per week for any period it lies at mill after 14 days from date of invoice except in cases where delay is due to causes beyond buyer's control. Maximum

period for storing at mill shall be three months.

### Complaints of Quality, etc.

Claims for defective quality, short weight, etc., shall be made in writing within 14 days after delivery, but this is not to operate in cases where defective quality cannot reveal itself during this period. Such protection shall not be given beyond three months. In cases where delivery is within the British Isles, at least half the parcel must be available for examination.

For export business, six representative outturn sheets shall be supplied with invoice, but the English exporter is entitled to return to the question of quality in cases where his export buyer subsequently reports any defect not revealed by outturn sheets.

### Contracting Out.

Any or all of these terms may be varied or made inapplicable by the terms of the contract or order.

### Arbitration.

(1) All disputes arising under any contract or order shall be submitted to arbitration in the United Kingdom.

(2) Each party shall appoint his arbiter, and the arbiters shall choose their umpire before proceeding. If the dispute relates to quality the arbiters and umpire must be experts in paper, and they shall decide whether the paper complained of is a fair commercial match of quality to be supplied. Should they decide that it is not, they may authorise rejection, or they may order acceptance subject to stated allowance, in which latter case they shall state whether the allowance shall apply to all or part of such portion as has been used before their examination, and their decision shall be final and binding on both parties. Should either side fail to appoint his arbiter within the prescribed 14 days, the arbiter appointed by the other party shall act for both, and his award shall be binding on both parties as though he had been appointed with their joint consent. The costs of such reference shall be borne as the arbiters and umpire decide.

## Belgian Paper Market.

Owing to German competition the paper trade in Belgium is now in a critical condition. German imports of paper and printed matter during the first half of 1921 represented a value of 12,266,255 francs (4,945,731 kilogrammes). This means that these imports, equivalent to five-sixths of the monthly home production, have thrown 5,750 workmen, exclusive of printers, out of work for 20 days, to say nothing of the money gone into the pockets of an ex-enemy. Belgium, it is true, has received 649,250 francs in duties; but the losses in wages for workmen are  $5,750 \times 20$ , viz., 115,000 days at an average of 18 francs, or a total of 2,070,000 francs, i.e., a net loss of 1,420,750 francs.—*La Papeterie*.

# A Buyers' Guide to Supply Houses

Advertising in the "British and Colonial Printer and Stationer," with a brief reference to some of their Specialities.

## BOOKBINDERS' SUPPLIES.

- BRITISH LOOSE-LEAF MANUFACTURERS, LTD., 27, Finsbury-street, London, E.C. Loose-leaf metal parts and accessories.
- JAMES BRANDWOOD AND CO., 21, Saville-street, Manchester. Marbling inks.
- THOMAS BROWN, 7, Albion-street, Manchester. English gold leaf, brown and white block-ing powder.
- FISHER BOOKBINDING CO. (1912), LTD., St. Ann's Works, Herne-hill, London, S.E.24. Binders to the printing trade.
- GARWOOD AND MUDDIMAN, LTD., 77, Queen Victoria-street, London, E.C. Leather and leatherette, grains.
- WILLIAM GREENWOOD AND SON, Carlton Works, Halifax. Case making, gold block-ing.
- NICKERSON BROS., 99 and 101, Worship-street, London, E.C. Tanners and manufacturers of moroccos, roans, etc.
- T. WILLIAMSON AND CO., 6, 8 and 8a, Palace-square, and 7, Pool-street, Manchester, and 30-31, St. Swithin's-lane, London, E.C. Cloths, label cloths, photograph cloths.
- WINTERBOTTOM BOOK CLOTH CO., 60, Wilson-street, London, E.C. Manufacturers of bookbinders' cloth, label cloth, morocco cloth, buckram, etc.

## COMPOSING AND TYPESETTING MACHINES.

- LANSTON MONOTYPE CORPORATION, LTD., 43 and 43a, Fetter-lane, London, E.C.
- LINOTYPE AND MACHINERY LIMITED, 9, Kings-way, London, W.C.2.

## ENGRAVERS, DIE SINKERS, Etc.

- BADDELEY BROTHERS, Moor-lane, E.C. Dies, embossing, perforating presses, relief stamp-ing.
- BURLINGTON ENGRAVING CO., LTD., 322-326, Goswell-road, E.C.1. Process blocks, in colour, half-tone or line.
- B. DELLAGANA AND CO., LTD., 11, Shoe-lane, Fleet-street, London, E.C.4. Dellanick and Steeleetto nickel steel printing surface, block makers, etc.
- DIRECT PHOTO-ENGRAVING CO., LTD., 38, Far-ringdon-street, London, E.C. Photo etchers, artists, designers.

## ENGRAVERS, DIE SINKERS, Etc.

- G. H. MADDIN AND CO., LTD., 10 and 11, Middle-street, Aldersgate-street, London, E.C. Engravers, die-sinkers, cameo printing, embossing blocks.
- MARSHALL ENGRAVING CO., LTD., 12-14, Far-ringdon-avenue, London, E.C. Embossing and process engravers, artists and photo-graphers.
- MINTON AND CASEY, 1, Clerkenwell-road, London, E.C. Artists, engravers and die-sinkers.
- W. MILES AND CO., 44, Houndsgate, Notting-ham. Type-casting machines, engravers and cutters of oriental matrices.
- JOHN SWAIN AND SON, LTD., 89-90, Shoe-lane, London, E.C. Photo engravers, designers and electrotypers.

## ENVELOPE MACHINE MANUFACTURERS.

- DAVID CARLAW AND SONS, LTD., 31, Finnieston-street, Glasgow. "Leader" envelope folding and gumming machine.

## PAPER AND BOARDS.

- HENRY FEATHERSTONE, 13, Whitefriars-street, Fleet-street, London, E.C.4; Cables, "Feti-papmill, Fleet, London." Paper agent and merchant.
- W. LUNNON AND CO., 59, Carter-lane, London. Paper merchants. Supply Lunco paper in colours and white.
- J. AND J. MAKIN, 20, Mount-street, Manchester. Papermakers.
- VAN HUIDEN, Winschoten, Holland. Straw-boards, corrugated boards, mill and leather boards, etc.
- HARRY B. WOOD, 201-5, Produce Exchange, Manchester. Boards, dextrine, leather, wood pulp and straw.

## PAPER AND PRINTING TRADE PUBLICATIONS.

- STONHILL AND GILLIS, 58, Shoe-lane, London. Publishers of the *British and Colonial Printer and Stationer* and the *World's Paper Trade Review*.

The up-to-date Colonial printer is naturally anxious to have information as to the latest improvements in machinery, new processes, and all labour and time-saving devices. He

### PAPER AND PRINTING TRADE PUBLICATIONS.

is also very desirous of having a knowledge of paper prices and trade movements generally. There is a fund of information in the weekly issues of the *British and Colonial Printer and Stationer*, which appeals to printers, stationers, box makers, envelope makers, bookbinders, etc. Why not have the journal regularly delivered to your office or works? It is a good investment at a low price—13s. for one year (subscription 8s. 8d., plus 4s. 4d. postage). Send the publishers a remittance at once.

In the Colonies quite a number of movements are on foot to build pulp and paper mills. Who are the makers of special machinery? What is the selling price of wood pulp and other papermaking materials? What are the conditions of the world's pulp and paper markets? All this information, and much more, will be found in the *World's Paper Trade Review*. Interviews with leading men associated with the industry are published, latest inventions described and illustrated, new processes dealt with; in fact, its pages teem with practical information and commercial intelligence relating to paper, pulp, paper stock, engineering and the allied trades. Order the *Review*, which is published weekly, for a year, and send a remittance of 32s. 6d. to cover cost (subscription 26s., plus postage 6s. 6d.).

### PLANT AND MACHINERY.

BENTLEY AND JACKSON, LTD., Lodge Bank Works, Bury, Lancs. Papermakers' engineers.

ROBERT BROWN AND CO., 119, Oakley-street, London, S.E.1. Printers', stationers' and general engineers.

BUMSTED AND CHANDLER, Cannock Chase Foundry, Hednesford, Staffs. Paper bag making machinery.

EDMUND BUSH AND SON, LTD., Crown Point-road, Leeds. Hot-air drying apparatus for drying varnished and gummed sheets.

AUG. BREHMER (T. McAuliffe, British Successor), 12, City-road, E.C.1. Bookbinders' machinery.

OSCAR FRIEDHEIM, LTD., 7, Water-lane, Ludgate, London, E.C.4. Cables, "Friedheim, London." Machinery for the bookbinding, printing and allied trades.

A. T. GADSBY, 42a, Denmark-hill, Camberwell, London, S.E.5. Bronzing machines, all-steel waste paper balers, gumming machines, etc.

JOHN HADDON AND CO., Salisbury-square, Fleet-street, London, E.C.4. Printing machinery, type and sundries for the printer.

W. MORGAN AND SON, Thorparch-place, Wandsworth-road, S.W.8. Paper mounters and liners.  
PNEUMATIC RUBBER STAMP Co., LTD., 18b, Queenhithe, London, E.C.4. "Durapad" series of stamp pads.

*Approved "Firms' Own Announcements" may be inserted under the above or other headings in our Export Issues, the additional space occupied being charged at special advertising rates to be obtained on application to the Publishers, Stonhill and Gillis, 58, Shoe Lane, London, E.C.4.*

LENDRUM LTD.—Under the auspices of the Lendrum Athletic Club a social evening of an attractive and elaborate character is to be held at Stationers' Hall on December 8th. The whole suite of handsome rooms is being reserved for the occasion, and the programme will include a whist drive, dancing, and musical items. Mr. E. S. Lendrum is giving his personal support to the fixture, which will doubtless add another success to those already achieved by the club. Members of the staffs at Manchester, Edinburgh and Glasgow have promised to attend. Friends of Lendrums Ltd., will be welcome, and all information and tickets may be obtained from Mr. Jackson, 3, Temple-avenue, London, E.C.

THERE were no fatal accidents recorded in the paper, printing, etc., group of trades in October, but there was one case of lead-poisoning among operatives engaged in printing.

## Government Contracts.

Contracts were placed with the following firms during October:—

### Post Office.

PAPER, TELEGRAPH.—Waterlow and Sons, Ltd., London, E.

### Crown Agents.

ENVELOPES.—Bennett and Wood, Essex.

STATIONERY.—Waterlow and Sons, Ltd., London, E.C.

### Stationery Office.

BAGS.—Smith and Young, London, E.C.; McCorquodale and Co., Ltd., Wolverton.

CARDS.—Wiggins, Teape and Co., Ltd., Dover.

CLOTH CENTRED PAPER.—A. E. Mallandain, London, N.W.

CUTTING MACHINE.—Hayward and Co., London, E.C.

ENVELOPES.—J. Dickinson and Co., Ltd., Hemel Hempstead; McCorquodale and Co.

ENVELOPES, OFFICIAL PAID.—Edinburgh Contract: McCorquodale and Co., Ltd.

FERRO-PRUSSIAN PAPER, ETC.—A. West and Partners, London, S.W.; Norton and Gregory, Ltd., London, N.W.; S. C. and P. Harding, Ltd., London, S.E.

PAPER OF VARIOUS DESCRIPTIONS.—Harrison and Sons, Ltd., London, W.C.; J. Hurnell, London, N.; J. B. Green and Co., Ltd., Maidstone; Millington and Sons, Ltd., London, N.; Inveresk Paper Co., Ltd., Musselburgh; British Patent Perforated Paper Co., London, E.; J. Cropper and Co., Ltd., Kendal; Thomas and Green, Ltd., Wooburn, Bucks; A. Cowan and Sons, Ltd., Penicuik; Hendon Paper Works Co., Ltd., Sunderland; W. H. and A. Richardson, Ltd., Jarrow-on-Tyne; J. Batchelor and Sons, Ltd., Ashford, Kent; Portals, Ltd., Whitchurch; Spicer Bros., Ltd., Eynsford; St. Neots Paper Mill Co., Ltd., St. Neots, Hunts; Northfleet Paper Mills, Ltd., Northfleet, Kent; J. A. Weir, Ltd., Alloa; Ford Paper Works, Ltd., Hylton, Sunderland; London Paper Mills, Ltd., Dartford; Fisher and Co., Ltd., Kettlebrook; R. Craig and Sons, Ltd., Moffatt and Caldercruix; Ulverston Paper Co., Ltd., Ulverston; C. Marsden and Sons, Ltd., Tamworth; F. Tremlett and Co., Ltd., Stoke Canon; J. Wild and Sons, Ltd., Radcliffe; Smith, Anderson and Co., Ltd., Fetterkil, Leslie; Cooke and Nuttall, Ltd., Horwich; A. Pirie and Sons, Ltd., Bucksburn; W. Nash, Ltd., St. Paul's Cray.

PORTFOLIOS.—J. Adams, London, E.C.

REELING AND PACKING PAPER.—H.M. Stationery Office Press, Harrow.

TAGS.—Applied Paper Co., London, N.

THE Pneumatic Rubber Stamp Co. (Buck's Patent), Ltd., of 18b, Queenhithe, Upper Thames street, E.C.4, send us a copy of their illustrated catalogue No. 24, giving full particulars of a great variety of their dove-tail pneumatic cushion rubber stamps, also of dating stamps, self-inking presses, time stamps, automatic numerators and other specialities.

## Spanish Papermakers' Difficulties.

Señor de Urgoiti, of the Papeleta Espanola, states that Spanish mills are working only half-time. This stoppage is ascribed to the large quantities of paper imported during past months, estimated at 30,000 metric tons. The prices quoted by German and Austrian importers are so low that wholesale dealers made contracts without even seeing samples.

The most serious question is that of illicit imports of paper as "news," to be then utilised for other purposes.

It is very difficult to alter the tariffs for "news" paper, which, being free of duty, is the cause of bad sales of Spanish paper. It is, however, to be hoped that with a drop in prices of raw materials, manufacture will be cheaper and consumption increase.

## Paper Boxes.

### An Important Industry of Modern Times.

Life is such a feverish rush now-a-days that few pause to consider the part which paper boxes, in their infinite variety, play in all social and commercial affairs. Mr. Anthony Burgon, in the course of an article in the *Stock Exchange Gazette*, describes the development of the card and paper box-making industry.

This industry was hardly known as such less than a century ago, and only assumed any degree of importance about the year 1860. At that time, after the preliminary stages of production had been carried through of cutting and creasing the cardboard, and the papers, with other materials used, cut to the required sizes, the rest of the work was done entirely by hand. The shears for cutting were mostly worked by hand and treadle power.

We remember quite distinctly that soon after the Franco-German War power machines came gradually into use. The power guillotine with hand-screw clamp, later improved by the self-clamp guillotine, and the rotary power scoring machine and corner cutter formed the first great changes, the transformation from the old-fashioned methods to the new.

Since then, and more especially during the past thirty-five years, labour-saving machines and devices of all descriptions have been produced in great variety, many of quite an ingenious character, and automatic throughout in action. But even to-day in some sections of the trade hand work still plays a predominant part.

The American and Continental engineers were the most prolific patentees and manufacturers of the first improvements, but those of Great Britain soon followed, and have become responsible for some of the best machines now being operated throughout the industry.

Fifty years ago a mechanic's shop in a box-making factory, for maintaining the plant and keeping the machines in good working order, was unknown. Such provision is now becoming common practice in up-to-date and well-equipped card and paper box works.

It was the American manufacturers and purveyors of all kinds of goods and comestibles that led the van in recognising the important selling properties of cardboard boxes and cartons in which to pack their goods, so that they could be more favourably presented to customers. American box-makers many years ago adopted a first-class system of standardising for many classes of boxes, which greatly reduced the cost of production. This tended to materially popularise the use of such boxes and cartons in that country. Any deviation from that system means, of course, higher prices for the finished article.

For some considerable time the British

manufacturers and purveyors lagged far behind in the use of card and paper boxes, folding cartons and containers, but have gradually realised what an important help they are in selling and the general convenience in handling products of all kinds. By using boxes for stocking purposes in shops and warehouses, etc., the goods are kept fresh, and enable sales to be effected with greater promptness and facility. The saving of time alone means covering the cost of the boxes many times over.

For postal purposes the use of strong cardboard boxes has been extensively adopted by retail stores and manufacturers for goods and comestibles as a safe and inexpensive packing. Heavy and expensive wood boxes for packing all kinds of goods have been replaced by the fibre board boxes with wooden strengtheners.

Cardboard and paper manufacturers, both British and foreign, have rendered the greatest possible assistance in producing in great variety suitable materials for all kinds of boxes, folding cases and containers. The artistic spirit has also been largely displayed in producing chromos for chocolate boxes and the like, designs for embossing and printing plants, which are now being used not only for describing the products, but also as an excellent advertising medium.

## American News Print.

The monthly Bulletin of the News-Print Service Bureau states that the 44 reporting companies produced 143,472 tons, and shipped 142,393 tons during September. Production exceeded shipments by 1,079 tons. Production figures include 1,099 tons of hanging, of which 265 tons was produced in Canada. The average daily production of news-print paper by the mills reporting for September amounted to 73.7 per cent. of the average daily output during the three months of greatest production in 1920, allowing for new machines recently started. Production during September was 6,242 tons, or 4 per cent., and shipment 5,238 tons, or 4 per cent. less than in August, there being two fewer working days in September.

Production by the reporting United States mills during the first nine months of 1921 was 229,882 tons, or 24.4 per cent. less than in the first nine months of 1920, and production by Canadian mills decreased 82,491 tons, or 12.4 per cent. during the same period, making a total decrease of 312,373 tons, or 19.4 per cent. during the same period, making a total decrease of 312,373 tons, or 19.4 per cent. by the 44 reporting companies.

Total stocks at all reporting mills on September 30th amounted to 40,630 tons, or 957 tons more than on August 31st, and were equivalent to about five days maximum production. Of the total stock on hand at the end of September 22 per cent. was at British Columbia mills that depend upon water shipments.

## The Premier Paper Mills, Ltd.

### New South African Enterprise Starts Up.

We are pleased to be able to present in this issue an illustration of the first paper mills to make paper in South Africa. The Premier Paper Mills, Ltd., which was formed in July, 1918, erected its mills at the Klip River, 18 miles distant from Johannesburg, and on the main trunk railway line leading to every part of the Union and Rhodesia.

The production of wrapping paper was commenced early in April of this year, and large quantities have already been turned out. The capacity of the Premier Mills is at present from 1,600 to 1,800 tons per annum,

proximity of the coal supply, which is within 20 miles of the mills, the fuel costing as low as 10s. per ton delivered to works.

As a result of the experiments carried out since the mills started operations, suitable raw materials have been found, which will produce a wrapping paper in every respect equal in quality to the wrappings imported into the country from whatever source.

It is interesting to learn that practical papermakers are in charge of the mills, the works manager having had an experience of over thirty years in paper manufacture, twelve of these as manager of a home mill making similar paper to that turned out on the Klip River. The staff consists of practical men, imported from England and elsewhere, and there is also an ample supply of trained natives, whose employment at low wages, when compared with the white men's earnings

THE PREMIER PAPER MILLS, KLIP RIVER, TRANSVAAL.

but by increasing the drying capacity of the plant the output can be made to supply the whole of the Union's requirements of this article. The whole of the papermaking plant was supplied by the well-known papermaking machinery experts, Messrs. J. Milne and Son, Ltd., Edinburgh.

The progress of this new enterprise will be watched with great interest. It starts up under good auspices, the authorities in the Union being naturally anxious that the industry should succeed.

With the advantages possessed, it is claimed by the directors that they will be able to compete with any similar imported paper, not only in the inland towns, but also at the nearest (home) port of entry into the Union, which is Cape Town.

The Premier Mills occupy a very suitable site for the manufacture of paper, and cover an area of 20 acres of freehold ground, which allows ample room for expansion. The Klip River passes the company's property, and the railway station is within half a mile of the works. A further natural advantage is the

conduces to the economic working of the mills.

The Premier Mills are the only paper mills in South Africa, and we are informed that several years must elapse before any competitive mills can come into active operation against them. In view of the fact that their mills are capable of supplying the whole of the Union's consumption of wrapping paper, they are turning their attention to the manufacture of paper bags of every description, and machinery for this and other purposes is being shipped in due course.

It must be obvious to all those who have given the question of South African industries any considerable thought, that such an industry as wrapping paper manufacture can only depend on its own country for its markets. Many years must elapse before it can possibly hope to export wrapping into Europe, and be able to compete with the home products. In this connection the directorate of the Premier Mills has acted very wisely in erecting their mills large enough for the requirements of their country.

From what we have learned of this com-

pany's future extension programme, it must be gratifying to all those connected with the concern to feel that those directing its affairs are men of wide vision and progressive ideas.

## Papermaking in Australia.

### Interesting Figures from a Government Report.

The Department of Overseas Trade has issued a report on the economic and commercial situation of Australia to June, 1921, prepared by Mr. S. W. B. McGregor, H.M. Senior Trade Commissioner in the Commonwealth.

References to papermaking are few, it being stated that although the industry has been established some years in Australia it has made comparatively little progress. Raw materials are lacking, particularly wood pulp. Many experiments have been made, but no means have been found for treating Australian woods for the production of pulp that can be used for making white printing and other better class papers.

In connection with the work of the Queensland Forest Service, it is mentioned that the best Australian pulp wood for papermaking is the Southern Queensland silky oak, and in addition to information which has already appeared in our columns, it is stated that the silky oak saplings from which the pulp is taken grow most abundantly in sandy soil, and a crop of saplings suitable for pulp can be raised in five years. If pulping facilities are provided in the vicinity of Brisbane the logs would be worth £2 or £3 per ton delivered at the mill. This wood is also capable of producing a high-class viscose or artificial silk which is capable of being woven into various fabrics.

Statistics showed that the value of imported paper from all countries in 1913 was £1,826,189; in 1918-19, £4,369,881; and in 1919-20, £2,850,197. Stationery took the following course: 1913, £1,137,856; 1918-19, £1,173,999; 1919-20, £1,306,415. Of the paper, the United Kingdom in 1919-20 was represented by £435,652, or 15.2 per cent, and of the stationery by £864,093, or 66.1 per cent. For the nine months ending March 31st, 1921, imports of paper and stationery totalled £7,140,801, of which the United Kingdom sent £2,886,305; Canada, £930,497; and the United States, £1,064,847. The imports from Norway and Sweden were not available at the time.

**SPANISH TARIFF.**—A correction has been published relating to the new draft Customs Tariff for Spain. The proposed rates of duty on books, booklets, etc., bound or unbound, are as follows: Coming from and published in non-Spanish speaking countries, 1st tariff, 3 pes. 60 cts.; 2nd tariff, 1 pes. 80 cts.; in foreign languages, 1st tariff, 0 pes. 25 cts.; 2nd tariff, 0 pes. 10 cts.

## German Paper Trade Directory.

A copy of the sixth edition of the "Papier-Adressbuch von Deutschland" ("German Paper Trade Directory") has been forwarded to us by Mr. Carl Hofmann, of Berlin, the publisher of the *Papier Zeitung*. The issue of this work has been unavoidably delayed from causes which can be readily understood, but the compilers evidently set about their task with considerable thoroughness, with the result that a most comprehensive directory has been produced. Changes which have occurred during the process of printing form the subject of an appendix. In all there are 1,269 pages, the text being arranged in two columns to the page, 8 in. by 5½ in., in small type. A study of this directory gives an excellent idea of the wide extent of the German paper industry. In the first place, there is a list of districts, followed by the names of papermakers and papermaking firms, in alphabetical order, covering some 40 pages with full addresses, etc. Rag and waste paper dealers are listed according to districts, and then under the heading of "Paper Users," an alphabetical index covers some 293 pages, with 16,360 addresses, embracing book printers, bookbinders, cardboard and paper bag works, lithographers, book and newspaper publishers, etc. Paper merchants and agents are also classified, as well as post card publishers, etc. A section is devoted to the names of firms in the paper and writing goods trades, arranged according to states, provinces and districts, and products, alphabetically arranged, is also a valuable feature. The wide range of the directory and its completeness must strongly appeal to business men engaged in paper and manufactures of paper. In Germany the price is M.150, and M.4 postage, but copies sent abroad are subject to the instructions of the Office for Export Trade for the Book Industry.

## Three Centuries of Publishing.

Mr. C. R. Rivington, Master of the Stationers' Company, who spoke at the dinner held to celebrate the 400th birthday of the Cambridge University Press recently, belongs to a family that can boast of over three hundred years' connection with the book trade. A Rivington was entered as an apprentice at Stationers' Hall so long ago as 1601, when the first Shakespeare quartos were issuing from the press. His descendant Charles Rivington succeeded in 1711 to the business of Richard Chiswell, one of the leading publishers of the day, and since then, according to Mr. Septimus Rivington, the present head of the firm, "there has never been a year when a Rivington was not a member of a publishing firm."

## Paper in the Argentine.

### Interesting Facts Concerning an Important Market.

A report on the market for paper and paper products in the Argentine Republic has been prepared by the Buenos Aires branch of the Anglo-South American Bank, Ltd., and published by the Department of Overseas Trade. The pamphlet runs to 37 pages, and is replete with information, the paper market in the Argentine being examined from every point of view.

The various statistical statements that have been prepared demonstrate very clearly how the neutral nations benefited at the expense of those engaged in war. Special attention has been devoted to those lines that have—temporarily it is believed—been diverted from Great Britain, and the main principle of the investigation has been to discover in how far it will be possible for British manufacturers not only to recover lost ground, but still further to extend their market.

It would seem that the prospects are favourable. The former large volume of trade was based on the quality of British goods and on the reputations of the sellers of them for integrity and clean business methods. This valuable goodwill remains unimpaired, and constitutes a sure foundation on which trade may be rebuilt. It is hoped that manufacturers and others interested will, from a perusal of this report, be able to obtain sufficient information to decide as to the present and future possibilities of the Argentine market.

#### Loose Classification.

In a note referring to the Customs duties (the official scale being given) it is stated as being obvious that, to a large extent, the system of classification as adopted by the Argentine Government is very loose. Whether a paper is a book paper or a writing paper depends in many cases upon its final use. Writing paper may be used for books, catalogues, etc., and printing paper may be, and is, used for writing.

So long as a paper is assessed as being of a certain class its original value has no bearing on the duty. The commonest, cheapest white writing paper pays the same duty per kilo as the most expensive white writing paper.

#### Competition.

The most serious competition in the paper market of the Argentine is that of the United States manufacturers. Before the war their contribution to the market was mostly news-print and blotting papers, and some of the former was of Canadian origin shipped from United States ports. When deliveries from Great Britain and Germany became scarce and irregular the United States had a clear field. It was a case of United States' products or none at all. It was under these favourable circumstances that, in 1914, the National Paper and Type Co., of New York, with a

capital of \$2,200,000 United States' gold, branched out into the paper business in Buenos Aires. A year later another American house, with a capital of \$1,000,000 United States' gold, started business, and both of these firms are now doing well.

Previous to the war the greater portion of paper jobbing was done by three houses, two German and one English. The two former were seriously affected by the British statutory list and later still were hard hit by the antipathy of the Allies and also the Argentines themselves. The French and Italian trade especially was a grave loss, as a large proportion of Argentine printers belong to these nationalities. The sales of the English firm were only limited by its curtailed capacity to deliver.

The present business of the United States is derived from three sources, which, in order of importance, are:—First, trade won from Germany; second, new trade derived from the great number of American commercial houses (including four banks) that have settled in Buenos Aires since 1913; and last, trade won from British manufacturers owing to their inability to make deliveries.

As it will take some years for Germany to regain a really effective goodwill, the immediate issue lies mainly between Great Britain and the United States.

American exporters have not been so zealous in meeting the wishes of the Latin consumers as they might have been. This applied both to quality of goods supplied, method of packing and business arrangements generally. There is no doubt that should approximately the same relation obtain between English and American freights and wages for labour as existed before the war, there is every opportunity for British manufacturers not only to regain their pre-war trade in Argentina, but to extend it still further.

#### Sources of Paper Supplies.

The Argentine found her chief source of paper and paper products in the United States, the value of these in Argentine gold dollars during 1920 being 2,279,142. The United Kingdom came next with 431,507, followed by Sweden, 364,092; Germany, 182,705 and Canada, 127,546. Various other sources were only in the tens of thousands. In the first six months of 1920 news-print reached the Argentine from the United States to the extent of 524,773 (gold dollars); Sweden, 116,177; Canada, 85,779; Finland, 33,079; Germany, 32,804; Norway, 16,446; and the United Kingdom, 5,826.

There is a growing tendency to import news-print, to be sold as wrapping paper, owing to the fact that this paper, weighing between 45 and 55 grammes per square metre, is admitted duty free. Previous to 1915 all news-print was subject to a duty of 2 cents Argentine gold per kilo; in 1915 this duty was halved, and finally, in 1917, it was abolished altogether.

Even with the protection of the duty the local mills found it impossible to compete with the imported news-print and only two of them produced it. Some small quantity in

sheets is still made locally, but as all the materials must be imported the price is considerably higher than that of the imported article of same grade.

About 85 per cent of the paper imported is supplied in rolls. Previous to 1913 more than half of the news-print was supplied by the Scandinavian countries. Germany figures in the Argentine statistics as a large exporter, but that is due to the fact that Hamburg was the shipping port of the Scandinavian products.

The United States supplied print in rolls which, although higher in price than the Scandinavian paper, was of better quality and stronger. The representatives of the American manufacturers always carried large stocks ready for immediate delivery, so that the newspapers could have the assurance that no ordinary hold-up of shipping or port strike would interfere with the continuity of their supplies. The most important newspaper in the Argentine, *La Prensa*, has had for many years a contract with the American house for its supply of paper. This newspaper uses about 25 per cent. of the total importations.

The roll paper is imported in widths of from 17 to 70 inches, and the most demanded weight is 46 grammes to the square metre. The commonest sizes are: "Courrier," 25½ by 35¼ inches; "Pueblo," 28½ by 41 inches; and "Tribuna," 31½ by 45½ inches. There is some demand for papers of 20¼ by 28¾ inches, 25½ by 33 inches, and 29½ by 43½ inches.

Buenos Aires is exceedingly well provided with newspapers, two of which, *La Prensa* and *La Nación*, compare favourably with any in the world. The total circulation of daily papers in the capital approximates three-quarters of a million. There are two English daily newspapers and others in a dozen languages.

#### Conclusion.

After dealing in detail with the various classes of paper and boards and with the methods of entering the market, it is stated in conclusion: At the moment of compiling this report it is not easy to forecast commercial prospects owing to the abnormal exchanges

prevailing and the re-adjustment to normal wages that is going on in the chief exporting countries.

The representatives of British manufacturers and general importers are, on the whole, confident that it is only a matter of time and some sustained effort for the market to be regained and possibly extended.

Some American houses started business in Buenos Aires with the intention of stocking American lines only, but experience taught them that if they desired to carry anything like a complete range they would have to get those lines that American competition could not touch from England. This they did, and do. The British merchant is in the same position. Where possible he gives preference to the home product, but in some cases, notably news-print and blotting paper, he considers it wiser to sell American lines than not to sell at all.

Whilst the representatives of American manufacturers are naturally pleased at the trade they have gained, they are quite conscious that in many lines of paper the gain is only a temporary one due to abnormal circumstances, and they recognise that those lines must be dropped if British manufacturers devote the necessary attention to the Argentine market.

## Printing in America.

**Mr. George Eaton Hart gives his Impressions of his  
Recent Tour of Investigation in the United States.**

An exceptionally large and keenly-interested audience listened to Mr. George Eaton Hart (managing director of St. Clement's Press) when on Friday evening he delivered at the St. Bride Printing School an address entitled "Rambles of an English Printer in the U.S.A." In the unavoidable absence of Lord Riddell, the duties of chairman were ably performed by Mr. W. Howard Hazell, who in introducing the lecturer mentioned that expressions of regret (at absence from the meeting had been received not only from Lord Riddell but also from Sir Arthur Spurgeon and Mr. W. Will.

After referring to his long-cherished desire to visit America and his pleasure at being asked to make the journey on behalf of the firm with which he is connected, Mr. Hart mentioned his pleasant voyage out on the "Mauritania" and soon plunged into a detailed account of his very strenuous "bus-man's holiday." He remarked, however, that a period of six weeks, or even six months, would not have been too long for the investigation of the printing trade of New York alone, so that in view of the magnitude of the country as a whole he was able in the time at his disposal to touch only the fringe of the many-sided investigations he would have liked to carry out.

### **Composing-room Superiority.**

In regard to the composing-room, Mr. Hart said that he found America on the whole far in advance of this country—taking the largest and even the medium-sized plants. In America, for the most part, the old wooden frames and fixtures have disappeared, and been replaced by the new iron or steel fixtures throughout.

These are not only more substantial and easy to keep clean, but have a neat, practical appearance, and are painted in a bright olive green. In these cases (and they were many) there is an absence of accumulations of dirt and pie, so common to the average composing room, although it is quite conceivable that the recent re-fitting may have tended towards this result. The lay-out of the rooms, too, is very carefully studied, the general plan being frames leading to the windows, with a row of surfaces, and, on the opposite side of the surfaces, rows of display cases, with spacing cases and often-used founts mounted. At very frequent intervals lead and clump, brass rule, and metal and wooden furniture racks, so that the necessary material is always in close proximity to the compositor. The slogan is "Every alley a composing-room."

In another alley, running parallel to the display mentioned, would be galley racks for slip or quarto and folio, but made of steel. Indeed all standing matter is stored on literally thousands of these steel galleys. The range of compositor's frames runs down the whole of the room, and these are divided up into sections for periodical work, hand-set display, and tabular matter, unsuitable to machine; whilst another would be where the frames are replaced by makers up, and yet another section by distributing hands. In many cases one alley is occupied by two men, whilst in others, where space is required for make-up only, one man works. Blocks and plates are very systematically stored, and it was evident that the utmost care is given to the important matter of saving footsteps, with the greatest regard to economic production, in the process of passing the work through the department.

Special single cases instead of pairs are used for display founts, and being four or five inches deeper than ours, make them quite practical. Germany does the same.

### Extensive Use of Machine Composition.

Machine composition, as may be surmised, is very extensively employed, although in many of the largest houses full advantage has not been taken of it. In the most progressive, however, the Intertype, Linotype, and Ludlow, are rapidly being used for every description of display. Indeed, in more than one periodical and general office, no movable type was used at all, with the only exception of what may be termed broadside type. In one large office they had recently disposed of 30,000 lb. weight of type, thus positively burning their boats behind them. Machines are very cleverly adapted to all kinds of settings, the organisation in many offices being exceedingly good. In the celebrated house of Donnelly and Sons of Chicago—as one of many instances—a most elaborate system of lay-out is used, where each page and advt. is laid out both as to type, and exact measure, and space to occupy. Pages with innumerable blocks and explanatory matter are first set up with solid point quads, the electro or zinc plate is put down upon it, and the exact position of accompanying matter scratched on the quads, and those requiring to be taken out for insertion of the matter are removed, and the matter which has previously been set by machine to point measure, according to lay-out, is inserted without trouble or additional spacing, the blocks being stuck down. Those who have to compose such complex pages will realise the great saving this system gives.

It was interesting to find that at Messrs. Donnelly's (the printers of the *Encyclopedia Britannica*) all work is paid for at minimum rates, in addition to bonus, on the premium bonus system. Every piece of work is passed through an estimating department to fix the maximum time value of production, which is represented as 100. The saving of time is paid for extra upon a percentage basis. Many of the employees often earn as much as 20 per cent. in addition to their minimum stab wages. This system applies to all the departments of this great firm. Generally, however, the premium system is not adopted in America.

Special departments also deal with welfare and health; research and experimental work for all departments; labour saving and systematic production; costing; employing; buying; advertisement writing; an economy superintendent who watches labour-saving methods; a superintendent of sales and extension of business department; and finally, an extensive and comprehensive secondary and technical school, which is held on the premises—which Mr. Hart had the pleasure of addressing—where not only boys are trained as craftsmen, but well-educated youths, who have matriculated at the universities are given an intensive technical training for positions in the management and directorship.

### Big Linotype Outputs.

Mr. Hart remarked that several times during his peregrinations he inquired as to whether Americans had any freak methods of manipulating their case-rooms, but he was assured there were none, and certainly, beyond a fine equipment and system, he discovered none. One thing that he did discover, however, was the undoubted better output from the Linotype machines, which are worked on "stab." The lowest speed found was on general work, which was intermittent, where 6,000 ens was the minimum production. Magazine and publisher's work 8,000 ens, and on news, 9,000 to 10,000. In the daily newspaper offices no operator was tolerated who could not produce, as a minimum, 8,000 ens per hour; and in offices like the *Boston Herald*, output amounted easily to 12,000, and it is not unusual for operators to produce 20,000 ens. As a matter of fact, at the *Fairchild Press*, in New York, Mr. Hart and his companions actually saw this output exceeded, quite in the ordinary course of production. In offices like the *New York Times*, the *Chicago Tribune*, *Boston Herald*, and others, practically all composition is done at machine.

A night spent in the offices of the *Chicago Tribune* disclosed the fact that the whole composing equipment is put down on the most up-to-date lines, whilst the entire equipment and organisation is simply bewildering in its perfect efficiency. Had time admitted, said Mr. Hart, he would have liked to describe this equipment, with its splendid editorial and composing departments and fine machine room, containing twenty-five Goss rotaries in one long row, and the marvellous handling of the paper through the machine-room and in the dispatch room.

A considerable proportion of women are employed in composing rooms, both at case, mono. and lino. keyboards, as well as in the reading departments, both as readers and copyholders. Owing to the introduction of machine display composition, and the existing complications of the piece scales, piece work has been replaced by 'stab work in both general and daily and weekly newspaper offices, although in talking the matter over with leading printers it was found they preferred a piece scale, if a reasonable basis could be secured for the present-day complex settings. The opinion as to slacking down of output was divided, but the visitors were assured, both in New York and in Boston, that undoubtedly a slowing down had taken place.

The wages are very high, and are increased according to ability. In New York: Daily paper, for day work, \$55, 7½ hours; night, \$58 for 7½ hours; time and half overtime; clickers, \$61. Book and job work, \$45 for 48 hours, and \$48, night, 7½ hours. Boston: Compositors and mono. operators, \$37 for 48 hours; lino operators, \$39, and exceptional men, \$45. Press men, \$39.50 to \$45. These are minimum rates. Office boys' wages, \$15; lift boy, \$25.

Briefly, some of the official hour costs for printing, as recognised and adopted by the

American Typothetæ are: Hand composition, 13s. 6d. per hour; lino composition, 20s. 3d.; mono production, 23s. 8d.; job press (platen), 9s. to 11s. 3d.; Kelly press, 15s. 9d.; cylinders, 22 by 34, 13s. 6d.; cylinders, 33 by 46, 18s.; cylinders, 40 by 60, 22s. 6d. But against these wages, the cost of living is very high, and workmen in New York complained that the item of rent had largely increased, from \$50 a month for five or six rooms, to \$90 and \$120. "Personally," added Mr. Hart, "I should require all this increased wages to live in America at all, unless it be at Niagara or Washington, and even then I would prefer beautiful old England."

(To be continued.)

## The Monotype Users' Association.

A meeting of the Northern Counties Monotype Users' Association was held last Thursday in Manchester. Mr. E. G. Arnold (the president, and past-president of the Master Printers' Federation) was in the chair, but resigned the position of president owing to pressure of other work, and Mr. F. Waterhouse, of Bolton, was elected in his place. Returning thanks, Mr. Waterhouse said the Association would have to face important problems in the near future, even if they were relieved from the questions of wages, hours and holidays. The Typographical Association was very anxious to have all the casting machines manned by members of that Association. That in some establishments would mean great changes and increased cost. He was thoroughly alive to the importance of the question, and was prepared to fight hard to keep conditions as they were. With regard to this question it was announced that the Monotype Association was to have a conference with the Typographical Association on the subject on December 14th. Mr. Arnold said there were cases where employers had allowed members of the T.A. to operate the machines, but he trusted the Association would never agree to the practice being made general.

MESSRS. BRADBURY, WILKINSON AND CO. LTD., engravers and printers, New Malden, Surrey, inform us that, in future, all communications should be addressed as above, as no post is delivered to their Farringdon-road premises.

THE death has occurred of Mr. William Smith, of Messrs. W. Smith and Son, printers and publishers, Aberdeen, at the age of 81 years. For a number of years he was proprietor of the *Bon-Accord* weekly illustrated newspaper, to which he personally contributed both in prose and verse. He served his apprenticeship to the printing trade in the old *Aberdeen Herald* office, and afterwards acted as manager of several well-known printing offices before setting up business on his own account. He was the publisher of many local volumes.

## The Southwark By-Election.

Mr. T. E. Naylor's Optimism.

Doubts about the number of candidates in the South-East Southwark (Walworth) by-election were finally disposed of on Monday when the nomination papers were received by the Town Clerk at Southwark Town Hall just before 12 noon. The candidates are: Mr. T. E. Naylor (Lab.), Mr. T. Owen Jacobsen (Lib. supporter of the Government), and Mr. Horace Boot (Ind. Tory). The appearance of the third candidate is thought to have materially increased Mr. Naylor's hopes of a win. Questioned on Monday as to his chances of success, Mr. Naylor said to a Press-man: "If I were a betting man I should say it was a dead cert. for myself. On account of my Irish policy and my objection to the present Coalition and its inefficient handling of the country's affairs, I shall get the support of the whole Labour Party and a good proportion of the Liberal votes. I count especially upon the ex-soldiers and women of the constituency to give me their whole-hearted support."

Mr. Naylor has written us intimating that he will be glad of the loan of motor cars on the day of the election, the 14th instant.

## Openings for British Trade, etc.

Inquiries have been received by the Department of Overseas Trade (Development and Intelligence), 35, Old Queen-street, London, S.W.1, to whom further inquiries should be addressed with the reference number quoted.

### UNITED KINGDOM.

A United Kingdom firm of general export merchants, with branches in Egypt, desire to get into touch with United Kingdom manufacturers of paper, Bristol board, and straw-board, interested in extending their business in Egypt and the Near East. (Reference No. 444.)

### NEW ZEALAND.

A manufacturers' representative, established in Wellington, is desirous of getting into touch with United Kingdom manufacturers of envelopes, with a view to obtaining supplies and negotiating for exclusive agencies. He is anxious to obtain quotations at special prices for large quantities of a few leading lines, and has forwarded samples of American envelopes for which a large opening exists. He proposes to act on a commission basis, and also to maintain a stock. (Reference No. 450.)

### UNITED STATES.

A well-known San Francisco department store has expressed its desire to get into touch with United Kingdom manufacturers or dealers in stationery, pictures, prints, etc., with a view to making purchases. (Reference No. 437.)

## "Ludlow" Display Composition.

### A London Demonstration.

Of great interest to all concerned with typography is the working of the "Ludlow" system of display composition, which is now being demonstrated by Mr. Martin J. Slattery at Savoy House, Strand. Mr. Slattery tells us he is kept busy with the many calls and inquiries received from practical printers and others wanting to learn all they can about the "Ludlow" system. Some of those who have looked in for just a passing call of a few

tion of the process of type setting and casting.

We are able to illustrate herewith both the "Ludlow" typesetting machine and the cabinet which holds the founts of matrices. The system, it will be understood, represents an application of all-slug composition to display work, a distinctive feature being that the matrices for a line of type are set by hand in a special composing stick, the stick being then inserted in the caster, and one or more slugs cast, the matrices being then distributed

The "Ludlow" Type-Caster.

The Matrix Cabinet.

minutes have stayed for a couple of hours or so, too keenly interested to notice the flight of time.

Interest of this kind was displayed when, on Friday evening, a demonstration was given to a group of some 25 students of the artistic typography class of the Camberwell School of Arts and Crafts. The visitors were led by Mr. W. H. Amery, their instructor, and although the party arrived about seven o'clock it was ten before they departed. Even then questions and discussion had not

and the stick used again for the next line. A complete equipment includes (1) the "Ludlow" typograph machine (2) the special composing sticks (3) the requisite selection of matrices (*i.e.*, individual type moulds), and (4) one or more of the special cabinets (as illustrated), containing a number of drawers, each of which comprises a complete "case," upper and lower complete, of matrices. These cases, though of standard "lay," are exceptionally compact, and the design of the cabinet enables the compositor to combine in a

## British & Colonial Printer

been exhausted, but the general opinion expressed on leaving was that there is a big future before the "Ludlow."

The students were divided, for convenience, into two sections, and while the one group listened to a lecture by Mr. Slattery on the history and capabilities of the system, the other section watched a practical demonstra-

tion of the process of type setting and casting. We are able to illustrate herewith both the "Ludlow" typesetting machine and the cabinet which holds the founts of matrices. The system, it will be understood, represents an application of all-slug composition to display work, a distinctive feature being that the matrices for a line of type are set by hand in a special composing stick, the stick being then inserted in the caster, and one or more slugs cast, the matrices being then distributed

tion of the process of type setting and casting.

caps. are both on the same 12-point slug, the caps. being cast with overhanging heads and tails such that if a plain 12-point slug (*i.e.*, a pica lead as cast by the machine) is laid above the printing slug and another below it, the three then form a triple slug such that the overhang of the caps. is solidly backed and the whole forms a very stable printing unit. The combinations thus obtainable are, of course, endless. The following is a further interesting example:—

**T** for **L** all display  
**THE** **LUDLOW**

which also consists of three solid slugs, two lengths of rule being in this case interposed between the two lower slugs.

Another interesting feature is the possibility of setting in slugs a long line, such as a heading or title for a newspaper or magazine, the joining-places of the constituent slugs being entirely unobservable. Take as an example the following:—

## British & Colonial Printer.

For setting such lines, an extra long composing stick is used, and the casting is done in two or more sections, each section the length of the standard 21-em or 22½-em slug. A striking peculiarity is the fact that if the division between one slug and another happens to come in the middle of a letter, this letter is so cast as to overhang the end of one slug and to fit into a corresponding recess cast at the beginning of the second slug, there being thus no interruption of spacing and nothing whatever to indicate in the resulting print the point where the break occurs.

The exponents of the "Ludlow" take special pride in their italic face. A special composing stick is used for "Ludlow" italic setting, to accommodate special matrices of diagonal form which lie in the stick at an angle, and it is claimed that these means make possible for the first time in the history of printing the production of truly-designed perfectly-formed, fully-kerned italics that are unbreakable.

Among the advantages claimed for this system there is, of course, the feature that very varied material can be used without any walking about from case to case, while the small number of matrices used at a time precludes any need of picking for sorts. The small metal investment is also emphasised, and stress laid, too, on the high type face and low quad slug produced by the "Ludlow." The sweeping general claim is made that, all things considered, the "Ludlow" is the fastest system in existence for producing display composition. Certainly some impressive names of users of "Ludlow" equipment can be quoted, which must make the inquirer feel this claim is at any rate worth investigating.

## "Boys of the Old Brigade" Dinner

A John Swain and Son Function.

The annual dinner of the society known as "The Boys of the Old Brigade," which was founded in 1911 by Messrs. William Brett Plummer and Frank H. Carpenter, took place on the 25th ult., at the Imperial Restaurant in the Old Bailey. The function was a very successful one, the chair being taken on this occasion by Mr. W. B. Young, and the vice-chair by Mr. H. R. Eason.

There were as usual the three toasts of the evening: "The Firm," proposed in a very happy way by the chairman, "The Old Brigade," given by Mr. F. E. Carpenter, while the toast to "Absent Comrades" was allocated to the vice-chairman, who certainly touched the hearts of all present by the able and feeling way in which he alluded to the members of the "Old Brigade" who had unfortunately gone over to the Great Majority.

The music was, as it always has been, quite

up to the standard, there being happily so many present who were musically inclined that outside assistance was unnecessary.

Without enumerating everyone, special mention should be made of Mr. E. Nicolls for his songs, Mr. Leon Smiles for his 'cello solos and Mr. A. S. Livett for his rendition of "The Boys of the Old Brigade" which invariably precedes the actual concert.

Mr. William Brett Plummer caused some amusement by his presentation of prizes for the member most successful in singing some of the old-time choruses. His idea was that the "Boys of the Old Brigade" (who have to be connected at least fifteen years with the firm of Messrs. John Swain and Son, Ltd., before they can become an absolute "B.O.T.O.B."), must necessarily—some of them at least—be able to remember the songs of long ago. Such old time songs as "Slap Bang! Here We Are Again," "Champagne Charlie Is My Name," "Jeremiah Blow The Fire" and "He Wears A Penny Flower In His Coat, La-di-da," all found someone among the company who could cheerily sing the chorus reminding them of the days of long ago. Each vocal memoriser gained a prize, so that none were disappointed.

During the evening a very welcome telegram was received from Mr. John Swain, the head of the firm, wishing all those assembled a very happy evening—to which he received a telegram of thanks in reply.

The menu served was an excellent one, a feature being the Christmas pudding, at the advent of which all lights were turned down, the only observable illumination being the blue flare around the pudding breathing on the gathering something of the spirit of Christmas.

## Trade Union Matters.

At a special delegate meeting of the London Society of Compositors held on Wednesday of last week the question of the serious cost of the maintenance of unemployed members was given consideration. In the old days, the few weeks preceding Christmas brought such a boom in the printing trade that practically none of the Society's members were signing the book. Now, however, despite a welcome drop of a hundred or so, the L.S.C. unemployed number something like 1,250. The provision of unemployment benefit for these members has, of course, meant a very serious drain on the Society's funds. Thus one proposition made at last week's meeting was that unemployed members who had taken 18 weeks' benefit in the second six months of this year should now be paid at a reduced rate. This proposition, however, was abandoned in favour of resolutions providing, together, for an additional 1s. 3d. per member to be levied weekly. The following propositions are to be balloted upon by the members:—1. That the deficit in the Supplementary Fund be cleared by an addition to the levy of 3d. per week for 12 months; 2. That an additional levy of 9d. per week be imposed to meet the current liabilities of the Supplementary Fund, subject to revision after the close of the half-year ending June, 1922, at the August delegate meeting; 3. That to maintain the General Funds at the limit as prescribed by rule, an additional levy of 3d. be imposed, subject to revision as above.

**MONOTYPE PIECE SCALE.**—Another matter considered at last week's L.S.C. delegate meeting was the proposed monotype piece scale. The main outstanding question had been the price per 1,000 for uncorrected matter. The outcome of the last conference with the employers (on October 31st) was a proposal to pay 5½d. for corrected and 4½d. for uncorrected matter, making the adoption of either scale subject to arrangement between the firm and the chapel. At last week's L.S.C. meeting this proposal, also the whole draft monotype scale as amended, was approved. In submitting the scale for approval Mr. Naylor had written: "The Special Committee have carefully reviewed the position, and have come to the conclusion that the scale as now amended should be given a trial. It is unlikely that many employers will be willing to introduce piecework; but where it is possible to change from 'stab to piece conditions, and where the operators desire the change, the committee are of the opinion that the opportunity should be given. The price cannot be regarded as a good one, but it is the best that can be secured. Whether it is acceptable to the monotype operators will depend largely upon the nature of the composition produced. In some cases the change from 'stab to piece would be favourable; in others the reverse would obtain. The same remark applies to the choosing between the corrected and the uncorrected scales. The Special Committee,

while not satisfied with the proposed compromise, recommend its acceptance, in order to secure a recognised piece scale for monotype composition. They regard the scale, taken as a whole, as an improvement upon the 'stab system of payment, under which the employer receives nearly the whole benefit of increased production."

The new draft monotype scale will come up for consideration at a council meeting of the London Master Printers' Association next week.

We understand that the London Master Printers' Association have approached the London Society of Compositors with a view to a further half-a-crown reduction of wages being agreed to, so as to bring that Society into line with the other London printing unions—the reduction to take place in January.

**COMPOSING ROOM APPRENTICES.**—With regard to the recent proposals made by the London Society of Compositors to the L.M.P.A. on the subject of apprentices in composing rooms, we understand that the following arrangement has been agreed to, subject to signature by both parties—the agreement to come into force on January 1st, 1922, for a period of two years only:—"The proportion of apprentices shall be one apprentice to four journeymen—provided that one apprentice shall be allowed for any number of journeymen up to seven; two apprentices for eight journeymen; and so on up to ten apprentices for forty journeymen. In offices where more than forty journeymen are employed, one additional apprentice shall be allowed for each further eight journeymen employed."

The dispute in the bookbinding department of the Co-operative Wholesale Society at Manchester has happily been brought to an end through the instrumentality of Mr. A. E. Holmes, of the Printing and Kindred Trades' Federation. Work has been resumed, and the points in dispute are being considered by a committee set up by the bookbinding section of the Printing and Paper Workers and the Society of Women Employed in the Binding and Allied Trades, which has its headquarters in Manchester, and of which Miss I. Forsyth is secretary.

**NEWSAGENCY WAGES.**—Something like a deadlock has been reached in the dispute affecting the newsagents' section of the Printing and Paper Workers' Union. Several conferences have been ineffective. Both sides are determined that no rupture shall take place if it can possibly be avoided, but it is evident that some proposal more acceptable to both sides must be found. The wage-reduction asked for is 10s. per week. It will be remembered that in the earlier stage of this wages movement it was decided to adjourn further consideration of the matter until the wage-reduction question had been dealt with by the master printers' organisation.

---

An Advertisement is always working.

# Trade Notes.

THE *Jewish Chronicle* has completed its 80th year of existence. The "birthday number" contains many special articles.

THE Grout Engraving Co., Ltd., notify us with great regret of the death of their esteemed representative, Mr. Charles Bussey, whose sterling character had endeared him to a large circle of city friends.

AMONG the week's dissolutions of partnership is that between Alfred Barnett, Alfred Williams and Frank Lawrence Smart, carrying on the business of a printing company at Red Lion House, Red Lion-street, London, E.C.

HULL Master Printers' Association is giving substantial aid to a movement for providing Christmas cheer for the local unemployed, the association having undertaken to print an appeal and to provide 120,000 envelopes at members' expense.

BOX-MAKERS AND THE TRADE BOARD.—The sittings of the Trade Boards Inquiry Committee were resumed at Montague House on Tuesday. Viscount Cave presided. The views of the Paper Box Manufacturers' Association were submitted by Mr. C. J. Watts and Mr. William Culross, who desired to continue the boards. Asked by Viscount Cave what he thought of the Act, Mr. Culross said the Act had done the trade good; it had improved conditions and eliminated the sweater. They wanted, however, greater elasticity and to govern themselves without continual interference by the Ministry.

THE Co-operative Wholesale Society has decided to depart from its 44-hour week and has informed its employees of this fact. The Society proposes also to bring wages down to trade union rates. The Printing and Kindred Trades Federation is in communication with the Society on the subject, and is endeavouring to obtain a more favourable arrangement. For years previous to the general introduction of the 48-hour week, it was in operation at the C.W.S., and wages also were generally above the minimum. Presumably the C.W.S. is feeling the strain of present-day conditions and is seeking to safeguard itself in the same manner as our other industries.

JOHNSTONE AND CUMBERS CHANGE.—We understand that the old-established firm of Johnstone and Cumbers, printing ink manufacturers, has, for family reasons, become a private limited liability company. The business will be conducted under the same supervision as heretofore, Mr. Sydney Cumbers being chairman and managing director, and Mr. Ernest Cumbers and Mr. Fred Cumbers directors. In addition they have availed themselves of the services of Mr. J. J. Sampson, who is a director and secretary, and Mr. H. Fuller, who has undertaken the charge of the manufacturing side of the business. We hear that the plant and machinery has been overhauled and everything brought up to date.

EFFORTS are being made to get the production of process blocks included in the list of Key Industries.

UNDER the auspices of the Manchester Printing Crafts' Guild, Mr. L. Conrad Hartley lectured on Saturday on "The Craft of Wood Engraving."

MR. DAVID CULROSS, a director of McCorquodale and Co., Ltd., with whom he had an unbroken association of 68 years, died suddenly at Eastbourne last week, aged 85.

MR. WILLIAM GEORGE HUXTABLE, of Torquay, Devon, editor of the *Torbay Express*, a prominent member of the Western branch of the National Union of Journalists, who died on September 30th, left estate of the gross value of £555, with net personality £226.

MR. HENRY M. HOBSON, editor of the *Derbyshire Advertiser*, died at Derby on Sunday. His father, a former Mayor of Derby, was proprietor of that paper, and his brothers are Dr. E. W. Hobson, the distinguished Cambridge tutor, and Mr. J. A. Hobson, the well-known writer on economic subjects.

PLYMOUTH UNEMPLOYMENT.—The Plymouth and district Local Employment Committee have had under consideration the question of unemployment in the printing and allied trades locally, and expert witnesses were called to a meeting of the Special Purposes Committee, when it was decided to arrange negotiations between the employers and the employees' trade unions, with a view to arriving at an amicable arrangement as to wages, particularly in order to enable the calendar and fancy leather goods industry to be revived.

MR. HENRY JOHN INFIELD, J.P., of Brighton, founder in 1868 of the *Brighton Daily News*, chairman of the Southern Publishing Co., Ltd., a former chairman of the Press Association, and a former vice-chairman of the Council of the Newspaper Society, who died on July 24th last, aged 76 years, left estate of the gross value of £72,722, with net personality £70,884. He left £100 each to Harry Bone and John Sinden, if respectively still in the service of the Southern Publishing Co., Ltd., and not under notice; and £50 each similarly to Charles Knight and Alfred Knight.

BOOK-PRODUCTION FILM.—On Tuesday evening, in one of the salons of the Hyde Park Hotel, at the invitation of Mr. Sydney S. Pawling and Mr. Frank N. Doubleday, an interested and critical gathering, comprising many of the leading members of the London book trade, witnessed a film showing the Country Life Press of Messrs. Doubleday, Page and Co., Garden City, New York. Needless to say, the very latest types of automatic apparatus and machines are installed. It was shown that the making of a book, from the time the manuscript reaches the foreman printer's hands, involves between eighty and ninety separate operations, but the employees have little more to do than watch the machines perform their various tasks.

or from Messrs. W. H. Everett and Son, Ltd., news-  
agents, 11, St. Bride-street, E.C. 4.

**THURSDAY, DECEMBER 8, 1921.**

## Current Topics.

### Strengthening the Joint Industrial Council.

THE many benefits which have already accrued to the trade from the activities of the Joint Industrial Council enable one to see that the printing industry must be depriving itself of very substantial advantages by its failure to carry the principle of co-operative action into local as well as national affairs. There are complaints from the ranks both of the employers' associations and the trade unions that local conditions are not given adequate consideration when national agreements are being made. Yet the fact remains that although the J. I. C. National Executive has become a live force in the trade, and the resulting co-operation of employers and work-people has influenced many national arrangements to the good of all concerned, yet the application of this same co-operation to the solution of local difficulties or the elucidation of local requirements has as yet been largely neglected. Where the District Committee

plan has been tried it has had some most satisfactory and promising results. We are glad to hear that circulars are now in preparation, for distribution in the trade, with a view to drawing attention to the need for these District Committees in all parts of the country. The formation of these is a bit of trade organisation which badly needs doing, and if it is carried out efficiently a big gain should result to the industry as a whole.

\*\*\*

### Standardisation of Paper.

FROM recent correspondence it appears to be very evident that the great majority of printers and quite a number of leading paper merchants are determined to force the standardisation issue. The opposition comes chiefly from a select official few, whose function is obviously that of obstructing progress by safeguarding mythical interests which must vanish in face of the clear light of actual fact. That printers desire standardised sizes, substances and weights of paper and a simpler basis of calculation (as the mille), and that they will turn completely to them within a very short space of time after their adoption, there is no doubt. During the course of transition there will be ample opportunity to clear off all old stocks, and afterwards there will be nothing to prevent special makings when required. The mille basis confers certain benefits upon the merchant, quite apart from simplified calculation, which he will not be slow to realise. We hope that the meetings now being convened will mark the final phase in inaugurating an ordered system of paper conditions.

\*\*\*

### Origin of Paper Sizes.

THE origin of paper sizes is a subject which has not yet received the attention which it deserves at the hands of the trade historian. Some time perhaps the whole history of English papermaking and the moulding of custom and convention will afford an opportunity for a much needed work of reference. We are prompted to these remarks by the discovery of a passage in an early treatise on printing which throws light on the origin of foolscap sheet and half, a size nowadays associated with account book papers and the manufacture of shop ledgers. Therein we are told that "they have also paper made to foolscap and a half, for the purpose of printing works in 12 mo. instead of 8 vo., by which one-half of the press work is thereby saved." This was in the days when all paper was made by hand and all printing was done on the hand press.

### Personal.

MR. J. MACLEHOSE, M.A., LL.D., president of the Federation of Master Printers, attended a special rally of master printers of the South-Western Alliance on Tuesday at the Royal Hotel, College Green, Bristol. Mr. A. E. Goodwin, the Federation secretary, was also present.

THE proceedings opened with a luncheon, presided over by Mr. F. Steel, chairman of the S.-W. Alliance, supported by the vice-chairman, Mr. R. C. Hobbs, the treasurer, Mr. Wm. Townsend and Mr. H. V. Chappell, a very energetic member of the Federation Labour Committee.

MR. W. HOWARD HAZELL has written a book on "Costing for Manufacturers" and the volume has just appeared in Nisbet's "Business Man's Series."

COUNCILLOR W. B. WYKES, chairman of the Midland Alliance of the Federation of Master Printers, has been elected vice chairman of the Leicester Corporation Electricity Committee.

MR. E. N. MATHIESON, managing director of Messrs. Burrup, Mathieson and Sprague, Ltd., is to occupy the chair at the bohemian concert of the Printers' Managers and Overseers' Association arranged for next Thursday, December 15th, at the Cannon-street Hotel, in aid of the fund to establish a third P. M. and O. A. pension.

MR. A. E. JARVIS, on retiring from the presidency of the Printers' Managers and Overseers' Association, was, on Tuesday, presented with a gold medallion P. M. and O. A. badge as a memento of his two successful years' service as president.

THE new president is Mr. S. M. Bateman, of the Newnes and Pearson Printing Co., Ltd.

MR. E. W. WHITTLE, the Association's popular general secretary, remains in office for a further year.

MR. E. A. DAWK, of the Stationery Office, on Tuesday night entertained the members of the S.W. London Master Printers' Association with an interesting address on "The Printer and his Paper," the meeting being held at the Battersea Public Library.

MR. J. D. WISE presided, and a useful discussion followed.

MR. A. H. MUNDEY, of Fry's Metal Factory, delivered an interesting and instructive lecture on "Metals Used by Printers" to the Liverpool centre of the Printers' Managers and Overseers' Association on Saturday.

IN reference to the change brought about by the reconstruction of Messrs. Johnstone and Cumbers, Mr. C. H. Rogers, Ltd., who has joined the board of directors, will continue in charge of the Manchester office. Mr. Rogers, before joining his present firm, with which he has been connected for 18 years, was able to gain a practical knowledge of the requirements of the printer at several well-known London printing establishments.

MR. G. A. ISAACS, secretary of the "Natsopa," having withdrawn his Parliamentary candidature for North Southwark, has consented to stand as candidate for Gravesend.

MR. G. W. RILEY, Assistant Director of Printing, H.M. Stationery Office, gave another interesting talk on the Swiss Alps, illustrating it by some 70 capital slides, before the monthly meeting of the Printing, Bookbinding and Kindred Trades Overseers' Association, at St. Bride Institute, on Tuesday evening.

AT the meeting deep feelings of regret were expressed among the members at the impending resignation of Mr. Geo. Eden, the popular general secretary of the Association. These feelings were the more accentuated on account of the reason which has caused his resignation, namely, the attitude the Stationery Office has taken in practically forcing him to relinquish his holding of the present position in the Association.

MR. EDEN, who has earned for himself the very greatest respect throughout the membership for his kindly disposition and ability, has held the secretaryship of the Association practically from its commencement, during which time the membership and standing of the association have grown almost out of all recognition of its former self.

MR. GEORGE PALMER PUTNAM, of G. P. Putnam's Sons, New York, has arrived in London.

A NUMBER of personal friends of Mr. F. E. R. Becker are making arrangements to entertain him on the occasion of his 50th birthday.

VISCOUNT BURNHAM has consented to preside at the luncheon, which will be held at the Connaught Rooms on December 30th.

MR. ARTHUR BAKER, Major J. W. Cropper, Mr. C. R. Seddon, J.P., and Mr. F. J. Thomas, as representing the sub-group 1 (Paper-making), will serve on the Grand Council of the Federation of British Industries for 1921-22.

MR. J. C. COPPOCK, Mr. A. Langley and Mr. J. Leonard Spicer are the representatives of sub-group 2 (Manufacturing Stationers), Mr. Arthur Stephenson of sub-group 3 (Paper Bag and Carton Manufacturers), and Mr. John E. Entwistle of sub-group 7 (Wall-Paper Manufacturers).

## NEW COMPANIES.

**FISHER, CLARK AND CO., LTD.**—Capital £70,000; to take over the business of printers, lithographers, bookbinders, label makers and manufacturing stationers, carried on by J. G. Clark and T. W. Clark in Norfolk-street, Boston, together with certain assets and liabilities and to carry on the same and the business of manufacturers of paper, and label, printing, box, bag and envelope-making machinery, etc. Private company. First directors: J. G. Clark, T. W. Clark, E. Clark and G. C. Clark. Registered office: 70, Norfolk-street, Boston, Lincs.

**ROBERT G. BRADSHAW, LTD.**—Capital £1,000; printers, publishers, stationers, etc. Private company. Permanent directors: R. G. Bradshaw, W. McClement and H. Wilde. Registered office: 41, Gartside-street, Manchester.

**OGDEN AND SPENCER, LTD.**—Capital £3,000; proprietors and publishers of newspapers, journals, magazines, books and other literary works, booksellers, printers, advertising agents, etc., and to adopt agreements (1) with H. St. G. Ogden and (2) with W. Spencer. Private company. Permanent directors: H.

St. G. Ogden and W. Spencer. Registered office: 7, New-square, Lincoln's Inn, W.C.

**ASSOCIATED PUBLICITY SERVICES, LTD.**—Capital £1,000; advertising, publicity and press agents, printers, artists and photographers in connection with financial, commercial, mercantile, industrial, theatrical, film manufacturing, mining, agricultural and other businesses. Private company. First directors: A. Eve, A. Reardon and T. W. Eve. Registered office: 30, Maiden-lane, Covent-garden, W.C.

**CARLIN BROTHERS, LTD.**—Capital £2,000; importers, exporters and manufacturers of and dealers in typewriters and duplicating machines, etc. Private company. First directors: J. H. Carlin, N. A. Carlin and B. M. Hanmer. Registered office: 12, James-street, Liverpool.

**THOMAS POTTS AND CO., LTD.**—Capital £1,000; to adopt an agreement with Ritchie Gill, and to carry on the business of wholesale and retail exporters, importers, packers, shippers and manufacturers, printers and stationers, etc. Private company. Permanent directors: W. W. Glenn and Ritchie Gill. Registered office: 66, Victoria street, S.W.1.

**POPULAR PUBLICATIONS, LTD.**—Capital £1,000; newspaper proprietors and general publishers and printers, etc. Private company. First directors: C. R. Scriven and H. A. Hinton.

**W. H. COTTON AND CO., LTD.**—Capital £2,000; to take over the business of paper, stock and glass bottle importers and exporters carried on at Leslie Works, 12a, Pratt-street, Lambeth, by W. H. Cotton and Ethel A. Cotton as "W. H. Cotton and Co." Private company. First directors: W. H. Cotton, S. Cotton and H. B. Denne. Registered office: Leslie Works, 12a, Pratt-street, Lambeth.

## COMPANY MORTGAGES AND CHARGES.

Fresh Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 1908, and Satisfactions registered pursuant to Section 97 of the same Act. (The registration of Satisfactions is not compulsory).

**THOMAS DE LA RUE AND CO., LTD.**—Satisfaction in full (a) on November 22nd, of charge dated April 22nd, 1921, securing certain moneys for which the company was then or

might become indebted or liable to the Hertford Investment Co., Ltd., and (b) November 23rd, 1921, of mortgage or charge dated September 4th, 1919, securing all moneys due or to become due from company to bankers.

**BIGSBYS (MITCHAM), LTD.** (printing ink and varnish manufacturers, oil boilers, etc.).—Particulars of 2,000 debentures, authorised November 7th, 1921; whole amount issued; charged on the company's undertaking and property, present and future, including uncalled capital.

**BIGSBYS (MITCHAM), LTD.** (printing ink and varnish manufacturers, etc.).—Satisfaction in full on November 23rd, 1921, of debentures dated November 20th, 1920, securing £850 and further advances.

**L. UPCOTT GILL AND SON, LTD.** (printers etc., London).—Issue on November 17th, 1921, of £90 debentures, part of a series already registered.

**PORTALS, LTD.** (paper manufacturers, Whitchurch).—Issue on November 25th, 1921, of £7,000 debentures, part of a series already registered.

**P. G. BRETT ROSE AND Co., LTD.** (publishers, etc., London).—Particulars of £1,105 debentures authorised November 7th, 1921; whole amount issued; charged on the company's undertaking and property, present and future, including uncalled capital.

**ALEXANDER AND JOHN SHAW, LTD.** (fellmongers, leather dressers, parchment manufacturers, etc., Grantham).—Charge on moneys to be recovered on account of excess profits to the extent of £10,000, dated November 21st, 1921, to secure all moneys due and to become from company to J.L.C and M. Bank.

**RICHMOND HILL PAPER WORKS Co., LTD.** (Blackburn).—Satisfaction in full on August 19th, 1921, of mortgage dated September 26th, 1910, securing £400.

## Paper Tenders for Egypt.

The Controller of Printing and Stationery, Ministry of Finance, Dawawin P.O., Cairo, invites tenders for the supply of paper, Bristol board and strawboard, required by the Egyptian Government Press, Cairo, for the year 1922-23. Sealed tenders on the proper form, addressed to the Controller as above, will be received up to noon on December 17th next.

Representation by a local resident agent is essential. The Department of Overseas Trade will supply to United Kingdom firms interested, but not locally represented, the names of firms with branches in Egypt who might be prepared to handle tenders on their behalf.

A copy of conditions of tender, specification and samples can be seen by United Kingdom firms on application at the Department of Overseas Trade (Room 84), 35, Old Queenstreet, Westminster, S.W.1. A set of the documents is also available for firms in the provinces unable to arrange for their inspection in London.

## Wall-Paper Manufacturers, Ltd.

The preliminary statement of the Wall-Paper Manufacturers for the year ended August 31st, 1921, shows a loss on trading of £878,108, compared with a profit of £751,887 for the previous year, when the ordinary shares received 10 per cent. and the deferred shares 12½ per cent.

After crediting the balance brought forward of £181,054, transferring from the contingencies fund £100,000 and reserve for income-tax no longer required, £109,848, and after deducting interest on debenture stock £41,138, and an interim dividend on the preference shares £28,859, there remains a debit balance of £557,203.

The directors state that the company has a very substantial claim for adjustment of its excess profits duty liability, but no credit has been taken for this claim in arriving at the above figures. The meeting will be held on December 20th, and the report and accounts will be sent to the shareholders on December 10th.

For the previous year the balance available, after paying debenture interest and income-tax, was £672,357. Dividends on the ordinary shares totalled 10 per cent., dividend and bonus on deferred shares 12½ per cent., £65,000 was placed to contingencies reserve (making that fund £100,000), and £181,054 carried forward. In June, 1920, the reserve fund of £500,000 was capitalised and issued as deferred shares by way of bonus.

## German Paper Companies' Profits.

The net profits of the Neustadt pulp and paper mills represented 2,286,773 marks, allowing a dividend of 15 per cent. and bonus of 15 per cent.

The capital of the Simonius cellulose mills has been raised from 3,000,000 to 6,000,000 marks.

The dividend of the Untersachsenfeld glazed board mill is 30 per cent. and special bonus of 20 per cent.

The capital of the Gustav-Najork chrome card and paper mill, of Leipzig-Plagwitz, has been increased from 2,000,000 to 6,000,000 marks.

The Chemnitz paper mill of Einsiedel is to pay of dividend of 12 per cent. out of a net profit of 821,449 marks. It is proposed to raise the capital by 4,200,000 marks.

The profits of the Union for the Cellulose Industry of Berlin in 1920-21, with a capital of 9,000,000 marks, after paying all expenses, amounted to 2,616,982 marks, including a sum previously carried forward. Dividends of 7 per cent. and 4 per cent. are proposed, according to the kind of shares, and an extra dividend of 18 per cent. The question of a further increase of capital by 4,000,000 marks is to be submitted to the general assembly.

## Trade Board Orders.

Orders confirming minimum rates of wages as fixed and/or as varied by the following Trade Boards in Great Britain have been made by the Minister of Labour under section 4 (2) of the Trade Boards Act, 1918:—

### Paper Bag.

Order dated November 1st, 1921, confirming general minimum time rates and overtime rates (as varied) for male and female workers and piece-work basis time rates (as varied) for female workers; and specifying November 4th, 1921, as the date from which these rates are effective.

The general minimum time rates are as follows:—(i) for male workers of 21 years of age and over (a) for certain classes of workers, from 1s. 2½d. to 1s. 6½d. per hour, according to age and experience (b) all other workers, 1s. 3½d. per hour, with lower rates for younger workers; (ii) female workers, 8½d. per hour, with lower rates for learners. The piece-work basis time rate for all female workers is 8½d. per hour.

### Paper Box.

Order, dated November 1st, 1921, confirming general minimum time rates, piece work basis time rates and overtime rates (as varied) for female workers, and general minimum time rates and overtime rates (as varied) for certain classes of male workers; and specifying November 4th, 1921, as the date from which these rates are effective.

The general minimum time rates are as follows:—(i) for male workers of 18 years of age and over employed as machine-minders, die-makers, forme-setters, cutters (including shears and guillotine) or head stock-keepers, from 8½d. to 1s. 6½d. per hour, according to age and/or experience; (ii) for female workers, including home-workers, 8½d. per hour, with lower rates for learners. The piece-work basis time rate for all female workers, including home workers, is 8½d. per hour.

**P. B. AND K. T. O. A. WHIST DRIVE.**—With the view of further fostering the social side of the activities of the Printing, Bookbinding and Kindred Trades Overseers' Association a whist drive was held on the 30th ult. at the Manchester Hotel, Aldersgate-street, E.C. The drive, though not largely attended, proved quite enjoyable. The following were the successful prize winners:—Ladies: Miss King (handbag), 1; Mrs. Price (handbag), 2; and Miss Hazelwood (cruet), 3. Gentlemen: Mr. C. Gardner (set of pipes), 1; Mr. Goode (pipe and pouch), 2; and Mr. Hillman, jun. (pipe and pouch), 3. The booby prizes went to Mrs. Millwood and Mr. Sandilands (treasurer). Mr. Cox briefly moved a vote of thanks to Mr. Geo. Eden for the excellent manner in which he had carried out the duties of M.C.—A report of the monthly meeting held on Tuesday evening will appear in our next issue.

### The Bookbinder and the Time Docket.

SIR,—I am very sorry to trouble you again, but on page 537 of your last issue under "Binding Notes and News" I find your contributor has once more referred to the "Docket" question.

It is really inconceivable, after all that has been said about the necessity of the Time Docket to the master binder, that the Federation officials have apparently made no serious effort to secure its general adoption in book-binding establishments.

This matter is far too important to be burked any longer, and those of us who have adopted the Federation Costing System ought to be backed up so that our binding departments shall fall in line with all other sections of our businesses in furnishing this most indispensable instrument for obtaining accurate costs; it is most discouraging to feel that the Federation is taking no active steps to rectify an absurdity such as exists in no other trade and which is against the elementary principles of all business. How can the Federation expect to add to its membership or obtain adherents to its Costing System when apathy is so pronounced?

Yours, etc.,

H. VICK,

Member of the Costing Committee  
Manchester M.P. Association.

Manchester, December 5th.

## Northampton Polytechnic Institute.

The annual presentation of prizes and certificates to the students of the Northampton Polytechnic Institute, St. John-street, E.C., took place in the Large Hall of the Polytechnic on Friday, in the presence of a numerous gathering, Mr. L. Sebastian occupying the chair.

Dr. R. Walmsley, the principal, in presenting the year's report, remarked that it was the twenty-fourth prize distribution of the institute. The past year had been a record one with regard to the educational side of the Polytechnic's work. The enrolments and the quality of work in that department were far in excess of the corresponding work done in any pre-war year. The enrolment of students had reached a total of 3,802.

Mr. A. Barton Kent, who presented the prizes in the absence of Lord Southwark, remarked that knowledge was power, and as a business man he knew from his own experience that the British workman was the first in the world. He could always do better than his competitors if he set himself out to do it. England should pay more attention to development of its own industries.

# The Paper Pattern Surcharges.

## Further Correspondence with the Postmaster-General.

Messrs. Spicer Brothers, Ltd., are continuing to focus the feeling which has been aroused throughout the country by the Post Office surcharges in respect of orders or inquiries given to papermakers accompanied by patterns.

Mr. J. T. Steele has now sent us further correspondence, which brings the matter up to date.

Upon November 2nd Messrs. Spicer Brothers received a communication from the Secretary of the General Post Office stating that with regard to the request that "samples if enclosed with orders should be allowed to pass at the printed paper rate," the suggestion had been fully considered, but the rate was already unremunerative, and the Postmaster-General did not see his way to extend its scope.

Messrs. Spicer Brothers then addressed a letter to the Postmaster-General, stating that, as they had been informed that their correspondence had not been seen by the Postmaster-General, they wished to impress upon him the importance of the subject. They had received over 300 letters on the subject. Messrs. Spicer added that the department had, in their latest letter, changed their ground of objection, "the former ground having been proved fallacious."

The following reply was received from the Postmaster-General by Messrs. Spicer: "I am directed by the Postmaster-General to inform you that he has received your letter of the 5th inst., and he regrets that he cannot see his way to modify the decision already communicated to you. I am to enclose a copy of the Postmaster-General's reply to a question asked by Major Mackenzie Wood in the House of Commons on the 8th inst., and to explain that while that question is understood to relate to samples of goods for sale, the Postmaster-General is equally unable to sanction any relaxation of the regulation on the lines which you suggest, in view of the sacrifice of revenue entailed."

Mr. Steele stated the other day to a representative of the *British and Colonial Printer* that Major Mackenzie Wood's question in the House was on another point, which had not been raised by them, and was not asked at their instigation. The point they had raised was a much stronger one, and affected every trade, and not the paper trade alone. Some of the large drapery houses had to pay surcharges very much greater in amount than houses in the paper trade had to pay.

Mr. Steele added: "As to the excuse that the printed paper rate is unremunerative, which is fallen back upon after the previous excuse or reason that 'to alter the regulations would give dealers in paper an advantage over other traders,' had been proved to be fallacious, has the Postmaster-General data to prove the assertion to the satisfaction of

any competent accountant outside a Government department? Even if he had, there is surely sound business sense, particularly from the national point of view, to treat the carrying side of the Post Office business as a whole, and if the results as a whole are satisfactory, to reduce charges in connection with matters that make for trade. If you judge weight by weight, the newspaper rate cannot be a paying proposition, but it would be folly from a national point of view not to throw in the swings with the roundabouts."

## Newspaper Litigation.

MR. J. H. THOMAS, M.P., was on Friday awarded £2,000 damages in his libel action against the *Communist*, and Mr. Justice Darling granted an injunction restraining the paper from the further publication of libels. He commented on its actionable and seditious contents, which, he said, merited very serious attention from the Law Officers of the Crown. Defendants were National Labour Press, Ltd., Mr. Francis Meynell (editor), Mr. Arthur MacManus (publisher), and Mr. Percy Wilberforce Howard (distribution manager). They accused Mr. Thomas of acting as traitor to the Labour movement during the miners' strike.

**DAMAGES FOR NEWSPAPER.**—Lord Hunter and a jury at Edinburgh on Friday tried an action for damages by the proprietors of the *Stirling Sentinel* against Alexander W. Young, Dunblane. The defendant, who was an unsuccessful candidate for Dunblane Town Council in November, 1920, made a speech in March last in which he alleged that the plaintiffs were conducting a newspaper which could be bribed, bought, bullied, or cajoled. The defendant denied slander and pleaded fair criticism. The jury found for plaintiffs and awarded £50 damages.

A KING'S Bench Divisional Court, consisting of Justices Horridge and Shearman, on Friday granted a rule certiorari for the removal of an indictment against *Daily Mirror*, Ltd., and Mr. Glover, from the Hertford Assizes to the King's Bench Division, and for trial in the High Court. Mr. Rowland Oliver said there was no power to try a limited company except in the King's Bench Division.

## Football.

The matches played last Saturday resulted as follows:—

### Printers' Football League.

Wightman's, 2; Amalgamated Press, 5.  
Blades, East and Blades, 1; Cornwall Press, 1.

### Printers' Charity Cup.

Waterlow's, 3; Oyez, 2.

## Printing Notes from Australia.

(From Our Sydney Correspondent.)

### New Companies—Obituaries—Linotype Pioneer—Late Mr. John Scott—An Important Compositor.

THE Up-To-Date Printing Co., Ltd., has been registered with a capital of £5,000, in £1 shares, of which 1,500 fully paid up shall be allotted to George C. Searle (1,000) and Norman C. Watt (500) in consideration of the transfer of the business to the company. Subscribers: W. H. Conwell, G. C. Searle, N. C. Watt, R. Honniball, F. C. Webb, Victor W. Harrington and W. H. G. Barnes. Registered office: Ann-street, Brisbane.

ANOTHER important new registration is that of the Eagle Press, Ltd., capital £5,000, in £1 shares, of which 3,000 paid up shall be allotted to Eric B. O. Cowlshaw. Subscribers: E. B. O. Cowlshaw, L. Stephens, S. D. Tozer, H. H. Stone, N. A. D. Harris, C. M. Walsh and G. E. Crofts. Registered office: George-street, Brisbane.

MR. WALTER F. ("MAJOR") DOWNIE, who died at his residence in Hurlstone Park on September 18th, was one of the pioneers of latter-day newspaper printing in Sydney. As a compositor he helped to bring out the first issue of the *Globe* 34 years ago, and he continued on with the old *Star*. He was a prominent member of the chapel when Mr. J. C. Watson left his frame on that paper to become later Prime Minister of the Commonwealth. He was one of the first operators of the linotype in Sydney, and was an active and capable member of the *Sun* staff when he was seized with the illness which resulted in his death.

THE death has occurred of Mr. John Scott, for many years foreman stereotyper in the employ of Messrs. Wilson and Horton, of Auckland. His age was 64 last month, and his connection with the *Weekly News* dated back for 47 years. Born in Belfast in 1857, Mr. Scott came out to New Zealand in 1874, when he was 17 years old. He commenced work in the old *Herald* building on the day after his arrival here as a machinist, and for many years he daily ran off the papers on the Wharfedale printing machine then in use. On the advent of the rotary machine, with its accompanying stereotype plant, Mr. Scott was given the option of remaining in the position of machinist or of becoming assistant stereotyper. He elected to take the latter position, and some years later was promoted to the foremanship of that department, retaining it up to a weeks ago, when he retired on pension.

How IMPORTANT a compositor can be to an Australian country newspaper was made

manifest when the *Territory Times* recently explained that until further notice it would be published twice a week only, remarking: "To-morrow our sole remaining compositor (Mr. F. Thompson) is to go to gaol for non-payment of income-tax. There will be no paper on Thursday." Mr. Thompson had put in a counter-claim for a refund of all the money that he had paid in income-tax in the past.

## What is "Printed Paper"?

Under this heading the *Birmingham Post* thus exposes another defect in the postal system: Commercial men here continue to rage against the extraordinary fashion in which the postal authorities continue to do their utmost to hamper business by imposing an exorbitant and inexplicable charge on "printed papers." The official description of such is too delightful to be allowed to remain embedded in the dull and verbose pages of the "Post Office Guide," and it merits the utmost publicity. "A packet is not necessarily admissible at the printed paper rate," it is solemnly laid down, "because it contains nothing but printed matter . . . It must be borne in mind that documents, such as invoices, or proposals for insurance, or circulars, or greeting or visiting cards, though admissible when filled up and sent to a specific person, are not admissible when sent not filled up, in bulk, as stationery, to a person who is subsequently to put them to the use for which they are intended." Therefore, in the eyes of the Postmaster-General, a printed paper is not such as long as it is paper which bears nothing but print, but it becomes so when it is covered with writing. Who outside the General Post Office ever dreamed of so grotesque a distinction? The idea is to catch additional ninepences for sending such matter by parcel post; but, as is usual with the unbusinesslike devices of our most unbusinesslike public department, this device defeats its own end. It prevents the sending out of a vast amount of private matter, to the injury of trade and the crippling of various forms of enterprise; and it would pay the nation if the Government were to retire on the fullest of full pensions the would-be genius who devised this particular reply to the seemingly simple question, "What is 'printed paper'?"

MESSRS. PETTY AND SONS (READING), LTD., send us well-produced publicity matter giving full illustrated particulars and prices of their "Effpee" loose-leaf account books. They inform us that in connection with the sale of this speciality they are abolishing agency agreements carrying trade terms, and invite all stationers and printers to co-operate freely with them without restrictive clauses of any kind. They are putting the trade on a cash discount basis which will operate automatically according to the length of credit.

## New British Patents.

### Applications.

- Akt.-Ges. fur Anilin-Fabrikation. Process for converting silver prints into colour pictures. 31,406.
- Barber, J. E. Type for printing railway time tables, etc. 31,254.
- Burton, C. F., and Burton, H. Devices for perforating sheets. 31,586.
- Cohen, I., and Jardine, Sir E. Paper cutting guillotines. 31,563.
- Joy, A., and Pickering, P. Devices affixed to sealed envelopes, boxes, etc., for opening them. 31,295.
- Manifoldia, Ltd., and Plant, J. P. Wages sheets, etc. 31,415.
- Newton, C. H. Machines for simultaneously printing words and figures. 31,258.
- Ridgway, J. A., and Wrigley, H. W. Loose-leaf ledgers, books, etc. 31,300.
- Robinson, L. D. Apparatus for printing on cylindrical tins, etc. 31,384.
- Waite, F., and Waite and Saville, Ltd. Machines for printing from engraved plates or dies. 31,692.
- Waite, F., and Waite and Saville, Ltd. Machines for producing photogravure, etc., prints. 31,698.
- Wilson, H. B., and Wilson, T. Boxes for confectionery, etc. 31,701.

### Specifications Published.

**1920.**

- Bill, J. Lutolf. Bookbinding. 171,448.
- Jones, E. C. Bevelling or otherwise reducing in thickness the edges of paper, leather, and like materials. 171,416.
- Leipziger Schnelldruckfabrik Akt.-Ges. worm. Schmiere, Werner and Stein. Laying on device for printing presses. 148,806.
- McNeill, A. M., and Abbott, W. J. Construction of case for letter, document and like files. 171,545.
- Pelanz, C. F. Machine for making window envelopes. 171,569.
- Percival, S. (Deutsche Post-und Eisenbahn-Verkehrswesen Akt. Ges.) Apparatus for printing and delivering strips of tickets which is combined with a receptacle for money. 146,967.
- Spies, G. Machines for cross-cutting paper, cardboard, and the like. 148,395.
- Wade, H. (Gamse and Bro., H.) Bronzing machines. 171,478.
- Welsford, L. W. Machine for making paper bags. 171,469.

EXTENSIONS of the Drayton Paper Works at South Park, Fulham, are under consideration, in view of the leases of the factories in the Minories and at Fore-street having only a few years to run. The present factory at South Park covers about three acres and the number of workpeople is 500.

## TENDERS WANTED.

### TO PRINTERS

THE BERMONDSEY BOROUGH COUNCIL invite Tenders for PRINTING TWO CATALOGUES OF THE BOOKS in the Juvenile Sections of the Rotherhithe and St. Olave Libraries.

The Specification may be seen and other information obtained upon application to the Chief Librarian, Central Library, Spa-road, S.E.

Sealed Tenders endorsed "Tender for Printing Library Catalogues" must reach the undersigned not later than first post on Monday, 2nd January, 1922.

FREDK. RYALL,

*Town Clerk.*

Town Hall,

Bermondsey, S.E.

*5th December, 1921.*

16239

Replies to Box Nos. to be addressed to the Offices:  
"BRITISH AND COLONIAL PRINTER AND STATIONER," 58, SHOE LANE, LONDON, E.C.4.

## SPECIAL PREPAID ADVERTISEMENTS

SITUATIONS VACANT, REPRESENTATIVES or MANAGERS REQUIRING POSITIONS, AGENCIES, BUSINESS WANTED or FOR DISPOSAL, MACHINERY and MISCELLANEOUS.—Charges for Advertisements of the above class are Three Shillings for 21 Words or under; One Shilling extra for every line or portion after. Seven words to be reckoned for each line.

Telegrams: STONHILL, FLEET, LONDON.

Telephone: No. 8407 CITY.

### Miscellaneous.

TECHNICAL WRITERS on Subjects of Interest to the Printing and Allied Trades are invited to communicate with Box 13870.

WASTE PAPER: ITS RECOVERY AND RE-MANUFACTURE. By Jas. Strachan. A Fund of Information; price 12s. 6d.—Stonhill and Gillis, Publishers, 58, Shoe-lane, London, E.C.4.

## A Home at Weston-Super-Mare.

The Holiday Home at Weston-super-Mare, organised by the Cardiff J.I.C. District Committee, has proved of great value to the workers in Cardiff this summer. During the winter and spring months it will be difficult to keep the Home supplied with visitors. The Committee has therefore decided to invite applications from a wider area from December to March 31st.

Any employees in the printing trade needing a change of air in pleasant, healthful surroundings should write to Mr. F. V. Nicholls, 17, Quay-street, Cardiff. An inclusive charge of two guineas per week is made.

### Strawboard Supplies.

The countries supplying the British market with strawboards during October were as under:—

Port of Importation.	Country whence Consigned.	Quantity. Cwts.	Value. £
London ...	Netherlands ...	141,521	52,068
" ...	Belgium ...	860	602
" ...	Germany ...	109	33

### Leatherboards.

The imports of leatherboards into the United Kingdom during October were as under:—

Port of Importation.	Country whence Consigned.	Quantity. Cwts.	Value. £
Liverpool ...	United States ...	13	206
Manchester ...	Finland ...	1,581	1,685
" ...	Sweden ...	1,421	1,800
" ...	Germany ...	217	94
London ...	Netherlands ...	100	60
Bristol ...	Germany ...	436	368
<b>Total ...</b>	<b>...</b>	<b>3,768</b>	<b>4,207</b>

In addition to the news-print preference given to this country in the New Australian tariff, the British preferential tariff on paper bags is 12s, the intermediate rate being 13s. and the general 14s, or respectively 30, 35 and 40 per cent., whichever rate returns the higher duty.

# New Inventions.

## Feeding Sheets.

In an invention patented by the Dexter Folder Co., sheets are separated from a pile on a support by means of a sheet-engaging device arranged above and at a distance from the top of the pile, a portion of the pile of sheets being raised periodically into the sphere of action of the sheet-engaging device which

displaces the top sheet and brings it into a position to be engaged by movable sheet-gripping means, which as described takes the form of a reciprocating sucker. A movable holding-down device, and means for blowing air under the separated sheet are also described. As shown, the sheet-separating devices are mounted in a vertically adjustable manner in a frame carried by a bracket 3 which is adjustable longitudinally along a

rack 2. The devices are mounted on or are operable by cams on a shaft 11 driven by bevel gearing from a shaft 15. The sheet-engaging device consists of a combing-sector 12 mounted on the shaft 11, and a portion of the sheets are raised into contact with this sector by an oscillating curved lever 18 which is oscillated by a cam 32, roller 31, link 29, and is normally pressed towards the pile by a spring-pressed rod 22 controlled by an adjustable spring 26 acting on a guide 24 through which the rod 22 passes, this guide being provided with trunnions 23 journaled in arms 21 on the shaft 17 about which the lever 18 pivots. When the cam 32 permits, the spring 26 presses the lever 18 into the position shown in Fig. 4, and raises the corner of the pile, and the combing-sector 12 then acts on the top sheet and straightens it out as shown thereby separating it from the rest of the pile. An oscillating sucker 39 carried by a lever 35 oscillated by a cam 40 acting on a roller 41 then seizes and raises this sheet, until it is seized by sheet forwarding means. Other sheets are prevented from adhering to the top one by blasts of air directed by a tube 56, and by a curved holding-down device 45 which is given combined reciprocating motions in vertical and horizontal directions, by a cam 54 which oscillates a lever 49 in which the device 45 is pivoted, a fixed pin 44 engaging a slot 47 and a cam 46 in the device 45 assists to govern the movements of the holding-down device. A spring 52 serves to keep the roller 53 of lever 49 in contact with the cam 54, and to control the turning of the device 45 about its pivot 48 on the lever 49. The device 45 is moved forwards and downwards after the top sheet is separated, and is subsequently moved upwards and backwards.

## Waterproofing Paper.

A British patent has been granted to Dr. F. Moeller covering a process for hardening or making waterproof cellulose such as cotton, cellular tissues, and products manufactured from the same. The treatment of papers with thionyl chloride renders them hard and water-resisting. According to one method, the paper, etc., is hardened for a short time with liquid thionyl chloride, if necessary with the use of indifferent solvents, such as chloroform, tetrachloride of carbon, benzole, etc. Better results are obtained by exposing the paper (if necessary after treatment in a vacuum) for a time varying from a few seconds to minutes to the vapours of thionyl

chloride. With a longer treatment with thionyl chloride the paper becomes completely impermeable to water. It is advisable after the treatment to wash the paper with water or diluted alkalis or to treat it dry with ammonia gas.

### Collapsible Boxes.

In a folding or collapsible box having a hinged lid B, as patented by Messrs. Millington & Sons, Ltd., and E. Downer, each of the side flanges b of the lid is formed with a pro-

jecting tongue  $b^2$  which, when the lid is closed, engages under a part  $a^2$  of a securing tab  $a$  arranged to connect the rear wall of the box to the end wall.

### Rubber to Strengthen Paper.

The object of an invention by Mr. Fredk. Kaye, rubber technologist and research chemist of Cheshire, is to produce paper and the like which is remarkably strong both with regard to tensile strength, resistance to abrasion and to repeated bending while under tension. Low grade fibres may also be used. In carrying out the invention natural india-rubber or gutta containing latex is added to the usual papermaking materials when the pulp has been beaten to the required extent for the quality of paper aimed at. After thoroughly mixing the latex (or latices) with the pulp, which may be done in the beater, a coagulative agent is added according to the nature and state of the latex and being such as acetic acid, formic acid, or any other suitable organic or mineral acid, or small quantities of mineral salts. When a satisfactory coagulation has been effected the contents of the beater are transferred to the cistern or pulp holding tank and run through the machine in the ordinary way. The dried paper can afterwards be vulcanised in any suitable process. The bursting strength of many papers made from chemical wood pulp as suggested, it is claimed, is equal to that of kraft paper.

### Copperplate Printing Press.

In this invention a press for taking prints from copper plates, engraved plates, etc., has

the axle  $a^1$  of the upper roller  $a$  supported against spring pressure by the ends  $i^1$  of levers  $i$ , so that a number of impressions can be taken on a long web of paper or fabric one after the other by raising the upper roller when the plank  $k$  carrying the engraved plate, etc., has reached the end of its stroke, and pulling through the web into position such that the next part of the web to be printed will come into contact with the engraved

plate during the next stroke of the plank. The bearings  $d$  of the roller shaft  $a^1$  are engaged by springs  $b$ , pressure being applied by screws  $f$  through cups  $e^1$ , which are adapted to co-act with wedges  $g$  to prevent excessive strain of the springs. A blanket  $n$  passes round the roller  $a$  and a roller  $l$  mounted in the upper part of the machine frame. The patentee is Mr. A. Peters-Desteract.

## The Paper Salesman and the Printer.

Relations between the seller of paper and the printer are necessarily close and they ought to be characterised by perfect harmony. That so large a body of consumers as is represented by master printers should receive some recognition is obvious, and it follows, of course, that in return proper consideration should be extended by the consumer to the supplier. Just now there is some agitation going on in the United States concerning dealings between the representatives of the two industries. Master printers are arguing strongly in favour of what is termed "the long price list for paper." The purpose of the long list is to secure for the printer an advantage in price as compared with other consumers. Arguments advanced in favour of this course are the services which the printers perform as distributors of paper. This is just the point where wholesalers are apt to become suspicious. It would be but a short way between consuming paper and selling it, which latter office is that of the merchant and agent. From the mill point of view, the printer is a very important person, and there may be good grounds why the wholesaler is jealous of him. While it is true that the printer specifies descriptions of paper and creates a market for it in printed form, there are limitations to his capacity for carrying stock, which is again the office of the merchant. A danger which has recently arisen is the tendency of printers to attach an unfair value to the paper they use. At one time paper was regarded as of little account, but war experiences rectified that view and paper was made a medium of greater profit. On this account, perhaps, the costing system of master printers might be viewed with some apprehension. It is, of course, in the interests of the craft that printing should sell as cheaply as is economically possible, and this

has been urged upon everybody by recent events. Paper merchants are willing to help towards cultivating business in this way; but there should be a recognition of the assistance thus afforded. The relations existing between master printers and the purveyors of paper will no doubt come up for consideration in the near future, but the success of any such deliberations will depend upon the frankness displayed on all sides.

## Foreign Paper Dividends.

### GERMANY.

Papierfabrik zu Penig: Net profits, 2,412,773 marks; dividend, 25 per cent.

Jagenbergwerke A. G. Dusseldorf (manufacture of plant for paper mills): Net profits, 2,279,284 marks; dividend, 20 per cent. and bonus of 100 marks. The works have orders for several months.

Ammendorfer Papierfabrik: Net profits, 5,842,424 marks; dividend, 40 per cent. and bonus 20 per cent. The capital is 8,500,000 marks.

### FRANCE.

Cellulose Française d'Alfa: Capital, 2,000,000 francs; manufacture of pulp from alfa, etc. 18, Rue Ozène, Toulouse.

Soc. Minerva, Brindis de Salas et Odeide de Senicourt: Capital, 28,000 francs; printing and paper trades. 15, Rue Vauvenargues, Paris.

### ROUMANIA.

Soc. Patria: Capital, 5,000,000 lei; to work paper mill in Jussy, Roumania.

### SWITZERLAND.

The Zwingen pulp and paper mill: Capital, 2,000,000 francs, is paying a dividend of 10 per cent. for 1921, against 25 per cent. the previous year.

# JOHN T. MARSHALL,

## Printing in America.

**Mr. George Eaton Hart Continues Impressions of his  
Recent Tour of Investigation in the United States.**

After dealing with the subject of composing-room efficiency and indicating points of American superiority (as reported in last week's issue), Mr. Hart turned to technical education.

In regard to the training of apprentices, he said, the boys are usually bound for five years on conditions and wages agreed upon by the unions, and are scaled on a percentage basis of the men's rates. They are registered on the books of the unions, and are at all times under the direction of the foreman, and supervision of the chairman of the union, in regard to discipline and the course of instruction given. They are compelled to attend the school one half-day per week, in the master's time, and to attend night school at least one night per week. At the end of the first year boys are tested, and if proved unsuitable by examination within the year, the trade union refuses to give them an apprentice's card, and Mr. Hart found that during the previous year, 66 per cent. of the students had been declined by the union as unsuitable for the trade. The most important feature of this combined control is that the right boy is obtained, discipline is maintained, a practical technical education is given, and, more important still, the apprentice is not entitled to the membership of the trade union until he has passed the final examination of the technical school.

Except for these latter conditions he did not consider we in England and London have anything to be ashamed of in regard to our technical school training. He visited two schools on the recommendation of the New York Typothetæ secretary: the Co-operative

School at 42nd-street, New York, and the celebrated school of Messrs. Donnelly at Lakeside Press, Chicago. In the former, the Employers' Associations, the trade unions, and the Guild, called the Hudson Guild, contribute \$10,000 each annually, whilst the Lakeside School, Chicago, is used entirely for the employees of Messrs. Donnelly, and is of a most extensive and practical character, under the control of that enthusiastic educationist, Mr. E. Sheldon. The various States, too, have differing methods of Secondary Education, with a course of instruction embracing the elements of any particular trade, but the somewhat meagre information obtained rather gave the impression that, although considerable activity was being displayed, so far, bearing in mind the large area of the country, the actual centres for practical training are few and far between, and quite in the initial stage of development. The teaching in New York was thoroughly practical, with a department in charge of a lady, for giving advanced general education.

There are, however, several important technical colleges—one of the finest being the Carnegie Institute at Pittsburg, which is most complete in its equipment and organisation, offering every grade of instruction, including scholarships for a four years' systematic training, such as would delight the heart of Mr. Howard Hazell, although Mr. Hart gathered that scholarships were not eagerly sought after by the rank and file, owing to the high wages paid to apprentices. One of the largest colleges is in Indianapolis, and is equipped on a very extensive scale with Linotypes, Intertypes and Mono. machines. Large numbers

of operators graduate through this school, who, on leaving, pass a test of 8,000 ens per hour.

### Prodigious Machine Departments.

Coming to the machine department, said Mr. Hart, one is amazed at the prodigious equipments of the great houses of America, the enormous open floor space (with windows all around) measuring 200 by 300 feet and 20 to 25 or more floors, and the floors connected by large passenger and goods lifts of surprising capacity. The machines form a square around the floor, the delivery end of the machine facing the windows, with benches all around the windows, whereon sheets are examined, and overlay work is done; the centre of the room being left vacant for the storage of reels or flat paper and finished product from the presses. In several of the large houses visited, the machine rooms would extend over three to four floors, grouped according to size and style of work produced. It was not unusual to find such machines on the twelfth or even top floor. In houses like the *Pictorial Press*, *Pictorial Review*, Butterick's, Curtis of Philadelphia, Roebucks of Chicago, and many others, one was struck with the number of rotary machines specially built for particular work. For rotaries you have art machines running 5,000 to 7,000; two-colour machines at 6,500; four-colour rotaries, delivering either flat or folded, with slip sheet inserted, and in other cases printed covers automatically fed, and the whole product folded and wire stitched at 2,500, although actually the latter machines run much faster; but the output is reduced by the frequent stoppages to wash up, and the putting on and taking off of the rollers. For two or four-colour work the sheet is often delivered in the flat in order to distribute the colour work through the text pages. The quality of this colour work is wonderfully good, but obviously, it cannot equal the slower output of the two colour Miehle. In fact, only the special conditions of huge numbers could justify the use of the rotary principle. The most striking use of the rotary, however, was in the production of the huge store catalogues and telephone registers, consisting of 1,000 to 1,500 pages. In houses like Donnelly's and Hall's of Chicago, thirty to fifty rotaries are employed on this work, printing 192 quarto pages, and delivering in six 32pp. at 6,000 to 8,000 of each section per hour, the run amounting to millions, working day and night, and Sundays during the busy season.

The principal rotary machines used for the highest class of colour work are the Cotterell, Hoe and Goss, as well also for the highest production on half-tone work. For sheet-fed rotaries the best was the double-sheet fed rotary of the United Printing Machine Co. Perfecting machines are little used, but the American Miehle, single and two-colour, are in universal use, although the Premier machine, manufactured by the Potter Company, is becoming popular. For small machines the Kelly Press is a great favourite. The machines generally are of the latest type, and

old patterns, such as are found in most English offices, do not exist.

### Make-Ready Methods.

Make-ready is done in the usual way by the overseer marking the sheet, both cut overlay and chalk process for half-tones being used. In making register for black, and particularly for colour, the lining-up machine is in common use. The Galvani process of electros is used, and blocks and plates are carefully prepared by what is commonly known here as "bumping" in the foundry, but which in the States is claimed as a patent under their Patent Laws, and called the "McKie Process." The bumping process, as is well known, is considerably practised in London and England, but is employed in a very clever manner in the States, where Mr. Hart found that in the making ready on a four-colour rotary a saving of time of 25 per cent. was effected. In the large rotary shops the plates are made ready on a miniature cylinder, identical with the press, which takes three plates, where both under and overlays are put up, thus materially expediting the starting up of the machine. By far the largest number of rotary machines use the continuous set-off, the "slip tympan" and the Nelson system is but little favoured. On flat machines the output generally exceeds ours, and may be taken at an average of 1,200 auto fed, and 1,100 hand fed, for large-sized sheets, with comparatively short runs of 10, 20, or 50,000. Almost invariably, however, flat machines are fitted with automatic feeding apparatus—the pile feeder for very long runs, and the Gross principle for smaller runs. As is well known, the machine assistant, besides his ordinary duties as feeder, assists the minder in the actual make-ready on all machines, thus materially expediting the starting, and thereby effecting economy.

### Remarkable Warehouse Organisation.

It is, however, in the warehouse department that one finds the perfection of organisation, with the use of every conceivable labour-saving appliance; the absence of any but actual machine operatives is remarkable, so much is hand labour displaced by machinery. The area of the floors is amazing. The work passes through in a sequence of concurrent motion, the transference from one process to another being, where possible, by hand carriers, or the large three-sided trolley, with the product so stacked in it that it is ready for the following process. Thus, flat sheets come into the room on trolleys, which deliver to folding machines, and then to the gathering and wiring or complete binder, and from here to the trimming, and hence to the despatch on band carriers. All shavings from the cutting machines, the binding, and indeed all waste, are sucked away from the machines, and conveyed to a chamber at the bottom of the building, where the dust is extracted, and the waste paper fed into the baling machine and delivered to the vans outside.

Time did not permit Mr. Hart to mention

more than general particulars, although he remarked that quite an interesting evening might be spent in describing the well-known great American house of the Curtis Company of Philadelphia, in connection with which the mode of receiving and handling of paper alone, this firm must save a fortune compared to many of the large firms in England. At Curtis's all the paper is received in reels only, and cut up for flat when necessary, in a special department, to the exact sizes required. The paper is received by motor, and rolled on to a platform of uniform height to the motor, and is then rolled to the powerful lift into a receptacle in the shape of a cradle, making it easy to roll into, and also to roll out by a sloping platform to the floor. Here the end of the reel, carrying particulars of number and weight, is cut off and filed, the wrapper slit down and the paper rolled out of its cover down to the floor level, where it is stacked by means of the Electric Revolver Hoist.

#### **Costing in America.**

Although he had left costing to the last, Mr. Hart said he should have dealt with this at the outset, for the American Costing System is not only the inspiration and barometer of organisation and equipment, but it is the sheet anchor of the whole business, be it great or small. Any printer, he declared, who neglects this important department is not only unfaithful to his customer, and a fool to himself, but oftentimes proves himself dishonest to his creditors. Nothing convinced him more of this than the fact, that in America the printer who uses the Federation Costing System, can obtain from his banker much better terms of credit than those unassociated. So highly do the keen business printers of America esteem the Costing System, that they refuse membership of the Typothetæ to those who will not adopt it.

Just as their businesses are planned on the most scientific and progressive methods mechanically, in the same way their costing methods are most thorough and practical. Our English price lists are puny compared to those issued by the Typothetæ, whose lists embrace almost every conceivable description of printing, making provision for every detail of possible variation of an estimate or charge, and giving printed samples of the actual job itself. This is contained in a handsome loose-leaf handbook in leather, consisting of 200 or more pages with cut-in indices.

Every month the leading printers in Boston send in an elaborate form, filled up showing the business done, and the cost in each department, and these are compared and discussed by the executives, and the hour rates are corrected according to the ascertained costs. The result is that there is a market rate of cost which is given as a guide to each member of the Typothetæ. To show the confidence which consumers of printing have in the system in America, one very large printing house visited had contracts for printing a large number of periodicals, when the costs, as shown by the system, plus an agreed profit, were accepted as a settlement of the charges.

Further emphasising the importance of an adequate costing system for every printer, Mr. Hart claimed that the printer with the costing system is better able, and consequently more likely, to treat his customer fairly and honourably, than the man whose haphazard methods only enable him to guess at the cost. His American trip amply confirmed Mr. Hart's point of view.

#### **General Conclusions.**

After referring briefly to the immense establishment of the Government Printing Works at Washington, Mr. Hart tried in a few sentences to draw some conclusions as to the strong points of American printers. In the first place, both the directors and the managers are highly skilled, technically, and are chosen for ability only. Much larger capital is employed. The bulk of the output is infinitely greater. The organisation and equipment is better, even in modest offices like Benjamin Franklin's offices at Philadelphia, which were visited. The American's wider vision is only exceeded by his enthusiasm, whilst his enterprise transcends the whole, and is an eye-opener to the phlegmatic Britisher. He organises on the grand scale, both as to buildings, floor space, and equipment, and draws every cent's value out of his investment. The director of one huge firm told Mr. Hart that for twenty years the whole of their surpluses had been applied to extensions; the business as seen was simply colossal. This enterprise, too, was further exemplified in New York, where a syndicate of printers and allied trades owned and occupied a large building of twenty-one floors—called the Printing Crafts Building—with a total floor space of fifteen acres. The proprietor of a large section was Mr. Charles Francis, who had been a member of the L.S.C. and had worked at Straker's in Camomile-street in the '60s.

In conclusion, Mr. Hart added that everywhere he and his companions were received with extreme kindness and courtesy.

#### **Discussion.**

On the conclusion of Mr. Hart's lecture the meeting was thrown open for questions and discussion, Mr. W. Howard Hazell, from the chair, making a start by some interesting references to his own American tours, which enabled him to corroborate some of the points made by Mr. Hart.

Mr. J. R. Riddell had some comments to make on technical education in America, and emphasised especially the stress laid in the States on care in the selection of boys for training. He remarked, too, upon the efficiency of the foundry in America, maintaining that the thoroughness of foundry work in producing plates requiring a minimum of make-ready was the strongest point in American printing trade organisation.

In answer to Mr. J. W. Carley, Mr. Hart said that the ratio of managerial work to directly productive labour was greater in America than here. He was struck with the number of departments over there, each with separate management.

After a number of other questions had been asked and answered, Mr. T. W. McAra and Mr. H. W. Howes, who were both on the platform, moved and seconded respectively a cordial vote of thanks to the lecturer and the chairman. This was carried with acclamation, and the meeting ended with a brief response from Mr. Hart.

## Sales of Printing Plant.

The plant and machinery of the Clerkenwell Folding Box Co., Ltd., 12, Clerkenwell-green, came under the hammer last week, Mr. Edwin W. Evans, 150, Fleet-street, being the auctioneer. There was a fair attendance of buyers, but prices were rather low. A 40-inch lever millboard cutter, by Leber, brought £12; a 39-inch rotary cutter, by Furnival, £14; and a nearly new 29½-inch rotary cutter, by J. Grieg and Sons, £25. A nearly new, Size II., No. 29 folding box wire stitching machine, by Hampson, Bettridge and Co., was knocked down for £17 10s.; a 16-inch "Prakma" folding box glueing machine for £13; a similar machine brought the same price, and a third went for £12 10s., a 12-inch "Prakma" going for £8 10s. A "Universal" cutting and creasing press, by the National Machine Co., 24½ by 22½ inches inside chase, sold for £17 10s.; a demy folio Colt's heavy platen press brought £18, and a crown "Caxton" platen £40; a royal folio "Caxton" went for £35. A nearly new 38-inch diagonal guillotine paper cutting machine, by Crossland, went cheap at £60. A skellet folding, glueing, and rolling machine, by M. C. Ritchie, sold for £105; a demy folio "Britannia" platen, by Furnival, for £60; and a demy folio "Mitre" platen, by Dawson, for £10. A 39½-inch rotary cutting and scoring machine, by Friedheim, went for £75, and a "Universal" steel rule bender for £6 15s.

Mr. R. H. Ruddock, of 71, Fleet-street, E.C., conducted a sale last week of surplus machinery and plant, disposed of at 27, Camomile-street, E.C., by order of the proprietor, who had removed to more commodious premises. Among the prices got were the following:—A crown "Imperial Albion" proof press, by Matthews, £9; a "Universal" stereotyping machine, fitted for power, with saw and drilling attachments, etc., £5 5s.; a demy folio "Bremner" platen, £10 10s.; a demy folio "Bremner" Wharfedale, £60; a quad demy Wharfedale, by Furnival, £12 10s.; a double crown "Bremner" cylinder printing machine, £19; a 32-inch self-clamp guillotine, by Furnival, £26; a double demy "Bremner" cylinder press, £65; an 8 h.p. "National" gas engine, £5; a double crown sectional folding machine, £40; a 32-inch "Express" guillotine, by Furnival, £25; a quarto "Monarch" platen, by Hampson, Bettridge and Co., £16 10s.; a "Cropperette" platen, £16; a double royal Wharfedale, by Payne and Sons, £52 10s.; a crown folio platen, by Cropper, £10; a demy folio, by Cropper, £14; a royal self-

inking "Lightning" proof press, by Soldon, £32 10s.; and a double demy Wharfedale, by Payne and Sons, for £115.

## Printers' Managers and Overseers ASSOCIATION.

### Important Business at Annual Meeting.

There was a good rally of members at the annual general meeting of the P. M. and O. A. held at the "Old Bell," Holborn, on Tuesday of last week, when the agenda included several important items of business.

The minutes of the November meeting having been read and approved, the secretary mentioned that apologies for unavoidable absence had been received from Mr. E. H. Berryman (detained by illness), also from Mr. G. Phillips and Mr. W. H. Mann.

Mr. W. F. Hill (C. F. Roworth, 88, Fetter-lane: (overseer—machine), was elected a member, and Mr. A. E. Jarvis, in the chair, gave him a personal welcome into the Association.

### Report and Balance-Sheet.

The next business was the consideration of the twenty-eighth annual report and balance-sheet (previously circulated to members).

The balance-sheet was taken first and Mr. Jarvis read the report of the senior auditor, Mr. Mann, who expressed entire satisfaction with the accounts and stated that every assistance had been given for the thorough scrutiny of books and vouchers. He congratulated the secretaries and the Association as a whole upon the very business-like way in which the accounts are kept. The junior auditor, Mr. H. W. Jackson, was present and corroborated what Mr. Mann had written. The adoption of the balance-sheet was unanimously approved.

The annual report was then considered. When the president invited members to find something to say about it, Mr. S. A. Dawson proved willing to oblige, and, by a few words of rather slashing criticism, succeeded in evoking some lively discussion. His principal point was a suggestion that the revision-of-rules committee had not proved efficient. He also inquired as to the times of committee meetings and number of evenings occupied thereby.

Mr. A. W. Hart reverted to the question of attendances and wanted to know how much time a committee member must put in at a meeting before being allowed to sign the book.

In the course of discussion personal criticisms were exchanged between several members, but the subject was not deemed worthy of further time being spent upon it, the president, secretary and others having assured the meeting that attendances were in general satisfactory and that members were doing their best for the Association.

The report was passed unanimously.

The question of the prizes provided by the

Association for technical students was next considered. On the motion of Mr. G. H. T. Freeman, it was agreed to leave this matter to be decided by the Council.

#### **New Council and Officers.**

Four scrutineers were next selected and voting papers distributed for the election of ten members to fill vacancies on the Council.

Mr. Jarvis announced that as a result of the nominations at the November meeting, the following were elected unopposed:—President, Mr. S. M. Bateman; vice-president, Mr. R. H. Berry; treasurer, Mr. C. Durston; trustees, Messrs. J. C. Pugh and G. Phillips; general secretary, Mr. E. W. Whittle; financial secretary, Mr. W. H. Gill; hon. technical secretary, Mr. H. Blackwell. Mr. Jarvis mentioned that this was his last appearance as president. He thanked members for the support given him during his term of office and bespoke the same consideration for his successor, Mr. S. M. Bateman. He then shook hands with Mr. Bateman, welcoming him as the new president.

Mr. Bateman, having been installed as chairman, thanked members for the honour done to him and assured them that he would do his best for the Association.

Mr. R. H. Berry expressed himself in similar fashion. Referring to the third pension effort, entered upon under Mr. Jarvis's leadership, he suggested it would be a fine compliment to the retiring president and a relief to the incoming officers if the third pension were completed this year.

Mr. Jarvis read a letter from Mr. Mortimer warmly thanking the Association for their cheque for £200, the second contribution on the pension account.

Brief speeches followed by others of the officers elected, including Mr. E. W. Whittle, Mr. C. Durston, Mr. J. C. Pugh and Mr. W. H. Gill.

#### **Presentation to Mr. Jarvis.**

A departure from the Association's past custom was made on this occasion, a presentation being made to the retiring president. Mr. Bateman, on behalf of the Council, handed Mr. Jarvis a gold medallion badge of the Association bearing Mr. Jarvis's name and years of office engraved on the back. He expressed the Association's good wishes for the future, remarking that Mr. Jarvis had won everybody's respect by the way in which he had conducted the business of the Association during his two years as president.

Mr. Jarvis responded, expressing his thanks and appreciation. Looking to the future he said he thought the Association was going to figure much more largely in the affairs of the trade than in the past. For that reason modification of their rules might have to be effected more frequently than at present.

#### **Membership Qualification.**

Consideration was next given to a recommendation by the Council: "That a special delegate meeting be held in February, 1922, to consider the proposed alteration to Rule 4."

The secretary fully explained the position

with regard to this alteration, the purport of which is to restrict membership in the Association to actual managers or overseers as distinguished from working managers or overseers. He intimated that the Yorkshire Centre had strongly supported the Parent Association's proposal, but the other Centres had rejected it on the ground that the alteration would hinder their extending their membership. He pointed out the urgency of the matter in view of their relations with the Typographical Association, and strongly opposed the suggestion that the matter be postponed to the next delegate meeting in 1923.

Messrs. Bateman, Pugh, Dawson, Gill, Burton and Barker took part in a discussion on this point, all stressing the need for prompt action in safeguarding the status of the Association in the manner proposed. It was pointed out that the proposal was not retrospective; present members would not be affected.

The Council's recommendation being put to the vote, it was adopted unanimously.

Under "General Business" the secretary proposed a grant from the Benevolent Fund of £10 to Mrs J. M. Rignall, of Dublin, widow of a late much respected member. This was approved.

On the proposition of Mr. Dawson, the Association's best thanks were given to the retiring members of the Council.

The meeting then resolved itself into a special general meeting to consider a recommendation by the Council: "To add to Article 9 of Regulations for Affiliated Centres:—'On acceptance of a member the nomination form to be forwarded to the Parent Association.'"

The advantages of the general secretary having a complete record of membership were pointed out, and after a short discussion the Council's recommendation was unanimously endorsed.

The meeting closed with the announcement of the results of the election for Council. The ten members elected, with votes obtained were: Messrs. F. W. Hume and A. E. Jarvis, 83 each; R. Condliff, 70; W. H. Mann, 68; J. A. B. Reed, 65; A. W. Paul, 59; H. Roberts, 57; R. B. Hardie, 57; H. J. Gallon, 56; and R. Simpson, 55.

## **St. Bride Foundation Printing School**

An examination in costing under the auspices of the Stationers' Company and Printing Industry Technical Board takes place at Stationers' Hall at 6.30 on Monday next, December 19th, when close on 100 candidates are due to take the examination.

Enrolments are now being made for the autumn term of instruction in costing, salesmanship, offset printing, collotype and printing ink. It is desirable that those wishing to take up any of these classes should make immediate application to the Principal.

# “SLOGGER”

## AUTOMATIC SHEET FEEDER

### Latest Improvements on the “SLOGGER.”

1. Aluminium Stroker Arms avoiding all bending.
2. More accessible Pile Raising Adjuster. Absolutely self-locking. No lock nuts to work loose.
3. Automatic side lay giving perfect register.
4. Fine thread Caliper Adjustment which immediately stops machine and feeder if two or more sheets are stuck
- 5, 6 & 7. Stopping, Starting and Trip Handles. All controls in one place.
8. Bevel Drive instead of Chain.
9. Fan for air draft mounted in one unit on Base of Feeder.
10. Leather collapsible joint to allow air-box movement without the use of perishable rubber.
11. Air throttle control adjusted in a few seconds for any thickness of paper or board
12. Pile Raising Handle for raising pile to starting height at the commencement of each loading.

### BRITISH THROUGHOUT.

**Perfect Automatic Register. No continual re-loading.**  
**Can be attached to any make of sheet-fed press or folding machine.**

## Trade Notes.

EMPLOYERS confer with the Typographical Association representatives to-day (Thursday) regarding mono caster attendants.

MR. FREDERICK JAMES WINKLEY, of South-wark-street, London Bridge, printer and stationer, who died on Oct. 17th, left property of the gross value of £11,366.

A MASS for the repose of the soul of the late Mr. A. Chris. Fowler will be said at 10 o'clock on Friday morning (Dec. 16th) at St. Mary's Church, Eldon-street, E.C.

WE understand negotiations are proceeding between the London Master Printers' Association and the London Society of Compositors in connection with the new lino piece scale.

WE hear that the London Master Printers Association has asked for a conference with the London Society of Compositors on the 19th inst. to discuss the proposed reduction of half-a-crown in wages.

LOUIS STERCK, aged 42, Belgian, described as a process operator, Old Compton-street, W.C., was at Bow-street on Tuesday remanded on a provisional extradition warrant charging him with forging banknotes.

PRINTING and bookbinding machinery imported into Canada during the five months ended August, 1921, was of the value of £12,000, as against £1,522 last year and £775,000 during the five months of 1919.

COPYRIGHT OF DESIGNS.—The Federation of Master Printers is taking legal opinion as to the best way of protecting the interests of its members in this matter, which is of special importance to the lithographic section of the trade.

OUR subscribers, Messrs. Laxmichand Dossabhai and Bros., of Rajkot, India, are compiling an illustrated volume "The Prince of Wales and Princes of India," and would be glad to get in touch with printers in this country with a view to having the production carried out here.

A MEETING of the committee of the Linotype Users' Association will be held at 24, Holborn, on January 11th, when the business will be the winding-up of the affairs of the Linotype Users' Association with a view to the Association being merged with the Newspaper Society, as empowered by resolution of the annual meeting of members on May 11th, 1921.

MRS. LILIAN MARY THRING was charged at Bow-street on Friday in relation to an article which had appeared in a paper called *Out of Work*, of which she was editress. Edward Froude, printer, Old Kent-road, was summoned in connection with the printing of the paper. It was alleged that the article was calculated to cause disaffection among the police and to induce them to withhold their services. Mr. Froude was bound over in £50. Mrs. Thring was fined £10, and given 21 days in which to pay.

MESSRS. JAS. TODD AND SON are to build a new printing works in Sunderland.

MR. JOHN W. COGHLAN, journalist, of Manchester, died on Thursday last, aged 52.

LAST week saw the appearance of No 1 of the *Steering Wheel*, a fortnightly journal for taxicab owners.

THE late Mr. William Henry Poole, of Stamford, editor of the *Lincoln, Rutland and Stamford Mercury* for 28 years, left £791.

THE Rochdale Branch of the Typographical Association are giving their superannuated members 10s. each as a Christmas Box.

THE death took place at his residence in Queen-street, Bridgend, on Sunday, of Mr. R. H. Dyer, printer, at the age of 73.

MR. W. M. BAMFORD, editor of the *Co-operative News* and of other periodicals of the co-operative movement, died on Tuesday.

THE Spanish Carlist newspaper *El Correo Espanol*, which, during the war, was one of the most pronounced pro-German organs in Spain, has ceased publication.

ALDERMAN LAMBERT FLETCHER, of Walmersley-road, Bury, letterpress printer, the oldest member of the Town Council, and for several years mayor, left £7,050.

FLEET-STREET journalists and representatives of the printing trade attended a memorial service to the late Sir Arthur Pearson at St. Clement Danes on Tuesday.

THE proprietors of the publication *Piccadilly*, Messrs. Hogg and Knight, Ltd., 49, Strand, London, last week, successfully sued a Leamington firm of furnisiers for £39 6s. being the cost of making and supplying seven printing blocks.

MESSRS. HILL, SIFFKEN AND CO., LTD., inform us that in the recent competitions at the Printing Exhibition held in April-May last, the judges have awarded them the Gold Medal for their exhibit of pictorial posters, this being the second occasion upon which they have gained the Gold Medal for posters.

MESSRS. LANGLEY AND SONS, LTD., of the Euston Press, N.W.1. send us a copy of an interesting new booklet they have issued, giving reproductions of some of the posters they exhibited at the last International Printing Trades Exhibition. At the same time they inform us that they have just received an intimation that we have again been awarded the Gold Medal for this Exhibition.

BOOKS FOR LATVIA.—Writing from the Mansion House, Sir John Baddeley appeals for standard works in our language—disused school books, scientific, engineering, and other professional works—for which their owners no longer have any use. He thus hopes to be able to make a New Year gift to Latvia of at least 50,000 volumes. Gifts should be sent to Sir Alfred T. Davies, K.B.E., C.B., care of The Consul-General for Latvia, 329, Holborn, London, W.C.1.

### FORTY-THIRD YEAR.

Printed and Published **EVERY THURSDAY**  
by **STONHILL & GILLIS**,  
at 58, Shoe Lane, London, E.C. 4.  
Tel.: Stonhill, Fleet, London. Phone: 8407 City.

**SUBSCRIPTION:** Per Annum, 8s. 8d. (POSTAGE EXTRA).

**Charges for Trade Advertisements:**  
(Full page 8 by 5 1/4 ins.)

Whole Page ...	£4 10 0	s. d.	
Half Page ...	2 10 0		One-eighth Page 17 6
Third Page ...	1 17 6		One-third Column 22 6
Quarter Page ...	1 10 0		One inch in Column 9 0

An Extra Charge for Cover and Special Positions.  
Discounts according to Number of Insertions.

Representatives throughout the United Kingdom and also in Australia, India, South Africa, United States (Canada, etc.).

All communications for the "BRITISH AND COLONIAL PRINTER AND STATIONER" should be addressed and Cheques and Post Office Orders made payable to—**STONHILL & GILLIS, 58, SHOE-LANE, LONDON, E.C. 4.**

Copies may be purchased at the Office, as above or from Messrs. W. H. Everett and Son, Ltd., news-agents, 11, St. Bride-street, E.C. 4.

THURSDAY, DECEMBER 15, 1921.

## Current Topics.

### The Approach of Christmas.

ALTHOUGH Christmas is so close upon us, it has to be reported, we fear, that the marked improvement of trade which the season should bring has not materialised to anything like the extent hoped for. Certain firms have experienced a rush of orders, and there has doubtless been some general improvement in the trade, but the old-style Christmas boom, in which all capacities of the industry were strained to the utmost and practically all the unemployed absorbed, has failed to make its appearance.

### Christmas Holidays.

WITH the holidays at hand, the employers' associations and the trade unions are notifying their members as to the arrangements made therefor by national agreement. Under the terms of the Hours and Holidays' Agreement, December 26th and 27th, which are to be observed as Bank Holidays, should be regarded as recognised holidays for the printing trade. The following decision arrived at by

the Hours and Holidays Committee on July 22nd last, regarding payment for Bank Holidays, is applicable to the Christmas holidays where short time is operative: "In the case of any employees who are working short time, payment for Bank Holidays shall be one-sixth of the weekly wages earned taking the average of the four weeks immediately prior to the holiday. Payment shall be made at full rate if full time is resumed in the week in which the Bank Holiday occurs." Attention is also drawn to the clause in the agreement which states that "the closing down on the day preceding or following a recognised holiday shall be a matter for mutual agreement in each establishment," and any extension of the holiday should be decided upon in accordance with this clause. The term "mutual agreement" means that the decision to extend the holiday should be approved by a majority of the employees.

### Export Credits.

FROM all accounts greater interest is being taken in the new export credits scheme by merchants and manufacturers and it is stated that applications for large amounts have been made to the Department of Overseas Trade. The interest displayed by manufacturers has been marked, as hitherto the bulk of our export trade has been conducted through merchant houses. Negotiations are in progress which are expected to lead to a great deal of fresh business.

## Personal.

MR. CHARLES HIGHAM, M.P., is one of those to whom a Knighthood has been granted on the termination of the post-war work of the Ministry of Transport, in recognition of services rendered.

MR. HIGHAM, who is head of the well-known firm of advertising agents, Charles F. Higham, Ltd., entered Fleet-street 15 years ago as manager to Messrs. W. H. Smith and Sons' Advertising Agency, and two years later started in business for himself.

MR. R. B. FISHENDEN, M.Sc. Tech., has been lecturing to Cambridge printers on the subject of "Simplicity and Progress in Commercial Printing." A report is unavoidably held over to next week.

MR. W. WARREN, general secretary of the National Society of Electrotypers and Stereotypers delivered an address on the apprenticeship question at the monthly meeting of the Electrotypers and Stereotypers Managers and Overseers Association on Tuesday evening.

## Central London Master Printers.

## Trade Union Matters.

### Fourth Bohemian Concert.

Success attended the bohemian concert with which the Association of Master Printers of the Central London Districts opened their winter session on Wednesday of last week. Mr. J. D. McAr, F.C.I.S., the president, was in the chair, supported by the vice-chairman, Mr. Oscar C. Griffith, and the committee, whilst the Association's energetic hon. secretary, Mr. W. H. Burchell, was very much to the fore supervising everything and helping to make the visitors feel at home. There was an excellent attendance, the audience including a good proportion of ladies. Many well-known central London printers were present, and one noticed also visitors from other associations, and several representatives of 24 Holborn.

The chairman opened the proceedings with a short speech, in the course of which he made the audience cordially welcome, and referred with satisfaction to the fact that the concert synchronised with the reaching of a settlement in Ireland which would result, it was hoped, in an increase in that security and stability now so much desired.

### L.M.P.A. President's Speech.

Mr. R. A. Austen Leigh was present and during an interval of the concert programme was asked to address the gathering, which he accordingly did in a short humorous speech. Referring to the indeterminate nature of the "turn" required of him, he remarked that though his speech immediately followed some imitations of cries heard in the Zoo, he was not going to provide imitations of master printers at a general meeting, or anything of that sort. (Laughter.) After expressing wonderment at the multiplicity of Mr. Burchell's activities, including his efforts toward the reduction of the postal rates, he went on to indicate some of the many calls made upon the time and energies of an L.M.P.A. president, and he intimated that it would be with some relief that he would shortly be handing over the presidency to his successor.

Limitations of space forbid a detailed review of the concert programme, but the many items rendered by Mr. Claude Chandler's party provided an entertainment which was evidently enjoyed very thoroughly. Perhaps the item that evoked the loudest applause was one of Mr. Chandler's own contributions, a clever ventriloquial sketch, but the whole concert was a good one. It included songs by Miss Una Worth, and Miss Jennifer Gwyn; Mr. Noel Pherns showed himself a gifted comedian, and Mr. Lawrence Jackson proved an able pianist; whilst baritone songs by Mr. David Openshaw gained well-deserved applause. A very varied programme was brought to a bright conclusion by a burlesque of a Shakespearean scene in which Miss Gwyn and Messrs. Chandler, Pherns and Openshaw took part.

"NATSOPA" BALLOT INVALID.—The ballot, which took place in May last, on the question of imposing a levy of from 6d. to 4s. on members of the National Society of Operative Printers and Assistants, was declared invalid in the Chancery Division on Wednesday of last week. The action was brought at the instance of certain members who declared that the ballot was not taken in accordance with the rules of the society. Mr. Justice Sargant said it was held by the plaintiffs that the executive council had no right to re-submit immediately a question that had already been decided. That objection, his lordship said, was unsustainable. The officials of the society were satisfied that the position of the society was critical, and it was their duty to call the attention anew to the position of affairs. One objection, however, must prevail. It was quite clear that the rules were violated, because the scrutiny was made by a series of individuals who had no right to act in that capacity. As a result, plaintiffs were not bound to pay the levy authorised by that ballot as a condition of their retaining their membership or receiving the benefits of the society. Defendants must pay costs of the action.

WHETHER the L.S.C. general secretary, Mr. T. E. Naylor is or is not, for the time being, to carry M.P. after his name is expected to be known by the time this issue is in the readers' hands. A manifesto in support of Mr. Naylor has been issued by the General Council of the Trade Union Congress, the National Executive of the Labour Party, and the Parliamentary Labour Party. The manifesto says: "Mr. Naylor's whole public life proves him to be exactly what he declares himself to be—a Labour man who has at heart the best interests and welfare of all who work by hand or brain."

THE Association of Correctors of the Press having come to the conclusion that printers' readers are not eligible under the Unemployment Insurance Act, is instructing its members to discontinue contributions. The Association proposes to establish a scheme of its own.

WE understand that no agreement has been reached after a conference in London between representatives of the Federation of Master Printers and the Typographical Association on the question of the enforcement of a fortnight's notice being given individually by employers before wages could be reduced in accordance with the national agreement.

THE London offices of the T.A. have been removed to 60, Doughty-street, W.C.1, the headquarters of the Printing and Kindred Trades Federation. Mr. F. Duckett has been elected secretary in place of Mr. J. A. Ratcliffe.

THE North Wales and Border Counties Group of the T.A. is organising a Christmas Prize Draw in aid of the funds of the Group.

## DIVIDENDS AND REPORTS.

**ARGUS PRINTING CO.**—Accounts to October 31st, 1921, show net profit, after providing for debenture interest, depreciation, etc., of £9,113, making available, with £10,102 brought forward, £19,215. Further dividend of 7 per cent., making 10 per cent., carrying £9,477 forward.

**AMALGAMATED PRESS.**—Report of Amalgamated Press for the year ended Oct. 31st, 1921, shows profits, after writing off depreciation of plant and buildings, etc., of £368,206. Directors recommend final dividend of 5s. a share on Ordinary, free of tax. In view of abnormal conditions and very high cost of buildings and plant directors have considered it necessary to write off a considerable amount of cost of new building and plant.

**"TIMES" PUBLISHING CO.**—Accounts of Times Publishing Co. for year ended June 30th, 1921, show, after including credit for taxes recoverable and £23,890 brought forward, an available balance of £38,617; from this must be deducted preference dividend (paid in September last), leaving balance of £22,617 to be carried forward.

**LADY'S PICTORIAL.**—Accounts of Lady's Pictorial and Sporting and Dramatic Pub-

lishing Co. to September 30th, 1921, show loss of £817. After providing for directors' fees, etc., and including £1,000 estimated surplus of reserve for doubtful debts, £1,428 brought forward and £3,000 transferred from reserve, there is available £4,603. Directors propose dividend at rate of 5 per cent. per annum on preference shares for half-year to March 31st. Investments have been written down to approximate market value and depreciation, £9,000, has been charged to reserve.

## NEW COMPANIES.

**R. L. BEALL AND SONS (NEWCASTLE-UPON-TYNE), LTD.**—Capital £2,000 in £1 shares. To take over the business of printers carried on at 42, Trafalgar-street, Newcastle-on-Tyne, as "R. L. Beall and Sons," and to carry on the business of booksellers, stationers, account book manufacturers, paper manufacturers, tag and label manufacturers, paper bag makers, etc. Private company. Directors: R. L. Beall, J. L. Beall and C. L. Beall. Registered office, 42, Trafalgar-street, Newcastle-on-Tyne.

**LANCASTER PRESS, LTD.**—Capital £1,000 in £5 shares. To take over the business of printers, stationers, etc., carried on by S. J. M. Pratt and A. A. Applegate, at White Horse-street, Fakenham, Norfolk, as the "Lancaster Press." Private company. Directors: S. J. M. Pratt, A. A. Applegate and Mrs. K. Pratt.

**BELMAN AND SON, LTD.**—Capital £1,000 in £1 shares. General stationers, general merchants, etc. Private company. First directors: Mrs. E. Belman, A. Belman S. Belman and H. S. Girvan. Registered office, 252, West George-street, Glasgow.

**A. C. NORMINGTON, LTD.**—Capital £1,000 in £1 shares. To undertake and transact insurance and other agency business, to carry on business as printers, stationers, company promoters, financiers, etc. Private company. Directors: A. C. Normington and G. R. Fowler. Registered office, 17, Gracechurch-street, E.C.

**NEW CHROMATIC PROGRAMME CO., LTD.**—Capital £500 in £5 shares. To acquire the rights of publication and to print "The Chromatic Programme of London Amusements." Private company. First directors: G. M. Williams, H. W. Hyde and W. K.

Stretch. Registered office, 108, Long acre, W. C.2.

**SCHOOL GOVERNMENT PUBLISHING CO., LTD.** (London).—Capital £1,000 in £1 shares. Newspaper proprietors, publishers, printers, etc. Private company. Subscribers: W. F. Cornish and A. Darby. First directors by subscribers.

**THEOSOPHICAL PUBLISHING HOUSE, LTD.**—Registered December 6th as a company limited by guarantee, without share capital. Proprietors and publishers of newspapers, journals, magazines, etc. The directors shall be the general secretaries of the Theosophical Society in England and Wales, in Scotland and in Ireland, the first being: Major D. G. Pole, Mrs. J. R. Bindley and P. L. Pielou. Registered office, 9, St. Martin-street, W.C.2.

**FLEET ADVERTISING CO., LTD.**—Capital £1,000 in £1 shares. Private company. First directors: E. C. Wood, W. H. Skinner, W. E. Doluake, W. Stockwell, W. F. Skinner and S. Barnard. Registered office, 34, New Kent-road, S.E.

### COMPANY MORTGAGES AND CHARGES.

Fresh Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 1908, and Satisfaction registered pursuant to Section 97 of the same Act. (The registration of Satisfaction is not compulsory).

**PREMIER PRINTING CO. (BRIGHOUSE), LTD.**—Satisfaction in full on November 28th, 1921, of mortgage dated March 28th, 1916, securing £2,000.

**HEWITT AND RUDGE, LTD. (Printers).**—Mortgage dated November 24th, 1921, to secure £604 3s. 4d., charged on certain land and premises in Whitley Bay. Holders: North Shields Standard Permanent Building Society.

**NATIONAL LABOUR PRESS, LTD. (Manchester).**—Satisfaction in full on October 10th, 1919, of debenture and covenant dated September 13th, 1918, securing £1,250.

**NATIONAL LABOUR PRESS, LTD.**—Mortgage dated December 1st, 1921, to secure £1,500, charged on 17, Albion-street, Leicester. Holders: Leicester Co-operative Society.

**COPELAND-CHATTERSON CO., LTD. (Manufacturers of perpetual ledgers, manifold billing systems, binders, etc.).**—Deposit on November 19th, 1921, of deeds of Dudbridge Lewers Mills, near Stroud, Glos., and freehold land adjoining, to secure all moneys due or to become due from company to Lloyds Bank not exceeding £5,000.

**FLEET JOURNALS, LTD. (London).**—Debenture dated October 27th, 1921, to secure £300, charged on the company's undertaking and property, present and future, including uncalled capital. Holder: T. Malcolmson, "Powerscourt," Redhill, Surrey.

**EBURITE PAPER CO. (1910), LTD. (Paddington, W.).**—Particulars of £20,000 debentures authorised November 9th, 1921; present issue £3,000; charged on the company's undertaking and property, present and future, including uncalled capital.

### Mr. Charles Bussey.

MR. CHARLES BUSSEY, the esteemed representative of the Groult Engraving Co., Ltd., whose death we announced last week, came of an old journalistic family, being the youngest son of the late Harry Findlater Bussey, "the father of Fleet-street," author of "Fifty Years of Journalism," etc., and one of the five famous brothers, whose work in the Reporters' Gallery of the House of Commons was so well known in the "eighties." Charles was apprenticed to a lithographic artist, and at the age of 21 took charge of the art department in one of the largest printing firms in Manchester. He practised line engraving before photography was generally used, drawing his own illustrations on paper, transferring them by a hand press to zinc, and often drawing direct on to the metal when working for the newspaper press. He contributed illustrations to the *Manchester Guardian*, the *Manchester Evening News*, and the *Sunday Chronicle*, and all the journals of the Hulton group, also for most of the other Lancashire weeklies. He had been "on the road" for over 20 years, and found his early training in art of immense value in preparing designs, "lay outs," and suggestions for his customers. His association with the Groult company had been most happy and great regret is expressed at his sudden demise.

### Mr. Henry Reeves.

THE town of Andover, Hampshire, was poorer by the death, on December 5th, of Mr. Henry Reeves. The deceased gentleman, who had reached the age of 77 years, was apprenticed in 1858 to the *Andover Standard* Printing Co., Ltd., with which firm he was continuously identified for a period of 63 years, occupying the position of printer. Mr. Reeves was not only a keen craftsman during all those years of service, but built up for himself a reputation among his fellows for sterling ability and character. The funeral, which took place on Saturday at the Andover Cemetery, was attended by a large assembly of friends, and there were many floral tributes.

### Mr. George Robb.

MR. GEORGE ROBB, master printer and lithographer, of Aberdeen, died on Thursday last from heart failure, at the age of 76. Mr. Robb was formerly foreman in Messrs. Macniven and Cameron's lithographic establishment at Edinburgh. In 1867 he commenced business as a lithographer in Aberdeen, and gradually built up a substantial business. On the occasion of the jubilee of his business in 1917 he was entertained by the master printers of Aberdeen, and presented with handsome gifts. His son, Mr. A. B. Robb, solicitor, is the Town Clerk of Portsoy.

# The Bookbinder.

## Bindery Costing: A Call for Education.

It will be remembered that the writer of our bookbinding "Notes and News" made further reference to the time docket last month, when the Federation of Master Printers came in for some criticism from his pen on account of the silence which has apparently been allowed to descend upon the subject of the bookbinders' docket. These strictures received further emphasis through our correspondence last week, Mr. H. Vick, of Manchester having written to register his protest against the alleged negligence of the Federation officials in allowing this urgent matter to be side-tracked.

### Some Healthy Impatience.

As a rule, it is best for all concerned that anything in the nature of a trade grievance should be given frank and open expression, and certainly it is a healthy sign that we should have people of standing in the trade expressing themselves so strongly on the need for the general adoption of the binder's docket, and the harm that is done by delay in the introduction of this reform. The allegation of apathy on the part of the Federation officials is, however, another matter, and our own feeling is—though no word of protest has reached us on the subject—that the criticism put forward is hardly fair. We take it that the Federation of Master Printers, which has among those at its head several of our most eager exponents of scientific cost-finding, is very much alive to the need for accurate costs data from the binding department, as from every other section of a business. During the past few months, however, the air has been full of the wages dispute, and not only have the foremost advocates of bindery costing been largely occupied therewith, but the atmosphere of a wages struggle is surely the least satisfactory one in which to attempt a forward movement in the direction of the overcoming of old-standing prejudices and the closer co operation of workpeople with employers. Moreover, is it wise to try to force this question in any way while there are large numbers of employees—and, we fear, a certain proportion of employers as well—who have not yet realised the present-day necessity for scientific cost-finding?

### Progress Being Made.

But though no very tangible advance can be announced at the moment, we believe the costing authorities are by no means trying to

shelve the question of the binders' docket, but that they are relying rather upon educative than upon legislative action as promising a happy issue out of the present difficulty. Meanwhile continual, if gradual, progress is being made in the right direction. It is clear that the inevitability of exact costing is now being increasingly recognised on every hand. A notable feature of Mr. George Eaton Hart's review of American printing, reported on another page of this issue, is his emphasis upon the detailed cost-finding insisted upon in the States, and his assurance that more thorough costing goes hand in hand with increased efficiency. A most encouraging sign of progress on this side of the Atlantic is the recent action of our Joint Industrial Council in giving its sanction to the Federation Costing System. Employers and trade unionists having both accepted the principle of exact cost-finding, its application to all departments of production is surely only a matter of time. With a little more experience of its working, and education as to its necessity, the bindery docket will be freed from the prejudice which in some minds suggests impracticability in its use or detriment to workpeople through its misapplication.

### Educate! Educate!

The great need of the moment in regard to scientific cost-finding is education, and particularly education of the worker. Recent experiments in the direction of organising joint costing meetings for employers and employed have given most promising results. Much could be done, too, by individual employers if they would find means to inform their workpeople of the necessity—in justice to customers, employees, and employer alike—that exact data of the cost of every job should be obtainable. Let those who realise the value of accurate cost-finding lose no opportunity of spreading the knowledge of the subject throughout every section of the trade. Scientific costing for bookbinders as well as for printers is a cause that is assured of eventual victory; the achievement of that victory will be hastened by every effort put forward to assist the educative process.

MR. F. O. ROBERTS, M.P., the representative of the T.A. in Parliament, is making an appeal throughout the trade for the poor of West Bromwich, his constituency.

# Binding Notes and News.

## The Docket Situation.

Mr. Vick need not apologise for pursuing the binders' docket subject to further lengths considering the service that he is rendering to an important branch of the industry. It is due to the efforts of such as he that progress is made possible. In this particular problem it is incredible that we should have reached an impasse such as we appear to have come up against. The whole position is so confusing and contradictory owing to the vagaries that exist. Yet there they are and it remains for Mr. Vick, Mr. Harraway and a few others to press for a clearer and more cohesive policy in regard to this particular issue.

## Dullness of Trade.

The binding industry is still in the throes of the slump, with small prospect of early improvement. Normally at this season of the year an amount of overtime is being worked, but instead of that short time is now the rule. On every hand one hears of staffs growing smaller and smaller, and still the hours of work have to be curtailed. The large users of books appear to have no requirements at all, and the evidence all round points to stocks bought in more prosperous days, which still remain to be worked off. All hopes are centred on the coming of the New Year, and there is a feeling that conditions will then improve. Our own opinion is that though trade may turn a little in the right direction there can be no return to normal business until the international situation rights itself. The number of books used up and required depends entirely upon the volume of general trade in the country, and as our trade is mainly dependent upon exports it follows that our prosperity is bound up with that of the world generally. The demand for ledgers and account books will increase when our engineers are sending engines and machines to Russia and when our cotton goods are being despatched to India and the East. Meantime the need for goodwill and realisation of each other's difficulties, between Union and Federation members is greater than ever. The burden of depression is weighted equally in each panner, and the load will appear so much lighter by recognition of the fact.

## The Materials Market.

The market for bookbinding materials has not undergone any drastic change of late. Leathers remain at the prices which have ruled for several months past, the following representing average figures:—Glazed skivers, 5d. to 7d. per square foot; embossed skivers, 6d. to 8d. per square foot; glazed basils, 7d. to 10d.; roller basils, 6½d. to 8d.; fair basils, 8½d. to 11d.; rough sheep, 8d. and 9d. per foot; fleshes, 7d.; rough morocco, 10d. to 1s.; rough calf, 1s. 2d. to 1s. 6d.; fair calf, 1s. 6d. to 1s. 9d.; pigskins, 1s. 6d. to 2s. 3d.; anglo's, 1s. 9d. to 2s. 3d.; goats, 2s. to 2s. 6d.

## Leather Bargains.

The tanners and leather merchants are making up special parcels of skins at clearance prices prior to stocktaking and some very useful bargains are to be picked up at the moment. Red glazed basils for quarter binding are on offer at 5d. per foot, and good, clear skins for best work at 8½d. per foot. Well selected roller basils are offered at 7½d. per square foot, and clearance skivers at 4½d. to 5½d. in a series of colours and designs. Undoubtedly to the house which can afford it the present is a good time to buy leather against probable requirements. The improved demand in the boot trade is said to be exercising an influence on the price of hides for bookbinding purposes, particularly, of course, anglos and calfs. A steady demand would no doubt eventually harden the market but up to now that effect has not been felt.

## Long-Wearing Leathers.

J. Hewitt and Sons, of Edinburgh, are demonstrating some office books and furniture, covered or upholstered in pigskin, morocco and calf leather which has seen 20 to 40 years' service. We are told that despite the long record of continuous use, the material is very little the worse for wear. If all modern leathers could offer the same prospect the bookbinder would lose a lot of repair work in the next twenty years. That is one way of looking at it, though it doesn't reflect much credit.

## Adhesives, Cloths, Gold and Boards.

Glues, bookcloths, calicoes and fabrics generally remain unaltered in price. There has been a reduction in "Rex" dry paste and to the user who can place ton contracts there is a very considerable advantage to be gained. Gold leaf is a little easier and ample stocks are available in this country. A reduction in the price of book-edge locks and fittings is announced, and makers are badly in need of orders. Millboards are down in price, but the best machine and hand-made boards are still three to four times their pre-war price. Dutch strawboards are quoted £8 10s. per ton, 8 to 16 oz. basis, with usual extras. Supplies are gradually being reduced and a hardening movement would not be altogether unexpected.

THE editor of the *Allahabad Independent*, who, with a number of other Nationalists, was recently arrested, has been sentenced to 18 months' simple imprisonment, with a fine of 2,000 rupees, and an additional three months' in default, for publishing an article advocating recruiting for the Congress Volunteers; and also to a further six months' simple imprisonment and 1,000 rupees, and three months' in default, for being a member of the Congress Volunteers.

## Printing, Bookbinding & Kindred TRADES OVERSEERS' ASSOCIATION.

There was a good muster of members at the monthly meeting of the Association held on the 6th inst., at the headquarters, St. Bride Institute, Bride-lane, E.C.4, the president (Mr. A. W. Hart) occupying the chair and the vice-president (Mr. H. Milton) supporting. Most of the evening's proceedings were occupied by an interesting lantern lecture given by Mr. G. W. Riley (H.M. Stationery Office), on a "Swiss Tour." This was the second lecture given by Mr. Riley on this subject, and like the first, was greatly appreciated by the members.

The minutes of the previous meeting were read and confirmed, and the correspondence submitted included a letter from Mr. E. A. Clifford, hon. solicitor of the Association, who wrote regretting his inability to address the members that night as promised owing to his having important provincial business in hand.

Mr. Boyce, of Henry Boyce and Co., printers' engineers, was next elected to honorary membership.

The two auditors elected for the ensuing year were Messrs. E. W. Tuff and W. T. Lingham.

Mr. Riley's lecture, illustrated mostly from photographs of his own taking, was listened to with very great attention. Starting from Zermatt he threw on to the screen some of the giant mountains of snow in the Bernese Oberland, and in vivid language described the wonderful scenes witnessed on the summits at sunrise and sunset. Interesting, too, were views of the Valley of the Grindelwald and of the Wetterhorn from the top. The conquest of the Matterhorn by Edward Whymper and his party of intrepid Alpine climbers, and the fate which befel Lord Alfred Douglas were graphically described and depicted. Mr. Riley, in concluding, spoke of the principal characteristics of the Swiss people, of whom he had the very highest opinion.

A vote of thanks to Mr. Riley, moved by the president and seconded by Mr. A. G. Aves, was heartily endorsed.

Mr. Geo. A. Eden, the general secretary, took the opportunity of tendering seasonal greetings to the members, it being the last occasion in which he would be able to do so in his present capacity.

## Football.

The following matches were played on Saturday and resulted as shown :—

### Printers' Football League.

Co-Operative Printing Society, 7; Oyez, 4. Amalgamated Press, 5; King's Printers, 0. Armoury, 5; Falcon, 3. St. Clements Press, 4; Britannia, 0.

ANNUAIRE DE L'IMPRIMERIE, par Arnold Muller—1921-1922. Paris: Arnold Muller, 79, rue Dareau. Prix, 6 francs.

We have received a copy of this well-known annual, now in its 32nd year, and can again commend it to all interested in the printing trade of France. The new edition has been revised up-to-date and will be found a most useful work of reference, containing as it does a mass of trade information, technical, legal and historic, with directories of trade firms in France, the French colonies, Luxembourg, Belgium and Switzerland. The volume runs to about 450 pages, 6½ in. by 4½ in., and is serviceably covered in cloth boards.

"WINTER'S PIE," the Christmas number of "Printers' Pie," makes an excellent show this year, the contributors including W. Pett Ridge, Wm. Le Queux, Keble Howard and Geo. R. Sims, while there are numerous black-and-white and colour illustrations, reproducing pictures by H. M. Bateman, Starr Wood, W. Heath Robinson, Will Owen and other well-known artists. This publication is issued by the "Pie Publications, Ltd." The whole of the £10,000 5 per cent. preference shares in the company are held by the trustees of the "Printers' Pie Trust," for the benefit of the Printers' Pension, Almshouse and Orphan Asylum Corporation; the Newspaper Press Fund; the Royal Literary Fund; the Booksellers' Provident Institution; the News-vendors' Benevolent and Provident Institution; and the Artists' General Benevolent Institution.

**PRINTING BOOK COVERS.**—The question of printing versus blocking of book covers, to which we devoted an article recently, has again led to a dispute at the house of Burrup, Mathieson and Sprague, Ltd., and on Tuesday morning a conference was held on the firm's premises attended by representatives of the platen minders and bookbinders' unions and of the Federation of Master Printers and the firm. We understand that Mr. W. G. Little, for the Federation, stressed the view that a dispute between two unions as to a demarcation of work should not be allowed to penalise the employer, and in the end it was agreed that the work of printing covers on platen machines should continue while the matter is considered by the London Printing and Kindred Trades Federation, whose conclusions will later be submitted to the Federation of Master Printers.

**SIR A. PEARSON AND THE BLIND.**—The tragic death of Sir Arthur Pearson last Friday, by slipping in his bath, removes one whose early journalistic successes in periodical publishing constitute one of the romances of the profession, and whose later extensive activities as newspaper proprietor are well known.

Replies to Box Nos. to be addressed to the Offices:  
"BRITISH AND COLONIAL PRINTER AND STATIONER," 58, SHOE LANE, LONDON, E.C.4.

## The Chiswick Press Exhibition.

As we announced in advance some time ago, an exhibition is being held at the Public Library, Duke's-avenue, Chiswick High-road (a few minutes from Turnham Green Station), of printed books produced at the Chiswick Press, established on Chiswick Mall by Charles Whittingham in 1810, and continued there by his nephew, partner and namesake until 1852. The exhibition opened on Monday, and is of great interest. It includes books printed at the Chiswick Press of the elder Whittingham, lent by Mr. Charles T. Jacobi, formerly and for many years managing partner of the Chiswick Press. To these and to many other volumes have been added some of the beautiful books printed at the Chiswick Press in Took's-court. In addition to the books there are also many interesting portraits and autograph letters of the Whittinghams, views of the College House at Chiswick, where the printing was done, and various other Whittingham relics, such as indentures, memorial cards, a passport to France (1820), and so forth.

## The Printer and His Paper.

### Mr. E. A. Dawe Continues to Spread Enlightenment.

Mr. Edward A. Dawe, of H.M. Stationery Office, is doing good service alike to the printer and the papermaker in the addresses which he delivers from time to time before gatherings of master printers on the subject of paper. On the 6th inst., at the Battersea Public Library, he attended a meeting of the South-West-London Master Printers' Association, and spoke on "The Printer and His Paper."

He began by observing that there were many things the printer had to learn about paper. Those who only dealt with paper forgot that the printer was going to handle it, and those who were only concerned with print forgot that the paper had to be made. Mr. Dawe proceeded to emphasise how essential paper was. Whereas there were many ways of printing, there was, to all intents and purposes, only one material on which they could print, and that was paper.

From a century-old book, "Johnson's Typographia," the lecturer quoted a severe criticism of British paper. Why did the printer always complain about paper? The answer was simply because he did not know.

Mr. Dawe then took his hearers for a short "canter" over the papermaking processes, both hand-made and machine, explaining also the meaning of the various finishes.

Some of the troubles attributed to paper, he pointed out, were the fault of the printers themselves, and often arose from the conditions under which the paper was stored. Mr. Dawe mentioned the case of a large printing works in London where the stock room for the paper was open to the weather. When paper went to 9d. a lb. for rubbish everyone took great care of it, but when it was cheap the printers seemed to think it did not require any attention. Mr. Dawe wished to emphasise that when printers bought paper they should look after it properly. If it was carefully stored it would remain unchanged for a very long time, but if they were careless with it, even the best of papers would suffer.

Mr. Dawe showed how expensive it was to allow employees to get over their paper difficulties as best they could, whereas a great deal of valuable time might be saved if a specialist was consulted, and of these specialists there were many who could provide cures for paper ailments.

Mr. Dawe went on to deal with the various troubles which printers meet with in regard to register, cockling, electricity, and so on, and gave some useful hints on each phase of the subject. He particularly emphasised the necessity for maintaining an even temperature and moisture conditions in the printing room. With a high temperature the moisture was driven out of the paper, and the paper contracted, and when the moisture content of the room was raised the paper absorbed it

and expanded. From such variations register troubles occurred.

Lithographic printing introduced another factor, because they printed on a damp stone, and the early impressions took up a certain amount of moisture, with resulting expansion and further trouble. Paper did not contract and expand always at the same rate, because, with every expansion, it would contract less, so that they would get register troubles continuously unless the atmosphere of the printing works was controlled. Colour troubles in art paper were due to some extent to the papermaker, but it was difficult to get at the bottom of these, because they did not usually come to the notice of the printer until after the work was done.

In three-colour work there was sometimes trouble with the colour not coming down properly, but that was the printers' job, the ink requiring only a little modification in order to alter the colour value. Cockling was also another result of undue expansion. The paper being dried hard, only the outside edges had been able to take up moisture from the atmosphere. To check cockling, if the paper was new, the paper should be exposed to the air fairly well; but if the cockling was fixed in the paper, Mr. Dawe was afraid there was no cure. With regard to the electricity in paper, the speaker remarked that while it was a real trouble, in time it would disappear; it generally arose in new paper.

Mr. Dawe mentioned some of the curious effects which had arisen from unsuitable store room conditions. In one instance, yellow paper which developed black edges was found to have been stored near a drain which had given off gases, thus changing the colour round the edges. In another case, boards which refused to register the second colour properly, were found to have been placed near a radiator in the stock room, which the specialist, on being called in, pointed out was scarcely the way to treat boards. In another case the fault of the paper, which picked terribly, was due to a broken window exposing the paper to the damp atmosphere outside.

In the course of a discussion which followed Mr. Maynard referred to the practice of damping paper before printing, and mentioned that he had seen excellent results arising therefrom.

Mr. Spring said printers had been told that papermakers had overcome the necessity for damping. He did not think they found any printer-to-day who damped the paper and the results were satisfactory. He went on to refer to the different bulking qualities of paper, new paper not bulking to the same extent as that which had been in stock for some time. With regard to art paper, Mr. Spring said he should like to discover how they could get over the pin pricks which appeared under the blocks, and expressed the hope that some day they would overcome the defects arising from blue inks.

Answering a question by the president (Mr. J. D. Wise) as to whether it was possible to get paper with the same finish on both sides, Mr. Dawe replied that the nearest approach to that would be a water finish imitation art.

in which the impression of the wire was very nearly removed. As to a test for esparto papers, Mr. Dawe said a 5 per cent. solution of aniline sulphate, if it failed to produce a pink effect upon the paper, showed there was no esparto in it.

Mr. Simnett described how his firm had overcome their paper troubles by maintaining a steady temperature in the works all the week round. Since they had introduced central heating they never had to complain once of bad register or anything else if the paper had been in stock for some time. The only difficulty arose with a new parcel of paper direct from the mill which it was found necessary to put on the machine straight away. The speaker mentioned the advantage derived from opening out the paper and interleaving it with rough casement paper as soon as it was received. This overcame the troubles arising from stretching and so on, and in a couple of days the paper was fit to handle on the machine.

Mr. Tacey mentioned that a complaint with regard to black spots appearing on exercise books which had been supplied to a school was traced to the satchels used by the scholars, small particles of the American cloth settling on the paper. The speaker mentioned the importance of studying paper from the technical point of view.

A cordial vote of thanks was passed to Mr. Dawe for his address, and in his response he called the attention of master printers to the new paper trade customs which would come into operation on January 1st.

## Norwegian Paper Market.

The paper market in Norway, says *Farmand*, shows slight symptoms of a greater activity, but prices rule unchanged. It is, however, hoped that better conditions are slowly drawing near, or at least that the turnover is going to increase. All depends on the state of the exchange value. The last fluctuations have been very harmful to the producers, who, at best, only get their costs of production covered; at worst, they must sell with losses.

## Waste Paper Failure.

**Re The British Waste Paper and Paper Stock Merchants.**

A sitting of the London Bankruptcy Court was held on December 7th, before Mr. Registrar Mellor, for the public examination of Mrs. Mary Maud Austin, who carried on business under the above style at 42-4, Manchester-road, Notting-hill, W. The debtor filed her own petition on August 20th and has lodged accounts showing liabilities £992 against assets valued at £500, consisting of stock-in-trade, machinery fixtures and fittings. Replying to Mr. W. P. Bowyer, senior official receiver, the debtor stated that under the will of her late brother, she in July, 1920, received £2,746, of which £1,551 was used in the above business. In October, 1920, she became the tenant of 42 and 44, Manchester-road, and there commenced as a waste paper merchant, the business being managed by one of her sons, who had for twelve years previously been employed by a firm of waste paper merchants. Shortly after the business was opened a depression followed by a heavy fall in prices occurred in the trade, and in consequence the business was crippled, and sales could only be effected at a sacrifice. Owing to subsequent pressure by creditors and to an execution having been levied at the premises, witness filed her own petition. She attributed her insolvency to loss in trading through the aforesaid depression and heavy fall in prices, and to heavy expenses in connection with a motor lorry which was represented to be in good running order when bought, but proved to be defective, with the result that a considerable expense was incurred for cartage. The examination was concluded.

MESSRS. THOMAS AND GREEN, LTD., in spite of trade depression, have produced striking new colours in various grades of papers—three in the 288 tinted s.c. series, two in card index board, and four in banks and bonds. The wide range of tints is unique, and this enterprise is reaping its reward, even in these times.

## New Printing-Trade M.P.

### Mr. T. E. Naylor Enters Parliament.

The printing industry extends its congratulations to the latest addition to the M.P.'s of the printing and allied trades. By his victory in the South-East Southwark (Walworth) by-election last week, Mr. T. E. Naylor's entry into Parliament is a triumphal one, and constitutes a good augury for a successful Parliamentary career. The printing industry can not only pride itself on the fact that there is thus added one more to its representatives in the House, but it can also take some of the credit for the winning of the seat, for Mr. Naylor expresses deep appreciation of the assistance he has received during the by-election from the members and officials of his own society and also from those of other trade unions (including the women workers) in the printing and allied trades.

The completeness of Mr. Naylor's success exceeded the anticipations of even the optimists among his supporters. The figures were: T. E. Naylor (Labour), 6,561; T. Owen Jacobson (Co.-Lib.), 2,636; Horace Boot (Ind. Con.), 2,307. Thus Mr. Naylor's majority over the second candidate was 3,925, and he had also a clear majority of 1618 over the votes polled by both the opposing candidates combined.

When the result was declared in Walworth-road between 12 and 1 last Thursday morning it was received with great enthusiasm, and Mr. Naylor was greeted as he went from the hall with "For he's a jolly good fellow." He has since been inundated with telegrams and letters of congratulation, such messages having been received not only from many prominent trades union representatives, but also from some of the leading master printers and newspaper proprietors. The new member took the oath and his seat in the House of Commons on Thursday, amid loud Labour cheers, and calls of "Resign!" to the Govern-

ment from Commander Kenworthy. Mr. Naylor was introduced by Mr. Bowerman and Mr. Henderson.

#### Mr. Naylor's Busy Career.

Mr. T. E. Naylor, who was born in 1868, is the son of a working compositor, and himself followed his father's calling in the employ of Messrs. Cassells, where from the reading department he was promoted to the position of sub-editor. While fulfilling the duties of sub-editor he was elected secretary of the London Society of Compositors in 1906, on the resignation of Mr. Bowerman, and still holds that office.

It will be remembered that, in recognition of his various services during the war, he was last year approached with the offer of his being appointed an Officer of the British Empire, the acceptance of which honour, however, he politely refused, adding that he felt that distinctions of that kind were out of date in a democratic age, and carried with them political and social obligations for which he was unable to assume responsibility.

Rumour has it that Mr. Naylor has, in his time, rejected more than one approach made with a view to his becoming secretary of the Newspaper Proprietors' Association, whilst a recent similar rejection is reported in connection with the secretaryship of an employers' association more closely allied to the printing trade.

The winning of a seat in Parliament adds one more to the already considerable number of offices held by Mr. Naylor. The following is a recent list of the principal of the positions he occupies in addition to the secretaryship of the L.S.C. He is chairman, London Labour Party; vice-chairman, London Printing

Trades Federation; chairman, London Joint Advisory Committee of Trade Unionists and Co-operators; vice-chairman, Technical Advisory Committee for London and Home Counties; Justice of the Peace; delegate to Joint Industrial Council; chairman, J.I.C. General Purposes Committee; member of Governing Council, Ruskin College, Oxford; vice-chairman, Stationery Office Joint Industrial Council; member of National P.T. Federation Executive; also editor of a trade journal.

Question is naturally being raised as to whether Mr. Naylor's election to Parliament precludes his continuing to hold the L.S.C. secretaryship. We understand there is nothing

**Mr. T. E. Naylor, M.P.**

in the society's rules to make any change necessary. At the time when Mr. Bowerman entered Parliament there was a rule on the society's books which necessitated his giving up the secretaryship, but after the Osborne Judgment this rule was deleted. We fancy the general view of the L.S.C. membership will be that Mr. Naylor's services are too valuable to the society to be lightly dispensed with, for there is no question of the success that has marked his secretaryship of this important trade union.

THE Australian Government is to introduce a Bill for a resumption of trade with Germany, and also an anti-dumping Bill.

## P. M. and O. A. Pension Effort.

### Successful Bohemian Concert.

In aid of the fund to establish a third pension within the Printers' Pension Corporation the sum of £120 was raised by the Printers' Managers and Overseers Association at a successful bohemian concert held at the Cannon-street Hotel on Thursday evening last, the gathering being presided over by Mr. E. N. Mathieson, director of Burrup, Mathieson and Sprague, Ltd. (son of Mr. G. J. Mathieson, principal of the firm). There was a big attendance and Mr. Mathieson was supported by Messrs. M. W. Baker, F. H. Walls, Sydney Cumbers, W. Spencer, A. E. Jarvis (ex-president of the Association) and E. W. Whittle (general secretary). Apologies for absence were received from Sir T. Vansittart Bowater and Mr. T. E. Naylor, M.P.

An excellent concert programme was rendered under the direction of Mr. Philip Ritte—whose own tenor singing was a notable feature of the concert—songs being contributed also by Miss Ethel Wilford, Miss Doris Cowan, Mr. Geoffrey Duprée, and Mr. Will Edwards (humorist), and pianoforte solos and accompaniments being provided by Miss Tina Foster. A remarkably large number of encores were called for and given.

In the course of the evening a collection was taken for the pension fund, and a little later Mr. G. H. T. Freeman, hon. pension secretary, announced that the sum of £117 15s. had been realised. He expressed the hearty thanks of the pension committee and himself to those who had contributed, and went on to emphasise the deserving character of the Printers' Pension Corporation. In referring to some contributors who had helped in specially generous fashion, Mr. Freeman mentioned the firm of Burrup, Mathieson and Sprague, Messrs. Crowther and Goodman, Mr. Stanley Cousins, Messrs. Dawson of Otley, Messrs. Percy Brothers of Manchester, and the Birmingham Centre of the P. M. and O. A. Later in the evening Mr. Whittle, at Mr. Jarvis's suggestion, made a personal effort to get a little added to the total raised. In this he was successful, an announcement soon being made that the collection had been brought up to £120.

Mr. Jarvis proposed a very hearty vote of thanks to the chairman, and this was taken up enthusiastically with the singing of "For He's a Jolly Good Fellow" followed by three cheers for Mr. Mathieson.

Mr. Mathieson made suitable response, thanking those who had subscribed and indicating the difficulty of raising money in these days of trade depression.

PRINTED books, directories, etc., imported into Australia during the month of July, 1921, amounted in value to £68,000, compared with £74,000 the value of the same kind of merchandise imported during July last year.

## Simplicity and Progress in Printing.

**Mr. R. B. Fishenden in Cambridge.**

Lecturing recently to printers in Cambridge, Mr. R. B. Fishenden, M.Sc. Tech., chose as his subject "Simplicity and Progress in Commercial Printing."

Expressing regret that printed matter is too often "taken for granted" and seen with unseeing eyes, Mr. Fishenden remarked that the complaint often heard that customers insist on cheap work irrespective of its quality frequently comes from the lack of conviction of the printer himself: if he were able to inspire his client with the idea that bad printing is a bad advertisement for the client's business, the result would usually be satisfactory to all concerned.

With reference to type and characteristics which make for beauty and legibility, Mr. Fishenden said it was doubtful whether we had advanced beyond the standards set by Jenson in book work, but in commercial printing variety was essential, and types of new designs were frequently being introduced to meet the demand for novelty in display. A good type had to be legible and free from eccentricity. In this respect some modern display founts in current use were excellent, especially in lowercase characters, because the ascenders—th, k, f, h and so on—were very pronounced.

In the matter of legibility, the Roman character was the best: whilst the Gothic or 'black' letter was beautiful in itself, the individual letters were too like one another to be read easily. William Morris had done much to revive an interest in fine printing, but he had made the mistake in his Troy and Chaucer types of sacrificing legibility for the appearance of the page as a design. It was necessary in all printed work to avoid sacrificing clearness for the sake of harmony alone; this had to be carefully considered in deciding such matters as spacing, indentation, leading, and lengths of line, besides the important factor of the distance apart of the individual types, referred to as the 'set.'

As regards display work, there had been great progress in recent years towards simplicity and direct treatment. Leaving "white paper" in a job was the easiest way to make it a success. Display pages should be treated as designs, and customers encouraged to allow the printer to modify the arrangement of the wording in order to secure the most effective results, but where this was impracticable the wording should be allowed to group itself naturally, and not be forced to assume a predetermined shape.

It was much to be regretted, he said, that coated paper, misnamed "art" paper, was still so frequently employed. For illustration work it had been shown that highly satisfactory results could be obtained from half-tone blocks printed on non-coated paper, and some remarkably fine colour work had been printed on a pure rag paper by G. W. Jones.

The great commercial possibilities of litho-offset printing had come from the great advance in the construction of the machines from those which were used by the old litho printers. There was a strong inference that the process would be used increasingly for actual type printing, whilst the advantages in illustration work were indubitable both on grounds of speed and cost of production. With an increasing understanding of the technique of the process, the quality of illustration work was constantly improving. The facsimile reproductions of pencil drawings and colour work which were shown, fully illustrated the points that were made.

It was perhaps unfortunate that photo illustration processes could reproduce ugly and over-elaborate designs equally as well as the simple ones. But this was not the fault of the process. Printers should not hesitate to go back to the simple and strong in design, and the modern processes would translate the originals into printing surfaces with the greatest fidelity.

In conclusion Mr. Fishenden said there was a new spirit in the printing world, which desired a higher standard of work apart from mere technical excellence. Some of the best brains in the industry realised the importance of this change in spirit, and were modifying the character of their work to meet it. The large advertisers too were seeking everywhere for simplicity and directness of treatment, so that their publicity might be in line with new ideas.

## Tenders Invited for Egypt.

The Government Press, Cairo, Egypt, invites tenders for the supply of:—15,000 metres of black binding cloth; 675 kilos of black printing ink; 3,000 kilos of glue; 1,100 metres of packing cloth; 1,000 kilos of starch; 1,500 kilos of string for heavy packing. Tenders on the proper form will be received by the Controller of Printing and Stationery, Ministry of Finance, Dawawine, P.O., Cairo, up to noon on January 24th, 1922.

## Tenders for Wheatstone Tape.

The Postmaster General's Department, Melbourne, invites tenders for the supply and delivery of 29½ tons Wheatstone tape of various patterns. (Schedule No. 3). Sealed tenders on proper forms and accompanied by a preliminary deposit based on the following sliding scale and calculated on the total amount of items tendered for—(a) For amounts up to £500, 2 per cent. (b) For amounts over £500, 2 per cent. for £500 and 1 per cent. for the amount over £500. (c) The minimum deposit is £2 for each tender will be received by the Deputy Postmaster General, Melbourne, up to 3 p.m. on Tuesday, February 14th, 1922.

# THE NATIONAL Association of Wholesale Stationers AND PAPER MERCHANTS.

## National Meetings.

On Thursday the 9th inst. full and representative meetings of the National Council of the National Wrapping Paper Section and of the National Writings and Printings Section were held at the Council Chamber, 11, Kings Bench-walk, Temple, E.C.4. In addition to various important matters concerning the members of the Association, the following subjects came under discussion :—

### The National Council.

The question of the appointment of a representative of the paper and newspaper trades, etc., to sit on the General Panel to be set up under section 24 of the Railways Act, 1921, from which a member might be added to the Rates Tribunal for the purposes of any particular case or proceeding, and temporary vacancies in the commercial membership of the Tribunal could be filled, was considered. The names of the prospective representatives were mentioned, and the feelings of the meeting were expressed as to whom the Association should nominate in due course.

The position of the Association as regards the Safeguarding of Industries Act, 1921, again came under discussion, and the general secretary was instructed on what lines to reply to the various letters which had been received on the subject.

The general secretary reported that it had been universally agreed that the Revised Trade Customs should come into operation on January 1st, 1922. It was hoped that copies of same would be received from the printers in the course of a day or two, and each member would then immediately be supplied with a copy.

The question of the period of the Christmas Holidays was raised, and it appeared that the big London houses were closing from Friday evening, December 23rd, until Wednesday morning, December 28th.

The general secretary reported that the various districts of the Association were taking up the question of the Prince of Wales' Appeal in connection with the British Empire Exhibition, 1923, with their respective local Chambers of Commerce.

### National Writings and Printings.

The present position with regard to standardisation was referred to, when it was reported that no reply had yet been received from the master printers as to the suggested meeting on this subject.

The question of the limit in respect of which carriage is paid on country orders was mentioned, and the general secretary was instructed to notify members of a resolution passed by the Southern District on this matter.

The question of "Nett Terms" was discussed, and the general secretary was requested to take certain steps in order to ascertain the views of the various districts.

## Electrotypers and Stereotypers MANAGERS & OVERSEERS' ASSOCIATION

The usual monthly meeting of the Association was held on the 10th inst. at St. Bride Institute, Bride-lane, E.C.4. There was a good representation of the membership present, and in the unavoidable absence of the president, Mr. J. Parker was voted to the chair. At the conclusion of the routine business Mr. W. C. Warren, general secretary of the National Society of Electrotypers and Stereotypers, delivered an interesting address on the apprenticeship question, which we intend to publish in next week's issue.

In a useful discussion which followed, Mr. Titchener (secretary to the Electrotypers and Stereotypers Trade Employers' Federation) expressed on behalf of that body cordial sympathy with the views put forward by Mr. Warren. Others who contributed to the discussion were Messrs. R. Latimer, A. Latimer, H. Lawrence, A. Parker, W. Longley and J. Parker.

A hearty vote of thanks to Mr. Warren brought the meeting to a close.

## Mr. A. H. Munday at Leicester.

An excellent and interesting lecture on "Printing Metals" was given on Wednesday of last week in the City School of Arts and Crafts, Leicester, by Mr. A. H. Munday, of Fry's Metal Foundry, London.

Despite the bad night a good number of students and gentlemen connected with the printing craft were present. Mr. Munday gave a brief history and description of printing metals, including the alloys used in each of the chief processes of printing. The lecture was interspersed with a number of lantern slides, showing the methods of manufacture; tests and scientific investigation; temperature measurements and control. It was felt by all present that the lecture had been a most valuable one, dealing as it did with a subject of vital importance to the printing craft. Mr. Munday was asked a variety of questions, and these were answered with evident satisfaction to the students.

Mr. C. Gee (representing the Leicester Master Printers' Association) moved a hearty vote of thanks to Mr. Munday for his lecture, and this was ably seconded by Mr. C. H. Chandler (late of Sheffield) the new editor-manager of the *Leicester Mail*, and supported by C. H. Roberts, principal of the School of Arts and Crafts. Mr. E. Shardlow, who presided, was cordially thanked for his kindly service.

## Stationers' Social Society.

### Another Successful Whist Drive and Dance.

The social evening which was held at the Stationers' Hall on the 9th instant by the Stationers' Social Society was a complete success. The previous functions of the kind have been so enjoyable in every way that the members of the Society and their friends eagerly asked for more. There was again a large gathering, the attendance coming close to the 300 mark. Accordingly, both the Hall itself and the Card Room, which provided ample accommodation, were well filled. One could not imagine a more gay and attractive scene in this venerable hall than that presented when dancing was in progress. The ladies had donned their brightest dresses, which by contrast, made the uniform evening clothes of the gentlemen appear quite picturesque. It was really a brilliant scene and almost as delightful to watch as to engage in. The oak floor possessed an ideal surface for dancing, while Gooding's Jazz band was of an excellent type and added all that was required to make this part of the programme thoroughly enjoyable. In the direction of affairs in the Hall, Mr. J. W. S. Johnston, assistant secretary, who acted as M.C., was ably assisted by the following stewards: Messrs. G. Oswick, A. C. Jennings, L. C. S. Lewsey, R. R. Thomson and W. Whyte. These gentlemen looked after the interests of the dancers so completely that the whole thing went off in perfect harmony.

No less successful was the whist drive which took place in the large, comfortable and beautifully decorated Card Room. Twenty-two tables had their full complement of players, and all settled down earnestly to the "rigour of the game." The prizes, as usual, were of a very attractive kind, so that the trend of the scores was followed with very keen interest. Mr. E. M. Fells again efficiently carried out the duties of M.C., assisted by Messrs. A. E. Brown, J. Atkins and F. E. Williams, who were alert and attentive throughout.

The whist prizes were won by the following players:—Ladies: 1st (jewel case), Miss K. C. Apps (174); 2nd (manicure set), Mrs. Thomas (172); hidden number (suede hand bag), Mrs. F. Smart (139). Gentlemen: 1st (umbrella), Mr. S. Perkin (179); 2nd (gold-mounted wallet), Mr. W. E. Wallis (179); hidden number (walking stick), Mr. W. S. Muir (128). The first and second gentlemen scored exactly the same number of points, and they had to cut for premier position, with the result as shown. Mrs. E. M. Fells gracefully presented the prizes to the winners, who were congratulated on their success.

Chief credit for the success of the gathering, of course, is due to Mr. A. E. Mist, the secretary, who, with the committee, planned the arrangements so carefully and so thoroughly that all that was required on the evening

itself was the gently guiding hand of the officials. Accordingly the whole programme was carried through with such smoothness that nobody thought of all the time and trouble that had been spent on the preparations, for the amount of detail work in an affair of this kind is considerable. Mr. Mist has since received many congratulations on the success of the gathering, and not least appreciative were Mr. P. W. Kennett (the president of the Society) and Mr. W. W. Horsburgh (the vice-president), who attended the function and enjoyed the pleasures of the evening as much as anybody. On the motion of Mr. G. J. Relph a vote of thanks was passed to Mr. Kennett for his presence and his share in the work which had produced so happy an evening.

In every way, including refreshments, the comfort of the members and their friends was fully studied. So much so, that they are looking forward to the next social evening, if not this season, then next.

## Printers and Paper Merchants.

### North London Printers' Discussion.

The December meeting of the North London Association was sparsely attended by the members, possibly due to the nearness of the Christmas season, and in the absence of Mr. D. A. Whitehead, the chair was taken by Mr. W. J. Mizen.

A welcome was extended to Mr. A. Langley of the West and North-West Association, who gave a talk on "Competition of the Wholesale Houses," a grievance that many members have, through being subject to losing orders on account of the competition of the wholesale houses.

Many instances were given of orders being lost in this manner and Mr. Langley suggested that one way of stopping the unfair competition was for a list of "fair" houses to be circulated among members of the London Master Printers' Association. This would then mean that printers would buy their paper from houses that were not likely to enter into competition with them for their retail orders.

A discussion ensued from which it was gathered that all members present had suffered in the way described by Mr. Langley, and it was resolved, on the motion of Mr. Hunt, for the matter to be left with the council to do as they thought best.

Mr. J. Johnson of Head Office attended and gave a report on his interviews with non-members in North London.

It is proposed to hold early in the New Year a concert and social evening.

LORD LEVERHULME has consented to preside at the 59th annual dinner of the Newspaper Press Fund in the spring of 1922.

# Printers' Managers and Overseers ASSOCIATION.

## MANCHESTER AND DISTRICT CENTRE.

The seventeenth annual general meeting was held in the "Mitre" Hotel, Manchester, on the 10th inst., when the president, Mr. Thos. Rignall, occupied the chair.

The annual report and balance-sheet were discussed. During the year four members were added, two had resigned, and Mr. Thos. Kirkwood had passed away, thus leaving a membership of 83. The Technical Committee had done good work on behalf of the students attending the Municipal College of Technology; there had been several conferences with the Typographical Association in respect of the giving and receiving of notices; several lectures were well attended; and the social side was adequately catered for. The balance-sheet showed that the calls on the local funds had been heavy, particularly in connection with hotel accommodation, but this expenditure had proved justifiable by the fuller attendance of members. The report and balance-sheet were passed after eulogiums from the two auditors, Messrs. Charles K. Knowles and Joseph Orrell.

The election of officers resulted as follows: President, Mr. Thos. Rignall; vice-president, Mr. Fred E. Robinson; trustees, Messrs. Edward McVay and J. H. Nuttall; treasurer, Mr. James E. Mayo; secretary, Mr. F. J. Hughes; executive committee, Messrs. E. C. Balls, A. Hellewell, Jos. Orrell, A. Young, Chas. N. Knowles, F. Scouler, E. Garrett and J. Ball.

The moving of a vote of thanks by the president to those members who had retired, was heartily supported.

After the general business was concluded, President Rignall introduced Mr. Robert R. Hyde, director of the Industrial Welfare Society, and Miss Marie Rochford, the local organising secretary.

In his address on "Industrial Welfare Work," Mr. Hyde briefly outlined what had been done amongst the miners, retail shop assistants, textile, engineering and shipbuilding trades. During the great war, he said, the making of munitions had caused large numbers of people—particularly young women—to be huddled into large centres where housing, transport, health and comfort became a cause of anxiety to the Government. The State set up a special department which was so successful and appreciated that it was deemed a necessity to carry on the good work in peace times. In the early days, the Welfare Society chiefly dealt with boys, but later on demands were made by adult people so that the scope of the Industrial Welfare Society had to be greatly enlarged. He went on to explain in some detail the present applications of welfare work and the need for its extension.

In the discussion which followed, President Rignall expressed pleasure with the kindly

advice given by Mr. Hyde, and commented on several of the many interesting points raised. Mr. E. Garrett continued the discussion, and other participants were: Messrs. J. H. Nuttall, Chas. N. Knowles, W. Smith and F. J. Hughes.

Mr. Hyde replied, and in the course of his remarks said he was delighted with the reception of his address and hoped the members would go further into welfare work.

WEE MAC.

## Re H. D. Hackett.

**Waste Paper Merchant, 47, Leage-street,  
Old-street, E.C.**

A sitting of the London Bankruptcy Court was appointed to be held on December 9th, before Mr. Registrar Francke for the public examination of this debtor, whose address is given as 47, Leage-street, Old-street, E.C., and against whose estate a receiving order was made on August 24th upon the petition of the *Daily Herald*, Ltd., the act of Bankruptcy being failure to comply with the requirements of a bankruptcy notice. Mr. F. T. Garton, Official Receiver, reported that the debtor had not surrendered to the proceedings, and no information could be obtained regarding his present movements. Under those circumstances he asked for the examination to be adjourned *sine die*. His Honour made an order on those terms. Messrs. Grosvenor, Chater and Co., have tendered a proof of debt for £38.

**FOOTBALL MATCH.**—A benefit match on behalf of Mr. H. J. Parker (joint hon. sec., P.A.T.F.L.), is to be played on Boxing Day between the Printing and Allied Trades League and the Forest Gate League. The game will be played on the ground of Messrs. Waterlow's at Walthamstow, and the kick-off is to be made by Mr. G. A. Isaacs, gen. sec., N.A.T.S.O.P.A., at 11 a.m.

**THE PRINCE'S CALENDAR.**—The Prince of Wales has given his name and personal approval to "The Prince of Wales' Calendar, 1922," which has been produced "To help all those Men of the Three Fighting Services, irrespective of rank, who defended their Empire with self-sacrificing Loyalty and Devotion, and now find themselves in want." The feature of the calendar is a reproduction in photogravure of an hitherto unpublished portrait of the Prince. The calendar has been produced by the Carlton Studio and is now on sale in all parts of the Kingdom, price 1s. 6d. per copy. Retailers and others who desire to assist in making the Calendar the success it deserves are requested to communicate at once with the Hon. Secretary, The National Portrait Fund, 13, Duke-street, London, S.W., who will be glad to quote attractive trade terms.

## Trade Notes.

PROSPECTIVE purchasers of *Hansard* were astounded last week when they were asked a shilling for the issue instead of the usual 3d. The yearly subscription is to be raised from £2 to £5.

MESSRS. ILIFFE AND SONS, LTD., have guaranteed £500 in support of the British Empire Exhibition. Speaking at a public meeting at Coventry, Mr. Edward M. Iliffe said he believed the Exhibition was going to do a considerable amount of good in promoting the commerce of the Empire.

FOLLOWING up Mr. E. D. Nuttall's recent appeal at the L.M.P.A. luncheon, the secretary of the London Master Printers' Association has sent out to all Association members a copy of Mr. Nuttall's address (reprinted from our pages) with a special appeal. This appeal has called forth the thanks of the Ministry of Labour, and responses from master printers have already been received.

THE Manchester Jobbing Printers' Guild, which is affiliated to the Typographical Association, has initiated a movement for securing one standard wage for day work and one for night work for all classes of workmen, inclusive of hand compositors, machinemen, and machine operators, for all members of the Association, the only differences intended being those allowed by the grading scheme in the hours and holiday agreement.

IN the Typographical Association's balance sheet for the first six months of this year, the principal feature is the large sum of £25,820 paid out under the heading of unemployment benefit, which compares with £9,983 in the previous half year and indicates the serious amount of unemployment prevalent in the trade. Superannuation accounted for £13,907, and other items made the full total expended under the heading of benefits £42,863.

"DAILY HERALD" CONTROL.—At a meeting last week of representatives of *Daily Herald* first debenture holders a resolution was unanimously carried asking the Joint National Council representing the Labour Executive and the National Council of the Trade Union Congress, to take over the future responsibility and control of the paper. The Joint National Council has appointed a small committee to go into the question and report as early as possible on the subject.

PRINTERS' ALMSHOUSES.—The aged inmates of the Printers' Almshouses, Wood Green, who held their Christmas festival on Saturday, sent a telegram to Princess Mary at Harewood House, offering respectful congratulations. An acknowledgment was received during the afternoon. The entertainment took the form of a tea, concert and distribution of gifts. Sir George Truscott was the host at tea, and the donors of gifts included the Lord Mayor, Sir Charles Wakefield, Lord Marshall, Sir Vansittart Bowater, Sir E. Hodder Williams, and many other

members of the Corporation of London. Mr. George Rooke Collingridge occupied the chair.

MR. FREDERICK A. YEO, formerly editor of the *North Western Daily Mail*, has died at Broughton-in-Furness.

A NEW newspaper, the *Echo National*, will make its appearance in Paris on January 10th devoted to the support of M. Clemenceau.

ST. BRIDE PRINTING SCHOOL held a successful Staff Dinner on Saturday at the Holborn Restaurant. A report is unavoidably held over till next week.

MR. EDWARD LEDGER, of Hampstead, lately proprietor of the *Era*, who died on September 24th last, left estate of the gross value of £450,359, with net personalty £444,090.

MR. LLOYD GEORGE has sent a message of regret and appreciation to the *Western Mail*, Cardiff, on the death, which occurred on Saturday, of Mr. J. M. Staniforth, for 32 years cartoonist on that paper.

IN the Christmas Number of *Pearson's Magazine* the most outstanding feature is "An Appreciation of Lord Kitchener," by the Right Hon. H. H. Asquith, P.C., M.P. Many excellent pages in colour are included.

MR. ARTHUR JAMES KNOWLES, M.I.C.E., only son of the late Sir James Knowles, the proprietor and editor of the *Nineteenth Century* died suddenly at Poperinghe on December 12th.

THE Pan-German journal *Deutsche Zeitung* has been banned for three months from the occupied territories of the Rhine by the Inter-Allied High Commission on the ground that the journal had published matter derogatory to the troops of occupation.

DURING the first six months of the present year printed books, papers (including music paper) imported into New Zealand were of the value of £210,000, in contrast with £222,000 the value of the quantity imported last year and £137,000 the amount in the corresponding six months of 1919.

At a meeting of the council of the Newspaper Proprietors' Association Lord Burnham, the chairman, moved a resolution, which was adopted, expressing the council's profound sympathy with Lady Pearson and her family, and the admiration and reverence of the council for all that the late Sir Arthur Pearson did in his great mission for the blind.

EXCESS PROFITS DUTY.—Captain Sir Rowland Blades asked the Chancellor of the Exchequer on Friday whether, in view of the public announcement that payment of excess profits duty may in approved cases be made over a term of years, he would consider the advisability of making the principle retrospective, so that some firms who would have come under this arrangement, but had already paid, and thereby seriously embarrassed the proper carrying on of their business, may be allowed to apply for a consideration of their case under the above scheme. Sir Robert Horne replied that the answer is in the negative.

## FORTY-THIRD YEAR.

*Printed and Published EVERY THURSDAY*  
by **STONHILL & GILLIS,**  
at 58, Shoe Lane, London, E.C. 4.  
**Tel.: Stonhill, Fleet, London. Phone: 8407 City.**

Discounts according to Number of Insertions.  
Representatives throughout the United Kingdom and  
also in Australia, India, South Africa, United States  
Canada, etc.

All communications for the "BRITISH AND COLONIAL  
PRINTER AND STATIONER" should be addressed and  
Cheques and Post Office Orders made payable to—  
**STONHILL & GILLIS, 58, SHOE-LANE, LONDON, E.C. 4.**

COPIES may be purchased at the Offices, as above  
or from Messrs. W. H. Everett and Son, Ltd., news-  
agents, 11, St. Bride-street, E.C. 4.

THURSDAY, DECEMBER 22, 1921.

## Current Topics.

### Christmas Greetings.

CHRISTMAS comes this year with a special welcome. It provides a timely relief from the anxieties of business which have been so pronounced during 1921. Few can recall a year which has been so full of anxiety. The allied trades have had their share of troubles, for depression in industry in general affects speedily and severely paper and print. Apart from the economic hindrances to trading, there has been political interference which has added burdens alike to employers and employed. Heavy taxation and financial obligations have been a crushing weight to carry, and on the other side manufacturers and master men have found orders dwindling away. Throughout the year the gloom has been unrelieved, and it deepened as the months passed, with unemployment following in its train. Happily there were signs during the waning of the year that trade and industry were reviving. After so long and so acute a period of depression, recovery is necessarily slow; but there appears to be

more than a pious hope that the outlook for 1922 is brighter. With that measure of promise in mind, may we all celebrate the coming Festival with hearty goodwill. In that spirit we offer our readers in all sincerity the familiar greeting, A HAPPY CHRISTMAS AND A PROSPEROUS NEW YEAR.

\*\*\*

### Paper Prices.

It is some little time since we ran over the market prices of papers in common use. As the level is now stabilised and unlikely to take on any further decided movement for some time, it may be advantageous to present average figures, always observing that small lots purchased from merchant's stock are inevitably so much dearer:— News offcuts 2½d. per lb., common printings 3d., foreign glazed tints 3d., seconds printings 3½d., fine printings 4d. to 4½d. per lb., esparto printings 5d., pure S.C. 3½d., M.G. poster (pure) 4½d., imitation art 4½d., common E.S. writings 3½d., seconds writings 3½d., fine writings 4½d. and pure esparto writings 4½d. to 5½d., common E.S. azure laids 4d. per lb., hard-sized azure laids 6½d., tub-sized ledgers 7½d. and upwards; duplicating papers 4½d. to 7d., coated art paper 6½d. to 9d., tinted E.S. writings 5½d. to 8d. per lb., English-made banks 4½d. to 5½d., tinted banks 5½d. to 6½d., English kraft £30 per ton, English G.I.P. 4½d. to 5d. per lb.

\*\*\*

### Paper Import Variations.

IMPORTS of paper and cardboard into Great Britain during November indicate varying fluctuations. The total figure, 712,308 cwts., marks a decrease of 85,708 cwts. compared with the previous month. Contrasted with November last year the decrease is 109,294 cwts., or 13·3 per cent. Compared with November, 1913, a lessened demand by consumers in this country is still manifest, there being a decline of 264,878 cwts., or 27 per cent. Paper and cardboard marking increases are packing and wrappings, 199,306 cwts., which represent 27·9 per cent. of the total and show an increase of 25,357 cwts. compared with November, 1920; strawboards, 243,152 cwts. (34·1 per cent.), an advance of 21,686 cwts.; other sorts, 30,148 cwts. (4·2 per cent.), an increase of 1,118 cwts., and stationery, 4,270 cwts. (5 per cent.), an increase of 1,334 cwts. The principal decreases comprise printings, the 177,192 cwts. (24·8 per cent. of the total imports), comparing with 302,394 cwts. in November last year, a decrease of 125,202 cwts.; millboards, 52,286 cwts. (7·3 per cent.), against 85,237 cwts. in November, 1920, a decrease of 32,951 cwts. The chief countries

supplying the British market during the month with printings, not coated, were: Sweden, 46,069 cwts., against 33,108 cwts. last year; Norway, 28,557 cwts., against 43,145 cwts.; Germany, 17,011 cwts., against 19,938 cwts., and Belgium, 3,183 cwts., against 800 cwts. last year. A noteworthy feature is the absence of any consignments of printings from Newfoundland during the month; twelve months ago she shipped 166,037 cwts. to the British market. With regard to packings and wrappings for the month a big increase is shown in the supplies from Sweden, her shipments representing 51.4 per cent. of the total quantity received, viz.: 102,556 cwts. This compares with 65,950 cwts. imported in November, 1920. Germany has also increased her supply this month, the 21,717 cwts. contrasting with 17,090 cwts. in November last year. In regard to values for the month the total quantity of paper and cardboard received represented £884,958, a decrease compared with the corresponding month of last year of £1,281,725, or 59.1 per cent., and an increase compared with November, 1913, of £269,130, or 43.7 per cent. The average c.i.f. price per cwt. of the imports of paper and cardboard during the month records a decline of 52.8 per cent. compared with November last year, and an increase of 97.3 per cent. compared with November, 1913. The quantity received during the eleven months of the present year amounted to 6,046,402 cwts., a decrease compared with the corresponding eleven months of 1920 of 622,396 cwts., or 50.7 per cent., and compared with the pre-war year a decrease of 5,747,540 cwts., or 48.7 per cent. The principal classes of paper and cardboard imported during the eleven months were: printings, 2,439,409 cwts. (40.3 per cent. of the total); strawboards 1,524,266 cwts. (25.2 per cent.), and packings and wrappings, 1,305,798 cwts. (21.5 per cent.). In printings Sweden and Belgium are the only two countries that have increased their supplies, viz., 523,377 cwts., as against 493,464 cwts. in the case of the former country, and 68,051 cwts. as against 17,458 cwts. in the case of the latter. The total value of the imports for the eleven months amounted to £10,565,570 for the present year, showing a decrease of £17,996,496, or 63 per cent., compared with Jan.-Nov. last year, and an increase compared with the corresponding period of 1913 of £3,523,894, or 50 per cent.

SUNDAY night's service at St. James's Church, Paddington, took the form of a memorial service to the late Sir Arthur Pearson.

## Personal.

LORD RIDDELL sails from New York on the "Orbita" today Thursday.

LORD RIDDELL was entertained last week as a guest of honour by the representatives of the World's Press assembled at Washington for the Disarmament Conference, 150 journalists of all nationalities being present. An engraved silver box was presented to Lord Riddell as a token of their appreciation of his courtesy as intermediary between the British delegation and the Press.

MR. DAVID GREENHILL, president of the Home Counties Alliance of the Federation of Master Printers has taken advantage of the approaching season of good will to follow up the Alliance's propaganda work by addressing a personal letter to every printer in the Alliance area. We understand a large number of interesting replies have been received.

THE Provost of Eton College, Dr. Montague Rhodes Jones, gave an interesting address on "Forgotten Books" to the members of the Livery of the Worshipful Company of Stationers at their monthly meeting on Wednesday of last week.

MR. WALTER T. LAYTON has been appointed editor of the *Economist*, and he will take up his duties early in the new year.

COLONEL ROBERT LORRAINE and Mr. C. B. Cochrane were the guests of the London Press Club at the theatrical dinner on Saturday night, when Mr. Edgar Wallace presided.

DURING the evening the billiards challenge cup given by Sir Douglas Straight was handed to this year's winner, Mr. Frank G. Lavers.

IN the last open competitive examination held by H.M. Stationery Office for the position of Assistant Examiner, a student at the L.C.C. School of Photo-Engraving and Lithography, Bolt-court, Fleet-street, Mr. L. A. Haylett, was one of the two successful candidates. Mr. Haylett also holds a first-class certificate for paper manufacture, which he gained in the last City and Guilds final examination.

MR. TOM PRATT, of Grantham, in celebrating his 80th birthday, has completed also 65 years' unbroken service as a compositor on the *Grantham Journal*.

MR. W. H. ALDERMAN has completed 64 years' service as a compositor with Messrs. Straker Brothers, Ltd., Bishopsgate, E.C. He is a candidate at the election in March next for the Printers' Pension Fund.

## DIVIDENDS AND REPORTS.

**BENN BROTHERS, LTD.**—Benn Brothers, Ltd. has declared a dividend of 5 per cent., payable Jan. 1st, 1922.

**WATERLOW AND SONS, LTD.**—Net profit of Waterlow and Sons, Ltd., for year ended Sept. 30th, 1921, after making provision for bad and doubtful debts and corporation tax and allowing for depreciation and replacement of machinery and plant, was £240,565 plus £58,760 brought forward, making £299,325. Directors recommend final dividend on Deferred Ordinary shares of 10 per cent., making 12 $\frac{1}{2}$  per cent., placing £60,000 to reserve, rising that fund to £400,000, carrying forward £90,375.

**MERGENTHALER LINOTYPE.**—Report of Mergenthaler Linotype Company for year ended Sept. 30th, 1921, states net gain was \$2,313,469. The new Brooklyn factory is complete, fully equipped and organised and operated to effect savings in labour and cost and giving increased output. Company is in sound and prosperous condition, but future contains so many uncertainties at home and abroad that surplus must be conserved.

**KELLY'S DIRECTORIES, LTD.**—Kelly's Directories, Ltd., announces interim dividend of 10

per cent. per annum, less tax, on the Ordinary shares, payable Jan. 2nd. The interim distribution at this time last year was at the rate of 5 per cent. per annum, less tax.

**SUN PAPER MILL.**—In report for year ended November 26th directors say balance available for distribution is £21,323. Dividend will be fixed at meeting of shareholders on December 21st.

**ASSOCIATED PAPER MILLS.**—Report of the Associated Paper Mills states that negotiations are still in progress with authorities in connection with adjustment of liability for excess profits duty, and until this matter is settled directors have decided to postpone presentation of accounts.

**CARRON GROVE PAPER CO., LTD.**—Net profit of Carron Grove Paper Co. for year ended October 29th, 1921, after maintaining mill and machinery and providing for depreciation and corporation tax, was £19,173, plus £11,829 brought in, making £31,002. Directors propose dividend on ordinary shares of 2s. 6d. per share (free of tax), carrying forward £14,952. Provision has been made in balance-sheet for fall in values which has taken place, and the company has no further outstanding commitments for raw materials ahead.

## NEW COMPANIES.

**HOUGHTON PRESS.**—The Houghton Press, Ltd., has been registered as a "private" company with a nominal capital of £15,000 in £1 shares. Object: To take over the *Sunday Sportsman*, to adopt an agreement with T. A. Edge and to carry on the business of newspaper proprietors, printers, publishers, etc. First directors: J. F. Sutton, H. A. N. Andrews, C. H. Edge and T. A. Edge. T. A. Edge is manager and editor of company's publications. Registered office: 9a, Houghton-street, Aldwich, W.C.2.

**JOSIAH CLARK AND SON, LTD.**—Capital £2,000 in £1 shares; to acquire the business carried on by H. R. Clark as "Josiah Clark and Son," at 51, Chapel-street, Devonport, Plymouth, and to carry on the business of printers, lithographers, stereotypers, electrotypers, etc. Private company. First directors: H. R. Clark, A. C. Clark and J. P. Heath. Registered by Shaw and Sons, Ltd.

**WYVERN PRESS, LTD.**—Capital £500 in £1 shares; printers, lithographers, stationery, paper agents, etc. Private company. Subscribers: A. E. Barwood and W. J. Pavyer. Registered office: Southampton House, 317, High-street, Holborn, W.C.1.

**GEO. STEWART AND CO., LTD.**—Capital £31,500 in £4,500 preference, 1,500 employees and 25,500 ordinary shares of £1 each; to take over the business carried on by George Stewart and Co., manufacturing stationers, 92, George-street, Edinburgh. Private company. Subscribers: G. D. Stewart, W. H. Imrie, J. S. Clarkson, W. Ritchie, W. G. Walker, Mrs. M. Stewart and Miss B. Stewart. First directors: G. D. Stewart, J. S. Clarkson and W. Ritchie. Registered office: 92, George-street, Edinburgh.

**MANES BOX LIDS, LTD.**—Capital £20,000 in £1 shares; advertising contractors and agents, publishers, printers, paper and cardboard manufacturers, importers, exporters and manufacturers of and dealers in cardboard, metal and wooden boxes, cases, paper, pulp and pulp products, etc. Subscribers: W. P. Bull, K.C., G. W. Clay, S. J. S. Parker, A. West, Emma Dollin, G. Wishart and A. W. Sparling. First directors: W. P. Bull, K.C., and R. M. F. Robertson. Registered office: Trafalgar Buildings, 1, Charing Cross, S.W.2.

**DAVIES, LAZARUS AND CO., LTD.** (London).—Capital £10,000 in £1 shares; to acquire the business carried on at 261, Cambridge-road, E., as Davies, Lazarus and Co., to adopt an agreement with David Dombrowski and to carry on the business of manufacturers of folding and rigid cardboard boxes, paper merchants and manufacturers, printers, manufacturers of and dealers in printing inks, bronze powders, stationery, etc. Private company. Subscribers: David Dombrowski and P. F. Money. First directors: David, Lazarus, Ralph and Joe Dombrowski.

**WITT AND WESTLEY, LTD.**—Capital £2,500 in £1 shares (1,000 10 per cent. cumulative preference); to take over the business carried on by A. E. Westley, as "Witt and Westley," and to carry on the business of manufacturers of and dealers in photographic mounts, albums, frames, materials and stationery, cardboard articles, etc. Private company. Subscribers: A. E. Westley and A. V. Finch. First directors: A. E. Westley and three by subscribers. Registered office: Osda House, 13, Bishop's-court, Old Bailey.

**JOSEPH BRUCE, LTD.**—Capital £3,000 in £1 shares; to take over the business of a dealer in paper hangings, and oil, paint, varnish and brush merchant carried on by J. Bruce at 26, Ainsworth-street, Blackburn, as the "Regent Wallpaper Warehouse." Private company. First directors: J. Bruce and C. Crabtree. Registered office: 26, Ainsworth-street, Blackburn.

**DOG WORLD, LTD.**—Capital £15,000 in £1 shares (5,000 7 per cent. preference and 10,000 ordinary); printers and publishers of the *Dog World*. Private company. Subscribers: F. Carl and G. R. Jeffs. Registered office: 54, Fetter-lane, E.C.

**LONDON AND PROVINCIAL SPORTING NEWS AGENCY, LTD.**—Capital £1,000 in £1 shares; to adopt an agreement with F. Truman and to carry on the business of a sporting news and press agency. Private company. Subscribers: F. Truman and A. L. Foster. Registered office: 27, Poland-street, W.

**BANNOCK AND CO., LTD.**—Capital £200 in £1 shares; agents, concessionaires and merchants, manufacturers of boxes and cases wholly of card, wood, metal or otherwise, printers, publishers, stationers, etc. Private company. Subscribers: D. Ventura and J. B. Austin. First directors: D. Ventura and A. F. Rourke. Registered office: 6, New Compton-street, W.C.2.

**C. E. PLUMMER, LTD.**—Capital £2,500; to take over the business of booksellers, stationers, dealers in toys, etc., carried on by C. E. Plummer and R. H. Plummer, at 57, 57A and 57B, New King's-road, Fulham, and 89, Pimlico-road, S.W., as "C. E. Plummer and Co." Private company. First directors: C. E. Plummer, R. H. Plummer and W. J. Crawley. Registered office: 57A, New King's-road, Fulham, S.W.6.

### COMPANY MORTGAGES AND CHARGES.

Fresh Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 1908, and Satisfaction registered pursuant to Section 97 of the same Act. (The registration of Satisfaction is not compulsory).

**ANCHOR PRESS, LTD.**—Particulars of £25,000 debentures authorised by resolutions of November 29th and December 1st, 1921; whole amount issued; charged on the company's undertaking and property, present and future, including uncalled capital.

**MATLOCK AND DISTRICT BILLPOSTING CO., LTD.**—Satisfaction in full on November 29th, 1921, of mortgage dated August 3rd, 1920, securing £450.

**AVENUE PRESS, LTD.**—Satisfaction in full on November 3rd, 1921 (a) of charge dated March 6th, 1917, securing any moneys owing by company and L. Upcott Gill and Son, Ltd., to bank and (b) of equitable charge dated March 6th, 1917, securing £4,500.

**THOMAS DE LA RUE AND CO., LTD.**—A trust deed dated November 26th, 1921, has been registered, to secure £1,200,000 8 per cent. mortgage debenture stock, repayable at 105 per cent. Property charged: Freehold and leasehold hereditaments and properties in St. Luke's, E.C., Ash (Surrey), Walthamstow, Enfield, Kensington and Shoreditch, and the company's undertaking and property, present and future, including uncalled capital, subject to a trust deed dated December 21st, 1911. The trustees for the debenture stock holders are the Law Debenture Corporation, Ltd. Six and a half per cent. commission is payable on £800,000, part of the above debenture stock, issued to the public.

**CHARLES GOODDALL AND SON, LTD.**—A trust deed dated November 26th, 1921, has been registered to secure all moneys which

the company may be liable to pay under the joint guarantee with J. A. Weir, Ltd., of £1,200,000 debenture stock of Thomas De La Rue and Co., Ltd. Property charged: The company's undertaking and property, present and future, ranking after £52,400 first mortgage debentures secured by trust deed dated May 15th, 1907.

**W. HOLMES AND SMITH, LTD.**—Charge on Otto Printing Works, Ulverston, Lancs, and company's undertaking and other assets, present and future, dated December 5th, 1921, to secure all moneys, not exceeding £7,000 which the mortgagees may pay under their guarantees to company's bankers. Holders: J. F. Benyon, 11, Union-street, Ulverston, and others.

**MAGNET PRINTING CO., LTD.**—Land Registry Charge on Victoria Works, Manor-road, Stoke Newington, dated December 5th, 1921, to secure £700. Holders: Mrs. L. Holsworth, Dunelm, Green Lanes, Palmer's Green, N.

**REAY GEARWORKS, LTD.** (manufacturers of and dealers in gear wheels, of metal, paper, fibre, etc., Gateshead).—Issue on November 28th, 1921, of £200 debentures, part of a series already registered.

**GERRARDS, LTD.** (printers, stationers, etc., London, W.).—Particulars of £1,500 debentures authorised November 24th, 1921; whole amount issued; charged on company's undertaking and property, present and future.

**THROSTLE CO., LTD.** (manufacturers of paper bags, manufacturing stationers, etc., Walthamstow).—Debenture dated November 16th, 1921, to secure £750, charged on company's property, present and future, including uncalled capital. Holder: C. H. Irons, 143, Essex-road, Leyton.

**WARBEY'S STORES, LTD.** (stationers, dealers in fancy leather goods, toys, etc.).—First mortgage debenture dated November 23rd, 1921, to secure £1,000. Charged on the company's undertaking and property, present and future, including uncalled capital. Holder: E. H. Hawkins, 4, Charterhouse-square, E.C.

**UNITED NEWSPAPERS (1918), LTD.**—Trust deed and Land Registry Charge both dated November 28th, 1921 (supplemental to trust deed dated March 28th, 1919), to secure £140,000, balance outstanding of £220,000 4½ per cent. first mortgage debenture stock; also Trust Deed and Land Registry Charge of even date (supplemental to Trust Deed dated March 29th, 1919), securing £200,000 5 per cent. second mortgage debenture stock; charged on 77 and 78, Fleet-street, E.C., and benefit of covenants and stipulations as to building and otherwise, contained in company's banks conveyances. Trustees: F. Lloyd and H. Lloyd, 4-7, Salisbury-court, E.C. Also Land Registry Charge on 8, Salisbury-court, E.C. (ranking in priority to above original deeds) dated November 28th, 1921, to secure £20,000. Holders: H. Lloyd and Col. J. R. Garwood, Coombe Farm, Croydon, Surrey.

**CONTINENTAL A.B.C., LTD.**—Two mortgages dated November 16th, 1921, to secure £259 10s.

and £152 os. 6d., respectively, charged on company's book debts. Holders: Charles Humphries and Co., 36, Basinghall-street, E.C., and D. E. G. Reeve, 22, Mount-street, Grosvenor-square, W. Also deposit on same date of deeds of 22, Mount-street, Grosvenor-square, W., to secure £623. Holder: C. Humphries, 36, Basinghall-street, E.C.

**W. AND G. FOYLE, LTD.** (Printers, etc., London).—Particulars of £2,000 debentures authorised September 29th, 1921; whole amount issued; charged on company's undertaking and property, including uncalled capital subject to prior debentures and mortgage.

**TUCKER MANUFACTURING CO., LTD.** (Stampers founders, manufacturers of duplicating apparatus, typewriting accessories, etc., Harlesden).—Particulars of £6,000 debentures authorised November 30th, 1921; whole amount issued; charged on the company's property, present and future, including uncalled capital.

**HEFFER SCOTT AND CO., LTD.** (Wallpaper merchants, etc., London).—Charge on certain properties in Barnsbury Park, N., and Berners-street, W., dated November 10th, 1921, to secure £5,500. Holders: F. C. Heffer, Inkerman, Shelley-road, Worthing, and others.

**TRUMAN AND KNIGHTLEY, LTD.** (Educational agents, etc., London).—Debenture dated December 1st, 1921, to secure £1,500, charged on company's undertaking and property, present and including uncalled capital (if any). Holder: A. W. Andrews, 113, Mount-street, W.

**WINSOR AND NEWTON, LTD.** (Manufacturers of and dealers in artists' colours, etc.).—Mortgage and Land Registry Charge on certain lands and premises in Kentish Town and St. Pancras, both dated November 29th, 1921, to secure £12,000. Holders: Prudential Assurance Co., Ltd.

### BANKRUPTCIES, etc.

**Re OSCAR WOODBURY ENGLAND** (trading as W. England and Son), printer, 264a, King-street, Hammersmith. This debtor attended at the London Bankruptcy Court on Dec. 15th, before Mr. Registrar Hope for public examination upon accounts showing liabilities £1,038 against assets valued at £617. Replying to Mr. E. Parke, official receiver, the debtor stated that while he was in the army the business fell away and had since been carried on with the aid of borrowed money.

We are informed by Messrs. Elliott, Baxter and Co., of Memorial Hall Buildings, Farringdon-street, E.C.4, that they have been appointed agents for London and the South of England, for Messrs. Wm. Macintyre, jun., and Co., Ltd., of Paisley, whose coated boards, chromo and enamel papers, etc., are well-known. All friends of Mr. Buchanan will be pleased to hear that he is not altogether retiring from London for the next few months, and he will be in close touch with Messrs. Elliott, Baxter and Co., whose telephone number is Central 3729.

## Gazette.

### A WORD OF CAUTION.

In giving the official Gazette information, it must be distinctly understood that we take official records as we find them, and accept no responsibility for inaccuracies, while, as an almost invariable rule, the facts will be found correct. We advise our readers, before forming hasty judgment, to consider that there may be in each case satisfactory explanation which does not appear on the records.—Ed.]

### ENGLAND AND WALES.

#### PARTNERSHIP DISSOLVED.

Harry Cooper and Francis John Wright, card manufacturers, 4, Lauderdale-buildings, Aldersgate-street, E.C.

#### THE BANKRUPTCY ACT, 1914.

##### RECEIVING ORDER.

Samuel George (trading as Power Book Co.), 44, Harrington-road, South Kensington, author and publisher. December 14th.

## Olive's Heavy Loss.

Accounts of Olive's Paper Mill Co. made up to July 23rd, 1921, including trading carried on by Olive Brothers on behalf of company from January 1st to the July 23rd, 1920, show loss, after charging bank and debenture interest, directors' and trustees' fees, income tax, and allowing £31,091 for depreciation of buildings and plant, of £70,792. Stocks of paper and raw material have been brought in at cost or market price, whichever was lower, and directors feel that, given revival of trade, the company should be able to go forward and make profits. Claim for excess profits duty has been made by the authorities upon profits made between January 1st and July 23rd, 1920. This claim, however, is being resisted, and no provision has been made for this contingency in accounts. The directors have in preparation claim for repayment of excess profits duty.

According to the balance sheet sundry creditors figure £216,359, of which £131,104 is bankers' overdraft, £43,202 bills payable, and £41,720 open accounts. On the other hand sundry debtors figure at £54,429, but there are items connected with formation expenses, among the "assets" for £33,811. Goodwill is £10,812, investments at cost £251, and cash in hand £373. Sanction for additional £100,000 borrowing powers is asked for.

UNDER the failure of Mr. John B. Macnaughton, paper merchant, Glasgow, a meeting of creditors was held on the 9th inst., when it was agreed to wind up the estate under the trust deed in favour of Mr. John Duncan (Messrs. Thomson M'Lintock and Co., chartered accountants, Glasgow. A committee was appointed.

## Messrs. John Dickinson and Co., LIMITED.

### Cinema Film in Sheffield.

The first of a series of lectures organised by the Joint Industrial Council of the Printing and Allied Trades of the United Kingdom was held in the Nether School-room, Sheffield, recently. The lecturer was Mr. F. Heckford, chemist to Messrs. John Dickinson and Co., Ltd., who exhibited a film of their famous paper, board and coating mills. The chairman was Mr. T. Dove, vice-president of the Sheffield Advisory Committee, who, in introducing Mr. Heckford, said the lectures were an innovation. He also spoke of the excellent work which the Joint Industrial Council was doing, and asserted that it was fostering a spirit of comradeship between employer and employee.

There were about 300 members and friends present at the lecture, including master printers, employees, and council officers.

Mr. Heckford, with his lucid and interesting description of how paper is made, held the audience with the simplicity of his method and style of explanation. He first outlined the process and principle of paper manufactured, then showed with racy comment the film mentioned, and afterwards revealed to the audience how many of the papers they used in their daily work were manufactured. He accompanied this by making a tiny sheet of paper, which called forth the comment that it looked like a conjuring trick.

A number of questions were put and answered, and much good humour was shown when the lecturer, confessing his ignorance of the figure size of quad crown and the length in feet of a paper machine, dryly turned to the chairman for information.

The hearty vote of thanks accorded the lecturer was proposed by Mr. W. A. Townsend, and seconded by Mr. J. Swain, joint secretary.

In replying, Mr. Heckford said he appreciated the honour conferred upon him as the first lecturer of the series.

Mr. Edgar J. Northend, of the firm of Messrs. T. Northend, Ltd., and a secretary to the Council who plays a very active part in the work, spoke most ably on the vital necessity of the members taking sufficient interest in making the organisation a successful one.

On asking if those present intended attending the next lecture on Friday, December 9th, the entire audience assented, and a most successful inaugural meeting concluded with an exhibit of beautiful film pictures of Switzerland.

THE death of Mr. Andrew Elliot, Edinburgh's nonagenarian publisher, removes an interesting link with the literary life of Scotland during the middle and latter half of last century. Mr. Elliot was Robert Louis Stevenson's first publisher.

## Lendrum Athletic Club.

### Big Night at the Stationers' Hall.

The Social Committee of the Lendrum Athletic Club carried out their most ambitious programme so far at the Stationers' Hall, on Thursday the 8th instant, when there took place under their auspices a social evening which embraced progressive whist, dancing, and a variety of musical items. It required no small amount of courage to hire the whole of the suite of handsome rooms of the Stationers' Company for such a purpose, but those who were responsible for the arrangements planned and carried them out so well that the function was both a financial and a social success. Close upon 300 members of Lendrum's Club and their friends attended and a thoroughly enjoyable evening was spent.

Dancing took place in the Hall itself, appropriate music being provided by the Leslie Orchestra. This part of the programme went with a fine swing for the whole of the evening.

In the ornate Card Room the whist drive was held under the direction of Mr. C. Caldwell as M.C., terminating at 9 o'clock, thus enabling the players to share in the other phases of entertainment in the large hall. There were 24 tables and Mr. E. S. Lendrum had generously provided handsome prizes. These were presented by Mrs. A. Nicholson, sister of Mr. Lendrum, to the following winners:—1st lady, Miss G. Tietjen (a case of silver tea knives and forks); and lady, Mrs. R. Brinkworth (a salad bowl and silver servers); 1st gentleman, Mr. G. W. Lamb (silver cake basket); and gentleman, Mr. J. Knopp (silver jam frame and cut glass jars). The hidden number prizes went to Miss White and Miss McConachie, a pendant and chain each. The booby prizes went to Mr. H. Forest and Mr. E. P. Lamb. The spirit of humour which prevailed throughout the evening characterised the selection of the booby prizes, for after undoing a box elaborately filled with paper, the prize, was found to be a miniature pipe and tobacco pouch, intended for the lady, while the gentleman's, which was described as being worth a guinea, took the form of a well known patent medicine.

The musical items presented during the evening were on a high level and formed a pleasant interlude to the dancing. These arrangements, as also the direction of the dance programme, were in charge of Mr. A. P. Jackson, who, together with Mr. W. Cargill and Mr. R. E. Cook, had done so much in the preparation of the details and their carrying out to make the evening such a success. The first musical item, which inaugurated the evening's festivities, appropriately took the form of the Prologue from *Pagliacci*, which was sung by Mr. C. Jackson from the gallery overlooking the grand hall. Others who entertained the company at intervals were Mrs.

A. Nicholson (contralto), Miss Ruby Jenkins (soprano), Miss Frances Nickawa (Cree Indian, an exponent of Pauline Johnson, the Canadian authoress), Miss Peggie Clarke (soubrette), and Mr. H. Nickolds (humorist). The efforts of these artistes, which were of a high order, were warmly appreciated and encores were invariably demanded. A special word should be said about Mr. A. P. Jackson and Mr. R. D. Fiddler, who, with Master J. Brinkworth, were responsible for the final item on the musical programme. This consisted of an original sketch written by Mr. Jackson himself. The sketch was really funny and well done, and it sent the company home with the feeling that a high level of entertainment had been maintained throughout. Among the topical allusions in the sketch was the definition of the paper merchant's favourite flower, viz., "stocks," and the remark that the audience were recognised as paper people because they looked so glum!

During an interval Mr. Jackson took the opportunity of proposing a hearty vote of thanks to Mrs. Nicholson for presenting the prizes and to Mr. Lendrum for providing them, and the resolution was very warmly carried.

Mr. Lendrum, on coming forward to acknowledge the vote, met with a very enthusiastic greeting from his very large family and made a happy little speech by way of acknowledgment. He expressed his own thanks to the Social Committee of the L.A.C., who had organised that successful gathering and expressed the hope that they would see more of them. He went on to make a few humorous references to the present difficult times through which the country is passing, mentioning the fluctuations of the German mark and the fact that people who bought paper with avidity at £100 a ton sold it with equal avidity for £30. One of the striking incidents of the times, added Mr. Lendrum was the fact that Ireland wished to separate herself from the United Kingdom and the act of severance was acclaimed by the people of this country. In the existing conditions, which sent them home with a fit of the "blues" three times a week, one felt all the better for spending an evening as they had done that night, and he congratulated the Lendrum Athletic Club on the success of their efforts.

The large gathering represented all the departments of Lendrum's Ltd. (offices and wharves), among those present being:—Messrs. J. F. Sutton, T. C. Bailie, G. H. Hoffman, and W. Page (London); Messrs. D. McGowan and A. S. Lowry (Manchester); Messrs. R. Manson and A. B. McDonald (Glasgow and Edinburgh), while the visitors included: Mr. Norville Grahame, Captain F. W. Hartman, Mr. and Mrs. Wilson, Miss M. Lendrum, Miss L. Lendrum, Mr. A. W. Willis and Mr. O. B. Nelson.

In addition to all the pleasures of whist, dancing, and vaudeville, the company were well looked after in regard to refreshments, which were on a generous scale.

AN Advertisement is always working.

## Indian Tariff.

### Paper and Papermaking Materials.

The first and, from the point of view of the British manufacturer, the most important of the new measures for additional taxation is the increase of Customs duties on imported goods. In a general review recently published of the conditions and prospects of British trade in India, by Mr. Thomas M. Ainscough, O.B.E., Senior Trade Commissioner in India and Ceylon, there is included the new tariff schedules in force from March to December, 1921, which give the actual rate of duty and also the tariff valuation of the various articles. It is hoped that this may be of practical use to British shippers.

### Paper, Pasteboard and Stationery.

Trade catalogues and advertising circulars imported by packet, book, or parcel post—free.

Paper and articles made of paper and papier maché, pasteboard, millboard, and cardboard of all sorts, and stationery, including ruled or printed forms and account and manuscript books, drawing and copy books, labels, advertising circulars, sheet or card almanacs and calendars, Christmas, Easter and other cards, including cards in booklet form; including also waste paper and old newspapers for packing; but excluding trade catalogues and advertising circulars imported by packet, book, or parcel post—11 per cent. *ad valorem*.

### Printing Materials, etc.

Printing and lithographing material, namely, presses, type, ink, aluminium lithographic plates, brass rules, composing sticks, chases, imposing tables, and lithographic stones, stereo blocks, roller moulds, roller frames and stocks, roller composition, standing screw and hot presses, perforating machines, gold blocking presses, galley presses, proof presses, army presses, copper plate printing presses, ruling machines, ruling pen making machines, lead and rule cutters, type casting machines, typesetting and casting machines, rule bending machines, rule mitring machines, bronzing machines, leads, wooden and metal quoins, shooting sticks and galleys, stereotyping apparatus, metal furniture, paper folding machines, and paging and numbering machines, but excluding paper—2½ per cent. *ad valorem*.

Prints, engravings and pictures, including photographs and picture cards—20 per cent. *ad valorem*.

MESSRS. RELPH, DARWEN AND PEARCE, of 76, Finsbury-pavement, London, E.C.2, have been appointed sole agents for the United Kingdom for the Jacob Oechelhaeuser G.m.b.H. Papierfabrik Siegen i. W., whose specialities comprise cover papers, felt papers, needle papers, etc.

Replies to Box Nos. to be addressed to the Offices: "BRITISH AND COLONIAL PRINTER AND STATIONER," 58, SHOE LANE, LONDON, E.C.4.

## SPECIAL PREPAID ADVERTISEMENTS

**SITUATIONS WANTED.**—Special Rate for Operatives only: One Shilling and Sixpence for Twenty-One Words and One Penny per Word after. Minimum charge One Shilling and Sixpence. Cash to be sent with order.

**ADVERTISERS**, by paying an extra fee of Sixpence, can have replies addressed to the Office of this Journal under a number, and such replies will then be forwarded post free.

Telegrams: STONHILL, FLEET, LONDON.  
Telephone: No. 8407 CITY.

## Miscellaneous.

**TECHNICAL WRITERS** on Subjects of Interest to the Printing and Allied Trades are invited to communicate with Box 13870.

**WASTE PAPER: ITS RECOVERY AND RE-MANUFACTURE.** By Jas. Strachan. A Fund of Information; price 12s. 6d.—Stonhill and Gillis, Publishers, 58, Shoe-lane, London, E.C.4.

**BUCHANAN'S EQUIVALENT WEIGHT CALCULATOR.** A Time-saving Pocket Companion for Papermakers and Paper Users. Standard size (12-in. long), in boxwood; £2 2s.—Stonhill and Gillis, Publishers, 58, Shoe-lane, London, E.C.4.

## Rating of Machinery.

A deputation, introduced by Lord Southwark, was received by Sir Alfred Mond at the Ministry of Health last week, and asked that the law in England and Wales on the rating of machinery should be put on the same basis as the law in Ireland and Scotland. Sir Alfred Mond pointed out that the question, which was an old one, whether machinery which was not attached to the building should be exempted from rating was complicated, and he could not make any definite statement as to what would be done. He promised to give the matter his careful consideration.

It was stated at Shoreditch County Court on Thursday that a tenant sent an advertisement to a newspaper for "Unfurnished rooms wanted," but, wrongly classified, it appeared in the "To let" column. The tenant complained that there was a queue, including policemen, firemen, all sorts of liverymen, men with cycles, and women with perambulators. (Loud laughter.)

PRINTED books exported from Switzerland during the first six months of the present year amounted to 2,329, as against 2,728 last year and 5,555 for the year before. The figures represent 100 kilos.

MESSRS. RAPHAEL TUCK AND SONS, LTD., send us a copy of the "Royal Romance" calendar for 1922, which they have just published in honour of the engagement of H.R.H. Princess Mary and Viscount Lascelles, D.S.O. A handsome cream bevelled board bears a design comprising portraits of the engaged couple produced by photogravure from a copper plate. The calendar proper hangs by dainty ribbon attachment, and the whole has a very pleasing effect. The published price is 2s.

FLEETWAY PRESS DANCING AND ATHLETIC CLUB.—A dance was held at the Veteran's Club, Hand-court, Holborn, on the 7th inst., under the auspices of the Fleetway Press Social and Athletic Club. During the evening the dances were interspersed by songs rendered by the Misses G. Kingsland, and G. Turner, and Mr. F. Damen. Mr. W. Kingsland very ably acted in the capacity of M.C. The event was the first of the season and was in every way successful.

**PUBLIC ARBITRATIONS UNDER INDUSTRIES ACT.**—The Board of Trade have been in communication with Mr. Cyril Atkinson, K.C., the referee appointed by the Lord Chancellor under section 1 (5) of the Safeguarding of Industries Act, with regard to the admission to arbitrations, and it has been decided that the hearings shall be open to the public except when, in the referee's opinion, special circumstances require their exclusion.

The composing-room staff of the *Star* held their annual dinner the other day at the London Tavern. The chair was occupied by Mr. G. Howard, Father of the Chapel, and among the guests of the Companionship were Mr. B. F. Crosfield, director; Mr. Murch, the superintendent of staff; and the editor of the *Star*. A very pleasant evening was spent, with a minimum of oratory and a great deal of good music.

# New Inventions.

## Delivering Printed Sheets.

A sheet-delivery apparatus, invented by Mr. C. Winkler, consists of the combination with sheet receiving tapes driven periodically at two different speeds as described in Specification 102,122 of a drop-sheet delivery apparatus of the kind in which endless tapes are carried by a pair of shafts adapted to be reciprocated in planes one above and one be-

low the delivery table, the tapes having an independent movement round the shafts to deliver the sheet. As shown, the tapes *c* receive the sheets from the impression cylinder at the surface speed of that cylinder and transfer them at a reduced speed to endless tapes *k* passing round guide rollers *m*, *m*<sup>1</sup>, *m*<sup>2</sup>, *m*<sup>3</sup>, *m*<sup>4</sup> and shafts *l*, *l*<sup>1</sup> which are secured to endless chains *n* which are oscillated by the spur-wheel *h* on the oscillating impression cylinder, spur-wheel *h*<sup>1</sup>, and sprocket-wheels *o*, *p*. The chains *n* are guided by rollers *q*, *r*, *s*, *t*.

## Folding Paper.

In an invention by the Vogtlandische Maschinen Fabrik the gripper blade of a rotary folding cylinder is formed of three independently movable parts so arranged as to grip the fold at substantially equal pressure

along its length irrespective of varying thickness of the product along the fold line. The construction is particularly for use in transversely folding sheets which have been folded longitudinally. In one construction, a rock-

shaft 4, operated by an arm 5 and grooved cam 7, carries the central part 8 of the gripping blade and has loosely mounted upon it at each end a two-armed lever 11, the ends 11<sup>1</sup> of which coact with the blade 8 to grip the fold against the edge 3 of the cylinder wall. The arms 11 are connected to spring rods 12 which hold the parts 11<sup>1</sup> in gripping position and allow them to adapt themselves to the thickness of the fold. Arms 10 fixed to the shaft 4 act on the arms 11 to open the parts 11<sup>1</sup> when the blade 8 is opened. In a modification, the spring rods 12, instead of being supported in the wall of the cylinder as shown, are supported in a member fixed to the shaft 4 so that the ordinary opening movement of the parts 11<sup>1</sup> is effected freely.

## Envelope Making.

Mr. R. Hargreaves has patented an envelope blank which is formed with projections 13, 14, 15 on the body 10, side flaps 11, and centre flap 12 respectively, so that, when the blank

is folded on the dotted lines, these parts coincide and project from the body of the envelope and may be secured by a staple. Flaps 17 on the body portion 10 are provided to hold the contents in place. To open, the overlapping portions are torn away.

## Dust-Proof Cloth.

A German patent has been granted to Albert Stanger, of Schweighausen in Alsace, for a process of making cloth dust-proof by felting the cloth with mechanical wood pulp or chemical pulp. If the paper stuff is simply formed on the surface of the cloth it is easily pulled off, therefore the fibres must have their ends stuck into the cloth. The inventor utilises the Fourdrinier wire part of a paper machine, the cloth to be treated taking the place of the wire, the stuff is dammed back im-

mediately it reaches the web and the wire part is given a strong vertical vibration whereby the water falls through the cloth carrying the fibres vertically into it. On its further journey the fibres are laid along the cloth surface and the passage over the suction boxes completes a thorough felting.

### Corrugated Paper.

Mr. A. Aviss has patented a method whereby in the manufacture of backed corrugated paper, cardboard, etc., fixed parallel wires 13, which pass between the corrugated rollers and are secured at their extremities, bear

against the corrugated paper and retain it in engagement with the corrugated roller 1 during the application of adhesive by rollers 7, 8 and until it reaches the nip of the plain roller 10 by which the backing 11 is applied.

### Blotting Paper.

In an appreciation of German-made blottings appearing in No. 82 of the *Papier Zeitung* one reads that "it is not so long since in Germany, if one would have something really good, one demanded English blotting paper. Only with difficulty could the home mills specialising in this sort of paper get a footing in their own land. For long they had to wrap their goods in imitation of the English makes, as the public had no faith in German blotting paper. The mill traveller must have smiled when he saw how eagerly the good German paper was bought as English and retailed by the dealer as 'real English.'"

The writer thinks that the hankering after foreign goods had much to do with the difficulty, but doubtless the good service rendered by the English goods was the determining factor, and unfortunately this country has had to suffer from the same methods as above indicated.—M.A.

### COMPLETE SPECIFICATION OPEN TO PUBLIC INSPECTION BEFORE ACCEPTANCE.

1921.

- Finzi, T. Mode of construction of figurines made of paper, generally of one piece only, by means of cuttings and foldings. 172,031.

**IMPROVED PRINTING.**—Newly-issued Christmas numbers of the various periodicals illustrate the great developments that have taken place in this form of journalism in the last 25 years. The Christmas numbers of the past were generally esteemed because they contained two or three plates reproducing famous pictures of the day, but the latest ones are ablaze with the triumphs of modern colour printing.—*Daily News*.

## Paper Prices and Prospects.

It must be obvious to the most pessimistic that a universal state of trade stagnation cannot continue indefinitely. Trade may be bad in part of the world all the time, or in the whole world part of the time, but it cannot be bad in the whole world for the whole time. This is a sad reflection for the man who loves a gloomy outlook, but let us be thankful the majority of us prefer to look upon the brighter side.

Undoubtedly, depression of trade is still with us, says *Paper and Progress*, but as the weeks pass signs of recovery become more apparent. The improvement is still slow, but we believe sure, and the general impression is that it will gather speed with the opening of the New Year. Orders, though increasing in number, are still small, probably due to the reluctance of buyers to order in large quantities, hoping that prices will fall still lower, coupled with the fact that the end of the year is approaching, and many of those whose financial year terminates on December 31st are conducting their business with one eye on their stocks and the other on the till. Enquiries on a large scale are coming in, and in many cases are for repeats of orders that have ceased since 1914. This is a most cheerful and healthy sign.

One most interesting and pleasing feature is the improved quality of the papers being made to-day. The unsurpassed excellence attained by British papermakers in pre-war days is again making a most welcome appearance. The inferior, badly-made sheets have, we hope, vanished for good, and the excellence of the present makes should encourage buyers to place their orders with confidence. In a recent issue we intimated that although prices in some directions were still falling, hardening and even increases were almost certain. This view we still hold, for when demand overtakes supply, a corresponding upward turn in price is bound to come, for nobody, even a papermaker, can continue indefinitely to sell at less than the cost of production. This hardening in price is already taking place with certain prominent makers of krafts and wrappings, and is causing many large users of these qualities to look ahead regarding their supplies. Our advice to all is, do not leave yourselves with empty stock-rooms.

There are still certain parcels on the market at absurd figures, but what the vendors hope to achieve by their methods we are at a loss to understand. It certainly will not help to steady the market, but rather have a reverse effect, and gives an entirely wrong impression and retards the return of confidence in market values.

Taking a broad view of the paper trade, there is nothing to boast about, but the slight improvement has been fully maintained, and we are in full agreement with those who believe that normal conditions are not so far ahead as some would have us imagine.

# Apprenticeship in the Future.

By W. C. WARREN

*(General Secretary, National Society of Electrotypers and Stereotypers).*

The subject of apprenticeship is one of the most important—if not indeed the most important question—with which the crafts of the printing industry, and in fact skilled crafts in general, are faced. On the attitude now adopted depends largely the prosperity of business in the years to come. The lads in training and to be trained are the craftsmen of the future, and if the best is to be got from the trade for all concerned—the employer, the manager or overseer, the craftsman and the customer—it is essential that old-fashioned views on apprenticeship should be scrapped, and a better method evolved with the co-operation of all parties concerned.

## Haphazard Methods Out of Date.

In the past, boys have been brought into the trade with often no thought or care as to their suitability or their fitness; they have been bound for seven years, and it has been no one's business to really supervise their training; no provision has been made to deal with those boys who do not trouble to learn their trade but who simply regard apprenticeship as a fixed and certain job for seven years. The old system stands condemned.

In place of this haphazard method there should be joint responsibility and joint control, for craftsmanship is a matter of mutual interest. No one, whether he be employer, manager or workman, can get more out of any business than all concerned mutually put into it—the employer by his initiative, energy and business methods, and the workman by his craftsmanship. It is a mutual duty and

responsibility to exercise that pride of craft which alone can enable real advancement to be made.

It would be a good thing if joint apprenticeship committees were set up consisting of equal number of employers, and representatives of the craftsmen, such committees to have direct responsibility for seeing that only suitable lads are introduced, that efficient training is given in the workshop, and that compulsory attendance at technical training schools is made a definite condition in all indentures. These joint committees should also have the definite right to intervene, in the interests of the trade, if a lad was not being given a fair opportunity of learning his craft, and also of considering any case reported by an employer where a lad turned out a "waster," with the power given them in the indenture (as it is in the Electrotypers and Stereotypers Trade House Indenture) of cancelling the indenture as a final resort in such cases.

Then there is another matter deserving of serious consideration, and one that peculiarly affects our own trade in particular: that is the many varying methods of production. There is scarcely a foundry in this country where it is possible for an apprentice to learn all the different methods; for instance, some firms only produce stereotypes, in many cases at that only by the paper method, and the boy knows nothing of production by the plaster process, while electrotyping he never sees. Other firms produce electrotypes by the wax moulding method only, and the most efficient and perfect method that is known, of lead moulding, is something the boy can never learn in such a foundry. Obviously if the apprentice never sees these things he is not

Abstract of an address given at the December meeting of the Electrotypers' and Stereotypers' Managers and Overseers Association.

being given the education in the trade that enables him in after years to become that greatest asset to a trade—a completely skilled tradesman from start to finish in his business—it restricts his sphere of usefulness and possible scope of employment, and I would favour an interchange of apprentices from firm to firm during the seven years' apprenticeship, to enable every boy to get the widest knowledge that can be given him, employers would ultimately reap the advantage in the class of mechanics they would get, and the trade union need not object as an interchange of this description would not affect the ratio of apprentices to journeymen in any firm.

### Tests of Fitness.

No boy should be bound until he has served at least a three-months' probation, to prove his suitability. The joint committee should consider his physical fitness for the trade, his scholastic record, his moral, mental and temperamental qualities before he is bound, and later there should be periodical reports as to his progress, especially from the technical school, with certificates and encouragement given for merit shown.

With regard to the technical school, while the major part of the time spent at the school would be that of the employer, I believe in at least one evening attendance per week in the lad's own time. The small sacrifice would make the boy appreciate that something was due from him, for his own good and for the good of the trade to which he has been bound.

Of course there are difficulties. Employers in the past have considered the selection and training of apprentices their prerogative; some have regarded apprenticeship as a provision for cheap labour. Many trade unions on the other hand have not advanced beyond the consideration of wages, hours, working conditions, and certain benefit payments. If, however, we really desire to make progress, a larger vision is essential and a different atmosphere (and I gladly recognise that a better atmosphere does exist than formerly). Employers must recognise the need for mutual help, and must see that better results are more important than "prerogative." The trade unions must realise that only by assisting to secure the best craftsmen and the best results, can permanent prosperity be assured. After all, employers are not philanthropists, and trade unions are not charitable institutions; both are business propositions. I believe the view here put forward on apprenticeship is also a business proposition, and of mutual interest to both.

### The New Spirit in Industry.

A new spirit is certainly being evinced in the fact that both employers and trade unions are subscribing to the new Technical Institute which it is intended to open in London next year. I hope for much from that Institute. But the plant and methods to be installed must be the best that can be obtained; nothing obsolete will do; and I also hope the manufacturers will rise to the occasion, and loan plant to this Institute. It will be a good

advertisement for them to have their machinery accepted by the management committee (who, I hope, will be critical enough to reject any but the best). If the opportunity which now presents itself to the industry is grasped and enthusiastically supported by every section interested, then a splendid insurance will have been effected for the future prosperity of all concerned. Every unsuitable lad introduced is a mutual loss; every efficient craftsman produced is a mutual asset. It is true to say, the better the craftsman, the better the quality and the greater the output; and these lead to lower prices to customers, and thus to greater demand, which in turn leads to more prosperity in general, better wages and conditions for the workmen, and fair profits and return to the employers. As craftsmen and citizens we owe it to ourselves, to our trade and to our country to urge, not only in our own trade but in all trades, the imperative necessity of finding better methods of apprenticeship and training, which shall lead to universally efficient craftsmanship. This implies that the old system must be altered. To do this we need the help of everyone concerned to make the new system as nearly perfect as is possible.

## Paper Ware.

Have you tried papier-mâché ware? asks a writer in the London *Evening News*, who goes on to say: It is of the most cheerful colours, and of a most satisfactory lightness in weight. House pails, toilet sets, finger-bowls, powder-boxes, candlesticks, flower-pots, and the shallow flower-bowls now so fashionable are some of the goods made of it.

Papier-mâché, being pulped paper, can be moulded into any shape. When dried it can be japanned any colour; therefore matching one's scheme of decoration is an easy matter. Scarlet, black, blue, pink, mauve, and orange are some of the colours it assumes. The manufacture of the goods is a British industry which occupies many men and women in Norfolk.

The cost with respect to china is worth noting. A big washing-up bowl is just 3s. 6d., while a china bowl of the same size would be 12s. 6d. A whole toilet set—with basin, ewer, soap-dish and sponge-dish, can be had for 23s., and a pin-tray for 1s. 3d.

Papier-mâché is exceedingly light, a very important factor, since the heaviness of household appliances is a big item in producing fatigue and impairing efficiency. Where an ordinary washing basin weighs anything over 4lb., a whole toilet set of papier-mâché weighs but 5lb.

Yet the material is so hard that bridges and houses can be made of it, and even churches have been built out of it in Norway and Canada. Breakages are impossible. The substance may chip and the edge become pulpy, but it remains for long years absolutely impermeable to water.

## Electrotypers and Stereotypers AUXILIARY CONCERT.

### Special War Orphan Fund Appeal.

Anderton's Hotel, Fleet-street, was the venue of a very successful bohemian concert held on the 20th inst., under the auspices of the above Auxiliary, and at which Mr. W. Bullett, of Walbrook and Co., Whitefriars-street, occupied the chair. The large attendance and the splendid financial support given to the chairman gave every satisfaction to the Auxiliary Committee.

The lengthy programme, under the musical direction of Mr. Condy and arranged by Mr. George J. Harrison, was well sustained throughout by many talented artistes. Among these were: the Misses Alice Morrell (ballad vocalist), Fifi Hallam (elocutionist), Jessie Wood (soprano), Peggy Rhodes, Elsie Beaumont, Ethel Bullett (contraltos), Christine Hawkes (concertina), and Messrs. Emile Clare, Fred Wildon, E. Thornley-Dodge, Harry Speller, Norman Long (humorists), Albert Frisby, Chas. Ross (baritones), and the Southern Quartette.

Mr. W. C. Warren, general secretary, National Society of Electrotypers and Stereotypers, in moving a vote of thanks to Mr. Bullett, expressed admiration for the hard work he had put into his efforts in raising money for the War Orphans' Fund of the Printers' Pension Corporation. He had raised a sum of no less than £275, towards a fund which they would agree was one of the most worthy that could be aided. He said they were in honour bound to look after the war orphans of the men in their branch of the trade who had been killed in the war. A suggestion had come from a prominent "chapel" that they should take over from the Corporation the direct responsibility for the care of the orphans, and he would see that the suggestion was put in the proper place.

Mr. C. S. Yeates, a member of the Council of the Corporation, in seconding, congratulated Mr. Bullett on his successful effort, and said on behalf of the Council that it would be a source of great pleasure for it to know that there was a likelihood of their taking over responsibility of the war orphans, and thus lightening the heavy burden of the Corporation.

The toast of "The Chairman" was given with the singing of "For he's a jolly good fellow."

Mr. Bullett, in replying, said what he had been able to accomplish was largely due to the ready assistance of the president, Mr. A. Chadwell and Mr. W. C. Warren, also to many friends. Among those he mentioned as having helped him with donations were: Viscount Burnham, Lord Astor, the Overseers' Association, the *Daily Sketch* Chapel, and Messrs. W. H. Walbrook, John Fry, S. W. Senior, G. Cox, Hugh Dixon and T. H. Middleton.

## St. Bride Printing School.

### Annual Staff Dinner.

From time to time we publish reports of St. Bride's educational and social activities, but there is no more pleasing occasion than when the members of the staff, old students and their friends meet for their annual social gathering. On Saturday, December 17th, a hundred sat down to dinner at Holborn Restaurant, after which the evening was spent in listening to a good musical programme and interesting speeches of a high order.

The Principal, Mr. J. R. Riddell, occupied the chair, and was supported by Mr. and Mrs. W. Howard Hazell, Mr. and Mrs. T. E. Naylor, The Rev. A. Taylor and Miss Taylor, Geo. Eaton Hart, Mr. and Mrs. T. W. McAra, Mr. and Mrs. A. E. Jarvis, and Mr. F. Colebrook and other well-known men in the printing industry. Owing to a previous engagement, Sir Robert Blair and Mr. J. C. Smail, O.B.E., were unable to be present.

The evening will long be a memorable one to those who were privileged to be present for it showed in an unmistakable manner the good fellowship which exists at St. Bride.

The chairman in calling upon Mr. T. E. Naylor, M.P., J.P., to propose the toast of "The School," said he was sure that those present would wish him to convey to Mr. Naylor their congratulations on his election to Parliament. Those who know Mr. Naylor best, he said, recognise that he possesses qualifications of a statesmanlike character which if given an opportunity would soon convince the members of the House of Commons that they had an acquisition in their latest member. Mr. Naylor received a great ovation when rising to speak, at this, his first public meeting since his election to Parliament.

As may be expected, many of the comments centred around the transition of St. Bride School from the City to Southwark where, as Mr. Hazell stated, it was hoped to have a printing technical institute equipped to meet the demands of every section of the industry and worthy of the world's greatest printing centre.

The following toasts were heartily responded to:—"The King," by the Chairman; "Saint Bride School," proposed by T. E. Naylor, M.P., J.P., reply by W. Howard Hazell, J.P.; "Our Guests," proposed and replied to respectively by A. H. De La Rue, and T. W. McAra, J.P.; "The Staff," by Rev. A. Taylor, M.A. and G. A. Sayers; "The Ladies," by R. H. Watkins and Miss Taylor; "The Old Boys," by C. Harrup and C. Harvey; "The Stewards," by Geo. Eaton Hart and J. H. Burton.

All the speakers were in exceptionally good form, adding to the success of the evening—there was not a dull moment. The evening concluded by the audience joining in singing "Auld Lang Syne."

## Mr. A. W. Foster, B.A.

Mr. A. W. Foster, secretary of the Paper-makers' Association and of the Technical Section, had a very successful educational and professional career before he entered the service of the Papermakers' Association in 1913 in succession to Mr. T. H. Edwards, at that time secretary of the Association. A Derbyshire man by birth, Mr. Foster comes of Nonconformist stock, his father having been a well-known minister in the Congregational Church. He was educated at the Central School, Sheffield, and at Firth College, which afterwards became University College, Sheffield. Proceeding to St. John's College, Cambridge, as a Scholar of the College, he graduated as Senior Optime in the Mathematical Tripos of 1898. He also won the University Exhibition of the London University and took

MR. A. W. FOSTER, B.A.

his Intermediate B.A., London, with first-class honours in English history and literature. On the incorporation of the Sheffield University he had the honorary degree of B.A. conferred upon him. He was an honours man in the Solicitor's Final, 1903.

On the completion of his studies Mr. Foster practised as a solicitor in the Derbyshire County Court Circuit, but subsequently gave up this calling on his appointment as secretary to the Papermakers' Association. To the service of papermakers he has brought to bear an alert mind, sound judgment and untiring energy, together with unflinching courtesy and consummate tact. The work of the secretary has grown enormously in recent years and covers a wide field of intricate detail.

During the period of the war Mr. Foster rendered conspicuous service alike to the Government and to the paper trade. He was called upon to administer the first Waste Paper Order in 1917 at Central House, Kingsway, and was afterwards transferred to the Ministry of Munitions. When the Department of the Paper Control was established he became the first secretary, and after organising the Department, which was under the control of Mr. H. A. Vernet, he assumed the position of Director of Supply until the Armistice.

A gentleman of broad sympathies and refinement, Mr. Foster finds comfort and relaxation from his arduous labours in the solution of papermaking problems in the solace provided by music. His taste in literature is also wide and deep and he makes a special study of social and political questions. Then he is an authority on chess. While at Cambridge he was president of the University Chess Club and played against Oxford in 1898, besides which he was joint editor of the "Chess Year Book" in 1919 and is joint author of a useful brochure entitled "Chess: An Easy Game."

Mr. Foster is a ready and eloquent speaker whose mental alertness and legal training render him a keen debater, with the happy faculty of seizing upon vital points. These gifts were developed as a member of the Committee of the Union Society at Cambridge, at whose meetings he took an active part in the discussions, and the experience thus gained has proved of great value in his position as secretary of the Papermakers' Association.

## American News-Print.

The 44 companies in the United States and Canada reporting to the News Print Service Bureau produced 156,844 tons and shipped 156,365 tons of news-print paper during October. Shipments exceeded production by 8,521 tons. Production figures include 1,713 tons of hanging paper, of which 567 tons was produced in Canada.

The average daily production of news-print paper by the mills reporting for October 77.5 per cent. of the average daily output during the three months of greatest production in 1920, allowing for new machines recently started.

Production during October was 13,372 tons, or 9 per cent., and shipments 22,972 tons, or 16 per cent. more than in September. There was one more working day in October than in September.

Production by the reporting United States mills during the first ten months of 1921 was 252,151 tons, or 24 per cent. less than in the first ten months of 1920, and production by Canadian mills decreased 79,447 tons, or 11 per cent. during the same period, making a total decrease of 331,598 tons, or 18.5 per cent. by the 44 reporting companies.

Total stocks at reporting mills on October 31st amounted to 31,990 tons, or 8,640 tons less than on September 30th, and were equivalent to about four days maximum production.

## "Natsopa" Ballot Litigation.

### Inaccurate Reports of the Decision.

In the Chancery Division on Wednesday of last week Mr. Justice Sargant dismissed a motion for an injunction to restrain the plaintiffs in the recent action against the Executive of the National Society of Operative Printers and Assistants from distributing a circular which the defendants said contained an unfair report of the proceedings in Court.

Mr. Justice Sargant stated the facts and said that he had decided that the ballots were invalid but he had absolved the defendants from any charge of fraud. It had become necessary for the society to have a fresh ballot, but that ballot had not been in any way directed by the Court to be held. During the ballot which was now proceeding the Executive Committee sent out a circular letter to the members stating the result of the trial in terms which, though quite *bona fide*, were not in all respects accurate. As a kind of counterblast the plaintiffs issued the circular which was now complained of and which contained rather more serious inaccuracies.

His Lordship then read the plaintiffs' circular, and said that the defendants asked him to treat that circular as a contempt of Court and to punish the plaintiffs by granting an injunction against them. In his judgment he ought to do nothing of the kind. The law on the subject was well settled. He felt strongly that if the Court were to be troubled with examining statements of this kind between rival parties as to what took place in actions which were at an end, the Court would add to its burdens considerably without any good result. This was somewhat of a storm in a teacup. The motion must be dismissed with costs.

## Papermaking in South Africa.

A company is being formed in Natal to undertake the manufacture of wrapping paper from wattle wood and spent bark from the wattle extract mills, states the *South African Journal of Industries*. A process is reported to have been discovered by which excellent wrapping paper can be made from these materials. It is proposed to make newsprint from wattle bark combined with tambuki grass later on, and also cardboard for the manufacture of fruit and egg boxes from spent bark.

THE death occurred at Windsor last week of Mr. H. F. W. Deane, librarian to the Dean and Canons of St. George's, Windsor Castle, and chairman of Messrs. H. F. W. Deane and Sons, Year Book Press, Ltd., Museum-street, W.C.1.

## Mr. A. H. Munday's Lectures.

At the well-attended December meeting of the Liverpool Centre of the Printers' Managers and Overseers Association, under the presidency of Mr. H. R. Caldwell, Mr. A. H. Munday, London Manager of Fry's Metal Foundry, delivered a lecture on "Printing Metals." By means of photo-micrographs the structure of the various alloys used for printing purposes was made clear, and the effect of using sufficient tin in the alloy and of mixing the various constituents of the alloy at the correct temperature and by scientific methods was demonstrated. Other slides were shown, illustrating modern methods of temperature control in the printing office, notably that employed in the works of Messrs. Turner and Dunnett, Ltd., of Liverpool. The processes of manufacture of printing metals in Fry's Metal Foundry's works, with special melting pots, etc., were graphically illustrated and described. A very interesting discussion and series of questions and answers followed, the lecturer dealing with the various matters in a conversational and informal way. A cordial vote of thanks was accorded to Mr. Munday on the motion of Mr. W. Shepherd, seconded by Mr. Jas. N. Poole. This was suitably responded to.

On December 13th Mr. Munday also gave a lecture to the members of the Metallurgical Society of Manchester, Dr. Barclay, president of the Society, being in the chair. The subject of the lecture was "White Metals" and was illustrated by lantern slides giving photo-micrographs of many of the usual white metal alloys, including printing metals; and physical tests on a whole range of white metal alloys were given, much of this information being presented for the first time, the result of considerable experimental investigation, extending over a period. After the lecture a general discussion followed, amongst the speakers being Mr. S. Evans, and Mr. J. Cartland, M.C., M.Sc., the manager of the Manchester branch of Fry's Metal Foundry.

**A NEWSPAPER'S COSTS.**—The *Daily Herald* explains to its readers the costs of its production. Of paper, it says, the great rotary presses gobble up no less than eighty miles of news-print every night. Local correspondents throughout the country, paid at union rates in every case, account for over £150 a week between them, in addition to which the foreign news service costs an average of £75 weekly. Add to those another £125 for the services of the great news agencies. In addition, special articles, illustrations, and so on, swallow up another £60 weekly. There is yet to be added the salaries of the inside staff—reporters, sub-editors, typists, messengers, and so forth. "Add to that the cost of setting, printing and distribution," says the paper to its readers, "and you will realise roughly what it takes to get the *Daily Herald* to your breakfast table every morning for twopenny."

## New Paper Micrometer.

### Demonstrated to Papermakers.

Papermakers of the Aberdeen Division of the Technical Section met in Robert Gordon's College recently and Col. T. Davidson (Messrs. C. Davidson and Sons) presided over a record attendance, which included the following:—Messrs. W. Alison (director, Messrs. A. Pirie and Sons), C. M. Patullo (director, The Donside Paper Co., Ltd.), G. H. Gemmell, F.I.C. (Edinburgh), A. Smith (Glasgow), A. Caruth, A.R.C.Sc. (Paisley), and Dr. Maitland (Professor of Chemistry, R.G.C.).

### The Piezo Micrometer.

Mr. James Strachan, F. Inst. P. (Donside Paper Co., Ltd.), then exhibited and demonstrated the use of his new micrometer (already referred to briefly in his paper on "Some Notes on Paper-Testing" read at the first Manchester conference). He had christened this instrument the "Piezo Micrometer" because it measured accurately the pressure applied during the measurements. Although simple in design and easy to manipulate, the present instrument represented a considerable amount of experiment and research. It was sensitive to a twenty-thousandth part of an inch, and was constructed to stand pressures up to 45 lbs. per square inch, which he had ascertained by experiment was sufficient for all practical purposes. It would do what no other micrometer was capable of, viz., indicate very accurately the thickness of a sheet of paper under various measured pressures. It was not intended that this instrument should replace the micrometers already in use in the paper trade, but rather to supply a standard laboratory which would indicate the limits of accuracy in the ordinary micrometers. But this was not its only application. As a laboratory instrument it opened up a new field for investigation. The Piezo Micrometer could be used for the following purposes:—

1. Accurate expression of the thickness of paper in units of thickness under units of pressure.
2. The compressibility of paper expressed as interstitial air-space, as differentiated from porosity air-space in fibre and mineral. (The papermaker may vary the former very much, but the latter very little indeed).
3. The compressibility of papers of similar composition as a comparative measure of finish and closeness of texture.
4. The compressibility of paper, permanent and temporary, as a measure of elasticity; an important point in connection with the action of paper on type-face.
5. The permanent compressibility as a measure of the loss of bulk in bookbinding operations.
6. The determination of the influence of mineral matter and loading on the properties of paper ascertained from compressibility.

7. The determination of the connection between degree of finish and the actual pressure applied to the paper in calendering.

A full description of the Piezo Micrometer and its uses will be published later.

Mr. Strachan said that the fine workmanship displayed in the instrument had been admired by all who had seen it, and he considered that they were fortunate in having skilled scientific instrument makers in Aberdeen.

The meeting closed with the usual gossip half-hour, during which light refreshments were served.

 Laurens, J. A. L. Folding boxes. 172,311.

## Trade Notes.

A CHEQUE for £7,023 os. 2d., the proceeds of Fleet-street Week in aid of St. Bartholomew's Hospital, was presented last week by Mr. M. Blythe, president of the Committee of the Fleet-street Club, to Sir William Lawrence.

A CONFERENCE is arranged for the 30th inst. between the labour committee of the London Master Printers' Association and representatives of the London Society of Compositors with regard to a dispute which has arisen out of the operation of the new lino-type piece scale.

MR. HENRY STEAD, eldest surviving son of the late Mr. W. T. Stead, and proprietor and editor of *Stead's Review*, Melbourne, Australia, died on the 10th inst. on board the ss. "Marama." He attended the Press Conference in Honolulu and was on his way to the conference at Washington.

THE negotiations regarding wages of the Danish printers with the employers are proceeding, but with little hope of a peaceful settlement. The Copenhagen newspapers have arranged to produce a single composite sheet in the event of a strike, in the absence of a settlement on January 1st.

THE Southport Fire Brigade was employed for about two hours on Tuesday of last week in extinguishing a fire at the printing works of the *Southport Visiter* newspaper. All the workpeople had left for the night when the outbreak was discovered. A considerable amount of damage to wood, fittings, and machinery was done by the fire itself, apart from the unavoidable effects of the water used in its extinction.

**WAGE REDUCTION.**—The London Master Printers' Association has drawn the attention of its members to the fact that the remaining 2s. 6d. of the 7s. 6d. wage reduction is due to take effect on the first pay-day in January. With regard to the London Society of Compositors, we understand there was a conference last week between the L.M.P.A. labour committee and the Society's representatives, as a result of which the latter agreed to submit to their executive the employers' proposal of a half-crown reduction.

**L.M.P.A. BENEVOLENT FUND.**—For some years past a fund has been raised for the benefit of members of the London Master Printers' Association, who through age or other circumstances have fallen on evil times. This fund has already proved of great service, and several old members have derived great benefit from it. Owing to various circumstances fresh claims are being made and grants to beneficiaries have had to be increased, so an appeal to the charitable for help for these necessitous cases is now being issued from 24, Holborn, the signatories being Messrs. R. A. Austen-Leigh, Alfred F. Blades, W. Howard Hazell, Edward Unwin and J. H. Williams.

LIMITED liability companies in the printing and publishing trades increased their nominal capital during November to the extent of £1,397,200.

THE late Mr. Benjamin Dodsworth, of Messrs. J. and B. Dodsworth, Ltd., wholesale and export stationers, St. George-street, Shadwell, E., who died November 12th, aged 72, left £9,432.

MR. R. B. SIMNETT, managing director of Messrs. Sanders, Phillips and Co., Ltd., will give an address on "Costing" to the S.W. London Master Printers' Association on Tuesday, January 3rd, at 7 p.m., at the Chelsea Town Hall.

A GRATIFYING response has been made to the appeal sent out by the London Master Printers' Association on behalf of disabled ex-service men, a number of London printers having promised to give these men the benefit of vacancies occurring.

THE Association of Austrian Newspaper Proprietors publishes a statement describing the disastrous condition of the publishing trade owing to the enormously high price of paper, and threatening the suspension of all newspapers unless the Government intervenes to lessen the demands of the paper manufacturers.

THE December number of the "Print Collector's Quarterly" (J. M. Dent and Sons, Ltd.), contains generously illustrated articles on "Dutch Woodcuts—1480-1500," by Dr. M. J. Schretlen; "The Etchings of William Strang," by Laurence Binyon; "Notes on the History of Soft-Ground Etching," by A. M. Hind; and "The Etchings of Jacquemart," by Louis R. Metcalfe.

**REMOVAL.**—Mr. C. L. Richmond, upon terminating his representation of Messrs. Busbridge and Co., Ltd., has removed to Ludgate Chambers, 30-32, Ludgate-hill, E.C., and asks his clients to communicate to that address. He represents Messrs. Y. Trotter and Co., Ltd., and other mills, and is making arrangements to still include among his specialities tub-sized papers.

**MESSRS. JUBB'S CALENDARS.**—We have received from Messrs. T. G. and J. Jubb, the well-known printing metals manufacturers of Leeds, three useful calendars for 1922. Two are in the form of hanging cards carrying daily pads with every day's date in bold red figures, while the third bears a pad of twelve monthly sheets mounted on a card adorned with an excellent reproduction in colours of the picture "The Fisherman" by H. S. Tuke, A.R.A.

"FORM" in its November-December issue (No. 2 of Vol. 1), whilst doubtless open to criticism in some respects, is an interesting experiment in the graphic arts, particularly as only autographic or facsimile methods of production are employed. The art of the wood-cut is particularly exploited and the present issue has interesting features of colour prints from wood and lino cuts. It is produced by the Morland Press of 190, Ebury-street, S.W.1.

FORTY-THIRD YEAR.

Printed and Published EVERY THURSDAY  
by STONHILL & GILLIS,  
at 58, Shoe Lane, London, E.C. 4.  
Tel.: Stonhill, Fleet, London. Phone: 8407 City.

SUBSCRIPTION: Per Annum, 8s. 8d. (POSTAGE EXTRA).

Charges for Trade Advertisements:  
(Full page 8 by 5½ ins.)

Whole Page ...	£4 10 0	s. d.
Half Page ...	2 10 0	
Third Page ...	1 17 6	
Quarter Page ...	1 10 0	
One-eighth Page	17 6	
One-third Column	22 6	
One inch in Column	9 0	

An Extra Charge for Cover and Special Positions.  
Discounts according to Number of Insertions.  
Representatives throughout the United Kingdom and  
also in Australia, India, South Africa, United States  
Canada, etc.

All communications for the "BRITISH AND COLONIAL  
PRINTER AND STATIONER" should be addressed and  
Cheques and Post Office Orders made payable to—  
STONHILL & GILLIS, 58, SHOE-LANE, LONDON, E.C. 4

COPIES may be purchased at the Offices, as above  
or from Messrs. W. H. Everett and Son, Ltd., news-  
agents, 11, St. Bride-street, E.C. 4.

THURSDAY, DECEMBER 29, 1921.

## Current Topics.

### Facing Toward Better Times.

THOUGH the end of 1921 has brought but little amelioration of the severe slump in trade which has been the outstanding feature of the whole year, there are nevertheless some indications that the bottom arc of the curve of depression has at last been rounded, and that the months to come must bring a sure, if gradual, return to more healthy trading conditions. If the best is to be made of the opportunities that lie ahead, the future must be faced not with suspicion and apprehension, but with all the faith that can be mustered. It is with this thought in mind that the *British and Colonial Printer and Stationer* is about to take a step forward in the direction of increasing the usefulness of its services to the printing and allied trades. With the present issue this journal appears for the last time in the reduced format which has been familiar to our readers since the early years of the War. With next week's issue, the first of 1922, we resume our crown folio size. By this change we shall gain not only a somewhat

increased amount of space for literary matter, but also improved opportunities for the effective display both of articles and of advertisements. Though the step is being taken without any tangible promise of what the future has in store, we feel that the move is at any rate in the right direction. The coming new year, more than most new years, seems to mark the opening of a different era. The times call upon all in the printing and allied trades to take our courage in both hands and to enter the new year with big hopes which we intend to see fulfilled, and therefore making every effort to break down our customary limitations and to enter more generous fields of effort. Confidence begets confidence. By expecting and going out to meet a brighter future we shall at any rate be doing our part towards turning hope into realisation.

### Paper Trade Customs.

THE Paper Trade Customs which have just been adopted by the four organisations primarily concerned have now been printed in a handy brochure form, an improvement upon the former double foolscap sheet. This is the first revision that has taken place since 1906, and during the intervening years many new points have arisen which required to be provided for. For the first time an attempt is made at classification, so that in this as in other directions important departures have been made. This result of the prolonged deliberations of the four associations is regarded as an equitable adjustment of the customs of the trade, even-handed justice being meted out to all parties. It was high time, of course, that the regulations were brought up to date. The war was the cause of the delay, there being special and extraordinary regulations in force during that period. Moreover, everybody was too busy to attend to such a peace-time matter. Now that the paper trade has set its house in order, business can be conducted in conditions which bear closer relation to post-war times, and let us hope that the coming into force of the revised Customs in January next presages better times for the industry as a whole.

### New Zealand Preference.

THE New Zealand Government seems to be following the excellent example set by the Australian Commonwealth in giving preference to British goods. At all events this is the outstanding feature of the alterations embodied in the new Customs Tariff Schedules which were recently adopted by the New

Zealand Government. At the present time when British papermakers require all the encouragement they can get in export markets, the news from Oceania is extremely welcome. Thus we learn that new preference items in the schedules include playing cards, paper-hangings and writing paper. This is all right so far as it goes, but there is no mention of print paper, or of news-print in particular, and it is in this direction that the Australian Commonwealth has adopted such a patriotic attitude towards the Mother Country.

\* \* \*

### Germany's Opportunity.

STATISTICS concerning the imports of paper into certain Continental countries go to show to what extent the German paper industry is recovering its lost trade. Not only with her near neighbours, but further afield, she is finding profitable markets for her papers and boards. In the case of Italy, she has done better in the first six months of this year than during the whole of 1920. It is a sad reflection for British papermakers that in a period which has been the blackest that they have ever known, their rivals should be gaining ground so unmistakably. In Spain German paper products also hold an enviable position, and unless some lucky chance befalls the British manufacturer, even in the Imperial markets he may meet with grave competition. Already there is talk of legislation in Australia to sanction the admission of German goods. They cannot be kept out for ever. All these factors point to a stern necessity on the part of the home industry to push forward its advantages anywhere and everywhere, and it is the duty of the Government to see that no shackles are placed upon the industry in these efforts.

## American Printers' Greeting.

The Federation of Master Printers last week received the following cablegram:—

"Because the period of the year marks the anniversary of the first arrival in England of Benjamin Franklin, American Printerdom's Patron Saint, and also the signing of the Treaty of Ghent, and because this period culminates in the anniversary of the Man of Galilee, we wish to felicitate you upon the present state of peace, and to express the hope that nothing could ever destroy this relationship.—BEN FRANKLIN CLUB OF ST. LOUIS."

A cordial message reciprocating the greeting was sent by the Federation.

## Personal.

DR. W. W. YEN, acting Prime Minister for the Chinese Republic, following the resignation of the old Cabinet, was in 1906 English editor of the Chinese Commercial Press, when, among other things, he edited the Standard Chinese-English Dictionary, a work of 3,000 pages.

SIR CHARLES F. HIGHAM, M.P., is to be honoured at a complimentary dinner which is being arranged for January 27th at the Hotel Cecil by the various organisations and clubs of which he is a member. Those who desire to attend should write to Mr. Carl Hentschel, acting hon. secretary, at 106-7, Shoe-lane, E.C.

ALDERMAN MEREDITH T. WHITAKER, ex-Mayor of Scarborough, a well-known newspaper proprietor, has been presented with the freedom of Scarborough, which was voted to him unanimously by the Town Council, of which he is "father," in recognition of his long and valuable public services. Alderman Whitaker was born in London in August, 1841.

MR. A. E. GOODWIN, returning to London after a meeting in Newcastle, was a passenger in the Aberdeen-Penzance express which crashed into a stationary passenger train near Darlington last week. Fortunately he escaped from the alarming accident unhurt.

MR. ARTHUR PETERS, C.B.E., who has a life-time experience of the printing craft, has been appointed by the London Master Printers' Association to co-operate with Mr. Johnson in organising the London area. He takes up his duties on January 2nd.

MR. A. E. DENT has been appointed whole-time secretary of the Federation of Master Process Engravers, to take office at the end of January.

MR. HORATIO BOTTOMLEY, M.P., ceases to edit *John Bull* with this week's issue. It is explained that he finds it necessary at present to devote his whole attention to his personal and political affairs, and to the conduct of his two Sunday journals, the *Sunday Illustrated* and *Sunday Sports Telegram*.

MR. W. CHARLES PILLEY, who for many years past has been actively identified with *John Bull*, is to succeed Mr. Bottomley as editor.

MR. WILLIAM ROSS, paper mills manager, has retired from the service of Messrs. Robert Craig and Sons, Ltd., Airdrie, after 34 years' service—three years at Newbattle Mills, Dalkeith (which were closed a number of years ago), 15 years at Moffat Mills, Airdrie, and 16 years at Caldercruix Mill.

# Commercial Intelligence.

## CURRENT SHARE PRICES.

Amalgamated Press, 5½, 5½½, Pref., 16s. 3d.; Argus Printing, 8s. 7½d.; Associated Newspapers, 7 p.c. Cum., 18s.; Sir J. Causton, Pref., 90s., 92s. 6d.; Thomas De la Rue, 8p.c. Conv. 1st Mt. Deb. Stock, 99½, 98½; Eyre and Spottiswoode, Deb., 64½, 65½; International Linotype, 47, 50; Kelly's Directories, 24s., 23s. 6d.; Lamson Paragon Supply, 16s. 3d., Pref., 14s. 6d., 14s. 6½d.; Lanston Monotype Corporation, 10s.; Linotype A Deb., 50½, B Deb., 49½; George Newnes, 13s. 3d., Pref., 13s.; Newnes and Pearson Printing, 8 p.c. ## DIVIDENDS AND REPORTS.

**RONEO.**—For the year ended June 30th last a profit is shown, after allowing for depreciation, of £71,888 against £101,020 for the previous year. The amount brought in was £34,769, from which £23,000 has been reserved to meet the E.P.D., leaving £11,769 to be added, making a total of £83,658. Of this, sum there has been appropriated to meet the difference between cost price and market value of stocks the sum of £25,244, and £12,101 for interest on advances. It is now proposed to pay a dividend on ordinary shares of 10 per cent., against 25 per cent. for 1919-20, carrying forward £11,182.

**NATIONAL PAPER AND PULP (1920), LTD.**—Accounts for period ended June 30th, 1921, show balance at debit of profit and loss of £27,901.

**CHARLES MARSDEN AND SONS, LTD.**—Charles Marsden and Sons announce dividend of 5 per cent., less tax, on ordinary shares for year; £24,998 to write off promotion charges; £4,147 for depreciation; £105,055 forward.

**HUGH STEVENSON AND SONS.**—Accounts of Hugh Stevenson and Sons for year to September 30th, 1921, show net loss of £97,891 on trading after writing down stocks and after deducting proportion of profit from date of incorporation to September 30th, 1920. Directors point out that business has had a successful career for period of 62 years, and is still under same management and direction

as for past 20 years, and they believe that, given normal conditions, it will again show successful results. Directors are advised that contingent liabilities, mentioned in the balance-sheet, are not likely to materialise, and that total will in no event exceed £49,000. Balance-sheet shows loan from bankers £134,327 and sundry creditors £140,989. Stock, as written down, figures at £103,024 and sundry debtors £70,846.

## NEW COMPANIES.

**REGENT CARLTON CO., LTD.**—Capital £10,000, in £1 shares; printers, publishers, proprietors, vendors and distributors of newspapers, journals, periodicals, magazines, etc. Private company. First directors: A. Maitland, A. T. Davies, M.P., H. Aspden, C.B.E., J.P. and C. Nickson. Registered office: 8, Temple-avenue, E.C.

**KITTYBREWSTER PAPER SPECIALTIES, LTD.**—Capital £10,000, in 5,000 7½ per cent. preference and 5,000 ordinary shares, all of £1 each; to acquire the Kittybrewster Paper Specialty Works, Aberdeen, and to carry on business as manufacturers of and dealers in all kinds of paper products, stationers, printers, lithographers, etc. Private company. Subscribers: A. Ogilvie and J. Black. First directors: A. Ogilvie, F. E. R. Becker and C. M. Pattullo. Registered office: 106, Great Northern-road, Aberdeen.

**RED LION PRESS, LTD.**—Capital £3,000, in £1 shares; to adopt an agreement with E. G. Perman, trading as the "Red Lion Press," and to carry on the business of printers, publishers, lithographers, electrotypers, engravers, typefounders, etc. Private company. Subscribers: E. G. Perman and L. A. Dugdale. Permanent and joint managing directors are E. G. Perman and a person to be nominated by the Rolls House Publishing Co., Ltd. Registered: 3, Pemberton-row, Gough-square, E.C.4.

**BUSINESS PUBLICATIONS, LTD. (London).**—Capital £5,000, in £1 shares; booksellers, printers, publishers, trade experts and advisers, advertisement contractors, etc. Private company. Subscribers: J. M. Hawkins and Edith Ford.

**BESTWORTH, LTD.**—Capital £2,500, in £1 shares; to acquire from R. C. Everett the rights for the use and sale of the advertising

machine known as the "Stereomotorgraph" in the counties of Sussex and Suffolk, and to adopt an agreement between Mitchells Pictures, Ltd., Automatic Advertising, Ltd., H. Smith and R. C. Everett. Private company. First directors: R. C. Everett, O.B.E., and A. E. Heming. Registered office: 156, Western-road, Brighton.

**THOMAS BURNLEY AND SONS (1921), LTD.**—Capital £10,000, in £1 shares; to adopt an agreement with W. A. Holker, and to carry on the business of cardboard box manufacturers, manufacturers of and dealers in leather and fibre suit cases, and travelling requisites, handbags, letter files, portmanteaux, pocket books, fibre leather, raw hide or rubber, mechanical appliances and mill furnishings, makers of and dealers in games and toys, etc. Private company. First directors: W. T. Holker, W. A. Holker, T. Livesey, J. Livesey, H. H. Jackson and J. Molyneux. Registered office: Phoenix Works, Platt Bridge, Wigan.

### COMPANY MORTGAGES AND CHARGES.

*Fresh Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 1908, and Satisfaction registered pursuant to Section 97 of the same Act. (The registration of Satisfaction is not compulsory).*

**L. UPCOTT GILL AND SON, LTD.** (printers, London).—Satisfaction in full on December 15th, of second mortgage debenture, dated May 13th, 1920, securing £4,700. (Notified December 13th, 1921). Also satisfaction in full on December 15th, 1920, of first mortgage debentures, dated April 16th, 1912, securing £12,500. (Notified December 14th, 1921).

**"WESTERN MAIL," LTD.**—Satisfaction in full (a) to the extent of £1,000 on October 6th, 1911, and (b) to the extent of £6,000 on October 4th, 1921, of mortgage dated March 31st, 1896, securing £7,000.

**HAYWARD AND MARTIN, LTD.** (paper merchants, wholesale stationers, etc., London).—Satisfaction in full on October 1st, 1921, of debentures dated December 6th, 1918, securing £1,000.

## Trade in Printing Type.

**EXPORTS.**—The exports of printing type during Jan.—Nov. amounted to 278 tons (of the value of £101,215) as against 259 tons (£78,212) in the corresponding period of 1920, and 496 tons (£83,800), the amount exported in the eleven months of 1913.

**IMPORTS.**—In the eleven months ended November of the present year printing type imported into this country amounted to 26 tons (of the value of £12,734) compared with 24 tons (£9,345) during a similar period last year and 64 tons (£10,775) in the eleven months of 1913.

## Gazette.

### A WORD OF CAUTION.

In giving the official Gazette information, it must be distinctly understood that we take official records as we find them, and accept no responsibility for inaccuracies, while, as an almost invariable rule, the facts will be found correct. We advise our readers, before forming hasty judgment, to consider that there may be in each case satisfactory explanation which does not appear on the records.—Ed.]

### ENGLAND AND WALES.

#### THE BANKRUPTCY ACT, 1914.

##### RECEIVING ORDER.

Smith, D., and Sons (a firm), 19-20, Rupert-street, Leman-street, London, cardboard box manufacturers. December 15th. Public examination, February 28th, at Bankruptcy-buildings, Carey-street.

##### PUBLIC EXAMINATION.

George, Samuel (trading as Power Book Co.), 44, Harrington-road, South Kensington, author, March 10th, at Bankruptcy-buildings, Carey-street.

## Amalgamated Press.

At the meeting of Amalgamated Press, Ltd., held on the 22nd inst., Sir George A. Sutton, Bart. (the chairman) referred to the new printing works on the Sumner-street site, which was acquired prior to the war. The new building, he said, is now making noticeable headway. The printing of the firm's various magazines and periodicals is at present carried on in no fewer than eight different factories, large and small, situated in London and Gravesend. These new premises will be very extensive, and it is proposed to concentrate the periodical and magazine production in three large factories—Sumner-street, Lavington-street, S.E., and Gravesend, Kent—and thus close down the smaller works which it is no longer easy to run economically.

The printing works, when fully effective and complete with new buildings and plant, which has mostly been provided for already, will be quite the largest organisation of the kind in Great Britain, probably in the world, and will be able to deal with every demand that may be made upon it in every department of printing.

Mr. William Blackwood, who has been in the services of the company for nine years, for six of which he has been the editor of *Answers*, was appointed a director.

The death has taken place in the Edinburgh district of Mr. Lachlan Sinclair, at the age of 91. He was for sixty-eight years in the employment of Messrs. Nelson and Co., publishers, and was one of the pioneers of the three-colour process.

## Paper Standardisation.

### Present Position of the Movement.

At the recent conference of the American Paper and Pulp Association, Mr. Thomas E. Donnelley delivered a comprehensive address on "The Paper Industry as seen by a Printer." Part of his discourse related to the question of standardisation, which is making rather more headway in America than in this country.

Mr. Donnelley's observations under this heading were as follows: The greatest thing in standardisation in the paper industry was accomplished by the paper manufacturers themselves when they went to the substance number. I don't think any standardisation can ever accomplish what that has accomplished for the industry. Standardisation is only useful if it accomplishes a purpose, and it is dangerous if it takes out the initiative that is always inherent in a man who is trying to make progress. In other words, if we standardise things so that it is almost impossible for a man with invention or initiative to break over that standard, really we are putting a noose around our own necks.

There is the question of standardisation of sizes. Of course, you have accomplished through the Typothetæ a most remarkable case of that in standardisation of sizes of covers. I noticed some reports the other day, showing that two years ago it took a certain manufacturer eight different sizes to market 66 per cent. of his product, while recently, through these two new sizes, he is marketing 85 per cent. That must have meant very much better manufacturing conditions.

The question of reducing the number of sizes in stock and the number of weights is a question that cannot be handled arbitrarily; it must be done after a great deal of study.

The committees of the three organisations, at least of the merchants and the printers, must get together and get data from all the principal merchants in the country and from all the principal printers, and find out what sizes and what weights they use, and in what quantities, to see if we cannot reduce the number of sizes carried in stock.

### The Hypotenuse Oblong.

In connection with the question of sizes, I would just like to interject a few remarks upon a new size which is being promulgated very enthusiastically, called the hypotenuse oblong. Some German savant conceived the idea that he would make the proportions of a sheet of paper such that every time it was folded these proportions would always be retained and the whole question of sizes would be solved. That proportion is 706 to 1,000. The whole argument is that if you have a page one size and you fold it again, you get the same proportions. I realise the Germans are great scientists, but when it comes to art they are rotten, because it is exactly what they don't want when they reduce sizes to keep the same proportions. Now

a 9 by 12 is a handsome size for a quarter, but if you fold it to 6 by 9 where the proportions instead of being three to four are two to three, the 6 by 9 is a very much better size than if it had been  $6\frac{1}{2}$  by 9.

There are various tastes in the printing business just as there are in art and architecture. For 500 years the best minds in the printing business, even before the invention of printing the best minds in the bookmaking business, have studied over the question of proportions of sizes, and anybody who has any knowledge of or is familiar with printing realises that the small book you want long and narrow, and as you increase the size you want it wider. It is just as ridiculous for some German geometrician to say that the sizes of all printing should conform to some formula that he works out as to say that the magnificent and beautiful proportions of the girth in columns should all be changed because some engineer has some mathematical theory that they should be different.

I just made this remark because I am afraid that somebody at some time will approach one of your associations and you will adopt the hypotenuse oblong basis without giving it thorough study. I am not saying it is not correct, but I think it is a question that deserves a good deal of further consideration.

### Standardising Weights.

The question of weights is something which I think should be standardised. Of course, there is no reason in the world why we should retain the ream. I think everybody is agreed on that. In England they are trying to adopt the metric system. They are going to sell paper in thousand sheets, and the substance numbers there are to be the number of grammes in a square metre of paper. I can readily realise why England is so interested in the metric system, because a large proportion of England's product has to be marketed abroad and they are constantly coming in competition with the papers from Sweden and Germany. But the trouble about the English system is that the substance number has no designation, it has no connection with the weights in pounds of the paper which they sell. I am not sure that the decimal system is correct. Certainly if we are going to stay in domestic business (and I don't see much chance of foreign business out of the United States for some time) it would be much simpler than any other system I know of. But that is another thing on which we want co-operation between the manufacturers and the dealers and ourselves.

In the statement of affairs of Harry Taylor of 2, Guthlaxton-street, Leicester, and 56 Burrow-road, Finchley-road, London, paper merchant, gross liabilities are put down at £565 12s. 6d., of which £404 9s. is expected to rank for dividend. The assets are estimated to produce £292 14s. 8d., leaving a deficiency of £111 13s. 4d. The causes of failure as alleged by debtor are lack of capital, slump in general trade and difficulty in getting outstanding book debts.

## Tub-Sized, Loft-Dried Paper.

Many buyers of paper have heard their printer say, "This sheet is tub sized, loft-dried paper." There are also many who do not understand what the words really mean.

In the first place, paper is sized with a glue solution made from hides. This process gives to the paper a writing surface, and also holds the fibres more firmly together, thus making the paper stronger.

There are two ways of sizing paper. The size in the cheaper papers is mixed with the pulp before it goes over the papermaking machine, and, in many cases, dries in hard lumps in the paper when going over the drying rolls. The tub sized sheet passes through a tub of size after the paper is made, and, consequently, receives an even coating of the size on the top and bottom surfaces. This process insures a better surface and a stronger sheet.

There are also different ways of drying paper. The cheaper papers are dried as they are made on the machine. Others are air dried, passing on festoons until dry. The loft-dried sheet is hung up in lofts for weeks until thoroughly matured. This latter operation also makes the sheet stronger and gives it the crackle so pronounced in high grade bond and ledger paper.

## Paper Materials at the Imperial INSTITUTE.

A special correspondent of *The Times* who has been visiting the Imperial Institute thus refers to the activities of that institution in investigating papermaking material from various parts of the Empire: In a large room furnished with glazed cupboards and cabinets the Institute preserves many material records of its successes in this branch of its work. They form a remarkable demonstration of the almost romantic interest that lies in science strictly applied to the cause of commerce. Here are, for instance, pieces of timber from New Zealand, bamboo from East Africa, elephant grass from Uganda, and other grasses from West and South Africa. They are relics and results of experiments in papermaking. New Zealand—to indicate the history of one of them—has a good deal of waste wood, which, the Institute suggested, might be turned into paper pulp or employed in distillation. Experiments on a small scale were made with the samples sent from New Zealand, and a report was made to the New Zealand Government stating that the yield of pulp and paper was quite promising, and pointing out the different factors to be considered before the manufacture could be taken up commercially. Into these points the Forestry Department in the Dominion is now looking; and meanwhile the paper made in the laboratories can be examined in the Institute's very modern museum.

## SALE BY AUCTION.

*Re the Vacuum Transfer Syndicate.*

**C**OMplete PLANT, Machinery, Accessories and Fixtures of Lithographic Process Printer, which will be SOLD BY AUCTION by

**W. B. HALLET, FOX & WHITE,**

at their rooms 280-282, Holloway Road, N.7, on January 5th, 1922, at 12 o'clock precisely.

Catalogues of Messrs. Pakeman, Son & Read, Solicitors, Selborne House, 11, Ironmonger Lane, E.C.2, or of the Auctioneers, 280-282, Holloway Road, N.7, 11, Queen Victoria Street, E.C.4, and Finsbury Pavement, E.C.2. 16240A

Replies to Box Nos. to be addressed to the Offices  
"BRITISH AND COLONIAL PRINTER AND STATIONER," 58, SHOE LANE, LONDON, E.C.4.

## SPECIAL PREPAID ADVERTISEMENTS

**SITUATIONS VACANT, REPRESENTATIVES or MANAGERS REQUIRING POSITIONS, AGENCIES, BUSINESSES WANTED or FOR DISPOSAL, MACHINERY and MISCELLANEOUS.**—Charges for Advertisements of the above class are Three Shillings for 21 Words or under; One Shilling extra for every line or portion after. Seven words to be reckoned for each line.

**SITUATIONS WANTED.**—Special Rate for Operatives only; One Shilling and Sixpence for Twenty-One Words and One Penny per Word after. Minimum charge One Shilling and Sixpence. Cash to be sent with order.

**ADVERTISERS,** by paying an extra fee of Sixpence, can have replies addressed to the Office of this Journal under a number, and such replies will then be forwarded post free.

Telegrams: STONHILL, FLEET, LONDON.  
Telephone: No. 8407 CITY.

## Miscellaneous.

**T**ECHNICAL WRITERS on Subjects of Interest to the Printing and Allied Trades are invited to communicate with Box 13870.

**W**ANTED, SIX-DRAWER TYPE CABINET, each drawer capable of holding complete Fount of Type; for use with Gammeter Multigraph. —R. H. Longbotham and Co., 41, Station-road, Doncaster. 13876

**W**ASTE PAPER: ITS RECOVERY AND RE-MANUFACTURE. By Jas. Strachan. A Fund of Information; price 12s. 6d. —Stonhill and Gillis, Publishers, 58, Shoe-lane, London, E.C.4.

**B**UCHANAN'S EQUIVALENT WEIGHT CALCULATOR. A Time-saving Pocket Companion for Papermakers and Paper Users. Standard size (12-in. long), in boxwood; £2 2s. —Stonhill and Gillis, Publishers, 58, Shoe-lane, London, E.C.4.

## Price of Coloured Flints.

Only a few weeks ago the lowest available price of coloured flints was in the close region of 25s. per ream, 20 in. by 30 in. The chief Belgian manufacturer has decided to cut to rock-bottom level, and the English agents are now offering at 20s. 3d. per ream, free delivered, and 5 per cent. discount. The reduction will be welcomed in the box-making trade, where the high costs of material have turned the attention of box-users to other and cheaper substitutes. Boxes of a very high standard were being used in every branch of trade just prior to the war, whereas post-war conditions have either stopped the use of boxes altogether or have lowered the standard.

## Wood Pulp Board Dispute.

An important paper trade dispute was ventilated in the King's Bench Division recently, before Mr. Justice Sankey. The plaintiff, Arthur Howe, a dealer in paper and cardboard, trading at 60, Paddington-street, London, made serious allegations against the defendants, Messrs. Relph, Darwen and Pearce, importers, of 76, Finsbury-pavement, in connection with contracts for the supply by the defendants of wood pulp boards, and claimed damages for conversion, detention, fraudulent misrepresentation and breach of contract.

According to the case for the plaintiff the defendants, on March 12th, 1915, agreed to supply during that year 200 tons of wood pulp boards manufactured by the Forssa Bruks Aktiebolag, of Nasviken, at £7 10s. per ton f.o.b. Gothenburg. In February, 1916, defendants represented to the plaintiffs that the Forssa Bruks would be unable to make any further deliveries except with an increase of 40s. in the price, and requested the plaintiff to agree to pay the extra in future. In August, 1916, defendants sent an invoice for 346 bales, and represented that they had paid the increased price. In reliance on this, the plaintiff took delivery, and paid £500 on account. These representations were, it was alleged, false. The defendants, though they invoiced various amounts to the plaintiff, failed to deliver them, and so repudiated their obliga-

tions. In September, 1916, the defendants shipped on the ss. "Atle," at Gothenburg, 538 bales, consigned to the plaintiff. The ship was captured by the enemy, and as the defendant refused all information as to the goods or the insurance which they had effected for the plaintiff, the latter was unable to say whether the insurance had been recovered. The goods should have been insured for £1,962, instead of which the defendants insured them for £1,000, and thus there was a loss of £980. Plaintiff further alleged that defendants had refused to carry out a contract of April, 1916, to supply 376 tons.

The defendants, in their reply, denied many of the plaintiff's allegations, and asserted that no representations of theirs were false or fraudulent. Even if they were untrue, they were made in the belief that they were true. Defendants counter-claimed £204 as the balance of the price of the 200 tons, and damages for repudiation by the plaintiff of a contract to take 538 bales, and also under other heads.

The hearing of this case was to have been resumed on Thursday, but at the opening of the Court counsel intimated that a settlement might be effected if a few minutes were allowed for consultation.

Counsel having consulted privately,

Mr. McKinnon said: I am glad to say we have agreed to terms in this case. There will be judgment for the plaintiffs for £1,200, each party to pay their own costs. My friend Mr. Stenham desires it to be said that his client withdraws the charge of fraud. I think I ought to say, further, that the money in court will be paid to plaintiffs in part satisfaction of the £1,200.

Mr. Justice Sankey acceded to the terms of settlement.

## Cardboard and the Tariff.

Among the recent rulings on Customs at New York was one which concerned cardboard. A protest of the International Forwarding Co. in regard to certain articles composed of cardboard covered with surface-coated or surface-decorated paper, was overruled by the Board of United States General Appraisers. Duty on the merchandise in question was levied at the rate of 35 per cent. *ad valorem* under Paragraph 324 of the Act of

1913 as articles composed in chief value of surface-coated or surface-decorated paper. The importers contended that cardboard was the more valuable component of the merchandise, and that the articles should have been assessed accordingly at the rate of 25 per cent. *ad valorem* under Paragraph 332 of the said Act, as manufacturers composed in chief value of paper not specially provided for. The protestants, however, were unable to show in their testimony that the cardboard was actually the more valuable component of the goods, and protest was overruled.

## Leatherboards.

The imports of leatherboards into the United Kingdom during November were as under:—

Port of Importation.	Country whence Consigned.	Quantity. Cwts.	Value. £
Bristol	Finland	1,063	786
London	Germany	295	275
"	Netherlands	60	26
"	Finland	88	87

## Corrugated Fibre Board.

### Effect of Age on the Bursting Strength.

The effect of age on ordinary papers has been fairly well established by a number of careful investigations extending over long periods of time. This has never been done in the case of fibre containers, however, owing to the comparatively recent development of this industry. During this development, there has been considerable speculation as to whether age would have different effects on this material than on ordinary papers. Such a difference might reasonably be expected because of the use of various chemicals such as silicate of soda and those used in the sizing. In addition, container board, and especially corrugated board, is made up of a variety of fibrous substances, such as straw, waste papers, kraft pulp, etc., any of which might have some effect on the future strength of the board.

The Milton Laboratory, Pittsburg, says Mr. J. D. Malcolmson, recently had occasion to re-test some seventy different samples of corrugated boards which were secured in 1916. Most of these boards were made in 1915 and 1916, although some dated back to 1910. At the same time these samples were obtained, over four years ago, they were carefully tested with the Mullen Tester, ten punctures being made in each board to secure an average. The original samples and data were all preserved, and the tests repeated in 1920, using, in each case, the same manipulation, namely, a wheel speed of 120 R.P.M. and the so-called "constant level clamp."

The results of these two series of tests indicate:—

1. That the average of 71 samples showed a decrease in Mullen test of only one per cent. in four years.
2. That chemicals, such as silicate of soda and sizing, had no noticeable effect on the final strength of the boards.
3. That deterioration is roughly proportional to the amount of ground-wood present, which has also been found true in the case of ordinary papers.
4. That boards containing a large amount of new kraft or sulphite fibres very often show an actual increase in strength. Thus nearly every sample made by "Mfr. No. 5" increased in strength. These particular boards all contained a large percentage of new chemical wood fibres.

Microscopical analyses showed that these samples containing a large proportion of ground-wood suffered most and became extremely brittle. The kraft liners, on the other hand, showed no loss in bending value.

It was noticed that very few of the boards showed the "washboard effect" when wetted. Where this occurs, it is probably due to the silicate of soda "striking through" the board, saponifying the rosin sizing. This usually indicates an inefficient application of either adhesive or of sizing, since many corrugated

boards but a few weeks old will show this effect when wetted. In other words, this investigation also tends to show that silicate of soda, properly applied, has no ill effects on the waterproofing of corrugated fibre boards.

## Oat Hulls and Paper Board.

Summarising experiments carried out with oat hulls as a material for the manufacture of paper board, Mr. S. D. Wells, engineer at the Forest Products Laboratory, Madison, Wis., states that the results of the semi-commercial and mill runs on oat hulls indicate that they are capable of utilisation in the manufacture of board, using digestion with lime in the same manner that straw is treated. The yields obtained and character of the stock indicate that the cost of converting oat hulls to board would not exceed the cost of converting straw, and in the yard and rotary-room labour savings of approximately 50 cents per ton of product are possible. Savings in steam required for drying are also possible. The bursting strength of sheets made from oat hulls is not as high as from strawboard, but very satisfactory results may be secured, using oat hulls mixed with straw in equal proportions, and tougher sheets than are possible from either oat hulls or straw are obtained by cooking small amount of cotton linters together with the hulls in the rotaries. Raw cotton linters are a very cheap source of fibre and grades not very satisfactory for fine papers on account of dirt, although possessing excellent fibre, are entirely satisfactory. The possibilities of using even larger proportions of linters in the manufacture of other grades of paper than were used in the lime cooks of these experiments warrant investigation, and in the opinion of the president of a large board manufacturing organisation who witnessed the mill trials, seem capable of considerable application.

The facility with which straw was replaced by oat hulls in the trials would indicate that paper and board manufacturers using straw as a raw material could readily try out oat hulls in their plants under their particular conditions and ascertain the feasibility of the material for their particular product.

The runs on mixtures of oat hulls mixed with either cotton linters or cotton hull fibre, using the sulphate process, are very interesting and the excellent colour of the pulps, together with the high yields, indicate that a promising source of pulp for the manufacture of book, high grade magazine, common writing and similar grades might be developed. The experiments indicate that a mill fitted with rotary boilers and washing and bleaching equipment could handle the stock.

THE address of the Royal Literary Fund is now Stationers' Hall, Stationers' Hall-court, E.C.4.

## Paper Trade Statistics.

### Overseas Countries' Imports and Exports of Paper.

A return issued by the Board of Trade for the month of October gives the following interesting statistics relating to the imports and exports of paper of certain foreign countries and British Possessions:—

**NORWAY.**—During the eight months ended July, 1921, printing paper was exported to the extent of 40,337 tonnes (1 tonne=2,204 lbs.), as against 83,231 in the previous eight months and 34,354 in the corresponding period of 1919. Packing paper exported during the eight months this year amounted to 10,504, last year to 48,670, and in the 1919 period to 26,320.

**SWEDEN.**—Paper of all kinds exported during the first eight months of this year represent 94,819 tonnes, compared with 186,578 and 70,228 in the corresponding periods of 1920 and 1919 respectively.

**DENMARK.**—Paper and paper manufactures were imported into Denmark during the eight months ended August of the present year to the value (in 1,000 kroner) of 17,128, compared with 29,054 last year, and 16,787 in the corresponding period of 1919. (Krone=1-1½d.).

**NETHERLANDS.**—Paper (including printing, writing and news-print) was imported into the Netherlands during the first nine months of the present year to the extent of 17,208 tonnes, compared with 25,156 in the corresponding period of last year and 6,279 during the nine months of 1919. With regard to exports of news-print, writing and printing paper, a big increase is shown for the nine months this year compared with the 1920 and 1919 periods, viz., 22,475 (1921), 11,293 (1920), and 10,552 (1919).

**BELGIUM.**—During Jan. June of the present year Belgium imported paper and cardboard (in tonnes) to the extent of 8,948, compared with 16,510 in the corresponding period of last year and 10,232 in the six months of 1919. Regarding her exports of the same class of merchandise, these reached 12,894 tonnes during Jan.-June of the present year, compared with 9,332 a year before, and only 442 in the six months of 1919.

**FRANCE.**—Paper and manufactures, including books, were imported into France to the extent (in 100 kilos) of 544,368 during the eight months ended August this year, compared with 1,003,480 for the corresponding period of 1920 and 618,617 for the eight months of 1919. Exports of paper for the respective periods were: 211,040 (1921), 234,763 (1920) and 129,935 (1919).

**SWITZERLAND.**—During the six months ended June last year printed books imported into Switzerland amounted (in 100 kilos.) to 10,722, against 20,329 in the six months of 1920 and 12,066 in the corresponding period of 1919. The amount of printed books exported over the same periods, reached 2,329 in 1921, 2,728 in 1920 and 5,555 in 1919. Printing paper ex-

ported in the six months of the present year amounted to 26,400, compared with 60,179 last year and 4,128 the year before.

**SPAIN.**—Spanish exports of cigarette paper aggregated 2,172 tonnes for the first seven months of this year, as against 1,833 last year and 1,704 for the corresponding period of 1919.

**ITALY.**—Paper, white or dyed in the pulp (given in 100 kilos.) exported from Italy during the first five months of the present year totalled 16,862, as against 19,180 for the five months of 1920 and 16,610 for the corresponding five months of 1919.

**GREECE.**—During the month of January, 1921, 218 tonnes of printing paper were imported into Greece, compared with 647 for January, 1920, and 83 in January, 1919. The imports of writing paper in January for the respective years amounted to 346 (1921), 121 (1920) and 50 (1919). During the twelve months of 1920 printing paper imported reached 4,579 tonnes, compared with 2,276 for the twelve months of 1919. Writing paper imported amounted to 1,099 during the twelve months of last year, as against 1,113 in the twelve previous months.

**SIAM.**—Unprinted paper imported into Siam during January-August of the present year amounted to 1,374 tonnes, as against 959 for the corresponding period of last year and 750 for the eight months of 1919.

**JAPAN.**—During the seven months of the present year, packing paper was imported into Japan—the figures representing 1,000 kin (kin=13228 lbs. avoirdupois)—to the extent of 3,885, as compared with 11,292 last year and 6,289 for the corresponding period of 1919. Printing paper imported during the seven months of the three years amounted to 5,954 (1921), 9,740 (1920) and 1,516 (1919). The quantities of paper and paper manufactures exported during the three periods are not given, but in values the exports were: 1921, 14,610,000 yen; 1920, 20,139,000; and 1919, 18,800,000 yen.

**BRAZIL.**—Brazilian imports of paper and paper manufactures, represented 47,817 tonnes during the twelve months of 1920, compared with 51,979 in 1919 and 28,255 in 1918.

**BRITISH INDIA.**—Paper imported into British India during the five months ended August of the present year amounted in value to 86, 61,000 rupees, compared with 2,154,100 rupees in the corresponding period of 1920, and 83,98,000 rupees during the five months ended August, 1919. (100,000 rupees=a lac; 10,000,000 rupees=a crore).

**CEYLON.**—During the six months ended June, 1921, 18,247 reams of printing paper were imported into Ceylon, as against 35,572 and 12,207 in the corresponding periods of 1920 and 1919 respectively. The imports of writing paper during the six months of the three years were: 24,750 reams in 1921, 35,902 in 1920 and 19,662 in 1919.

**NEW ZEALAND.**—Paper to the extent of 249,795 cwts. (£828,000) was imported into New Zealand during the seven months ended July, 1921, as against 138,172 cwts. (£271,000) last year, and 174,912 cwts. (£396,000) for the corresponding seven months of 1919.

**BRITISH SOUTH AFRICA.**—Printing paper im-

ported into British South Africa during the seven months ended July of the present year amounted to 173,000 cwts. (£561,000), compared with 106,650 cwts. (£272,000) in the corresponding period of last year. Wrapping paper was imported to the extent of 48,728 cwts. (£174,000) during the seven months of this year, an advance on the 31,884 cwts. (£116,000) of the previous year.

**EGYPT.**—Given in kilos. the imports of cardboard into Egypt amounted to 2,210,415 during the eight months ended August as against 5,886,152 last year; cigarette paper, 245,008 this year and 600,420 last; printing paper, 1,615,465 this year and 3,542,566 last year; wrapping paper, 5,188,810 this year and 5,108,393 last; writing paper and envelopes, 771,807 this year as against 1,113,458 last year. Exports of cigarette paper during January-August, 1921, amounted to 63 tonnes compared with 193 in 1920 and 319 in 1919.

**CANADA.**—News-print was exported from Canada during the five months ended August, 1921, to the extent of 5,133,221 cwts. (£35,774,000) compared with 6,325,216 cwts. (£29,218,000) exported in the corresponding five months of 1920 and 5,425,567 cwts. (£19,177,000) in the 1919 period. Wrapping paper exported over the five months' periods amounted to 25,529 cwts. (£230,000) this year, 159,777 cwts. (£1,656,000) last year and 117,336 cwts. (£898,000) in 1919.

## Canadian Export Paper Co.

The Canadian Export Paper Co., Montreal, has officially announced a price of \$75 a ton for news-print sold under contract for the first quarter of 1922, a reduction of \$5 a ton from the current price.

The company further announces that its re-organisation plans, recently undertaken, are now complete and that Mr. E. L. Crooker, of the Laurentide Co., is in charge of the company's affairs, assisted by a permanent board of management representing Price Bros. and Co. and the Brompton Pulp and Paper Co. The re-organisation was brought about by a desire to bring the mills which export products through the company's agency into closer relationship with their customers.

The company now controls for export purposes some 800 tons of news-print a day, the output of three of the largest and best equipped mills in Canada. This enormous tonnage enables them to undertake the entire requirements of even the largest consumers of news-print without inconvenience or risk of disappointment, while the company's extensive operations also make possible the economical handling of its products and the prompt solution of any emergencies that may arise.

Mr. Crooker, the manager in charge, has long been associated with the paper business, and for several years past as sales manager for the Laurentide Co., Ltd., in which capacity he has represented the company both in the United States and Great Britain, as well as in Canada. He has an extensive acquaintance with newspaper publishers in all three countries.

## The Waste Trade Board.

### Protest Meeting of Employers.

An important matter of principle was considered on the 9th inst. at a mass meeting for the waste trade held at St. Pancras Hotel, Mr. Walter Hyman presiding. There was a representative gathering, in which those who handle papermaking materials were conspicuous, and considerable feeling was shown over the recent action of the Trade Board for the Waste Trade in regard to fixing wages. It is held to be the function of the Board only to fix minimum rates, whereas, it is stated, the Board has decided rates of wages all round, thus adding to the cost of handling waste, which in these days is a matter of grave concern.

While in favour of trade boards on the general principle, it was urged at the meeting that the form in which wages had been fixed should be withheld pending the finding of Lord Cave's Committee, which has been sitting.

A copy of a letter sent to Dr. Macnamara was read, and a resolution, moved by Mr. H. Baker (West of England and South Wales), seconded by Mr. J. Crossingham (London), was passed, endorsing the protest conveyed in the letter, and it was decided that a copy of the resolution, as showing the feeling of the meeting, should be sent to the Minister of Labour.

The meeting took the opportunity of passing a vote of thanks to Mr. Ashley Ward for the able manner in which he had put the case of the waste trade before Lord Cave's Committee, and to Mr. Hyman for the assistance he had rendered in that connection.

## Russia and the Paper Situation.

One of the causes of the critical condition of the world's market is the small consumption of paper in the Soviet Republic. Before the war Russia imported large quantities of paper from Germany, Finland and Scandinavia. The Soviet Government has been making large purchases of foreign paper.

Russian mills are almost completely shut down, and all stocks have been requisitioned by the Government, only leaving a small amount for the people.

Newspapers regulate the number and size of the copies by the amount of paper allowed them by the Government, deducting what is required for propaganda books. There are only ten newspapers published in all Russia—five in Moscow and five in Petrograd, all belonging to Government.

Large quantities of German paper are consumed in Moscow, both reels and reams. Prices are favourable, and the Soviets have sent an agent to Berlin to make large purchases. In normal times Russia can consume all the Finnish and German exports.

# The Miehle

EQUIPPED WITH FACE-UP PILE DELIVERY.

This delivery enables the printed sheets to be delivered directly on to a board ready for removal in bulk by truck without disturbing them. The piling of the sheets in this way gives the printed matter ample time to dry, and not only dispenses with the usual labour required to move the sheets from a delivery board every half-hour or so, but safeguards the work against spoilage through smudging of ink, etc.

Write for full particulars of **The Miehle** *The British Made Press for Perfect Printing*
